"The operation and maintenance problem is a very serious and massive one," a staff report noted. "In fact it may well be scandalous. Billions of federal, state and local tax dollars have already been invested in plants over the years which are not doing the job intended.

"This is known and admitted—and little if anything has been done over the years to correct the problems."

Environmental Protection Agency Administrator Douglas M. Costle appeared before the subcommittee and criticized a consultant's recommendation that funding for advanced water treatment plants be suspended until design and maintenance problems are better understood.

"I feel very strongly that the recommendation that we discontinue funding advanced water treatment pending further investigation is sadly misconceived," Costle said, calling the recommendation "a dramatic illustration of the old cliche about throwing the baby out with the bath."

He said new regulations and amendments to the federal Water Quality Act will make it possible to reduce some costs.

Rep. Ronald (Bo) Ginn, D-Ga., chairman of the subcommittee, has called for more careful planning and improved design for future plants.

"We do not always need to apply technology just because it's there," Ginn said. "If there are better ways to achieve progress and the goal of clean water, that is what we are seeking—not symbols or monuments or ego re-enforcement." ●

## CARTER'S CURIOUS ARM SALES POLICY

### HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. FINDLEY. Mr. Speaker, the United States has refused to build eight frigates worth $2 billion for Iran but will sell $350 million in armaments for the vessels.

The refusal means an enormous loss in shipbuilding jobs for the United States. In fact, since being turned down by the United States, Iran has decided to buy 12 frigates, not just 8. The larger package will cost about $2.5 billion and the Netherlands and West Germany will get the business. I made this disclosure for the first time August 18.

Coming at a time when the U.S. dollar is sinking abroad while the U.S. shipbuilding industry is sinking at home, the administration's handling of the Iranian transaction deserves high marks for stupidity. The three shipyards which build the U.S. frigate, Bath Iron Works in Bath, Maine, and Todd Shipyards in San Pedro, Calif., and Seattle, Wash., and their employees will, of course, be most directly hurt by such a confused and shortsighted decision. But the Nation as a whole will also suffer.

The reason for this curious decision to reject business which would have brought badly needed foreign exchange and jobs to the United States, to refuse to sell the ships but to sell the weapons that will equip the ships, is to be found in an absurd interpretation of its arms control policy by the administration.

Simply put, the armaments we have agreed to sell cost less money and therefore fit within an arbitrary and meaningless gross dollar ceiling on arms sales the Carter administration has set. The frigates, at $200 million a piece, cost more money and would have exceeded the ceiling. Therefore, this country finds itself in the ludicrous position of selling the armament suites or "lethal" components to Iran while it refuses to sell the "nonlethal" ships merely because the former are cheaper.

The Carter administration is willing to increase the firepower in the Persian Gulf by selling the armaments to Iran but not to benefit the U.S. balance of trade and provide more jobs for Americans.

The Carter administration's decision had nothing to do with arms control rationale. Indeed, it was a rigid attachment to the appearance of arms control rather than to the reality of arms control which motivated this amazing decision.

A dollar ceiling should not become the primary determinant of U.S. arms control efforts. Prudent and sincere arms control must depend upon a careful assessment on a case-by-case basis of U.S. interests, of the security needs of our friends and allies, and of regional and international military balance and stability. If these criteria were fulfilled in the case of the sale of the 12 armament suites to Iran, they must also apply to the transfer of the frigates themselves. If they do not permit the sale of the frigates, neither do they permit the transfer of the armament suites. To deviate from fundamental arms control principles and to attach instead the utmost importance to a dollar figure of annual sales displays an insincerity in the U.S. approach to arms control and robs our arms control efforts of all credibility.

Frankly, the Carter dollar ceiling is not impressive no matter how viewed. The fiscal year 1978 arms control ceiling of $8.6 billion belies the fact that total U.S. foreign military sales agreements worldwide for fiscal year 1978 will, it is estimated, approach $13.2 billion. The difference between $13.2 and $8.6 billion involves sales to countries exempted from the ceiling which includes

the members of NATO, Australia, Japan, and New Zealand and it includes all construction, making no distinction between a military hospital or an airbase runway. Of the $5 billion in foreign military sales agreements with Saudi Arabia in fiscal year 1978, for example, over $2.5 billion is in construction and, therefore, does not count under the administration's arms sales ceiling.

I attach several recent commentaries:

[From the Washington Post, Aug. 19, 1978]

IRAN SHIP PLOY LETS U.S. SKIRT CEILING ON ARMS

(By Don Oberdorfer)

The Carter administration has found a way to supply Iran with some very expensive armed frigates without violating the president's self-imposed ceiling on overseas arms sales.

The method: Let European countries build the costly ships, and then the United States will supply the less expensive weapons to make them effective.

Rep. Paul Findley (R-Ill.), who disclosed the ploy yesterday, called it "an enormous loss in shipbuilding jobs for the United States" with no gain in actual control of armaments. "Coming at a time when the U.S. dollar is sinking abroad while the U.S. shipbuilding industry is sinking at home, the administration's handling of the Iranian transaction deserves high marks for stupidity," he said.

According to Findley's account and interviews with embarrassed administration officials, Iran is buying more than $2 billion in hulls and propulsion systems for 12 guided missile frigates from Dutch and West German shipyards. However, the United States is selling the guns, missile and torpedo systems and other weaponry for the ships at a total cost of $350 million.

Informed sources attributed the idea for the split-level sale to Lt. Gen. Howard Fish, formerly the Pentagon's chief arms salesman, and Ambassador to Iran William H. Sullivan. Both the shah and top U.S. Navy officials were reported to be unhappy with the arrangement but powerless to find a way to allow Iran to buy the ships from the United States without breaching Carter's ceiling.

A recent White House review of arms for Iran within the past several weeks looked again at the separate sales of ships and their arms but took no action to change it, the sources said.

Congressional and executive branch sources said the shah has long wanted to buy heavily armed frigates as escorts for the four big Spruance class destroyers that the Nixon and Ford administrations agreed to sell to Iran. A preliminary request to purchase the frigates was made to the United States late in 1976.

As Carter's policy took shape in 1977, the decision to impose a U.S. arms sale ceiling beginning in 1978 caused a problem for the Iranian ship purchase.

Carter and the shah discussed the arms purchases in their meeting last November. According to administration sources, the shah was told then or a short time later that he would have to choose between the frigates or some other high priority weapons, such as the Airborne Warning and Control System plane, but he could not buy them all and stay within the Carter ceiling.

Originally the shah requested eight frigates, which would have cost at least $200 million each. Together with associated equipment, the total cost would have been $2 billion. The other weapons that Iran is buying from the United States this year will cost at least $1.8 billion and perhaps as much as $2.6 billion—a large share of Carter's overall arms sale ceiling of $8.6 billion for the year.

After deciding to buy his ships from the Netherlands and West Germany—and to increase the order to 12 ships—the shah formally requested the U.S. weaponry so that the frigates would have the same armaments as the destroyers they were to protect. This would make the ships more compatible and improve operational efficiency.

Within the last few days, Congress has been informed that the sale of U.S. weaponry for the 12 European-built ships has been approved by the Carter administration. The arms include two kinds of surface-to-surface missile systems, high powered automatic guns and a modern torpedo launching system.

---

[From the Houston Post, August 27, 1978]

SHELL GAME

"The Carter administration has found a way to cut off our arms to spite our balance of payments and American workers, but still deliver the goods. President Carter set a ceiling of $8.6 billion on U.S. arms sales this year to curb the spiraling global weapons trade. He considered this an exemplary move since the U.S. is the world's leading arms salesman. But the shah of Iran has been pressing us to sell him eight small warships in addition to other military hardware.

"Arms sales to Iran this year will total about $2 billion without the vessels—guided-missile frigates to be used as escorts for the large destroyers the U.S. had previously sold the shah. Their total cost would exceed $2 billion. If the entire arms sale package to Iran were made within the $8.6 billion ceiling, the administration decided that it would account for too great a proportion of the total allowed sales. If, on the other hand, the frigate sale were approved in addition to the other arms sales, it would breach the administration's self-imposed limit.

"But the shah of Iran is no ordinary customer. Iran is a major oil producer, a key member of OPEC, shares a long border with the Soviet Union and occupies a strategic position in the Persian Gulf region. When Iran, reportedly prompted by the U.S., decided to let West Germany and the Netherlands build the frigates (the order was raised from eight to 12), the administration agreed to supply the missiles, guns and torpedoes to arm them. Iran wants our weaponry because of its compatibility with the equipment on the destroyers. Luckily, the administration found that the $350 million cost of this hardware will not violate its arms sales ceiling.

"The deal will be a windfall for West German and Dutch shipbuilders, but the administration's ploy to get around its own barrier has drawn sharp criticism from members of Congress such as Rep. Paul Findley. The Illinois Republican charges that the maneuver cost us a chance to improve our deficit-dogged trade balance and forfeited contracts and jobs that could have gone to the U.S. shipbuilding industry.

"A declaration by the administration that it intended to work for reduction of the world arms traffic would have been more prudent than setting a specific ceiling on our own weapons sales without regard to what the rest of the world was doing. Once again the administration has trapped itself by adopting rigid policy limitations on a matter that demands maximum flexibility. If the only penalty for such blunders as the Iran frigate deal were official embarrassment, it might be discounted as a self-inflicted wound—richly deserved. But the nation must pay for its administration effort to circumvent its own policy in lost jobs and more red ink on our trade ledger."●

## UNDERLYING CURRENTS OF PROPOSITION 13—FURTHER DISCUSSIONS

---

### HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. BROWN of California. Mr. Speaker, the passage of proposition 13 in California was most obviously against high and unfair taxes. Our Nation's history records many movements against taxes, beginning with the colonial import taxes, and continuing with tariff fights, poll taxes, and now property taxes. I have commented these past few weeks on the underlying currents of proposition 13 that deal with the planning and structuring of Government programs. Our Government must tax its citizens and industries to finance its programs because it does not control the production of wealth in our society. The major forms of government revenue today are property, sales, and income taxes.

I would like to focus mainly on the questions of fairness and equity while I discuss the advantages and problems of these tax systems. Specifically, fairness means only taxing realized income and accounting for personal hardships. Horizontal equity means those persons earning the same income pay the same taxes, given considerations of fairness. Vertical equity means progressivity of rates, that is, those persons most able to pay higher taxes should, while less fortunate persons would pay proportionally less. The recent revision of the California income tax toward greater fairness and equity follows from the pressure of the Jarvis-Gann initiative. I hope proposition 13 will be a catalyst for many further such reforms throughout the Nation.

High property taxes in California caused the passage of proposition 13, and similar high property taxes in other States have placed further tax relief measures on the November ballots of these States. Further elections will probably have still more such initiatives. While I am concerned with the consequences these measures will have on local governments, I agree that the present system of property taxes is unreasonable. I believe these taxes are inherently unfair and should be completely phased out.

They are regressive and especially difficult for elderly and poor homeowners to pay. They tax unrealized earnings without concern to income differences. They also do not account for inflated property values. They discourage home improvements by the poor who cannot afford to have their property increase so much in value. These taxes force many people to sell their homes, go into debt and accept lower standards of living. Business and apartment owners usually pass their property taxes to consumers through higher prices.

Moderate priced homes and businesses are much more likely to be fully assessed as market values and taxed at full rates than are higher priced properties. The

more expensive estates are more likely to have untaxed or undertaxed improvements, such as swimming pools, tennis courts, and large gardens. Property taxes thus fail both in terms of fairness and equity. I feel these inherent defects, therefore, supersede any usefulness property taxes might otherwise have.

Sales taxes, unfortunately, are also regressive. Everyone pays the same rate, regardless of their ability to pay. These taxes thus take more proportionally from the incomes of poor people than from the incomes of wealthy persons. I believe, however, that sales taxes can be reformed into a more equitable revenue system. These taxes are relatively simple to administer and collect and are on realized income (though this is debatable with items bought on credit). Exemptions, such as that presently allowed on food in most States, can be expanded to cover other basic needs. The poor, who spend the greater portion of their income on the basic needs, would then pay less of their income to sales taxes. A luxury surcharge could be added to items generally bought by high income persons. A surcharge would allow those persons to pay higher taxes who can most afford them. The net result of these and similar adjustments hopefully would be a more progressive sales tax structure.

Income taxes are the major source of revenue for the Federal Government. The taxes are on realized income and are potentially the fairest and most equitable of all our tax systems. They are easily collected from most workers, though self-employed and wealthy people have greater inherent opportunities for fraud. Unfortunately, various loopholes and other problems now exist with income taxes that reduce their fairness and equity. The oil depletion allowance, for instance, lets oil companies not only have the usual investment credits and loss writeoffs, but also a special break for depleted resources. It seems horizontally inequitable to me to allow companies to extract minerals from the earth, process it, sell it at a large profit and then deduct an enormous sum from their taxes because they now have less of that mineral to extract.

It is argued that oil companies should receive some recompense for land that has deflated in value due to the loss of minerals. The oil depletion allowance, though, gives the companies a set deduction from their taxes regardless of their actual losses. I believe it would be fair to eliminate this allowance and simply expand the investment tax credits and loss write-offs. This would allow greater horizontal equity.

The double taxation of stock dividends is also inequitable. Investment tax deductions do not really solve the problem. I would favor having dividends only taxed as income to the stockholders, and withheld profits at full corporate tax rates. Personal exemptions, in vertical terms, are an example of how income taxes are made less progressive. Someone in a 50 percent tax bracket saves 50 cents that would have been paid in taxes for every dollar they can deduct from their income. A poorer person in a 10 percent bracket, though, only saves 10 cents for every dollar they deduct from their taxable income.

Income taxes would be much more progressive if tax credits were substituted for exemptions. The dollar a poor person is able to reduce from their taxes is a much larger proportion of their total tax bill than the dollar a wealthy person saves. Thus aid would be focused more on those in need of it. I believe there are only a few extraneous circumstances where people earning the same income should not pay the same taxes. It would be fair to allow tax credits for these few conditions.

The present hodgepodge of exemptions and credits should be greatly reduced. This would probably allow a large reduction of general income tax rates, and thus be much more beneficial to the whole public. Inflation causes income taxes to become unfair. People are pushed into higher tax brackets without increases in real income. Inflation does not affect those persons, though, already at the highest tax levels in this manner.

The present combination of regressive taxes and income tax loopholes renders our overall tax structure unfair and inequitable. Polls show that tax reform is high in the priorities of the public, just behind controlling inflation and lowering the crime rate. I believe inherently flawed taxes, such as those on property, should be gradually eliminated. Other taxes, such as those on sales and income, need many basic reforms. Our general principle should be fairness and equity. Proper tax reforms would be a great improvement over our current standard of tax rebates and cuts. The relief would be large and permanent, as polls and proposition 13 show the public wants. We in Congress should thus restructure our Government financing and follow the message of proposition 13.●

## REPRESENTATIVE FASCELL SPEAKS ON HUMAN RIGHTS

### HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. SIMON. Mr. Speaker, one of our colleagues who has provided exceptional leadership in the field of foreign affairs, as well as leadership for the people of his district and leadership of this Nation, domestically, is Representative DANTE FASCELL.

I serve on the Commission on Security and Cooperation in Europe, more commonly known as the Helsinki Commission, which he chairs.

I have the opportunity to view his deft, friendly but firm leadership at first hand.

Recently he spoke to the Chicago Council on Foreign Relations on the human rights policy and, particularly, the outcome of the Belgrade meeting.

I am taking the liberty of inserting it here because I know some of my colleagues who join me in my high esteem of DANTE FASCELL will want to read it.

HUMAN RIGHTS POLICY: THE U.S. AT BELGRADE

(Address of Rep. Dante B. Fascell)

For the last year and more President Carter's human rights policy has been a subject of continual comment, concern and controversy in Washington and around the world. In the United States, especially, the Administration's stand has been repeatedly put through the wringer of pragmatic questioning. Is it working? What are the results? What has it cost? Where is the payoff?

Those questions are proper, of course. They are the tests we would use in judging any political investment, whether it be for national defense or international decency, for creating jobs at home or promoting democratic values abroad.

Unfortunately, when we try to judge the efficacy of the policy against this standard of tangible achievement we inevitably get bogged down in partial and contradictory measurements. Which matter more—the release of thousands of political prisoners in Indonesia or the thousands more still detained in brutalizing conditions? Was it a plus to have martial law lifted in Nicaragua, or do we score it as a debit that people have been killed in riots there?

Is the increase in the number of Jews and others permitted to leave the Soviet Union a tribute to our steadfastness or a temporary and cynical gesture meant to buy off American public opinion for a few months?

The fact is that facts mislead. The scorecard on human rights shifts so often that tallies which can be made to look good today can also turn dismissal tomorrow. And the attempt to keep count of successes and of failures diverts us from what I think are the two central aspects of the pursuit of human rights.

The first has been cynically described as the "feel-good" quotient of the policy. It makes Americans feel good—after Vietnam and Watergate and other episodes of governmental deceit—to be on the side of the angels again.

I like the description, but I reject the cynicism with which it is applied.

There is nothing wrong—and a great deal right—about a policy which reminds Americans of the values our history reflects. There is nothing wrong—and a great deal right—with the attempt to project those values again into the international arena as the expression of an American consensus about ourselves and our role in world.

The second aspect of the policy is its nature as a long-term commitment. Advocacy of human rights is not a quick fix. The renewed American determination to defend civil and religious liberty, to seek broadened protection of individual rights and welfare holds no promise of easy victories. The effort is certain to be a long one, but so have been our programs to aid economic development around the world. The pursuit is likely to be frustrating, but so are trade negotiations or disarmament talks or the search for cancer cures or treatments.

We do not draw back from those endeavors just because the price is high in terms of patience and perseverance. Nor can we turn away from the pursuit of human rights because the goal remains distant. At his inaugural 17 years ago, John Kennedy asked Americans "to bear the burden of a long, twilight struggle, year in and year out . . . against the common enemies of man: tyranny, poverty, disease and war itself." The struggle is still on, and it is too early to say for sure who is winning it.

The Belgrade Conference, now nearing its

conclusion, however, gives me a change to illustrate the conduct of human rights policy as part of that long, frustrating, but crucial "twilight struggle." The first formal meeting of the 35 Eastern, Western and neutral states which signed the 1975 Helsinki accords on security and cooperation in Europe shows up all the problems of trying to keep a scorecard on human rights. It also demonstrates all the potential for gradual change that makes American policy one of hope and promise.

Let me go back over some basic, recent history to put the Belgrade talks in perspective. The Helsinki accords themselves were the outgrowth of a twenty-year-long Soviet effort to obtain formal recognition of the postwar boundaries of Europe. Moscow sought a peace treaty. It got instead a declaration of political resolve in which, as tradeoffs for the recognition of the sanctity of existing frontiers, the West insisted on provisions for "a freer flow of people and ideas"—another goal of President Kennedy—across those frontiers.

When the long negotiations ended at the Helsinki summit, most Western observers thought and said that the Soviets had gotten the best of the bargain. The West acceded to the legitimacy of Communist conquest in Europe. In return, the East made undertakings to respect human rights and dignity, but without the expectation that it could be held to the promises it made.

What happened, instead, was a remarkable turning of the tables. It was accomplished not by any brilliant strategists in Washington or at NATO, but by a small band of intrepid Soviet citizens who began to say out loud—so that the rest of the world could hear—that the Soviet Union must make good on its own laws and its Helsinki commitments. Their demands made us respond. It was they—members of what has come to be called the Soviet Helsinki Watch and, later, the signatories of Charter '77 in Prague—who made the West aware of the value of Helsinki.

A year ago yesterday when the Helsinki Commission held its first public hearings in Washington on human rights, former Ambassador Leonard Garment summed up what had happened. "The existence of a formal, written document, to which the Eastern regimes gave their public consent and their formal stamp of legitimacy, has made a difference.

The words matter and are beginning to move human minds," he testified. Then he added: "Perhaps we in the West, who pay such frequent tribute to the worth of ideas, should be a little embarrassed that at the time of Helsinki we entertained such a low opinion of their power."

By the time of Belgrade—the substantive part of which began last October—our opinion had changed. We in the West approached the conference as a significant test of our ability to give and get an account of the progress promised in the Final Act, the formal name of the Helsinki document. And from the East—in a few areas of Helsinki undertakings—we could already see surface gestures of compliance.

Those gestures were made with an eye to Belgrade, out of concern for what would be said there if there were no signs of movement. The gestures included the amnesty of political prisoners in Romania, Poland and, later, Yugoslavia. The rise in the emigration figures from the Soviet Union and other countries were also gestures toward the Helsinki promise to "facilitate" the reunification of divided families. The sale of a few more Western papers and magazines and the easing of travel restrictions on some Western journalists also constituted gestures in the field of information.

For the scattered positive signals, however, there were balancing negative acts. Journalists could get around with greater ease perhaps, but they could also be subjected—and were in the Soviet Union and Czechoslovakia—to outrageous harassment. New applicants for exit visas could be processed with greater speed, but many with applications long pending could be—and were in the USSR—treated with brutality and renewed contempt. Finally, and most tragically, 16 of the 43 members of the Soviet Helsinki Watch have been jailed for daring to raise their voices to demand domestic compliance with international human rights standards.

On the second anniversary of the signing of the Final Act, the U.S. Commission issued its comprehensive report on compliance. In a capsule judgment, it found: "Progress has been inadequate. Measured against either the hopes voiced at the Helsinki summit or the need for smoother and more stable relations among the signatories, the implementation of the Final Act has fallen short."

That judgment formed the background of the U.S. effort at Belgrade, an effort made up of two parts. The first part was simply to register our dissatisfaction with the pace and quality of progress under the Final Act, especially its human rights and humanitarian provisions. But beyond holding the Communist states to account for their nonperformance, the second American goal was to seek reaffirmation of the common Helsinki commitments themselves, to stimulate better behavior out of the examination of the imperfect past record.

The first goal has been fully met. In fact, the first eleven weeks of the conference brought a welcome bonus. In the period devoted to the review of Final Act implementation, the firm U.S. voice of Justice Arthur Goldberg—whose many distinctions include his being a Chicagoan—was joined by that of many Western and neutral spokesmen in a persuasive chorus of concern on the issue of human rights.

The Communist delegations tried to blunt this assault, but failed. They argued first that the Final Act itself made any criticism of their domestic conduct off limits, because the accords banned "interference" in internal affairs. The West, however, showed clearly that human rights are matters of international agreement, of specific Final Act pledges, and thus not purely issues of domestic competence.

Then when Justice Goldberg cited the treatment of specific individuals—Charter '77 signers jailed in Prague or Soviet dissenters such as Yuri Orlov, Aleksandr Ginzburg, Anatoli Shcharansky and Andrei Sakharov—the Soviets made a feeble attempt to rebut us with "you're-another" arguments. Guilty of racial discrimination, of imprisoning the Wilmington Ten, of letting millions go jobless—even, they said in apparent seriousness, of executing Sacco and Vanzetti 50 years ago—the United States had no right to lecture others on respect for human rights.

I do not claim that these exchanges make up a dialogue. Obviously, on both sides, there was much more give than take. But the Belgrade review period did something no other international meeting has done: it broke the silence barrier on human rights. Diplomats found themselves talking about a subject they generally prefer to duck, but having been confronted with the issue, they found no way to put it aside. Instead, because the Helsinki process is a continuing one and the Belgrade talk will be revived when the signatories meet again in Madrid in two years, human rights has won a place on the international agenda it should have had long ago.

I want to discuss the importance of that precedent in a moment, but first let us look at how far we have gotten with our second goal: reaffirming the Final Act's importance as a means of stimulating improved performance. Barring new developments today, the Belgrade Conference's concluding document has not yet been agreed upon. But it has now become obvious to all that the Soviet Union and its closest Warsaw Pact allies are inalterably opposed to a document of real substance. We have worked hard for such a document throughout the proceedings in the face of Soviet intransigence. At a minimum, the concluding document will note that delegates met and talked and that they will meet again in Madrid.

So brief a concluding document would be a disappointment to many. But I do not believe that the final communique should be considered the sole—or even the main—measure of the impact of the Belgrade meeting. Certainly it would have been better to have a conference document of real political substance that gave a candid assessment of implementation, reaffirmed the commitment to all provisions of the Helsinki Accords and marked out specific areas for improved performance. But given the rule of consensus, under which each country has effective veto power, a strong Belgrade concluding document was never in the cards.

Nevertheless, what has emerged has the potential for being just as valuable. After Belgrade comes Madrid, another occasion to insist on implementation of the Final Act, to hold up the record for candid review, to try and win the fresh commitments that could not be achieved at Belgrade. And after their experience at Belgrade—that of being forced to hear out their critics—the Communist states must be even more determined than before to avoid a second round of diplomatic embarrassment.

They have two roads to choose from. One is to renounce the Helsinki process, to boycott the Madrid meeting or so rewrite its rules that it become an empty exercise. The other is to show a measure of good-faith implementation between Belgrade and Madrid that deflates criticism and lightens the international atmosphere.

Neither alternative is attractive. The Helsinki accords were meant to be a capstone of the Brezhnev detente policy. To turn away from them is to pronounce that policy a failure.

The other choice—that of heeding the concerns voiced at Belgrade and moving to remedy the practices which drew such heavy fire—is not easy either. It would mean, over the long run, according the individual real protection against monopoly state power. To do so would be to invite more challenges against Communist rule in its present form, to tolerate that very diversity which every dictatorship must deny.

There is, of course, one other way for the Soviet Union to slip from between the rock and the hard place where, on the human rights—Helsinki issue, it is now held. That is for the West and the United States, in particular, to relax the pressure for Helsinki compliance so forcefully brought to bear in Belgrade.

We could slip into that path too easily. We could say that we asked too much from Belgrade, got too little and need to try another course. We could go further—in our impatience for results that can be totted up on a scorecard—and pronounce the whole push for human rights standards a profitless game. And thus we could let the Soviet Union, for one, off the hook.

But I said earlier that we had set an important precedent at Belgrade in legitimiz-

ing international, diplomatic treatment of concrete human rights issues. The precedent is one we must observe as well as insist that others acknowledge. If we change our signals now because of dissatisfaction with the Belgrade outcome, we lose the new ground onto which we moved ourselves and the East-West relationship.

The precedent set at Belgrade is only as valuable as the follow-up to it. Having won the right to speak out on the importance of our values to our security and the ordering of a real détente, we cannot afford to turn away, back into silence.

We have found in Helsinki a framework in which to pursue a policy which both feels good and can do good. The patience to put up with the slow pace of results from that policy is something Americans have yet to learn.

Along the road we are certain to have anxious moments and even set backs of our own. But the road toward international respect for human rights is the right one for us to be traveling.

At Belgrade we began the trip with honor and realism. We are moving in the right direction.●

## "SPAIN WEEK"

### HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. RODINO. Mr. Speaker, for many generations New Jersey's 10th Congressional District has been an excellent example of the cultural diversity which has given America its unique strength. Our Hispanic citizens, with their strong family bonds and rich heritage, have been a vital part of the community ever since Spanish immigrants began settling in Newark in the last century.

Newark Mayor Kenneth A. Gibson and the city council have declared this week "Spain Week" in honor of the tremendous contributions of the Hispanic people to the city.

I am very proud to join in this salute and I would like to place in the CONGRESSIONAL RECORD the following article on this special occasion which appeared in the Newark Star-Ledger's Sunday, September 10, 1978, edition.

NEWARK PLANS HONORS FOR ITS HISPANICS

(By Al Post)

More than 10,000 descendants of Spanish immigrants, who first began arriving in Newark's Ironbound section in the 1880s, will be honored tomorrow as Mayor Kenneth Gibson and the City Council proclaim "Spain Week" in Newark.

The Spanish Consul General of New York, several members of his staff, Essex County Judge John Dios, Newark Councilman Henry Martinez and many Newark residents of Spanish descent will take part in the proclamation signing at 10 a.m. in the mayor's office.

Joseph Vazquez, president of Club Espana—the largest Spanish civic and social club in Newark—said the Spanish tradition of strong family ties has helped the ethic community to grow in Newark during the past century.

"Although our exploits do not make the public press very often," Vazquez said, "we feel strongly that Spanish nationals and their descendants have contributed greatly to the cultures of both Newark and America."

The "work ethic," a key feature in the Spanish heritage, is one of the reasons so many persons of Spanish origin settled in Newark, Vazquez said.

"The Spanish community is here to stay. Members of our community plan to live here, work here and die here. We do not plan to retire and move back to our ancestors' homeland," he said.

Club Espana's 1,200 members are vitally interested in the future of the Spanish children of Newark, said Ramon Venero, club vice president.

The club sponsors a school that emphasizes Spanish language, culture and traditions. In addition, the club and one of its members—attorney Bernard Escandon—sponsor college scholarships of $1,000 and $500 for Spanish youths.

The club has three teachers to instruct three levels of classes—beginners, intermediate and advanced—which are based on academic skills, not on age.

In the school the students are taught to have pride in Spain's role in American history.

Some of the key aspects include Spain's role in the discovery of the New World, Ponce de Leon's discovery of the area that is now Florida, Spanish colonists establishing the town of St. Augustine (the first permanent white settlement in the United States), the Spanish government's $5 million loan to the colonists during the Revolution, and the sale of Florida to the United States.

A map of the United States showing the period when Spanish influence was at its peak has been put on display in the club by Rafael Gonzalez, public relations officer.

The map depicts Spanish colonies across the southern United States—from the Atlantic to the Pacific—and as far north as Montana.

In addition to history, the teachers also instruct the students in playing the bagpipes (similar to those used by the Colts in northern Spain) and flamenco dancing (similar to the style popular in southern Spain).

Because of the school program, the club's youth activities and the stress placed on respect for parents, juvenile delinquency is not a major problem in the Spanish community, Venero said.

When a young member of the Spanish community steps out of line, Venero said, an adult usually takes him aside.

The mini-lectures usually bring favorable responses from most youths because few want to bring disgrace to their families, Venero said.

Another of Club Espana's successful projects is its championship soccer team, which won the title of the Schaefer League of North Jersey in 1970 and 1976.

The club and the team both made history last month, when they joined the first flight from Newark International Airport to Spain.

Acting on the invitation of the Sporting Ciudad—a soccer team sponsored by the city of LaCoruna, Spain—the Newark club made a 10-day tour of the Spanish city and nearby areas.

LaCoruna city fathers passed a resolution asking Newark officials to establish a "sister city" relationship.

While in Spain the Newark soccer team played three exhibition games with local Spanish teams, winning one of the three.

The club has grown since its founding in 1964 and now has a three-story headquarters on New York Avenue.

The club's women's auxiliary has aided many of the unit's civic and social projects since its inception.

"And to prove that we could be modern as well as traditional," Vazquez said, "we just elected Linda Fernandez—our club's treasurer—as the first woman member of our board of directors."

## THE GENERAL DYNAMICS AND LITTON INDUSTRIES SHIPBUILDING DISPUTES—SETTLEMENT, BUT AT WHAT PRICE?

### HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. DOWNEY. Mr. Speaker, on Thursday, August 10, I introduced resolutions of disapproval regarding two Navy contract settlements with General Dynamics Electric Boat Division and Litton Industries, Ingalls Boat Yard. If passed by the House, these resolutions would block implementation of contractual reformations totaling over $900 million—the largest shipbuilding claims settlement in U.S. history.

In order to facilitate the understanding of the important issues contained in the settlements and to explain my rationale for introducing disapproval resolutions, I would like to include in the RECORD at this time a short statement and an expanded background paper:

STATEMENT BY HON. THOMAS J. DOWNEY

I introduced resolutions of disapproval in the General Dynamics and Litton Industries contract reformations for a variety of reasons involving the particulars of each settlement. However, my main concern was to insure that the reformations received a full and complete review by Congress and that the implications of these agreements were seriously weighed and evaluated before the Government commits itself to this course of action.

At the present time, I remain unconvinced that the settlements are in the best interest of Navy shipbuilding or the national defense. The Navy proposes to pay close to a billion dollars to General Dynamics and Litton Industries when only a fraction of this amount may constitute the actual liability of the Government. Additionally, the use of "extra-contractual" relief in these situations may have undesirable ramifications for future Government contracting.

I believe the settlements present a crucial juncture for both Navy shipbuilding in specific and federal procurement law as a whole. We are faced with a sensitive situation in which the Government must balance the pursuit of its contractual rights versus the national interest in "getting the ships built".

With the scales poised as they are, I feel we must be careful not to give in to the pressures of the moment. Instead, the ultimate effect of these settlements must be measured in dollars and in the precedent that these reformations will set. There are important questions of policy which must be accurately defined and resolved.

We simply cannot afford to "bail-out" contractors who find themselves in a loss position due to their own actions. We cannot compensate companies for their own ineffi-

ciencies. Congress has a duty to the public to make sure that the Government receives full value for the tax dollars it spends.

Thus, in the situation before us, I feel Congress must send a message to the defense industry that all extra-contractual relief will be heavily scrutinized. It must be communicated that such relief will be approved in only the truly exceptional circumstance—when it will indeed be in the national interest to forgo the Government's contractual rights and when there is no other viable alternative to secure contract performance.

In both the General Dynamics and Litton settlements, the Government could have pursued other legal alternatives instead of the extra-contractual provisions of P.L. 85–804 which were utilized.

With regard to General Dynamics, it was possible for the Government to exercise the default clause in the contract, seek a court order to compel performance, or buy the Electric Boat facility and operate it as a Government-owned, contractor-operated facility.

In Litton's situation, the Government similarly could have terminated for default, continued litigation before the ASBCA, or negotiated a settlement on the LHA claim using ordinary forms of contractual relief.

For various reasons, the Navy rejected each of these alternatives in favor of a P.L. 85–804 settlement. Although analysis of each of the alternatives is a complex task—I believe that the Navy might have too readily embraced P.L. 85–804.

While the pursuit of legal rights through the judicial system may be a long and arduous course, I feel it may be seen as the duty of the Government. Indeed, in most instances, the relinquishment of contractual rights should be the last alternative chosen. Involved is the integrity of Government contracts and the reasonable expectations of the public regarding Government expenditures. These considerations cannot be lightly brushed aside.

---

AN OVERVIEW OF ISSUES IN THE GENERAL DYNAMICS AND LITTON INDUSTRIES CONTRACT DISPUTES

I. THE SETTLEMENT AMOUNTS

The Navy has repeatedly pointed out that both General Dynamics and Litton Industries will assume massive losses in the settlement agreements. In the case of General Dynamics, the settlement provides that the company will absorb a $359 million fixed loss, an amount which is said to wipe out all Electric Boat profits back to 1959. With regard to Litton Industries, the settlement fixed loss has been placed at $200 million.

While these amounts are certainly staggering, there are several factors which blunt their impact. First, the present I.R.S. Code allows both corporations to offset these contract losses against earned income before taxes. Assuming that the loss figures are correct and that the corporate income tax is still 48% in the year that the General Dynamics' contract are completed—it is possible that General Dynamics may realize a tax benefit of $172 million on its $359 million loss. With respect to Litton—given similar assumptions, it is possible that the corporation may realize a tax benefit of $96 million on its $200 million loss.

Additionally, it should be remembered that both corporations may benefit by underrunning the estimated loss figure. In the case of General Dynamics, the settlement agreement provides that it will benefit from 50% of cost underruns. As for Litton, that corporation will receive 80% of cost underruns while the Government's share will only be 20%.

Further, although the settlements are intended to be an encompassing agreement—neither General Dynamics or Litton is prevented from submitting more claims on the contracts based on events occurring after the settlement date. Thus, it is at least theoretically possible that both corporations could reduce their fixed loss through submission of contractual claims at some point in the future.

Moreover, despite the enormity of the losses, it appears that neither General Dynamics or Litton is faced with immediate bankruptcy in the event it had to absorb the full amount of cost overruns. While Litton's financial position is somewhat less secure than General Dynamics, an independent audit of General Dynamics concluded in part that the corporation "should be able to sustain even a $774 million loss and remain solvent if its lenders would agree to either waive or revise certain existing minimum loan covenants".

With respect to the settlement amounts, Secretary Claytor has stated that the fixed losses assumed by the corporations "reflect the shipbuilder's problems primarily in controlling manpower and associated productivity". The Secretary has affirmed that the settlements "closely approximate the Navy's best evaluation of the responsibility shared" for such things as design changes, late Government Furnished Information and Materials and productivity and manpower problems.

However, there are still those who assert that the proposed settlements are a "bailout" and that the amounts arrived at do not reflect the relative responsibilities for the cost overruns.

A former Industrial Relations Manager for Electric Boat has stated that productivity is still much below an acceptable level at the shipbuilding facility and that Electric Boat was forewarned of the "impossibility" of securing adequate manpower by outside consulting firms. In his opinion, the amounts contained in the General Dynamics settlement are unwarranted given the company's handling of its labor force.

With respect to Litton Industries, allegations were made as early as 1970 that the company intentionally underbid on the DD–963 destrover contracts. Senator Margaret Chase Smith questioned at that time whether a last minute change in the contract provisions "may have permitted a contractor to take irregular advantage of regulations to lower estimated cost with the full knowledge that cost can be negotiated upward several years later after the award at a small sacrifice in profit—but at the expense of another substantial overrun to the Government".

II. GOVERNMENT LIABILITY

Responsibility or "fault" for the overruns is a complex issue. In one sense, the actual liability of the Government is a question which can only be resolved after years of litigation in the courts. Contractual liability is dependent upon both factual and legal determinations which have traditionally been considered the province of the judiciary.

However, since the proposed settlements seek to circumvent the judicial process and established fixed obligations on the part of the government and the contractors—the question must be raised now and answered by the situations as they presently appear.

In this regard, many general allegations have been made as to government liability. Both the Navy and the contractors have laid much emphasis on "overly optimistic projections" of the work involved and manhours needed to construct the ships. The flow of Government information and materials has been criticized as a component of the unanticipated price increases and it nas been claimed that some deliveries of information and materials were not in compliance with normal expectations. Additionally, it has been asserted that excessive design aud contract changes were required by the Navy.

Nevertheless, none of these general allegations provides an accurate guage of liability. Although the Navy has claimed that the settlement amounts reflect relative responsibilities—it must be remembered that the settlements were the product of long negotiations. Thus, it is reasonable to suspect that some amount of compromise took place as to the end settlement amounts.

Interposed in the vagueness surrounding the proposed settlements, though, is the Navy's own analysis of General Dynamics and Litton contract claims. While the proposed settlements were based on the estimated cost of completing the contracts (as opposed to the formally submitted claims of General Dynamics and Litton) the determination of these claims yield some interesting figures.

In the General Dynamics situation, analysis of that company's $544 million claim produced a figure of $125 million as the amount of General Dynamics' "entitlement". However, fully $29 million of the $125 million entitlement figure is attributable to sums allocated for "litigative costs" and "litigative risk". These amounts do not indicate a finding of liability but rather represent subjective judgements as to the prospects and projected outcome of possible litigation.

The history of Litton claims present an even more distrurbing situation. In 1973, a contracting officer decision allowed no increase in the contract price for Litton claims totalling $475 million. Moreover, after two years of analysis, the NAVSEA claims team arrived at a $312 million determination of $1.088 million in Litton claims, $18 million of which is attributable to litigative cost.

Thus, the only available analysis of government responsibility other than the settlements has produced a determination which suggests a liability figure of less than $400 million (excluding additional claims which have been mentioned but not submitted by General Dynamics). Although these determinations do not establish the liability present in the proposed settlements—they do represent years of expert claims analysis. As such, they are at least relevant to the ultimate liability question.

III. SPECIFICS IN THE GENERAL DYNAMICS SETTLEMENT

*A. Costs incurred*

The proposed settlement is based on the estimated cost of completing the SSN 688 contracts. Involved in this figure are "costs incurred" or the amount of expenditures that Electric Boat claimed were allocable to its contract performance to the date of the settlement.

The costs claimed to have been incurred by Electric Boat in the construction of the 688 class total $1.341 million (as of 12/24/77). However, GAO testimony noted that neither the independent audit of Coopers and Lybrand or the DCAA reviewed the accuracy of this figure until the GAO suggested this action in the spring of this year.

After analysis by the DCAA, $36.8 million of the reported costs incurred were questioned (although a final determination of the allowability of these costs rests with the contracting officer, ASBCA, or the courts). The GAO then suggested that the proposed settlement be adjusted to reflect the unallowable costs—but the Navy refused feeling it was too late.

Thus, the present settlement is based on figures which may include $36.8 million in unallowable costs, according to the DCAA and GAO. While this amount may be relatively small when compared to the overall cost of the contracts—it is still a significant figure which should not be overlooked. If indeed the $36.8 million is an unallowable cost, it would appear to negate claims that the settlements closely approximate responsibility for cost overruns.

*B. Projected cost of completion*

In its review of the General Dynamics settlement, the GAO commented:

"General Dynamics' independent auditors . . . found that several of the assumptions upon which the labor hours and labor rates are based are optimistic in light of the contractor's recent experience. The estimate of the cost at completion was compiled assuming 7 percent labor rate increases each year. Recent Electric Boat wage settlements have averaged 10.7 percent annually. The difference between the recent labor increase experience and the 7 percent rate used to estimate the completion costs amounts to over *$110 million* for labor and overhead". (Emphasis added)

Although the 7 percent figure was used to conform to Administration predictions of inflation—such a finding has critical import. That is, if the estimated cost to complete the General Dynamics contracts is too low, the Navy will become obligated for substantial sums above the previously projected figures.

In this regard, under the settlement if the actual cost to complete the contracts exceeds $100 million or more and if the labor and overhead escalation rate through the construction period exceeds 7 percent, the Navy may be required to pay General Dynamics *$50 million* more than the $484 million figure the Navy is committed to under the settlement. Further, for every 1 percent increase in labor and overhead escalation rates over the 7 percent rate provided for in the settlement—the Navy will have to pay an additional *$31 million* (if, again, the cost to complete the contract exceeds the estimated cost by $100 million).

Thus, altogether the Navy's end liability in the settlement could vary considerably from the cited figure of $484 million although at the present time it would appear impossible to predict exactly how much the Navy will be obligated. However, given that the cost of a single SSN 688 has risen from an initial ceiling price of $71 million to an estimated construction cost of $148 million so far—further increases might seem likely over the remaining six years of the contracts.

IV. SPECIFICS IN THE LITTON SETTLEMENT

*A. Cost estimates*

The DCAA has audited the costs incurred on the Litton LHA and DD-963 contracts and has termed them reasonable. Additionally, an independent audit has confirmed the cost of completion figures for both contracts. Thus, given these audits and the rather advanced stage of the contract performance, cost variances would seem less likely in the Litton reformations than in the General Dynamics' settlement.

However, unlike the 50/50 sharing provision of the General Dynamics' settlement—if Litton underruns the estimated cost figure of the settlement, it will benefit from 80% of the saved costs while the Navy will only receive 20%. This sharing arrangement is an unusual provision in that it provides Litton with a much greater share of underrun savings than in most other government contracts.

The Navy has justified this arrangement on the basis that—in their opinion—an underrun will be difficult to achieve and therefore greater incentive must be provided to Litton. However, $720 million of the costs of the Litton contract have yet to be incurred. While the Navy claims this amount is rather definite—it must still be considered a significant sum in which variance is possible. Thus, the 80/20% sharing provision has at least the potentiality to measurably diminish Litton's fixed loss under the settlement.

*B. "Buy-in" allegations*

The initial target price of an LHA unit was $112.5 million. This price was supposedly a reasonable estimate of the cost to build an LHA unit according to the information available at the time of bidding. However, under the proposed settlement the estimated cost for an LHA unit has been placed at $260 million.

Similarly, the initial target price for a DD-963 destroyer was $59.6 million. At present, though, the estimated cost of a DD-963 is projected to be $107.5 million.

While contractual and design changes along with inflation have certainly increased the cost of these vessels—the enormity of the cost overruns is, at a minimum, disturbing. Moreover, when the history of the LHA and DD-963 contracts is examined, more cause for concern is produced.

In 1970, Senator Margaret Chase Smith cited a last minute $270 million drop in Litton Industries' DD-963 bid as possible evidence of a "buy-in". (I.e., Up until the last round of bidding Litton's proposal had been almost identical to its nearest competitor—but with a contractual change involving future repricing, Litton's bid dropped substantially more than its competitors). Although this allegation was never explicitly proven or confirmed—its existence is certainly relevant to the presently proposed settlements in light of the massive cost increases that have taken place.

V. THE USE OF PUBLIC LAW 85–804

In the General Dynamics and Litton contracts, the Navy Secretary invoked his "residual powers" under Public Law 85–804 in order to negotiate the settlements. Historically, P.L. 85–804 has been primarily utilized in comparatively "minor" contract disputes, although in 1976 there was an aborted attempt to invoke the statute in these same contracts. Thus, the General Dynamics and Litton settlements present a major precedent for the future role of Public Law 85–804 and the implications of its use need to be carefully analyzed.

With regard to General Dynamics, an independent analysis of that firm's financial position concluded in part that the company should be able to sustain the full loss under the existing contracts depending on the actions of its creditors. In Litton's case, while the firm would sustain serious cash flow problems if it absorbed the full loss—immediate bankruptcy was not predicted. Thus, the question that must be asked is whether P.L. 85–804 *should* be used in a situation where it appears a contractor may be able to survive a loss that could possibly be imposed under the contract and the Government could use other means to secure performance.

The invocation of residual powers bears with it the potentiality to make payments out of line with the financial necessities of a particular contractor on the vague justification that such action will "facilitate the national defense". In this instance, we have the assurances of the Navy that the P.L. 85–804 settlement is necessary and that the proposed payments are the product of lengthy and acrimonious negotiation. However, the question still remains—what sort of precedent are we establishing?

The Navy has contended that given the large losses assumed by General Dynamics and Litton in the settlements "it would be unreasonable for anyone to conclude that another contractor would in his right mind venture down a similar road to obtain the kind of relief that these settlements provide for". Possibly this is a valid assertion. However, I would ask whether the settlements would provide more incentive for a contractor in a loss position to raise the specter of massive litigation in the hope of attaining a generous P.L. 85–804 settlement.

Indeed, the avoidance of massive litigation has been cited as a justification for the proposed settlements. In this a proper consideration on which the government should abandon its contractual rights? If so, what are its limits? There have been no assurances made by either of the contractors that they will not pursue massive claims again in the future. If that occurs will the Government be forced to implement extra-contractual measures once again?

Additionally, it must be investigated whether the proposed settlements are merely a temporary solution to a particularly pressing problem—or whether they will foster a new era of Navy/shipbuilder co-operation as has been claimed. It is woefully possible that we could extend $900 million for these settlements and not learn from the experience.

In all, the Navy Secretary has stated that it is "impossible" to predict the future utility and specific application of P.L. 85–804 authority and that there are no specified limits to negotiation under the statute other than the facilitation of the national interest. Such a power is, by understatement, incredibly broad. Thus, I feel Congress needs to analyze the use of Public Law 85–804 with reference to its application in the General Dynamics and Litton contracts and in terms of the policy that is sought to be pursued by the statute's existence. Although similar questions have been asked before by the House Armed Services Committee, I believe the extent of the present settlements and the possible ramifications for defense contracting demand further consideration of the issues.

VI. APPENDIX: BACKGROUND INFORMATION

*General Dynamics contracts*

The first contracts for the production of SSN 688-class submarines were awarded in January 1971. Under the contracts, the Electric Boat Division of General Dynamics was awarded seven SSN 688s while Newport News received four. (Newport News had previously been designated as the design agent for the SSN 688 as well as being awarded a contract for the lead ship of the 688 class.)

In October 1973, Electric Boat was awarded a second flight contract for an additional seven 688s and received an option for four more of the submarines less than two months later. The second flight contract and the option brought the total number of SSN 688 submarines awarded Electric Boat to 18, or about 80 percent of the total construction program authorized at that time.

Both of the Electric Boat (EB) contracts were fixed-price-incentive type and provided for escalation payments over and above the contract price. The original contract ceiling prices were $428 million for the first group of 7 boats and $847 million for the second group of 11 boats for a total of $1.275 billion—or an average price of about $71 million per submarine.

Presently, the ceiling prices for the 688s have been increased to $1.476 billion as the result of a $97 million claim settlement, adjudicated contract changes and a provisional payment of $66.5 million on EB's most recent claims. In addition, as of May 31, 1978, $252

million has been provided in escalation. However, General Dynamics estimates that the ultimate cost of the 18 688s will amount to $2.688 billion (or over twice the initial ceiling price contained in the contracts). Barring further cost increases, the estimated loss under the contracts is projected to be $843 million.

*Electric Boat claims*

The history of claims concerning the 688 contracts is long and complex but basically involves two major sets of claims which have been formally filed and notification to the Navy regarding the preparation of a third set.

Electric Boat submitted its first major claim in February 1975 for $220 million based on defective and late Government furnished design data and additional work. This claim was settled about a year after submission for $97 million plus an 84 month extension of ship delivery dates. In December 1976, EB filed further claims of $544 million based on delay and disruption to the first and second contracts resulting from design changes and delays experienced on the first contract. This claim has been evaluated at $125 million by the Navy Claims Settlement Board (although this figure should not be taken to be equivalent to "actual" government liability).

Additionally, during the course of negotiations with EB this spring the Navy was notified that General Dynamics was preparing claims totalling $750 million. These claims have not been formally submitted at the present time, however, and it should be noted that the proposed settlement would preclude a submission of claims based on events before June 1978.

*Causes of increased costs in EB contracts*

Although exactly who is responsible or liable for the increased costs of the 688 program is an issue that is in much dispute, there is general agreement as to the underlying causes of the cost escalation.

First, major problems were experienced with the build-up of the labor force at Electric Boat. With the award of 18 688-class submarines plus the first TRIDENT contract, it was necessary for Electric Boat to vastly expand its workforce. Thousands of new employees were required and an expansive job training program had to be established. In retrospect, it is evident that this build-up experienced severe problems and that training programs were in many cases inadequate for the highly technical needs of the EB shipyard.

Significant miscalculations were also made in the estimates of man-hours required to construct the 688-class. At the time the contracts were negotiated, it was apparently assumed that the 688-class would merely be an evolution of the SSN 637-class submarine previously constructed by Electric Boat. Such proved not to be the case and the complexity of the 688 demanded man-hours much in excess of those experienced in 637-class construction.

The flow of information to Electric Boat has also been cited for cost increases—although again the question of "fault" is at issue. Design drawings and specifications have been criticized as well as the delivery of Government-furnished equipment. Change orders effected in the contract have been a matter of dispute, but assuredly contributed to the cost overrun experienced. Concomitantly, the massive inflation of the mid-1970's undoubtably impacted upon the resulting costs of the program.

In all, the SSN 688 program was subject to overly optimistic projections. The contracts negotiated in 1971 and 1973 just did not accurately reflect the amount of man-hours and productive capability and organization required to build the 688-class.

*The proposed Electric Boat settlement*

The specific terms of the Electric Boat settlement and the various implications of the agreement are reflective of the nature of the dispute—they compose an intricate document achieved only after a long period of negotiation. However, the important aspects of the agreement and the basic elements of the settlement may be summarized as follows:

(1) The settlement was negotiated by the use of Public Law 85–804. This statute allows the modification of government contracts without regard to traditional contract law or liability when such modification is deemed to "facilitate the national defense".

(2) Of an estimated $843 million additional cost to complete the contracts—General Dynamics will assume a $359 million fixed loss over the three year remainder of the contract.

(3) The Navy will pay General Dynamics an estimated $484 million over the existing contract price.

(4) Should the allowable costs at completion prove greater than the current estimate (at a 7 percent labor and 6 percent material inflation rate) the Navy and General Dynamics will share such cost growth 50–50 percent up to $100 million, but above that figure General Dynamics will assume exclusive responsibility.

(5) Additional costs for the construction of 688 submarines, solely attributable to inflation rates, above the 7% labor and 6% material, will be the responsibility of the Navy.

(6) General Dynamics will release all claims on the 688 contracts, as well as for impact of those contracts on the TRIDENT contract, based on events prior to June 19, 1978. However, there are no restrictions on the submission of claims after that date.

(7) There is a shortfall of funds available to effect the contract reformations. The Navy has proposed to reprogram $325.6 million in FY1979 to cover the cost of the Electric Boat and Litton settlements (i.e. at least $207.6 million will be required just for the EB and Litton reformations, not considering any other contractor claims).

*Litton Industries' contracts*

Contracts for the LHA (helicopter assault carrier) and the DD–963 destroyers were signed in 1969 and 1970, respectively. The contracts were fixed-price-incentive, successive target type, with an initial target price of about $2.8 billion and an initial ceiling price of about $3.3 billion for 9 LHAs and 30 DD–963 ships.

With regard to the LHA contract, the initial target and ceiling prices were reset in 1973 when the contract was amended, eliminating 4 ships. Ceiling prices were also adjusted a total of $51.6 million in 1973 and 1978 to account for contractual changes. Thus, as of May 1978, the LHA target price was $827 million and ceiling price of $852 million for the five ships to be built under the amended contracts. This adjustment amounts to a target price increase from $112.5 million to $165.4 million per vessel and a ceiling price increase from $133.3 million to $170.4 million per vessel. (Note: Under the terms of the contract, Litton pays 20% of incurred costs between the target and ceiling price and the Government pays 80%.)

With respect to the DD–963 contract, the initial target and ceiling prices were increased in July 1975 and again in May 1978. The target price of the ships has been raised from $1.78 billion in 1970 ($59.6 million per ship) to $2.16 billion in 1978 ($72.2 million per ship). Corresponding to this, the ceiling price has been increased from $2.14 billion in 1970 ($71.3 million per ship) to $2.27 billion in 1978 ($75.6 million per ship). As with the LHA contract, there is a sharing arrangement for costs incurred between the target and ceiling price. However, in the DD–963 contract this sharing is on a 15/85% contractor/Navy basis.

Additionally, both the LHA and DD–963 contracts contain escalation provisions. In the LHA contract, an escalation of $161.8 million is provided and in the DD–963 contract this amount totals $790 million. Adding these sums to the current ceiling prices of the contracts yields a figure of $4.079 billion as the total allowable costs under the contract. This amounts to an allowable price tag of $202 million for each LHA and $101 million for each DD–963.

The present estimated cost of completion of the LHA and DD–963 contracts is projected to be $4.726 billion, $647 million more than the allowable costs under the contract. The estimated cost of an LHA unit under the P.L. 85–804 settlement presently proposed by the Secretary is $260 million and for a DD–963 unit is $107.5 million. This estimated cost involves a cost increase over the initial price ceiling of $127 million for each LHA unit built and $36 million for each DD–963 unit.

*Litton Industries' claims*

Litton initially submitted a claim on the LHA contract in March 1972 for an increase in the ceiling price of $475 million based on design changes and allegedly defective Government furnished information. A negotiated settlement on the claim failed in 1973 and the contracting officer (CO) issued a unilateral decision resetting the contract. The CO decision granted a 6 month delivery date extension but did not provide for an increase in price. Instead, the CO concluded that Litton had received about $55 million in excess progress payments (a decision which was later upheld on appeal to the Fifth Circuit U.S. Court of Appeals).

In April 1975, Litton updated and repriced its initial $475 million claim to $505 million. About two weeks after this action, the Deputy Secretary of Defense proposed P.L. 85–804 extra-contractual relief through reformation of the contract escalation provisions. The relief under the Secretary's proposal would have provided Litton with an additional $239 million in exchange for releases from current and future LHA and cross impact claims. Litton, however, considered this proposal inequitable and notified the Navy of its intent to discontinue LHA contract performance on August 1, 1976.

On August 3, 1976, however, the Navy obtained a preliminary injunction requiring Litton to continue work on the LHA contracts but also requiring the Navy to pay 91% of the weekly invoiced costs of performance. An agreement entered into in November 1977 subsequently modified this order to 75% of the actual costs of performance.

Between April 1975 and September 1977, Litton raised its claims to a total of $1.076 billion including $373 million for alleged impact on the DD–963 program. Further adjustments and repricing have increased this total claim figure to $1.088 billion.

A two year analysis by the Naval Sea Systems Command (NAVSEA) has valued the $1.088 claim at $312 million. It should be noted, however, that this $312 million figure contains sums for litigative cost and litigative risk (as does the Navy's $125 million determination of Electric Boat's $544 million claim). Basically, litigative cost and litigative risk are subjective judgments made by the body determining the "claim value"

based on the projected cost of defending a suit by a contractor and the likelihood that a contractor will pursue his claims and be successful in the courts.

*Causes of increased costs*

Some of the same factors that aided the rise in Electric Boat's cost of completion on the SSN 688 contracts affected Litton's contracts with the Navy (although, again, responsibility for the causes of the increased costs are a matter of dispute). Overly optimistic original estimates as well as late delivery of Government furnished information and materials and contractual changes have been cited as reasons for the cost escalation. The impact of inflation is also considered a major factor.

With respect to Litton's particular situation, however, several specialized causes are alleged to have been factors in the increased costs. First, the concept of Total Package Procurement, under which a contractor assumes virtually full responsibility for the delivery of a weapons system meeting specified performance standards is claimed to have been a failure in the Litton contracts. Also, the attempt to construct the LHAs and DD-963s utilizing high-technology, modular techniques and material flow patterns in Litton's new West Bank yard appears to not have been as successful as projected.

In all, however, the broad category of "misjudgement" as to the productive capabilities of Litton and the ability to achieve a skilled manpower supply appears as the most central, albeit general, reason for the cost overruns.

*The proposed Litton Industries' settlements*

The Litton settlement (as the EB settlement) was negotiated under the Navy Secretary's Public Law 85-804 "residual powers". The "residual powers" of the Secretary have been used rather infrequently as compared to other P.L. 85-804 powers—but, significantly, they allow the widest use of discretion. Practically speaking, there are few limitations as to what type of settlement may be entered into under the powers. Otherwise, the basic elements of the Litton settlement may be summarized as follows:

(1) Of the estimated $647 million loss on the contracts, Litton will absorb $200 million.

(2) The Navy will pay $447 million of the loss, in addition to the $47 million it has already paid in provisional price increases and adjustment for delay.

(3) Should the aggregate allowable costs at completion prove less than the aggregate anticipated costs, Litton and the Navy will benefit from such a reduction in a proportion of 80/20%, respectively.

(4) Should the aggregate allowable costs at completion prove greater than the anticipated costs, the Navy and Litton will share cost growth 50/50% up to $100 million. Past $100 million in additional costs, Litton will assume responsibility for cost growth arising out of events prior to June 22, 1978.

(5) Litton agreed that no portion of the total $133 million it booked and identified as Manufacturing Process Development Costs (MPD) would be invoiced against the LHA or DD-963 contracts.

(6) Litton will release all claims and actions based on events occurring before June 22, 1978.●

## AMENDMENTS TO H.R. 13850

### HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. FRENZEL. Mr. Speaker, I have today filed nine amendments to H.R. 13850. They are Mr. WIGGINS' amendments which I have entered into the RECORD so that they will be protected in case the gentleman from California is absent when H.R. 13850 is called up.●

## SURVEY SHOWS CITIES UNWILLING TO INCUR GREATER DEBT

### HON. WILLIAM S. MOORHEAD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. MOORHEAD of Pennsylvania. Mr. Speaker, the Subcommittee on Economic Stabilization of the Banking Committee has concerned itself for some time with various proposals for domestic "development banks." We have begun hearings on the administration proposal in this area and will return to the subject early in the new session of Congress.

The first problem in assessing the widely differing proposals for development banks is to define exactly what the bank is supposed to do—what credit gaps it is meant to fill. That leads directly to a central question: Should a domestic development bank lend to State and local governments or should it be confined to private sector economic development in designated "distressed" areas.

As part of our exploration of this issue, the subcommittee conducted a survey of large cities as a followup to a highly useful study by the Joint Economic Committee. I am placing the results of that survey in the RECORD today:

DEBT AND UNMET CAPITAL NEEDS IN LARGE CITIES

INTRODUCTION

In the spring of 1977 the Joint Economic Committee of Congress surveyed 67 of the nation's 75 largest cities to determine their fiscal condition. A summary of the replies was published as a Joint Economic Committee print in July of that year, covering various aspects of the fiscal problem.

Responses to one question in the survey, answered by 50 cities, identified "unmet capital needs" of $22.4 billion, for maintenance, upgrading and new construction, exclusive of housing. The Joint Committee survey, however, did not attempt to identify the constraints on the cities which prevented them from making these desired capital outlays.

The Subcommittee on Economic Stabilization of the House Committee on Banking, Finance and Urban Affairs was at the time considering, and continues to consider, various proposals for a "domestic development bank." Some versions of the bank, such as H.R. 8562, would contain a "window" for lending to state and local government to meet capital needs.

The Subcommittee, having in hand the results of the Joint Economic Committee survey, felt it woud be useful to have these large cities identify the reasons for their large backlog of unmet capital outlays. Such outlays are typically financed by borrowing. What was the problem?

The Subcommittee sent to the same cities a sample questionnaire with a checklist of possible reasons for the cities' inability or unwillingness to undertake the needed capital outlays. The finance officers were asked to check the item or items applicable to their cities and to add comments if desired. Replies were received from 47 cities.* This Subcommittee staff report discloses the findings of the survey.

SUMMARY AND CONCLUSIONS

In the overwhelming majority of the cases capital outlays were held back by an inability or, more often, unwillingness to incur more debt. The problem was not a lack of access to the municipal bond market, though in a very few cases cities feared that additional bond issues might adversely affect their current satisfactory credit rating. Rather, the cities—or, where applicable, their voters—felt that the current level of debt service was as much as should be carried, given the existing levels of taxation and the claims of current operating expenditures on their budgets. The amount of new debt each year is evidently limited by these factors.

The results clearly raise questions about the usefulness of new Federal loans, as distinct from public works-type grants, for meeting urban capital needs. However, several points should be kept in mind.

The survey covered only large cities. The problem may be different in smaller communities.

There was no effort to explore the usefulness to these cities of deeply subsidized "soft" loans for capital purposes from the Federal Government or a new Federal "bank". By definition, these loans—with a very low rate of interest or very long maturity or both—would require less annual debt service. They would also, of course, constitute an important claim on the Federal budget and/or the capital market.

THE QUESTIONNAIRE

The cities were asked to check which of the following possible reasons for unmet capital needs were applicable:

1. Debt service already so large that further debt service claims on the budget would not be supportable except at the expense of needed current services.

2. Further debt would require a local tax increase for debt service, which the city is unable or unwilling to impose.

3. Further debt impossible without voter approval, and voters unlikely to approve.

4. No access at all to the municipal bond market.

5. Access to the municipal bond market, but rating so poor that interest cost is deemed insupportably high.

6. State or local constitutional limits on further debt.

7. Other—please specify.

In 11 of the 47 cases the cities checked only Item 7 and supplied verbal explanations. Some of the remaining 36, as would be expected, checked more than one item. The results for these 36 cities were as follows:

Item 1—12.
Item 2—25.
Item 3—16.
Item 4—0.
Item 5—1.
Item 6—8.

It should be noted that the verbal responses of the 11 cities that checked only Item 7 came to much the same thing—a

*The cities responding to the questionnaire, in alphabetical order, were: Albuquerque, Anaheim, Austin, Baltimore, Baton Rouge, Birmingham, Buffalo, Cincinnati, Colorado Springs, Columbus, Dallas, Dayton, Denver, Detroit, Fort Worth, Honolulu, Jacksonville, Kansas City (Mo.), Knoxville, Lexington (Ky.), Los Angeles, Memphis, Miami, Minneapolis, Mobile, Nashville, New Orleans, Norfolk, Oklahoma City, Philadelphia, Phoenix, Pittsburgh, Portland (Ore.), Richmond, St. Louis, St. Paul, San Antonio, San Diego, San Jose, Seattle, Syracuse, Toledo, Tucson, Virginia Beach, Washington, D.C., Wichita and Yonkers.

limit for one reason or another on the willingness or ability to incur more debt for capital purposes.

As will be seen, the item checked most frequently is Item 2—"Further debt would require a local tax increase for debt sevice, which the city is unable or unwilling to impose." The questionnaire was sent out many months before the "taxpayer revolt" made the headlines following the results of the referendum on Proposition 13 in California, in which a large majority voted for an absolute reduction in local property taxes. Essentially the same problem is manifested by those cities that checked Items 3 and 6. Several checked Items 1 and 2 jointly, considering them simply two sides of the same coin.

Except where there are strict constitutional limits on new debt, it is evident that cities could finance more capital outlays if they were willing either to raise taxes or to cut current services. The constraint does not lie primarily in the ability to borrow, though that is the case for some cities under voter or constitutional constraints, but rather the willingness to borrow, with the accompanying rise in debt service claims on the budget.

The cities are in large measure masters of their own choice. Given current levels of taxation and the sentiment of their citizens, they have chosen to defer capital outlay in varying degrees.

This budgetary constraint would evidently apply regardless of the source of new borrowing, though it would be less if the loans were "soft". A number of cities commented and developments in the municipal bond market confirm—that they have been able to expand their borrowing through "revenue bonds" of various kinds: industrial, hospital, housing, pollution. But these all have earmarked revenues other than general taxes and are not normally available for ordinary municipal infrastructure.●

## A STATEMENT COMMENDING THE SUCCESSFUL EFFORTS OF A YOUNG LADY TO GENERATE PATRIOTISM IN OUR COUNTRY

### HON. JOHN J. RHODES

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. RHODES. Mr. Speaker, too often news accounts only report on the unfortunate happenings of our Nation's youth when they are involved in crime or trouble, without highlighting some positive efforts that young people make to the betterment of their fellow man. An example of an outstanding youth who has worked very hard to promote freedom, free speech, and the traditional values that this country was founded upon, is a young lady from my congressional district back in Arizona, Miss Lori Cox.

Lori first received national recognition when she was in high school by campaigning to reinstate the practice of having the Pledge of Allegiance recited in the classroom. Lori was concerned about her generation's lack of knowledge of our country's origins and symbols. Consequently, she presented her idea for a National Patriotism Week to me.

For the past two terms of Congress, Lori and I have worked diligently to see National Patriotism Week become a reality. In that time, I am sure as a result of her efforts to draw attention to the need for a commemorative time period to honor America with public gatherings and activities at which people can celebrate and pay tribute to their country in an appropriate fashion, the Congress passed into law Honor America. This celebration commences on Flag Day and ends on Independence Day, a time period when our country has historically paid tribute to our national heritage and the freedoms we so greatly cherish.

I am sure you join with me in commending Miss Cox in her efforts to instill in all the people with whom she comes into contact a deep sense of pride in our country and its youth. Even though Lori's initial drive to have National Patriotism Week become law has been supplanted by Honor America, I am sure you will applaud with me her efforts to reestablish the traditional values on which this country was founded, and acclaim her efforts to honor America so that these values will never be forgotten.●

## TRIBUTE TO EDWARD BRODY

### HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. EILBERG. Mr. Speaker, this Thursday evening a well-deserved tribute will be paid to a man who has unselfishly devoted more than 30 years of service to Pennsylvania citizens needing long-term health care—Mr. Edward Brody.

The Health Care Facilities Association of Pennsylvania will honor Ed Brody for his leadership and his many accomplishments which have marked his distinguished career.

Sd Brody, Mr. Speaker, has been a nursing home administrator since 1947. He is a member of the Board of Examiners for Nursing Home Administrators, and is president of the American College of Nursing Home Administrators.

Mr. Brody earned his undergraduate degree in 1940 from the University of Pennsylvania. He served in the U.S. Army from 1943 to 1946, achieving the rank of 1st lieutenant in the Medical Administration Corps.

Early in his career, Ed Brody was a moving force in the founding of the Philadelphia Nursing Home Association, the forerunner of the Health Care Facilities Association of Pennsylvania. He served as both executive director and president of the group, and later went on to serve as a member of the board of directors and as secretary of the American Nursing Home Association.

In addition, he has served as a member of the long term institutional care advisory committee of the office of medical programs, Pennsylvania Department of Public Welfare, and has been a member of the nursing home research and development committee of the Philadelphia ombudsman program.

As an example of his innovative work in this field, Mr. Speaker, I might add that Ed Brody conceived of a voluntary recreation program cooperative for nursing homes. This enabled the participating facilities to offer recreation programs in a joint effort, until they were able to put programs into effect in their own institutions.

Mr. Speaker, I know that my colleagues will join with me in congratulating Ed Brody for his years of devoted labor, and the Health Care Facilities Association of Pennsylvania for the fine choice it has made in paying tribute to his citizenship and public service.●

## THE TRUTH ABOUT AIRLINES PROFITS

### HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. ANDERSON of California. Mr. Speaker, lately we have heard much abount soaring airline profits, and I am afraid that some uninformed people may believe that all is roses for the future as far as the airline industry is concerned. I therefore, would like to commend to my colleagues' attention the following commentary, which appeared in the current—September 18—edition of Business Week. I think it presents a true picture of the profit future for our airlines as we see it today.

WHY THE AIRLINES' RECORD PROFITS ARE BOUND TO FADE

A summer no one in the U.S. air transport industry is ever likely to forget had its final huge traffic peak over the Labor Day weekend. As schools start and the vacation season ends, airline passenger volume should now be merely robust, not overwhelming.

Even though September probably will show a sharp fall-off from July's 20.5 percent increase in revenue passenger-miles over July, 1977, this will not necessarily indicate a softening in demand for airline seats. It will reflect the fact that the air travel boom began in September a year ago, and from now on spectacular year-to-year gains will be harder to achieve. But even if the traffic gains do diminish somewhat, last year's base figures were so large and this autumn"s advance booking continue so strong that barring a catastrophe, the airline industry will have a super-record year.

Sardines. In all likelihood, the 23 scheduled U.S. passenger airlines belonging to the Air Transport Assn. (ATA) will carry 275 million passengers this year, up from 240 million in 1977. They should gross more than $23 billion from passenger operations, compared with roughly $18 billion a year ago, and net more than $1 billion, up from approximately $754 million in 1977. But lurking in these heady numbers are problems to which there are no easy solutions.

If the industry is to achieve the same $1 billion net profit in 1979, given probable increases in fuel, labor costs, and airport fees, says the ATA's economist, George W. James, the airlines will have to carry more than 10 percent additional traffic or 25 million to 30 million more passengers. As anyone who has flown or visited an airport this summer knows, there is simply no place to put these additional passengers. The airlines so far this year have been carrying 3 million more people a month than in 1977, and the result has been long waits to make reservations, to get tickets, to collect bags, and to get to and from airports, to say nothing of jammed, uncomfortable flights. But to keep

the present level of profitability, the airline industry must still accommodate 2.5 million more passengers a month.

Aside from simple capacity problems, the airlines have got themselves into a bind where half of their passengers are flying at promotional discount fares, and, as this percentage has climbed through 1978, the average amount per mile paid by each passenger—the yield—has declined. The industry's average yield is now about 3 percent below a year ago. Such a decline is acceptable only as long as traffic is growing. But there is little room for further traffic growth. On many days this summer, airlines were flying with 80 percent or more of their seats full systemwide, and that means that the most popular flights in dense markets were 100 percent filled.

Reverse leverage. So, if traffic growth falls short of 10 percent next year, as seems probable, and ends up at only 5 percent, and if costs continue to rise as yields fall, James sees many airlines showing losses quickly because the reverse leverage is so great. And the losses could be big ones.

Says Charles J. Simons, vice-chairman of Eastern Air Lines, Inc., "The dilution in yield, plus increases in essential operating costs, has driven our breakeven load factor to unprecedented highs." (A load factor is the percentage of total seats occupied by paying passengers.) In the second quarter of 1978, Eastern showed a 4.9 percent decrease in yield and a 17 percent increase in operating costs—and a record second-quarter profit of $24.2 million. "As long as we can maintain traffic volumes such as those at present, we can realize a fair profit," Simons adds. "But we must remain constantly diligent and be ready to adjust quickly if passenger volume slips below the breakeven point."

Price competition. The Civil Aeronautics Board, in an Aug. 28 decision, made things a little easier for the airlines. The board permitted them to reduce fares as much as 70 percent below existing full-fare levels (most discounts today are 35 percent to 40 percent below full fares) and to raise fares up to 10 percent in any market served by four airlines—without getting prior CAB approval. This would allow an increase in yields, which Julius Maldutis, airline analyst for Salomon Bros., says is "a must."

Beyond that, the airlines this fall will be trooping to the CAB asking for fare increases to forestall next year's profit problems. Their timing could not be worse, because third-quarter earnings will be so high that there is no way for the board to grant the request. But by giving airlines new freedom to raise and lower at least some of their fares without board approval, the CAB may be fostering something new for the airline industry: price competition. Since no two airlines have the same breakdown load factor, and since there may be more passengers demanding seats than there are seats available on some routes, airline management might decide not to match each other's fares in lock-step the way they always have in the past. What is more, the CAB seems determined to allow freedom of entry into markets that could mean different levels of quality of service, and this also could promote price competition.

Pan Am's move. Yet another solution to the airline industry's dilemma may be for individual carriers to walk away from markets if, despite higher fares, a given market remains unprofitable. This also would be a departure for airline management: the recognition that if a carrier cannot handle all the business that is proffered, it should concentrate its assets in the markets where it wants to keep its identity and where it makes the most money.

Pan American World Airways Inc. is about to make such a move. Faced with carrying hordes more passengers next summer than it carried this summer, and mindful of the number of passengers it turned away or delayed this summer because of full flights, Pan Am will shortly announce a severe pruning of its route structure. This will allow it to put jets where they will do the most good, both in terms of improving passenger service and of maximizing profits. It will also give foreign-flag airlines, such as Aeroflot, a monopoly in, for example, the Moscow-New York market.

Peak-time slots. A seemingly obvious solution for the airlines' problems—more aircraft—is not a solution at all, at least for next year. Even if they were ordered today, planes would not be ready by next summer. And, as a Delta Air Lines Inc. official puts it, "No one in his right mind would buy a jet today to carry passengers, 50 percent of whom are not meeting full costs." Airlines, burned by a surge of low-fare traffic for which they bought jets in the early 1970s, are still wary. Finally, airports can hardly accommodate the jets that are flying now. There are no more "slots" for landing and taking off at peak times at Washington National, New York's LaGuardia, Chicago's O'Hare, and Atlanta's Hartsfield airports, for example.

Ironically, airlines are in a vicious circle here. The more that promotional fares attract new passengers, the greater the hassle and the worse the service for frequent business travelers who are paying full fare, thus enhancing the attractiveness of corporate jets. The wave of corporate jet flying, meanwhile, exacerbates the airport slot problem.

But if coping with 1979 seems difficult, the early 1980s look to be worse. By then airlines will need an estimated $22 billion to $35 billion worth of new jets to replace today's aging planes and to handle the full-fare passenger traffic growth that is predicted. Another $6 billion will be required to satisfy expected antinoise legislation, and to finance all of this the industry needs an extended period of healthy, stable earnings. It is hard to see where they will come from. With the breakeven load factor going up dangerously close to the ceiling of total available capacity, and with yields going down, airlines will have to take Draconian measures. They are going to have to treat their full-fare passengers better, cut costs of handling discount-fare passengers, and devise a whole new fare structure that meets the needs of both while returning profit sufficient to enable the industry to renew itself and grow.●

## RISING HEALTH COSTS

### HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. PICKLE. Mr. Speaker, one of the most serious problems facing our Nation today is the problem of rising health costs. I would like to share with my colleagues a report from Texas hospitals on their efforts at cost containment.

It is obvious that substantial savings can be made when thorough planning and study is made. Perhaps some of the examples listed will be of interest to my colleagues.

The article is as follows:

HOSPITALS ARE SAVING MORE THAN LIVES—THE TEXAS VOLUNTARY EFFORT

(By R. William Warren)

For many years, the Texas Hospital Association has been actively promoting cost containment and cost effectiveness among its 600 member hospitals. Our membership's dedication to providing the highest quality of care at the lowest cost has resulted in an average cost per patient stay that is $307.00 lower than the national average ($1,323.00 U.S. average—$1,016.00 in Texas).

The cost containment activities currently being utilized in Texas hospitals are as numerous and diverse as the hospitals themselves. As you might expect, many Texas hospitals actively utilize and participate in one of the on-going programs at the Association; these programs include—among others—the Texas Hospital Association Management Engineering Services (THAMES), the Shared Electrical Safety Service (SHESS), the Texas Hospital Association Recruitment and Placement Service (THARPS), the Texas Hospital Insurance Exchange (THIE) and the Texas Hospital Association Statewide Hospital Productivity Center. Although the tangible results of these special programs are well known to you, some reiteration of their successes would seem appropriate in light of the current fervor for cost containment.

For example, Memorial Hospital in Marshall has recently completed a $6,000,000 expansion program. Part of its planning effort included a survey to indicate the needed staffing level for the expanded facility. However, after the expansion was completed and in service, a reexamination of necessary staffing levels indicated that fewer people (than originally forecast) would be needed to operate the additional facility. Additionally, through continual monitoring of staffing levels via the Productivity Management Report (PMR*) system, the hospital has been able to effect an annual savings of between 10–12% of its total labor cost.

Similarly, Brackenridge Hospital of Austin was able to save $1,921,000 in labor expense between September 1976 and August 1977. This savings was attributed to compliance with suggestions made in a number of staffing studies conducted by THAMES. Since the hospital's administration utilized these studies and the PMR to monitor the staffing productivity in the hospital, Brackenridge was able to hold its increase in labor cost for this period to one percent while the statewide average increase in wages and benefits amounted to 14.5%.

Additionally, the Texas Hospital Insurance Exchange (THIE) has been operational since July 1, 1976 and now writes professional liability insurance for 115 Texas hospitals representing a total of 6,460 beds. The liability insurance written by THIE is as much as $152.00 a bed less than the rates available from the Joint Underwriting Association of Texas (the pool of insurance companies required by law to provide the coverage). On the average THIE saves Texas hospitals $980,000 annually—representing a total of $1,960,000.00 during its first twenty-four months of operation.

Furthermore, Pasadena Memorial Hospital in Pasadena utilized the THA Recruitment and placement Service to provide the hospital with two additional physicians. In addition, THARPS has saved this hospital $14,000 in other recruitment fees.

Similar savings can be attributed to the other programs. However, the purpose of this column is not to "rest on the laurels" of past successes but to share ideas and programs that have proven successful for other hospitals. The following programs are currently operative and producing savings in Texas hospitals:

Hopkins County Memorial Hospital in Sulfur Springs conducted an in-depth study of

* NOTE.—The Productivity Management Report is a computerized system based on time standards specifically adapted to the cost centers of the individual hospital, resulting in a monthly management report useful in determining the level of productivity for the hospital.

hospital utilities patterns and reviewed suggestions on how to make better use of their utility expenditures. This hospital found that, heretofore, it had been using 100 percent fresh air in the operating room, the intensive care unit, all labor and delivery rooms and in the nurseries—whether or not these facilities were in use. Simply by connecting the fresh air handling system to the light switch in these rooms, the system now circulates regular and recycled air in those rooms when they are not in use. However, when the room is occupied (as indicated by the use of the lights) the system cycles 100 percent fresh air; the hospital estimates that this system alone nets savings of many thousands of dollars each year in heating and cooling costs.

The administration of Community Hospital of Brazosport in Freeport has established a strong working relationship with the business and industrial community in the area served by their hospital. This liaison has afforded the hospital the use of a wide variety of experts to solve special problems. For example, Dow Chemical Company is the major industry in Freeport and often lends support to the hospital. Bill Smith, hospital administrator, has indicated that on many occasions when he has a problem, he will ask the management of Dow Chemical Company to loan him the use of one or more of their experts to help solve that problem. By utilization of this industry's expertise, a number of problems have been resolved in a way that is best cost-effective and advantageous to the hospital. Similar liaisons are possible in many other situations.

Memorial Medical Center in Corpus Christi has established a program that looks to the future and provides a foundation for continued cost containment efforts. The hospital, a teaching facility, provides educational programs for resident physicians. As part of their training, the residents are involved in a continuing course in cost containment; the course is designed to raise cost consciousness among these future doctors. For example, the instructor might ask the students to write up a set of treatment orders for a hypothetical patient. A bill is then compiled for the prescribed orders and possible alternative treatments discussed. Hopefully, these discussions lead to more economical ways of providing the same high quality treatment.

The programs presented here are just a sample of cost containment efforts being made statewide. If we are to continue our successes in the area of cost containment and maintain our lower than average cost per patient stay, we must share our ideas and programs. Therefore, each member hospital is invited to submit to THA information concerning savings programs that are now in use. As is the case with each of the above, we need your permission to use your data as a basis for future columns.●

## SMALL BUSINESS AND SCIENTIFIC AND TECHNOLOGICAL INNOVATION

### HON. JOHN B. BRECKINRIDGE

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. BRECKINRIDGE. Mr. Speaker, I previously mentioned in this space that a joint House-Senate Small Business hearing revealed an unpublished and unimplemented 1977 report prepared by the White House Office of Management and Budget. The interagency study, headed by Jacob Rabinow, shows that Federal agencies in effect discriminate against small business in awarding research and development contracts, despite the fact that small businesses are far more innovative and cost effective than large corporations.

These conditions the Congress and the administration must rectify.

The following is a March 10, 1977, memorandum from the Office of Management and Budget, testifying to the overwhelming importance of small business to the innovative process. Included are several attachments in the form of reports summing up the countless contributions small business has made to the advancement of science and technology in this century.

For reasons which are not clear, this report was not made public until released on August 9 at a joint hearing held by my Small Business Subcommittee on Antitrust, Consumers and Employment and the Senate Small Business Committee.

MEMORANDUM FOR CERTAIN OFPP AGENCY CONTACT POINTS

Subject: Increased Use of Small Technology Based Firms

The importance of small business firms in our American private enterprise system has been accepted for many years within the Federal Government. Passage of the Small Business Act of 1953, coverage in the Armed Services Procurement Act of 1947 and the Federal Property and Administrative Services Act of 1949, and advocacy by the Commission on Government Procurement in its Report of 1972 are some of the many ways the importance of small business has been recognized. Special legislation and programs of emphasis have attempted to improve the capabilities of small firms to operate effectively in the marketplace. Although the success—or lack of success—of these actions frequently cannot be measured, there are strong indications that more attention needs to be given to the support of small firms.

Federal Government contracting for research and development is one area in which small firms are inadequately used—less than four percent of research and development expenditures are with small firms. Recognizing this, the Office of Federal Procurement Policy established an interagency panel in early 1976 to consider ways of increasing the utilization of small technology based firms. The panel was chaired by Jacob Rabinow of the National Bureau of Standards. Other members were from the National Science Foundation, the Department of Defense, the National Aeronautics and Space Administration, the Energy Research and Development Administration, and the Office of Federal Procurement Policy.

In establishing the panel, we noted the increasing concern that our Country will lose significant high technology capabilities absent a concerted effort to increase small business research and development awards by the Government. The report of the panel, which is attached, confirms this concern. As a means to bring the recommendations of the panel to the attention of executive branch agencies, we have drafted the attached memorandum on which we would appreciate your views. Comments on this proposed action are requested by April 1, 1977.

ROBERT F. TRIMBLE,
*Assistant Administrator for Contract Administration.*

ATTACHMENT

Mr. Barnett M. Anceleitz, Director, Installations & Logistics, Department of Transportation, Washington, D.C. 20590

MEMORANDUM FOR HEADS OF EXECUTIVE BRANCH DEPARTMENTS AND AGENCIES

Subject: Increased Use of Small Technology Based Firms

Federal law requires that a "fair proportion" of Government procurement go to small business. This Administration is committed to that principle and to efforts that support and assist the small business community.

The Office of Federal Procurement Policy has advised me that there is need to strengthen our efforts with respect to small business participation in Federal research and development activities. There is considerable evidence that the small proportion of Federal research and development work that is being awarded to small technology based firms is contributing to a serious loss of high technology capabilities in our Nation. Less than four percent of Federal research and development expenditures are with small firms.

Implementation of the measures set forth in the recommendations of the Office of Federal Procurement Policy would, I am confident, significantly increase Federal research and development awards to small businesses. I urge that you undertake an aggressive program to apply the guidance contained in these recommendations. Further, I request that you monitor the progress made in increasing the small business share of research and development awards in your organization. It is important that we see some real progress within the first 18 months of this Administration.

Thank you for your assistance in the important matter.

———— ————,
*Director.*

SMALL FIRMS AND FEDERAL RESEARCH AND DEVELOPMENT

[A Report to Office of Federal Procurement Policy Ofice of Management and Budget by Ad Hoc Interagency Panel]

Jacob Rabinow, Chairman, National Bureau of Standards.

Frank Peneranda, National Aeronautics and Space Administration.

George Sutherland, Department of Defense.

Richard Sutz, Energy Research & Development Administration.

Donald Templeman, Small Business Administration.

William Wetmore, National Science Foundation.

Robert Trimble, Office of Federal Procurement Policy, OMB.

INTRODUCTION

There is increasing concern that the capability of the United States to continue its historic successes in technology is in a serious decline. While astonishing achievements have occurred since World War II, there is now considerable evidence that product innovation has either leveled off or declined in many industries. Predictions of a weakened military posture and a less favorable economic position in world trade are associated with analyses showing that the U.S. is losing a significant part of its capability to invent new products essential for the country's defense and for its international sales market.

Analysis of technological capability is an exceptionally complex matter affected by many diverse factors involving individual and organizational motivations, economics, and governmental actions. Since the Federal Government is the biggest source of research and development (R&D) ($26.3 billion proposed for expenditure in 1978), Government acquisition procedures have a large impact on the country's utilization of its best technical and management talents.* One part of the problem—the role and difficulties of the small firm in selling R&D to the Government—was given particular attention by an ad hoc interagency panel under Mr. Jacob Rabinow, nationally known inventor, lecturer and writer, in 1976. The Panel was composed of representatives from the National Science Foundation, Department of Defense, National Space and Aeronautics Administration, Energy Research and Development Administration, Small Business Administration, and the Office of Federal Procurement Policy.

To assist the Rabinow Panel in its inquiry, the services of Mr. William K. Scheirer, an economist, were obtained to perform a literature search and analysis of the role of small firms in fulfilling Government contractual requirements for research and development. Significant findings of Mr. Scheirer are summarized below. His report, with an extensive bibliography, is available for inspection at the National Technical Information Service, Department of Commerce, as Report Number OMB/OFPP/CA-77/1, and in the Office of Federal Procurement Policy.●

## RAILROAD CAR STORAGE

### HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. SIMON. Mr. Speaker, Prof. Walter J. Wills is a specialist in the field of economics who teaches at the School of Agriculture at Southern Illinois University in Carbondale.

Recently he wrote about the railroad car shortage, and I am reprinting his comments in the RECORD because what he has to say makes a great deal of sense.

I would particularly call the attention of the members of the House and Senate to the fact that he points out the deterioration of the railroad beds. One of the fundamental problems in the railroad car shortage is that we have let the railroad beds deteriorate to the point where they move much too slowly. In fact, if we had good railroad beds, we probably would not have a railroad car shortage.

I hope my colleagues on committees where they have responsibilities in connection with the railroads will particularly note his comments.

RAILROAD CAR SHORTAGE

(By Walter J. Wills)

The press has recently had a number of articles concerning the rail car shortage to move grain. For nearly two years this shortage has been evident nearly every week. This shortage has been chronic since at least the mid-sixties.

Each year the railroads assure shippers there will be no shortage. Then at harvest they assure shippers the situation is only temporary. But when a shortage is reported 45 weeks a year there is reason to doubt this is a temporary situation.

The present situation did not develop overnight. A solution will not be quick and easy. However, it is time railroads and government started being honest with the public and took a look at the magnitude and causes of the problem. Treating symptoms may have some politically cosmetic benefits but it doesn't move grain.

There are many reasons government and the public should be concerned with an efficient transportation system for U.S. grain from the producing areas to the consuming areas and the ports.

1. Food and feed grains and oil seeds are a major ingredient either directly or indirectly in U.S. food.

2. These products are a major export product to help reduce the U.S. balance of trade deficit.

3. For humanitarian reasons U.S. food production potential must be available to help alleviate world hunger in case of production disasters in other countries.

Many alleged authorities suggested if farmers built adequate storage there would not be a transportation shortage. The object of production is to move the grain to places where it can be used, not storage. Farmers built storage. But as new crop years appear on the horizon and price indicates the market wants the product are farmers to continue to build more storage because the transportation network is unable to handle the product?

There are three necessary ingredients for moving product: power (energy), shipping facilities, and facilities to move the grain (roadbed, highway, water). Energy consumption will become an ever increasingly more important consideration. Freight cars, trucks and barges are expensive storage facilities. Highways are rapidly deteriorating and many railroad beds are already seriously deteriorated. There is need to use existing facilities more efficiently.

Transportation availability and price determines market outlets available, price farmers receive and where economic activity occurs. There is need for more consideration to moving product and less concern with who moves it. Obviously there is a substantial volume of product for all firms to move.

The solutions that evolve will be an important factor in determining the amount and type of competition in the grain industry. Train load movements and barge tows can use transportation facilities more efficiently than 3–5 car shipments. But only large firms can originate and/or receive train loads (in excess of 300,000 bushels) or 15 barge tows (about 750,000 bushels). Are the U.S. and State governments concerned with maintaining some semblance of competition in the grain industry? The public has a right to expect the government to foster competitive marketing. But historically in the U.S. economic power also is able to exert political power!

It is generally conceded railroad cars, barges and trucks make money (assuming rates are compensatory) for their owners only when moving loaded. Railroad data suggest cars on the average move less than 60 miles a day. There obviously must be some inefficiencies in traffic control that permits this situation to persist.

If the railroad provides clean cars in condition to load and picked the cars up when loaded; and if the cars were unloaded when delivered to the siding there would be an opportunity for more loaded ton miles of movement of available cars each year. If circuitous routings were discouraged cars could make more trips each year.

Even casual observers have seen empty cars on sidings for many days, weeks or even months. This, at a time when shippers are pleading for cars. Except in the railroad industry, most businesses are concerned with how they can meet the demands of their customers!

It has been suggested shippers should own more cars. Each month shippers are placing more cars in service. This scarcely absolves the railroads of the responsibility to also provide more cars. In remote rural areas there are sidings filled with bad order cars. Many have been there for months or years. This suggests railroad management may not be particularly concerned with developing facilities to serve customers or increase stockholder returns.

CONCLUSIONS

The rail car shortage is persistent. Governments and the rail industry continue to treat symptoms and not causes. The brush fire approach to problem solving seldom contributes to a workable solution.

Any solution that concentrates only on large volume shipments will have devastating and irreversible consequences on competition in the grain industry.

The short run solution must consider:

1. More loaded miles per time period per car.
2. Less circuitous billing.
3. Less time loading and unloading.
4. Rapid return of empty cars.
5. Delivery of clean serviceable cars.

The long run solution must consider:

1. More concern with moving product.
2. Greater coordination and cooperation between modes.
3. Expanded improvement of road beds, highways and waterways.
4. Production of cars and barges.
5. An improved, effective program to repair bad order equipment.
6. Further improve on system to keep accurate control on car movement. Then take the necessary steps to correct inefficiencies such a system would reveal.●

## PROBLEMS ASSOCIATED WITH A NITRITE BAN

### HON. JIM LEACH

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. LEACH. Mr. Speaker, American livestock and poultry producers are vitally concerned about a possible ban on the use of nitrite in cured meats. One of America's leading agricultural spokesmen Richard Lyng, president of the American Meat Institute, recently prepared an extensive editorial comment on problems related to insuring the con-

tinued safe supply of American meat and poultry products. His comments are worthy of congressional attention and I urge my colleagues to read his statement which follows:

STATEMENT BY RICHARD LYNG

The last rat died in March 1977. That's fifteen months ago.

Nothing much happened, at least publicly, to note that rodent's passing until about 6:30 p.m. on Friday, August 11, 1978, when, in a great disorganized rush, the USDA and the FDA announced that a Massachusetts Institute of Technology rat feeding study "strongly suggests that nitrite produces cancer of the lymphatic system in test animals." These two mammoth agencies then ponderously stated that they had not yet decided what to do about it and would let us all know.

It is hard to put a finger on when this classic example of bureaucratic ineptness actually started. It is even harder to predict where it will end, but—wow!—what a problem it has created for the U.S. meat industry. Meat people have found themselves almost defenseless against what appears to be a case of government regulators gone wild.

After last Friday's peculiarly timed and even more peculiarly worded USDA–FDA announcement it might have been expected that the next thing we'd hear would be the promised decision about what they were going to do.

No such luck. On Wednesday, August 16, the press was given copies of a "secret plan" to "ban nitrites completely." Who gave away the secret? That's a secret too, but it had to be someone from USDA or FDA. Was it a policy decision? Sometimes such leaks are deliberate. Regardless, it was a super leak which got massive media coverage nationwide.

When the affected meat industry called USDA and FDA asking for a copy of the "secret plan" they were told that it was not available because it was only a "working document." Yet, media continued to use the "working document," sometimes in scare stories about cured meat products. The Wall Street Journal started its headline "U.S. Plans Total Ban of Use of Nitrites. . ."

Congressmen Wampler (R., Va.) and Martin (R., N.C.) called a joint press conference at noon on Thursday, August 17, to announce that legislation was being introduced which would delay any action to ban nitrites until mid-1979. Congressman Martin, who holds a Ph.D. in organic chemistry, pointed out: "In the case of nitrite we believe the risks from banning it far outweigh the moderately small risk derived at worst from this new evidence."

Late on Thursday afternoon, August 17, at about 5:30 p.m., USDA and FDA released another hurried announcement presumably designed to cool the situation. Assistant Secretary of Agriculture Carol Tucker Foreman and Commissioner of Food and Drug Administration Donald Kennedy in a vaguely worded statement said that "regulatory action on nitrite is not contemplated while Congress is out of town. Even if that were our intention—and we repeat that it is not—it would not, under law, be possible to propose, publicize, order and implement such action before Congress returns in January."

Theoretically, this should now lead to a quiet period while FDA and USDA scientists, lawyers, administrators, and political appointees study the laws, the scientific facts, the options they have, and then make a proposal for public comment.

Fat chance! If past experience tells us anything at all we should be prepared for leaks from both agencies in which dire predictions for hog farmers, meat processors, and consumers will be widely circulated.

The harm from this kind of regulatory amateurism is hard to measure precisely. But it is huge, perhaps totaling billions of dollars.

It is so sad, because it is unnecessary. The facts should be publicly disclosed as quickly as they are available. This is supposed to be an "open" administration. The agencies should not give their horseback opinions—("strongly suggests")—until they have completed their analysis and are ready to make a recommendation. And as they study, *no* comments or speculation should be made.

The facts are:

1. The MIT study is solid research, but it is inconclusive and must not be used as a basis for recommending a nitrite ban. The final paragraph of the report itself says:

"While these observations require some consideration, the data are only suggestive and the biological significance of nitrite associated lesions of the lymphoreticular system is unclear. There are suggestions, however, of sufficient magnitude and the study used sufficient animals to raise questions about the widespread use of relatively high concentrations in our food supply."

2. There is a more recent MIT human study which concludes that no more than 2 percent of the human exposure to nitrites comes from cured meats. The other 98 percent comes from other foods or is produced in the body itself.

3. The MIT rat study does raise some questions which seem to call for further research, especially since its results are quite the opposite of other earlier feeding studies.

4. The whole area of rat studies needs to be evaluated. These were specially sensitive rats, fed diets which do not resemble human diets, and were given huge nitrite quantities. Is this sufficient to make decisions having the impact of a nitrite ban? Or should it call for more study, especially of epidemiological data?

5. Virtually all cured meats also contain vitamin C in one form or another in quantities greater than nitrites. The diet of the MIT rats contained no vitamin C!

The wrongs done to the meat industry by FDA and USDA are the result of either malice or ineptness born of inexperience. Assuming that it is the latter, let's hope that they can somehow begin to understand the obligations they have to be responsible in their pronouncements. And let's pray that somehow they acquire the wisdom to make valid judgments.

As this wearying week in August comes to a close we look back incredulously at what happened and ask, in wonderment, why such a great fuss right now, in the summer of 1978, when the last rat died in March of 1977.●

## UNITED STATES-ARGENTINE RELATIONS

### HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. YATRON. Mr. Speaker, during during the course of hearings recently held by the Subcommittee on Inter-American Affairs which I chair, I became more convinced than ever that present policy is seriously threatening the future of United States-Argentine relations.

At the end of this month, an embargo will enter into force, prohibiting all military sales, credits, and export licenses for Argentina. Approved by the Congress as an amendment to the International Security Assistance Act of 1977, this measure will effectively end a United States-Argentine military cooperation relationship of long standing. As a result, our ability to protect the sea lines of communication in the south Atlantic, vital to U.S. interests in both the Middle East and Europe, will be seriously compromised.

In addition, the Department of State has carried the intent of the Congress to the point of refusing Export-Import Bank loans for strictly commercial U.S. business transactions in Argentina. These arbitrary decisions not only deprive American companies of business in Argentina today and in the future; they deprive the Argentine economy of needed investment and the Argentine people of a higher standard of living.

In a recent speech in Washington, Dr. Jose Rafael Trozzo, a prominent Argentine financier and businessman, commented on the state of United States-Argentine relations. His statement provides valuable insight into the reaction of the Argentine people to present U.S. policy which I feel is particularly relevant. I would like to share Dr. Trozzo's comments with our colleagues.

The comments follow:

I want to close my speech by talking to you a little bit about Argentine-American commercial relations.

The United States expanded because of its technical supremacy after World War II. You have billions of dollars invested in Argentina and we have purchased billions more in plants and spares.

The balance of payments is heavily in your favor as it regards trade between our two countries.

Hopefully with our bank in the United States we will reverse that! Or at least we will try to do so.

But today as Argentina emerges as a society based on a system that is best for us—where we are giving great emphasis to private initiative—there is a problem between our two nations which affects not only our banking and commercial business but is affecting the relations between our people and I believe it must be corrected.

I believe it is a transitory situation and being a profound optimist I know it will change.

But it would not be right for me to be here today and not touch on it as a businessman.

There is a trade embargo against Argentina caused by what the papers have referred to as the "State Department Group on Human Rights". Some papers have given it names but I do not wish to personalize the situation.

The embargo has caused what I am told is over $2 billion of American exports to be sitting and waiting to be shipped to Argentina, with no export licenses approved. I said $2 billion. The Export-Import Bank has not granted a license for Boeing planes to an airline of Argentina that has previously bought 15 Boeing; it has denied a license to export $290 million in equipment from Allis Chalmers for a dam and I am told that spare parts to repair American-made military planes are also embargoed, which will mean that other nations will do the business of repairing them and you in the U.S. will not have the business.

We do not understand this, as it is illogical.

Here is a nation, Argentina, where all people are seeking good trade relations, something that has not occurred for a long time, where there is a mutual admiration by the people of our two nations, where we have common roots and heritage and political

ideologies and where the United States does not have to give aid or go to war with us—where the balance of your trade shows an enormous deficit, where the value of your dollar touches a new low each day against the pound, the yen and the mark, where the value of gold climbs each day—and where Argentina is seeking to rebuild a friendship with you and a trade which will result in more trade for both our nations—and Argentina is singled out for a trade embargo because we, for some reason, are not considered as important as Korea, Viet Nam or Russia. It makes no sense politically or economically.

I am hopeful that with closer contacts in the commercial field which will be exemplified by our bank being here in Washington the people in charge of this policy will begin to get a better idea of what Argentina is and what she is trying to do in the commerce area, and to reconstruct the great nation she once was, and I hope that we can help in this educational process, because the problem is, in my opinion, a lack of experience in knowing our nation. That is partially our fault and partially your fault. With these closer commercial contacts, maybe we can correct that problem.

In many ways Americans and Argentines are remarkable people. We are tough when we need to be, and resilient. But both qualities are tempered by a capacity for caring—caring enough to constantly struggle for a better life for more people.

We as an Argentine nation and people are in a reconstruction and reeducation period—and we have to build a society where our children can live in peace and tranquility with hope for the future and using their knowledge in the pursuit of their jobs or professions uninterrupted by war or battles or the threat of foreign ideologies which we do not want . . .●

## HIGH FOOD PRICES: GAO SAYS FARMERS ARE NOT TO BLAME

### HON. RICHARD NOLAN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. NOLAN. Mr. Speaker, the General Accounting Office has just released a 3-year-long study of reasons behind the widening gap between prices farmers receive for their production and the prices consumers pay for the same product on supermarket shelves. The conclusion? When food prices go up, the Nation's farmers are definitely not to blame.

The 154-page report, entitled "What Causes Food Prices To Rise and What Can Be Done About It," cites general inflation, high labor and processing costs, and high transportation costs as the main culprits behind a $76 billion increase, since 1970, in the amount of money Americans are paying for food actually produced in the United States. Since 1973, according to GAO, "Higher marketing charges accounted for $54 billion, or 71 percent of the increase."

The report, which Congressmen FRED RICHMOND and JOHN JENRETTE requested along with me in December of 1975, makes it inherently clear that it is simplistic and terribly unjust for anyone—inside or outside of government—to suggest that higher farm market prices and higher farm support prices automatically cause higher consumer prices—unless the other components of the food industry use farm prices as the excuse and the opportunity to raise prices to consumers. Indeed, the food processors, the wholesalers, and the retailers have continued to make substantial profits—$8 billion in 1977. As a result, 1977 was the first year that the value of the marketing process of the food we produce in America exceeded the farm value of the food—$62 billion to $57 billion.

The report, in our judgment, clearly strengthens our case for parity prices for farmers by proving that higher farm market prices would have only an infinitesimal effect on consumer prices.

What follows is the official summary of the GAO report, including specific recommendations to the Congress. I trust my colleagues will take note, and join us in upcoming new efforts to curb rising retailing, processing, and transportation costs within the food industry.

[Comptroller General's Report to the Congress]

WHAT CAUSES FOOD PRICES TO RISE? WHAT CAN BE DONE ABOUT IT?

DIGEST

Food prices:

How are they determined?

What makes them change?

Why don't retail prices decline when farmers get less for commodities?

Do Department of Agriculture food price statistics really tell Americans what they pay for food?

What of the future?

These questions are on the tips of everyone's tongues these days; and GAO attempts to answer them in this report. In doing so, GAO offers recommendations to the Congress and to the heads of a number of Federal departments and agencies on steps it believes, after a long and careful review, should be taken by all concerned.

From 1970 through 1977 consumer expenditures for U.S. farm-produced food increased 72 percent—41 percent of this increase occurring in 1973 and 1974 when there was a worldwide grain shortage and pervasive domestic inflation.

These sharp price increases and the continuing increases or lack of decreases have brought charges of unfair pricing policies in the food industry; caused consumers to be concerned with the rate at which food prices increases; and led farmers to complain that the prices they receive are too low compared with their production costs.

FOOD PRICE ECONOMICS

Food prices rise generally because farm prices of raw agricultural commodities rise and/or the costs and profits to market these commodities as finished food products rise

Farm prices of raw agricultural commodities are influenced largely by rather unpredictable natural forces such as the weather, pests, and crop disease. Farm prices and food prices are influenced also by other factors that affect supply, such as Federal programs for cropland set-aside, commodity disposal, export sales, storage, and marketing orders; production costs; and the length of the production cycles of most agricultural commodities.

Consumer expenditures for U.S. farm-produced food increased by $76 billion from 1970—$106 billion—to 1977—$182 billion. Higher marketing charges accounted for $54 billion, or 71 percent of the increase. Of the $22 billion increase in the farm value, 55 percent occurred in a single year—1973. Since 1973, 87 percent of the increase in consumer expenditures thas been caused by higher marketing charges.

The largest food marketing cost is labor. In 1977, for the first time, food marketing labor costs ($62 billion) exceeded the farm value ($57 billion) of the commodities marketed. From 1970 through 1977, food marketing industry profits both before and after taxes rose as much as or more than any other cost element on a percentage basis; however, the amount of 1977 before-tax profits (approximately $8 billion) was relatively insignificant when compared with the labor costs of $62 billion. Food industry profits, therefore, cannot logically be cited as a major reason for food price increases.

Does inflation cause high food prices or do high food prices cause inflation? The truth seems to be that one feeds on the other. In April 1978 the President announced plans to moderate inflation through a number of Government actions aimed at achieving voluntary wage and price restraints, reduction of crude oil imports, greater economy and productivity in Government, and an appropriate fiscal and monetary balance in economic policy.

The proper balance and administration of Government programs affecting the supply of agricultural commodities can do much to stabilize domestic food prices.

WHY FOOD PRICES DON'T ALWAYS DECLINE WHEN THE FARMER GETS LESS FOR THE RAW COMMODITY

There are four principal reasons:

When a product's farm value represents a small percentage of its retail price—such as in the case of canned goods, which require a high degree of processing, or fresh produce, which requires special handling—a drop in farm value may have little or no impact on the retail price.

A decrease in a product's farm value may be partially, completely, or more than offset by increases in food marketing costs—the costs of assembling, transporting, processing, wholesaling, and retailing products.

Various retail pricing methods, such as following competitors' prices, setting gross profit margins by department rather than for each product, letting retail margins increase somewhat when wholesale or farm prices fall and absorbing some of the cost increases when prices rise, and running specials at lower prices or offering cents-off coupons rather than reducing the established prices, are based on factors other than just product cost and may result in no reduction in a particular product's regular retail price in response to a drop in its farm price.

In areas where a few manufacturers, retail stores, or food chains account for a high percentage of total food sales, price competition may be limited and there is less likelihood that a drop in a commodity's farm price will be passed on to the consumer.

Various possible combinations of these conditions and lack of specific and timely data on changes in the cost and profit components at the various levels of the food industry make it difficult, if not impossible, to determine precisely why a product's price does not decline when the farmer gets less for the raw commodity.

The total farm value of U.S. farm-produced food remained relatively stable from 1975 through 1977. Total consumer expenditures for food for the period, however, increased 22 percent, or about $33 billion. Most of the increase was received by the food industry.

Legislation has been proposed to provide for an agency or commission to monitor food prices or study the food industry. However, the legislation does not provide for the agency or commission to have access to the records of the food industry. Such access would facilitate checking the validity of reported food price information.

WAYS TO STABILIZE FOOD PRICES IN THE FUTURE

At what rate will food prices rise in the future? Answering this question definitively is obviously difficult because of the unpredictability of so many key variables—infla-

tion, weather, crop disease, pests, technology, and Government policies and programs.

There are things that the Government and the food industry could do, however, to help lower food price levels or slow the rate of price increases. These include—the relaxation of certain Federal transportation regulations which cause truckers to travel many miles with empty trucks and thus serve to increase food distribution costs and more rapid adoption by the food industry of available technology such as computerized checkout systems at the retail level, methods to decrease the amount of food loss or spoilage, and standardization of food containers.

Also, Government decisionmakers need to consider the effects of their proposed actions on food industry costs and thus on food prices. Among actions now being discussed or formulated by the Congress and/or the executive branch are nutritional labeling of all food and food products, drained weight labeling, percent of characterizing ingredients labeling such as the amount of beef in beef stew, mandatory unit pricing, mandatory open dating, and more stringent noise and water pollution standards.

Because all or part of the costs of such actions are invariably passed along to the consumer, both their beneficial and detrimental effects need to be considered in deciding whether to implement them.

FEDERAL FOOD PRICE STATISTICS NEED IMPROVING

The Department of Agriculture, using information obtained from various sources, produces several statistics on food prices and the food industry. During the period covered by GAO's review, these included the farm value—retail price spread, percentage of disposable income spent for food, the retail cost of a market basket of food commodities, and the marketing bill. In addition, the Bureau of Labor Statistics, from which Agriculture obtains certain of its information, publishes a monthly Consumer Price Index, which includes a measurement of food price changes.

Although these statistics are considered the best available information on these subjects, several problems have limited their reliability and usefulness. For example, one of Agriculture's most widely used statistics has been the farm value-retail price spread which represents that part of a product's retail price which goes to the food marketing industry. GAO found that:

Retailer specials were not adequately considered in the retail price computations of either the Bureau or Agriculture.

Farm prices were not collected on a statistically sound basis.

The lag between the time a product is sold by a farmer and the time it is displayed on a retailer's shelf was not considered in computing the spreads.

Recently, because of a change in the Bureau's retail price collection method and a delay in developing a revised method to calculate nationwide average retail prices used in the spreads, Agriculture has temporarily discontinued publishing spreads for most individual foods. A Bureau official said that it would take 6 months to 1 year to determine if prices are being collected for a sufficient number of like items to calculate nationwide average retail food prices.

Until 1977 Agriculture used Department of Commerce disposable personal income and food expenditure statistics to calculate and publish the percentage of disposable income spent for food. Many Government and private organizations' studies found, however, that the percentage was not representative of food expenditures by low-income families.

Because of such complaints, Agriculture stopped publishing the percentage, although it continues to publish disposable personal income and food expenditure totals. Information on food expenditures by income level and/or family size would be helpful in monitoring the Nation's economy and in the Federal decisionmaking process, although an Agriculture official said that the expense involved might be prohibitive. Agriculture has not, however, studied the data needs and costs of data collection.

The market basket and marketing bill published by Agriculture and the Consumer Price Index published by the Bureau are frequently misused. Neither agency has been very successful in educating users about the statistics' limitations and uses.

RECOMMENDATIONS TO THE CONGRESS

Bills to establish a permanent Bureau of Agricultural Statistics (House bills 256, 497, and 3132) or a temporary National Commission on Food Production, Processing, Marketing, and Pricing (S. 1223) are now being considered by the Congress. To facilitate gathering and verifying information, GAO recommends that if such a bureau or commission is to be established, the Congress provide (1) it with the authority needed to assure access to food industry records and (2) for adequate safeguards to protect the confidentiality of such records.

If the Bureau of Labor Statistics is unable to revise its method of computing nationwide average retail prices because of changes in its retail price collection procedures, GAO recommends that the Congress direct the Bureau to institute a retail price collection program which would allow (1) the Bureau to resume publishing nationwide average retail prices for many individual commodities and (2) Agriculture to resume publishing farm value-retail price spreads.

RECOMMENDATIONS TO THE EXECUTIVE BRANCH

The Secretaries of Agriculture and Transportation and the Chairman of the Interstate Commerce Commission should initiate and coordinate an indepth study of the problem of haulers of raw agricultural commodities driving many miles with empty trucks. The study should ascertain the extent of, reasons for, and extra costs caused by the problem. The Secretaries and the Chairman should develop and propose legislation to modify existing regulations if the study indicates such a need.

The Secretary of Transportation and the Chairman of the Interstate Commerce Commission should also provide for a study of the projected effect of authorizing intercorporate hauling—compensated transportation between related companies—including a determination of the (1) net benefits to the trucking industry and (2) effect on consumer prices.

The Director, Office of Management and Budget, should direct his staff to implement and oversee a coordinated Federal effort to assist the food industry in implementing those efficiency-increasing actions discussed in this report.

The Secretary of Agriculture should provide for an assessment of the possible ways in which the food marketing industry could be required to submit monthly data on cost and profit margins. Upon completion of this assessment, the Secretary should develop proposed legislation to accomplish this.

The Secretary of Agriculture should also direct the Economics, Statistics, and Cooperatives Service to:

Improve the method for computing farm value-retail price spreads by better adjusting retail prices for the effect of retailers' special prices and instituting a system which considers time lags in computing the spreads;

Determine the data needs and cost of data collection required to calculate and publish the percentages of disposable personal income spent for food by income level and/or family size and, if found to be feasible and economical, initiate gathering and analyzing the data and publishing the resultant percentages; and

Increase efforts to inform users of its statistics on the retail cost of a market basket and the marketing bill what these statistics show and their uses and limitations.

The Secretary of Labor should direct the Bureau of Labor Statistics to:

Determine the additional labor and cost necessary to institute a retail price collection system which would note quantities sold at regular and special prices and, if found to be practicable and economical, institute such a system and

Increase efforts to inform users of the food portion of the Consumer Price Index what the Index shows and its uses and limitations.

The Secretaries of Agriculture and Labor should direct their staffs to identify areas of common data needs and explore the feasibility of adjusting data collection and data presentation methods to better accommodate both users.

Also, the Secretary of Labor and the Director, Office of Management and Budget, should further consider updating the Consumer Price Index more often than every 10 years to recognize shifts in consumer buying patterns.

AGENCY COMMENTS

The Departments of Agriculture and Transportation and the Interstate Commerce Commission provided written comments, while Labor and the Office of Management and Budget provided oral comments. Their comments are discussed where appropriate in the report.

Agriculture generally agreed with the recommendations to improve food price statistics but pointed out several problems that would be encountered in implementing the recommendations. The Office of Management and Budget and Labor generally disagreed with the need for improved food price statistics.

Agriculture, Transportation, the Office of Management and Budget, and the Interstate Commerce Commission generally agreed with the need for studies to determine the impact of and possible alternatives to certain transportation regulations.●

## FARMING IS A BUSINESS

### HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. AuCOIN. Mr. Speaker, every Member of the Congress who represents an agricultural area understands that the operation of a farm is very similar to any other business. The farmer must buy supplies, meet a payroll, and produce and sell a product.

Like any other business, it is important for the farmer to be able to obtain operating loans as quickly, easily, and cheaply as possible. Yet at the present time, Federal law inhibits quick and easy access to loans.

The Truth in Lending Act requires that time-consuming full disclosure provisions apply to agricultural loans under $25,000. This requirement does not apply to similar commercial loans.

I do not want to diminish the importance of the protections provided by the Truth in Lending Act. The occasional borrower, having little experience with finance, should be provided with a state-

ment of the estimated finance charge, annual percentage rate and a repayment schedule. But farmers can hardly be classified as inexperienced occasional borrowers. Farmers normally receive a substantial amount of income only once a year at harvest so borrowing to meet interim operating expenses is an important aspect of their business. And because farmers borrow frequently, they usually know well the smalltown banker with whom they do business.

There are two other reasons why I think the requirement for agricultural loans is excessive.

First, the disclosure required by the act for agricultural loans are often misleading and meaningless. Because of the unique nature of the farmer's business, it is impossible to predict accurately the likely costs of credit. The farmer simply does not know when he will need disbursements of loan funds or for what length of time.

Second, agricultural loans are extended on different terms and conditions than consumer credit. Consumers typically borrow under a standardized financial package. Agricultural loans, on the other hand, are financing packages tailored to meet the needs of the specific borrower. When the consumer loan-oriented requirements of the Truth in Lending Act are applied to agricultural loans, the result is a complicated and time-consuming disclosure process.

Mr. Speaker, it is clear that farmers are experienced borrowers who deal frequently with lenders and have financial requirements that are very unlike those of ordinary consumers. In sum, the rationale for applying the Truth in Lending Act requirements is not present in the case of agricultural borrowers.

Every Member of this House knows how important it is to cut excessive and duplicative redtape whenever possible. We have an opportunity to do just that by approving an exemption of agricultural loans from coverage by the Truth in Lending Act.●

## MIA SIGHTINGS AND THE MONTGOMERY MISSION

### HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. DORNAN. Mr. Speaker, last Friday morning I received a copy of the report of the Special Committee on Southeast Asia, detailing the opinions of my colleagues on their recent sojourn to the Socialist Republic of Vietnam. I can only say that the report was, at the very least, intriguing. Like so many of these documents, they are a sound record of impressions, rather than a disciplined geopolitical analysis. The content and conclusion must, in justice, be viewed in that light.

However, I still cannot help thinking that the report itself will serve as a relevant "period piece" in some future academic text on our Southeast Asian foreign policy in the post-Vietnam era. It breathes with the spirit of reconciliation, an understandable sentiment. It reflects the pervasive sense of American policymakers that we ought to "put Vietnam behind us" and get on with the business of the world.

It is precisely this tone, this spirit, that is, I think, dangerously naive.

The leadership of Communist Vietnam is a revolutionary military elite, hardened by long years of brutal conflict. No one has better estimated the character of the regime's personnel than my colleague, HENSON MOORE, in his addendum to the Montgomery special report:

> The Vietnamese are tough and dedicated people. They are led by shrewed and capable leaders. We can be sure that their every concern is for what is in their best interests. Our relations with them are unrealistic if we perceive their motive as anything more.

So different is Mr. MOORE's realistic observation from the tenor of the Montgomery report. I am unable to fathom whether this spirit and tone is based on unguarded optimism or merely a wishful assessment of future United States-Vietnamese relations. Consider the evaluations of the committee.

The report states that the Communist Vietnamese attitudes have radically changed in the post-war calm. In the explicit language of the report:

> It is our opinion that there has been a dramatic and fundamental change in the attitudes by the Vietnamese Government toward the United States.

The committee goes on to state that there are "compelling reasons" for this change of mind, which are directly related to Vietnam's internal and external problems. According to the committee, the first of these is the recent change in Sino-Vietnamese relations. The second is the current Vietnamese need for: "food, raw materials, insecticides, fertilizers, machinery, technical help, and equipment by means of full-scale and open trade." In other words, the Communist regime in Vietnam is in trouble.

It can be surely no surprise to anyone familiar with the history of Southeast Asia politics that there has been a traditional enmity between the Chinese and the Vietnamese. These antagonisms are rooted deep in Asian history. Periodic eruption into diplomatic and even military hostility is understandable. There is no reason to believe that the heirs of Chairman Mao have lost the imperial visions of the ancient Middle Kingdom. Vietnam had best beware.

Mr. Speaker, given these severe domestic and foreign problems, we have at our disposal the perfect leverage for influencing Vietnamese behavior. If my reading of the report is correct, we have here an historically unique opportunity to pursue profitable diplomatic initiatives. Vietnamese leaders speak of their need to reduce the dangerous tensions with the Chinese Communists to the north, to develop their oil and natural gas resources along their coast, and to repair the internal damage to the agricultural and industrial sectors of their economy. We have here the very condition that we need to pursue, to our satisfaction, an honorable resolution of the issue of our personnel missing in action. As I have said before on the floor of this House, there is no effort we should spare in the resolution of this issue to the satisfaction of all Americans, most especially the families of those men listed as missing in action. If the Vietnamese would be totally forthcoming on this matter, I am sure that very few, if any, Members of this Congress would object to taking a new view on the entire question of Vietnamese-United States relations.

It is the frightening possibility of missing this opportunity that greatly concerns me, second only to the question itself of the status of those brave men listed as missing in action. The committee report is not comforting in this regard. The committee merely tells us that the Vietnamese deny holding any POW's. Moreover, the special committee informs us, that in discussions with representatives of the U.N., various church groups, and officials of the International Red Cross, there is widespread "feeling," get that word "feeling," that no Americans are being held alive. The committee report, then, goes on to say that it is in agreement that no American is alive in Southeast Asia and recommends a "status change"—a presumption of death—of approximately 1,330 listed as MIA's.

Please note, Mr. Speaker, this recommendation is officially based, on, among other things: First, Vietnamese denials and second, the "feelings" of assorted groups. Feelings. Do Vietnamese formal denials in and of themselves, formally constitute a basis for any valid conclusion on the MIA issue? Is Mr. MONTGOMERY and company really saying to us, between the lines, that if the Communist Vietnamese were holding living Americans for all of these years, they would admit it? Come on. I know, who are we to question the ethical integrity of the Communist leadership of Vietnam? The very idea.

Mr. Speaker, the truly amazing thing is that the committee was prepared to agree with the conclusion that there were no Americans being held alive and that we should go ahead with a change of status, after being told—point blank—by Vu Hoang, chairman of the Missing Persons Search Committee in Vietnam, that international search teams would not even be allowed to come into the country. What kind of cooperation is this? What evidence of good faith can be discerned here?

The situation is similar in Laos. According to the report, the Laotians said that the search for MIA's was seriously compromised by the presence of unexploded bombs and other ordnance. They said that they had lost 50 persons by virtue of such "bomb accidents" occurring hither and yonder in the Laotian countryside. The Laotians told the committee that they wanted assistance in bomb disposal equipment, but not bomb disposal technicians. I, for one, cannot believe that the Vietnamese and the Laotians are acting in good faith in resolving this issue when they prohibit qualified international search teams and technicians from even entering the critical territory for the sole purpose of expediting the recovery of MIA remains.

The Vietnamese, according to the re-

port, oppose the imposition of any conditions precedent to normalizing relations. Of course, they do. Because the conditions are there; they are there for us to use in our own diplomatic initiatives. If the economic problems in Vietnam are chaotic; if the relations with Red China are diplomatically and militarily precarious; if war and the current threats of war have fatigued her people, then it seems to me that we have every opportunity to move decisively now to resolve the MIA issue to our own satisfaction. It is certainly not an opportunity that we should allow to slip through our diplomatic fingers. It is certainly not enough for us to rely upon Vietnamese denials or the starkly subjective feelings of either well or ill-intentioned people on the status or the condition of men listed as missing in action.

As I have already said, if we could get the Vietnamese to agree to our terms for the full resolution of this MIA problems, I cannot imagine many of us in this House or even in the Senate opposing a positive reassessment of our current relationship with Vietnam. But that is precisely the option that the committee is prepared to forego. In the language of the report:

> The Committee feels that the recovery of remains by countries in Southeast Asia is a humanitarian issue and should never be linked with other matters between the United States and the Vietnamese and Lao.

"Never?" Such a strong word. An irrevocable condition. Even the Vietnamese Communists, according to the report, say they are willing to be "flexible." But the special committee says "never." We are being asked, in other words, to abandon any and all political, economic, or diplomatic leverage on Hanoi in the final resolution of the MIA problem, the problem that is most important to the people of this Republic.

Mr. Speaker, the committee can recommend to this House anything it wants. But this House has no cause to honor such recommendations while there is even a flicker of hope that the MIA issue can be resolved to our satisfaction, including the satisfaction of the families of these brave men. Reports of "live sightings" of Americans held in Southeast Asia continue to appear. Each and every one must be thoroughly checked and cross-checked and double checked again.

Mr. Speaker, Mrs. Le Thi Ahn, leader of the Vietnamese community in the United States and an interpreter for the Natural League of Families, has transmitted to me copies of letters from Vietnamese refugees who claim to have actually seen or heard of Americans being held captive in Vietnam after the end of the war. These letters were written in response to an ad in "Trang Den," a Vietnamese language newspaper circulating in the West, asking for such information. I have turned over copies of this critically important information and untranslated letters to the Defense Intelligence Agency. For those appearing below, I have sanitized previously translated refugee letters, deleting names and addresses, in order to protect the identities of the authors and their families. Of course, I fear retaliation by the Vietnamese Government.

Mr. Speaker, I cannot vouch for the truth of these letters. No one can until the proper interviews by responsible authorities have been completed. But I do think that the emergence of these documents is ample ground for calling a halt to premature recommendations of a change of status of those listed as MIA's. I appreciate the work of the members of the special committee; but I must respectfully disagree with the report's overall naive tenor and most of the conclusions. Printed below are the first of a series of memos by Mrs. Ahn and letters I will be inserting into the RECORD. The two items below are translations by Mrs. Ahn of the relevant portions of letters she recently received. I ask that my colleagues give these documents their closest attention:

AUGUST 20, 1977.

REPORT ON SEEING MIAs ALIVE IN XEO RO, RACH-GIA SOUTH-VIETNAM BY LATE 1975

Name of reporter: (delted).

Born on 1952 in Phong Phu, Phong Dinh province.

Place of residence before escape: Xeo Ro, Dong Yen, An Bien, Rach-Gia.

Position under the former regime: Sergeant.

(Deleted) has spent several periods in re-education camps, totaling more than 8 months. On Jan. 18, 1977, he bribed his way out of detention by giving (through a family member) 20 taels of gold to the (deleted) District commissar. He then bought new identity papers and traveling documents and fled to Phu-Quoc Island.

(Deleted) left Phu Quoc by fishing boat on the morning of March 27 1977 and arrived in Leasing, Thailand, on April 2, 1977.

He was admitted to the U.S. on July 77. His present address is: (deleted.)

REPORT ON MIA

(Deleted) live at that time in Xeo Ro, Rach-Gia; Xeo Ro is a remote district near Chuong Thien province. He has seen two White Americans at the Xeo Ro dock during the month of October 1975; the prisoners were on their way to the U-Minh forests. They lay in a motor sampan, their heads were shaven like monks; their wrists were tied with ropes behind their backs.

One man was very thin and tall, the other also very thin, was of medium height. Their escorts encouraged the curious gathered to see them to throw accusations and insults at the prisoners and even to beat them with small sticks. The sampan later continued its journey South, towards the thick, swampy forests. Asked if other witnesses can be cited, (deleted) replied that all people living around the Xeo Ro dock have seen the prisoners. They would testify, if their lives were safe afterwards.

A friend of (deleted), named (deleted), a recent escapee, previously in a Thai refugee camp, now in Australia has seen MIAs in the U-Minh forests (Ca-Mau province). A number of Americans, both Blacks and Whites were being detained in a forced labor camp. Communist authorities completely isolated the area and forbade local people to come near the camp. Nevertheless, many people have sighted the tall Americans. The U-Minh (meaning Darkness and endless) Forest is a thick mangrove and palm tree forest.

(Deleted) also explained that the Viet Communists used the tactic known as "making noise in the East and strike the West." They know that people assume that they keep American prisoners in the North, so they move them to the South and keep them in a place where no one suspect it.

REPORT ON THE SIGHTING OF THREE MIA's GRAVES

We put an ad on the Trang-Den Newsmagazine and received a letter from a recent escapee who left Vietnam July 1977. His name is (deleted). His address is (deleted).

In his first letter, (deleted) wrote: My sister, you ask about the Americans. Yes, I have seen them, but they were no longer living when I saw them, so is there any point in talking about them now?

I answered (deleted) and told him that if he has seen Americans, even dead, he should tell me when and where and under which circumstances he saw them.

He wrote back. Following is a translation of the main points in his second letter.

"MARCH 22, 1978.

"My sister:

"I believe those unfortunate men who lay in those tombs were our friends, they were our allies and share our ideals in the struggle against Communism, therefore I don't mind telling you the truth about what I saw.

"The sighting took place maybe nine months ago, in June 1977 I was called upon to do forced labor for what they called the 'Socialist Republic of Vietnam.' We were sent to do land clearing in a jungle and mountain area named Nui-Ba-Vien in the Q.N.D.N. province. (It is, as you know, the new name of the province; before 1975, it had another name.)

"The jungle was thick, yet it had a lot of bomb craters. I found out that the area we were ordered to clear was the site of a Viet-Cong small hospital. The hospital is now destroyed. Clearing the jungle there was very hard work because the soil was full of rocks and stones.

"There were a number of graves around the hospital. A number of those graves, the Communist cadres who supervised our work told us to build them up and to take good care of them. We knew the dead who laid there were their men. There were other graves which the cadres told us not to bother clearing the weed around, let them go to hell. they said. . . .

"Days after days, we worked from dawn to dusk clearing the jungle. One day, we discovered three tombs a little farther away from the hospital, all the three were well on their way to be flattened by the rain. We knew at once they were American tombs because of the helmet, the clothes and shoes we found on the tombs. On each of those, a piece of wood was planted as a tombstone. I took one of the helmets and saw that inside there was a plastic lining to cushion the shock when the soldier wore it in combat. The lining bore the name of the dead person in English language. I do not read English, and I'm sorry I don't remember the names of the dead. The clothings have deteriorated. but still very recognizable; still no ID that we could see.

"We reported the 3 American tombs to the cadres but they used even harder words against those tombs and told us not to do anything about them. We thought, well, the dead are dead. all is finished and we must treat them with kindness, so my friends and I we sneakingly gather the stones around the tombs. I'm sorry that I do not remember the names.

"The jungle we cleared was later planted with manioc (tapioca). By mid-June, I was released from the labor camp because my time was up. In July, I escaped from Vietnam. That is what I saw. I don't know whether my words are of any help to the families of those still missing in Vietnam.

"Signed (deleted)."

This morning March 26, 1978, we received a call from a friend in (deleted). A woman refugee in this city has seen a white American prisoner being paraded through the city of Rach-Gia about five months after the fall of Saigon. I am getting in touch with

her and will have more detailed information on her sighting.

According to (deleted) a friend of his, a young woman who recently escaped from Phu-Quoc Island and is now in the U.S.A. may know a great deal about MIAs. She is the daughter of (deleted). We are trying to trace her now.

A Vietnamese (deleted) now living in (deleted), has written about a POW he has seen in a cage along the Ho Chi Minh trail during the war. A detailed description of the POW was in his (deleted).●

## THE COMPROMISE NATURAL GAS BILL—WHERE LIE ITS MERITS?

**HON. FORTNEY H. (PETE) STARK**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. STARK. Mr. Speaker, it is understandable that the President has attempted to switch the focus of debate on the compromise natural gas bill away from its impact on energy use in the United States and toward its impact on our international prestige and the foreign exchange value of the dollar. Admittedly, it is difficult to sell a bill whose cost to the American consumer will be almost $30 billion by 1985 and which will not produce any additional supply of natural gas. Neither is the bill's overwhelming complexity a strong selling point—it creates over 20 categories of gas and, according to the Office of Enforcement within the Federal Energy Regulatory Commission, "the proposal is so complex, ambiguous and contradictory that it would be virtually impossible for this Commission to enforce it in a conscientious and equitable manner." Clearly, the merits of the bill must lie outside of its effects at home.

Unfortunately, the statements emanating from the White House about the bill's importance in arresting the decline of the dollar's value in foreign money markets do not hold up under examination. Few economists are persuaded by Mr. Carter's argument and believe it has anything more than political value. Robert Slighton, a vice-president of Chase Manhattan Bank, stated in an internal memo that,

It is by no means clear that the market will perceive the compromise bill as resulting in an enhanced long-run supply of natural gas in the U.S. and an enhanced long-run balance of payments outlook.

Similarly, a study by the Federal Reserve Bank of St. Louis concludes that,

The increased value of U.S. oil imports has not caused the U.S. balance of payments deficit and the declining foreign exchange value of the dollar . . . Thus, policies directed toward reducing oil imports will have little effect on the current trend of the dollar's declining foreign exchange value.

I am submitting for the record an article from Saturday's Washington Post entitled "Changing Face of 'Centerpiece' Gas Bill." It pinpoints the changes which have been made in the bill since it was proposed by the President last year and the ever-so flexible administration rationale which accompanied it. I commend it to my colleagues attention.

[From the Washington Post, Sept. 9, 1978]

CHANGING FACE OF "CENTERPIECE" GAS BILL

(By Robert G. Kaiser and J. P. Smith)

The natural gas legislation that President Carter has transformed into the life-or-death "centerpiece" of his beleaguered energy program is a far cry from the gas program he first proposed last year.

Indeed, this legislation is much closer to what the president once denounced as "war profiteering" than it is to the administration's original gas plan.

Instead of maintaining price control of gas as originally proposed, the new legislation provides for the complete deregulation of new gas by 1985.

In addition, the new legislation lacks some provisions Carter proposed to tilt the anticipated price increases so that more would be borne by industry, less by homeowners.

These two changes in the bill would have two results.

First, prices paid by homeowners would rise more than under Carter's original plan, while those paid by industry would rise less.

Second—partly because industry would not face such large price increases—overall U.S. consumption of gas would not be curtailed as Carter first intended.

Instead of conserving gas, in fact, the bill is now presented as a way of increasing production of natural gas to substitute for imported oil.

The original Carter plan would have eliminated the present two-tier market, in which the price of gas is limited when it is sold across state lines and unlimited when it is sold within the state where it is produced. When demand is high, this system encourages producers to sell gas intrastate, creating shortages like the crippling ones of 1976–77 in nonproducing states.

The compromise now before Congress would not guarantee that such shortages could not recur, according to Energy Secretary James R. Schlesinger, Jr., although it would make them less likely.

To help explain many of these changes, the administration now offers new rationales for its policies and provides new statistics—some of which have been changed repeatedly—to support its argumentation.

Last November, Carter's press secretary, speaking for the president, said, "No bill would be better than a bad bill." Today, administration officials say the compromise measure is not a good bill, but the best obtainable, and that passage of some bill—this one—is crucial to the country's image aboard and to the future of the dollar.

When Carter declared "the moral equivalent of war" in April 1977, he unveiled a plan to reduce U.S. oil consumption—and thus oil imports—in two main ways. The first was to increase prices by a new tax on domestically produced crude oil. The second was a series of devices to encourage industry to switch from gas and oil to coal.

Today, the crude oil tax is regarded as dead in the Capitol, and the coal conversion measures have been weakened. Now a major projected saving the administration is predicting would come from the new gas legislation. (In April 1977, the administration predicted that its original gas program would not save any imported oil at all.)

For months Carter called the crude oil tax the central element of his energy program, but he has not advanced that view in many weeks. Now he says that the compromise gas bill is the centerpiece of the energy program.

Indeed, only once before has Carter embraced a piece of legislation as fervently as he has this compromised and recompromised gas legislation—the other example was the Panama Canal treaties. The White House has engaged the entire Cabinet and every ally it can find—including some oil companies Carter once vilified—to press for passage of the gas bill, which is scheduled to come before the Senate Monday.

The strongest argument the administration is now making for the gas bill is that the world is waiting for a sign that America can take strong action to solve its "energy crisis." Without such a sign, the administration warns, the dollar will take a new beating in world exchange markets.

Carter has called the bill "a symbol of our national will."

Carter has also criticized the gas compromise as imperfect, acknowledging its substantial differences with his original plan. Special Ambassador Robert S. Strauss, a leading administration campaigner for the legislation, has repeatedly criticized it. In one meeting with steel executives, Schlesinger began to argue that the bill was actually a good one, but Strauss cut him off, saying it is not a good bill, but it is the only bill available, according to a source present.

As the content of the gas bill has been altered by House and Senate action, then the secret deliberations of a long-deadlocked conference committee, the statistics used to justify or explain the measure's provisions have shifted, too. These changes in the figures have been a major source of the continuing controversy surrounding the legislation.

For example:

Soon after publication of the compromise gas bill at the end of July, the administration circulated briefing papers on Capitol Hill that said the bill would save 1 million barrels of oil a day by 1985. Soon after that claim was circulated, Carter and Schlesinger told businessmen at the White House that the sayings would be 1.4 million barrels a day.

Gas industry spokesmen say both figures are essentially guesses that cannot be confirmed. Such predictions depend on elaborate assumptions about the growth of the economy, inflation, industrial use of energy and other variables, none of which can really be predicted, according to many industry officials.

"Any firm prediction is bull," said one gas industry lobbyist.

Schlesinger last year repeatedly told Congress that raising the gas price above $1.75 per thousand cubic feet would be useless, since that price would induce the maximum possible production out of gas producers.

When Carter assailed the oil and gas companies last fall for "potential wartime profiteering," he said: "If we tripled the price of oil and natural gas there could be no substantial increase in the rate of exploration" for new supplies.

By last month, however, Schlesinger was arguing that the compromise bill—which would put prices well above $1.75—would result in higher drilling rates "putting more gas in the interstate market."

Schlesinger's reassessment stems from an alteration of the Department of Energy's basic assumptions about future gas production that was made earlier this year after the gas bill became deadlocked in the House-Senate conference.

The Energy Department's quasi-independent Energy Information Administration has altered its projections about gas prices to make the new compromise appear more favorable to consumers.

Last July the EIA said the compromise bill would raise the price of residential gas to $3.31 per thousand cubic feet—$.34 higher than the price would have been under total deregulation of new gas.

This figure alarmed Rep. John D. Dingell (D-Mich.), an architect of the compromise, and he prodded EIA to recalculate its figures, using new assumptions. A subsequent EIA "further evaluation" concluded that the compromise bill would establish a price for residential gas $.31 lower than total deregulation.

Changes in the administration's objectives began to become evident in December of last year, during the Senate filibuster against the Pearson-Bentsen total deregulation bill. At the outset of that filibuster, Carter was telephoning senators, urging them to defeat Pearson Bentsen in favor of something close to the original administration plans.

When pro-administration forces concluded that they could not defeat Pearson-Bentsen outright, the White House abandoned its previous position and began to look for compromises. The process of compromise led finally to the unusually complex and detailed compromise bill that comes before the Senate Monday.●

## UNNEEDED GUN LAWS

### HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. FINDLEY. Mr. Speaker, the June 29, 1978 issue of the Gazette-Times, Virginia, Ill., gave the most persuasive case I have yet seen against new laws to register, license, and control firearms.

It is written by an outdoorsman, Jack French, whose trade is carpentry but whose love is nature. I commend it to my colleagues, especially those who may not have had the opportunity to reflect on the importance of firearms to people who live in rural areas.

NEW GUN LAWS: NOT NEEDED

(By Jack French)

Those of us that belong to the National Rifle Association and other gun-related associations have noticed a lot of new firearm laws being proposed in Washington the last few years. A new one came up May 22, 1978; a type of national gun registration system which would cost several million dollars just to put into effect. But, Congress moved against it, at least for the time being. Some lawmakers would like to register all firearms while others suggest banning all handguns, except for military or police use. Some would even like to confiscate them all, saying it would make our country a safer place to live.

First, the gun laws are only obeyed by the honest citizen, so what good do they do? Can you see a criminal registering his gun? Certainly not. But you can believe he would be in favor of any gun laws that would make his illegal entries safer.

Should I have been raised in a large city and the only place I'd have seen a gun was either in the back of some dresser drawer or hanging from some policeman's belt, maybe my views on gun control would be different.

I, like most of you readers, was raised in a rural area where a gun hanging above the door was just part of the household furnishings. It was used to put wild game on the table, rid the garden of pests, and I even remember one night Grandad retrieved a couple gunny sacks of chickens that the thieves dropped after he sprinkled their old truck with birdshot.

Gun control certainly isn't crime control. This has been proven too many times. New York City has one of the strictest gun control systems in our nation and it is continuing to fail miserably. It's nearly impossible to own a firearm there unless you are a thief or mugger!

Firearms were once an important part of our country when Colt & Winchester were household words and these old guns were used to furnish food and protection to our pioneer families.

Now it seems the general public isn't interested in guns anymore. You don't see much coverage on the T.V. about good guys in the news. For instance, do you know who won the Grand American Trapshoot? Or even where the Grand American is held? Do you know that we have dedicated, hard-working shooters on our Olympic shooting teams?

I read once where a writer stated that handguns were manufactured for the sole reason to shoot people. I assume he wasn't aware of the many thousands that are made for serious target shooters and the many, many thousands more made for the collectors, investors, and the casual target shooter, and the hunter.

It's true that a lot of guns are bought for protection. In our county, crime is pretty well kept to a minimum compared to other counties I know of, thanks to our good peace officers. But another factor is involved, I'm sure. In rural communities such as ours there are very few homes without a gun of some kind. This I'm sure, gives a thief second thoughts.

I would be the first to admit that in our modern day living we do need gun laws. The Federal Gun Control Act of 1968 prohibits the transfer or receipt of firearms or ammunition in interstate or foreign commerce by any person who has been convicted of a crime punishable by more than one year imprisonment; is a fugitive from justice; is an unlawful user of drugs or has been committed to any mental institution. This 1968 Act makes it illegal for persons under 21 to buy handguns or handgun ammunition and you must be over 18 to buy a rifle or shotgun. It even means if you are under 21 you can't buy a box of .22 cartridges (.22's are now classified as handgun ammunition). With existing laws such as these it wouldn't seem we need more. Some say just enforce the ones we have instead of adding new ones.

One state seems to think this paid off. Florida has a three-year mandatory sentence without parole for anyone convicted in using a handgun in a felony. The first year, armed robberies dropped 20 percent. The second year, I traveled Florida's roads and saw the large full-sized billboards along the highway spelling out the three-year mandatory sentences. That year armed robberies dropped 40 percent, gun homicides dropped 21 percent, chainstore robberies dropped 20 percent and so on. There are 11 states that have similar laws and Illinois is one of them.

Most of my police officer friends say that no laws will keep criminals from getting guns, no more than they stopped the flow of moonshine in the Prohibition days.

I have hunted with a pistol or revolver most of my life. I carry one on back-country hunting and fishing trips if for no other reason than a signal gun. A series of three evenly spaced shots is a well-known signal that will bring help to a troubled woodsman from within hearing distance. I have never aimed or fired a gun in fear or anger, but the presence of my old Colt protruding from beneath my fishing vest didn't do any harm a couple times I'm sure. Once when I rounded a bend and saw an undesirable looking person watching my wife from a willow thicket as she fished a remote mountain stream and another time when we were driving down a narrow jeep road returning from a high mountain lake when we approached a pile of watermelon sized rocks blocking the road in front of a hippie-type camp. The rock pile wasn't there when we went up a few hours earlier.

Gun confiscation allowed German leaders to turn that country into a land of total dictatorship once. Other European countries had gun registration laws allowing the enemy forces to merely check the records and take the privately owned guns. Some say that gun control is people control. I haven't said this yet. Some of the lawmakers, I'm sure, are aware of the importance of an armed nation.

I have a couple guns set aside for my young grandsons, and when they are old enough I hope they will be able to enjoy shooting and hunting as much as I have, although I'm beginning to wonder.

Living out here in rural communities, where no matter how efficient a police officer is, he still may be 15 minutes away, it is comforting to know you've got something available besides a golf club as you answer the knock on a door at 2 a.m., hoping it's a troubled motorist and not a troublemaker.●

## LOOKING BACK

### HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. FRENZEL. Mr. Speaker, over the past couple of years I have noted mounting protectionist pressures on the Congress from many different areas of our economy. I have always thought such pressures to be extremely detrimental to U.S. interests at a time when promotion of our own exports has become so important. As a little history lesson and reminder of what can happen when protectionism runs rampant, I attach a copy of an editorial which appeared in the July 29 Houston Post. I am sure none of us wants to return to the economic destruction of the Smoot-Hawley days, and I think a reminder of those days may be enlightening to all of us. The article follows:

LOOKING BACK

After World War I, Americans and most of the world, except for Germany, rode a wave of economic euphoria for several years. But as the 1920s neared their end, financiers, bankers and economists saw trouble ahead. Land booms fizzled. Unemployment grew. And at that point, with the best of intentions, President Hoover asked Congress to provide just a little protection for farmers and a few industries. As the legislation developed, every industry feeling any pinch put in a bid. By the time the Smoot-Hawley Act was passed, Congress had added 1,250 amendments to protect various products. Tariffs were raised by an average of 53 percent.

Over 1,000 economists petitioned President Hoover to veto the bill. Our world trade partners pointed out that if their goods no longer sold on the American market, they would have no dollars with which to buy our goods. Businessmen and investors foresaw what the law would do and backed away from an already shaky stock market. And of course our foreign trade partners reacted in kind, raising high tariff walls against American goods to make them expensive in their stores.

Within three years, our industrial exports had dropped 73 percent, our farm exports by 67 percent. As we lost foreign trade, plants closed down, more jobs were lost and the Great Depression deepened. President Franklin Roosevelt pushed through the Reciprocal Trade Act of 1934 to get our foreign trade moving again. Ever since, the U.S. has worked to make world trade freer.

We need to remember this history amid the rising cries for just a little protection here and there. The U.S. exports one-sixth of all it manufactures, a third of its farm products. We exported $120 billion in goods and services last year, and this trade directly or in-

directly supported 4.5 million jobs in this country. To try the kind of protectionism that started on a small scale and ended in the Smoot-Hawley Act would be flirting with danger and economic destruction.

What we need is a continuing and vigilant system of negotiating, country by country, product by product, to insure fair trade for us and our trading partners. As Rep. Stephen L. Neal, D-N.C., points out, "Indiscriminate protectionism would * * * deprive consumers of the wide choices and lower prices made available by imports. It would accelerate inflation by eliminating export competition. * * * It would poison our relationships with the emerging countries of the Third World, who need trade to survive, to pay debts, to modernize and—significantly—to be able to buy our products." Through negotiations, we can oppose dumping of foreign products on our shores at prices less than those paid in the home market. We will yield trade concessions only to those willing to make concessions in return. We can be tough but selective. Protectionism is a bulldozer in an operation where a scalpel is needed.●

## HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. OTTINGER. Mr. Speaker, today, along with my distinguished colleagues from Florida (Mr. FUQUA) and North Carolina (Mr. ROSE), I am introducing legislation to develop inexpensive satellite communications technology and begin applying that technology to the social development and public interest uses for which it has great potential.

This legislation will direct the Department of Commerce and the National Aeronautics and Space Administration to undertake an experimental program to develop a low-cost, interactive satellite communications system for public service uses. Just over 1 year ago, the National Academy of Science's National Research Council recommended that NASA undertake such a development program.

"There are a number of potential communications services, such as for health care delivery, educational services, search and rescue, electronic mail, teleconferencing, and environmental data collection which apparently cannot readily or economically be provided using the technology available to the common carriers for producing conventional telephone and television services. If the option to initiate some of these services is to remain open in the future, then advances must be made in needed technology by undertaking research and development programs now." Federal Research and Development for Satellite Communications, National Academy of Sciences, 1977.

The applications of advanced satellite communications systems to public service needs has been experimentally employed on a limited basis using the high-cost systems presently available. One example is the network established by 36 Veterans' Administration hospitals in the West that went into operation last November. Recently, Congress, itself experimented with satellite videoconferencing, and the participants lauded the potential and "great significance for the future" made possible by interactive satellite communications. However, the available satellite communications channels will soon be filled by the increasing demand. Even if the public service users could afford such high cost systems, most would soon find themselves priced out of the available channels.

The Federal Government ended its involvement in the satellite communications research and development field in 1973. The previously mentioned NASA report notes:

> Following the withdrawal of the Federal Government from satellite communications R. & D. there have been no commercial satellites to test new techniques and concepts or to permit users to experiment with new services.

British scientist Eric Burgess, in a recent "working paper" on the development of a public interest satellite and information system comments on the lack of advanced private-sector R. & D. "Research and development costs for advanced technology applications are so great that they cannot be accommodated in corporate budgets without some support from the Federal Government or the user. So far the users of communications satellites have been common carriers who in good faith cannot justify to their stockholders research and development that could very well put them out of business."

Advanced satellite technology, such as large-antenna, multibeam satellites paired with low-power and inexpensive ground facilities, could potentially be available by the late 1980's. Such satellites could reduce the user cost by possibly a factor of 100, and increase the efficiency of our use of the available communications spectrum by a similar factor. This would expand existing communications channels, open new channels, and make thousands of new uses for satellite communications possible.

Some other countries, particularly Japan and Canada, have programs underway for the research and development of advanced interactive communications systems. Before NASA's departure from the satellite R. & D. field, many of the component parts of such a system were tested. However, they were never all put together.

The communications field has long been a stronghold of American technology. Many of our exports relate directly or indirectly to advanced technology information and communications systems. If we desire to maintain our lead in this area, we must pickup where NASA left off in 1973, and undertake the research and development program outlined in the legislation I am introducing today.

The "Public Service Satellite Communications Act" would authorize the Department of Commerce and the National Aeronautics and Space Administration to define, develop, and test such an advanced communications satellite within the context of a public service communications system. Commerce and NASA would cooperatively manage the program, and in advance detail their respective areas of responsibility. The exact division of telecommunications responsibilities between these two agencies is currently under discussion by the administration. This proposal would allow flexibility to accommodate any final division of responsibilities which is reached, while still assuring that such a specific breakdown of authority is carried out for this program.

NASA and Commerce would have the responsibilities of developing both a new technology and a communication system to service social and community needs. It is the intention of this proposal to limit the involvement of the Federal Government to the areas of higher risk which cannot be met alone by the private sector. Once this technology is developed, the deployment of any additional satellites would be solely carried out by the private sector. It is therefore important that the private sector be closely involved in the research and development of this technology.

It is equally important that the communications system which the initial satellite will service be developed under the guidance of the public service community, and that it be designed with the foresight and imagination necessary to fully utilize the abilities of advanced technology to meet social and community needs. The identification and aggregation of the public service user community is a critical element of this approach, since one of the greatest obstacles to applying advanced satellite technology to social and community needs—besides cost—has been the fragmentation and lack of knowledge of potential users.

A parallel concern which must be addressed is the radio frequency spectrum requirements necessary to assure the development and operation of such a satellite communications system at the least possible cost to users and to society.

In September of 1979, representatives of the world's government will meet in Geneva at the World Administrative Radio Conference (WARC) to apportion the frequency spectrum and the positions used for satellites in geosynchronous orbit. It is important that the WARC Conference, and the U.S. delegation to it, understand and make provision for the development and operation of high-power multibeam satellites paired with small low-power ground facilities.

The program carried out by NASA and Commerce would follow the four-phase decision process recommended by the National Academy of Sciences. At each phase the Congress would receive an evaluation of the outcome of the previous phase with an outline of the projected actions for the next phase. Briefly, the four decision phases would be conceptualization, experimentation, acceptability—transition to operational—and early operational.

Finally, the user community and individuals with appropriate expertise from industry, universities, and the administration would serve on an advisory council to advise the administrator of NASA and the Secretary of Commerce in carrying out this program.

The United States has led the world in communications technology. By un-

dertaking this program, we will be insuring our lead in this technological field for possibly the rest of this century. At the same time, we will be providing for significant advances in health care, education, and other services to the public—services which will not only improve the condition of the American public, but of people throughout the world. This low-cost technology has the potential, too, of bringing advanced health care and education to many areas of the Third World which are now inaccessible or which existing technology cannot service economically.

I urge my colleagues to join in cosponsoring this important legislation. Following is the text of the bill:

H.R. —

A bill to provide for a research, development, and demonstration program to establish an experimental public service satellite communications system

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SHORT TITLE

SECTION 1. This Act may be cited as the "Public Service Satellite Communications Act of 1978".

FINDINGS AND POLICY

SEC. 2. (a) The Congress finds that—

(1) it is in the public interest to encourage the planning and development of noncommercial communications satellite services in such areas as health care delivery, education, search and rescue, electronic mail, teleconferencing, and environmental data collection which cannot presently be made available at affordable cost by technology now being used by common carriers for producing conventional telephone and television services;

(2) the introduction of affordable, noncommercial communications satellite services for public service depends upon the development of new communications technologies and the judicious use of scarce natural resources, including technology for utilizing both existing and new portions of the radio frequency spectrum, employing larger and more sophisticated spacecraft antenna, utilizing a satellite as a switchboard in space, and advancing technology to drive down the cost of small earth station technology for both the transmission and reception of communications signals;

(3) since the economic risks involved in developing the sophisticated space technology required to provide affordable noncommercial communications satellite services is too great for the private sector to bear, there is an appropriate and immediate role for the Federal Government to assume in the encouragement and support of the requisite technology for public service use;

(4) it is necessary and appropriate for the Federal Government to assist in the aggregation of potential public service users, both government (including the Federal Government and State and local governments) and private, and to support the development of a comprehensive system plan designed to assure that the interactive, two-way, communications needs of public service can be met at affordable costs; and

(5) the earliest possible establishment of affordable, noncommercial communications satellite services depends on the development of a cooperative and working relationship between the Federal Government and the public service user community, including the public service licensees of Instructional Television Fixed Service systems that presently own and operate terrestrial microwave communications systems for educational, medical, and other public service purposes.

(b) The Congress declares that it is the policy of the Federal Government—

(1) to pursue an experimental program to define, develop, and test a new public service satellite communications system; and

(2) to develop and test advanced satellite communications and associated large antenna, multispot beam spacecraft technology for an experimental public service satellite system.

ESTABLISHMENT OF PROGRAM

SEC. 3. (a) There is hereby established a public service communications satellite research, development, and demonstration program to carry out the policy of this Act.

(b) There is hereby established within the National Aeronautics and Space Administration an office to manage the program, in cooperation with the Secretary of Commerce, in accordance with the provisions of this Act.

(c) The program shall be carried out jointly by the Administrator of the Administration (acting through the office established in subsection (b)) and the Secretary. The Administrator and the Secretary shall jointly prescribe rules which shall specify the manner in which the program will be carried out, including rules which detail the authority and specific areas of responsibility of the Administrator and the Secretary in connection with carrying out the program.

(d) Funding requests for the program shall be specifically identified.

INITIAL RESEARCH AND DEVELOPMENT

SEC. 4. (a) The Administrator and the Secretary shall initiate the program by conducting research and development in advanced satellite communications and associated large antenna, multi-spot beam spacecraft technology and by defining, developing, and testing an experimental public service satellite communications system. Such testing shall include flight demonstrations.

(b) In connection with, or as part of, the actions specified in subsection (a), the Administrator and the Secretary (acting in accordance with rules prescribed under section 3(c)) shall—

(1) assess and aggregate user needs, technology projections, service concept development, and program design with the close participation of the ultimate user community, inculding public service agencies of the Federal Government and of State and local governments and private, public service entities;

(2) consider the available competencies and resources of the private sector;

(3) consider the full range of equipment and operational aspects of such a satellite communications system; and

(4) assess the radio frequency spectrum requirements to assure the development of such a satellite communications system at the least possible cost to users and to society.

CONDUCT OF PROGRAM

SEC. 5. To implement and carry out the program, the Administrator and the Secretary (acting in accordance with rules prescribed under section 3(c)) shall—

(1) apply a four-phase decision process consisting of—

(A) a conceptualization phase involving needs assessments, technology projections, service concept development, and program design;

(B) an experimentation phase using communications satellites developed and launched by the Administration and, where appropriate or necessary, available commercial communications satellites in an experimental system, including formulation of criteria by which the experiments may be judged for acceptability and worthiness for transfer to operational status;

(C) an acceptability phase in which the transition to an operational system is initiated and implemented; and

(D) an early operational phase;

(2) report to the President and the appropriate committees of the Congress their evaluations of the outcome of each phase, along with an outline of their projected actions for the next phase; and

(3) take such other actions as may be necessary or appropriate for the effective conduct and administration of the program, including assuring that the option for dedicated frequency spectrum is preserved immediately for a future, operational, large antenna, multi-spot beam communications satellite system for public service.

COMPREHENSIVE PLANNING AND PROGRAMMING

SEC. 6. The Administrator and the Secretary (acting in accordance with rules prescribed under section 3(c)) shall transmit to the Congress not later than September 30, 1979, a comprehensive plan for the program which shall be designed to meet the policy of this Act. Such plan shall identify—

(1) the basic elements of the program;

(2) the program schedule;

(3) a series of decision points within the program at each of which the program may be evaluated to determine that the values of services and technology to be developed will justify the investment being made, without prejudice to slow but promising developments; and

(4) the funding required to carry out each major element of the program in each fiscal year of the program.

ADVISORY COUNCIL

SEC. 7. (a) There is hereby established a council to be known as the Public Service Satellite System Advisory Council.

(b) The Council shall advise the Administrator and the Secretary in the performance of their duties under this Act.

(c) The Council shall consist of representatives of the prospective user community, and individuals with appropriate expertise drawn from the Administration, the Department of Commerce, industry, and universities.

(d) The President may appoint not more than 12 individuals to serve as members of the Council, one of whom he shall designate as its chairman. Not less than one-half of all individuals serving on the Council shall be members of the potential user community.

(e) Members of the Council appointed under this section shall be appointed for the life of the Council.

(f)(1) Except as otherwise provided in this subsection, members of the Council shall serve without pay.

(2) Members of the Council who are full-time officers or employees of the United States shall receive no additional pay on account of their service on the Council.

(3) While away from their homes or regular places of business in the performance of services for the Council, members of the Council shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the service of the Federal Government are allowed expenses under section 5703 of title 5, United States Code.

(g) The Council may secure directly from any Federal agency information necessary for it to carry out its responsibilities under this Act. Upon request of the Chairman, the head of such agency shall furnish such information to the Council.

(h) The Council may use the United States mails in the same manner and upon the same conditions as Federal agencies.

(i) The Administrator of General Services shall provide to the Council on a reimbursable basis such administrative support services as the Council may request.

(j) The Council shall cease to exist two years after the date of the enactment of this Act.

DEFINITIONS

SEC. 8. For purposes of this Act—

(1) the term "Administration" means the National Aeronautics and Space Administration;

(2) the term "Administrator" means the Administrator of the Administration;

(3) the term "common carrier" has the meaning given it in section 3(h) of the Communications Act of 1934;

(4) the term "Council" means the Public Service Satellite System Advisory Council established in section 7(a);

(5) the term "program" means the public service communications satellite research, development, and demonstration program established in section 3(a); and

(6) the term "Secretary" means the Secretary of Commerce.

AUTHORIZATION OF APPROPRIATIONS

SEC. 9. There is hereby authorized to be appropriated, to carry out this Act, $10,000,000 for fiscal year 1980, and such sums as may hereafter be authorized by law for subsequent fiscal years.

## BALANCE(S) OF POWER SERIES BOOK II (H)(i) POLITICAL CULTURE

## HON. JOHN B. BRECKINRIDGE

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. BRECKINRIDGE. Mr. Speaker, continuing with the strategic balance portion of the ongoing Balance of Power series, today's selection addresses the factor of political culture. An understanding of Soviet political culture, like national character, as analyzed in the previous entry, is important in assessing accurately the relative strengths and weaknesses of their country and ours.

The sorts of strengths which political culture may present include breadth of consensus, stability in crisis and succession, and active involvement in and popular support for Government decisions. Weaknesses, on the other hand, may occur as a result of rapid change or patterns of popular alienation from ruling elites.

Today's article, "Generations and Politics in the U.S.S.R.," suggests that the legitimacy of the Soviet Government has grown in the eyes of some Russians (the masses), while shrinking in the eyes of the more active citizens. The author, Walter D. Connor, finds reason to believe that the broader base of more diverse political activities will make possible a leadership succession after Brezhnev with less instability than many have foreseen. It remains for U.S. leadership to reflect on the strategic importance of this political trend in the Soviet Union.

This article first appeared in Problems of Communism, September-October 1975, issue of the American Sociological Review. The first part of Professor Connor's article follows:

GENERATIONS AND POLITICS IN THE U.S.S.R.

(By Walter D. Connor)

The "collective leadership" which displaced Nikita Khrushchev in 1964, and which in its early phase evoked so much speculation about the viability of committee rule in the USSR, has endured a decade and more—an impressive record in a period of global political instability. But whether one is inclined to persist in calling it "collective" rule or chooses to refer to "Brezhnev's Politiburo" (he, at least, restored its old name), the members of the ruling body of the Communist Party of the Soviet Union (CPSU), the watchdog of the Soviet state and society, have aged. Gradually but inevitably, they will leave the scene, making way for their successors.

This essay is not a venture in "Kreminology." I do not proposed to wade in surnames or to assess the durability of a Kirilenko succession in the face of claims by a Kulakov or by others more junior. Nor is it my intention to explore the factors militating for the inclusion or exclusion, in an emergent new leadership, of particular personalities among those eligible.[1] What the following discussion will attempt to do is to clarify some important aspects of contemporary Soviet political reality—mainly the problem (or nonproblem) of "generations" and the properties of Soviet political culture—as they relate to the politics and consequences of succession. Consideration of these matters will not enable us to predict the main personalities in the succession (at least I do not see how it can). What it may yield are some reasoned judgments, grounded in historical experience, concerning the path any new Politburo, whatever its composition, can be expected to follow, and how it will probably cope with both inherited problems and new ones.

GENERATIONS AND CHANGE

One might as well, at the outset, surrender to the temptation to use the term "generation"—but not without a caveat. The temptation is especially strong for Western analysts because the tenure of the Brezhnev-Kosygin "regime," whose passing is now anticipated in the near future, coincides roughly with an epidemic of youthful alienation, student revolt, and other manifestation of generational cleavage in the industrial West—a once seemingly "endless crisis" that peaked in 1968 and has only recently shown signs of abatement.[2] The Soviet Union was apparently free of such tensions, although they did affect Poland, Yugoslavia, and Czechoslovakia. But were they, perhaps, smoldering beneath the tranquil surface? If generational chasms open wide everywhere else, why should the USSR, despite its impressive apparatus of internal control, remain untouched? And if "youth" vs. "age" is not the critical confrontation there, it is not still reasonable to surmise that the convictions and expectations of the "middle-aged"—the educated, "industrial" generation—may differ greatly from those of the "gerontocracy" in the Politburo?

In trying to assess whether generational differences exist and, if so, what their political impact is, or is likely to be, we should beware of confusing our own hopes and expectations with reality, or with evidences of what we assume to be reality. This is an easy danger to succumb to, especially when we have the convenient peg of "generations"[3] (for we know that one generation must succeed another) on which to hang our expectations, and the danger should be recognized as such. Perhaps, after all, it is not the seeming gap between generations, but rather the impregnable solidity of the Soviet system, the stability of the Soviet "way of life" as it involves masses, elite, and the political process, that is the datum—the reality rather than the appearance. At least, raising this possibility provides a starting point for posing questions about Soviet "generations" and their relevance to the prospects for political change in the USSR.

These generational questions involve two distinct groups. First, there is Soviet "youth," i.e., the under 30 population. Does a broad gap divide it from the Brezhnev geenration; and if so, what is the gap about, and will it make a difference to the future of the Soviet politics? Second, there is the generation of presumptive Politburo "successors," those no longer "young," but younger than the current leadership. Do its members view their current rulers across some sort of chasm, and if so, is the nature of the chasm such that their succession to power can be expected to make a difference?

The question of "youth" can be handled in relatively short order. Western journalists and analysts are still inclined, on occasion, to point to the dissatisfaction of Soviet young people with the lack of consumer goods, to their desire for more rock music, miniskirts, blue jeans, etc., as evidences of a generation gap, and—more important—they view this gap as the portent of a transformed political future. It is understandable enough that they should be impressed by such manifestations of youthful discontent. One must gather impressions from someone, and Soviet young people are much more ready than their elders to talk freely to Westerners. However, the political implications are open to question, for such a gap—between youth who yearn for a certain lifestyle and their parents and political leaders who often deplore it—has demonstrably little to do with politics. (To paraphrase Andrei Amalrik, socialism with bare knees does not equal socialism with a human face.)

The fact is that Soviet youth in the mass is less differentiated from its elders along critical political lines than is its counterpart in the West. The combined machinery of tightly-controlled youth organizations and a traditional, nonpermissive educational system focused on the "adult" concern of preparation for the world of work, rather than on providing a hiatus between infancy and maturity in which one "explores" one's feelings, beliefs and needs, has had its effect. The social space in which Soviet youth might develop its own group consciousness, its own set of political orientations, has been tightly circumscribed by that machinery. Also, material affluence and a modicum of privacy, which have been essential to the development of youth cultures in the West, are still lacking in the USSR. Whatever generation gap does exist there, it does not involve a politicized "youth culture."

Even if such a culture did exist, it could have no near-term political effect since it is not from youth's ranks that the successors to today's "gerontocracy" will come. Unlike the US Congress, the mechanisms of Soviet government have not yet reached the point of welcoming those in their late twenties and early thirties to a share of the seats of power. Thus, the relevance of the current political convictions of Soviet youth, whether they be oppositional (unlikely) or conformist-apolitical (more likely), lies only in the distant future, by which time those convictions may or may not have changed but will certainly no longer be the convictions of "youth."

More relevant, surely, are questions about those who will succeed to power, and what we may expect from them as the iron law of the actuary works to change the composition of the Politburo in their favor. Here, if there is a "gap" which will have a marked effect on the conduct of Soviet politics, it must, in the author's view, be of a particular type. Certainly we may anticipate gaps—in styles of management, in readiness to rely on "technical" expertise, in propensity to employ Marxism-Leninism as a rationalization for actions—that arise from career differences. An older generation whose educational/professional credentials were often attained after their potential leadership ability was noted by the party and a younger one whose

Footnotes at end of article.

similar credentials were their "ticket" of admission into the lower ranks of the elite can doubtless be expected to behave differently in some cases. But these differences, however significant, are not the stuff of which political transformations are made. The gap must come in the realm of "political culture" itself—in that region where questions about the purposes and uses of politics are explicitly raised. This being the case, it is well now to turn to an examination of political culture in the contemporary USSR.

SOVIET POLITICAL CULTURE

Years ago, one of the pioneering students of political culture argued that it was the product of "both the collective history of a political system and the life histories of the individuals who currently make up the system . . ." [4] Considering what those histories have been in the USSR, it is hardly surprising that an astute analyst of Soviet affairs quite recently characterized the political culture of the Soviet Union as "almost unbelievably aberrant and deviant." [5] The Soviet political culture is clearly rooted in the extraordinary history of Russia over the last 60 years, portions of which, greater or smaller, have shaped the consciousness of both the elites and the masses. Without attempting an exhaustive inventory, I would argue that three major, historically-rooted elements characterize the current political culture: apoliticality, the conviction of impotence, and expectancy.

Apoliticality. It might seem paradoxical to assert that in a society so evidently "politicized," where such a wide range of behavior is accorded political significance by the regime, the overwhelming mass of the population is apolitical. Yet the paradox is only apparent. It is all very well to emphasize the heavily politicized content of the educational processes and the mass media, to which all Soviet citizens are exposed. It is, however, a very different thing to assert that this exposure results in a politicized population. If anything, the major effects—and probably the main purposes—of official socialization and communications efforts have been and are, on the one hand, to assure the public that there are no more major domestic political issues (these having all been resolved correctly and immutably in the course of Soviet history) and, on the other, to depoliticize social and economic issues such as housing, incomes policy, environmental preservation, and access to education, in order to prevent dicussions of these matters from reaching the point where any kind of political change might be entertained, even hypothetically, as a necessary step toward their solution. If indeed these have been the purposes of the regime's virtual monopoly of education, communications, and extra-familial socialization, they have been pursued with vigor—and effectiveness—for the more than 40 years since Stalin initiated the "second revolution."

To say that most Soviet citizens are apolitical is not to say that they are "parochials," as were, no doubt, many of the inhabitants of the Russian Empire, to whom the state was little more than taxgatherer. Today's citizens are quite aware that they have a central government (they could scarcely escape such awareness); they are oriented toward it; indeed, in some generalized sense, they are in large measure loyal to it. But the face of that government as a political mechanism, as an arena in which conflicts at high levels are resolved, with consequences for those citizens, remains vague and blurred. Nor do most Soviet citizens, at least to the author's knowledge, find this strange. To them, "politics," insofar as its existence is perceived, is the business of the leaders, not of the common folk. Enough for them to identify with the system and to focus their grumblings about the vicissitudes of everyday life on the middle- and low-level bureaucrats (whom they see excoriated with monotonous regularity anyway on the pages of Pravda and Izvestia).[6] Notwithstanding all the complaints of Agitprop about inadequate idealogical training, low levels of political consciousness, etc., on the part of the masses, the Soviet leadership is probably quite satisfied, on balance, that it has such a docile population to deal with, presenting little need at the moment for the regime to resort to coercion to keep it in line. Those who view the complaints of Agitprop and idealogical specialists about "shortcomings" as the tip of an iceberg whose submerged mass contains widespread, smoldering resentment forget that, like any bureaucratic organization, Agitprop must justify its continued existence, expenditures, and personnel demands. The line that, in spite of great progress to date, there is yet "more to be done" is a conventional way of doing this.

Of course, the threat of coercion also plays a role in encouraging apoliticality. If one were to paraphrase Anthony Downs [7] and attempt to construct an "economic theory" of Soviet "post-totalitarianism," one element would be the costs of political participation going beyond the permissible limits prescribed by the system. In a democracy, citizens may remain politically uninvolved because they feel the system works tolerably well; or, alternatively, because they may calculate that the costs of political action to remedy the defects that they perceive are too high—in terms of energy, time, money, and foregone opportunities for other, non-political gratifications—when balanced against the potential benefits to be gained. For citizens in a polity of the Soviet type, the costs of engaging in unsponsored political activity are high, and they are clear—harassment, loss of job, imprisonment—while the potential benefits are few and doubtful. The cost-benefit calculus is thus much clearer in the East than in the West, and it is one that leads many citizens of Soviet-type policies to prefer a safe apoliticality to a risky political activism.

(It is precisely this calculus that Solzhenitsyn has in mind in his recent writings when he urges people to withdraw support from the "official lie." Addressing himself to the intelligentsia, he argues that one cannot fight for change without costs, on "weekends and in our spare time, without giving up our scientific research institutes." Moreover, he warns that each citizen will stand alone, "in chilling isolation," at least at the outset; yet he invites his countrymen to brave the punishment they will receive for even the nonviolent, "spiritual," but open resistance he encourages:

"A society to vicious and polluted . . . can only be cured and purified by passing through a spiritual filter. And this filter is a terrible one, with holes as fine as the eye of a needle, each big enough for only one person. And people may pass . . . only one at a time, by squeezing through.

"By deliberate, voluntary sacrifice." [8]

If not utopian, Solzhenitsyn's exhortation certainly idealistic. It asks much, perhaps too much, of a people for whom the consequences of open opposition have been only too clear.)

These observations may throw the particular "heresy" of Soviet dissidents into sharper relief. It is rooted not so much in opposition as in laying claim to participation. To be a dissident is to enter politics without a license, to participate without official sponsorship. It is to attempt (as do the writings of the Solzhenitsyns, Medvedevs, and Sakharovs) to restore "politics" as a weighing of alternatives. This is the major crime of the dissenters; their break with the apoliticality of the mass political culture.

The Conviction of Impotence. A different matter from "apoliticality" is an individual's socially-conditioned assessment of his own political efficacy. Concerned he may or may not be about politics—but if he were concerned, could he have any effect? Were he to translate generalized feelings of support or opposition into action, would his acts strengthen or weaken the system in any way, or are the levers of power so far removed from reach as to make such efforts pointless?

This is a broad question, but the answer, in my view, is fairly clear. The Soviet citizen, whether comfortable or not with the feeling, experiences a sense of his own powerlessness. Though writing in the different context of the "Sovietization" of Eastern Europe, the Polish émigré writer Juliusz Mieroszewski captures this point well when he notes that the "goal (of Sovietization) is acceptance—not of the system (the party does not depend on this) but of one's own impotence." And indeed, the whole history and experience of the Soviet population could scarcely have had any other effect. They have been "mobilized" for industrial and agricultural efforts, for defense and reconstruction—and always from the top, whence their revolution emanated. Though sometimes consultative in style (for example, when discussions on public issues are conducted in the press with "broad representation" of public views), Soviet politics has been manipulative and perspective in substance. The great political decisions of Soviet history—ranging from Stalin's commitment to the rigors of coercive and rapid modernization, through Khrushchev's denunciation of the Stalin cult, to the current leadership's decision to pursue détente—may have been received with pain or pleasure by the masses, but they did not emanate from any structured participation by the masses in determining the course of policy.

No less able than other peoples to distinguish reality from appearance, the Soviet people have drawn the proper conclusions from such historical examples as to their place in the system. If we accept the view of Valery Chalidze that the regime has in any case convinced the population at large that it is the only possible regime and that, whatever flaws it may possess, "any other conceivable regime would be frightful," [10] then such conclusions may not be painful for the majority. For the minority who harbor the germs of a "participant" orientation, for the "middle class" which has much to gain from legality, predictability, and rationality, the conviction that they are powerless, that to protest is to beat one's head against a wall, is no doubt agonizing, but it is nonetheless a real conviction.[11]

What Soviet political culture lacks, in a sense, is a citizenry, in the normative sense of a collectivity of persons with "participant" orientations toward politics adequate to support movement toward what Gabriel A. Almond and Sidney Verba have called the "civic culture"—i.e., toward democracy. As these authors noted, democracies do not rely on "participants" alone; they require subjects and parochials as well, in a viable mix.[12] But when "participants" are in such short supply as they are today in the USSR, the prospects for democracy seem bleak indeed—even if a liberalizing regime were to plant the appropriate seeds.[13] The contemporary mass political culture may not require the type of government the USSR now possesses. It could tolerate and support a wider range of authoritarian or totalitarian, looser or tighter political structures—but hardly stable democracy. The point is not only that the older Soviet generations have been trained to the garrison disciplines of totalitarianism, but also that no generation has been socialized into the disciplines of democratic participation.[14]

Although the general scheme formulated by Almond and Verba provided a framework for examining specifically democratic polities, one element of their characterization of a

Footnotes at end of article.

"subject-participant" culture is suggestive in the Soviet case:

"Because participant orientations have spread among only a part of the population, and because their legitimacy is challenged by the persisting subject subculture and suspended during authoritarian interludes, the participant-oriented stratum of the population cannot become a competent, self-confident, experienced body of citizens." [15]

FOOTNOTES

[1] For a perceptive recent discussion of these factors and other aspects of the succession, see Grey Hodnett, "Succession Contingencies in the Soviet Union," *Problems of Communism* (Washington, D.C.), March–April 1975, pp. 1–21.

[2] A characteristic Western (or American) response to such problems (and one that provides evidence of a significant difference between the Western and Soviet political cultures) is to organize a widely-publicized conference, such as the one in Princeton, N.J., in December 1968, which produced *The Endless Crisis: A Confrontation on America in the Seventies* (edited by François Duchêne), New York, Simon and Schuster, 1970.

[3] "Generation" is of course, an exceedingly slippery and imprecise term. People are born "all the time," not at intervals convenient for grouping under such terms. It is used here in a very loose sense, bearing in mind its deficiencies as well as its familiarity.

[6] Roy Medvedev, in the revised English-language version of his treatise on socialist democracy, which came to hand after the bulk of this essay was written, makes somewhat similar points about apoliticality ("the majority of the people and a large part of the intelligentsia are politically passive—indifference, or even a conscious rejection of politics, has become an ingrained habit, a form of self-protection"); about the purposes of political socialization as conceived by the "dogmatists" ("to assure us that the general development of the country is proceeding correctly, that basically it was always moving in the right direction"); and finally about the popular view of the government ("an assumption by the common people . . . that those in charge are pursuing a correct policy, that the leadership is composed of people best qualified to interpret Marxism"). (Regarding this last, however, I would scarcely agree that the common people's assumptions about their leaders' adequacy in interpreting Marxism are a major component in the legitimacy the leadership is accorded.) See Roy A. Medvedev, *On Socialist Democracy*, New York, Alfred A. Knopf, 1975, pp. 172, 197, 298, respectively.

[11] See Andrei Amalrik's remarks on this in "Will the USSR Survive Until 1984?" in *Survey* (London), Autumn, 1969, pp. 54–55.

[12] *The Civic Culture*, Princeton, N.J., Princeton University Press 1963, p. 20.

[13] It was evidently in the "participant" sense that the Czech writer Ludvik Vaculik understood the word "citizen" when he said (at the Czechoslovak Fourth Writers' Congress in June 1967): "I believe that there are no citizens in our country any more." Yet, a year later, the "reserves" of the Czechoslovak democratic tradition *had* reasserted themselves in the Prague Spring. There *were* citizens; they had emerged from hiding. However, the vastly different traditions and history of Soviet Russia would make the "responsiveness" of the masses there to democratic-participatory stimuli from a liberalizing regime a matter of some doubt. For a summary of Vaculik's address, see Barbara Wolfe Jancar, *Czechoslovakia and the Absolute Monopoly of Power*, New York, Praeger, 1971, pp. 73–75.

[14] Many Soviet dissidents have characterized the mass political "mind" in their country in terms suggesting that democratic procedures, if allowed, could not flourish. Nadezhda Mandelstam sees much of the population as "mentally ill" and observes that no one could be "normal" after fifty years of Soviet history (*Hope Abandoned*, New York, Atheneum, 1974, p. 479). Solzhenitsyn, in his *Letter to the Soviet Leaders*, New York, Harper and Row, 1974, p. 52, argues that over the last fifty years "Russia's preparedness for democracy, for a multiparty parliamentary system, could only have diminished."

[15] Almond and Verba, *op. cit.*, p. 25. Frederick Barghoorn has characterized the Soviet political culture as "subject-participatory," using these terms in a slightly different sense from their connotation in the Almond-Verba conceptualization of a "subject-participant" culture (see his *Politics in the USSR*, 2nd ed., Boston, Little Brown, 1972, pp. 20 ff; and his essay "Soviet Russia: Orthodoxy and Adaptiveness," in Pye and Verba, *op. cit.* pp. 450–511.) ●

## HOUSE ACTION STRENGTHENS DOMESTIC AIRLINES

### HON. JAMES R. JONES

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. JONES of Oklahoma. Mr. Speaker, during the 95th Congress, the Ways and Means Committee has taken two significant actions to insure that our airline industry remains a viable force in our Nation's transportation system.

Both actions had caused a certain amount of controversy, but the solutions drafted by the committee should be supported by all Members of Congress who seek fairness in our transportation policies.

The first action concerns the taxation of so-called "fringe benefits" received by employees of airlines. As you may recall, the Internal Revenue Service circulated proposed rules in 1976 that would provide for the taxation of airline employees' flight passes.

This attempt by the IRS to reverse years of tax policy in this area was both unwarranted and unwise. First of all, the taxation of such passes would be incredibly difficult to administer from the IRS's point of view. Second, it would be most difficult for airline employees to calculate the amount of benefit received from passes for purposes of filing their taxes. Third, these flight passes are used to encourage the best qualified personnel to enter the airline industry. Oftentimes, the salaries paid by airlines are not commensurate with other occupations. The existence of limited free or reduced flying privileges is a great incentive for the airlines to retain and keep the best personnel possible to insure the safe trips of thousands of Americans aboard our air carriers.

Mr. Speaker, as you know, the Ways and Means Committee became active in this area of fringe benefits. We held hearings, and questioned the administration on the reason for this change of policy. We passed H.R. 9251, which I authored, which prevented the IRS from changing long-standing tax policy in this area and other areas of fringe benefits. The committee recently passed yet another bill that reaffirmed my position that the Congress, not the bureaucracy, will make the rules by which citizens are governed.

The second action the committee considered and passed was a provision dealing with aircraft noise reduction. The committee worked out an equitable provision that would earmark a portion of the excise tax currently collected on the sales of tickets and freight for purposes of reducing noise due to the operations of commercial aircraft.

A little over a year ago, the Federal Aviation Administration declared that many of the present aircraft flown by U.S. airlines violated Government noise control standards. This FAA declaration forced many airlines to either abandon their present fleet of airplanes, or expend large sums of money to retrofit present aircraft for less noisy operation.

The Ways and Means Committee studied the current excise tax on tickets and freights, and decided that the airlines should be allowed to use a portion of the funds derived from this tax to offset the cost of such conversion. I think it is important to keep in mind that the Federal regulations are the cause of this conversion, and considering the financial picture of most of the airline companies, I think it is proper to fund part of the cost from the current excise tax. If this is not done, airline customers will pay for the conversions anyway through higher air fares.

Mr. Speaker, American Airlines is the largest civilian employer in the State of Oklahoma. It is true that much of the noise conversion work for American will be done in my district. I would not be truthful if I did not say American's presence in my district did not affect my vote on the noise bill, for I am charged with representing the best interests of my constituents. Nevertheless, I hope my other colleagues will also share my opinion that the noise reduction bill is an equitable solution to a problem placed on the airlines in part due to the Government's environmental policy. I hope they will join me in supporting this legislation and working for its passage in this Congress.

These two actions by the Ways and Means Committee—the fringe benefit tax treatment bill and the noise reduction bill—should be supported by the Congress. I urge continued support for our efforts to fashion a fair and workable policy toward our airline industry. ●

## AIRLINE PASSENGERS OPPOSE NOISY AIRCRAFT BILL AS A $3 BILLION GIVEAWAY OF TREASURY FUNDS TO THE AIRLINES

### HON. CHARLES A. VANIK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. VANIK. Mr. Speaker, the opposi-

tion to the $3 billion Treasury giveaway program to the airlines continues to grow. In a letter that appeared in the Washington Post of September 11, Harold J. Salfen of the Airline Passengers Association outlined why the airline traveling public opposes the bill. The letter follows:

THIS YEAR'S TREASURY AIR RAID

The Airline Passengers Association agrees with your Aug. 8, editorial "This Year's Treasury Air Raid." APA, as the representative of over 40,000 frequent airline travelers, is strongly opposed to the financing proposal of the Airline Noise Reduction Bills as a giveaway of over $3 billion to U.S.-certificated airlines.

Currently, there is an 8 percent domestic passenger-ticket tax, a 5 percent domestic air-freight tax, and an international passenger-departure tax, which the airline passenger and shipper agreed to pay because the funds to be collected would be placed in a trust fund and used to improve airport and aviation safety. APA opposes the financing proposal, which provides for diversion to the airlines of a portion of these safety taxes to pay for quieter airplanes or engines to re-

APA's position is that, first, taxes should not be utilized to pay for improvements in aircraft owned by private airline companies. The current record of airline earnings should enable the airlines to comply with the federally mandated noise standards without federal assistance.

Second, APA opposes the precedent that would be set by the federal government's providing funds through a dedicated tax to a private industry to pay for environmental changes. If this legislation passes, any industry required to make changes as a result of a federal requirement will have strong precedent to demand that the federal government pay for such changes.

APA understands that if this taxing proposal is not enacted, then some carriers will have to raise fares to finance the new aircraft or engines to meet the new noise standards, and under the new regulatory environment this would be a great deal easier. However, many well-managed airlines have already re-equipped or replaced much of their aging jet fleets, and they would be in a position to reduce fares when they have completed their retrofit replacement programs. APA feels that this is a more equitable situation than a giveaway of a portion of the safety ticket tax.

HAROLD J. SALFEN,
*Executive Director, Consumer Affairs, Airline Passengers Association.*

The airline passengers are adding their voices to the chorus that opposes the bill. I urge my colleagues vote against the closed rule so that amendments which would reduce the airline passenger tax and deny the airline industry and investment tax credit on the Treasury gift may be considered.

The airline passengers want to keep the cost of their tickets down and do not want their tax dollars going to pay the airlines' bills. We cannot afford to disagree with them.●

## REFORM OF TRANSPORTATION PLANNING REQUIREMENTS

### HON. ROBERT W. EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. EDGAR. Mr. Speaker, during the course of my service on the Public Works and Transportation Committee I have watched impatiently as group after group has come before the Surface Transportation Subcommittee to request more money for this need or that need. In many cases, the need for more funding is genuine, but the facts show that much of the transportation funding now authorized by law is not being spent. What are the causes of this spending lag, especially in view of pressing bridge, highway repair, and public transportation needs in our communities?

I have attempted to look at how these programs operate down at the local and State levels. From this perspective one can see clearly the impact of all of the redtape various well-intentioned Federal acts have created over the years. State highway programs are throat-deep in redtape; it is impossible for a lay person to understand how Federal highway funds are allocated and spent. The Federal urban mass transportation program, by and large, seems better run but no less complicated. All of the transit funds we appropriate are being committed to projects, but the lag between commitment and expenditure is distressingly long.

One of the things this Congress can do to improve this situation is reform and streamline the Federal transportation planning requirements that now apply to urban areas.

Under the current system, urban highway funds are received by States but passed through to urbanized areas; local officials initiate projects and prepare the areawide highway improvement programs. Transit funds are sent directly to applicants within urbanized areas; again the local officials initiate projects and prepare programs for public transportation improvements. Highway planning and mass transit planning is supposed to be unified, and an elaborate system of institutional arrangements has been created to accomplish this.

Current Federal planning requirements call for an areawide transportation plan, a "prospectus" summarizing the plan, a "transportation improvement plan" which is really a program, an "annual element" listing TIP projects for the coming year, a "transportation system management element" proposing all ternative strategies to make better use of existing transportation resources, and finally—under a new agreement between the Transportation Department and the Environmental Protection Agency—a "transportation control plan" that links all of the above documents to the EPA-mandated "State Implementation Plan" for air quality improvements.

All of this has gotten out of hand. Just try to explain the process to a citizen interested in monitoring transportation planning in his community. If we can not explain this process, it is time to change it.

Working with several advisers at the local level, and with the benefit of comments from many individuals here in Washington, I have developed an amendment to this year's surface transportation legislation, H.R. 11733, to reform the urban transportation planning process.

This amendment replaces several overlapping planning sections now found in the transportation statutes. The six-step planning process is replaced by a two-step process: under my amendment, urban areas would prepare one transportation plan with two components: long-range and short-range. As under current law, the Secretary must approve these plans before planning certification is granted. Funds for projects in any given year cannot be spent until planning certification is granted for that year. This central fact remains the same, but for the first time we would be giving the Secretary of Transportation guidelines by which to judge the plans submitted to him under this process.

Currently, under section 4(a) of the Urban Mass Transportation Act, plans submitted to the Secretary must "meet criteria established by him." This blanket authority is a carte blanche to the rule writers, and I recommend that we repeal it. Instead, I propose a system where, every 2 years instead of annually, the Secretary reviews urban transportation plans, granting certification in all cases except where local officials propose programs that are plainly inappropriate to six basic, national goals:

First. The urban area transportation system should be coordinated with the statewide transportation system;

Second. Transportation plans should be consistent with areawide land use plans—as adopted by the local officials;

Third. Transportation improvement costs should be minimized by making more efficient use of existing transportation resources;

Fourth. Energy consumption should be reduced, and air quality improved, by reducing single-passenger automotive travel to and from major centers of employment during rush hours;

Fifth. Traffic fatalities should be reduced, and other aspects of transportation safety improved; and

Sixth. Mobility should be improved for all people, with special efforts made in meeting the needs of the transportation-disadvantaged.

These are sensible goals for the Federal transportation program in urban areas. These goals would not be used, and it is important to emphasize this, as an axe over individual highway or transit projects proposed by local officials. Rather, my amendment stipulates that the project decisions of local officials must be certified by the Secretary unless, in the aggregate, the program of projects does not promote these national goals. It is actually a weak test, but it can be effective in promoting sound use of Federal transportation resources.

In summary, my amendment reduces planning requirements from a six-step to a two-step process. It puts the process on 2-year rather than an annual cycle. It repeals open-ended authority in current law, and states six modest but important goals by which the Secretary is instructed to review the plans submitted to him.

The current planning requirements are based on the following sections of Federal law, which are printed here for easy reference by congressional staff. Today I am inserting in the RECORD the amendment which I hope will replace

these overlapping sections. The amendment is listed under H.R. 11733. Here are the planning sections of current law:

URBAN MASS TRANSPORTATION ACT OF 1964

SECTION 3(a)(2) It is declared to be in the national interest to encourage and promote the development of transportation systems embracing various modes of transport in a manner that will serve the States and local communities efficiently and effectively. To accomplish this objective the Secretary shall cooperate with the States in the development of long-range plans and programs which are properly coordinated with plans for improvements in other affected forms of transportation and which are formulated with due consideration to their probable effect on the future development of urban areas of more than fifty thousand population. The development of projects in urbanized areas under this section shall be based upon a continuing, cooperative, and comprehensive planning process covering all modes of surface transportation and carried on by the States and the governing bodies of local communities in accordance with this paragraph. The Secretary shall not approve any project in an urbanized area after July 1, 1976, under this section unless he finds that such project is based on continuing comprehensive transportation planning process carried on in conformance with the objectives of this paragraph.[10] [11]

SECTION 4. (a) No [23] Federal financial assistance shall be provided pursuant to subsection (a) of section 3 unless the Secretary determines [24] that the facilities and equipment for which the assistance is sought are needed for carrying out a program, meeting criteria established by him, for a unified or officially coordinated urban transportation system as a part of the comprehensively planned development of the urban area, and are necessary for the sound, economic, and desirable development of such area.[25] Such program shall encourage to the maximum extent feasible the participation of private enterprise. Where facilities and equipment are to be acquired which are already being used in mass transportation service in the urban area, the program must provide that they shall be so improved (through modernization, extension, addition, or otherwise) that they will better serve the transportation needs of the area. The Secretary, on the basis of engineering studies, studies of economic feasibility, and data showing the nature and extent of expected utilization of the facilities and equipment, shall estimate what portion of the cost of a project to be assisted under section 3 cannot be reasonably financed from revenues—which portion shall hereinafter be called "net project cost." The Federal grant for any such project to be assisted under section 3 shall be in an amount equal to 80 per centum of the net project cost.[26] The remainder of the net project cost shall be provided, in cash, from sources other than Federal funds. Such remainder may be provided in whole or in part from other than public sources, and any public or private transit system funds so provided shall be solely from undistributed cash surpluses, replacement or depreciation funds or reserves available in cash, or new capital. No refund or reduction of the remainder of the net project cost shall be made at any time unless there is at the same time a refund of a proportional amount of the Federal grant.[27]

(g)(1) It is declared to be in the national interest to encourage and promote the development of transportation systems, embracing various modes of transport in a manner that will serve the States and local communities efficiently and effectively. To accomplish this objective the Secretary shall cooperate with the States in the development of long-range plans and programs which are properly coordinated with plans for improvement in other affected forms of transportation and which are formulated with due consideration to their probable effect on the future development of urban areas of more than fifty thousand population. The development of projects in urbanized areas under this section shall be based upon a continuing, cooperative, and comprehensive planning process covering all modes of surface transportation and carried on by the States and the governing bodies of local communities in accordance with this paragraph. The Secretary shall not approve any project in an urbanized area after July 1, 1976, under this section unless he finds that such project is based on a continuing comprehensive transportation planning process carried on in conformance with the objectives stated in this paragraph.

(2) The Governor or designated recipient shall submit to the Secretary for his approval a program of projects for utilization of the funds authorized, which shall be based on the continuing comprehensive planning process of paragraph (1). The Secretary shall act upon program submitted to him as soon as practicable, and he may approve a program in whole or in part.

(3) An applicant for assistance under this section (other than a Governor) shall submit the program or programs to the Governor of the State affected, concurrently with submission to the Secretary. If within thirty days thereafter the Governor submits comments to the Secretary, the Secretary shall consider such comments before taking final action on the program or programs.

Title 23, United States Code (Highways):

§ 134. Transportation planning in certain urban areas

(a) It is declared to be in the national interest to encourage and promote the development of transportation systems, embracing various modes of transport in a manner that will serve the States and local communities efficiently and effectively. To accomplish this objective the Secretary shall cooperate with the States, as authorized in this title, in the development of long-range highway plans and programs which are properly coordinated with plans for improvements in other affected forms of transportation and which are formulated with due consideration to their probable effect on the future development of urban areas of more than fifty thousand population. After July 1, 1965, the Secretary shall not approve under section 105 of this title any program for projects in any urban area of more than fifty thousand population unless he finds that such projects are based on a continuing comprehensive transportation planning process carried on cooperathis section. No highway project may be constructed in any urban area of fifty thousand population or more unless the responsible public officials of such urban area in which the project is located have been consulted tively by States and local communties in conformance with the objectives stated in and their views considered with respect to the corridor, the location and design of the project.●

## SENATE COMMITTEE MEETINGS

Title IV of the Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure until the computerization of this information becomes operational the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, September 12, 1978, may be found in Daily Digest of today's RECORD.

### MEETINGS SCHEDULED

SEPTEMBER 13

8:00 a.m.
Agriculture, Nutrition, and Forestry
Agricultural Research and General Legislation Subcommittee
To resume hearings to examine the Federal Government's role in food safety and quality, with emphasis on the nitrite situation.
322 Russell Building

9:00 a.m.
Judiciary
Administrative Practice and Procedures Subcommittee
To continue hearings on S. 2011, proposed Regulatory Reduction and Congressional Control Act.
2228 Dirksen Building

9:30 a.m.
Energy and Natural Resources
Business meeting on pending calendar business.
3110 Dirksen Building

10:00 a.m.
Finance
To continue markup of H.R. 13511, to reduce income taxes.
2221 Dirksen Building

Foreign Relations
To meet in closed session to receive a briefing on the current situation in Nicaragua from Assistant Secretary of State Viron Vaky.
S–116, Capital

Governmental Affairs
Permanent Investigations Subcommittee
To resume hearings with regard to the widespread nature of arson-for-profit, including evidence of the role of organized crime.
3302 Dirksen Building

11:00 a.m.
Conferees
On H.R. 12936, making appropriations for the Department of Housing and Urban Development and certain independent agencies for FY 79.
H–140, Capitol

1:00 p.m.
Conferees
On H.R. 11445, authorizing funds for programs administered by the Small Business Administration.
2359 Rayburn Office Building

2:00 p.m.
Conferees
On H.R. 12255, authorizing funds through FY 1980 for programs administered under the Older Americans Act.
H–328, Capitol

SEPTEMBER 14

8:00 a.m.
Agriculture, Nutrition, and Forestry
Agricultural Research and General Legislation Subcommittee
To continue hearings to examine the Federal Government's role in food safety and quality, with emphasis on the nitrate situation.
322 Russell Building

9:30 a.m.
Judiciary
To hold hearings on the nomination of Bruce S. Jenkins to be U.S. district judge for the district of Utah.
2228 Dirksen Building

10:00 a.m.
Commerce, Science, and Transportation
To hold hearings on S. 1699, proposed Diesel Fuel and Gasoline Conservation Act.
235 Russell Building

Energy and Natural Resources
To hold hearings on S. 3283, proposed State Energy Management and Planning Act.
3110 Dirksen Building

Finance
To continue markup of H.R. 13511, to reduce income taxes.
2221 Dirksen Building

Governmental Affairs
Permanent Investigations Subcommittee
To continue hearings with regard to the widespread nature of arson-for-profit, including evidence of the role of organized crime.
3302 Dirksen Building

Rules and Administration
To further consider S.J. Res. 142, authorizing the FDR Memorial Commission to proceed with construction of FDR Memorial in West Potomac Park, and on other pending legislation.
301 Russell Building

Select on Intelligence
To meet in closed session to receive a briefing by CIA officials.
S-407, Capitol

2:00 p.m.
Appropriations
To mark up H.R. 1291, making appropriations for FY 79 for foreign assistance programs, and H.J. Res. 1088, to provide for loan guarantee authority for New York City and appropriations in the case of any eventual default.
S-128, Capitol

Select on Ethics
To hold a closed followed by an open business meeting.
S-207, Capitol

3:00 p m.
Conferees
On H.R. 7577, extending through FY 1981 certain programs administered under the Economic Opportunity Act.
H-328, Capitol

3:30 p.m.
Select on Intelligence
To hold a closed business meeting.
6226 Dirksen Building

SEPTEMBER 15

8:00 a.m.
Agriculture, Nutrition, and Forestry
Agricultural Research and General Legislation Subcommittee
To continue hearings to examine the Federal Government's role in food safety and quality with emphasis on the nitrite situation.
322 Russell Building

SEPTEMBER 18

10:00 a.m
Finance
To resume mark up of H.R. 13511, to reduce income taxes.
2221 Dirksen Building

Governmental Affairs
Federal Spending Practices and Open Government Subcommittee
To resume hearings to examine alleged abuses in the GSA's contracting and procurement divisions.
3302 Dirksen Building

SEPTEMBER 19

9:00 a.m.
Judiciary
Constitution Subcommittee
To resume hearings on S. 1845, to prevent unwarranted invasions of privacy by prohibiting the use of polygraph type equipment for certain purposes.
6226 Dirksen Building

9:30 a.m.
Human Resources
Labor Committee
To hold hearings on S. 3060, proposed National Workers' Compensation Standards Act.
4232 Dirksen Building

10:00 a.m.
Banking, Housing, and Urban Affairs
To mark up S. 3485, to provide for the maintenance of reserves for certain financial institutions, to require the imposition of charges for certain services by Federal Reserve banks, and to authorize the payment of interest on reserves held in Federal Reserve banks.
5302 Dirksen Building

Energy and Natural Resources
Energy Research and Development Subcommittee
To hold hearings on S. 3392, to accelerate the use of solar energy as a source of electricity.
3110 Dirksen Building

SEPTEMBER 20

9:00 a.m.
Judiciary
Administrative Practice and Procedures Subcommittee
To resume hearings on S. 2011, proposed Regulatory Reduction and Congressional Control Act.
2228 Dirksen Building

9:30 a.m.

# SENATE—*Tuesday, September 12, 1978*

*(Legislative day of Wednesday, August 16, 1978)*

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by Hon. PAUL G. HATFIELD, a Senator from the State of Montana.

## PRAYER

The Reverend Monsignor John J. Murphy, director, the National Shrine of the Immaculate Conception, Washington, D.C., offered the following prayer:

Let us pray:

Father of everlasting goodness, our origin and guide, be close to all of us assembled here and hear our prayers of praise.

Accept our humble thanks and praise for the opportunity to make Your noble concept of sacred trust a visible sign of Your influence upon our lives.

Deepen our faith in the mystery of Your presence, strengthen our hope for eternal life with You, and let our love for You bear cheerful and joyous witness to the works of righteousness.

Open our eyes to the wonders this world sets before us, that we may serve You free from fear and address You as God, our Father.

We ask this in the name of Jesus, the Lord. Amen.

## APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
*Washington, D.C., September 12, 1978.*

*To the Senate:*

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable PAUL G. HATFIELD, a Senator from the State of Montana, to perform the duties of the Chair.

JAMES O. EASTLAND,
*President pro tempore.*

Mr. PAUL G. HATFIELD thereupon assumed the chair as Acting President pro tempore.

## RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from West Virginia is recognized.

## THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## NATIONAL AQUACULTURE POLICY ACT OF 1978

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 1091.

The ACTING PRESIDENT pro tempore. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 3408) to provide for the development of aquaculture in the United States, and for other purposes.

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

Mr. BAKER. Mr. President, reserving the right to object, and I shall not object, I wish only to advise the majority leader that that item on our calendar is cleared and we have no objection to proceeding to its consideration.

Mr. ROBERT C. BYRD. I thank the distinguished minority leader.

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Agriculture, Nutrition, and Forestry and the Committee on Commerce, Science, and Transportation, jointly, with an amendment to strike all after the enacting clause and insert the following:

That this Act may be cited as the "National Aquaculture Policy Act of 1978".

FINDINGS

SEC. 2. Congress finds and declares that—

(1) Through intensive applications of science and technology, agriculture has met man's needs for food supplies and for other renewable resources by extensive husbandry of terrestrial plants and animals, but similarly extensive husbandry of aquatic animals or plants has not been achieved.

(2) Many segments of the world population are now facing serious nutritional deficiencies and food shortages due to environmental degradation, adverse climatic conditions, and the steady growth of population. These problems will become more severe. The resulting demand for increased food production will have to be met in part through the application of scientific and technological advances from research on aquaculture and other underused food production systems.

(3) The world demand for seafood is increasing, but the harvest of some natural populations of fish and shellfish has exceeded levels of optimum sustainable yield.

(4) Aquaculture is contributing to world food supplies with production equal to 10 percent of current landings of seafoods, and that production has the potential for significant increase before the end of this century.

(5) Certain stocks of fish and shellfish of importance to the United States are declining, or are depleted, which has had an undesirable effect on both commercial and recreational fisheries.

(6) There is an extensive market for seafood in the United States, but the United States imports more than 50 percent of its fish and shellfish for human consumption (and those imports are 10 times greater than the level of exports). This dependence on imports results in balance of payment deficits and uncertainty and often inequality of supplies.

(7) Less than 3 percent of current United States fisheries production results from aquaculture, but there is good potential for expanding aquacultural production in the United States so that such production can equal or exceed the worldwide average. This would help to provide domestic consumers with a stable supply of high quality aquatic foods and assist the United States in its balance of payments.

(8) Aquatic plants are a source of food for human and animal consumption, a source of industrial materials and pharmaceuticals, a potential source of energy, and can be used to assist pollution control and abatement efforts.

(9) The rehabilitation and enhancement of the publicly owned fish and shellfish resources are desirable applications of aquaculture technology as a means to ensure the

general public benefits to be derived from the use of these common property resources.

(10) Aquaculture in the United States has traditionally been concentrated on a few species, but many other aquatic species have a potential for commercial culturing and other uses. While many scientific and technological problems are unsolved, there is sufficient knowledge to further the development of aquacultural production systems for additional species of fish, shellfish, and plants. Congress recognizes the importance of developing aquaculture of both plant and animal species.

(11) The application of aquacultural technology offers opportunities for the recovery of wasted thermal energy, nutrients, and other resources.

(12) Water areas, whether fresh, brackish, or marine, which are suitable for aquaculture are, in many cases, underused, and their total acreage is diminishing as such areas are put to other uses or destroyed.

(13) In those areas of the United States that are suitable for aquaculture but have land-use or water-use management policies that may inhibit the development of aquaculture facilities, consideration should be given to changing those policies so that aquaculture will be considered along with the other possible uses of such areas.

(14) The development of aquaculture in the United States has been inhibited by many economic, legal, and production factors; these include inadequate credit, diffused legal jurisdiction, lack of management information for such stocks as are available, or the lack of reliable supplies of seed stock.

(15) Government programs that help to reduce the risks associated with production of agricultural commodities have not been generally available to producers of aquatic species.

(16) Current efforts to develop aquaculture in the United States are numerous, but sometimes diffuse; a strong commitment by the Federal Government will bolster and consolidate these efforts and make aquaculture more viable, thereby stimulating private and public investment and development.

(17) Much knowledge of and many initiatives for aquacultural development exist at the State and local levels that should be used to assist any Federal effort in fostering cooperation between individuals and institutions to improve the aquaculture industry.

(18) The principal responsibility for the development of aquaculture in the United States must rest with the private sector.

PURPOSE

SEC. 3. It is the purpose of this Act to promote aquaculture in the United States by—

(1) declaring a national aquaculture policy;

(2) establishing and implementing a national plan for aquaculture; and

(3) developing programs and encouraging activities in both the public and private sectors of the economy that will result in increased aquaculture, the coordination of domestic aquaculture efforts, the conservation and enhancement of aquatic resources, the creation of new industries and job opportunities, and other national benefits.

DEFINITIONS

SEC. 4. As used in this Act, unless the context otherwise requires the term—

(1) "aquaculture" means the propagation and rearing of aquatic species in controlled or selected environments, including ocean ranching, except private ocean ranching of Pacific salmon for profit.

(2) "aquaculture facility" means any land, structure, or other appurtenance, if such land, structure, and appurtenance is located within the United States and is used for aquaculture, including, but not limited to, any laboratory, hatchery, rearing pond, raceway, pen, incubator, or other equipment.

(3) "aquatic species" means any natural species, native or introduced, or any variety of species produced by selective reproduction of finfish, mollusk, or crustacean or other aquatic invertebrate, amphibian, reptile, or aquatic plant.

(4) "Director" means the Director of the Office of Science and Technology Policy establishing under the National Science and Technology Policy Organization and Priorities Act of 1976.

(5) "fund" means the Federal Aquaculture Assistance Fund established under section 13 of this Act.

(6) "person" means any individual who is a citizen or national of the United States and any corporation, partnership, association, Indian tribe, or other entity (including, but not limited to, any community development corporation, producer cooperative, or fishermen's cooperative) organized or existing under the laws of any State.

(7) "State" means any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, Guam, the Commonwealth of the Northern Mariana Islands, the Trust Territory of the Pacific Islands, and any other commonwealth, territory, or possession of the United States.

(8) "United States", when used in a geographical context, means all States.

NATIONAL AQUACULTURE POLICY

SEC. 5. Congress finds and declares that aquaculture has the potential for augmenting existing commercial and recreational fisheries and producing other renewable resources, thereby assisting the United States in meeting its future food needs and contributing to the solution of world resource problems. It is, therefore, in the national interest, and it is the national policy, to encourage the development of aquaculture in the United States.

AQUACULTURE ASSESSMENT AND NATIONAL AQUACULTURE DEVELOPMENT PLAN

SEC. 6. (a) Within 1 year after the date of enactment of this Act, the Director, in cooperation with the Secretary of Agriculture, the Secretary of Commerce, the Secretary of the Interior, other Federal departments or agencies, State aquaculture agencies (designated under section 7 of this Act) and appropriate Regional Fishery Management Councils established under section 302 of the Fishery Conservation and Management Act of 1976, shall make a comprehensive assessment of aquaculture in the United States and shall by regulation establish a National Aquaculture Development Plan (hereinafter in this Act referred to as the "Plan").

(b)(1) The Director shall give interested persons an opportunity to participate in the development and establishment of the Plan in accordance with the provisions of section 553 of title 5, United States Code.

(2) The Secretaries of Agriculture, Commerce, and the Interior, shall provide such clerical assistance and staff personnel as may be required by the Director to carry out the provisions of this section.

(3) At the earliest possible time in the development of the Plan, the Director shall hold public hearings; the number and location of such hearings shall be determined on the basis of the following criteria:

(A) geographical proximity of States to one another;

(B) similarity of States in aquacultural activities and potential; and

(C) other relevant factors.

(c) The assessment of aquaculture in the United States required to be made under subsection (a) of this section shall include—

(1) a complete profile of the United States aquacultural industry as to incidence, size, and status of commercial aquacultural enterprises;

(2) identification of private and public institutions and organizations involved in aquacultural research, extension, credit, and market development;

(3) identification of the various aquatic species currently being cultured and a description of the status of commercial development with respect to each such species;

(4) to the extent possible, identification of aquacultural production regions, species, and markets that have significant potential for development;

(5) a catalog and description of all Federal programs and activities that directly or indirectly encourage, support, or assist aquaculture;

(6) a consideration of the need and appropriateness of designating a single Federal lead agency for all matters relating to aquaculture;

(7) identification of legal, regulatory, economic, physical, and social constraints that inhibit the development of aquaculture in the United States;

(8) a determination of the adequacy of Federal guarantees for loans for the construction, repair, expansion, or improvement of aquaculture facilities, disaster loans for persons engaged in aquaculture, and property and stock insurance for aquaculture facilities; and

(9) an exposition of the major policy issues that need to be addressed by the Plan and the presentation of policy alternatives in a manner that will facilitate both the formulation and implementation of the Plan.

(d) The Director shall submit a report with respect to the status of aquaculture in the United States to the President and Congress upon completion of the assessment conducted under subsection (a) of this section, but in no event more than 12 months following the date of enactment of this Act.

(e) The Director shall use the assessment conducted under subsection (c) of this section as a basis for developing the Plan that shall consist of a series of development programs for those aquatic species that the Director determines to have a potential for culturing on a commercial or other basis.

(f) The Plan shall set forth those actions that the Director determines should be undertaken, and the period of time within which each such action should be completed, with respect to—

(1) the implementation of each development program, including the research and development, technical assistance, demonstration, extension education, and training that may be necessary and appropriate with regard to—

(A) aquaculture facility design and operation;

(B) water quality management;

(C) use of waste products (including thermal effluents);

(D) nutrition and the development of economical feeds, including natural food sources;

(E) life history, behavior, genetics, physiology, pathology, and disease control (including research regarding organisms that may not be harmful to fish and shellfish but are injurious to humans);

(F) processing and market development;

(G) production management and quality control; and

(H) the development of adequate supplies of seed stock;

(2) research on the effect of aquaculture on estuarine and other water areas, and the management of such areas for aquaculture;

(3) the identification and analysis of any legal or regulatory constraints that may affect a development program;

(4) the construction, purchase, lease, or acquisition of necessary developmental aquaculture facilities; and

(5) such other actions relating to research and development, technical assistance,

demonstration, extension education, and training as the Director deems necessary and appropriate.

(g) The Plan shall include the allocation of funds appropriated under section 14 of this Act, in such amounts as the Director deems appropriate, to the Secretary of Agriculture, the Secretary of Commerce, and the Secretary of the Interior for implementation of the aquaculture development programs under their respective jurisdictions.

(h) In preparing an aquaculture development program and in reviewing any such program under subsection (j), the Director shall, to the extent practicable, take into account any significant action which has been, or that is proposed to be, undertaken by any other Federal agency, any State agency, or any person, and that may affect the accomplishments of the program.

(i) Each action under an aquaculture development program prepared under this section shall be implemented, either individually, jointly, or collectively, by the Secretary of Agriculture, the Secretary of Commerce, or the Secretary of the Interior, as specified by the Director in the program. The Director shall determine which Secretary or Secretaries are to have responsibility for implementing any such action on the basis of—

(1) the responsibilities conferred on the respective Secretaries by law or any executive action having the effect of law (including, but not limited to, Reorganization Plan Number 4 of 1970); and

(2) the experience, expertise, and other appropriate resources that each department may have with respect to the action required under the program.

(j) The Plan shall provide for its revision, following review on a biennial basis to determine—

(A) if there are any aquatic species not currently identified in the Plan that have potential for aquaculture; and

(B) whether the actions specified in the Plan are being accomplished on a successful and timely basis.

(k)(1) The Director, in consultation with the Secretary of Agriculture, the Secretary of Commerce, and the Secretary of the Interior, shall establish and appoint an advisory committee to assist in the assessment and in the development of the Plan.

(2) The Advisory Committee shall consist of 15 members who shall not be employees of the Federal Government, and at least 8 of such members (of whom at least 1 shall be from each area over which each Regional Fishery Management Council has authority) shall be engaged in private aquacultural enterprises.

(3) The members of the committee, while away from their homes or regular places of business in the performance of services for the committee, shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703 of title 5 of the United States Code.

STATE AQUACULTURE AGENCIES

SEC. 7. (a) Any State wishing to participate in any national aquaculture development program under section 10 or 11 of this Act and authorized under this Act shall designate a single agency of such State to carry out such program in such State.

(b) Any State wishing to participate in the formulation of the Plan, but wishing to defer designation of an aquaculture agency for the State, may designate an aquaculture planning agency for the State as an interim measure.

(c) Any grants made to or contracts entered into with any agncy of a State, or any agency of any political subdivision of a State, under section 10 of this Act, shall be made only with the approval of the aquaculture agency designated for such State, and such approval shall be an indication to the Federal sponsor of compliance with all State and local regulations that apply to that action.

(d) The Director shall inform the Governors of all the States of the povisions of this section and shall consult as the Director determines apppropriate with representatives of the State aquaculture agencies during the development of the plan.

FUNCTIONS AND POWERS

SEC. 8. (a) In implementing the aquaculture development program prepared under section 6 of this Act for any aquatic species, the Secretary of Agriculture, the Secretary of Commerce, or the Secretary of the Interior, as the case may be, shall—

(1) provide advisory, educational, and technical assistance (including training), with respect to aquaculture of such species to interested public and private organizations and individuals, but in providing such assistance, shall, to the maximum extent practicable, avoid duplication of similar assistance provided by other Federal or State agencies;

(2) consult and cooperate with interested persons, Federal, State, and local government agencies, regional commissions, educational institutions, and Indian tribes regarding the development of aquacultual technology;

(3) prescribe such regulations as may be necessary to carry out such a program; and

(4) encourage the implementation of aquacultural technology in the rehabilitation and enhancement of publicly owned fish and shellfish stocks (including such enhancement by private non-profit enterprises), as well as in the promotion of private commercial aquacultural enterprises.

(b) In implementing any aquacultue development program, the Secretary of Agriculture, the Secretary of Commerce, or the Secretary of the Interior, as the case may be, may—

(1) conduct scale tests of any aquaculture system for the purposes of assessing the biological and economic feasibility of the system;

(2) produce, under the authority of section 11 of this Act, and sell at cost, seed stock for commercial aquatic species when privately produced seed stock is unavailable, unreliable, or insufficient in quantity to meet production needs;

(3) develop methods to enhance aquatic species stocks by aquaculture;

(4) conduct such studies and research with respect to aquatic species as may be appropriate, regardless of whether such species is or has been identified as a commercial species; and

(5) conduct such other tests or analyses or take such other actions as such Secretary deems necessary and appropriate.

(c) In addition to performing such other functions as are required under this Act, the Secretary of Agriculture, the Secretary of Commerce, and the Secretary of the Interior shall jointly—

(1) establish and maintain an aquaculture information center that shall function as a national clearinghouse for the collection, selection, analysis, and dissemination of scientific, technical, lethal, and economic information relating to each aquaculture development program that is their individual, joint, or collective responsibility;

(2) conduct appropriate surveys, in coordination with other agencies, of public and private aquaculture activities being conducted in the United States for the purpose of acquiring information on acreages, water use, production, culture techniques, and other relevant matters;

(3) arrange for the mutual exchange of information relating to aquaculture with foreign nations;

(4) conduct a continuing study to determine whether existing capture fisheries could be adversely affected by competition from products produced by commercial aquacultural enterprises and include in such study (A) an assessment of the economic effect by species and by geographical region on such fisheries, and (B) recommended measures to ameliorate any adverse effect; and

(5) report to Congress on the findings made under the study provided for under clause (4) of this subsection in the biennial status report required by section 9(b)(4) of this Act.

(d) Any production information submitted under clause (2) of subsection (c) of this section to the Secretary of Agriculture, the Secretary of Commerce, or the Secretary of the Interior shall be confidential and shall not be disclosed except to each other or to the advisory committee that may be appointed under section 6(k) of this Act or when required under court order. The Secretaries shall by regulation prescribe such procedures as may be necessary to preserve such confidentiality, except that such Secretaries may release or make public any such information in any aggregate or summary form that does not directly or indirectly disclose the identity or business of any person who submits such information.

(e)(1) The Secretary of Agriculture, the Secretary of Commerce, and the Secretary of the Interior are each authorized to accept any gift, temporary donation, or devise or bequest of real or personal property, or the proceeds from the sale or other disposition of such property or interests therein, for use in performing any function that such Secretary may have under this Act. Any such acceptance may be subject to the terms of any restrictive or affirmative covenant, or condition of servitude, if such terms are deemed by the Secretary concerned to be in accordance with law and compatible with the purpose for which acceptance is sought.

(2) Any gift or bequest of money, and proceeds from the sale of other property received as a gift or bequest under this subsection, shall be deposited in a separate account in the Treasury of the United States and shall be disbursed upon the order of the Secretary concerned.

COORDINATION OF NATIONAL ACTIVITIES REGARDING AQUACULTURE

SEC. 9. (a) There is established the Interagency Aquaculture Coordinating Committee (hereafter in this section referred to as the "Committee") that shall be composed of the following representatives or their designees:

(1) The Director of the Office of Science and Technology Policy, who shall be the Chairman of the Committee unless, after the Plan is established, the President wishes to designate another member of the Committee as Chairman.

(2) The Secretary of Agriculture.

(3) The Secretary of Commerce.

(4) The Secretary of the Interior.

(5) The Secretary of Energy.

(6) The Administrator of the Environmental Protection Agency.

(7) The Chief of Engineers.

(8) The Commissioner of Food and Drugs.

(9) The Assistant Secretary of Labor for Occupational Safety and Health.

(10) The Administrator of the Small Business Administration.

(11) The Governor of the Farm Credit Administration.

(12) At least five representatives to be appointed by the Chairman of the Committee from the various State aquaculture agencies designated pursuant to section 7 of this Act.

(b) The functions of the Committee shall be—

(1) to ensure that there is a continuing exchange of information among the agencies represented on the Committee with respect to the nature and status of the programs or projects being conducted by such agencies

that relate, or that may relate, to aquaculture in general or to the implementation of the Plan;

(2) to review on a continuing basis the relevant programs and projects of all Federal agencies to determine whether such programs are being conducted in compliance with subsection (c) of this section; and

(3) to ensure that the aquaculture information center established under section 8(c)(1) of this Act is functioning in conformance with the policy expressed in section 5 of this Act;

(4) to submit a biennial report to Congress on the status of aquaculture in the United States, including an explanation of any revision to the Plan made pursuant to section 6(j) of this Act; the first such biennial report shall be completed not later than 2 years after the date of submission to Congress of the Director's report as specified in section 6(d) of this Act.

(c) Each Federal agency that has functions or responsibilities with respect to aquaculture or has jurisdiction over any activity that affects, or may affect, the achievement of the purposes of this Act, shall, in consultation with the Committee and to the maximum extent practicable perform such function, responsibility, or activity in a manner that is consistent with the purposes of this Act.

(d) Nothing in this Act shall be construed to amend, repeal, or otherwise modify the authority of any Federal officer or any Federal agency to perform any functions relating to aquaculture that are authorized under any other provision of law.

CONTRACTS AND GRANTS

SEC. 10. (a) The Secretary of Agriculture, the Secretary of Commerce, or the Secretary of the Interior may carry out any function of this Act, other than demonstration projects undertaken pursuant to section 11 of this Act, relating to any aquaculture development program that such Secretary is directed to implement under the Plan, through grants to, or contracts with, any other Federal agency, any agency of any State, any agency of any political subdivision of a State, any Indian tribe, any regional commission, any educational institution, or any person.

(b) Any contract entered into, or any grant made, under subsection (a) of this section shall contain such conditions and limitations as the Secretary concerned shall by regulation prescribe as being necessary and appropriate to protect the interests of the United States, except that no such contract may be entered into, and no such grant may be made that is in violation of any applicable State or local law.

(c) The amount of any grant made under subsection (a) of this section may not exceed an amount equal to one-half the estimated cost of the project for which the grant is made.

(d) Any State agency, any political subdivision of a State, or any person who receives a grant or contract under this section shall make available to the Secretary concerned and to the Comptroller General of the United States, for purposes of audit and examination, any books, documents, papers, and records that are pertinent to the funds received by such agency, political subdivision, or person under such grant or contract.

AQUACULTURE DEMONSTRATION PROJECTS

SEC. 11. (a) In order to promote the development of aquaculture, the Secretaries of Agriculture, Commerce, and the Interior are authorized jointly to distribute funds to promote the establishment and operation of aquaculture demonstration projects within each State that has established a State aquaculture agency pursuant to section 7 of this Act, and to conduct the activities described in subsections (b), (c), (d), and (e) of this section. Upon a determination by the Secretaries that a proposed demonstration project (1) demonstrates phases of aquaculture that are useful and beneficial to the State and aquacultural producers, and (2) is not duplicative of demonstration projects in the State or region involved, such funds shall be distributed, in the case of any State, to one or more of the following: the State aquaculture agency of such State, the State cooperative extension service of such State, the State agricultural experiment station of such State, and any university of such State eligible to receive funds under the sea grant program. The amount of funds distributed in any State for any demonstration project may not exceed an amount equal to one-half of the estimated cost of such project.

(b) The recipient in any State of any funds distributed under subsection (a) of this section shall—

(1) establish at least one aquaculture demonstration project within the State;

(2) sell the products of the demonstration project established under clause (1) of this subsection and pay to the United States a proportion of the proceeds equal to the proportion that the grants under this section bear to the total cost of operating the project, which payments shall be deposited in the fund;

(3) provide tours of the demonstration project to aquaculture producers and other interested groups and individuals and, upon request, provide such producer groups and individuals with information concerning the operation of the project;

(4) determine the total income and the total cost of the project; and

(5) annually compile a report concerning income, costs, operating difficulties, and producer interest with respect to the demonstration project, and submit the report to the Secretaries concerned along with any recommendations concerning project changes.

The production of seed stock shall be a possible demonstration project.

(c) The results obtained from each demonstration project conducted under this section that prove economically practical shall be extended to aquacultural producers in each State through the State cooperative extension service and the Sea Grant Marine Advisory Program of each State as part of the ongoing education programs of such service.

(d) Two or more States may cooperate in the designation of a regional project, in which event the sums assignable to all the cooperating States shall be paid to the agency or institution responsible for the operation of the demonstration project.

GUARANTEES OF OBLIGATIONS ISSUED FOR AQUACULTURE FACILITIES

SEC. 12. (a)(1) The Secretary of Agriculture and the Secretary of Commerce (further reference in this section to the "Secretary" shall mean the Secretary concerned) may, subject to the provisions of this section, guarantee or make a commitment to guarantee, the payment of interest on, and the principal amount of, any obligation issued by an obligor for any of the following purposes:

(A) the financing of the construction, reconstruction, or reconditioning of any aquaculture facility (including the financing of the purchase cost of any aquaculture facility to be reconstructed or reconditioned), except that no obligation may be guaranteed under this section later than 2 years after the date of the completion of the construction, reconstruction, or reconditioning of the aquaculture facility involved;

(B) the acquisition of stocks of aquatic species in all stages of development necessary to initiate any aquaculture facility;

(C) the financing of the initial operating expenses of any aquaculture facility;

(D) the financing of marketing operations exclusively for aquacultural products; or

(E) the refinancing of any existing obligation issued for any of the purposes specified in subparagraph (A), (B), (C), or (D) of this paragraph, whether or not guaranteed under this section, including, but not limited to, any short-term obligation incurred for the purpose of obtaining temporary funds for refinancing.

Guarantees and commitments to guarantee may be made under this section without regard to section 3679(a) of the Revised Statutes of the United States (31 U.S.C. 665 (a)).

(2) The full faith and credit of the United States is pledged to the payment of all guarantees made under this section with respect to both principal and interest, including any interest, if provided for in the guarantee, that may accrue between the date of default under a guaranteed obligation and the payment in full of the guarantee.

(3) Any guarantee, or commitment to guarantee, made by the Secretary under this section shall be conclusive evidence of the eligibility of the obligation for such guarantee, and the validity of any guarantee, or commitment of guarantee, so made shall be incontestable.

(4) The aggregate unpaid principal amount of all obligations guaranteed under this section and outstanding at any one time shall not exceed $100,000,000.

(b)(1) Obligations guaranteed under this section—

(A) shall have an obligor approved by the Secretary as being responsible and possessing the ability, experience, financial resources, and other aquaculture necessary for the adequate operation and maintenance of the aquaculture facilities;

(B) shall be in an aggregate principal amount that does not exceed 90 percent of the obligation involved;

(C) shall have maturity dates satisfactory to the Secretary, but not to exceed 25 years;

(D) shall provide for payments by the obligor satisfactory to the Secretary; and

(E) shall bear interest (exclusive of charges for the guarantee and service charges, if any) at rates not to exceed such per annum percentage on the unpaid principal as the Secretary determines to be reasonable, taking into account the range of interest rates prevailing in the private market for similar loans and the risks assumed by the Secretary.

(2) In guaranteeing any obligation under this section, the Secretary shall give preference to any person with 40 or fewer employees who, together with such person's affiliates, is primarily engaged in the business of aquaculture or commercial harvesting or gathering of aquatic species.

(3) No obligation may be guaranteed under this section unless the obligor conveys or agrees to convey to the Secretary such security interest as the Secretary may reasonably require to protect the interests of the United States.

(c)(1) The Secretary may charge a fee for any obligation guaranteed under this section, the amount of which shall be established by the Secretary by regulation not to exceed one-half of 1 percent per annum of the outstanding principal balance of the obligation. Fee payments shall be made by the obligor to the Secretary when moneys are first advanced under a guaranteed obligation and at least 60 days before each anniversary date thereafter.

(2) The Secretary shall charge and collect from the obligor such amounts as the Secretary may deem reasonable for the investigation of the application for any guarantee, for the appraisal of properties offered as security for any guarantee, and for the inspection of such properties during construction, or reconditioning, except that such charges shall not aggregate more than one-half of 1 percent of the original principal amount of the obligation to be guaranteed.

(3) All fees and other amounts received by the Secretary under the provisions of this subsection shall be deposited in the fund.

(4) Obligations guaranteed under this sec-

tion, and agreements relating thereto, shall contain such other provisions with respect to the protection of the security interests of the United States (including acceleration and subrogation provisions and the issuance of notes by the obligor to the Secretary), liens and releases of liens, payments of taxes, and such other matters as the Secretary may prescribe.

(d)(1) In the event of a default, which has continued for 90 days, in any payment by the obligor of principal or interest due under any obligation guaranteed under this section, the obligee or the obligee's agent shall have the right to demand, at or before the expiration of such period as may be specified in the guarantee or related agreements, but not later than 180 days from the date of such default, payment by the Secretary of the unpaid principal amount of said obligation. Within such period as may be specified in the guarantee or related agreements, but not later than 30 days from the date of such demand, the Secretary shall promptly pay to the obligee or his agent the unpaid principal amount of the obligation and unpaid interest thereon to the date of payment; except that the Secretary shall not be required to make such payment if before the expiration of such period the Secretary finds that there was no default by the obligor in the payment of principal or interest or that such default has been remedied before any such demand.

(2) Payments required to be made by the Secretary under paragraph (1) of this subsection shall be made by the Secretary from the fund.

(3) In the event of any payment by the Secretary under paragraph (1) of this subsection, the Secretary shall have all rights in any security held by him relating to his guarantee of such obligations as are conferred upon him under any security agreement with the obligor. Notwithstanding any other provision of law relating to the acquisition, handling, or disposal of property by the United States, the Secretary may, under such terms and conditions as the Secretary prescribes or approves, complete, recondition, reconstruct, renovate, repair, maintain, operate, or sell any property acquired by the Secretary pursuant to a security agreement with the obligor.

(4) After any default referred to in paragraph (1) of this subsection, the Secretary shall take such action against the obligor or any other parties liable thereunder that, in the Secretary's discretion, may be required to protect the interests of the United States. Any suit may be brought in the name of the United States or in the name of the obligee and the obligee shall make available to the United States all records and evidence necessary to prosecute any such suit. The Secretary may accept a conveyance of title to and possession of property from the obligor or other parties liable to the Secretary and may purchase the property for an amount not greater than the unpaid principal amount of such obligation and interest thereon. In the event the Secretary receives through the sale of property an amount of cash in excess of any payment made to an obligee under paragraph (1) of this subsection and the expenses of collection of such amounts, the Secretary shall pay such excess to the obligor.

(5) Whoever, for the purpose of obtaining any loan or advance of credit from any person with the intent that an obligation relating to such loan or advance of credit shall be offered to or accepted by the Secretary to be guaranteed, or for the purpose of obtaining any extension or renewal of any loan, advance of credit, or mortgage relating to an obligation guaranteed by the Secretary, or the acceptance, release, or substitution of any security on such loan, advance or credit, or for the purpose of influencing in any way the action of the Secretary under this section, makes, passes, utters, or publishes, or causes to be made, passed, uttered, or published any statement, knowing the same to be false, or alters, forges, or counterfeits, or causes or procures to be altered, forged, or counterfeited, any instrument, paper, or document, or utters, publishes, or passes as true, or causes to be uttered, published, or passed as true, any instrument, paper, or document, knowing it to have been altered, forged, or counterfeited, or willfully overvalues any security, asset, or income shall be punished by a fine of not more than $5,000, or by imprisonment for not more than 2 years, or both.

(e) The Secretary of Agriculture and the Secretary of Commerce shall each promulgate such rules and regulations as they deem necessary or appropriate to carry out the purposes and provisions of this section.

(f) For purposes of this section, the term—

(1) "actual cost" of an aquaculture facility, as of any specified date, means the aggregate, as determined by the Secretary, of—

(A) all amounts paid by, or for the account of the obligor with respect to such facility on or before that date; and

(B) all amounts that the obligor is then obligated to pay from time to time thereafter, for the construction, reconstruction, or reconditioning of such facility;

(2) "construction", "reconstruction", or "reconditioning" includes, but is not limited to, designing, inspecting, outfitting, and equipping of the aquaculture facility involved;

(3) "depreciated actual cost" means the actual cost depreciated on a straightline basis over the useful life of the property involved as determined by the Secretary;

(4) "obligation" means any note, bond, debenture, or other evidence of indebtedness issued for one of the purposes specified in subsection (a) of this section;

(5) "obligee" means the holder of any obligation; and

(6) "obligor" means any person primarily liable for payment of the principal of or interest on any obligation.

FEDERAL AQUACULTURE ASSISTANCE FUND

SEC. 13. (a) There is established in the Treasury of the United States a Federal Aquaculture Assistance Fund. The fund shall be available to the Secretaries of Agriculture, Commerce, and the Interior: (further reference in this section to the "Secretary" shall mean the Secretary concerned) as a revolving fund for the purpose of carrying out, and administering, sections 11 and 12 of this Act. The fund shall consist of—

(1) any sums appropriated to the fund;

(2) any fees received by the Secretary from the sale of products from demonstration projects as provided in section 11 of this Act;

(3) any fees received by the Secretary in connection with any guarantee made under section 12 of this Act;

(4) recoveries and receipts received by the Secretary under security, subrogation, and other rights and authorities under section 12 of this Act.

All payments made by the Secretary to carry out the provisions of section 12 (including reimbursements to other Government accounts) shall be paid from the fund, only to the extent provided in appropriation Acts. Sums in the fund that are not currently needed for the purposes of section 11 or section 12 of this Act shall be kept on deposit or invested in obligations of or guaranteed by the United States.

(b) If at any time the moneys in the fund are not sufficient to pay any amount the Secretary is obligated to pay under section 12, the Secretary shall issue to the Secretary of the Treasury notes or other obligations (only to such extent and in such amounts as may be provided for in appropriation Acts) in such forms and denominations, bearing such maturities, and subject to such terms and conditions as the Secretary of the Treasury prescribes. Such notes or other obligations shall bear interest at a rate determined by the Secretary of the Treasury, taking into consideration the current average market yield on outstanding marketable obligations of the United States of comparable maturities during the month preceding the issuance of such notes or other obligations. The Secretary of the Treasury shall purchase any notes and other obligations to be issued hereunder, and for such purpose the Secretary may use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, and the purposes for which securities may be issued under that Act, are extended to include any purchases of such notes and obligations. The Secretary of the Treasury at any time may sell any of the notes or other obligations acquired by the Secretary of the Treasury under this subsection. All redemptions, purchases, and sales by the Secretary of the Treasury of such notes or other obligations shall be treated as public debt transactions of the United States. Moneys borrowed under this subsection shall be deposited in the fund and redemptions of such notes and obligations shall be made by the Secretary from the fund.

AUTHORIZATION FOR APPROPRIATIONS

SEC. 14. (a)(1) For purposes of carrying out the provisions of this Act, there are authorized to be appropriated, notwithstanding any authorization for appropriations in any other Act in effect before the date of the enactment of this Act:

(A) $10,000,000 for the fiscal year 1980;

(B) $20,000,000 for the fiscal year 1981; and

(C) $30,000 for the fiscal year 1982.

(2) The authorization for the fiscal year 1980 is not to exceed:

(A) $4,000,000 to the Department of Agriculture;

(B) $4,000,000 to the Department of Commerce; and

(C) $2,000,000 to the Department of the Interior.

(3) The authorization for the fiscal year 1981 and the fiscal year 1982 shall be allocated as provided in section 6(g).

(4) Not less than 50 percent of the funds appropriated to the Departments under this section shall be used for the purposes of section 10 and section 11 of this Act; and of such funds 3 percent shall be available to the Departments for administrative purposes.

(b) Commencing with fiscal year 1980, there are authorized to be appropriated, without fiscal year limitation, to the fund such sums as may be necessary and appropriate for purposes of carrying out section 12; but not to exceed $100,000,000.

EFFECTIVE DATE

SEC. 15. The provisions of this Act shall become effective October 1, 1978.

Mr. LEAHY. Mr. President, I strongly support S. 3408, the National Aquaculture Policy Act of 1978.

Many of my fellow Senators may not be familiar with aquaculture. A concise description of aquaculture comes from Dr. H. R. Schmittou, the aquaculture program coordinator at the Department of Agriculture. Dr. Schmittou's description is as follows:

Aquaculture is agriculture. It's the raising of animals and plants in a controlled water environment. That's similar to raising cattle, only you do it in the water. It's animal husbandry.

Aquaculture is not a new idea. Its roots can be traced back to 4,500 years ago in China. The United States is a relative newcomer in this field having started to practice aquaculture about 100 years ago. Today, aquaculture in the United States produces salmon, catfish, trout, oysters, mussels, shrimp, clams, and other species. Despite the great po-

tential of aquaculture as an energy-efficient means of food production, its growth has been much slower, and levels of production are much lower, than elsewhere in the world.

Jurisdiction over aquaculture in the Senate is shared by the Committee on Agriculture, Nutrition, and Forestry, which has authority over food from fresh waters, and the Committee on Commerce, Science, and Transportation, which has authority over marine fisheries. The Subcommittee on Agricultural Research and General Legislation, of which I am chairman, has a continuing interest in insuring the viability of and expanding opportunities for aquaculture in this country.

There is a tremendous potential for aquaculture in this country. In recognition of this potential, the Food and Agriculture Act of 1977 made aquaculture one of the four basic functions of the Department of Agriculture, along with agriculture, rural development, and human nutrition.

The 1977 law did not, however, remove the major barriers to successful fish farming in this country. These barriers include:

First. Inadequate technical and economic information;

Second. Inadequate funding for aquaculture research;

Third. Inadequate marketing practices of aquaculture species;

Fourth. Inadequate credit and financing;

Fifth. The existence of local, State, and Federal laws that prohibit or inhibit the development of aquaculture; and

Sixth. Duplication and lack of coordination among governmental agencies responsible for conducting aquacultural programs.

S. 3408 addresses these barriers. The bill provides for an assessment and development of a national aquaculture plan to support and encourage aquaculture. A national aquaculture coordinating committee composed of State and Federal officials responsible for aquaculture or related areas would be established. Demonstration projects would be carried out in the various States and regions to demonstrate the technology and viability of aquaculture. A guaranteed loan program and a Federal aquaculture assistance fund would be established under the bill.

This bill may not solve all of the present or potential problems that face aquaculture. However, it states our commitment to and provides the means for the further development of this important food supply.

I praise Senator DICK STONE for his leadership in this regard and I thank the distinguished majority leader for bringing it up for action. I urge its passage

● Mr. STONE. Mr. President, I strongly support S. 3408, the National Aquaculture Policy Act of 1978, which was reported by the Committee on Agriculture, Nutrition, and Forestry, and the Committee on Commerce, Science, and Transportation.

The purpose of this bill is to encourage the development of aquaculture in the United States by establishing a national acquacultural policy.

When we talk about aquaculture we are talking basically about the production of food, especially high quality protein. This is true of aquaculture in fresh, marine, and brackish waters. However, aquaculture, which is as old as civilization, going back at least 4,000 years in China, has languished in this Nation.

The potential for expanded contribution is enormous. This is particularly true of our Nation since we have never had coordinated support or encouragement for aquaculture.

The importance of aquaculture has become evident in the last few years with the world food crisis, and the serious scarcity of high quality protein. We also are beginning to recognize the potential of aquaculture to supplement our declining fisheries, reduce our balance of payments deficit, and afford the Nation a new viable economic activity.

However, we must get our house in order. In fact, the fragmented and disorganized approach to aquaculture by the Federal Government is one of the principle barriers to aquacultural development in the United States. This, to a large extent, has been because we never fully recognized the importance of aquaculture. Further, the fragmented industry, Government programs, and legislative initiatives have contributed to a devisiveness within aquaculture.

The need for unification and coordination and development of a national policy became even more evident this year when our committees considered five legislative initiatives including two that were exclusively referred to the Committee on Commerce, two exclusively referred to the Committee on Agriculture, and one referred jointly to the two committees.

The development of aquaculture must be our final objective, not jurisdictional battles. To find a way to support aquaculture meant we had to find a way to resolve the split jurisdiction within the Congress and the executive agencies.

Mr. President, under the leadership of Chairman TALMADGE and Chairman CANNON our committees were able to do this.

We proceeded with our hearings separately but with full awareness and concern about all aspects of all bills. We then began developing means to bring together the thinking and needs of all aspects of aquaculture. The ways this was finally achieved was through the development of a new bill that incorporated much of what had previously been introduced as well as some new. Most important, the new bill does this in, I believe, an acceptable and meaningful way for all concerned.

The leadership in developing this new bill was assumed by Senator INOUYE, a member of the Committee on Commerce, Science and Technology. I want to commend Senator INOUYE for his efforts in helping us find a workable solution.

Mr. President, at this point I would like to have included in the RECORD a short explanation of the National Aquacultural Policy Act of 1978.

The explanation follows:

SHORT EXPLANATION

The National Aquaculture Policy Act of 1978 declares a national policy to promote aquaculture in the United States.

S. 3408, as reported, would—

(1) Provide for an assessment of aquaculture in the United States. The assessment would be completed within 1 year under the leadership of the Director of the Office of Science and Technology Policy in cooperation with the Secretaries of Agriculture, Commerce, and the Interior, and other Federal, State, and regional entities interested in aquaculture. The assessment would provide a complete profile of aquaculture in the United States, including the identification of private and public institutions involved in acquaculture research, extension, credit, and market development; identification of species being cultured or that could be cultured; identification of legal, regulatory, economic, physical, and social constraints that inhibit aquaculture in the United States. The Director would submit a report on the status of aquaculture to the President and the Congress within 12 months after enactment. This assessment shall be the basis for development of the National Aquaculture Plan;

(2) Provide for the development of a national aquaculture plan to support and encourage aquaculture, including development programs to be carried out by various Secretaries and departments. These programs would focus on problems with regard to aquaculture facilities, water quality, use of waste products, nutrition, processing, and marketing, biological aspects of various species, management, and development of adequate seed stocks;

(3) Provide for an advisory committee of 15 members to assist in the development of the national Plan. It would be disbanded after the Plan is completed. At least eight members of the advisory committee would be directly involved in private aquaculture enterprises;

(4) Encourage the development of State aquaculture agencies to coordinate aquaculture activities at the State level;

(5) Establish a national aquaculture coordinating committee chaired by the Director of the Office of Science and Technology Policy and include the Secretaries of Agriculture, Commerce, the Interior, and Energy; the Administrator of the Environmental Protection Agency, the Chief of Engineers, the Commissioner of Food and Drugs, the Assistant Secretary of Labor for Occupational Safety and Health, the Administrator of the Small Business Administration, the Governor of the Farm Credit Administration, and at least five representatives to be appointed from various State aquaculture agencies. The responsibility of this coordinating body would be to ensure the exchange of information, compliance of various programs with the national policy, to prevent duplication of effort, and to develop biennial reports for Congress and the President on the status of aquaculture;

(6) Provide for contracts and grants that permit the various Secretaries with authorities under the bill to contract with other Federal agencies, States, Indian tribes, universities, or individuals to carry out any of the activities or functions of the bill;

(7) Provide for demonstration projects to be carried out in the various States or regions to demonstrate the technology and viability of aquaculture;

(8) Provide for a guaranteed loan program with a limit on the maximum amount of guaranteed loans at any one time of $100 million. The loans would be available for financing various aquacultural activities and the Secretaries of Agriculture and Commerce could draw on the loan guarantee authority;

(9) Provide for a Federal Aquaculture Assistance Fund, as a revolving fund, for the purpose of carrying out the demonstration projects and loan guarantee programs; and

(10) Authorize appropriations, effective for the fiscal year 1980, at the rate of $10 million, $20 million in 1981, $30 million in 1982. In the first year the funds will be allocated as follows: 40 percent to the Department of Agriculture, 40 percent to the Department of Commerce, and 20 percent to the Department of the Interior. However, not less than 50 percent of the funds allocated in any given year would be used for contracts, grants, or demonstration projects as provided in the bill.

Mr. President, the potential of aquaculture is evident in the remarkable growth that we have seen the last 10 years in the trout and catfish industries. However, we have barely scratched the surface of the potential in these industries. Further, there are significant opportunities in other areas. These opportunities and potentials can only be realized with a coordinated and effective aquaculture policy.

The bill provides the flexibility for the various departments that are involved in aquaculture programs to respond individually or jointly to the needs of specific segments of the overall aquaculture industry. But in all cases it assures coordination of the ongoing programs.

The bill also will bring the State and regional aquaculture interests into the planning process as well as private sector people. This will insure that our national programs are responsive in solving the problems that have been identified as being major inhibitors of aquacultural development.

Mr. President, aquaculture and agriculture are the two hands of food production. Unfortunately, one hand has not been developed. I see this bill as giving the stimulus to aquaculture similar to that which we have given to agriculture in the past by providing a national agricultural policy. It will permit the great potential of aquaculture to be realized. It also provides the basis for other economic activities in aquaculture that exists and can provide our Nation with significant benefits.

I am pleased to be able to report this bill on behalf of the two committees and I urge my colleagues to pass this legislation.

Mr. President, I wish to make one further statement. There are innumerable people from the two committees who deserve special note. However, I believe we should take time to note the interest and support of the late Senator James Allen for aquaculture. He was a longtime champion of aquaculture who gave significant support to the development of a national aquaculture policy. I think this bill will be a tribute to Senator Allen's interest.●

● Mr. GRAVEL. Mr. President, I strongly urge passage of S. 3408, the National Aquaculture Policy Act of 1978. As a cosponsor of this measure I have been intimately involved in its fashioning for some time now and I believe the time is right for passage of legislative encouragement for aquaculture activity in the United States.

Aquaculture activities throughout the United States are at once too scarce and too poorly coordinated. Those projects that do exist suffer from a lack of integration with other similar projects. This legislation will help to overcome both of these deficiencies.

To encourage increased activity in aquaculture a guaranteed loan program is instituted with a guarantee fund of $100 million. This money will be available for financing various aquacultural activities and will be made available through the Departments of Commerce and Agriculture.

To coordinate various existing aquaculture activities throughout the country as well as to encourage new ones in the future, a national aquaculture assessment will be undertaken. This assessment will identify present activities, interests and possibilities for aquaculture coordination and expansion.

Mr. President, my home State of Alaska has been involved in the activity of aquaculture for practically a century. With greater than 50 percent of the entire U.S. coastline located within Alaska, one can understand my enthusiasm for this legislation. The possibilities for aquaculture activities within my State are truly staggering.

In that regard, three aspects of this bill are particularly significant to Alaskans. All three were originally introduced as parts of S. 2762, the aquaculture bill I introduced. They have been lifted from my bill and transferred to this final Senate compromise version of which I am now a cosponsor. Each is especially important to the unique Alaskan approach to aquaculture. They are:

First, the national plan will not be formulated at the national level as originally proposed. Local input will be gathered from regional hearings and State aquaculture agencies. This will guarantee that Alaska's unique activities with respect to aquaculture will not be disregarded.

Second, the enhancement and rehabilitation of traditional publicly owned fish stocks is a major goal to be addressed by this legislation. This will insure that in addition to encouraging development of commercial aquaculture for the private sector, we will not overlook the desirability of rehabilitating the numerous depleted fish stocks which are of vital importance to the public sector.

Third, this legislation identifies the land and water access problems so often met in the attempt to find a suitable aquaculture facility location. The bill mandates that aquaculture must be viewed as a significant activity that must be given appropriate consideration among competing land and water use activities.

Mr. President, this legislative encouragement for aquaculture has been much too long in coming. The numerous benefits to be gained—commercial, nutritional and conservational—to name but three, fully justify passage of this legislation before another day passes. I urge my fellow colleagues to support this measure and enact today the National Aquaculture Organic Act of 1978.●

● Mr. WEICKER. Mr. President, I would like to congratulate the Senate for passing H.R. 9370, the National Aquaculture Policy Act of 1978.

This is landmark legislation that will prove to be of great value to this Nation.

I am pleased that the Senate bill has included Senator INOUYE's version containing major parts of my bill, S. 2582, which I introduced earlier in the year. I believe that the stimulus which this bill will provide is the only way in which aquaculture will get a solid foothold in the United States.

The various bills, both in the Senate and House, all provide provisions for obligation loan guarantees to the small aquaculture businessman. Large industrial interests are not included, but will also benefit by aquaculture legislation in terms of scientific knowledge and improved communications.

Presently, aquaculture is only contributing about 3 percent of U.S. production of foodfish. In view of the growing market for all kinds of seafood worldwide, and the resultant pressure on many stocks of living resources, this low yield from aquaculture must be increased.

It is my understanding, and quite surprisingly, that imports of fish and fish products are the third highest contributor to our national trade deficit. It alone amounts to over $2 billion.

The domestic fisheries can do much to this tremendous inequality, but will not likely be able to cut the deficit completely.

A comprehensive national aquaculture policy and industry stimulus can significantly increase our production of seafood in the near future, thereby contributing to the decrease in this debilitating trade deficit.

Several species of both food and industrial living marine resources are being overfished to the point that commercial extinction is possible. These species have traditionally been the mainstay of the consumer markets and only a shift in consumer interest or increased stocks can solve the problem. I believe that a national aquaculture program can and should address such problems by first providing for increased availability of such species as cod, haddock, lobster, and so forth. This can be done by either raising these animals in captivity to marketable size or to enhance the natural populations through stocking techniques in the wild.

It is my firm hope that some form of legislation in the Senate, House or compromise version, goes to the President for his signature.

The time is right for such legislation. Aquaculture must be put in the proper prospective before it becomes a critical necessity, and I believe that aquaculture will be a necessity in the not-too-distant future. Our production from landbase agriculture has reached a peak, so has agricultural technology. It is doubtful that great new innovative agricultural techniques will be realized for some time. As a matter of fact, the alarming rate in which our farms are giving way to development and the increasing problems with soil erosion and pesticide ineffectiveness will decrease our agricultural productivity.

The time is right to nurture the fledgling aquaculture industry, the small

businessman, and give encouragement to larger industry interests such as Coca Cola and Weyerhaeuser. Aquaculture is considered a high-risk, capital-intensive industry and Federal help to get things started make good economic sense.

The time is also right to help upgrade the nutritional base of our country. Seafood is one of the best sources of protein possible containing little fat and calories.

Even though we are still the richest country in history, our overall nutrition is below a healthy balanced diet. I look to our fisheries and a growing aquacultural system to help bring the right foods to our tables.

Mr. President, I hope that whatever the complexity of a national aquaculture bill, it will maintain the $100-million ceiling for obligation guarantee loans and not contain provisions for disaster loans and all-risk insurance.

My bill embraced these restrictions for reasons of not giving the industry too much Federal help at one time and involving all of its redtape and regulations. I believe that the industry needs Federal assistance only in the form of scientific data, information dissemination, and loan guarantees and only until the industry gets on its feet. Too much Federal involvement could be inhibiting and have a softening effect in the long run. The $100-million figure should be enough for the next few years to give the needed boost to the industry.

Disaster loans are already provided by the Small Business Administration and rather than duplicate their efforts, the SBA should be given a congressional mandate to increase their involvement in aquaculture ventures.

With the exception of stock insurance, other forms of insurance—property, liability—is available to the industry and should be no harder to obtain than is available to other industries within the same geographic confines. Once the industry starts to grow, private insurance should become more involved.

I would like to further express my gratitude to the Commerce, Science, and Transportation, and Agriculture, Nutrition, and Forestry Committees for resolving the jurisdictional problems of the bill. I am looking forward to the growth of our aquaculture industry and anticipate some fine dining on the fruits of our efforts.●

● Mr. MAGNUSON. Mr. President, I strongly support the passage of H.R. 9370, the National Aquaculture Policy Act of 1978, which was unanimously reported by both the Committee on Commerce, Science, and Transportation and the Committee on Agriculture, Nutrition, and Forestry. The bill is the result of months of discussion between the committees, and this bill represents a resolution of the issues discussed which is acceptable to all concerned.

The aquaculture industry in the United States is currently very small, but it has tremendous potential for increasing this country's food supplies. In the past, the Department of Commerce has done excellent work in promoting marine aquaculture, and the Department of Agriculture has done excellent work in promoting fresh-water aquaculture. However, there has been little overall planning or coordination of these efforts. It is therefore the purpose of this bill to provide for that planning and coordination so that the departments involved can continue their work in a more effective and efficient manner.

The bill also provides funding for contracts and grants to carry out the purposes of the bill, encourages the States to play a more active role in aquaculture development while preserving their rights to prohibit certain types of aquaculture, authorizes the Departments involved to guarantee loans for aquaculture development, and encourages the use of aquaculture for the enhancement of natural fisheries resources. The bill therefore represents a strong commitment by the Federal Government to the development of aquaculture, and I urge that the bill pass.●

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1168), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

EXCERPT

SHORT EXPLANATION

The National Aquaculture Policy Act of 1978 declares a national policy to promote aquaculture in the United States.

S. 3408, as reported, would—

(1) Provide for an assessment of aquaculture in the United States. The assessment would be completed within 1 year under the leadership of the Director of the Office of Science and Technology Policy in cooperation with the Secretaries of Agriculture, Commerce, and the Interior, and other Federal, State, and regional entities interested in aquaculture. The assessment would provide a complete profile of aquaculture in the United States, including the identification of private and public institutions involved in aquacultural research, extension, credit, and market development; identification of species being cultured or that could be cultured; identification of legal, regulatory, economic, physical, and social constraints that inhibit aquaculture in the United States. The Director would submit a report on the status of aquaculture to the President and the Congress within 12 months after enactment. This assessment shall be the basis for development of the national aquaculture plan;

(2) Provide for the development of a national aquaculture plan to support and encourage aquaculture, including development programs to be carried out by various Secretaries and departments. These programs would focus on problems with regard to aquaculture facilities, water quality, use of waste products, nutrition, processing, and marketing, biological aspects of various species, management, and development of adequate seed stocks;

(3) Provide for an advisory committee of 15 members to assist in the development of the national plan. It would be disbanded after the Plan is completed. At least eight members of the advisory committee would be directly involved in private aquaculture enterprises;

(4) Encourage the development of State aquaculture agencies to coordinate aquaculture activities at the State level;

(5) Establish a national aquaculture coordinating committee chaired by the Director of the Office of Science and Technology Policy and include the Secretaries of Agriculture, Commerce, the Interior, and Energy; the Administrator of the Environmental Protection Agency, the Chief of Engineers, the Commissioner of Food and Drugs, the Assistant Secretary of Labor for Occupational Safety and Health, the Administrator of the Small Business Administration, the Governor of the Farm Credit Administration, and at least five representatives to be appointed from various State aquaculture agencies. The responsibility of this coordinating body would be to insure the exchange of information, compliance of various programs with the national policy, to prevent duplication of effort, and to develop biennial reports for Congress and the President on the status of aquaculture;

(6) Provide for contracts and grants that permit the various Secretaries with authorities under the bill to contract with other Federal agencies, States, Indian tribes, universities, or individuals to carry out any of the activities or functions of the bill;

(7) Provide for demonstration projects to be carried out in the various States or regions to demonstrate the technology and viability of aquaculture;

(8) Provide for a guaranteed loan program with a limit on the maximum amount of guaranteed loans at any one time of $100 million. The loans would be available for financing various aquacultural activities and any of the three Secretaries could draw on the loan guarantee authority;

(9) Provide for a Federal aquaculture assistance fund, as a revolving fund, for the purpose of carrying out the demonstration projects and loan guarantee programs; and

(10) Authorize appropriations, effective for the fiscal year 1980, at the rate of $10 million, $20 million in 1981, $30 million in 1982. In the first year the funds will be allocated as follows: 40 percent to the Department of Agriculture, 40 percent to the Department of Commerce, and 20 percent to the Department of the Interior. However, not less than 50 percent of the funds allocated in any given year would be used for contracts, grants, or demonstration projects as provided in the bill.

PURPOSE

S. 3408 would encourage the development of aquaculture in the United States by establishing a national policy to encourage the development of aquaculture; requiring the development of a national aquaculture development plan; providing funding for contracts and grants and for demonstration projects to carry out the national aquaculture development plan; establishing an interagency aquaculture coordinating committee; and providing authority to guarantee loans for aquacultural activities.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The bill was ordered to be engrossed for a third reading and was read the third time.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation be discharged for further consideration of the bill H.R. 9370.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of H.R. 9370.

The ACTING PRESIDENT pro tempore. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 9370) to provide for the de-

velopment of aquaculture in the United States, and for other purposes.

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. ROBERT C. BYRD. Mr. President, I move to strike out all after the enacting clause of H.R. 9370 and substitute the language of S. 3408, as amended, in lieu thereof.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the motion of the Senator from West Virginia.

The motion was agreed to.

The ACTING PRESIDENT pro tempore. The question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The bill (H.R. 9370) was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that S. 3408 be indefinitely postponed.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## ORDER FOR RECESS UNTIL 10 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 10 a.m. tomorrow morning.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from Tennessee is recognized.

Mr. BAKER. Mr. President, I intend to yield my time allotted to me under the special order for this morning to the distinguished Senator from Arizona.

Mr. President, I have no need for my time under the standing order and I yield that time plus the time under the special order allotted to me this morning to the distinguished Senator from Arizona.

## SPECIAL ORDER

The ACTING PRESIDENT pro tempore. The Senator from Arizona is recognized.

Mr. GOLDWATER. I thank my leader very much. I doubt that I will need all of my time. I will return what I do not use.

## GOLD

Mr. GOLDWATER. Mr. President, it is shameful and tragic to note the current lack of confidence, worldwide, in our dollar. I cannot remain silent in this critical period in our history. Our Nation, the most powerful on Earth, has a printing press, fiat money, dollar, so beset by inflation that it has to bow to the German mark, the Japanese yen and the Swiss franc. How humiliating.

Of course, this monetary development is no surprise to those who have followed, apprehensively, since 1934 fashionable and popular Keynesian economics. The end result is the ruinous inflation plaguing the Nation and an extraordinary rise in the price of gold to over $200 per ounce. Who would have dreamed it a few years ago? Even higher prices are envisaged.

This should bring joy and happiness to those Government officials in Treasury and elsewhere who have advocated and put into force the policy of reducing gold to commodity status domestically and internationally.

The latest Government sale of gold was at $185 per ounce, a marvelously high market price. Had it been delayed a few weeks longer, over $200 per ounce could have been obtained. Indeed, the prospect is good for still higher prices as a dollar not redeemable in gold prevails, and the budget continues to be deplorably unbalanced. Perhaps there may be a spell of devaluations, in time, under the currently respectable practice of modern "coin clipping."

After all, look at the profit, in paper, made by the New Deal back in 1934, when the dollar was devalued by raising the price of gold from $20 to $35 following the confiscation of the gold holding of the citizens so they could not profit. The Government made over $2 billion on the deal, an easy way to profit. The late Adrian Massie, chairman of the Chemical Bank, has termed that devaluation one of the most tragic episodes in American financial history. I concur.

There was a price to pay. A grave moral issue was raised involving the sanctity of contracts. Senator Carter Glass, chairman of the Banking Committee, said,

> It's dishonor, sir. This great government, strong in gold, is breaking its promise to pay gold to widows and orphans to whom it has sold government bonds with a pledge to pay gold coin of the present standard of value. It is breaking its promise to redeem its paper money in gold coin of the present standard of value. It's dishonor, sir.

Some Supreme Court Justices stated the devaluation was counterfeiting when the issue reached the Court.

The moral issue permeates deeply the world's monetary mess. This is nothing new for mankind. It reminds me of the conclusion reached by the Federalist Papers authors when they examined the reason for hostility between nations. They sought to subdue the possibility of strife between the States and observed that "men are ambitious, vindictive and rapacious." I do not wish to pursue this thought any further but the evidence of its truth is all around us. It illustrates the difficulty of establishing sound and honest money.

I am confident Americans desire to have the finest kind of money ever conceived. What is it? Experience for countless years shows that, above all, while people may not be knowledgeable about monetary principles, they can readily distinguish good money from bad. They respect the store-of-value quality in any money. By this test, no wonder gold is No. 1 money today, and always has been. Despite the incredible policy of our Government to reduce gold to commodity status and to eliminate its use as money domestically and internationally, the effort has been utterly futile.

Ask yourself the question, which is the better dollar, one redeemable in gold, or the current fiat, printing-press variety that is not? The answer is obvious.

I do not profess to be a monetary expert nor do I have to be one to understand the plight of our dollar. For guidance and enlightenment, we need merely turn to our superb Constitution. It specifies only gold and silver coin as money. No reference to paper. Why? Because the Founders of our Nation knew firsthand the sad result accruing to government using fiat money such as the bankruptcy of France caused by John Law's paper money, or our own experience with the complete erosion of the continental currency.

Our Nation, comparatively young in history, nevertheless can profit from the lesson of five troublesome inflations. All were related closely to increased paper money supplies. First, the Revolutionary War inflation, then that of the War of 1812, followed years later by the tragic Civil War with its paper greenbacks. Then came World War II, and nowadays the heritage of the Vietnam war, the reason for gigantic Government expenditure to cover both guns and butter simultaneously. The deficit is with us today.

The Civil War example showed that when the paper greenbacks became redeemable in gold in 1879 after a long depression, and against the opposition of numerous legislators, the Nation began the greatest period of commodity stability and steady growth in its history, only to have it end when World War I erupted.

In the light of that record, I cannot understand antipathy to gold as money. It demonstrated the power of gold to discipline Government expenditure, a discipline absent now. The sky is the current limit to Government disbursement, especially as the statutory limit on the gold reserve behind Federal reserve deposits and notes was removed by the Congress in 1965 and 1968, respectively.

Currently, people are helpless, nationally, in curbing government expenditure for they have lost the power of the purse which they possessed when they could redeem their dollars in gold.

The people are not helpless in the 50 States of the Union, however, as the Californians demonstrated recently with proposition 13. Nationally, the job is different and tough because all the Federal Government need do if it requires funds is, under the Federal Reserve System, to send its bonds to the System and receive dollars in return. This is known as monetizing the debt. It was not always thus. The Federal Reserve System was designed, originally, to facilitate the flow of commercial transactions, not the fi-

nancing of the Government. That important change was brought about by World War I which required vast amounts of Federal funds. Taxing the citizens would have been unpalatable.

This history suggests one remedy for our devastating inflation—return to the original premise of the Fed so that the Government would have to go to the marketplace, as industry has to do, for the funds it requires. My main recommendation, based upon our own experience, is an early return to an honest dollar which means the gold standard.

I am conscious of the fact that the road may be rough and long to attain a sound dollar. Five years were required to make the Civil War greenbacks redeemable in gold.

Fortunately, two important steps have already been taken. The first was a restoration of the right to own gold coin or bullion. Imagine, it took 40 years to reachieve that basic freedom. The second step, which occurred last November, was congressional action permitting the use of the gold clause in contracts.

The next step is fundamental and largely political. It is to balance the budget and reduce our horrendous deficit. I am confident there is general agreement on the merit of that needed action. How to do it in the absence of the discipline of gold, and the current loss of the power of the purse by the people, is something requiring early attention.

As Thomas Jefferson wisely stated:

I place economy among the first and most important virtues, and public debt as the greatest of dangers to be feared . . . to preserve our independence, we must not let our rulers load us with public debt . . . we must make our choice between economy and liberty or profusion and servitude.

One highly pertinent suggestion made to me is to curb the ability of the Federal Reserve System to monetize the public debt, to which I have already alluded.

Another recommendation is to return to the States some or all of the welfare load carried by Federal authority. I have an idea the end result would be beneficial all around.

Still another suggestion, after the budget has been balanced, is to note the open market price for gold and, at a specified interval, which need not be long, declare paper dollars once again redeemable in gold, at a price close to the market.

Our dollar has a serious responsibility as the most favored money to settle international commerce, having displaced the pound sterling many years ago. This brings added urgency to restoring confidence in our dollar.

My emphasis is on the quality of the dollar, not its quantity; in other words, furnishing the world with the best store-of-value monetary unit. I stand by the precept of our Constitution. Our forefathers had thousands of years of human experience with money to guide them. They settled on gold. Let us return to it as speedily as possible so we no longer have to be chagrined at the entire world's current attitude to our paper money.

From the time of President Franklin Roosevelt, intellectuals drawn from universities to Washington officialdom have had undreamed of influence. Under popular Keynesianism, they apparently believed that if sufficient power was placed in the hands of Government they could cure the ills of our society, unemployment, and so forth.

For example, observe the following remedy for inflation offered by a former Government adviser, Prof. Gardner Ackley of the University of Michigan. He has stated:

Finally, we must accept the necessity for a permanent and prominent government authority which will actively and continuously monitor important wages and prices and be equipped with specific legal powers to strengthen the ability to get at the facts and to influence private decisions. It might also be given limited power to impose temporary control over any wage or price.

This monetary medicine to cure inflation appalls me. Goodby, free enterprise. It is completely unnecessary for a people who cherish their freedom. Jawboning has already been shown to be futile.

Nowadays, it is popular to place the blame for inflation on corporate greed, labor, bankers, or other scapegoats, whereas it is the Government which sits in the driver's seat. The correct answer, to my mind, was given by one of the greatest, if not the greatest, economists of the century. He was a valiant and incorrigible battler against omnipotent government and devoted to fostering free markets. He is the late Ludvig Von Mises. This is what he has to say about gold and inflation:

The eminence of the gold standard consists in the fact that it makes the determination of the monetary unit's purchasing power independent of the measures of governments. It wrests from the hands of the 'economic tsars' their most redoubtable instrument. It makes it impossible for them to inflate. That is why the gold standard is furiously attacked by all those who expect they will benefit by bounties from the seemingly inexhaustible government purse.

Although the financial world, for the first time in history, floats on a sea of paper money, the gold standard continues to function, strange as it may seem, but on a seriously crippled basis. This is because a yardstick is absolutely indispensable in money, just as standards of measurement are fundamental to commerce and every day life. All governments show gold on their balance sheets. The prevailing extraordinary high price is a rough measure of inflation in commodities.

As part of my ongoing research in money, a fascinating experience, I have resurrected a profound statement on money and gold by the late great European banker, Per Jacobsson which he made before the American Philosophical Society many years ago. Here is what he said:

In the first place, the alignment of currencies to gold gives a certain stability to the world's monetary system which cannot be ignored—gold cannot be arbitrarily created as credit can, and from the point of view of stability, the guarantee given by gold is therefore felt to be superior to that of credit as a means of payment.

Secondly, when international liabilities are settled in gold, this is a definite and final settlement, leaving no credit nexus as in the case when settlement is made in other ways. Gold payments are less complicated, and this is an advantage.

Thirdly, in a world in which we live with so many beliefs and, I must admit, prejudices inherited from past generations, the possession of gold inspires confidence in a way that the possession of no other monetary asset can. Given human beings as they are, they need "props" for their confidence to be sustained, and gold still proves useful in this respect.

Fourthly, the use of gold as the well-nigh universal basis of money may not by itself give cohesion to the world's monetary system but it greatly facilitates the task and it would not be easy to establish the same degree of cohesion in any other way.

And, fifthly, the current gold output, insofar as it becomes available for monetary purposes, gives a certain impetus to financial expansion and an increase in international liquidity.

Per Jacobsson became the first president of the International Monetary Fund. As you doubtless know, the IMF is the creator of special drawing rights, paper gold, a far cry from the Jacobsson declaration. Indeed, the IMF has been busy disposing of some of its gold in part to be returned to original subscribers. The proceeds of some sales are to aid underdeveloped nations. The IMF has been termed an engine of inflation.

I could go on but I had better conclude with the word of an exemplary and great American, a former President of the United States, renowned for his relief to the suffering of mankind caused by war. He never took a cent for his service to the Nation while in office. Contrast this with the recent congressional action raising salaries of legislators $13,000 annually without a record vote. That President was, of course, Herbert Hoover. He states in his memoirs:

Currency convertible into gold of the legal specifications is a vital protection against economic manipulation by the government. As long as currencies are convertible, governments cannot easily tamper with the price of goods, and therefore the wage standards of the country. They cannot easily confiscate the savings of the people by manipulation of inflation and deflation. They cannot easily enter into currency expansion for government expenditures. Once free of convertible standards, the executives of every "managed-currency" country had gone on a spree of government spending, and the people thereby lost control of the public purse—their first defense against tyranny.

These are words of monetary wisdom, in violent opposition of fiat money Keynesianism, so popular currently. I urge my colleagues, regardless of party, to find the time, difficult as it may be, to penetrate an apparently bewildering, but vital topic to the future of our Nation; how to restore quality and integrity to the dollar. That is what I have been doing.

I believe they may find, as I have, that our Constitution is the best guide, as it always has been, to protect our liberties and to restore confidence in our dollar. I repeat, it only specifies gold and silver coin as money, not paper.

It is clear to me that if we do not get back to honest money, the gold standard, we must anticipate even more turmoil in every direction than we have today.

Mr. President, if I have any time left, I am glad to yield it back.

## NATURAL GAS POLICY ACT OF 1978—CONFERENCE REPORT

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now resume its consideration of the conference report on H.R. 5289, which the clerk will report.

The second assistant legislative clerk read as follows:

An act (H.R. 5289) for the relief of Joe Cortina of Tampa, Florida.

Mr. METZENBAUM. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. FORD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. FORD. Mr. President, I ask the Senator from Ohio how much longer it will be before he will be prepared, and if he has anything else, so we might schedule something.

Mr. METZENBAUM. I am ready.

Mr. FORD. Is the Senator now ready to go on?

Mr. METZENBAUM. I am.

Mr. FORD. I am delighted to yield the floor to the Senator from Ohio.

The ACTING PRESIDENT pro tempore. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I rise this morning to address myself to the question of the impact of the pending legislation and the need for that legislation with respect to the value of the dollar.

We have heard a good deal of comment and a good deal of pressure brought on many Senators on the basis that we need this bill, the conference committee bill, because, if we do not pass it, it will somehow have a negative impact upon the value of the dollar and it will look bad for us throught the world.

I do not know too many economists, but I know one that I consider a great authority in the whole field of economics, the value of the dollar, the stock market. He is carried by a tremendous number of newspapers in this country as an authority.

So I picked up the telephone yesterday and I asked Eliot Janeway for his view with respect to this subject.

I now read his telegraphed answer to my inquiry:

Answering your inquiry, it is my considered judgment that passage of the pending gas bill will make no contribution whatever toward restabilizing the dollar. On the contrary it will advertise the strangulation of our regulatory procedures in red tape and it will accelerate the liquidation of independent gas producing enterprises. Thereby weakening the dollar further it is reassuring to have your reaffirmation of top priority for the goal of strengthening the dollar.

Sincerely,

ELIOT JANEWAY.

Mr. Janeway's opinion must be and has to be a respected one. He is considered one of the top economists in the entire Nation.

Is he alone in his view? No, he is not alone in that view. There are others who have arrived at the same conclusion.

Yesterday, I addressed myself to the letter written by the senior vice president for international economic analysis of the Chase Manhattan Bank. Although I did not respond to my good friend from Kentucky, it is a fact that he was not speaking of the position of the Chase Manhattan Bank, but, rather, was speaking his own independent position, a position that is certainly credible. The man is the senior economic analyst for international economic matters for the Chase Manhattan Bank.

Are there others who have arrived at the same conclusion that this bill has nothing to do with the value of the dollar overseas?

Mr. DOMENICI. Mr. President, will the Senator yield for a question?

Mr. METZENBAUM. Not at this point.

In a recent article in the Christian Science Monitor, dated Tuesday, September 5, 1978, under the heading of "Financial," "Taking Oil Imports Off the Hook as Dollar's Nemesis," by David R. Francis, this subject is addressed.

I say to the Senator from New Mexico that as soon as I conclude, I will be happy to respond to his question, but I would not like to lose my train of thought.

The article reads as follows:

The reason for the fall in the foreign exchange value of the dollar is the huge increase in oil imports.

Right?

No! Wrong!

"Balance-of-payments deficits and weak currencies are monetary phenomena, resulting from excess money growth in the country with the deficit relative to money growth abroad," maintain Douglas R. Mudd and Geoffrey E. Wood in the August Review of the Federal Reserve Bank of St. Louis.

That's a view obviously not shared by the Carter administration. President Carter has often blamed the declining dollar on the rise in oil imports, to $45 billion last year. He uses this argument to persuade Congress to pass his energy legislation.

Abroad, Chancellor Helmut Schmidt of West Germany and some other national leaders berate the United States for its high rate of oil consumption. It is politically handy to be able to blast the U.S. with impunity because the U.S. Government welcomes such criticism. And perhaps Mr. Schmidt and others even believe that the dollar decline is oil-related.

Whatever, some economists—especially those of the monetarist school—hold that such charges are nonsense.

Says New York's Citibank: "Even if the United States became a net exporter of oil, as Norway is today, the dollar would probably be weak, just as Norway's krone is—provided the United States, like Norway, clung to a monetary policy that was persistently more expansionary than other countries."

Citibank and the St. Louis Fed economists use two levels of argument to buttress their position that oil imports should not be blamed for the sliding dollar.

First, Messrs. Mudd and Wood note, the U.S. has imported less oil as a percentage of its gross national product (total national expenditures on goods and services) than either Germany or Japan each year from 1970 through 1977.

Last year, for instance, U.S. oil imports amounted to 2.2 percent of GNP. In Germany the comparable percentage was 2.9 percent and in Japan, 3.4 percent.

Nonetheless, both the Deutsche mark and the Japanese yen have been rising in value against the dollar and almost every other currency in the world.

Moreover, U.S. imports of oil from the members of the organization of petroleum exporting countries have been self-financing a commerce department study shows that from 1974 through 1977 the U.S. ran a $36 billion deficit on transactions in goods and services with OPEC. But over the same period, cumulative capital inflows from these countries into the U.S. totaled $38 billion.

"So," Citibank says, "whatever caused the dollar's decline, it seems likely that petrodollars did not."

The St. Louis Fed economists make the same point, though not quite so successfully, by looking at 1977 figures alone. The U.S. balance-of-trade deficit with the oil-exporting countries that year was $16.9 billion. These oil-rich countries made net purchases of U.S. corporate stocks and bonds and U.S. Government securities of about $7 billion. And they increased their deposits in U.S. commercial banks by about $400 million. So these capital inflows offset about 45 percent of the U.S. trade deficit with oil-exporting countries.

A decline in the value of the dollar, these economists say, results from an excessive supply of dollars in the foreign exchange market. The trade balance is only one factor in that supply-and-demand picture.

Also important to the exchange rate is capital flows, both private and governmental.

Most important to the supply of dollars is how many of them the U.S. creates. Messrs. Mudd and Wood explain: "If the U.S. money stock, for example, exceeds the amount people are willing to hold, given the structure of interest rates and income levels—that is, there is an excess supply of money—then people will increase their spending as they attempt to reduce their holdings of money to desired levels. Spending on foreign goods, services, and securities, as well as domestic spending, will rise. As a result, the amount of dollars supplied on the foreign exchange market will increase."

If that increase in dollars is greater relative to the increase in foreign currencies, the dollar will decline in value.

Moreover, the two argue; if the U.S. decreased its imports of oil without changing the supply of new money, that extra new money would merely flow into the purchase of other imports, of domestic goods that would otherwise be exported, and into foreign capital assets. The U.S. would be no further ahead in its balance of payments.

Thus, these economists conclude, to stop the decline of the dollar, the U.S. must not create so many new dollars.

Mr. President, we now have on one side the President of the United States and Helmut Schmidt, and I guess you have to include Jim Schlesinger and Bob Strauss. On the other side, you have Elliot Janeway, senior vice president for international economic analysis of the Chase Manhattan Bank; the St. Louis Federal Reserve Bank economists; New York City Bank; and later today I expect to address myself to an article in the London Economist on the same issue.

What about some other people in this country? One of the people who have been going around the halls lobbying and twisting arms and trying to tell Members of the Senate how important it is to vote

for this bill in order to save the dollar, in order to make us appear good around the world, is none other than the Chairman of the Federal Reserve Board. Let us see what he said the other day, when he was before the Finance Committee.

Senator RIBICOFF said to Mr. G. William Miller:

As you go around the world talking to your fellow bankers, those who are responsible for making policy and determining the value of the dollar, please explain why that gas bill has become the symbol of America's intention to do something about inflation and, if I may be so bold and ask you to comment, do you think that the Congress of the United States has abdicated its responsibility in this field to do something about inflation?

Mr. MILLER. Senator Ribicoff, the world for whatever reason, has built up the question of the energy bill as an almost essential element in our determination to cope with our problem of inflation and the problem of the dollar, and particularly the problem of the dollar.

I cannot say it is logical. It perhaps is a result of our own actions of perhaps raising expectations and creating the impression ourselves, but more than that, it has been a dramatic element in all of the international conferences I have attended or heard about in terms of the viewpoints and perception of foreigners, and I am sure it has a great influence on the foreign exchange markets.

I do not have the remainder of that quotation.

Mr. FORD. Mr. President, I would be glad for the Senator to have unanimous consent to put the remainder of that statement into the RECORD. It is an awfully good statement for our side.

Mr. METZENBAUM. I intend to do that, and I will offer the remainder of the statement.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. METZENBAUM. Subsequently in the same hearing, Senator LONG questioned Mr. Miller:

Senator LONG. I must say, for my part, the the potential for that tax has become increasingly discouraging, and I think I find myself more and more agreeing with those sophisticated people overseas.

In other words, the sophisticated people overseas having to do with the COET tax.

Senator LONG continued:

Now, if they are smart enough to see that the COET tax is not going to pass, how long do you think we are going to fool them with a gas bill that says we are going to do a lot about gas, only to find out that very little is going to happen?

Mr. MILLER. I do not think we can fool anybody very long. If we do not get production, the decision to pass the gas bill will have turned out to be not able to accomplish its purpose, then it will be necessary to pass another gas bill.

Mr. President, I agree with Mr. Miller. I agree with Senator LONG. You cannot fool people. This bill, even at the best, is a question of symbolism. Nobody rates it a good bill. I am not sure whether Mr. Strauss calls it a C-minus or a C-plus bill, but it is really quite irrelevant. Nobody says it is an answer. Nobody says it is going to cause great amounts of new gas to be forthcoming from the ground.

It is said that it would give us 3.5 percent more gas by 1985. Great—3.5 percent more gas. You can pick your figure—$11 billion or $41 billion. That amounts to anywhere from $16 to 60 per mcf, compared to the present price of $1.50.

Does anybody really think that 3.5 percent more gas 7 years from now is going to solve the gas problems of this country or the energy crisis?

The bill also does something we have not touched upon yet. It causes industrial users to use more natural gas, not less.

When the Senate bill and the House bill went to the conference committee, it provided that residential users would be paying the lower amount. But when it came back from the conference committee, the ball game had changed and it was made better for the industrial users.

When the President sent a letter to every Member of the Senate, he proudly pointed that out. Well, I say to the President and I say to those in the conference committee who agreed to that language in the bill, "You did a disservice." We do not want more industrial gas being used. We want coal.

We want coal to be burned in this country. And my good friend from Kentucky, who is handling the bill at the moment in the Chamber, knows that the emphasis up until this conference committee report has been to get people to go from oil and gas to coal. That is the reason we have an oil and gas users tax that this Senate passed and the House of Representatives is still holding back in the conference committee as is the Finance Committee of this body.

But the fact is we do not want more industries to use more gas. We want them to turn to coal. But somehow the President in his letter to us emphasized the fact that this will make industrial use more and now they are saying to us what a great thing that is going to be because we are going to save so much oil as a consequence.

That is not in the national interest. The national interest is to get people to go from oil and gas to coal because coal is very adequate in this country and there is plenty of it. It is to get them to turn to alternative energy sources.

The Department of Energy has been in business for almost 20 months. What have they done about developing alternative energy sources? What have they done about coal gasification? What have they done about liquefying coal? What have they done about developing solar energy? They have not done much because they have been too busy lobbying the Members of the Senate and House of Representatives in order to get a conference bill through even if the bill is not any good. That is the kind of legislation we are talking about.

Someone, somewhere, thinks we are going to fool those people over there in Japan, Switzerland, and Germany, and they are going to suddenly say: Great. We just passed an energy bill.

We could have passed an energy bill almost a year ago, if the administration and the House of Representatives had not decided upon a course of action to hold back three parts of the bill, and that they have done, hold back three parts as hostage in order to get a natural gas bill. They thought if they got a natural gas bill and put enough billions of dollars in the pockets of the oil and gas producers then maybe they could get through their wellhead tax and all their other taxing measures.

That plan has failed.

Mr. President, I think we have heard enough arguments about what this means to the dollar. I think we have heard enough arguments about the symbolism that this bill will create.

This bill is a meaningless piece of legislation, with the exception of the fact that it will not be meaningless to the consumers of America, to the people who use gas in their homes—over 50 percent of the homes in this country do use gas to heat with—to heat and energy for their stoves for them to cook with.

If we pass this bill, it will be meaningless to America as far as world trade is concerned, as far as the dollar is concerned, but it will not be meaningless to the American people who will pay the price. And it will not be meaningless to the oil and gas producers who will be enriched by whatever number you want to pick, $11 billion, $20 billion, $41 billion, but the money will go directly from the American people into the pockets of the oil and gas producers.

Mr. FORD. Mr. President, I always enjoy listening to the Senator from Ohio. He gets reasonably worked up and gives at least the few of us who are here the opinion that we are debating the bill somewhat, and it is typical for him and others to select economists that favor their position. It would be our direction to select economists that favor our position.

So, Mr. President, I wish to say that the Irving Trust Co., New York, Mr. Gordon T. Wallis, chairman of the board, supports this legislation, and I wanted to be sure that the distinguished Senator from Ohio knew that at least there is one bank, and I suspect there are a great many more that do support this legislation.

I always thought that John C. Sawhill is a fairly decent economist. I believe he is president of the New York University, and he has sent me a cover letter on the executive summary on the Aspen Institute study, and I wish to just quote one paragraph from Mr. Sawhill's cover letter:

Immediately following our White House presentation I expressed at press briefing my personal views of strong support for the natural gas pricing compromise, the cornerstone of the administration's national energy plan. I believe it represents a vital step to the future of gaseous energy, enabling gas to make its optimum contribution to the Nation's total energy mix, which was the principal thrust of the Aspen conference conclusions. I think at the present time, viewed from both the national and international perspectives, it is overwhelming in our Nation's best interest that the energy bill be immediately adopted.

He offers to discuss this with anyone who wishes to discuss it.

I am not an economist. I do as best I can to pay my bills, pay my monthly payments on my mortgages, and have something remain at the end of the month.

But if I am reasonably correct as to what this compromise will do, in placing

additional natural gas into the interstate pipeline, some 2 trillion feet in 1985 without Alaska gas, this I think would save approximately a million barrels of oil per day and, if you save the purchase from foreign sources of a million barrels of oil per day, that is 365 million barrels of oil that will not be purchased from foreign countries. That is $5.4 billion, if my figures are reasonably correct, and I always will stand corrected, because I think I am in the ballpark, that we would not pay foreign sources.

What is wrong? What is wrong with giving the American producer an opportunity to go out and try to find additional sources of energy? I cannot see why we wanted to prevent a scale of natural gas pricing over the next 7 years that would give the American producer, whether he is the smallest wildcatter or the largest oil company, an opportunity to secure new sources of energy and allow them then to have a steady incline or increase in price over the next 7 years. They will know what the price is going to be. They will be able to develop their future. They will be able to have some capital. They will be able to hire Americans to work for them. And I just think it is important that we follow down this path of taking care of the American economy and not worrying about the foreign sources of energy.

In fact, I am sure the foreign sources of production of energy have economists and they say to this country that we are purchasing too much outside sources of energy.

Mr. President, in 1973, after the embargo, began in my humble judgment the largest transfer of funds from one area of the world to another and those transfers of funds were American dollars to other countries, instead of leaving them here. And let me say something to Mrs. Smith or Mrs. Jones when she turns on her stove in Ohio to heat the soup for the evening meal. If the production of natural gas declines in this country the cost to her will go up, because of the fixed price and her ability to have gas to heat her evening meal or whatever will decline.

She cannot win. Talk about consumers, the housewife cannot win unless we have this piece of legislation, and I would be very hopeful that when we phase in this cost, we will be able to say to Mrs. Smith or Mrs. Jones, "We are doing what is right to see that you have what is necessary to make life somewhat easier".

My distinguished colleague from Ohio talks about the additional cost of natural gas. He has a great deal of statements that are associated with the EIA and their analysis, he leans on them pretty hard, and I have listened to him use the EIA study. He said the reason it is going to cost more is that under this bill we will have more to use. That $2.2 billion in 1981, if that figure is close to right, $1.6 billion of that is new natural gas produced by American producers. He stands up and says that the Energy Department has not done anything to try to find new sources of energy.

Well, I want to disagree with him just a little bit. The coal in Ohio that he pushes so hard to sell—and I do not fault him for that, I want people to buy Kentucky coal every chance they get—but the contracts have been signed for preliminary design for SRC-2, and SRC-1 which give us two sources of energy from coal.

He says they are not doing anything. I can give him point after point after point. You see, in this argument you pick the side that favors you and you forget about those who are just as smart, just as qualified, just as capable, who have the ability to make some decisions.

You know, if you are going to save $5.4 billion from going overseas, it seems to me that is going to strengthen the dollar at home. The Senator says the oil companies or the gas companies are going to get the money in America. What is wrong with that? What is wrong with paying American producers money? Is the Senator against profit? Is the Senator against the American producer having an opportunity?

Let me go back here and just give a little example. Under the proposal of this bill they want to stay with the old law, they do not want any new law. I was right concerned about the distinguished Senator from Texas (Mr. TOWER) yesterday when he stood there and on three separate occasions said:

> Yes, Senator, I am for moving intrastate gas out of my State into the other States.

That brought home to me that there is going to be trouble in River City trying to get a recommitment statement that will go along with the motion to recommit, because when the Senator analyzed it last night and analyzes it this morning he will regret that he made that statement last night that he is going to take intrastate gas out.

But the Senator from Ohio says, "I want the present law. Send it back. Give them a little authority to move this gas out."

Under the conference agreement compare the current law and we stay the same and we have to take it on that basis, and there are just 9 cents difference per Mcf over 7 years to the residential user. The Senator quotes EIA lots of times, and there it is, and I am just quoting from here, 9 cents more per Mcf at the end of the next 7 years.

Commercial prices will go up only 23 cents; raw material up about 17 cents, industrial up about 23 cents. So somewhere along the way those who make these decisions must be given a little credit.

Mr. METZENBAUM. Mr. President, will the Senator from Kentucky yield for a question?

Mr. FORD. The Senator would not yield to the distinguished Senator from New Mexico a while ago, and I think I will just continue with where I am going. and after I am through the Senator from Ohio can stand there and ask me questions all day, because I think we are going to have a lot of time, and if we have a lot of time you just sit there and relax and listen to me for a while. I did not interrupt the Senator.

He talked about Mr. Miller. He did not get to finish his statement a while ago, but what he read—I thought he ought to get the balance of the statement in, because it was not making him look too good—Mr. Miller, the Chairman of the Federal Reserve Board, his statement was excellent that the Senator read into the RECORD. It really substantiated, I thought, what he was able to read about our position and Mr. Bosworth, Chairman of the Council on Wage and Price Stability kind of favors this piece of legislation.

The Senator brought up the name of Robert Strauss. OK. If there is anybody I want on my side, it is Robert Strauss. I do not know where the Senator wants him to be. If the Senator wants him to be against him that is fine, but I want Robert Strauss on my side.

Mr. METZENBAUM. You have him.

Mr. FORD. I want to tell the Senator when Robert Strauss says this bill is a "C" bill, it is a pretty doggone good bill because Bob Strauss has high expectations. He does not have anything flimsy, and when he rates it, he rates it with a very critical eye. So if this is a "C" bill in Bob Strauss' estimation, then, in my opinion, it is a good bill, and it is a good bill, because Robert Strauss does not have his sight set very low. He does not have his sights set low at all.

I know the distinguished Senator from New Mexico wants to ask some questions or the Senator from Ohio, one, but I want to say to the Senator from Ohio yesterday he said this conference committee bill has no constituency—it is in the RECORD, and it is what the Senator said—has no constituency——

Mr. METZENBAUM. Except the League of Women Voters.

Mr. FORD. The Lord have mercy, do you not want the women on your side? Yes, I do. And the General Federation of Women's Clubs. I want them on my side.

Mr. METZENBAUM. I do not know if they took a position.

Mr. FORD. Senator, you do not have the floor; I do.

So I just want to put something in the RECORD to show the Senator that what he said yesterday was wrong. He already mentioned some people who favor the bill, people like Bob Strauss and Chairman Miller. I will take those.

I would like to give the Senator the letter from the R. J. Reynolds Industries which favors this bill. It is signed by Frank D. Gorham III. Somewhere along the way the farming community of this country is very interested in this piece of legislation. They do not have many people percentagewise, but, boy, they sure are important to this country, and I want the Senator from Ohio to look at this list of farm groups, food processors, even chocolate candymakers out of Pennsylvania that are supporting this piece of legislation.

So, Mr. President, I ask unanimous consent that the telegram that I hold in my hand listing 15 major groups around this country, and some from Ohio, I say to the Senator, I think you would like to know about, be printed in the RECORD.

There being no objection, the Mailgram

was ordered to be printed in the RECORD, as follows:

AUGUST 28, 1978

Hon. WENDELL H. FORD,
*U.S. Senate,*
*Washington, D.C.*

We, the undersigned groups involved in agricultural production, processing and distribution, after long and careful consideration of the final language of the natural gas compromise find the following:

The compromise will produce more gas than the status quo;

The compromise contains provisions to protect the agricultural sector, from production to the point of last sale, from unduly higher costs;

The compromise contains provisions that are equitable and reasonably provide for the essential needs of agricultural production during periods of curtailment;

The gas pricing sections represent a reasonable compromise between the advocates of immediate deregulation and the advocates of extended price controls;

The incremental pricing provisions are adequate to insure that residential consumers are protected from higher gas prices while still providing adequate incentives for new exploration, development and production.

Consequently, we the undersigned strongly urge you to support the bill and oppose attempts to modify the agreement. The organizations listed below will be in contact with your office to give you additional details during the next few days.

American Bakers Association, Robert Wager, 296–5800.

American Feed Manufacturers Association, Gerald Karstens, 524–0810.

American Frozen Food Institute, Thomas B. House, 821–0770.

Chocolate Manufacturers Association, Tim Rugh, 790–5011.

Corn Refiners Association, Kyd Brenner, 331–1634.

International Association of Ice Cream Manufacturers/Milk Industry Foundation, Robert Mulligan, 296–4250.

National Agricultural Chemicals Association, Jack Early, 296–1585.

National Association of Wheat Growers, Jerry Rees, 466–8630.

National Broiler Council, George Watts, 296–2622.

National Council of Farmers Cooperatives, Kenneth D. Naden, 659–1525.

National Food Processors Association, Leonard Lobred, 331–8151.

National Grange, John Scott, 628–3507.

National Milk Producers Federation, Patrick B. Healy, 393–8151.

Society of American Florists and Ornamental Horticulturists, Timothy Burne, 836–6700.

United Fresh Fruit & Vegetable Association. Llewellyn Gerson, 293–9210.

Mr. FORD. We have no constituency for this legislation is what the Senator said. Who is closer to the consumer and the voter than the mayor or a county judge? Who lives with them every day? Who gets the phone calls at night which say, "Somebody forgot to pick up my garbage yesterday?" Who knows more about the consumer and the individual than the mayor, and who is for this bill? The National Conference of Mayors has endorsed this piece of legislation. Mr. President, I ask unanimous consent that the telegram from the mayor of Denver be included in the RECORD in support of this piece of legislation.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C.,
*September 8, 1978.*

Hon. WENDELL H. FORD,
*Senate Office Building,*
*Washington, D.C.*

"On behalf of the U.S. Conference of Mayors and our Nation's cities, I urge that you approve pending energy legislation at the earliest possible moment. This Nation needs an energy policy without further delay."

W. H. MCNICHOLS,
*President, U.S. Conference of Mayors.*

Mr. FORD. Mr. President, I wish to file telegrams from 13 independent Texas producers; a telegram from the Great Atlantic & Pacific Tea Co., better known as A&P; a telegram from the Fairbanks Industrial Development Corp., and also a letter from Associated Industries of Kentucky, all in support of this conference report.

I would also like to add that the U.S. Association of Journeymen and Apprentices of the Plumbing and Pipefitters of the United States and Canada, AFL–CIO are in favor of this conference report.

Mr. President, let me file this entire list and ask unanimous consent that all of this material be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Senator WENDELL H. FORD.

The undersigned are active, aggressive explorers for natural gas. There are many opinions being voiced about the Natural Gas Policy Act. We are of the opinion that although this is not a perfect bill the pluses of the bill are much greater than the minuses and it does provide certainty and should be passed by the U.S. Senate.

For 30 years we have been attempting to get decontrol of natural gas. This bill gives us decontrol in 1985 which is much better than the status quo.

We urge you to support the Natural Gas Policy Act.

Jack Blanton, George Brown, Joe Foy, Neil Hanson, Allan King, George Mitchell, Pat Rutherford, J. N. Warren, George Watford, Jim Wooten.

---

Senator WENDELL H. FORD,
*Dirksen Senate Office Building,*
*Washington, D.C.*

Hon. WENDELL H. FORD: Quintana Petroleum Corporation has been actively involved in oil and gas exploration for many years, there are many opinions being voiced about the Natural Gas Policy Act of 1978, because of increased regulation and uncertainties caused by confusing provisions, this is by no means a perfect bill. However, the bill does provide some degree of certainty and its passage will cause an increase in drilling activity and additional supplies of natural gas.

We also foresee that without passage of this bill Congress will not again consider a natural gas policy act for some time except in an extreme emergency, in such an event, the results could possibly be much more stringent control.

We believe that despite the shortcomings, this bill is preferable to the alternatives. We urge you to "support" the natural gas policy act of 1978.

JOHN B. BROCK, III.

---

Senator WENDELL H. FORD,
*Dirksen Senate Office Building,*
*Washington, D.C.*

CORBIN J. ROBERTSON, Sr.

---

Senator WENDELL H. FORD,
*Capitol Hill, Washington, D.C.*

It is our understanding that the natural gas pricing compromise, which has recently been signed by the Senate and House conferees will come before the Senate soon. This bill is of vital importance to Alaska and the nation's economy. Since the price of Alaska North Slope gas is determined by this legislation, the Alaska gas pipeline project will be substantially delayed unless an early decision on pricing is reached. The pending legislation would provide a pricing arrangement which assures marketability of the gas in the lower 48. Without this rolled in pricing mechanism in the gas compromise bill, we are deeply concerned that the project sponsors will find it difficult. If not impossible, to obtain financing for the project. The Prudhoe Bay pool accounts for approximately 10 percent of the nation's domestic gas reserves. Production of this great resource and bringing it to market would reduce oil imports and help stabilize the value of the dollar. On behalf of the member firms of the nonprofit Fairbanks Industrial Development Corporation that provide more than ten thousand local nongovernment jobs. We urge you to pass the energy bill and help bring Alaska's much needed gas to market.

WILLIAM R. WOOD,
*Executive Vice President.*

---

Hon. WENDELL H. FORD,
*Senate Office Building,*
*Washington, D.C.*

DEAR SENATOR FORD: A and P urges your support for the natural gas legislation (H.R. 5289) which is scheduled for a vote during the week of September 11.

We appreciate that some of the provisions in the legislation are controversial ones.

Although not perfect, passage of this compromise legislation now would be, in our

opinion, a step in the direction of a more comprehensive, coordinated energy policy.

From the perspective of the food industry this legislation is important to all phases of agriculture from seed to table in that it insures the availability of reasonably priced natural gas for agricultural users during times of shortages.

Respectfully,

THOMAS K. ZAUCHA,
*National Director of Government Affairs.*

---

Sen. WENDELL H. FORD,
*Dirksen Senate Office Building,*
*Washington, D.C.*

Re: Compromise on Natural Gas Bill.

This is to convey to you the endorsement of Associated Industries of Kentucky of the compromise that has been hammered out on natural gas deregulation and to urge your support of same.

While the committee compromise falls far short of our desire for complete deregulation, it seems to be the only step that it is possible to take at this time, because of the various pressures that are at work.

Lest it seem a little strange that an organization representing employers would favor something that might entail some cost increase, I should explain that our members are sophisticated enough to realize that continued, steady availability of supply is equally important . . . and that the interplay of market forces themselves will result in a fair price if those forces are allowed to work.

In this connection I have heard both producers and users alike complain that government interference years ago caused much of the problem in the first place.

At any rate, this is to express appreciation for the work you have done to get SOMETHING accomplished and to let you know that AIK backs the compromise despite its shortcomings.

Sincerely,

S. RAYBURN WATKINS,
*President.*

Mr. DOMENICI. Mr. President, will the Senator yield?

Mr. FORD. I will be glad to yield. I have got some more constituents I want to get in here. They just keep coming. And I just want the Senator from Ohio to know we do have some support. Including the Bank of America.

I yield to the Senator from New Mexico.

Mr. DOMENICI. I want just a couple of minutes, and then I have to go to a markup, as the Senator knows.

Mr. FORD. I give you 2 minutes, without losing my right to the floor.

(Mr. HOLLINGS assumed the chair.)

Mr. DOMENICI. I just want to make a couple of comments about the statement of my good friend from Ohio. I say to my good friend—sometimes we agree and sometimes we disagree, on this floor and in committee; on this issue we very seldom agree, obviously, but I wonder if the Senator asked the economist whom he quoted, Mr. Janeway, what would happen if we had no bill. I wonder if he asked him would we be better off if we followed the approach Senator METZENBAUM wants to take on natural gas.

That is the issue, no bill or the kind of bill he wants, which is another 50 years of regulation of the marketplace by Federal bureaucracy, and then, at the same time, he wonders why we are not doing things in other energy fields, when it is well known that in the American economy you cannot perform miracles.

When natural gas is three or four times cheaper than solar energy, you expect Dr. Schlesinger, out of the Department of Energy, to have the American people buy solar energy, and then you get up here and complain because he is not producing it.

The issue is not whether or not someone is interested in solar energy or geothermal or coal. The issue is that we have a natural gas policy in this country right now that totally distorts the interstate market, and you know it distorts the price, diminishes the research, and cuts the production, and yet you want the other sources of energy to come on board and compete with it, when it is the cheapest energy, a good three times as cheap as electricity produced from coal.

But you stand here and say, "I have asked the economists if this bill will solve the financial problems of the world." Of course it will not, all by itself. But the real issue is, does America need an energy policy? That is one. The second is, is it significantly better than the one we have? The answer is yes. Those are the questions that should be asked.

And, since you are an opponent of this measure, you ought to lay your proposal for natural gas before us, and then ask them what they think of what you like. If you asked them what they thought of your approach, they would probably say it is ruinous, and that with that plan we will never bring the other sources on line.

When we in conference had a political position to adopt deregulation and a political position to adopt several regulatory schemes, and when we felt conscience-bound to produce a bill for the American people that, somewhere in the middle, protects the consumer and will bring new gas on board, if regulation is going to be there for this whole period—it can be there for 9 years after 6 months, we know, and you know that; and if that is working, you know that 9 years is plenty of time for Congress to take another look.

What I am suggesting is that it is very easy, with no alternative proposal, to ask people to be critical of this one, but it is only fair that you ask those same people about your proposal, what you have in mind for natural gas pricing for America. Ask those same people what they think about your ideas on it. I am sure you would get a very positive answer about it being ineffective, about it doing nothing for the American dollar, about it doing nothing to bring other energy on board. And I assume all of those combined would be good for the American dollar. I assume they would say, "Oh, that will have a great beneficial impact on the problems we have in this country."

The facts of the matter are that we have to do something, and in this body and the other body we can only do the doable. We cannot perform miracles. Somewhere in between those two political positions represented here on the floor, one by you, who seemed to love the idea that the Federal Power Commission ought to fix the price on every bit of gas that comes across this country—24,000 cases pending before that body now, with little ideas on abandonment, certification, and pricing, and you stand up and say this bill is too complicated.

Let us talk about solar energy for just a minute, and then I will sit down. You criticize the Department of Energy for not bringing solar energy on board.

The last report produced by an independent body on solar energy said the only way to really bring solar energy on board, in an abundant way, I mean, is to price natural gas today at its present-day value, and to get rid of all the vintaging, that is, bringing old gas on and rolling it in with new. They said if you did that, you would have solar energy in abundance.

Do not misunderstand; I am not here advocating that, because that is about as silly a political approach as anyone can have; but what they are saying is that when you mix old 9-cent, 10-cent, and 30-cent gas with new $1.40 gas, the price is still too cheap for solar energy to be brought on. It is not fair to stand here and say that research can solve that problem, that the Department of Energy can solve that problem. You are standing here criticizing the President for saying that industry is going to pay more for natural gas. Is that not what you want, if you want them to convert to coal? You expect them to convert to coal as we con-

tinue the present policy of letting them buy that rolled-in mixture of old and new natural gas, and just burn it at that cheap price?

What will bring coal on for American industry? The coal conversion bill plus this bill, which will make their gas higher, and yet leave the residential user at a lower rate. That will bring coal on probably faster than anything else.

I conclude by just saying this: You know you and I agree on many things and disagree on many others.

Mr. FORD. Mr. President, will the Senator yield to me for an observation as relates to solar energy?

Mr. METZENBAUM. A point of order, Mr. President. One Senator may not yield the floor to another Senator.

Mr. DOMENICI. I will yield for a question to the Senator from Kentucky.

Mr. FORD. Do you know the position of the solar energy industry on this legislation?

Mr. DOMENICI. I do not. I would suspect they favor it.

Mr. FORD. They do, and I have a statement here which shows they support the natural gas bill, that the solar energy people are very much for it.

Mr. DOMENICI. I would suspect that, and it seems to me they might even have favored total deregulation, because they are very much aware of the fact that they cannot get into the marketplace until the price of gas is somewhere near its replacement cost.

I think one thing in the President's energy message, one point that he makes that has been overlooked rather frequently—and I am not one to say that that entire 481-page package on energy was a good package—but there is one statement in it that we ought to put at the top of the page, and as we go through these debates we ought to remember it. The President made one bold statement. He said, "Sooner or later, and the sooner the better, the American people are going to have to pay the replacement cost of energy."

That was the goal of his entire energy package. We cannot do that overnight. We cannot do it next week. We cannot do it in the field of natural gas in 2 years. It is politically not doable. But basically what this bill is trying to do is say that at the end of 7 years, or 8, or 9, we will be getting close, for new natural gas, to its replacement cost. And as soon as we can get there in every field of energy, and only then, will the alternatives we have been waiting on for so long in this country come on board.

Let me conclude by saying this: People ask, "Why don't we convert that shale up in Colorado and Utah to crude oil, and use it?"

(Mr. METZENBAUM assumed the chair.)

Mr. HOLLINGS. Mr. President, will the Senator yield?

Mr. DOMENICI. Let me finish this one thought, and I will be delighted.

The Senator wants to criticize the administration, the Department of Energy, and industry for not bringing that shale on board.

It is just this simple: The lowest estimates are that it will cost $20 a barrel; the highest estimates are $22 or $23 a barrel, against the price of old domestic crude oil, which is frozen at $5 a barrel, with new crude oil at $12 and $13, and imported oil at about $15. Are we going up there and produce that shale at $22 or $23, against those prices? Who is going to take the risk of producing it, to assure that it will be used? And we have the same pattern across the board, as far as the use of alternatives is concerned.

Until those two basic energies have some common sense approach attached to them, America will continue to be dependent on them.

I truly believe in the final analysis that this conference committee report, with Congress able to watch it for 7 years, with the price of both inter and intra regulated at reasonable prices, will bring all the natural gas possible on board in those years. Whatever we bring in addition to what we are bringing on now moves us toward independence, saves crude oil, and ultimately saves the consumers of America billions of dollars because if they do not use it they use something that is now, today, two, three, and four times higher. Electrical energy from coal is at least three times as high as natural gas.

It appears to me the issue is not to be totally critical of this report, but to ask of those who are, what are they for? What constructive approach are they for? If they are asking economists and experts about this approach, then ask them about their approach and see what they say about it.

I am one who obviously had a difficult time with this bill. I come from a producing State. Eighty-five percent of our production is exported to other States. Out-of-State consumers continue to buy it there far cheaper than my own constituents can buy it in my State. And we continue to produce less and less for the interstate market as a result of price controls on the interstate market.

I believe this bill will bring gas on as fast as we can in the next 7 years, at prices that are realistic.

For those who have a criticism, about the only thing they can say is that it is complicated—and it is. But I remind those who are living under the existing law that it is certainly not absent and void of complications. It is not void of litigation. There are more lawsuits pending over the existing policy than almost any law in this land. There are more cases pending before this commission than almost any commission in history.

I do believe, after a couple of years, when some of the questions in this get shaken out, relying on our States to make determinations as they must under this bill, the independent producers will find that there is significant revenue in this for them to produce, and the American consumer is not going to be hurt. He will be protected by price, protected by more supply. I just honestly believe it is time for us to show our people and the world that on something as complicated as this grown people can agree.

I thank the Senator.

Mr. HOLLINGS. Will the Senator yield?

The PRESIDING OFFICER (Mr. METZENBAUM). The Chair recognizes the Senator from South Carolina.

Mr. HOLLINGS. Mr. President, I was going to engage in colloquy with my good friend from New Mexico. I had come in, obviously, to preside. But then I heard him talking about solar energy and then he picked up on a couple of other subjects with respect to crude oil and realistic prices.

It interested me when the Senator in one breath was talking about solar energy and a discussion relative to the fact that we ought to be bringing in more solar energy, or someone was blaming the Department of Energy for not bringing on solar energy. The Senator said that the way to do that, someone had suggested, was to go ahead and bring the price of natural gas up to its true value and not have this, and not take it 8, 10—I see the Senator's head nodding. The reporter cannot get that in the RECORD, but I would like to have it in the RECORD.

Mr. DOMENICI. I am nodding that that is what I said.

Mr. HOLLINGS. I thank the Senator. Anyway, you would not have that cheap gas. But, the Senator said, that was one of the politically silliest suggestions that had ever been made, just asking for the higher prices.

Then in a minute the distinguished Senator from Kentucky got up and asked, "Do you know who is endorsing this conference report? It is the solar energy crowd."

Does it not strike the Senator that that is the exact reason why they do endorse it, because of that silly political idea of just putting gas up to an exorbitant price?

Mr. DOMENICI. Absolutely not.

Mr. HOLLINGS. What was the silly political idea of not having what this calls for?

Mr. DOMENICI. What I was saying was that the report I was referring to says that the method of utility ratemaking in the United States as far as natural gas is concerned, for decades has taken into consideration for the consumer a mix of the new and the old, which is vintaged, as the Senator knows, and a few years later it goes up a few cents, but that is also mixed with that old, which is cheaper. So the ultimate price does not represent today's market but, rather, the mix of all. I said this report suggests the way to bring solar energy on is to do away with all of that.

Mr. HOLLINGS. By doing away with all of that, you mean doing away with the vintage?

Mr. DOMENICI. Vintage, on all the old. I am saying that that is not in this bill, that is not doable. No one ever suggested deregulating old natural gas. That is what I was referring to as being not doable. Obviously, this moves in the direction for the future, I say to my good friend, 10 or 15 years out, in a direction that obviously they would prefer we move in to bring on solar energy. It is only in that context that I referred to it.

Mr. HOLLINGS. I understand. At least the Senator from New Mexico and the Senator from South Carolina agree that

it would be a silly political idea to deregulate old natural gas.

Mr. DOMENICI. Absolutely.

Mr. HOLLINGS. If we read this conference report on what they describe as new gas, I can show you a lot of old natural gas that becomes deregulated.

Mr. FORD. Name one.

Mr. HOLLINGS. Well, I can get all of these definitions by siphoning and everything else.

Mr. FORD. Does the Senator know how many categories of natural gas we now have on board?

Mr. HOLLINGS. How many are there in the conference report?

Mr. FORD. Seventeen.

Mr. HOLLINGS. Seventeen.

Mr. FORD. Does the Senator know how many are on board now? At least 700.

Mr. HOLLINGS. That is right.

Mr. FORD. We are reducing it to 17. It seems like that would be a pretty feasible way to go. We are trying to reduce the cost of Government, trying to reduce the bureaucracy up here. We reduce it from 700 categories down to 17. It seems like that is pretty good.

Mr. HOLLINGS. I would say to the Senator from Kentucky it is not the numbers game that I am going to engage in but what really has been old gas, siphoning and putting another straw in the soda and characterizing that same old gas now as new gas.

Mr. FORD. No.

Mr. HOLLINGS. It is one of those 17

Mr. FORD. No.

Mr. HOLLINGS. Well, I have been reading the news reports. I used to be in this for many years. I know that they want to try to characterize as new gas. At least we agree on that proposition.

But why does the solar crowd come for the natural gas bill? Because they want gas priced up so high—and I am back to my original points—that it makes solar energy cheap. That is the first point.

The Senator was talking again with the expression that we were going to save crude oil. Does the Senator from New Mexico really think that is the purpose of the natural gas bill, to save crude oil? I heard the Senator from New Mexico just a minute ago in his closing comments remembering the President a year ago going to war or the moral equivalent of war, and everyone to their battle stations. He said it was not going to save any crude oil. Does this not change that completely? We have a gas bill in order to save oil. I wonder does the Senator, since he is from a producing State, think we have domestically more oil left in the United States or more gas left?

My point is, are we trying to conserve gas with a gas bill or are we trying to conserve oil?

(Mr. METZENBAUM assumed the chair.)

Mr. DOMENICI. At this particular point, we are saying that if this bill works as planned, it will produce somewhere between two and six trillion cubic feet of new natural gas that would not otherwise be produced and, to the extent that industry uses it instead of imported crude oil, our estimates are that we would use about a million barrels a day less of crude oil.

Mr. HOLLINGS. I thank the distinguished Senator, because that is one of the big changes that I think comes about in the mind of those who have been dealing over the years with this particular problem. Until this conference report hit this Congress, we never had that idea in mind in either House, that we are going to save crude oil. There is a geologist named King Hubbert, whose work has finally been recognized and who received the Rockefeller Award in July. He estimated that we had in the vicinity, give or take 5 years, of a 25- to 35-year supply of gas left in the United States—onshore, offshore and domestic gas, proved and unproved. And if you meaned it out, a 30-year supply of gas, and about a 45-year supply of oil; that it was finite.

The whole thrust of the energy policy that you and I have been trying to promulgate here on the floor of the U.S. Senate was one of conservation, it was one to save—not to get what they called a realistic price, or what the solar crowd would call for as a realistic price. What is realistic to them is so high that it is uneconomic. Solar is pretty good except for the economics of it. Everyone knows that. But if you can get it up high enough, you can go in, as the Senator was just talking about—tertiary recovery, shale, or everything else, $22 a barrel oil. Is it the Senator's intent to get the gas up so that we make economic then the recovery of shale oil at the cost of $22 a barrel? Is that the new policy?

I am beginning to wonder. That is what is bothering me. I did not bring my notes—I shall have to get up a talk on this. But, it seems like the poor general has battle fatigue. He has lost the front line. I am talking about the conference committee and the President having gotten battle fatigue. They have lost the front line and they are turning now and firing on their own troops.

Last year, when the President submitted that particular program, it was going to conserve gas. Now, we are forgetting about the conservation of gas and we are, all of a sudden, going to conserve oil.

I am glad to yield.

Mr. FORD. The Senator must know that the Alaska pipeline is in this piece of legislation. If it goes down, then we have the problem of trying to have another piece of legislation. Otherwise, if it continues as it is, we shall get a trillion cubic feet a day down to the Lower 48. That is bound to give some stimulation to the reduction of sending our money overseas. I do not believe the Senator wants to send any more of our money overseas to foreign countries.

Mr. HOLLINGS. That is clever. I always hear my Senator friend from Kentucky say he is not a lawyer, but he sure acts like one. He has changed the subject. If we want to worry about the money overseas, I have asked the President personally to act on this, by letter, in the office, and on the White House tennis court——

Mr. FORD. Oh, the Senator plays tennis?

Mr. HOLLINGS. Yes, I get there. We hit them.

I said, please impose an excise tax on imported oil. I have asked for that. If the Senator wants to try to reestablish the value of the dollar, and cut out the outflow of American dollars and everything else, fine—but let us get back to gas and not the pipeline and the dollar situation. I want to get back to where we were starting on a gas bill for this country.

Mr. FORD. I want the Senator to understand that I am talking about the gas pipeline now, not about the oil.

Mr. HOLLINGS. I know about that.

Mr. FORD. I want to be sure that he understands that he is talking about gas and I was talking about gas.

Mr. HOLLINGS. We can take care of that. Do not worry about the Alaska pipeline.

Mr. FORD. We are not doing it very well. It is in this bill and that is about the only way it is going to be done.

Mr. HOLLINGS. Oh, no, we have all kinds of ways to take care of that. If we waited on this bill to take care of anything, we would all be dead and gone. This bill the Senator is talking about has done absolutely nothing. We seem to be moving at least in the right direction. Let us talk about that.

The right direction, because the Senator from New Mexico is a most reasonable fellow and he should have been here in the day and time when we had the Phillips 66 team and we had the dollar-an-mcf natural gas—just 3 years ago. Let me fix in the Senator's mind right here and now what it costs for gas, the most expensive gas. My friend talks of the Alaska pipeline. I have something even more expensive than that: Algerian liquefied natural gas. They bring it all the way from Algiers. Do you realize that? They are doing that right now. And after they liquefy the gas and they bring it in by way of vessel——

Mr. DOMENICI. Why do they bring it?

Mr. HOLLINGS. They can really sell it cheaper. Ha, ha, ha, the Senator asked the wrong question. The Senator wants me to say because there is a shortage. Oh, no. Oh, no, they are going to bring it in, I say, because it is cheaper than the Senator's New Mexico gas. That is why they are bringing it in.

The Senator has tripped up now. Let me give him the story. I am going to tell him. Southern Natural out of Birmingham, Ala., has a long-term contract with Algiers. They liquefy that gas and get it for $1. The transport cost to Savannah, Ga.—if that fellow keeps whispering, the Senator cannot hear—costs them 30 cents. Then they bring it back to the form of its gaseous state and put it back in the pipeline and deliver it to South Carolina today for a total cost of $1.60.

Somebody write that down—$1.60 for Algerian gas and this crowd comes out, what a great compromise they have, at $1.93, and they wonder why people oppose a conference report of this kind.

We are taking foreign gas into the country, bringing it in costly tankers into the ports of the United States of America, gasifying it and putting it in the

pipelines, and selling it for cheaper than this starting point. That is my problem, the conference report. That is why I say to do nothing is a good policy rather than to accept the conference report.

That is why I say, do you know, Senator from New Mexico, that we picked up the shortage? They are talking about the emergency. We picked it up with a better Federal Power Commission, with the new group that went over there. (I hate that name, FERC—Federal Energy Regulatory Commission.)

When we got Mr. CURTIS and his crowd over there, they cut out a loophole. And when they cut that loophole out, they actually brought in gas by administrative procedure. But talk about the 24,000 cases. Take the conference report and we will have 224,000 cases. We can all retire and be gas lawyers, I can tell you that right now.

But let us not get off on that subject. Let us talk about just producing gas with proper administration. They closed that offshore gas coming in and being treated as intrastate gas in Texas and Louisiana. Now we have in excess of what we had with the shortage two winters ago, when we put in S. 2410, the emergency bill. They are on both sides. That is your bill. That is in the other side's bill, which wants to defeat the conference report and recommit it and have the United States continue on its present policy at $1.46, with every right to come in for inflation and everything else, and with the stated purpose and conviction that we are going to conserve gas in this country and stated no later than last December by the Secretary of Energy, Mr. Schlesinger, that all of our $1.75 would not bring in an extra mcf of gas.

Where we differ, the Senator's formula and equation and the Senator from Kentucky's formula and equation, the bigger the money, the bigger the gas; the more the money, the more the gas.

That is not necessarily true. We reach a plateau where only so much gas comes in and the rest of it is windfall. We have a pretty good idea what windfall there is because we have got the testimony of those in the gas business.

In 1972, the principal witness for the gas industry was testifying. He was Mr. Richard A. Rosan, senior vice president of Columbia Gas Systems, the largest integrated natural gas system in the United States. At that time, the industry was recommending that the price be increased from 26 cents to "35 cents to 40 cents." But I was trying to learn what effect the bill would have at 26 cents:

Senator HOLLINGS. Suppose the price stays the same and you pass this bill?

Mr. ROSAN. At 26 cents?

Senator HOLLINGS. Yes.

Mr. ROSAN. The area rate?

Senator HOLLINGS. Yes, and you pass this bill. How much more exploration would we get in your opinion?

Mr. ROSAN. I think there would be more exploration. Of course, there cannot be until we get more leases by the Federal Government because there are just a few places to drill. But I think that standing by itself it would increase the incentive to explore for gas. I have no way of giving you a better measure than that, sir.

Senator HOLLINGS. Increase it substantially, or minimally, or what?

Mr. ROSAN. I would say significantly.

So, when I come to the floor in 1978, I have a certain historical feel about it, from those hearings and going back even to the hearings I chaired in 1967, following the blackouts and brownouts. I have been talking and others have been talking about the shortage and conservation and pricing, trying to find where is that price level at which, like the Mafia, they cannot any longer refuse it but would have to bring it in? And where, over and above that price, is there a windfall?

Now that price has gradually gone up, of course. But in 1972, we were told that exploration could increase significantly at 26 cents an Mcf. Today 6 years later, the industry refuses to agree to many times that amount.

The Senator is updated on these figures. What is the average price of interstate gas in the pipeline today?

Mr. FORD. The Senator is doing very well; I will let him quote his figures.

Mr. HOLLINGS. All right. I would like to be accurate. I think it is slightly over $1. I think intrastate used to be $1.30 only a couple of years ago, about 18 months ago, about $1.30. That is up to about $1.60.

I think that is where, again, the $1.60 comes out with the imported gas in the intrastate, that both are around $1.60. That is what makes this economically possible.

Mr. FORD. I know the Senator wants to be correct.

Mr. HOLLINGS. Now we should be corrected.

Mr. FORD. No.

Mr. HOLLINGS. I appreciate it.

What is the average price of interstate gas?

Mr. FORD. The Senator is confusing average prices and new prices.

Mr. HOLLINGS. No. Average. I never did mention new.

Mr. FORD. Well, the new price there is $1.33 or $1.45. That is for new gas, not the average price in the interstate pipeline. I do not have that figure, but I will get it for the Senator.

Mr. HOLLINGS. Average is the new and the old.

Mr. FORD. Correct. But the Senator is talking about the $1.30 and $1.40 as if that is the price.

Mr. HOLLINGS. Yes.

Mr. FORD. Now, average interstate, in my judgment, is around 90 cents.

Mr. HOLLINGS. Less than $1.

Mr. FORD. The average intrastate, somewhere around $1.

Mr. HOLLINGS. Intrastate has got to be above $1.

Mr. FORD. No, average. The Senator is talking about new price. $1.80 is the new price and the short-term contract intrastate.

Mr. HOLLINGS. I remember something, just by way of memory——

Mr. FORD. Mine is not very good.

Mr. HOLLINGS. Yes.

We went into the intrastate market and were pleased to get $3 and $4 gas in the emergency. At that particular time, contracts were being made below that, obviously, but the average intrastate price was about $1.30. I think it is over that, up around $1.60 now.

Mr. FORD. The new gas we take intrastate now is about $1.80. It has fluctuated somewhere between that and over $2, and this is not—nonregulated gas.

Mr. HOLLINGS. Right.

Let me try to complete a thought because I came and I was listening, and we started talking about saving crude oil.

I am looking for a gas bill that will save gas. That is what I am looking for. I know supply is finite and I know that the energy market should be competitive.

I wish we had a Secretary of Energy and Administration that would carry out its promises. When I understood the President was promising the Senator from Idaho a breeder reactor, I said, "Well, I ought to be able to get something for my vote."

So I thought perhaps I ought to get a promise he would carry out his promise for horizontal divestiture, because this gas bill is not a linchpin or centerpiece for the international charade, or whatever he is talking about. It is one of the important, substantial factors in a national energy policy, if the national energy policy can possibly be promulgated, in part, by this Congress. We participated in the offshore drilling bill, the conservation bill, the automobile fuel economy bill that I coauthored and which is now part of the law under the Energy Policy Conservation Act of 1975, the coal conversion bill, the refurbishing of our railroads, the prohibition against the waste of natural gas under boiler fuel use, the excise tax or fee on imported oil, and a natural gas bill, all culminated into what we call a policy.

But let us not come with a gas policy talking about saving oil, and let us not eliminate the competition, the little that does remain.

I remember as a governor when we used to, as Governor Ford would, solicit industry and try to bring it to our State. The cost of energy was one of the competitive factors, along with the industrial base, wage scales, productivity of the workers, the business climate, the balanced budget of our General Assembly. All these things we used to consider. Oil was the most expensive, coal the second most expensive, and gas was the cheapest fuel.

In fact, I wish someone would go and find out what the cost of natural gas was from the North Sea.

I have a Senator from Louisiana friend and every time he gets a group in, he starts digging way down. He says, "These are not 500 or 5,000 foot wells we are going into now. He shakes his head, and says, "We are going down 10,000 and 15,000 feet, and going down costs money."

Then everybody jumps around—it costs money. I want them to go down into the North Sea and find out what the British have got and factor it out for as the cost of an mcf. It used to be 26 cents. There might be some inflationary rise.

However, talking about the competition we are in, they want to eliminate competition. They are trying to dicker around with crude oil. They have given an unrealistic price that was not in the President's word, I believe, when he said it last year. They are not going to bring in an additional mcf of natural gas.

I went home, and everybody was making speeches about proposition 13 and

inflation. Nobody wants to talk about inflation, including business. They do not want wage controls and price controls. But this would be one of the biggest reasons I know of for fueling our inflation.

This is the biggest inflationary bill we have had this year, I say to the Senator, and I say that respectfully. If inflation is on the Senator's mind, he and I are going back to the Budget Committee again at 3 o'clock this afternoon. We are trying to hold back and cut the budget. We took President Carter's $60 billion deficit in January and cut it in the first concurrent resolution to $50.1 billion. In the second one, which we are working on, we are to bring it down to $42.3 billion. The Appropriations Committes and their subcommittees are cutting.

I do not know where the Senator from Wisconsin stands on this. I want to hear his talk on inflation with respect to this conference report. I imagine he would be with us. He tries to be consistent.

I wish I had brought the Congressional Budget Office report. Talk about a bunch of children getting together—it is like the king who wore no clothes. He is just garmented in the most beautiful garment you could possibly find. They get the CBO to take prices that go jumping, zooming up.

If we take the Senator from Kentucky's figure of 90 cents for interstate and a little more than a dollar for intrastate, and let us talk of the dollar right now, they want to carry it, bam, with the bill to $2, and if they have CBO write me and say that is not inflationary, that begs the commonsense and judgment of all of us. We just take judicial notice that the report is not worth reading. We will get with those economists, Mr. President, in the Budget Committee. I listen to all these economists. On the one hand, you follow them, and it is like drawing a line in the dirt, and they have my attention. About the time I understand it, they say, "But on the other hand." All my life I have looked for a one-armed economist. Somehow or other, that crowd always has been wrong. It is that little Annie song: "Tomorrow, tomorrow, you always are a day away."

All I knew was that when they came in January, whatever they said in the most persuasive fashion was going to be wrong. I did not know how to guess what was going to be right, but I should have guessed it on inflation. When they said 6 percent, I should have doubled that in my mind and said 12 percent; because it is nearing that right now, Senator, for this year. The Senator and I had to listen to those economists.

The Senator from Washington (Mr. JACKSON) has worked on this. I would like him to come and tell me how this dollar going up immediately to $2, and in the next several years to more than $3, is not inflationary.

I think the inflationary cost has been estimated to be almost $29 billion on up. I know that the President was using the $70 billion figure last year, when we were talking about conserving gas; and that had come out of not the CBO but the Library of Congress or the Congressional Research Service, one or the other.

Let me get back to a conference we were having on the Interior Department bill. It just came about in my little time here as presiding officer. I beg my colleagues, as they consider this measure, that we get back to the fundamentals. Gas is short in this country. We will have to do our level best to stretch it out and give time for solar energy to develop, which we favor, and nuclear and all the alternative fuels. We are the only industrialized country, along with Canada, that has gone nuclear.

According to this morning's newspapers, the Shah of Iran has troubles, but he is thinking years ahead on energy. They are building light-water reactors and reprocessing plants.

All you have to do is go to the people who have the oil. They know it is not finite. They would not legislate a conference report of this kind, which is sold on the basis that we are going to consume more gas and therefore save more oil.

I never before heard of that in the entire debates we have had around here for the last 12 years. They are off on the wrong track. I said earlier that they lost because of battle fatigue on the front line. They have turned and they are firing on their own troops. I do not know why. I think the gentleman is confused.

Let them go ahead with an excise tax on imported oil; let the Federal Energy Regulatory Commission continue to administer. The old Federal Power Commission never did take cognizance of the additional cost for rediscovery when they set that price of the cost of gas plus a 15-percent guarantee.

No one has lost money on natural gas in America—no one. I made money on it. I made money on this—more on gas than anything else. It is a delightful investment, Senator. The Senator should try it sometime. It is really windfall. It is delightful. No one has lost on this.

Let me go back to the proposition that we are trying to save the gas, that we are trying to get a realistic price, as the Senator says, when you are up with a new Commission now that has it at $1.48, when the Commission will now include the added cost of exploration and replace that new gas that is being sold—in other words, take cognizance of inflation—plus the guaranteed profit.

Whether it is $1.60 or $1.75, there has been good debate. The President was anxious. He thought in April, when he gave that much, that it was over and above the $1.40 that the Federal Power Commission had at that particular time; and he knew it was 75 cents over and above the $1 that the gas people were talking about only 18 months previously, which would bring in all the gas.

So, like me, he thought he was making them an offer they could not refuse. But there it is. We have reached that price, and now we have come and broken ranks and put in an administrative hiatus, so that instead of 24,000, it is going to be 224,000 regulations. Instead of actually increasing the production, it would stultify and award withholding.

If I am Hollings Natural Gas—and everybody will say that is a good name for me—if I am Hollings Gas, Inc., and if I know that if I hold my gas back and next year I am going to get an increased price, and get even more the following year, then I am not anxious. I did not organize the business to go out of business in 30 years, and we could be running out of gas. So I am going to have to start getting the highest price possible and looking for diversification.

So the present conference report, sold in the name of conservation, really is going to cause increased reckless consumption. It was sold in the name of trying to be realistic and in the face of inflation would take care of that factor, but actually it is more inflationary than any other bill we will face on the floor of the U.S. Senate this year. It was sold in the name of a good measure that would constitute policy instead of administrative hiatus. It should not be called a bill or a policy at all. I hate to say it that way, but I am trying to be respectful.

I think the best thing we can do is recommit this bill and put it back out with the emergency provisions and any others that the conferees think would be necessary, if Alaska is in there, or whatever it is.

But I have one particular thought that the American people should really appreciate. Natural gas has prospered in America as the result of regulation. Back in the thirties they were burning this gas off in the noonday sun, and Sam Rayburn and the Texas boys came and said:

> Look, if you can protect our investment, the heavy costs of these pipelines up East, we will invest, but you have to protect that with a monopoly. We do not mind you fixing the price. We have to get a guaranteed profit. If you will regulate us and regulate everyone else, so our monopoly is protected, then we will go ahead with that investment.

And the Texas crowd and the Oklahoma group were the ones who came and asked for the regulation.

I ask, in a similar fashion, is there any electric utility back in your home town that, having gotten its monopoly and certificate for public convenience and necessity, having built its powerlines and brought the electricity into the homes and industries around, developed the market and everything else, would walk into the Senator's office and say, "Now let us do away with the Public Service Commission and regulations and have what they call competition?"

What kind of competition is that? It would be a little bit of competition because they have some public and private power companies to cause some of it. But here there is none of it. And, on the contrary, we are regulated by the OPEC Congress, not the U.S. Congress. We do not have anything to do with this.

The Senator is asking us to come to the OPEC cartel. He is saying when they meet in December, let them set the price.

We have no input at all. They meet in those little tents with their hairdos, and they will come out and say 5 percent, 10 percent, whatever percent it is.

Mr. MELCHER. Mr. President, will the Senator yield?

Mr. HOLLINGS. No. I wish to get through with the thought.

When they get through all of that pricing, then we will all run dutifully back to the Senate Chamber and say:

Please, bring gas up to the price that the sheiks in their tents have set that would be realistic, that would be in the national interest, that would help the dollar and have nothing to do with inflation. It would be just a nice thing that we could finally get up to the OPEC cartel price.

Is that not a great policy? That is what they are asking us to do.

Mr. FORD. Mr. President, will the Senator just yield?

Mr. HOLLINGS. Can you imagine that as a national policy?

Mr. FORD. Instead of the Hollings Gas Co., it is the Hollings Theatrical Group.

Mr. HOLLINGS. No.

Mr. FORD. I want the Senator to know that the basic reason for this bill is to set the price for the next 7 and possibly 9 years so we will not get trapped in that way. But the Senator wants to let us get trapped. He wants us to go back free and open with the old bill.

Mr. HOLLINGS. No. As I understand the recommittal motion of the Senator from Ohio——

Mr. FORD. The Senator has not seen the recommittal motion because the Senator from Ohio has not put it together and no one knows what that recommittal motion is going to be. It is speculative.

Mr. HOLLINGS. We both looked at its elements.

Mr. MELCHER. Mr. President, will the Senator yield?

Mr. HOLLINGS. I am going to yield to the distinguished Senator in a minute.

I get the Washington Post, and the newspaper says he is going to move to recommit with the emergency provisions, and there is something else about an intermix, I think; but in any event it would put us to regulation. It would put us under the Federal Energy Regulatory Commission where we are right now, where we have abundant gas right now, where we have just increased the supplies, with the administrative rulings that they cannot commit that offshore gas to the intrastate market.

Excuse me. I yield now to the Senator.

Mr. MELCHER. I thank the Senator for yielding because I wanted to get in on the sheik part the Senator was referring to in purchases of natural gas.

Mr. HOLLINGS. Yes.

Mr. MELCHER. I was extremely interested in my office just a few moments ago listening to the distinguished Senator from South Carolina speak about a gas contract that Southern Gas Co. has.

Mr. HOLLINGS. That is Southern Natural.

Mr. MELCHER. Southern Natural purchased liquefied natural gas based on a contract from Algeria where the total price was $1.60 per thousand cubic feet, and a very attractive price that is for liquefied natural gas.

I checked to find out when the contract was signed. It became effective in 1970. That is almost ancient history in terms of natural gas contracts. That is when oil was selling at $2.50 to $3.25 a barrel.

Now the whole energy deal has changed. That for natural gas from Algeria was signed at 30 cents per thousand cubic feet FOB Algeria with the additional costs of liquefaction and transportation bringing it to $1.60 delivered in the United States.

To build facilities that are necessary, to contract for natural gas now from Algeria, Saudi Arabia, or any other Arab country, is going to put it into the United States somewhere between $3 and $4 per thousand cubic feet. That would be the case now to deliver liquefied natural gas from any other country in Africa, Europe or Asia.

It is hardly relevant to be talking about how nice liquefied natural gas is, when you can get it to the United States from Algeria and it only costs $1.60, based on a contract in 1970, when energy costs were a fraction of what they are now, and relate that to the existing costs of new contracts several times higher. That does not solve our problem now.

It does not. It is $3 to $4, if you want to sign the contract today. If you want to sign it next year it is probably going to be higher than that for liquefied natural gas delivered to the United States from another contract.

Mr. HOLLINGS. I appreciate the Senator's question.

Mr. President, I do not want to infringe on your good nature much longer. I am supposed to be there presiding.

Let me say this to the distinguished Senator from Montana: I do not know why, when we are talking about the average cost and talking about energy, we do not take into account gas contracts which are all for 20 years. When you go home and if you use gas in your home in Washington, Langley, Va., Maryland, wherever the distinguished Senator lives, and you turn it on, it is under a 20-year contract. I am willing to make a bet on it. I am willing to bet—I do not know what year it is in—they might have made it just last week—but if he had to talk about averaging that was made over 10 years ago, it is all very relevant. All of this is relevant. Do not worry about that 1970. Did they tell the Senator since he ran over here so dutifully? That gas crowd is pretty alert. They send someone over right away. I am glad to meet the gentleman. Let me just say this: Did they tell the Senator how long the contract ran?

Mr. MELCHER. I say to the Senator from South Carolina that is a good price and that it probably runs for at least 20 years, but I hope it is longer for the sake of the consumers who are going to use it.

Mr. FORD. I have the information in the Chamber. No gas company came to call me. I have been sitting here with the Senator. I have all the information. It is $1.66 to $1.81. It was in 1969 for 25 years. What is the next contract? Does the Senator know of the next contract from the same people he was talking about? He does not know about that. It goes to $2.82. That is the same people, the same contract, only the contract is in 1975 for only 20 years.

This is what the Senator has been talking about. I hope that he would get his facts straight.

Mr. HOLLINGS. I have my facts straight.

Mr. FORD. I have them here.

Mr. HOLLINGS. Do not tell me about the facts. Whether the Senator liked that or not, the president of that company and gentlemen came in my office and told me those facts I have given.

Mr. FORD. $1.66 and $1.81.

Mr. HOLLINGS. I do not care what the Senator is reading from.

Mr. FORD. I admit those. The Senator does not go to the next phrase.

You do not go to the next phrase.

Mr. HOLLINGS. Do not take me to the next phrase.

Mr. FORD. No.

Mr. HOLLINGS. There you go, lawyer Ford. You say you are not a lawyer, and here you are on another phrase.

Mr. FORD. I said $1.60, Senator.

Mr. HOLLINGS. Wait a minute, the Senator from South Carolina has the floor. It is piling on another phrase, and he is going back to the year 1970, and I am going to try to keep up with both of you as best I can.

Mr. FORD. The Senator quoted $1.60 himself.

The PRESIDING OFFICER. The Senator from South Carolina has the floor.

Mr. HOLLINGS. The $1.60 is the price, and I have not misquoted the President.

Mr. FORD. And I said the Senator has not.

Mr. HOLLINGS. The Senator from Kentucky says he agrees with that.

Mr. FORD. I agreed with that in the beginning, Senator.

Mr. HOLLINGS. All right, wait a minute.

Mr. FORD. In 1969, 25 years, I agree with that.

Mr. HOLLINGS. We will go to other phases.

Mr. FORD. I agree with the Senator. I did not dispute his word. I said he was accurate and correct, so now do not blame me for getting off.

Mr. HOLLINGS. All right. Let us stick to the facts and let us stick——

Mr. FORD. That is what I am trying to do is get the Senator to stick to the facts.

Mr. HOLLINGS. What we are really trying to do—and, Mr. President, I will yield in just a minute so I can get back there—I thank the distinguished Presiding Officer for this opportunity.

Natural gas is an awfully complicated subject, and obviously you have got to keep up with the various nuances and changes and policies and everything else. I am trying to impart in some way a feel to the particular debate relative to how we got regulated at the request of the gas industry, how the regulation has worked extremely well, extremely profitably. Many a company stretched its luck on interruptible contracts that made just that, interruptible contracts. Let me cite another particular incident. When we had the emergency a couple of years ago I went to a conference of business leaders in my State and there was one particular gas company president, the

president of Piedmont Natural, who insisted that the allocation for South Carolina had been diverted to New Jersey, and the reason for the shortage in South Carolina was a political decision by the diversion of the Federal Power Commission of South Carolina's gas up to the State of New Jersey.

He went on and on. He did not want to admit that he had made some contracts that were interruptible, and at times of shortage they were interrupted. They were not firm contracts. The average contract in the Northeast is firm for a shorter term. They are not for as much gas. They do not rely on it as much as we do in the Southeast, but in the Northeast they have got firm contracts, and when you have to cut back, their firms apply almost like a hospital contract.

We had many interruptibles, a lot of new industries, and they make a lot of new contracts, they wing it economically, if you might characterize it that way. But it has not been because of political decisions.

I had to stand him down and I said, "All right. we have got another company in this State, the Carolina Pipeline." They happen to deliver more gas than any other gas servicing company in the State of South Carolina. I told him I would be delighted to try to jump out of that window on the 14th floor if he could prove that Carolina Pipeline was curtailed a single mcf during the crisis, during the shortage, during the emergency.

Yes, we had cut back in my State. Was that political? Was that a defect of the regulation or were those business decisions they were trying to blame on the politicians?

Let us thank heavens that the regulation, in a sense, was complicated, because with that particular complication I can tell the Senator here and now maybe we have held back on excessive consumption, maybe as a result of the bureaucracy and administrative procedures we have not accelerated and facilitated more, and maybe in that inverted sense the Federal Power Commission has helped us to conserve.

Whatever the facts are, let us say we have got not more than 25 or 30 years left. Let us not come in with a bill or a conference report that promotes increased consumption, that promotes inflation, that promotes it when we are talking about regulation and, heavens, everybody has got in a bill, and we go back home and say, "I am against inflation; oh, yes, I am against inflation. I want you all to know I am working hard up in Washington against regulation."

Well, heavens above. in addition to being the most inflationary Senator from Ohio, you are right that this particular measure will constitute more regulation than all the other bills we will pass in the Congress this year. Everybody connected with it knows it, they know it from Senator JACKSON on down.

Mr. McCLURE. Mr. President, will the Senator vield?

Mr. HOLLINGS. I will be glad to yield.

Mr. McCLURE. I thank the Senator for yielding, because I wanted to make just two points in regard to what he had been urging: One, with respect to the concept of imported LNG. It is true contracts that were signed 8, 10, 12 years ago are relatively low-priced, but we have seen since that time the Federal Power Commission turn down an application for $2.35 LNG, and the renegotiated contract came in very much above that figure. The pending projects now are in the $4 to $4.50 per thousand cubic feet of gas for LNG projects. So if it is to be inflationary, it would seem to me it would be far more inflationary to place our reliance and our faith upon the uncertain sources of LNG from overseas at far higher prices.

With respect to the regulatory burden, I am not happy with the regulatory complexity of this bill, and I would like to get rid of it. But if you want to look at regulatory complexity, look at the existing law. You know this conference report has been criticized for having maybe 17, maybe 20, maybe 22 classes of gas. But we have several hundred classes of gas now and we will be adding at least one new class each quarter under the existing law.

So you are adding four new classes to the dozens, hundreds, we have now under existing law.

That is no great dream about doing away with regulatory complexity.

So I would share with my friend the desire to achieve more relief from the regulatory complexity, but we are not getting it under the existing law and we might hold out for a better one. But I suggest that, perhaps, some want one kind of a better law, another wants another kind of a better law, and there is not a majority in favor of either one, so a year or two or three from now we come back to about where we are now.

Mr. HOLLINGS. Mr. President, I thank the Senator for the question.

Now that we have assistants going out and getting these additional bits of information, let me ask the distinguished Senator from Montana and the distinguished Senator from Idaho to please go and learn, if they will, the cost of natural gas out of the North Sea. You all can run and get them. I do not know how the network works, but you can all run to the back and see if we can find out what North Sea gas costs.

Mr. MELCHER addressed the Chair.

Mr. HOLLINGS. Wait a minute, I will not yield just now.

Now, we heard about 1970 and $1.60. It is coming in now, but they are turning down $2.35. That is not disputed. This thing is inflationary as all-get-out. I am telling you what is happening right now. I am telling you what could have happened if we would have held the line on the cost of natural gas. I am telling you what could be the case if we could dispel the idea for some reason that gas ought to cost the very same thing as oil. I resist, I resent, that idea.

Why, amongst millions of reasons, I do not like that crowd I cannot control or cannot influence—the OPEC cartel—from setting that oil price. Once I agree to that premise that the price of oil ought to fix the price of gas, I am lost, I am finished. My good industrialized economy of the United States that does not have a wage advantage, does not have an hourly work advantage, does not have a safety advantage or social security or unemployment compensation or any of the other advantages, does have an energy advantage that has caused us increased productivity, it has allowed us to compete and, by Jove, I am tired of this crowd that does not want to compete on defense. They go around here talking about rough equivalency. I want to compete, I want to be in a winning position. When it comes to the economy I want to compete and I want to be in a winning position.

The other side is organized, they have mailouts and speakers and all the rest. I have not mailed out anything on gas or energy, and have not had the time. But the others are organized. I will never forget the Platt report.

Some 2 years ago, I went down to Houston to make a report, and Ed Bragg and others had sent out 200 speakers against me. They went to the Rotary, the Kiwanis, and everywhere else. We could not get through the Bicentennial without an oil company saying, "This is the way it was." They wrapped themselves in the American flag. The prices were going up. They had the airwaves, the newspapers, the Rotary clubs, the civic clubs, the national Congress all singing the same song: "It costs like the devil, and you better hurry up and get the gas price up to the oil level."

That is why I tested this, I resist it. But the conference report does it, and that is why I cannot vote for it.

I should congratulate you all for not agreeing to that. Let us congratulate the conference and the conferees, the distinguished presiding officer (Mr. BUMPERS) and others, for not agreeing to that for the last year, or 16 months. or whatever it is. They ought to get some kind of an award for resistance. Maybe they have got battle fatigue, too. I do not blame them. I would not have wanted to be on that conference: I readily agree to that.

They have changed Jim Schlesinger from horizontal divestiture now, and he does not care any more about competition. Where he said, "We are not going to bring in or even save any oil consumption," in April of 1977, now he says we are going to save a million barrels. Where he said that this was not the centerpiece, but the crude oil equalization tax provision was the centerpiece, now this measure becomes the centerpiece, and where it was not going to bring in a single additional mcf over $1.75, now all of a sudden it is deemed solely to be bringing in all the additional.

Where are our Senators in this thing? You cannot get enough Senators or staff to go around and bring all the facts to the American people.

Mr. MELCHER. Mr. President, will the Senator yield?

Hr. HOLLINGS. Yes, I will be glad to yield.

Mr. MELCHER. The Senator asked the Senator from Idaho or myself what the

additional price of gas in the North Sea would be.

Mr. HOLLINGS. Yes.

Mr. MELCHER. Let me say that the price for natural gas in the North Sea will be comparable to the price for natural gas at the wellhead for Prudhoe Bay natural gas, which is in Alaska, a part of our own domestic gas supply.

The fact of the matter is that with——

Mr. HOLLINGS. What is that price, Senator? I really do not know. I would guess at it if I had even a dim memory. I remember at one time they had a meeting of the bureau of the industry, back in 1969 or 1970, and the ministry met, and they were trying to fix a price for gas, and at the time they fixed, in the ministry in London, a 26-cent price, because that was the U.S. price.

If they were emulating the United States then, maybe they have emulated us by going up now. I seriously do not know, but I doubt if it is very high. I risked the question because I was willing to risk the answer. I do not believe it is very high; I do not believe it is any $1.93.

Mr. MELCHER. No, I would agree with the Senator; I think it is substantially lower at the wellhead than that.

The reason why I say it is comparable to Alaskan Prudhoe Bay natural gas is that British Petroleum, the owner with their subsidiary Standard of Ohio (Sohio) of about 51 percent or 52 percent of the Prudhoe Bay oil and natural gas, are also involved in the North Sea, involved with the Government of England, and so, when the gas price is established, in Alaska, I believe it will be comparable to North Sea natural gas.

But it is not going to mean a lot to our consumers if that natural gas price is established at around a dollar to a dollar and a quarter, at Prudhoe Bay on Alaska's North Slope unless there is a pipeline to bring it down to the lower 48 States. And we have gone through two relevant bills in the last several years that deal with this. The first of all had to deal with the oil pipeline, so the oil could be pumped down to tne Lower 48. Then we rather belatedly passed the Alaskan Natural Gas Pipeline Act, which was procedural, to allow the expediting of the permitting and the decisionmaking on where the selected and preferable route would be, and what method it should be.

El Paso, which was one of three companies making a proposal for that pipeline, was not found to be acceptable. They would have brought the natural gas down paralleling the oil pipeline to Valdez or some point on the coast of Alaska, perhaps farther down the coast, and then liquified it and then by tankers to California to put it into the pipeline distribution system of the lower 48 States.

But that route was not selected. The route that was selected, if we can get the Government of Canada and the Provinces to agree, and they seem to be agreeing, looks to be the most practicable. The route would follow the oil pipeline down to about Fairbanks, and then follow the Alcan Highway through the rest of Alaska, and then through Canada coming into the lower 48 States in my State of Montana, and then bringing it on east.

But McMillan's company, Northwest Alaska Pipeline Co., that has the preferred route, very sincerely tells every Member of the Senate—and I suppose every Member of the House, too—that without some change in the basic law that would permit rolling in the wellhead price with the transportation cost, into the eventual price consumers would pay, that without that provision enacted into law they cannot approach the money market to sell bonds to finance construction of their pipeline.

So, while the wellhead price when fixed for Prudhoe Bay natural gas may be a dollar or a dollar and a quarter, which is the best guess, I think. By the time it gets down here and you have rolled in the cost of construction of that pipeline to get it down to consumers in the Lower 48, I suspect we are talking about $3.50 to $4 or $4.25 per thousand cubic feet.

So we are back to the same position we would be if we would get gas from the North Sea or from Saudi Arabia, or more from Algeria: By the time you build the facilities to handle it, to liquefy it, and then to bring it to the continental United States, the Lower 48, and then go through the process of putting it back to the state of natural gas, we are talking about $4 per thousand cubic feet of natural gas, and that is what we talk about with Alaska, too.

The Alaskan natural gas would have the advantage of being domestic, and presumably could not be interrupted, whereas a change in government in Algeria, or some problem from Saudi Arabia with shipping, might cause liquefied natural gas to be interrupted.

We could mention war as another factor. God forbid any of these things happen, but there would be some comfort in knowing that if we are going to have consumers paying that kind of a high price for natural gas it would be more comfortable to know that it is domestically produced and would be under our control, and would help our balance of payments.

Mr. HOLLINGS. I thank the Senator from Montana for his observations and the Senator from Ohio, particularly, for his courtesy in yielding. Let me find out some of these facts and figures, and then I might come back again, if anybody else wants to debate this thing.

Mr. METZENBAUM. Mr. President, I enjoyed listening to the Senator from South Carolina so much that I hope he will be back. It was my privilege to relieve him in the Chair for the purpose of his remarks. I know he has been a leader in this battle over a period of many years, and it is not a new subject to him; and when his voice, his experience, and his knowledgeability on the subject are brought to the Senate floor, it has been extremely helpful, and I am particularly pleased that I had the opportunity to relieve him in the Chair so that he could come to the floor to make those remarks.

Mr. HOLLINGS. I thank the Senator very much.

Mr. FORD. Mr. President, I have enjoyed listening to the distinguished Senator from South Carolina for the last hour and 20 minutes. I do think I tried to agree with him a few moments ago about his pricing, but I did want to correct him. It seems as if it is a typical operation as we debate this piece of legislation to take whatever arguments benefit one side or the other.

I tried to agree with the distinguished Senator from South Carolina a few moments ago as to the price that he said was going into the pipeline from LNG. I wanted to bring to his attention that this was a contract that was signed in 1969. I have extensive information about pending LNG projects, including the receiving terminals, I have the producing country, I have the contract date and length of the contract, I have the amounts for the initial delivery date, I have the annual volume to be expected, and what the Federal regulatory status might be. I could have given him all this if he had given me some little attention to answer his question.

The distinguished Senator from South Carolina failed to mention that the new contract dated in 1975 for 20 years makes that gas go to $2.82. That is almost $1 more than the initial price for American-produced natural gas. I wonder what the Senator from South Carolina was trying to shield or what kind of smokescreen he was trying to put up, saying what a great thing it was.

Sure, I told him the average cost of interstate pipeline gas now was about 90 cents, and the average price of intrastate gas in the pipeline was something in excess of $1. But today if we go to the intrastate producing States, the new gas price is somewhere between $1.80 and $2.

It is all right to live in 1969 for your own purposes, but we have to live with 1978 and beyond in order to accommodate the constituents we are representing.

The Senator talked about withholding gas. The distinguished Senator mentioned "I am going to hold gas back. I have been in the gas business. I have made more money in the gas business than anything I have ever done."

Fine, I am glad the distinguished Senator from South Carolina is in the gas business, that he understands what natural gas is, that he is making money off of it, that he is making a profit. That is fine.

He said that less than an hour ago, that that is the most money he has ever made in his life, that he ought to quit the Senate and go into the courtroom and make more money than he is making here to argue the case under this bill.

Well, it is obvious that the distinguished Senator from South Carolina has not read the bill because this bill protects the consumer from producer withholdings.

You cannot withhold and get the new gas price. It is subject to a price penalty. The distinguished chairman of the conference committee, Mr. STAGGERS from West Virginia, said this was one thing that must be in the conference bill or he would never approve it. He got what he wanted. We said it was wrong to withhold natural gas.

He said he wished he had his facts with him and the papers. I wish he had had his facts and papers with him, too.

The Senator said he did not know what the Congressional Budget Office position would be. Obviously, he does not read the mail which comes to his office. Senator MUSKIE, the chairman of the Budget Committee, in that "Dear Colleague" letter, signed by some dozen or more distinguished Members of this body, quoted the Congressional Budget Office on the inflationary impact of this legislation.

I will quote from their study and their report, marked Economic Impacts:

Depending on the extent to which increased producer revenues are funneled into productive investments, the overall effects could be either slightly positive or slightly negative. However, in a $2 trillion economy the effect would be relatively small in any event.

That is what the Congressional Budget Office reported.

I wish the Senator from South Carolina were here to listen to these things. I hope he reads the RECORD tomorrow so that he can know these things.

He quoted one fellow—I could not quite understand him, but I think he said King Hubbert. Well, King Hubbert is known as a man who has made a report on natural gas reserves. He claimed he got the Rockefeller award. What is the Rockefeller award? I do not know whether it is a liberal award or a conservative award or a moderate award. I do not know. It sounds like a political award.

But King Hubbert said that the years of natural gas and oil reserves that were available in the future were based on the prices paid at the time he made the judgment.

That means that that was several years ago, like in the 1969 Algerian contracts.

I am not in favor of paying $4.50 to Algeria while they harbor the hijackers, and not paying the American producer to go out and try to find energy and keep our money at home.

The Senator from South Carolina brags—he stood on the Senate floor and bragged—about buying LNG in Algeria. I disagree with him on that.

The Senator from South Carolina, along with other Senators, is unaware today what will be in the recommital motion because those on that side are now calling around saying, "Would you be for us if we put in the Alaskan pipeline?"

They do not know what they are going to put in. They are going to try to get some votes.

It is just like the distinguished Senator from Texas said yesterday, that he was for letting them take away their intrastate gas. He said it on three separate occasions yesterday afternoon.

I do not believe that is going to be a very favorable prospect back home.

Mr. DOMENICI. Will the Senator yield for a question on the Algerian gas?

Mr. FORD. I would be glad to yield for just a few minutes. I was just beginning to get worked up. I thought I would try theatrics like some others.

Mr. DOMENICI. The Senator was speaking of Algerian and foreign gas. I could not agree more wholeheartedly with the Senator's last statement, when he said he was not for paying Algerians $4.50 for natural gas and paying American producers far less. The Senator should also remind the Senate that under this conference report that $4.50 Algerian gas is not going to get a break any more because it is not going to get rolled in with the American cheap, old natural gas, thus making it appear to be a good price. Because under this proposal, the only kind of foreign LNG like the Algerian that will get rolled in and get the benefit of all the years of our old gas is that kind for which approval is pending or has already been granted or the plants are already built, the expenditure made, or financial and contractural commitments made. In the future, they are going to bring that $4.50 gas in and it is going to be incrementally priced and it is not going to be such a bonanza for them to sit on the outside and mix it in with American natural gas and say, "The consumer does not know it because it is mixed in the rest and we will charge whatever we want."

That is another good point in this bill. The Senator from South Carolina should have been here to hear that point. That will not happen any more, either, in the future under this bill.

Mr. FORD. There are some questions that are in my mind that are bothersome. They worry me a little bit. How will the motion to recommit provide a wellhead price for natural gas transported through the Alaska gas pipeline? The conference report does so in section 109 of the bill.

How will the motion to recommit settle the incremental pricing issue? Under existing law, FERC could require incremental pricing for our Alaskan gas. The conference report provides rolled-in pricing for the Alaska gas pipeline under section 203.

So let us not do anything, let us just leave it as it is. I think this legislation gives stability to the industry. It gives stability to the industry so they will know what the price will be and they know what it is going to be when they go out and look for it. They know that they can plan 7 to 9 years in advance.

You know, Henry Clay was not a bad fellow. He came from my great Commonwealth of Kentucky. Henry Clay was a compromiser. I was told, in my days before I ever entered into politics, that you could be in a room with a group of people and those on the right side were just as dedicated, just as sincere, in one way; those on the left-hand side were just as sincere and just as dedicated, but in the opposite way, and somehow, if you make a political decision, you would make both sides mad, but you would help the general public. I want Mrs. Smith and Mrs. Jones in Ohio or Kentucky or New York or Massachusetts, or wherever, to be able to turn her stove on, heat her soup, and cook her meal for her family at night, knowing that this Senator and others have made a sincere and dedicated effort to say to the smallest wildcatter in this country or the largest producer in this country, "We want you to have the incentive to go find that energy if we have it so that that will go into the pipeline and it will get to Mrs. Smith and Mrs. Jones."

I remember the Senator from South Carolina referred to when he was Governor, how he worked hard to have industrial development in his State. And I did, too. I was Governor during the oil embargo in 1973. That put somewhat of a damper on my ability to bring new industry in. I think we all had a setback at that time. But I also recall, as Governor, when we had our crisis in 1973 and 1974, that I had to shift the use of natural gas to industry because that was the only fuel they could use in order to keep people working. So the community college shifted their natural gas to industry and that community college started using oil.

There are 20,000 employees at one industrial complex in Louisville, Ky. They kept everyone working in that operation, as I recall, without any layoff, as there has been in some other States, those who are not on my side, those States were harder hit than my State. But by providing the emergency operation, by doing the things that were necessary, those people continued to work. When we sat down and chatted with them and we whittled on the country store porch, they much preferred to pay a few more cents per mcf for natural gas so they could draw their paycheck. I think that is what we are looking forward to here.

I might say to those who complain about the complexity of this bill, there are over 700 decisions under the Natural Gas Act now. This bill provides only 17 distinct categories. What are we going to pay the new price for? What is going up? The new price will go to new gas that is found. That is basically it. The price they talk about, $1.98 or $2.09, whatever it might be, is only paid for new-found natural gas. Under the oil price law, we have been able to reduce, by about 2 billion barrels, the consumption of oil shipped in from overseas by deregulating small oil wells, under 10 barrels. They have uncapped those old wells and three to five or six barrels of oil per day are now financially feasible to bring out of the ground.

Under this bill, we say to the small gas wells that are now capped, 60,000 cubic feet, if you have a well like that, uncap it; it is deregulated.

And we have special incentive prices for other gas. In my county and others, there is the Devonian shale, geopressurized brine, new wells drilled 15,000 feet down, where most of the reserves are. That is deregulated.

We have made an attempt in this bill to find a balance. There is no way you can give in totally, one way or the other. So what are we doing? We are trying to compromise so that the consumer can have his gas and the employee can work. I just do not see how both sides can be right. There is no way that both sides can be right. I do not believe that this body wants to leave all the decisions to the Federal Energy Regulatory Commission. I just do not believe they want to do that.

Somewhere, sometime, we shall find

somebody that can give us all the answers. You work hard to find them, you take the best advice available, you pray a little, and hope—hope with all the fervor you can—that the decision you made is correct. I would be more than pleased to find someone that could give us the answer and we would know that it would be true.

The only thing I know is that we have 20–20 hindsight. I do not think there is anybody—anybody—who has 20–20 foresight.

Mr. President, I have rambled on some. I do not know whether there are others who wish to make some remarks as it relates to the bill. I do not know whether anyone wants to make any statements.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. MELCHER). The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, there have been some things said in the debate this morning that I think should be responded to. My good friend from Kentucky offered some figures from the Department of Energy, the Energy Information Administration, relative to the fact that in 1985 the extra cost of the residential users will only be something like 11 cents; that is, the cost between the residential and the industrial users.

Mr. President, there is a report out to that effect, but I think we ought to go back and talk about circumstances surrounding that report.

At an earlier point, the Department of Energy, Energy Information Administration, made available a comprehensive report as to the impact of the conference committee bill. Under that report, they pointed out that although in the House bill and the Senate bill there would have been very little variation in the residential and industrial users costs, with the special kind of concern being given residential users, that when the bill came back from the conference committee, the differences had changed mightily.

Under those new conclusions, the residential users will pay $3.28 per mcf and the industrial users will pay $2.44 for 1985, or a difference of 84 cents per mcf.

Mr. President, what happened thereafter is interesting. The Department of Energy did not like those figures, those higher ups, and there were certain people who were concerned about the passage of this energy bill who were great supporters of it, who had put their names on the line for this conference committee report. They said, "Oh, no, that is not the way it should be, that doesn't sound right, because those who are opposed to the bill are pointing out that what we have done in this conference committee bill is place the burden on the residential users of this country and taken it off the backs of the industrial users, and the industrial users would have a chance, as we all know, to make it a part of their costs and make it tax deductible."

So they went back to the Department of Energy and they said, "Make these new assumptions, if you do this and if you do that, what will be the answer?"

Lo and behold, when they changed the assumptions, then they came out with the conclusions as indicated by my good friend from Kentucky.

Let me say, I find no fault with his using those figures. I might point out it was not he who went back to the Department of Energy, it was Members of the House. But the fact is that when the Department of Energy, Energy Information Administration, was called upon to give unbiased, impartial, objective figures based upon reasonable assumptions, they concluded that this bill will cost the residential consumers 84 cents per mcf more than the industrial users.

That, Mr. President, is what is in this bill, not what somebody else decided ought to be the new assumption, not the changing of the rules in midstream, and that is what we are dealing with in this legislation. Every time we have had any relationship with the Department of Energy since it has been created, if the facts did not come out the way they wanted them to come out, they somehow adjusted them so that they did. When they had to tell us about all the crises of oil imports and how there was going to be a problem in the future, they even came up with some CIA figures about foreign imports and Soviet production, all of which afterwards was changed.

Mr. President, this bill is so complicated that in order to try to get it passed, even the President of the United States, in my opinion, has arrived at a wrong and contrary conclusion and emphasis to that which his own people were saying not too many months earlier. In the letter he sent around to all the Senators, dated August 31, 1978, he says the following:

> Significantly, under the incremental pricing provision, the price of natural gas to industrial users will be lower than the price would have been under the Senate-passed deregulation bill.

Well, what is so great about that? We do not want to cut prices for industrial users. I thought we wanted the price to go up for industrial users so they would turn to coal, a major product of the State of the Senator who is handling the bill, a major product of my State.

When I say that they have changed their emphasis, let us go back and look at what they were saying early on when they talked about the national energy plan and they were trying to sell the oil and gas users tax. On page 54 of that plan, it reads as follows:

> In addition to these wellhead pricing changes, taxes would be levied on the use of oil and gas by industry and utilities, in order to encourage conservation and conversion to coal and other fuels.

That was the emphasis then, back when the national energy plan was formulated.

On page 63 of the same report, what do they say on the same subject?

> Oil and natural gas are scarce, and generally they are needed more by other sectors of the economy. Industry and electric utilities can convert to other energy sources more readily than can other users; therefore, a large-scale conversion by industry and utilities from oil and gas to more abundant resources is needed.

That is exactly what the emphasis was and had been, until now the President tells us that we are reducing the price for industrial users. Great. That ought to cause them to use more natural gas. That will accomplish a lot for the national energy plan.

As the distinguished Senator from South Carolina stated, he thought the purpose of this legislation was to get people to quit using natural gas. He did not think the purpose was to get them to use more natural gas in order to cut the importation of oil. That is a new argument.

When the natural gas hearings were held by the Energy Committee of the Senate, Mr. John O'Leary appeared, and what did he say? He said:

> The tax is coordinated and slightly below a similar tax on oil so as to prevent gas-to-oil switches that would increase imports. It is estimated that these taxes will encourage the switching of approximately 3.5 tcf of gas per year to 110 million tons of coal by 1985.

Mr. FORD. There is no tax in this bill.

Mr. METZENBAUM. There is no tax in this bill. The Senator from Kentucky is 100 percent accurate. If the administration had their way, there would be taxes all over the place. There is no tax in this bill, but I am pointing out to the Senator from Kentucky that from the very inception, the administration told us, day in and day out, whether it was taxes, whether it was coal conversion, whether it was a natural gas bill, that the implication, the thrust, the direction, the concern was to get people away from oil and gas and get them into coal.

Mr. FORD. By taxes?

Mr. METZENBAUM. By taxes and by this bill. By taxes, by the gas bill, and by the coal conversion bill—in every part of the legislation.

Mr. FORD. Let me——

Mr. METZENBAUM. I have the floor, Mr. President, and I do not intend to be interrupted.

Mr. FORD. I will ask the Senator to yield after a while.

Mr. METZENBAUM. On page 50 of the natural gas hearings, held on June 7, 1977, Mr. O'Leary stated, in an additional comment:

> By establishing incentive prices that emphasize the development of harder to find new supplies, eliminating the split market, and encouraging the conversion from natural gas to coal, the President's program does not favor any single interest but rather calls on all parties in this debate to compromise in the interests of a balanced, reasonable energy policy that can break the 24-year-old deadlock between natural gas producers and consumers.

In the same hearing, I asked Mr. O'Leary the following question:

> We have a coal utilization bill. Can we achieve the same objectives without bringing the price of natural gas up as you indicate?

Mr. O'LEARY. I don't think we can. Our studies indicate—first of all, the need for internal reform. To motivate a consumer that continues to use gas, that is to say

who gradually replaces his inefficient burning equipment with efficient burning equipment, and to get him to switch over to coal, and that is the direction we want him to go, is going to take the price increase.

Mr. O'Leary says we need the price increase to cause them to switch over. The President of the United States says that this is a good bill because it reduces the price of coal to industrial users. Which is it? Do we want the price to go down? Do we want it to go up? I think that if we have a real belief in and concern for a national energy plan, we want the price for industrial users to go up, so that they will switch to coal.

Mr. President, I think that is what this whole issue is about. But in the anxiety, in the enthusiasm, in the determination to get a gas bill, any kind of bill, they are now telling us that it is better to cut the price for industrial users, exactly contrary to what Mr. O'Leary was telling us on June 7, 1977. He said:

. . . that is to say who gradually replaces his inefficient burning equipment with efficient burning equipment, and to get him to switch over to coal, and that is the direction we want him to go, is going to take the price increase.

Mr. O'Leary, of the Department of Energy, is for the price increase. The President of the United States says this is a good bill because there is a price decrease for industrial users.

Mr. President, I ask unanimous consent, on behalf of Senator DURKIN, that Phil Swink, of his staff, have the privilege of the floor during the natural gas debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. FORD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FORD. Mr. President, I wish the distinguished Senator from Ohio would argue the merits of the bill, instead of getting into a confrontation with the administration, which he has supported 95 percent of the time.

It is strange when the people on the same side argue different courses. I was amused today to listen to the distinguished Senator from Ohio talk about reducing the cost of natural gas to industry, whereas yesterday afternoon, on this floor, the distinguished Senator from South Dakota (Mr. ABOUREZK) read a UPI story which stated how harsh the load was going to be on industry.

Now we have people from the same side arguing different ways. The only thing I want to point out to them is that under this bill, there is approximately a 30-percent increase in natural gas to industry and approximately a 10-percent increase to residential users.

Mr. President, I hope that in the future we can keep the debate as it relates to this legislation, rather than getting into confrontation and little frills in other places. I thought I should correct the Senator on that point. I knew that he would want me to correct him when he was so wrong.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. FORD). Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, it appears that few Senators are apparently in a position at the moment to either debate the conference report or to listen to the debate. I see five Senators in the Chamber, including the Presiding Officer, Mr. FORD, of Kentucky, and it appears that the Senate is just wasting its time right now waiting. There is no other bill that can be taken up right now with a time agreement on it. So I believe there are indications that the best thing right now to do is to recess for about an hour.

RECESS UNTIL 2 P.M.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate stand in recess until 2 p.m. today.

There being no objection, the Senate, at 1:05 p.m., recessed until 2 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. NELSON).

Mr. TALMADGE. Mr. President, natural gas is a major energy source to agriculture and the food and fiber system. It is essential that a dependable supply of reasonably priced natural gas be assured to power this sector. To do otherwise would cause utter chaos.

The use of natural gas in the agricultural production, processing, and distribution sectors is widespread. Many of the inputs farmers use depend upon natural gas. Natural gas provides the energy to manufacture the nitrogen fertilizer and chemical pesticides which are essential for efficient food production. Also, for the farmer, it powers his irrigation pumps in the Southwest, it dries his crops in the Midwest, and it is used to condition his cotton for ginning in the South.

For the food processor, it is the major energy source for processing the multitude of food items that this Nation enjoys. Canneries, meat, and dairy processing plants rely heavily on this energy source. Bakeries with open flame ovens depend on this clean burning fuel to impart no residues that could be health hazards. For the food retailing sector, it provides energy for warehouse storage to assure food quality maintenance and operation of retail outlets.

As chairman of the Committee on Agriculture, Nutrition, and Forestry, I have an obligation to protect agriculture's interest concerning the establishment of a natural gas policy. While it is my understanding that this bill provides adequate protection for agriculture, I have some questions that will clarify this issue.

First. It is my understanding that this bill directly affects agriculture in two primary ways. First, section 206(b) assures agriculture the same high priority accorded households and small businesses in protection against sharply high natural gas prices by exempting agricultural users from the incremental pricing features of the bill. Second, section 401 provides an exemption against natural gas supply curtailment for essential agricultural uses. Am I correct that these two features are a part of the bill?

Mr. JACKSON. The Senator is correct. Agriculture is accorded a high priority in this bill.

I might say to my good friend from Georgia that we follow the basic rule that we followed, of course, in connection with the Oil Allocations Act in which the Senator will recall agriculture was given top priority. The whole thrust of it is in that same vein.

Mr. TALMADGE. I appreciate that.

Second. Concerning the agricultural exemption for incremental price increases, does this mean that farmers, processors, food warehousemen, and fertilizer, and other agricultural chemical manufacturers will not experience the higher price increases that will bring in new supplies of natural gas? If so, this should help farmers and others in their struggle with the cost-price squeeze by minimizing the cost of increases of some major production inputs.

Mr. JACKSON. There will be, as the Senator is aware, price increases. But the significant point, and that is what I gather my friend is addressing himself to, is that those increases will not be as great as boiler fuel or other industrial price increases.

There is no guarantee to anyone that there will not be price increases, but agriculture will be accorded that benefit which basically runs to the residential and small business user.

Mr. TALMADGE. Third. Concerning the provisions of this bill that apply to an exemption against natural gas supply curtailment for essential agricultural uses, what does this really mean? It is my understanding that section 401 requires the Secretary of Agriculture to certify the essential needs for natural gas for agriculture to assure that full food and fiber production continues. The Secretary of Energy then prescribes a rule that incorporates this certified need so that interstate pipelines may not curtail supplies to these end users.

It is also my understanding that the conferees indicated that the definition of essential uses in agriculture should be interpreted in the broadest possible concept so that our food and fiber production continues without impairment. Am I correct in my assessment of this section?

Mr. JACKSON. The Senator is correct.

Mr. TALMADGE. Fourth. In recent winters we have seen dairy processing plants denied natural gas and without an overall effort to replace the supplies, some 3,000 dairy farmers at one plant were within hours of having to dump their milk. Fertilizer plants have been curtailed and during the winter of 1973–74 curtailments seriously shorted supplies and fertilizer prices rose to record levels. Will section 401 prevent repeti-

tion of such curtailments and eliminate the prospects of curtailments of even greater magnitude?

Mr. JACKSON. The answer is, yes. What we have done is to protect essential agricultural uses.

Mr. TALMADGE. Fifth. As I comprehend it, however, the Federal Energy Regulatory Commission has the authority, in consultation with the Secretary of Agriculture, to deny exemption from curtailment if it can prove that there are alternative fuels which are both economically practicable and reasonably available. In such instances, food system participants would be denied the exemption from curtailment and encouraged to switch to the alternative fuels. Does this leave too much discretion so that millions of farmers and ranchers would be placed under the thumb of the Federal Energy Regulatory Commission—a Government body that might force farmers and ranchers to switch to high-cost alternatives without fully understanding the situation?

Mr. JACKSON. Might I just read from page 114 of the conference report:

> The Commission, in consultation with the Secretary of Agriculture, will determine if alternative fuels are economically practicable and reasonably available to meet the needs of agricultural uses as certified by him.

So that is an unusual step.

Then, on down that same page I read as follows:

> The conference agreement specifically includes authority for the Secretary of Agriculture to intervene before the Commission in curtailment proceedings implementing this section. The conferees do not intend that anything in this Act shall give the Secretary of Agriculture authority to exercise, or limit the performance of his duties under this section for the purpose of restricting production of any crop or crops.

Mr. TALMADGE. And, lastly, No. 6, moreover, as I am told, the Federal Energy Regulatory Commission, or its predecessor, has been buried in a backlog of cases to be processed. Is there any chance that crops could perish in the field while applications for priority allocation of natural gas for crop drying or irrigation languish in some bureaucrat's files?

Mr. JACKSON. Let me say, first of all, there is a big backlog that the Senator referred to, but agricultural cases will be given top priority in the consideration of those matters.

Second, I would point out that the procedures here—addressing myself now both to this specific area and to the whole conference report—have been substantially simplified in comparison with the existing law. So the procedural aspect of it, I think, will be far more effective in bringing early adjudicatory results.

Mr. TALMADGE. I am grateful indeed to my distinguished friend from Washington, who is always cognizant of our food needs in this country, the most important thing, of course, in the Nation. None of us can survive without adequate food.

I appreciate the clarification the distinguished manager of the conference report has made in providing for this agricultural priority.

Mr. JACKSON. Mr. President, I want to express my appreciation to the distinguished chairman of the Committee on Agriculture, the senior Senator from Georgia, for raising these questions because I feel they are very important in light of the comprehensive nature of the bill.

I want to thank my good friend from Georgia.

Mr. TALMADGE. I thank my distinguished friend.

I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. RIEGLE). The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. WEICKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. GRAVEL). Without objection, it is so ordered.

The Senator from Connecticut.

Mr. WEICKER. Mr. President, the natural gas pricing conference report before us today is meant to represent a major step by this country in solving its energy problems. However, this report, rather than being a step forward toward a brighter energy future represents a step backward deeper into the morass of regulation and farther from our goal of energy independence.

I would support this compromise if I thought it could provide additional gas supplies. But it will not. Production incentive depends on price and on freedom from uncertain and complex regulation. This compromise will provide neither.

In the intrastate market, which has provided the bulk of new gas finds, this bill will impose price controls for the first time, and will impose a totally untried system of price categories and determinations.

In the interstate market, under the current system, anyone who drills knows he will get at least the current new gas price, without undergoing the incredibly complex process laid down in this compromise for categorizing gas prices; under the compromise, much new drilling would get considerably less than the "new gas" price.

Over the past 20 years, we have had a dual natural gas market. We have had this regime of controls in the interstate market and we have had a system of freedom in the intrastate market. We have now seen the results of that comparison. It is not freedom that has failed, it has been control.

Year after year, the intrastate market has discovered the reserves necessary to replace gas consumption. The interstate market has not. Month after month, since we began discussing gas legislation, intrastate production has exceeded the levels of the previous year while interstate production has continued to fall.

This difference is the basic reason that I have supported deregulation, it is the basic reason that the Senate as a whole voted for deregulation, yet the essence of today's proposal is not deregulation but rather an extension of controls. That is, possible deregulation in 7 years—more likely 9—but an extension of controls now.

So the first question that has to be asked is that if deregulation is the correct and proper economic theory 7 or 9 years hence, then why is it not correct now?

The extension of controls to the one gas market that has worked is bad enough, but this compromise then adds insult to injury by further complicating the pricing system to the extent that no one—consumer, producer, or energy regulator, and, more importantly, U.S. Senators—can understand the system. It is hard enough to get a majority of people in this country to agree on any major policy and in the energy area it is almost impossible to do so, but I cannot understand how the supporters of this compromise expect the American public to endorse so complex and contorted a measure.

The only way they could do it would be to abandon all fact contained in the measure and substitute for it the very simple statement, "We need an energy bill." At the conclusion of my prepared remarks, I would like to go further into that type of reasoning because it could certainly apply to any legislation that comes before the Congress of the United States. Forget the substance, emphasize the form.

I realize we are getting a little lazy as far as this Nation is concerned, in the sense of legislation, in the sense of our adherence to obeying the laws, or in our devotion to the Constitution, and we like to substitute form for substance, and increasingly so. But then I think it should be pointed out as to what it is we are doing, and that is my intention here on the floor this afternoon.

Even the administrators have their doubts. The Director of Enforcement of the FERC, Shelia Hollis, says:

> The legislative framework envisioned by the final Conference Report is exceptionally complex and intricate. Administration and enforcement of this highly technical bill could be undertaken only with substantial additional staff and other resources committed to the Commission.

Tomorrow or the next day, when this very important vote on recommittal is taken, I can guarantee that there will not be a half-dozen Senators on this floor voting that can understand what it is they are voting on. Nobody knows the consequences of what it is that we are about to either pass or defeat, including those at the Department of Energy, and certainly including those at the White House.

But the slogan under which passage is demanded by the President is that "we need a bill."

There will be over 20 new categories of gas with separate pricing systems for each. What a nightmare. What production incentive is there for the producers who, to get the higher prices, have to incur enormous costs just to understand and comply with these regulations.

But compliance is only the beginning. As we have seen in recent years, the new controls get cranked up and in a few years every firm is in court for violations of one kind or another, because no one understands the regulations in the early years. So the taxpayer has to ab-

sorb not only the higher costs of new energy but the legal costs of these lawsuits, paying both sides—in tax dollars for the Federal regulators and in higher costs for the producers. Now where is the sense in all of that?

The incremental pricing provisions in this compromise provide another example of its shortsightedness. If industries in the gas-consuming States are to suffer the provisions of incremental pricing while those in the gas-producing States are not, then there is bound to be a flow of jobs away from consuming areas. The impact on jobs and economic prosperity is obvious, but what about the effect on energy prices throughout the Nation? As companies and industries shift away from a consuming State, the cost of energy to those citizens and businesses increases as the fixed distribution costs have to be spread among those left.

The chairman of the Public Service Commission in Wisconsin, a consuming State, has perhaps put it best. He says that—

> This bill is not really a gas deregulation bill that closes the gap between inter- and intrastate markets. It is an industrial gas conversion bill, a higher priced forced residential gas conservation bill, and an incentive for jobs to move from gas consuming to producing states.

He concludes that this bill will tend to cause industry to convert toward, not away, from oil because of price and uncertainty of supply.

The President and supporters of this so-called compromise see it as the savior of the U.S. dollar. Without a gas bill, they tell us, the dollar will continue to decline against the major currencies of the world. They tell us that the international financial community is watching us, waiting to see if this country can forge an energy policy that will lead it back to something approaching balance in its international trade.

The world is not waiting to see whether or not we forge an energy policy. The world economic community is waiting to see whether or not we can engage in acts of self-discipline. Self-discipline—not in exercises of rhetoric saying that we have a bill.

Unfortunately, in an economic sense, there have been no acts of self-discipline, either in our domestic fiscal policies or our international fiscal policies.

Yes, there is no energy bill, and there is no question about the fact that the lack of an energy policy is at the root of our economic difficulties. But saying that you have a policy does not substitute for the substance of that policy.

It was almost 4 years ago that I stood on this floor with the then majority leader, Mike Mansfield, of Montana, one of the giants of the U.S. Senate, a man of enormous courage. The two of us said then, at the imposition of the Arab oil embargo, that this Nation needed to impose upon itself mandatory fuel conservation. There was not another Democrat and there was not another Republican who stood with us on that issue back in 1974.

So, for 4 years, the people of this Nation and their representatives in the U.S. Senate have rationed by price—in effect, have rationed the poor of this country, have rationed the elderly of this country, have rationed the lower income segments of our population; they to bear the energy cross for all of us. That is because none of us wanted to go ahead and change our lifestyle.

Yet, if we had changed that lifestyle back in 1974 with an act of self-discipline, rather than the volutarism that has led us to increase our consumption of oil and gas—if we had engaged in an act of self-discipline in 1974, there would have been respect for the President of the United States on his recent visit to Bonn. But nobody wanted to incur the slightest discomfort, and nobody wanted to inform their constituency of the discomforts required. So the conservation aspects of energy in this country went out the window.

The figures have been rehashed many times. What is our bill from Saudi Arabia? It is up some 1,000 percent in the last 4 years. Gas consumption is up. Oil consumption is up. We say we are doing well with the cars, and all of a sudden we are all using vans, and they use twice as much gas. Any suggestion that there be an act of self-discipline in the conservation sense, and everybody runs out of this Chamber.

That is what was at issue at Bonn, not the fact that we did not have a bill.

America, for quite some time, has not shown its willingness to make the substantive changes and to take the substantive measures which will bring us into fiscal soundness, a fiscal soundness on which the world relies, since the dollar is the premier currency.

Leaving conservation aside for a minute let us look at the complexity of this compromise. Twenty different categories of gas pricing. Why is it that we have to so contort ourselves? The reason is very simple. As I stated on the floor the other day, in putting together this compromise, producing interests have been consulted, consuming interests have been consulted, the Southwest has been consulted, the Northeast has been consulted, liberals have been consulted, conservative interests have been consulted, Republican interests and Democratic interests have been consulted.

But nowhere in the bill is there an attempt to consider the American interests, that one common bond which can produce a common solution—the free market.

I find it ironic that those who speak for the principles of the free market, of deregulation and decontrol, have to explain why it is that we feel the Nation once again should go back to that system. Ask the individual on the street why supplies are short and prices are high. It did not come to pass by virtue of a system of deregulation or decontrol. It did not come to pass, because of the free market. We have not had that in the last 4 years. It has been a system of controls.

Yet, it is those who advise a change in the game plan who somehow have to do the explaining, rather than those who have built the most horrendous track record in the history of our free enterprise system.

The American people were promised that with controls there would be lower prices. Question: Are the prices lower?

In essence, I suppose it has been the philosophical attitudes of most of the Members of the two major parties that have prevented any sort of realistic solution. In the main, Democrats have been opposed to deregulation and decontrol; so there has been no incentive to get additional supplies. Hence, the supply portion of the equation of the law of supply and demand has made it impossible to do anything to try to resolve our energy crisis. No incentive, no supplies.

Republicans, in the main, have been opposed to any form of mandatory conservation. So it has been impossible to do anything with the demand side of that equation.

So you are stymied on the one hand, unable to do anything with the demand, unable to do anything with supply on the other, and everybody wonders why there has been no resolution to the energy crisis.

Mr. MELCHER. Mr. President, will the Senator yield?

Mr. WEICKER. I do not want to be rude to the Senator. I would like to finish my comments, and I will be glad to yield.

Mr. MELCHER. I want to join the Senator from Connecticut in encouraging an increase in supply.

Mr. WEICKER. If the Senator would like to speak later, it would be a matter of his convenience. I will be finished in a few minutes.

Mr. MELCHER. I will withhold. There have been points raised by the Senator from Connecticut with which I agree.

Mr. WEICKER. I thank the distinguished Senator.

So, really, the roots of this problem were recognized clearly by all hands 4 years ago. Frankly, there was not a majority leader running around the floor saying that we have to have a bill. There was a majority leader who said we have to conserve and we have to do it in a mandatory way. That is a big difference in the exercise of leadership right there. Form rather than substance. Politics rather than reality. That is why we are in the present impasse.

The dollar is going to recover, but only when we come up with an energy policy that makes sense.

I think anyone who has read even a summary of the provision or any of the debate on this issue will realize that this compromise does very little to address the real problems we face in this part of the energy spectrum. If anything, it probably will worsen our trade balance by forcing industries to convert to other fuels, probably oil.

Why? Because it will push gas prices up until oil becomes an attractive substitute for gas. So let us not kid ourselves thinking that the international financial community, not to mention the American public, is going to be fooled by believing we are going to have a sensible "energy policy" by passing this bill.

The dollar, as I said, will recover when we do come up with an energy policy that makes sense, that has substance to it, and that substance is to provide for

more domestic production and for tough steps to reduce consumption and encourage conservation.

I stand on the floor of this U.S. Senate in the year 1978 saying exactly what I said in my reelection campaign of 1976. It is a rather oddball platform to run for election on, but I said it in the State of Connecticut: Rationing on the consumption side; deregulation, decontrol of free market on the supply side. And for whatever inconvenience that might be caused for a few months or a few years we will come out of the woods together not having penalized just a segment of our population but each one of us having borne the burden required to make the solution meaningful. We will not talk our way out of this crisis. We will not armtwist our way out of the crisis. More gas, more oil, and less use of the same—it is as simple as that, and we do not need 190 pages to satisfy the egos in this Chamber and down on Pennsylvania Avenue to tell us that.

If any member of the American public is fooled into thinking that this is going to resolve our problem and give us lower prices and stable supplies, then I say this afternoon: Should the bill pass, watch what happens for the next year or so, because that is the other part of the political strategy. All will be forgotten a year from now, 2 years from now, by the American public.

So, while this bill is worse than the status quo, we all recognize the current situation in the consuming States is difficult, and we must do what we can to improve it. That is why my colleagues and I support certain portions of the conference report which are generally agreed upon and which will provide some production in supply for the interstate market. The free market has worked so well in the intrastate market that an excess of gas is available, at least at certain times of the year.

The provisions already agreed upon will allow that gas to flow to the interstate market at reasonable prices without bringing the sellers under FERC control. Together with provisions similar to the Emergency National Gas Act of 1977, which worked quite well, but which now expired, our motion to recommit will actually improve the current situation, as opposed to the conference report, which will lock up into an interminable web of regulation and control.

Throughout the natural gas debate I have always supported a bill that would provide for deregulation at some reasonable time and certain point in the future. I think it should be tomorrow. I recognize the necessity of compromise in this business called Government. But as to the 7 years, 9 years possibly, as is contained in this bill, do Senators know what that is for? That is to let the politicians down easily who have for the last 4 or 5 years been saying that controls would give us those lower prices and those stable supplies, which predictions have proved to be incorrect. It is not 7 or 9 years to achieve an orderly transition in an energy sense, but 7 to 9 years to allow my colleagues in the House of Representatives and the Senate to prepare escape routes to make provision for other employment.

Indeed, if we agree on the bill as it now stands, we will still need a national energy policy, and every day we continue to embrace the pretense that we have one will take us 1 day further from achieving our goal of energy independence.

The real difficulty is that should the legislation be passed by the House of Representatives and the Senate and signed by the President the assumption will be made by the man on the street that the United States has an energy policy, and that probably is the greatest danger contained in this legislation, for regardless of what your point of view is on regulation or deregulation or on consumption, believe me what is contained in here after the title is nothing. And there will be no pressure to do anything further. If, indeed, all the pressure that has been generated in 4 to 5 years has wrought nothing except this monstrosity, what will happen when the country thinks we have an energy bill or at least is able to point to something that was signed into law? There will be no demand for conservation. There will be no incentive for additional production. There will be the standard comeback: "We have an energy policy. Why don't you find out? Let us just see how it works for the next 7 to 9 years."

This country cannot afford 7 to 9 years of the profligacy in energy in which we are now engaged.

I am fully aware of the fact that my views bring me much into conflict with most of my colleagues. I really do not know anyone who is both for mandatory conservation and for deregulation. But that is the honest answer, and all I can say is that, however, it will hurt, it will only hurt for a little while. As it is now, too many people have been hurt for too long. For 4 years shortages of supply in the gas field have put people out of work. People have actually frozen to death. These are not just dramatic footnotes that are figments of my imagination. It has happened. The tragedies are already there.

Everyone said when the gas lines went away in 1974:

> Fantastic. I don't have to wait in line any more at the gas pump. There is not even that inconvenience, no more waiting at the gas pump. So the crisis is gone.

Just ask the elderly who have gotten their utility bills over the past 4 years whether or not the crisis is gone. I have had them in my office, Mr. President. And given a choice between a rise in social security or some alleviation of the prices they have to pay for their light and their heat, they would choose the latter. It is that bad. Or take the individual who cannot get to work. Maybe since we have achieved a great degree of affluence for so many Americans, people do not think about the price of gasoline anymore. But many of our citizens do, because unfortunately wages and all the rest of it has not gone up correspondingly with the artificial price of energy imposed upon us by the OPEC nations.

So there was a price to pay. That was not standing in line at the gas pump. But it was death, it was joblessness, it was the fright of not being able to have utilities or the fear of not being able to pay the bills. This has been a part of American life for too many Americans over the past 4 or 5 years.

So we did not get away scot-free. The failure of Congress or the President of the United States to enact an energy bill, the chicken politics that have been played on this issue, have exacted, I think, a very painful toll.

I suppose there are those who are going to argue, "Well, all that is behind you. We have an energy bill here which is not going to pinch anybody's toe in an election year, so you can vote for it. You can go home and say, 'I voted for an energy bill.' Believe me, there will be nothing there which will ruffle your constituents." But if you accept that argument, you are, in effect, saying that you are satisfied with the situation as it exists today, and I just do not believe in that.

I believe we can have stable supplies, and I believe there should always be the prospect of prices going down. Under this bill there is no such prospect. Do not forget that a free market involves that possibility, whereas under this so-called "deregulation" bill the price always goes up every year. It is going to go up to a price that apparently is acceptable to some of our producers.

Where in the bill does it provide for prices to go down over the next 7 to 9 years? It does not. It cannot, because you are talking about a controlled economy in this matter.

So, first of all, let the administration explain to the American people on natural gas that the extension of controls or the gradual phasing in of deregulation guarantees only one thing, that the price is going to go up, whereas the price under total deregulation in a free market, can go down if the supply is too great.

Mr. President, not wishing to step on partisan toes, I have some partisan comments to make. Maybe I ought to stop at this juncture and let my good friend from Montana have his say on this matter, a man whom I greatly respect and, I might add, a successor to the distinguished former majority leader of whom I have spoken so affectionately and so admiringly.

I yield temporarily to the distinguished Senator from Montana.

Mr. MELCHER. I want to thank my good friend, the Senator from Connecticut. I want to say there are many points the Senator from Connecticut has raised with which I agree. However, I do not agree with the need for gasoline rationing. Indeed, despite what my very good friend and very great predecessor believed in, in that regard it was totally uacceptable in our State.

But when the Senator from Connecticut speaks out about the need for conservation, I totally agree with him. I know from our experience together on the Senate Energy Committee that we think alike on the subject.

I also join the Senator from Connecticut in advocating very strongly an opportunity for increasing production of oil and gas in this country, and I agree with him that the incentives have been re-

moved. That is why both he and I voted for the Pearson-Bentsen proposal that received a majority of the votes here in the Senate when we dealt with this subject last fall.

But we split here, the Senator from Connecticut and myself, on this proposition, because while this has presented not nearly as much as I wanted in terms of Pearson-Bentsen, in terms of deregulation, it is, in my judgment, better to have this, and to have it now, than to delay until some future time, so indefinite that it is impossible to calculate, when both the House and the Senate would pass another type of gas bill called gas deregulation or gas regulation for at least this does have some deregulation in it.

There is something in this bill, and something connected with it, that I do not believe the Senator from Connecticut has considered.

We can talk about what will be in a motion for recommittal.

Mr. McCLURE. Mr. President, will the Senator yield for just one comment?

Mr. MELCHER. Yes.

Mr. McCLURE. I think it deserves some comment at this point about the alleged complexity of the bill, because of the number of classes of gas.

Mr. MELCHER. I was going to get to that, I can tell the Senator.

Mr. McCLURE. I would just like for the record, unless the Senator would prefer to do it himself, to state there are actually under this proposal fewer classes of gas for regulation purposes than there are under existing law, because it establishes essentially four classes of new gas wells. There would be the new, there are wells with on-chart production, deregulated high-cost gas, and wells which do not qualify for either, and those would be the new gas wells, and the old gas wells which are divided into three categories: Stripper wells, and you have to do something to deal with the question of what do you do on interstate roll-over contracts and intrastate roll-over contracts? What do you do when a contract expires and they must negotiate for a new price? That is the seven classes of gas that are established under this bill.

A great number of people have said, "There have been 17 or 22 or 23 or 26." I would say to the Senator there are probably some 300 to 400 classes of gas now being administered by the Federal Energy Regulatory Commission, and they must, under existing law, establish for new gas, on a quarterly basis for new wells, a new price in a separate proceeding under each application, and they are losing ground under those applications. That will be true during all of the period of time in the future until the law is changed.

Mr. WEICKER. I only respond to my good friend from Idaho by saying that I have never—I do not believe the Senator from Idaho has either—used the present system as a model either of workability or of philosophy or good economics.

Mr. McCLURE. Mr. President, will the Senator yield to me? Certainly I do not intend to convey that the present law is the very best we can have nor do I contend that the proposed conference report is the best law that could be written. I am saying that the choice we have confronting us now is between the existing law and the conference report, and the hope that we might somehow do something better. Those are the only choices we have.

I think any objective assessment of the difficulty of passing the law, passing a new law, to improve where we are now must rest upon a judgment, and it is a political judgment, it is not an economic or factual judgment, but a political judgment, about whether or not Congress is in the future more likely to enact better law than they are to do so right now.

I would just point out that the Pearson-Bentsen bill passed this last year in the Senate by a margin of only four votes. At the time we voted on it before, the margin was six votes.

In the House last year it failed of passage by a margin of 13 votes. The last time it had been voted on before that, in 1975, it failed of passage in the House by only three votes.

The reason I mention those things is that I am not sure that the trend in Congress is away from deregulation of gas but may, as a matter of fact, have reached a high point during the aftermath of the gas shortages which saw factories, homes, and schools running without a sufficient supply of natural gas. Congress, in its usual tendency to run from crisis to crisis, very nearly responded affirmatively in the immediate aftermath of that crisis. But as we moved farther away from it the tendency on the part of Congress to correct the obvious inequity and obvious faults of the existing law diminished.

My assessment, for whatever value there may be in my own personal assessment, would be that the likelihood of passing a better bill next year is less than the likelihood of being able to correct it this year.

Mr. WEICKER. I would like to ask the distinguished Senator from Idaho a question: If, as he maintains, the categories are less complex in the bill before the Senate than the present system, how does he explain—I will repeat the statement of the Director of Enforcement referred to—how does the Senator explain the statement that SHEILA HOLLIS made, that "the legislative framework envisioned by the final conference report is exceptionally complex and intricate. Administration and enforcement of this highly technical bill could be undertaken only with substantial additional staff and other resources committed to the Commission."?

Mr. McCLURE. She has made that statement. The simple answer is that they started out 9 months ago with a 14,000-case backlog, that the backlog of unresolved issues now exceeds 20,000, and is nearly 23,000 at the present time, and they will need additional personnel and resources to carry out their functions under existing law.

It is her opinion that they will need additional personnel. I would invite the Senator, if he would like, to read the fuller statement of the Chairman of the Federal Regulatory Commission that appears in the same memorandum, in which he says that as a matter of fact under existing law they could well require less personnel, and I could read about three pages of his comments as to various ways in which regulatory complexity under this bill could well be less than the regulatory complexity under existing law; and I refer the Senator to pages 10, 11, 12, and 13 of the section-by-section analysis from which he has just quoted one sentence.

Mr. MELCHER. Well, the Senator from Idaho is correct in stating the cases of the categories, and I would like to read what Charles Curtis, the chairman of the Federal Energy Regulatory Commission, stated on about September 8:

> There has been a great deal of discussion in the press concerning the number of pricing categories, production classifications, and other administrative determinations under the proposed NGPA. There is no single response to these various claims. The answer is keyed to how narrowly or broadly you construct the categories. For example, the staff has identified approximately 11 different and specific price levels permissible under the Act. Of this number, four derive from the incorporation of currently effective Commission determined just and reasonable rates and two others result from the creation of a statutory equivalent to previously determined just and reasonable rates.

Those 11 categories are set out on the next page, and I will mention a couple of them and incorporate all of them in my remarks. I ask unanimous consent that the 11 rate categories be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

(1) $2.09 rate with both inflation adjustment and escalation (described in section 108(a)).

NEW CATEGORY—STRIPPER WELLS

(2) $1.75 base rate with both inflation adjustment and escalation (described in section 102(b)).

NEW CATEGORY—NEW GAS

(3) $1.75 base rate with inflation adjustment only (described in section 103(b)).

NEW CATEGORY—IN FIELD GAS

(4) $0.93 base rate established by Opinion No. 770–A as incorporated and modified by section 104(b)(1)(A).

OLD CATEGORY—(UNDER FPC-CODIFICATION)

(5) $0.295 base rate established by Opinion No. 749 as incorporated and modified by section 104(b)(1)(A).

OLD CATEGORY—(UNDER FPC-CODIFICATION)

(6) $0.52 base rate with $.01 annual escalation under Opinion Nos. 699 and 770 with inflation adjustment beginning in the month following the effective date of the rollover for those rollover contracts which were executed on or after January 1, 1973 and before the date of enactment.

OLD CATEGORY—(UNDER FPC-CODIFICATION)

(7) $0.54 base rate with inflation adjustment described by section 106(a)(2).

OLD CATEGORY—(UNDER FPC-CODIFICATION)

(8) $1.00 base rate with inflation adjustments, described by section 106(b)(1).

NEW CATEGORY—FOR CERTAIN OLD INTRA-STATE GAS

(9) $1.45 base rate with inflation adjustment described in section 109(b). This rate is equivalent to the $1.42 base rate established by Opinion No. 770–A as incorporated and modified by section 104(b)(1)(A).

OLD CATEGORY—OLD FPC-CODIFICATION

(10) Various special relief or optional procedure rates prescribed by the Commission after April 20, 1977 and before enactment, covered by section 104(b)(1)(A) or (B).

OLD CATEGORY—OLD FPC-CODIFICATION

(11) Special incentive price for high cost natural gas. Section 107(b).

New category—high-cost new gas (such as western shale). Incentive price.

Mr. MELCHER. The first one is a $2.09 per thousand cubic feet base rate, with both inflation adjustment and escalation, for stripper gas wells.

This fits into two of the points that the Senator from Connecticut and I agree on completely. You can look at a stripper gas well as new production if it will increase the production and get something out of there you would not have otherwise gotten out of it. And you can look at it on the basis of conservation, because if it is a producer, if you have the well and it has been producing, it is in the stream of supplying gas, and if you do not get the gas out, you are wasting it.

So I think the Senator from Connecticut would agree with me that we need something in the law to allow an incentive price for stripper gas wells, just as we have had for several years an incentive for stripper oil wells. It has worked for stripper oil wells; we knew it worked when we first adopted it, the very first time. We modified it several times, and now we have incorporated it into this conference report as a part of this bill for stripper gas wells. I think it makes sense. I think the Senator from Connecticut would very much agree with me on the necessity for having that modification in the present law.

Now, there is another basis for incentive in the 11th one of these 11 different categories. It is a special incentive price for high-cost natural gas.

That high-cost gas could be something like Western shale. If it is there, and if there is a feasible way that meets the practical question of satisfying the market demand for natural gas at a price that people are willing to pay, then we ought to allow under the law for such an incentive price. I think the Senator from Connecticut would agree with me on that, too.

Then there is another point about talking about increasing production within the United States. We have got the oil flow from Prudhoe Bay in Alaska on the North Slope. The gas is there, which is being reinjected now into the wells as it comes out with the oil. For a period of time that can be successfully done without incurring additional costs.

But I think the Senator from Connecticut would envision that the natural gas from Alaska should add to our domestic supply here in the Lower 48. It is not much use sitting up there in Prudhoe Bay, and we need to have it brought down here. We have established the conditions for right-of-way permits and agreed on a route for the natural gas pipeline from Alaska. Yet it will not come about unless we adopt a law to require the rolling in not only the wellhead price, but of transportation costs; and that is in the bill, too.

Mr. WEICKER. Mr. President, what the Senator is saying to me is that if we can only get that natural gas into the United States, then we have the possibility for lower prices. Believe me, we do not have the possibility for lower prices in the United States under this legislation, not at least for the next 7 to 9 years.

Mr. MELCHER. No, Senator, I am not making that claim, that natural gas coming down from Alaska would assure us of lower natural gas prices. We may find that even though we allow that gas to come down here, by allowing the rolling in not only of the wellhead price but of the transportation price so that pipeline company can sell the bonds to get the money to build that pipeline, it may well be that it will be at such a price that no one wants to buy it.

I am not saying that Alaskan gas, when it comes down to the Lower 48 States will sell at an attractive price. I do not know; if it were here today it might not be too attractive, because we are looking at $4 a thousand cubic feet, and that must compete with a lot of resources that are cheaper than that.

No, I would not attempt to make that case.

Mr. WEICKER. But then it is also fair to state to the consuming public that under this bill there is no possibility, regardless of the supply of gas, of the price going down.

Mr. MELCHER. Yes, there is. Let me tell the Senator why there is.

Mr. WEICKER. How? I am talking about the next 7 to 9 years.

Mr. MELCHER. These are only approximations. The escalation only applies to the maximum. Let me tell the Senator why this may lead to cheaper prices in the future. Alberta adjoins Montana. The way they run the province there, the Canadian Energy Board in partnership with the province runs the production. It is one where they do not want to export oil or gas. In the situation with oil it seemed to work out all right with them for a while because they have been steadily decreasing their sales of oil to the United States. They have it down to quite a small amount now. But at the same time they were trying to utilize the gas in the Alberta gas field for themselves and not sell any new contracts to the utility companies in the United States, they found that they needed to have more gas sales. The price was increased and it is up to right around $2.13 to $2.30 per thousand cubic feet right now.

When that time came, when they allowed that added price, there were hundreds of new gas wells brought in in Alberta. I am advised by people familiar with the market there, familiar with the natural gas market there, that the current contracts that they have in the Canadian Province of Alberta, and which the Canadian companies have now, are about $2.13, which look very good to them. At this moment they have not had sufficient buyers in the area to absorb all of the gas they think they are going to be able to sell on contract during the next year or two.

A slight increase in the price, we would call it slight now though it was quite a dramatic increase at the time, allowing that price to get above $2 increased drilling, brought in more gas wells, and, for their market, has made a substantial quantity of natural gas available. They are now exporting more than they really planned on or thought they would a few years ago,

Mr. WEICKER. I have no argument with the Senator from Montana on that point at all.

Mr. MELCHER. I know the Senator agrees with me on that. But in a small way, in a much smaller market, a slight increase—and believe me I am not trying to say that going from $1.25 up to $2 is not a big percentage increase but $2 natural gas sounds attractive to us now—by doing that they brought in a lot more natural gas.

Under the terms of this, getting above $2, which it will in 1979 for new gas, it could probably bring in a lot more gas than we could envision at this time. So we might reach the point of additional supply. I know the Senator agrees with me that that is ideal, if that happens. I cannot say it will happen. I would like to think we have a shot at it.

Mr. WEICKER. I have no arguments whatsoever with the distinguished Senator from Montana on the additional price producing additional exploration and a greater amount of gas. But still left unanswered, however, is the last question: With the additional exploration and the additional gas, once on-stream has the price gone down? Apparently there is no proof to that point.

Mr. BUMPERS. Will the Senator yield?

Mr. WEICKER. If I might complete my comments with regard to the comments of the Senator from Montana, then I will yield.

To respond to the distinguished Senator from Idaho, whose point is to the complexity of the provisions of this bill, may I repeat a letter that was written by the chairman of the Federal Energy Regulatory Commission, the letter of September 8? I will read the whole paragraph so as not to try to give any tilt to my response to the statement of the Senator from Idaho.

As you will note, the conference report is set out in elaborate detail. If one accepts the policy conclusions of the conferees as given, the question still remains whether the Act can be effectively administered and enforced. It is my basic conclusion that it can be. I could not have made the same judgment with respect to the July 31 draft.

This is obviously Chairman CURTIS trying to respond to the statement of unenforceability. But that is not the point that I raised with the Senator from Idaho. That point is now discussed by Chairman CURTIS when he says:

I must responsibly point out, however, the task of administration and enforcement of the statutory scheme will be most difficult. The legislation will necessitate an augmentation of Commission personnel and financial resources.

Augmentation of personnel resources? Why do you augment your personnel and your resources if the regulations are simple? It is an ambiguity, a contradiction.

He goes on:

a sustained and dedicated effort by members of the Commission and its staff and a high degree of cooperation of the various State and Federal agencies who are assigned responsibilities under it.

I might add indeed there will be increasing regulatory problems at the Federal level, and much of this will also be thrust on the shoulders of the various State regulatory agencies.

I do not see how it can possibly be argued here on the floor of the Senate that the legislation before us is going to simplify that which we already have. The only simplification which could occur which would be meaningful would be to go to a free market, to deregulate, total deregulation and decontrol. There you indeed would go ahead and simplify the process.

I realize that that is an impossibility, that there has to be some sort of a transition stage. Indeed, Pearson-Bentsen went ahead and complicated that in the course of the 2- and 5-year deregulation and decontrol. But 7 to 9 years, maintaining all the existing categories as they apply to old gas, changing really only the basic ground rules for new gas, and someone is going to stand on the floor here and say this actually simplifies? I do not care how you want to categorize. That is an argument in semantics. Believe me, when people say the bill is complex, it is complex and its enforcement is going to be complex. That is by the judgment of two people who sit on the agency responsible for that enforcement.

Now, Mr. President, I realize that partisan minds are every which way on this legislation, be it my Republican colleagues who have come out in support of the bill, in support of the President's position, or Democratic Senators opposed to the President, but there are a few political facts of life which I believe are worth mentioning. These are not directed, I might add, to any of my colleagues, but a rather general political situation which has existed without our Government for the past 4 to 5 years.

It could be argued back in 1974 that any sort of energy bill would be difficult to obtain in the sense that there was a split of authority between a Republican White House and a Democratic Congress. Indeed, I remember the tremendous efforts put forth by President Ford to go ahead and get everyone together. I might add, they were efforts which were joined in by both the majority leader of the House and of the Senate, both Albert and Mansfield. It was the inability to go ahead and deliver, so far as the troops were concerned in the House and the Senate, that had that matter fall apart.

In any event, no energy policy was achieved. We had arrived at that stalemate in our political system where the authority was split.

I do not think it improper to point out that of the politics in this country, and specifically the two-party system, which everybody likes to toot their horn about, every time I step up here and suggest we ought to expand our campaign financing and Federal communication laws, and all the rest, to encompass more than our two political parties, I get this big spiel from my colleagues about the importance of the two-party system.

"That is the way we have accountability. We do not want a fragmented system as in Europe."

The argument is not always new. Whenever I try to open up our political processes to see if be it in terms of being heard or terms of money, or all the rest, whether politics in this country really belongs not to two political parties but to everyone, the argument is used that the reason for having the two-party system is that we have accountability.

I do not accept that argument. I think it would be the greatest thing in the world to have a few more political parties around here and have a little more competition going. But for the purposes of what I am going to say, I will accept it.

Accountability—the greatness of the two-party system. Well, here it is, 2 years after the elections of 1976. No longer do we have that split in authority as between a Democratic Congress and a Republican President. We have a Democratic White House, and we have 2-to-1 majorities in the House and the Senate, of the same party. And after 2 years, the President has to go running around this town, using as the basis of his argument to pass the bill, "We need a bill." Two years have gone by and it is only in the last 3 weeks that the President of the United States has involved himself in the energy crisis. Those of us who sit on that conference—and I sit on that conference—did not hear a word from the White House for nigh onto 3 months—October, November, December. Finally, at the end of December, there was a little murmur out of the Energy Department, but no involvement whatsoever.

I think that, in terms of this accountability that we like to talk about in the two-party system, somebody has dropped the ball and, quite frankly, I am not anxious to go ahead and pick it up to, in terms of the quote of the day, "Let's have a bill." The President, when he went off to Bonn, said he points to the Congress. In a political sense, I do not think there is any question of the fact that a little effort, a little placing of this item high on the list of priorities, rather than delivering sermons out of the White House, rather than dividing our society by ripping various aspects of it apart—whether they are doctors, lawyers, or what have you—a little concentration on the homework at hand was in order. But none for 2 years. Now a mad scrambling around, just so he can say that he has a bill, when the political power has been there all along to make sure that we not only had a bill, but that it was a good bill.

I was not much in favor of the excuses of my own party when our administration could not produce a valid energy effort, but certainly, if I were critical of my own party or my own administration at this time—and I was—I am going to be doubly critical when it comes to an administration that enjoys the majorities that that administration enjoys, both in the House and in the Senate.

Again, I repeat, my criticism of the legislation before us is not on a partisan basis. I have supported this President in many of his initiatives and his endeavors—Panama Canal, human rights, many other measures on this floor. But this fails. This fails as to what it says, what it does, and, indeed, in terms of accountability, the President fails.

(Mr. SASSER assumed the chair.)

Mr. WEICKER. The dollar will be strengthened when we balance our budget at home. The dollar will be strengthened when Europe knows that we have our own energy supplies, that we have changed our lifestyle to cut down our energy consumption.

Parenthetically, to my good friend from Montana, when he says that rationing is abhorrent in the State of Montana, I say it is abhorrent in the State of Connecticut, also. That is the whole difficulty. Nobody wants to tread on anybody's toes around here.

Mind you, I did not advocate a repetition of World War II rationing. I recommended some system where you have a 6-day week for the automobiles, with a colored sticker on your windshield for the day of the week that that vehicle is not going to be in operation. I asked people to change ther lifestyle for 1 day a week, to keep that car off the road 1 day a week. I exempted agriculture and commercial vehicles so that we in no way stop the wheels of commerce in this country. I asked this country, for 1 day a week, to change our lifestyles to that extent. Even there, the answer comes out a loud "No."

No successful energy policy is going to be production alone. It has to be conservation. I realize that conservation is not in the bill before us, but neither is it in any bill coming up behind. It is miniscule. It will nowhere near do the job, either in terms of gas or oil, or anything else.

The bottom line of all this, Mr. President, is whether or not we shall have truly resolved the various problems posed to this country in an energy sense through the passage of this legislation. It is special-interest legislation. It satisfies some producers. I might add that I do not think there are many great marks that are going to be handed out to American business in their performance on this legislation. I have seen telegrams and letters from some of the large corporations in this country, saying, "For God's sake, pass it; pass it."

Where were these corporations—if I fault the President for his silence for 2 years, where have these corporations been for 4 years? Now, just at the last minute, something, some little glimmer out there, 7 to 9 years hence, in the large corporate scheme of things, is better than nothing, regardless of the hardships it will impose upon people during the course of those 7 to 9 years. So, maybe a corporation will not feel it, but believe me, the individual will.

Even among the energy companies now, there is a waffling going on. They feel that these guaranteed prices in the bill enable them to make some profit, with the prospect of a great deal more beyond that. I did not go ahead and

argue for deregulation and decontrol to satisfy them entirely. I argued for it because I felt it would bring a greater supply on stream and eventually lower the price. But there is enough in here, in this bill, for some corporations. So they are for it, albeit reluctantly so.

There is enough here for the philosophical and political types so that they can claim victory in either a philosophical or a political way.

For those that have espoused the theory of controls, they are not forced to admit they are wrong. They are allowed to tiptoe out of the room, so this bill is OK.

It is a patchwork of concessions to special interests. And now, speaking, as I said before, in the partisan sense, I am not willing to make the final concession to give a political—a political—victory to this President when I know it will be accomplished at the expense of the men and women out there who have suffered long enough with instability of supply and high prices. He talks sacrifice; yet he does not ask it, either of himself or his administration or of the voters in any meaningful way.

At one time, the centerpiece of his energy policy was the COET. Now he knows he has more than his match in our distinguished colleague from Louisiana and feels that possibly, that tax will not pass. Have you noticed how it is no longer the centerpiece of his energy package? It is now the natural gas bill that is the centerpiece of his energy package.

I might add, on the equalization tax, and hopefully, it will not pass, all that does is, instead of having the money go into the free market and to private enterprise, who would produce more, it goes into the hands of the politicians here in Washington, to send as they see fit. We do not need more politics, we need more energy. Fortunately, the scheme has been bared for what it is and so it will not be the centerpiece of his energy policy; it will be the rear end, if that.

My opposition to this bill is that it does nothing, in a physical sense, to give us credibility abroad, it does nothing in the sense of energy to assure that the people of this country will be able to escape from under the blackmail threat of foreign nations, it does nothing to enhance our national security in the sense of energy.

It might be a politician's dream come true, but it is going to be a consumer's nightmare.

I yield the floor, Mr. President.

Mr. BUMPERS addressed the Chair.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. BUMPERS. Mr. President, I wanted to take this time to make my decision known on what I intend to do on this bill. Some of my colleagues will recall I was one of the leaders on the floor when this was debated here. I fought strenuously for a bill more in keeping with the House provision to keep rather rigid regulations on natural gas pricing.

The so-called Pearson-Bentsen bill which we debated here and which the Senate finally accepted would have deregulated natural gas at a very rapid rate. I thought it was wrong, and at that time I expressed my reservations about the very fact I did not think it would produce any more gas, no matter how high the price. We were not going to get a lot of gas because every rig in the country was busy. The industry was then looking for natural gas and oil with picks and shovels because the price was adequate, and I so stated.

Since that time, certain things have changed, and I will talk about those in a moment. But I want to point out, we are living in the real world as it is and not as we would like it to be.

I do not take a great deal of pride in this bill, even though I helped mold this so-called compromise in those months of tedious, laborious negotiations. It is not a work which I want to leave to my grandchildren as one of my great legacies during my tenure in the Senate. But, as I say, we are dealing with things as they are.

We had a very tenuous coalition of about 10 Senators, and, many times, when as many as 2 opposed any proposal, we had to back up and start all over again because it takes 9 Senators to report a bill.

So it was a very unhappy and uncomfortable place for me to be all those months. Nevertheless, I stuck with it because, as long as it did not offend my conscience, it was in the best interest of this country and, certainly, better than doing nothing. About that time, I finally psyched myself up to become a rather ardent proponent of the bill. Then there is this brouhaha that the President has got a deal on breeder reactors with my distinguished colleague from Idaho, which dampened my enthusiasm considerably.

But I finally concluded it would not be fair to my constituents or to the Nation, to hold this bill hostage to my strong opposition to liquid metal fast breeder reactors and to what I thought was at inappropriate arrangement between the administration and the Senator from Idaho.

Suporting liquid metal fast breeder reactors is like saying that everybody in the country ought to have 20 pounds of plutonium in his back yard to use as he sees fit.

So, I finally concluded we were really talking about apples and oranges. even though I want to say here that my vote for this bill should not ever be construed as an approval of the deal the White House made with the Senator from Idaho, and, believe me, I have heard several versions of it and I do not know which one is right.

But, as I say, I decided to face that issue somewhere down the pike. It will be back before our Committee on Energy. I will talk to the President, the Vice President, and others about that later.

But I want to talk just briefly about the state of the Nation, especially in the field of energy.

If I were President of the United States and I was going to the House of Representatives tonight to address a joint session about the state of the Nation on energy, I would have to say that it is very poor. Nothing is going on. Consumption is up, imports of petroleum remain steady despite a million barrels a day coming down from Alaska, trade deficits will equal last year's devastating $27.6 billion or more, and inflation continues to run unabated, now at an annual rate of about 9 percent during the first 8 months of this year, almost double digit for the first 9 months.

We have seen the popularity rating of the President, which was 65 to 70 percent after his nomination in 1976, continually degenerate and deteriorate since that time until now it is something like 35 percent to 38 percent, maybe less.

I guess the press asked me as much as any other single question, "How do you account for this?"

Well, I do not know how to account for it, but I can state some of the thoughts I have. It is not because some of the initiatives he has taken have not been eminently correct. I even agreed with him on some of the water projects. My distinguished colleague from Colorado, of course, convinced me water is, indeed, the life blood of the West, and perhaps the President was wrong on some of those projects. He was certainly right about the one in my State.

But what else has he done? He torpedoed the B–1 bomber and the defense authorization bill. He was for the Panama Canal Treaties. He was for raising the embargo on Turkish arms. He was for the social security tax increase. He was for selling airplanes to Saudi Arabia and Egypt.

He was eminently right on those and a lot of other points. So why is his popularity so low? Well, because most of those things are not relevant in people's lives in this country. It has nothing to do with going to the grocery store day after day and seeing the price of everything going up at a high rate.

They have a tough time paying utility bills. They have a tough time paying grocery bills. Inflation is the only game in town to about 98 percent of the people of this country, and our President has simply not been able to deal with that problem in a meaningful way.

He has sent a tax reform bill to the Congress with which we have not dealt. He has sent a welfare bill with which we have not dealt. He has sent a stringent energy bill over here with which we have not dealt.

Those are the things that are relative in people's lives, and Congress has not dealt with a single one of them.

When he says that the tax system of this country is a disgrace to the human race, he could not be more right.

Mr. President, here is a chance for Congress to make a small beginning in doing something that is relevant in people's lives and dealing with a very critical issue. But to what have we been committed? What is this country committed to right now? We are not committed to anything, if Congress is any manifestation of popular thought across this country. We have continued to act as though there is no tomorrow, and that there is indeed a free lunch.

I will tell you what we act like. We act like that old saw, I say to the Senator

from California: We know the price of everything and the value of nothing.

This bill, as I said, certainly leaves plenty to be desired. A moment ago, the Senator from Connecticut talked about the complexity of it. It is indeed a complex bill.

I saw that famous memo from the Federal Energy Regulatory Commission—saying that it is an administrative nightmare, and I will not disagree with that. We did address some of those problems before this conference report was signed.

But let me ask this: How does the nightmarish potential for administering this bill compare to the absolutely bizarre batch of regulations that the Federal Power Commission is trying to implement now? It certainly cannot be any worse. They are sitting over there on 20,000 cases. They do not have the manpower to solve them, and they do not know how to solve them, because their own regulations are confusing. How could this bill possibly be any worse than a backlog of 20,000 cases which they cannot deal with right now because of their own regulations? It is Byzantine.

Do you know what the people in the business community in my State say to me when I go home? They say, "Senator, you know, we can take a lot of things. We may disagree with the government; we may disagree with your votes on a lot of things; but the one thing we need and want more than anything else is certainty. Just tell us what we have to live with, and we will live with it."

This bill is complex. It does not fit the purposes of any ideology of which I know. If you are a total regulator or if you are a total deregulator, this bill will not please you. If you believe that incentive can be furnished only by an exorbitant price or a decontrolled price, vote against the bill. If you think that you can hold gas prices down to what they have been for the past 20 years and solve the energy problems of this country, vote against the bill. It does not do either of those things.

The interesting Catch-22 situation here politically is that it does not make any difference how you vote. You are going to get it. Gas prices are going to go up. They are going to go up if we defeat the bill, and they are going to go up if we pass the bill. You just book that.

When you go home next winter, your constituents are going to be mad if you voted for this bill and it passes, because they are going to say that is what raised their utility bills. If you vote against this bill and it passes, you can always say, "I voted against that bill, so don't blame me." But if you vote against the bill and it fails, you get it again. They are going to say, "If you had voted for that energy bill, my rates wouldn't be so high. But you tried to kill the President's energy bill, and you did it, and now look at my rates."

Do you know from whom you are going to hear that the most? You are going to hear that from industry—not the gas industry. I am talking about manufacturers. You are going to hear it from manufacturers and from the commercial industry, because the one thing we have done in this bill is to put in a political provision called incremental pricing.

Do you know what incremental pricing is designed to do? It is designed to protect residential customers. When gas prices go up, these price increases will first be borne by industry, and residential homeowner will be the last one to absorb these increases in prices.

If we defeat this bill, the homeowner gets no protection from increased prices. If we pass the bill, they at least get the provisions of incremental pricing. So there you are.

I listened to the debate earlier between the distinguished Senator from Connecticut (Mr. WEICKER) and the distinguished Senator from Montana (Mr. MELCHER), and the Senator from Connecticut said there is no way for prices to go down if this bill is passed. That is not true.

I will say this: I worried when we were setting these prices that we were setting a floor instead of a ceiling, because if there is a glut of gas in this country in the next 2 years—and some of the opponents of this bill say there is a glut now—the assumption is that gas will continue to bring the price that is set out in this bill, anyway. Do not believe it. Prices can go down, and they will go down, just as they have gone down in the intrastate market.

A year ago, intrastate gas contracts were running around $2.10 to $2.20 a thousand cubic feet. Today, they are running about $1.75 to $1.80. Why? It is simple. It is a glut of gas on the intrastate market.

Incidentally, that brings me to another point. Do you know that agriculture is the first one that gets curtailed? Every winter since I have been in the Senate, the people who are in the soybean-drying business and the rice-drying business in my State come running up here and say, "Would you please call the Federal Power Commission for us? We have a case over there. We are trying to get them to give us more gas. They have our gas company curtailed, and they say they can't give us gas, and we can't dry rice." Therefore, they cannot export rice, and the farmers cannot get the money for their crop.

There is not a Senator in this body from an agricultural State who has not dealt with the same situation.

So what do we have in this bill? We have created a priority for agriculture. They are going to be the last ones curtailed in the future, as they should be. That is a little feature of the bill that some of the Senators from agricultural States should be thinking about.

Mr. President, there is another little point that many people do not realize. When I started out on this bill last year, I said that we should capture the gas that is in the intrastate market. As Senators know, one of the gross inequities in this country is that only about four States produce gas—Louisiana, Texas, Oklahoma, and California. I do not want to slight the State of Wyoming, I say to the Senator, but Wyoming is just not that big a producer. We produce in my State. The people in my State think we are a great gas producer, but the truth of the matter is that we import 80 percent of the gas we use in our State. Those four States produce 90 to 95 percent of the gas produced in this country.

What happens to it? Forty-two percent of all the gas in this country is being retained in those States, and it is being used in those States. The people in this body should understand one thing: 42 percent of all the gas being produced in this country, virtually every cubic foot of it, is being used in those four States.

Ninety percent of the electricity in Texas is generated with natural gas. We quit generating electricity with natural gas the first year I was Governor, and that is so long ago I cannot remember it. These producing States continue to use it for the most wasteful, profligate reasons.

What have we done? We were not able, because we could not get the votes, to say that this gas must be sold in interstate commerce. So we set up a pricing mechanism. There would be no incentive to keep it there.

There is a trillion to two trillion cubic feet in Louisiana and Texas right now that is being capped and being held and is not going to be sold in the intrastate market because the price is depressed. When this bill passes, that gas should move into the into the interstate market.

I will tell Senators something. If that does not shock a lot of Senators in this body and people across this country, I do not know what does. Think about 42 percent of all the natural gas in this country being held in four States because of a pricing mechanism.

So, if the Secretary of Energy is right and if the Department of Energy is right, this gas is going to start flowing across State lines and it is going to go into the Midwest and Ohio where the schools, hospitals, and everything else had to shut down the winter before last because it was not available in a lot of those Midwestern States, it will replace petroleum products that we are now importing from OPEC nations and helping build this $27 billion trade deficit which, in turn, is one of the principal contributors to inflation in this country.

It is only an embryonic beginning to save 350,000 barrels a day while we are using 17 to 18 million. Hopefully by 1985 we will save a million and a million and a half barrels a day. And that is a beginning.

I talked about the 42 percent of the gas that is being held in about four States. Of the other 60 percent that is traveling in interstate commerce, 40 percent of that is traveling at deregulated rates today. Why? Because we have a little loophole in the law. You send a form over to the Federal Energy Regulatory Commission and you say: "This is an emergency. I have a chance to sell this gas." And the buyer says: "I have to buy this gas. If I do not get it I am going to have to shut my plant down."

This is an emergency. And you can get those 30-, 60-, and 90-day permits as fast as the printing press will grind them out. The Federal Energy Regulatory Commission may be at fault. I am not defending this program. I am telling what the real

world is right now. I am telling that they are permitting those things as fast as they are filed, and 40 percent of the remaining 60 percent of the Nation's gas supply is traveling in interstate commerce right now at a deregulated rate. It is not totally deregulated. There is a $2.25 cap on it. But it is selling as high as $1.75 to $2.25.

So what are we doing? How are we damaging the country and the consumer so terribly when 42 percent of the gas is deregulated already because it is in intrastate commerce and 40 percent of the remainder is deregulated because it is being sold under these emergency contracts.

Mr. President, I was over at the White House the other morning and incidentally I have been getting invited over there regularly lately. While I was over there the other morning, William Miller, Chairman of the Federal Reserve System, made an interesting statement.

I think that economics is about the most imprecise science there is. I heard Mark Russell say one time he was up in Canada and he found out that the members of the separatist movement in Quebec refused to speak English. Mark Russell said, "We've got the same crowd down in our country. Only we call them economists."

William Miller is not an economist. He is a businessman. Apparently he has put the pencil to this. He says that for every 10 percent in the decline of the dollar, inflation goes up 1 percent.

The reason I keep tabs on this is because I have a son who goes to college in Germany. He is costing me a lot more money now than he did when he started. But if you compare the dollar with the German mark and all the other Western European currencies, in the past 18 months there has been a 20-percent decline. Against the Japanese yen there has been a 33⅓-percent decline. The Japanese yen right now is about 195 to a dollar. A little over a year ago it was 302.

That is the reason we have a $7 billion trade deficit against Japan, and we do not buy a barrel of oil from Japan. But we bought $7 billion worth more from them last year than they bought from us.

Talk about an insidious thief. Talk about the possibility of this bill causing an inflation increase of a quarter to a half percent. Let me tell Senators so they know what it costs the American consumer. Let me give some statistics.

This year we are going to import $160 billion worth of goods from all other countries. Of that amount, let us just say, for hypothetical reasons $50 billion of that is oil. That leaves $110 billion of all products except oil. If the dollar goes down 20 percent in 1 year, and that decline is reflected in increased prices of that $110 billion, we are paying $22 billion more at the end of this year for just those imports, $22 billion in 1 year for those imports than we would have paid if we had an even trade deficit and the dollar had been stable.

Senators come in here and say, "My gosh, this bill is going to cost $9 billion between now and 1985."

That is less than half the inflated price we are paying for merchandise in 1 year because of the decline of the dollar.

Other Senators say: "Do not think these foreign bankers and these foreign countries are idiots. They have good economists. They know what this bill is. Do not think for an instant we are going to pass off some cosmetic piece of product or piece of goods like this as a really good beginning toward curbing consumption habits and dealing with energy. They are not going to be fooled."

I am not asking them to be fooled. I think more of the bill than that. I think the bill is a beginning and a beginning we must make.

I tell Senators finally that if we do not pass this bill we can just forget it until after the 1980 election. I know the politics of the thing and everyone in this body knows the politics of the thing.

There will not be an energy bill of any substance until after 1980 unless we do it now.

The Senator from Colorado had the courage and the good sense to get up here in the Senate the other day and put the solar energy tax credits on a rather innocuous tax bill because we all know the so-called uncertainties of the President's energy policy. The crude oil equalization tax is not going to pass. I hope they stand up in conference.

That brings me to another point. Until we get this bill passed, we are not going to pass coal conversion, we are not going to pass utility rate reform, and we are not going to pass the conversion bill. They are vital. They are important, and they will make a very significant impact on this country's problems.

Mr. President, I intend to vote for this bill. I have not reached this decision lightly or easily. I think it will be much better for us to correct whatever inequities there are in this bill next year and the year after than it will be to start again in 1981. So far as I am concerned, the cow is not only going to be out of the barn but she is going to be out of sight by 1981.

We can deal with it if there is something there. This is a chance for this body to do something that is relevant in people's lives.

I yield the floor, Mr. President.

Mr. HART addressed the Chair.

The PRESIDING OFFICER. The Senator from Colorado.

Mr. HART. Mr. President, like the Senator from Arkansas I intend to support and vote for this bill. I think it is unfortunate that the statement which the Senator from Arkansas has just made will not be more widely available not only to our colleagues but also to the people of our country because I think it is one of the best arguments I have heard on any side of this issue in the last year and a half, and I wish to commend him for his remarks and to associate myself with them.

Mr. President, the issue, as difficult as it is before the Senate, is not whether to deregulate natural gas. The issue is whether the Government of the United States can work.

If I had any convictions whatsoever that the parties-in-interest to this legislation had moved one iota toward each other and indicated any willingness to find any common ground between the producers, on the one side, and the consumers, on the other, that would produce a consensus that all those warring factions could live with, and that this country could go forward with in its economy and in its energy program, then I would vote against this bill.

But right there today and for the last week or two in the reception room of the Senate we have had representatives of the major oil companies, we have had representatives of every consumer group, we have had representatives of most of organized labor demanding that we vote against this bill, saying what a horrible, terrible bill it is.

Well, they produced it. It is the factions in this country that cannot get themselves together that have to take a lot of the responsibility for the kind of legislation they claim they do not like.

If there were any suggestion at all to the Senators in this body that those factions that have divided themselves so deeply, not only within the course of the last few weeks but in the last 2 years on this issue, could get together on some common principles of what they think a good natural gas bill should be, then I for one, would vote against this bill tomorrow.

But there is no indication of that.

The big oil and petroleum and natural gas companies are as far away from the consumers as they were 2 years ago. The consumers are as committed to keeping the price unrealistically low as they were 2 years ago. Many of the producers are committed to getting immediate and total, unequivocal, deregulation as they were 2 years ago. You can go on and on about every group that has lobbied every Senator here and every Member of Congress.

I say, Mr. President, this bill is a classic piece of representative legislation. If it is a hodgepodge it is because the poor conferees attempted in the best way they knew how to accommodate everybody, and if I had been one of those conferees I would probably have done just the same thing. There is something for the producers. there is something for the consumers, there is something for this group, there is something for labor, and then every one of those factions comes in and says, "Yes. but it is a complex bill." Well, I wonder why.

I found in my 4 years in the Senate almost that when you are doing what somebody wants you to do, you are representing them the way they think you should. When you are doing something that they do not want you to do and they do not like, then suddenly you have abandoned your connection with your constituency, you have no concern for the electorate; you do not care about the people you represent, and all the rest of it.

Well, this bill is not perfect. The Senator from Arkansas, I think, has pointed out in what ways it is not, and the opponents have pointed out the way in which it is not perfect. But in many ways, Mr. President, it does what needs to be done. It deregulates natural gas,

which is what needs to be done, but it does it over a period of time so the shock on the economy is not so great as to send this country into a tailspin.

It has a variety of categories of natural gas—probably too many. But it offers more certainty and more guidelines to the people who have to administer it than the people have today.

It will not encourage as much production of natural gas as, perhaps, some other piece of legislation, but it will encourage a lot more production.

We could go on and on about what this bill will not do but, Mr. President, I think it goes a long way toward doing what needs to be done.

On the matter of natural gas, on energy or the economy or anything else that has this country so deeply divided and has this reception room packed with representatives of one faction or another on every issue we face, until we learn how to sit down and reconcile our differences among each other in a better way than we are doing it today, this Government is going to continue to stumble along, and this country is going to continue to stumble along.

I, for one, am sorely pressed to be sympathetic with groups that say they do not like this bill or that bill. And they had as much to do with the product as any of us had in terms of their pressure and their lobbying and all the rest of it.

The real test before the Senate is not whether we can pass a natural gas bill; I think the real test is whether this country can be governed.

Our job is to try to point out to people how they can get together; but until those people are willing to get together on this issue or any one of a hundred of others we are not going to be the kind of country we ought to be, and I think that is a shame.

Mr. President, I think the issue is whether this Senate can decide, whether it can act, whether it can make a decision, and whether it can move on. We can do better. We can do a better job than we did on this bill. But I do not think we can do it without the support of all of those groups that have played a role in the framing of this legislation, better support really than we have gotten, more accommodation and more consensus, and that is my hope on energy and economic issues and foreign policy issues for the future.

Mr. President with regard to natural gas legislation presently before us, the specific issue is whether to support an extremely complex bill, which eventually deregulates the price of natural gas. Support for this bill cannot be based solely on what is in the bill, however. That support must also take into account likely energy and economic events if the bill is defeated.

My vote in favor of this natural gas compromise legislation is based on belief that it is preferable to maintenance of the status quo. I wish Congress could have developed a better proposal, but I believe this bill is superior to the situation we have now. It does resolve some of the problems which have plagued both producers and consumers, and it gives an important and strong signal to nations around the world that we are committed to reducing our dependence on foreign oil and our profligate energy consumption.

As we learn to live with this bill and the new policy it puts forward, we may find areas which need clarification and improvement. I am committed to help insure that Congress takes any necessary steps in the future to accommodate this legislation to changing circumstances.

KEY PROVISIONS OF THE BILL

Before discussing the broad issues, I would like to discuss the provisions of the bill itself. There are three key criteria to judge natural gas pricing and regulation proposals. First, the price of gas must be high enough to assure maximum supply to consumers.

Current prices for newly discovered natural gas are approximately 40 percent below the price of fuel oil. Current price regulations, in effect, prohibit a gas producer from marketing gas which may cost more than current supplies, but is still cheaper than imported oil. This situation is not logical during today's need to rely more on domestic energy and less on imported oil and gas. It is in the consumers' interest to substitute domestically produced for imported oil.

The natural gas bill before us today improves the pricing situation for new gas. This bill would gradually decontrol the price of newly discovered gas over a period of 7 years. To maximize the search for new gas supplies, I would personally prefer that newly discovered reserves, which require great risk to find, be deregulated immediately. However, the bill before us is an improvement over the status quo. It will result in some additional new supplies.

The second criterion for a sensible natural gas policy is that the price of previously discovered gas be kept in proportion to the cost of producing it; that is, cost-based. Consumers should continue to be protected by regulations which prevent the price of old, inexpensive gas from rising to the price of new, hard-to-find gas.

This bill maintains cost-based prices on most old gas. The exceptions to this rule occur primarily in the form of higher prices for old gas previously sold only in the State where it was produced. This legislation offers a price higher than costs for old intrastate gas as old contracts expire, but is in fact a relative bargain.

Without this legislation, when contracts expire, the old intrastate gas might instead be sold at a higher, deregulated price. Also, gas from new wells in previously discovered reservoirs will get a very high price. With this bill, consumers in States like Colorado and Ohio will be able to buy gas which otherwise would remain in States like Texas and Louisiana. While these categories of gas may be priced above its cost in the State where produced, the gas will still cost less than substitutes such as oil in the State where consumed. Thus, again the bill in question is an improvement over the status quo.

The third criterion is that a single, national market be created for newly discovered gas supplies. Currently, producers of new gas tend to sell it mostly in the producer States where unregulated prices are higher. This creates an excess supply of gas in some States and shortages in others.

The proposed legislation corrects this situation by regulating the price of intrastate sales, as well as the price of interstate sales, until 1985. During this period producers will have equal incentives to sell in all States where consumers are willing to pay the controlled price.

Another major question about this bill is its enforceability. This bill is extremely complicated, because it contains about two dozen different categories of gas. However, complicated enforcement is different from weak enforcement. This bill contains extensive details and guidelines so regulatory bodies and producers will be able to determine the appropriate price for a given sale of gas. The bill also contains strong enforcement measures to assure strict compliance.

The Chairman of the Federal Energy Regulatory Commission, Charles Curtis, said this week that the mechanisms to enforce this legislation are more substantial than those presently available. Mr. Curtis has stated that he believes this legislation can be administered and enforced effectively. I truly hope that he is right, but I will be ready to sponsor improving legislation if it becomes necessary.

EFFECTS ON PRODUCERS AND CONSUMERS

As a result of the higher gas prices under this legislation, we can expect that the current high rate of drilling will continue for many years, and more new reservoirs will be discovered. Our energy supply situation will probably not be greatly changed by this legislation, but this legislation should allow our country at least to maintain its current level of gas production for a decade or two. Without new reserve discoveries, we would run out of gas in a decade.

The higher prices in this bill will also give all consumers greater incentives to conserve gas, and to shift to more abundant fuels such as coal and solar energy where they can. In the near future, this bill is actually quite minimal in its impact on residential consumers, agricultural users, and on small industrial boilers. These categories of consumers will not pay the higher gas prices for some time. Instead, the higher gas prices will be allocated to large industrial boilers, until these prices rise to the equivalent price of fuel oil. Only then will the higher prices for new gas be averaged in with the price of old gas used by residential, agricultural, and other commercial users.

This gradual approach is particularly good because it allows time for households, farmers, and most businessmen and women to plan for higher gas prices and to adjust their use accordingly.

OTHER MAJOR CONSIDERATIONS

To decide on this bill, one must also consider what would happen if this bill fails. Based on extensive discussion with my colleagues in the Senate and in the administration, I truly believe that this is the only chance for passage of major

gas legislation for several years. If this fails, we would be left with the status quo, which not only deprives consuming States of needed gas, but also deprives producers of adequate incentives to maximize new supplies. Failure to pass this bill will not resolve the issue for anyone. Failure to act is not a solution. Nor is recommittal. With the status quo, producers will continue to push for complete deregulation, and many Members of Congress will try to achieve that. This unsettled situation will also encourage some producers to postpone the search for new reserves until they can be assured a deregulated price. Thus, we need this gas bill to give producers the certain information now that the risks of searching for new reserves will be rewarded with higher prices in the mid 1980's.

Another major consideration is the bill's symbolic meaning for the world money market. Currently, the price of the dollar is declining in relation to European and Japanese currencies. This decline is due to a fundamental imbalance in our trade, particularly in energy, steel, agriculture, and automobiles. Passage of this gas bill will not improve our energy trade imbalance for several years. However, it will give a strong signal to the world's bankers that the United States is taking medicine which will put us on the road to recovery from our addiction to imported oil. This will provide at least a temporary boost to the willingness of international bankers to hold dollar reserves. As a consequence of this legislation, sales of the dollar should decline, and the value of the dollar in relation to other currencies should stabilize.

COMPARISON WITH STATUS QUO

All of these arguments in favor of this bill are compared to the status quo. If I could be given reasonable assurances that the status quo could otherwise be improved, I would be less inclined to support this legislation. However, the current interpretation of the Natural Gas Act of 1938 is that intrastate gas sales cannot be regulated, and that interstate sales must be. This law, in effect, established a dual gas market which is sorely in need of correction.

Similarly, if I could be assured that the interests of gas consumers and gas producers would coalesce on an improved gas bill during the next year, I would also be less inclined to support this particular bill. However, consumers interests seem to be more intent on keeping gas prices low during the next 5 to 10 years than on encouraging more supply or the developing of domestic substitutes which will be cheaper and more plentiful than imports.

Domestic producer interests seem to be more intent on receiving higher prices for new wells drilled into fairly well known areas than on taking risks on drilling into truly frontier areas. These conflicting interests do not appear willing to compromise and, given this inflexibility, I doubt that a better gas bill can be passed in Congress within the next 5 years.

SUMMARY

In summary, I will vote to accept this natural gas bill as the preferred alternative to inaction. Otherwise, continued regulation and continued price uncertainty will slow the search for new reserves and the transition to greater conservation of this precious national resource.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. HART. I yield.

Mr. ROBERT C. BYRD. I want to thank the Senator for a cogent, lucid, persuasive, well-reasoned and courageous statement.

I have listened to his reasoning and I have found it to be excellent, able, and clear. I compliment the Senator on the decision he has made, and I also commend him on the rationale on which he has based his decision.

It is not a single proposition; it is for a number of excellent reasons which he has well articulated, and I again commend him.

Mr. HART. I thank the majority leader, Mr. President, for his kind remarks, and I appreciate the sentiments behind them.

Mr. WALLOP addressed the Chair.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. WALLOP. Mr. President, I, too, have listened with interest to the remarks and the reasoning of the Senator from Arkansas and the Senator from Colorado. I have to say that I find myself in disagreement with them, and cannot, for the life of me, come in front of the Senate and say that because I disagree I think that I, and others who feel the same way, ought to somehow or other apologize for the posture that we take.

It seems to me that the process that the Government of this country was designed to provide to the American people is the process we are indulging in right now. I do not think it is all a question of whether or not we can be governed. This is the act of governing, and the decisions before this body are more than just to accept and roll over and take a compromise constructed by people who basically have no interest in the result in terms of either their States or the country or whether we, who have parochial and nationwide interests, are allowed to participate in this debate with our heads in the air. I do not see any reason to apologize for having a different view from that of the Senator from Colorado or the Senator from Arkansas.

Their arguments were lucid, but I just happen to disagree with them, and I do not find that a reason to apologize either to the Senate or to the country.

Mr. HART. Mr. President, will the Senator yield?

Mr. WALLOP. Yes, I am happy to yield.

Mr. HART. First of all, I do not attempt to speak for the Senator from Arkansas, but I do not think there was anything in the remarks I made or the intent behind them that suggested everyone should agree with me, or that if anyone did not, they should apologize.

I was commenting on the fact that this bill was being heavily lobbied against on the ground that it was not very good, by people who have not taken one step toward the people they have been tilting with for 2 years to start putting out something better. This body has labored, the House has labored, and heaven knows the conference has labored mightily to achieve this result, and now people come in and say that since we have tried and failed, in their judgment, they have to vote against this measure.

If those same people who have been working on the House, working on the Senate, and working on the conferees showed one degree of reconciliation with each other, I would vote against this measure, but I have seen not one degree of reconciliation between producers and consumers in the last 2 years.

The Senator does not need to apologize. All I am saying is that until we approach this problem of cementing this society back together, we are going to keep stumbling along. I do not think an apology is necessary.

Mr. WALLOP. I think that is very adequate democracy, stumbling along. That is the legislative process. We are involved in the very thing we are designed to be involved in.

All I am saying is that the Senate came up with something which, in my judgment, was unfortunately better when it left this body in the first place, but saying that those in opposition to this are intransigent and have very little alternative to offer is hardly a derogation of the democratic process.

Mr. HART. It is not that the people who oppose it do not have alternatives. It is they cannot sell those alternatives to the people who disagree with them. Of course, everyone has alternatives. I have a perfect natural-gas bill, but I cannot get a consensus for it. The producers have their solution to the problem, but they cannot get a consensus for it.

Mr. WALLOP. Is a consensus required, simply because we are at this time in history? Do we take a piece of paper like this, regardless of what it contains, stamp it with big red letters "energy bill," and then say we can hold up our heads in the world, or do we try to achieve what those of us on this side of the issue believe is in the best interests of the country?

Mr. HART. What indication does the Senator from Wyoming see that anything has changed in 2 years? What indication is there?

Mr. HANSEN. Mr. President, will the Senator yield to me for a moment?

Mr. WALLOP. I will be happy to.

Mr. HANSEN. If I may give the Senator one little ray of hope, I would say he should direct that question to the junior Senator from Washington. He has been on record, and has said so repeatedly on this floor for a number of years, as being opposed to deregulation. And now who has shepherded this compromise through secret sessions, despite the fact that he was the one who first came forward and said we are going to legislate in the sunlight, we are going to let the American people know what goes on behind closed doors and in smoke-filled rooms?

It was he who said we are going to lay it all out in the open, and it is he who, today and on previous days, has been on this floor saying that now, reluctantly, he has come around to the conclusion that

we are going to have deregulation. That is Senator JACKSON.

Now, maybe that gives no encouragement to my friend from Colorado, for whom I have the greatest respect, but it does indicate to the Senator from Wyoming—and I suspect maybe to both Senators from Wyoming—that it is just possible, as Cromwell said, we must consider there is the possibility that we could have been wrong, you know, or that someone else may have been wrong.

I think what we are seeing today is the frustration and, indeed, the anger of Americans in seeing we have followed a procedure for some 25 years or more that has insured low prices, but what it has also insured has been shortages, has been discouragement of those in the field of drilling. We have witnessed about 75 percent of the wildcatters going out of business simply because there were better ways of making money. Now I think that is what the Senator from Washington is reflecting when he champions this bill that says we will have deregulation 7 years away. Of course, as I pointed out, and as has my colleague from Wyoming, actually right today 48 percent of the gas is deregulated.

These are not my figures; they come from the Energy Information Administration of the Department of Energy. And the interesting thing is that by their own examination of the facts——

Mr. FORD. Mr. President, will the Senator yield?

Mr. HANSEN. Not for just a moment yet, because I want to tell you what the facts are.

Mr. FORD. I want to help you keep them straight.

Mr. HANSEN. And I want to keep you straight.

Mr. HART. Will the Senator yield, before he gets into the facts? You two can argue the facts; all I want to say is this: If there were more Senators like the Senator from Washington, who had to concede on a point, and the Senator from Kansas, who had to concede on a point, then we would get somewhere. It is the people who will not concede anything who are holding things up. And I am not talking about any Senator; I am talking about the fuel men in this country. So I applaud the Senator from Washington and I applaud the Senator from Kansas, who fought as hard as they could in the Senate for deregulation.

Mr. WALLOP. If we are talking about the process of legislation and the processes of democracy, when there is a person against deregulation and a person for it both saying "This is the best we can do" that is the kind of thing we are talking about.

Mr. HANSEN. If my good friend and colleague from Wyoming will yield, and I do not wish to intrude on his time——

Mr. WALLOP. I will be happy to yield.

Mr. HANSEN. I just want to make this point: I am just saying that this so-called deregulation will not in reality deregulate anything for at least 7 years. It will impose total regulation of one kind or another on all of the gas, all of the gas in this country, from the time that it becomes law, if indeed it does become law, until 7 years down the road, and then, by the admission of the Energy Information Administration of the Department of Energy, only 37 percent—only 37 percent—of the gas 7 years down the road will be deregulated, as contrasted with 48 percent which is not now deregulated.

I want to join my colleague from Wyoming in saying that it seems strange—and I have done it, and I have great respect for my good friend from Colorado—but it seems strange that when people do not agree with us, we get up on the floor of the Senate and deplore the situation. We always seem to question the ability of the country, as my good friend from Colorado has said, to govern ourselves.

I think what we are engaged in right now is that act of governing. We are doing what my colleague from Wyoming says this institution is designed to do. I do not see anything wrong with that.

You know, I remember one of the first times I was in the Senate, when the late great senior Senator from Illinois, Everett Dirksen, stood where my distinguished colleague from Wyoming now stands, and said that in time there is a way that this body comes around to the right decisions.

The reason we are here today is that we would hope that when more Senators are aware of what the facts are, when more Senators understand that despite our futile efforts time after time after time to repeal the laws of supply and demand, we cannot repeal them. As we have pursued a policy of natural gas regulation, to say the laws of supply and demand do not work, all we found out that we have encouraged excessive use of natural gas; we have discouraged American entrepreneurs and American drillers from going out and trying to find more natural gas; we have increased our dependence upon foreign sources of supply; we have brought about a great outflow of dollars in this country, simply to buy gas and oil abroad that we could have been purchasing here more cheaply, employing Americans here in more and more jobs, adding to the strengths of this economy, insuring the security of this Nation by decreasing our relative dependency upon foreign sources, simply because I think we have been too hardheaded to recognize what the facts are.

I thank my colleague from Wyoming. I say to him that I have enjoyed very much working with him these last 2 years. As I anticipate leaving this body, I do so with the full confidence that the State of Wyoming is going to be extremely well-represented in one MALCOLM WALLOP. I thank my friend.

Mr. FORD. Will the junior Senator yield for a question?

Mr. WALLOP. If the Senator from Kentucky has anything half as nice to say as that, I would be happy to yield.

Mr. FORD. Well, I am not going to say anything real nice, but I am not going to say anything real bad.

Mr. WALLOP. OK, I would be happy to yield on that rather nebulous basis.

Mr. FORD. Well, it is nebulous, but that is about as good as you can get, I guess. Are you going to vote for recommittal?

Mr. WALLOP. I intend to vote for recommital.

Mr. FORD. Do you know what you are going to vote on?

Mr. WALLOP. How do you mean that?

Mr. FORD. You do not know what the recommittal motion is going to be?

Mr. WALLOP. To the extent I have read it, the recommittal motion will bear instructions with it.

Mr. FORD. But they are changing it now. They are calling Senators asking, "Would you vote for this if we add this onto it?" We have not seen the recommittal motion. You have not seen the final recommittal motion. But you are committed to vote for recommittal.

Mr. WALLOP. I would say this to my friend from Kentucky: If there was an unsatisfactory recommittal motion, I would vote to kill the conference report as it lies right now because I think it is destructive to the future of this country.

Mr. FORD. But the point I want to make is we are going to get a recommittal motion tomorrow or Thursday, and the Senator is committed to voting for something he has not seen.

Mr. WALLOP. Does the Senator from Kentucky say he is going to vote against recommittal?

Mr. FORD. I do not know. I have not seen it. I do not know what is in it. I cannot make a judgment, but you have.

Mr. WALLOP. I can make a judgment to say this, that I would sooner recommit this bill than to see it go forth and become law. If the recommittal motion is not satisfactory, I will join the Senator from Kentucky in voting against that and just vote to kill this conference report.

Mr. FORD. I think we ought to vote up or down on the conference report.

Mr. HANSEN. Will my colleague yield for one further observation?

Mr. WALLOP. I would be happy to yield.

Mr. HANSEN. I would like to say to my good friend from Kentucky that I hope he will not impose the same standard that he has just suggested to my colleague from Wyoming on all Members of this body because if he does my guess is that there will not be very many people voting for this bill. I venture to say that not more than as many Members of this body as I have fingers on one hand know what is in this bill. I say further that when they got it all signed on and when they got the signatures affixed to it, they had some further difficulty. They had to go back and change the language on 119 pages. What was a work report, a tentative work draft, insofar as I know, has never yet been finalized.

I say also to my friend from Kentucky that my colleague from Wyoming and I have had several conversations on what likely will be contained in a recommittal motion. I think it begs the question to have the kind of question asked that my friend from Kentucky asked. When someone writes me and asks will I vote for this bill or that bill, oftentimes, on the basis of experience, it has been my duty and responsibility to say, "Well, you know, I am not going to tell you categorically that I will vote for the bill."

I remember when the senior Senator from Massachusetts (Mr. KENNEDY) one time offered a bill, and we had some

inquiries from Wyoming people wanting to know how I was going to vote on that bill. I told them. Before that bill finally was voted upon in this Chamber, it had been amended and changed to the extent that the Senator from Massachusetts had to speak against his own bill.

I think it is cute, it is interesting, to ask my friend from Wyoming if he knows what is in the bill. Obviously, until it has been put on the floor and any amendments may be put to it, I would defy anybody to say precisely what is in it.

I can say one thing: My good friend from Wyoming has a pretty good concept of what we are talking about. There may be some changes made. There may be some more changes made. I suspect that we are going to incorporate, if needed, into that recommittal motion enough ideas that will be appealing to enough people that we would hope that it can pass. It is on that basis that I think he and I are going to be working in that direction.

I thank my friend from Wyoming.

Mr. FORD. Will the Senator yield for one additional point?

Mr. WALLOP. I am happy to yield.

Mr. FORD. The senior Senator from Wyoming has a great deal of experience. He is articulate, intelligent, and very forceful in his statements. He has been on many conference committees, many more than I have been on. I have only been on a few in the 4 years I have been here. But the senior Senator from Wyoming must know that the document that was sent around was a draft to see if those on the conference agreed with the language. There was not 100-percent agreement. I am sure he has read a draft before and wanted to change a word or two. There were changes when the draft went around. No one had signed at the time the draft was sent around and the changes were made.

I just want the Senator from Wyoming to understand that, yes, there were some changes, but I thought it was the usual procedure that was used as a result of a conference report and a conference bill and would be similar to those on which he has served in the past.

Mr. HANSEN. There is just one exception, if I could take one more moment, and I apologize to my good friend from Wyoming. This really was not a conference report. It was a star chamber production that carried on over several month's time, meeting in secret session, without all of the conferees even being there. I would have to say that that is most unusual, as far as I know. That is the first time that I have been a member of a conference and have been excluded by selected conferees and was told repeatedly I was not welcome, that I could not participate because this kind of deal required backroom finagling.

They had, so I am told, the Secretary of Energy there; they had, at times, the Chairman of the Federal Energy Regulatory Commission there; they had administration officials coming and going. But they did not have all of the conferees there. So I have not read it. I think I have a fair idea of what is in it. I would have to say that you can say this is a common procedure if you want to, but it is a most uncommon procedure so far as I know. It is the first time to my knowledge that this kind of backroom, star chamber, secret-session-in-the-dark-of-the-Moon deal has been worked out without all of the conferees who were legally entitled to be there being permitted to participate. I shall not impose further.

Mr. WALLOP. I will say to my good friend from Wyoming that it has been kind of a Halloween sort of arrangement, and in some respects would bear on the questions and arguments of the Senator from Colorado that he had not seen any give on the part of those who were opposing it. It is pretty hard to give when you are not allowed to go to the party.

Mr. FORD. Will the Senator yield on that?

Mr. WALLOP. I would be happy to yield one more time. Before I yield, I would just say one other thing, that the standard that the Senator from Kentucky suggests, that everybody know exactly what is in that motion before they commit to it, is an admirable standard and I only wish the Senate would follow it on everything.

Mr. FORD. I try. I only want to say that on every conference every conferee was notified and invited to every meeting of the conference. I do not think the senior Senator from Wyoming will deny that every conferee was notified and invited to every meeting of the conference.

Mr. WALLOP. It is funny how the stories change. I would not suggest there was any way that perhaps the conference was not conferring, that the deal was made before the conference got there. I think that probably more accurately describes it than saying every Member was invited to the conference and had the opportunity to participate in the thing that lies in front of us.

Mr. President, I have some other concerns with the legislation to the extent that we know about it. Admittedly, it is a funny deal that we have to sit here and argue about something that is still held secret, but apparently, that is the face that we are required and requested to accept. But to the extent that the knowledge about it is out, I should like to express the reservations that I feel.

The Natural Gas Act of 1938 was a piece of New Deal legislation designed to insure that consumers paid "fair" prices for gas sold by a natural gas monopoly—for example, the pipeline industry—which was just beginning to develop at the time of passage. In many producing areas, single pipeline buyers were often able to dictate Federal prices. As initially interpreted by the Federal Power Commission, only the pipelines' transportation tariffs were regulated.

Wellhead prices paid to gas producers were excluded in this early interpretation by a section of the act which states,

> The provisions of this act . . . shall not apply . . . to the production or gathering of natural gas.

The FPC operated under this interpretation of the Natural Gas Act until 1954, when the Supreme Court, ignoring the language in the act, ruled in the Phillips case that the FPC indeed had regulatory responsibility for production and gathering. In a dispute with Phillips Petroleum, the Wisconsin Public Service Commission successfully sued the FPC to force them to take jurisdiction over the sale of natural gas in interstate commerce.

In 1956, Congress lifted this court imposed mandate by passing the Harris-Fulbright Act. But the act was vetoed by President Eisenhower, who sympathized with its content but felt compelled to do so because of "arrogant lobbying" for its passage and allegations of bribery.

The FPC, which became the Federal Energy Regulatory Commission (FERC) in 1977, regulates interstate natural gas by setting and enforcing nationwide rate schedules. Although exceptions exist, there are basically two operating rate categories. "New" gas—discovered from wells where drilling commenced after January 1, 1975—brings $1.50 per thousand cubic feet (Mcf) at the wellhead. "Old" gas from expiring contracts is allowed a rate of about $0.50 per Mcf. All rates are subject to adjustments for Btu content, State severance tax reimbursement, and gathering allowances.

The intrastate market, which consists of natural gas produced and consumed within State boundaries, is regulated by State statute. New Mexico is the only producing State that has placed wellhead price controls on intrastate gas.

President Carter rekindled interest in the natural gas issue by making it a part of his campaign promise. In a letter to the Governors of producing States he supported deregulation, then reversed himself when he introduced his national energy plan. Under his post campaign proposal, the Federal Government would continue price controls on gas sold in the interstate market and, for the first time, regulate the intrastate market.

The House agreed with that concept, but as we all recall, in the Senate we did not.

Voting last year, by a narrow margin, the Senate chose to remove price controls on "new" natural gas and to continue to prohibit Federal regulation of the intrastate market. Price controls on "old" interstate gas continued under both bills.

When members of the House-Senate conference committee met several months ago to resolve their differences in approach, they had to answer one question: Should price controls on new natural gas be lifted or continued? Their answer has to astonish anybody who takes a look at it: To create 17 new definitions of natural gas, each of which could be priced differently. After 1985, some gas would be deregulated. Several new rate categories were established. To "new" and "old" gas, the conferees added; "incentive" gas, "stripper" gas, "high cost" gas, and four categories of "roll over" gas. "Roll over" rates are price ceilings placed on expired contracts that are being renegotiated. This should not be confused with "roll-in" pricing which enables the cost of more expensive gas to be averaged (or rolled-in) with less expensive gas.) It

could best be describe as "How to complicate friends and influence no one."

But the conferees made the pricing even more complicated than merely creating new rate categories. They compounded the regulatory problem by inventing several more tests to establish how gas would qualify for different rate categories. The old dividing line was simply the date that drilling began on the well. Under the "compromise" a maze of new factors comes into play. They include whether or not gas is offshore or onshore, interstate or intrastate, and from old or new reservoirs. Other factors which determine the price are; the depth of the well, the date of drilling, the date the lease was signed, the type of formation, the distance from existing wells, the rate of flow, and the date gas was discovered. FERC is to digest all of this information and then assign the gas to one of the rate categories. Oddly, the factors have little scientific or geological significance. They exist primarily in the conferees' minds.

Traditionally, the Federal Government limited its role to setting the price that interstate pipelines purchased gas at the wellhead. The resale (or burner tip) price has been approved by State public utility commissions. That, too, will change under the "compromise."

This legislation orders the States to incorporate an incremental pricing mechanism into their ratemaking process. Incremental pricing, a mixed blessing, is one of the most controversial measures in the bill. It puts the burden of higher costs on only industrial users.

Previously, expensive gas was "rolled-in" with less expensive gas and an average rate was established. That rate was then shared by all users on a pipeline system industrial, agricultural, small business, schools and hospitals, and residential.

By way of illustration, assume that equal amounts of $0.50 Mcf "old" gas and $1.50 Mcf "new" gas are available to an interstate pipeline system. Under existing law, the two categories would be blended together—rolled-in—to establish an average wellhead cost of about $1 per Mcf for all of the customers on the system. Under incremental pricing, industrial users must buy all of the "new" gas at $1.50 per Mcf. The rate for other users would remain at $0.50 per Mcf.

The intent of this provision, which is to discourage large volume consumers from using natural gas, is understandable. But there is an albatross that has been overlooked in the "compromise." Although many industrial users will indeed be forced off natural gas, environmental constraints may prevent them from switching to coal. If that is the case, their other option would be fuel oil—a move that would increase our dependence on foreign oil. The whole idea—now lost to us—was to relieve our thirst for imports.

As more and more industrial users abandon a pipeline system, other problems arise. The fixed costs of operating a line are left to the remaining customers. A half-full line has about the same fixed cost as a full one. If the industrial users make a small percentage of the total load—the impact will be minimal.

However, in Wyoming, 50 percent of the gas consumed in the State is by industrial users. Naturally, some residential growth would occur to offset the loss of the industrial sector. But it is still likely that the Wyoming result of incremental pricing will be a more expensive and inefficient distribution system.

FIVE KEY QUESTIONS

WHAT IS THE IMPACT ON CONSUMERS?

It is difficult to evaluate the cumulative impact on residential consumers. Charts and graphs have been displayed in abundance during the debates but none have produced an accurate prediction of the nationwide impact.

As already noted, incremental pricing could burden homeowners, and small businesses in interstate systems. Yet the most immediate jolt will be felt by consumers served by major intrastate pipeline companies, including residential consumers in Wyoming.

New rate increases will be precipitated by a contract phenomenon known as a "most-favored-nation" clause. Under this type of contract, a producer automatically excalates his rates whenever FERC permits any other producer in the area a higher rate. For example, producer A may have a supply of gas that only qualifies for an "old" gas rate category if sold in the interstate market. But, if he is operating under a "most-favored-nation" clause, he is entitled to the highest rate category granted to any producer in the area. If a neighbor, producer B, qualifies for a "new" gas rate, producer A also qualifies.

In many cases, intrastate pipeline companies do not have access to a large quantity of inexpensive gas. Producers prefer not to make long term commitments to the intrastate market unless they are assured of at least the going interstate rate. Hence, the "most-favored-nation" clause was born.

Interstate pipelines, on the other hand, have several categories of gas available because Federal pricing policies link wellhead price to the date a well was discovered or the date drilling began. This vintaging concept allows interstate pipelines to blend—roll-in—all types of gas to produce a composite rate which is usually lower than the intrastate market.

Because the "compromise" will establish higher rate schedules, "most-favored-nation" clauses will be activated. For Wyoming consumers dependent on intrastate lines, that translates into a jump in wellhead price from approximately $1.50 per Mcf to $1.96 per Mcf—a 30 percent hike. It is probable that Wyoming gas will cost more in Wyoming than it will in distant States.

It is probable that that same Wyoming gas will cost more in Wyoming than it will in Kansas, Nebraska, Minnesota, or even Kentucky, if it gets that far, and I do not see how my people can be expected to make that kind of sacrifice when we are not a net exporter of natural gas.

WILL IT PRODUCE MORE GAS?

For producers selling in the interstate market, it is doubtful whether the incentive they receive from higher rate schedules will be offset by the growth in the regulatory burden. Because Federal price controls are placed on the intrastate market for the first time, the "compromise" would reduce the incentive to drill for gas in this market.

One of the few positive notes in the bill is the stimulus it will have in bringing Alaskan gas to the Lower 48. Provisions in the bill allow transportation costs for Prudhoe Bay gas to be "rolled-in" to the cost of other natural gas and spread among all consumers. The provision enables the sponsors of the project to obtain financing by guaranteeing a competitive market for their gas.

IS IT ENFORCEABLE?

The Federal Energy Regulatory Commission, operating under existing law, already has a backlog of 20,000 rate cases—some as old as 21 years. Today, the average case requires 41 months to process and that time will undoubtedly skyrocket if the "compromise" is enacted, simply because of the incredible additional volume of requests for processing and ratesetting.

Utilities, producers, consumers, and industrial users will be placed in eternal limbo while FERC wades through the puzzle of new regulations created by this compromise.

WHAT IS THE EFFECT ON THE VALUE OF THE DOLLAR?

Some of the world's foremost experts on U.S. monetary policy, including Nobel Prize winning economist, Milton Friedman, and former Secretary of the Treasury, Bill Simon, have expressed loud dismay at the administration's contention that this bill would help the value of the dollar. Since no other part of our economy feels the daily fluctuation of the dollar than our international business community, it is appropriate to quote Robert L. Slighton, vice president of Chase Manhattan Bank:

> The argument that passage of the compromise gas bill would play an important role in halting the decline in the dollar and strengthening the US balance-of-payments outlook is at best highly exaggerated and at worst just plainly wrong. Adoption of the proposed legislation would probably result in a modest strengthening of the dollar in the short run, but this improvement would not be permanent. In the longer run, the legislation could actually result in some weakening of the dollar as foreign exchange markets come to perceive that the long-run exchange supply of natural gas in the US is as likely to be reduced as increased under the new regulatory regime.

The dollar is weak because of bad domestic policy. Policy which consistently hampers this country's creativity with excess regulation, excess taxation, excess inflation, excess Government spending, and excessive creation of money. Ironically, Germany and Japan, which have strong international currencies and little domestic inflation, import essentially all of their energy.

IS THERE AN ALTERNATIVE?

The status quo presents the most attractive alternative at the moment. Consumers, producers, and regulators are at least familiar with the rules of the game.

In addition, under existing law FERC is required to publish an updated rate

schedule to compensate producers for the increased drilling and exploration costs that have accrued since 1975.

Moreover, in the event of severe winter shortages, the President has the ability to facilitate the transfer of surplus and emergency gas from the intrastate system to the interstate system. Such power was granted to the President by the Emergency Natural Gas Act of 1977. That authority has since expired, but can be renewed.

The potential for 26 trillion cubic feet of Alaskan gas cannot be overlooked by Congress. The "roll-in" pricing section for Prudhoe Bay gas is worthy of support as an amendment to existing law.

No other issues exemplifies the lack of a national consensus on energy than the natural gas bill. Throughout the debate, there have been emotional exchanges between those who fear consumers cannot absorb price increases and others who realize producers must have more incentives to provide future supplies. The administration has added to the confusion by vacillation and seeking to wear all hats.

It is difficult to outline all the complexities of the "compromise" in the limited space of this backgrounder. Nevertheless, it is important to emphasize that the bill contains all the disadvantages of deregulation and none of the advantages of deregulation.

Some have argued that even a bad bill is better than no bill at all. I disagree. Congress has taken positive steps in solving the energy crisis by passing three good measures—energy conservation, uitlity rate reform, and the coal conversion bill.

The natural gas "compromise" cannot be considered as a positive step. It is plagued with too many flaws. Foremost among them is the problem of "most-favored-nation" clauses. There are several pockets in Wyoming where people will continue to pay disproportionately high utility rates because this has been ignored in the "compromise."

There are areas of the country where incremental pricing is a good idea. But the controversial issue is far too complex to be congressionally mandated to cover widely varying local conditions across the country. In each case, a sensitive trade-off must be made between industrial users, residential rate structure, and subsequent impacts to the employment market. There is room for Federal support, but the final arbitrator must be the State governments, not Washington.

Perhaps the strongest argument against passage of the "compromise" is the revealing action by the agency that would administer the bill, the Federal Regulatory Commission. Last month, an internal memo from FERC's enforcement division was leaked to the press. It disclosed that the "compromise" was "too complicated to administer."

The memo sparked a flurry of action and brought about some minor clarifications in the bill. Later, a "revised" evaluation from FERC stated they could effectively administer the "compromise" but only if Congress appropriated funds for more regulatory personnel. The extra personnel were needed, FERC continued to explain, because it may take years of litigation to establish what the new bill really means.

Their energy policy can only be described as this: What this country really needs is a good, healthy increase in the bureaucracy. Sadly, it is a scenario that is all too familiar.

While we are talking energy options and the opportunity of this country to do something in the energy field, let me just say that a number of good ideas are being held hostage by the administration, pending passage of this natural gas compromise. In fact, you could say that the administration has more bills held hostage than the Bader-Meinhoff gang.

Just take the larger issues waiting in the wings while we are fiddling and telling each other we cannot get our energy act together. The energy conservation bill, the utility rate bill, the coal conversion bill, 533 sales, the Southland decision, steel imports, breeder reactors, the Alaska natural gas pipeline, and the emergency natural gas sales are being held hostage by the administration.

We have things to do out there in the energy field, waiting for us, while we fiddle and create a new bureaucracy, demanding hundreds of extra people who climb on the economy of this country, get in the way of it, pour paper on it, and refuse to make decisions for it. While we wait and fiddle with that, the real portions of the Energy Act, which could do something for the country, are lying dormant, held hostage to the tactics of this bill.

Mr. President, I have no more to add right now. It remains to be seen, as the Senator from Kentucky says, as to what is in the motion to recommit and with what instructions. But I can say this much: Everything that is known about this secret message is not satisfactory enough to make me support it, even though the motion to recommit may not be entirely satisfactory as well.

Mr. FORD. Mr. President, the distinguished Senator from West Virginia wants to make a statement, and I would like to have 60 seconds, if I may.

The PRESIDING OFFICER. The Senator from Kentucky is recognized.

Mr. FORD. There are two points I would like to make as they refer to the junior Senator from Wyoming.

They keep referring to the expired emergency gas bill that would be reinstated. The expired emergency gas bill did not allocate intrastate gas. I am wondering if the——

Mr. WALLOP. Mr. President, if the Senator will yield on that, it certainly mandated the interconnection between interstate and intrastate.

Mr. FORD. No, sir. The Senator from Wyoming has to go back to the legislation and read it. He is absolutely wrong. The expiring emergency gas bill did not allocate intrastate gas.

Mr. WALLOP. Did it not provide a means by which it could get into the interstate system?

Mr. FORD. Transportation, and that is all.

Mr. WALLOP. Sure, but it was there, and we got it.

Mr. FORD. How are you going to allocate it?

Mr. WALLOP. They got it because they were able to pay for it. Did they not get it?

Mr. FORD. Some did.

Mr. WALLOP. They did get it.

Mr. FORD. No, because 42 percent was retained in the four States that used it.

Another thing I want to point out to the Senator from Wyoming: He used Chase Manhattan Bank again, and that has been going on here for 2 days. The Senator used it and I have used it.

Here is a telegram to the senior Senator from Wyoming:

> I am in receipt of your memorandum of August 30 addressed to the staff assistants of your Senate colleagues with regard to an alleged Chase position on the compromise gas legislation. I want to take this opportunity to clear the record on this important matter.

It is signed by Willard C. Butcher, president of Chase Manhattan.

Mr. WALLOP. I say to the Senator that I did not propound a position of the Chase Manhattan Bank. I took an exact quotation from an officer of that bank, in which he said nothing about whether or not he was for or against this bill. He simply said that there was no way they could make a claim that it would have any effect on the value of the dollar.

Mr. FORD. I yield to the Senator from West Virginia. He is probably more articulate than both of us.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. RANDOLPH. Mr. President, the Senator from West Virginia will be in good humor, and, of course, in good purpose, as are my colleagues the Senator from Kentucky (Mr. FORD) and the Senator from Wyoming (Mr. WALLOP), and even our good friend the senior Senator from Wyoming (Mr. HANSEN), who has been a part of this three-way colloquy.

Mr. President, the conference report on the Natural Gas Policy Act of 1975 perhaps should be the single issue which can determine whether or not the United States of America will have an energy plan during the 95th Congress.

I hope it is not presumptuous for me to indicate that this is a subject that I understand and of which I have been a part, for many, many years.

I recall when I felt it was necessary to pass the Synthetic Liquid Fuels Act, in 1944. With the Senator from Wyoming, Mr. O'Mahoney, we coauthored a measure. It provided funds to take coal, and oil shale, and process it into liquid fuels to provide the energy supplies which would have and frankly would now have made America energy independent had we moved ahead with that program.

I became convinced of the value of synthetic fuels in 1943, when with another young man by the name of Arthur C. Hyde of Moorefield, W. Va., we took the regular aviation fuel from a single-engine Stinson plane at Morgantown, W. Va., and poured in the aviation fuel processed from West Virginia coal. That again was in 1943, November 6.

We flew 175 miles across the Allegheny and Blue Ridge Mountains into this Nation's Capital, and I was met there by Senator O'Mahoney and others of the Senate and the House of Representatives. It was an indication that we could do in this country what had been done by the German Luftwaffe.

Let us remember an actual, let us say careful reading of the facts will indicate that the Luftwaffe did not run out of aviation fuel when bombing London and environs. The Luftwaffe had made within the hierarchy, the decision to have only 50 percent of their aircraft in attack status. There were those who argued, but lost the argument, that it should be 80 percent attack aircraft and 20 percent of the other types of planes in the Luftwaffe. The Germans were using coal, Mr. President, using coal with which they made their aviation fuel.

They were also moving their trucks and tanks and other materials and implements of war with synthetic fuels.

We had a problem here in World War II, with oil imports. The German U-boats were prowling up and down the east coast and in New England waters and blocking the shipping lanes used for petroleum shipments coming into our country at that time.

The synthetic fuels program in this country was scrapped even though we had spent almost all of the funds appropriated for that initiative. In place of a strong synthetic fuels effort, today the U.S. Government and taxpayers of the United States of America are currently committed to spending $12.5 billion to do what? To just store, by and large, imported petroleum as a protective measure, against another possible Mideast embargo. I returned to the Senate, in November 1958 with my able colleague, the leader of the Senate, ROBERT BYRD. We both took formal office in January; however, I actually started my duties in the Senate in November 1958 because of serving out the unexpired term of M. M. Neely of West Virginia.

The first legislation that I introduced in 1959 was a Commission to create a fuels and energy policy for the United States of America, emphasizing, in testifying before the Interior and Insular Affairs Committee now the Energy and Natural Resources Committee, "that each year we delay perhaps brings us one year nearer to disaster." That was not an overstatement. It was true.

But nothing happened. I will not detail what took place later except to say that subsequent, administration did not take energy with a seriousness of purpose. I still have the letter from President Nixon in which he said he would refer the Commission proposal to the Domestic Council. It is representative of the attitude of official Washington at that particular time in our national life.

Then I began to think of other ways to create the Commission and we brought into being legislation that created an overall group within seven or eight committees, and we were working under an umbrella of cooperation among committees, and we established a task force in the Senate of the United States on energy policy.

What were our objectives? To find ways to begin, and solve, at least in part, the energy problems of this country that affect not only our own people but the peoples of the world.

In 1954 the Federal Government initiated control of the well-head price of gas moving in interstate commerce. The Members of the Senate since that time have held strong positions on what steps to take on pricing natural gas. On October 4, 1977 I voted for the Senate version of natural gas pricing, the Pearson-Bentsen amendment, which would have deregulated onshore natural gas in 2 years and offshore gas in 5 years.

This, however, was not the first time the Senate had considered the question of deregulating natural gas.

On December 10, 1973, the Senate considered a bill (S. 2776) to provide for the management of national energy programs during the energy emergency that then existed. In considering that legislation, the issue of natural gas deregulation surfaced. Senator Buckley from New York, and I sponsored an amendment at that time to immediately deregulate the price of new natural gas in the interstate market. The amendment to the Natural Gas Act was tabled by a narrow margin of 45 to 43 on a rollcall.

On October 22, 1975, the Senate considered an amendment to a bill (S. 2310), providing temporary provisions to assure the availability of natural gas supply, which would have also quickly deregulated natural gas. This time the vote was 50 to 41 in favor of deregulating natural gas. This measure was later defeated in the House. All votes on deregulation of natural gas have been close but in general, as indicated in 1975 and 1977, support for expedited deregulation in the Senate has solidified.

The conference agreement on natural gas pricing does not embrace the level of deregulation or the range of pricing incentives which I previously endorsed. A deregulation measure which does not take full effect for 7 years is less than a firm policy decision. Many of my colleagues who voted for decontrol last October, because of methods of negotiations with the House, the time frame involved in achieving deregulation, the intrastate provisions, and the Federal regulatory potential now feel the conference report represents the principles of deregulation without carrying them forward.

The conference report, however, is one which Senators such as myself who have worked for energy production incentives should support, and I commend Senator JACKSON and my colleagues on the Energy and Natural Resources who worked and cooperated with him in forming the basic structure of the compromise.

I admit that the conference report represents reregulation for an 8-year period and not deregulation. It does, however, represent a step toward that goal. If the Senate fails to take this first step after 13 months of work on the issue, I feel the country may never see the deregulation of natural gas prices. Again, this compromise represents an initial effort toward the position the Senate took last October 4. It does not represent a final solution to natural gas pricing. Specifically, I anticipate Congress will have to reassess, before 1985, the many definitions of natural gas and the paperwork associated with those increased Federal regulatory responsibilities along with emergency gas allocation measures contained in the bill.

I often use in my remarks a quotation, about redtape and Government. Senators will note that the quotation is very clear on the effects of redtape and should also give attention to the fact the quote was made some 15 generations ago, speaking of the government of the Roman Empire.

The quotation follows:

If all the skies were parchment
If all the seas were ink
If all the reeds were pens
And all men could write
They still could not match the Red Tape of this government.—Talmudic scholar of the Roman Government, 14 to 15 centuries ago.

So redtape has surrounded us for more than the past few months or years in this country.

My analysis of the work done by the energy conferees on natural gas pricing is for the most part positive. The definition of "new gas" and "new reservoirs" are basically fair and reasonable and should allow small and medium gas producers to increase their drilling activity. The allowance for special development incentive gas from new wells within an old reservoir and within a 2.5-mile radius will help to offset negative aspects of the "new gas" definition. According to the West Virginia Oil and Natural Gas Association investment in new natural gas wells is continuing to rise. An expected 1,400 new wells will be drilled in West Virginia this year showing an investment of $125.6 million. Provisions which allow stripper wells already producing less than 60,000 cubic feet per day a starting price of $2.09 per mcf should also encourage drilling activities.

When I say mcf, that is thousand cubic feet. I was once an investor in a company called the MCF Gas Co. in West Virginia. I was an investor in that company, and wells were drilled in my home county of Randolph, to the number of 18. Other companies, these little companies, came in and drilled their wells, and almost all of them are producing, of long life though not of great volume.

Yet I remember this chance we took in our State.

I have heard many comments the last 2 days inferring that all independent oil and gas producers are against passing this conference report. This is just not true.

Mr. President, I would like to read into the RECORD a letter which I received today from Mr. David Taylor, president of the Allegheny Land and Mineral Co., located in West Virginia. He is one of the most respected and active independent gas producers in our State. He states in his letter:

As you know, I have been engaged in the production of natural gas in the Appalachian basin since 1952. I founded Allegheny Land and Mineral Company in 1956 and served as

its President and Chairman of the Board and still remained a member of its Broad of Directors. I have, also, been a member of the Independent Oil and Gas Association of West Virginia since its inception. However, in this communication I am expressing my personal conclusions and opinions.

The bill on natural gas which has been released from the conference committee of the House and Senate is now before your senatorial body for consideration is not everything that can be desired. I am sure it is not exactly what you had in mind in your letter to Senator Long at the beginning of this legislative effort. Nevertheless, the conference bill is better for your constituents among the producers of natural gas in the Appalachian basin than the existing law. I believe you will be serving the producers and consumers in West Virginia well by supporting the conference bill.

I would also like to point out that while the U.S. Chamber of Commerce opposes the natural gas pricing report, the West Virginia Chamber of Commerce, in a letter to me dated September 2, endorsed the natural gas compromise as an indispensable component of the national energy plan.

(Mr. STEVENSON assumed the chair.)

Mr. RANDOLPH. The bill would also deregulate, in one year, gas found in new wells deeper than 15,000 feet. This provision would also help producers in states like West Virginia because it includes high cost gas which would be freed from price controls in one year. High cost gas includes gas from expensive sources such as devonian shale, methane from coal seams, and geopressurized methane. This alone would encompass 34 percent of the known natural gas reserves. The agreement also will give the Federal Energy Regulatory Commission power to authorize special price provisions for gas supply which are difficult to extract, including low permability gas methane.

During September and October of last year when we spent 2 arduous weeks debating the natural gas issue, I saw scores of conflicting reports on the effect of deregulating natural gas. Much uncertainty surrounded statistics on total reserves possible shortages, and consumer prices. Much rhetoric was heard on contrived hoax, ripoffs, and obscene profits. After studying the issues and listening to the debate the Senate voted to approve deregulation 50 to 46.

Now we have a report from the Energy Information Administration concluding the proposed compromise might mean higher residential prices and lower industrial prices because of incremental pricing. The conference report using an economic model with different assumptions than those used by the EIA states that industrial use of natural gas will not increase and not deprive residential customers of gas supplies. This body is now faced once again with members comparing differing studies and projections to prove a political point. The result will again be to delay resolution of our national energy problem. I submit this type of activity is not in the public interest but only serves to confuse all concerned on whether we really have a national energy crisis, merely for the sake of a press story or mention on a news broadcast.

I am willing to stand by figures developed by the staff of Members working on the National Energy Act, which show that gas costs would increase about $20 a year for a family of four between now and 1985, with incremental pricing provisions in place. This means a residential consumer in 1985, would pay $3.36–$4.80 per mcf under the conference agreement compared to $4.70 under the continued regulatory process we have now. In West Virginia the average home heating bill for the residential user is about $268 per year. The $13 to $20 per year increase could allow for about 1.25 trillion cubic feet more gas to be produced on an annual basis and will keep transportation costs for moving this fuel at a lower rate. I believe the conference version of the gas bill will eliminate some of the need for imposition of higher cost of alternative fuels (electric, fuel oil, and synfuels) and the possibility of long term shortages affecting residential as well as industrial users. It is interesting to note that gas today should sell at $3.85 per thousand cubic feet to put oil and gas producers in the same comparative competitive position they were in before 1954.

We need assurances of a stable rate of production and supply. This will not be accomplished by relying on high prices from liquid natural gas from such countries as Algeria, Mexico, and Indonesia. Such reliance would be the same mistake we made on oil imports. The U.S. Geological Survey indicates that only 2 percent of the domestic rock containing oil and gas has been drilled to date. Only one-fiftieth of the gas reserves in Appalachia have been tapped.

Necessary incentives must be provided to both major producers and independents. As elected representatives we need to have some degree of confidence and credibility in those private concerns in the gas and oil business. West Virginia's independent production is 0.9 percent of the national domestic gas production, with potential new supplies in deep geological formations that could be developed under provisions of the act. While we make the necessary adjustments to convert to coal, gas and oil will still be included in the major mix of fuels at least for the next 7 to 8 years.

Mr. President, for more than 50 years natural gas has been clean, cheap, and abundant. It is still clean, the most desirable form of primary energy because of near-ideal combustion characteristics. And it is still cheap, when compared on an energy-content basis with most energy sources—and it is competitive with all. The inplace transmission, storage, and distribution system, built at a cost of $50 billion and literally irreplaceable today, is available to serve these markets. The Natural Gas Policy Act of 1978 is a well-reasoned attempt to assure that all producers and consumers do their share in using wisely a energy fuel which is no longer in overabundance.

Mr. President, the natural gas compromise will result in more exploration and production, more gas flowing into the interstate systems needing it most, lower energy costs for consumers, and reduced imports of foreign energy. These considerations must override the objections of those who have taken extreme positions on either side of this issue during the past 6 months of debate.

These considerations must override the objections of those well-meaning Senators, but ill advised, who have taken opposing positions.

I am against polarization. The able minority leader of the Senate and those in the committee which I chair, in which he is an active and helpful member, know that I often speak against polarized positions. We have to take our stands, but we have to work together if we are to bring a measure into this body and have it appeal to people of varying views and then become a piece of legislation that expresses, in part, at least, the opinions and convictions of the membership.

Mr. BAKER. Mr. President, will the Senator yield?

Mr. RANDOLPH. I yield.

Mr. BAKER. I thank the distinguished Senator from West Virginia for his remarks and observations. I want to say that it has been a distinct pleasure for me to serve under his chairmanship in the Environment and Public Works Committee. The Senator is a man of great perception and great courtesy. I wanted to observe that he has given this matter, I am sure, the same careful attention he has always given to matters before his committee. While we have ended up on opposite sides on this issue, he nonetheless has my deepest respect.

Mr. RANDOLPH. If my colleague, my friend, will remain for this moment, the characteristics which his father-in-law, Senator Everett Dirksen, had in such abundance are shared in full measure by him. To have had the friendship of Everett and now to have the friendship of HOWARD—different generations to be sure, but with the dedication to public service—is enjoyed. It is very unusual if not completely unique that two Senate Members from different generations but the same family ties, have both risen to the top minority leadership positions in the U.S. Senate.

Mr. BAKER. I also enjoy our association.

Mr. RANDOLPH. The differing views of public servants sometimes cause an issue to die when it should live is implicit in this conference report. This Senator recognizes the responsibility which we cannot and should not shirk. And when the rollcall comes. Although the compromise is not the 100-percent agreement which I wanted and others would have completely approved of, we must make a decision; and the decision, I hope and believe, must be in the interest of America and our people regardless of party, place of residence, or political preference.

I thank the Chair.

Mr. FORD. Mr. President, it is my understanding that there are no further statements to be made relative to the natural gas conference report. I do not have anyone on my side that wants any more time. Therefore, Mr. President, I yield to the majority leader so that we may call it an evening.

Mr. ROBERT C. BYRD. Mr. President,

I thank the distinguished Senator from Kentucky and commend him on his good floor work today and his excellent debate on the pending conference report.

● Mr. GRAVEL. Mr. President, it almost goes without saying that the natural gas conference report is the most complicated and controversial energy measure Congress has ever dealt with. There is no need to relate the efforts that have been made to bring this measure to final consideration by the Senate. There is no reason to repeat the types of difficult questions each of us is being asked to answer as we come closer to rollcall votes. I merely wish to share with my colleagues my reason for supporting the conference report, and the importance I see in passage of this measure.

Mr. President, last fall President Carter decided, and Congress concurred in the decision, that a natural gas pipeline should be built from Prudhoe Bay, Alaska, to Dwight, Ill., to carry some 26 trillion cubic feet of domestically produced natural gas. Construction of the Alaska Highway gas line would provide the further benefit of bringing to the Midwest and East additional supplies of supplemental gas from Canada in 1980. Before construction can begin, however, certain legislative provisions are necessary to assure private financing of the gas line. Put simply, the natural gas conference report includes those essential provisions. At this point, there is no other viable vehicle available which can resolve these essential issues to assure financing. Passage of the conference report will enable financing of the project.

Let me explain to my colleagues what the natural gas conference report does provide concerning Prudhoe Bay natural gas.

First, the legislation sets the maximum wellhead price to be paid for gas from the Prudhoe Bay unit at $1.45 per million Btu's as escalated by the annual inflation adjustment factor as of April 20, 1977. The report of the Senate Committee on Energy and Natural Resources states that a legislative pricing provision is essential. Failure to so provide would add at least a year's delay and consequent increased costs. Establishment of the relatively low wellhead price will help insure the marketability of the gas in the Lower 48.

Second, the legislation assures that the wellhead price and transportation costs of Prudhoe Bay gas will be priced on a rolled-in basis. In addition, that portion of Alaska State severance taxes in effect as of December 1, 1977, will also be rolled in. Costs of conditioning the gas may be incrementally priced. While we would have preferred to have all costs rolled in, the legislation rolls in the majority of the costs, thus enabling financing of the line, and marketability of the gas.

Third, the legislation enables Federal Energy Regulatory Commission to make adjustments to the ceiling price of Prudhoe Bay gas for recovery of costs of compressing, gathering, processing, treating, liquifying, or otherwise "conditioning" the gas.

Finally, the legislation assures early completion of a portion of the Alaska natural gas transportation system and early delivery of gas from Canada in 1980. Under the legislation, deliveries of this gas pursuant to contracts entered into prior to May 1, 1978, will be placed on a rolled-in basis.

Thus, passage of the conference report will assure passage of provisions necessary to financing of the line and enabling construction of the line, without creating unnecessary and costly delays. It is a simple fact that gas sales contracts will not be executed until these provisions are passed, and that the pipeline system cannot be financed until such measures are available.

What are the benefits of including the provisions in the conference report on Alaska gas pricing—what are the benefits of assuring completion of the Alaska natural gas transportation system? There are many, and they have been discussed at great length in this body. Let me summarize them.

First, construction of the line will assure a valuable and needed source of domestically produced supplemental gas. At its initial operation, the Alaska gas line will transport at least 2 billion cubic feet per day. That figure will increase, even assuming no further discoveries and production on the North Slope of Alaska. That is a total of at least 0.7 trillion cubic feet per year of domestically produced gas.

The House Subcommittee on Energy and Power published in June of this year a report prepared by the Congressional Research Service on supplemental sources of natural gas. The report identifies several potential sources of supplemental gas that may be used to meet gas demand in the 1980's and 1990's. It analyzes those sources on the basis of 10 criteria. North Slope gas stacks up very well indeed against all other sources of supplemental gas. For example, the report concludes that Alaskan gas is a secure supply, not subject to diversion from domestic markets. It is less likely to be subject to price fluctuation than foreign sources. The technology for development and delivery of Alaska gas is essentially available today. It is a safe source of supplemental gas. It is environmentally preferable to a number of other supplemental sources because the route selected is along existing transportation corridors. There will be massive economic benefit to the Nation as a result of construction and operation of the Alaska line.

Second, gas from Prudhoe Bay will have favorable impact on use of imported oil and our balance of payments picture. It is estimated that some 150 million barrels of imported oil per year can be replaced, helping to reduce our deficit in balance of payments by some $2 billion per year (assuming current prices).

Third, early deliveries of Canadian gas will become available to the gas consumers in the Midwest. The lower portion of the gasline will be completed by 1980, allowing transport of Albertan gas to some 24 States in the Lower 48. That should provide some assurance to the gas consumers of this Nation that we do not intend to rely on warm winters and cooler summers as an answer to gas shortages in the near future.

Fourth, construction of the line will provide additional incentive for further exploration and production of natural gas on the North Slope of Alaska. Current proven reserves on the North Slope amount to some 26 trillion cubic feet, as determined by the U.S. Geological Survey (USGS). However, the USGS currently estimates that the undiscovered recoverable resources of natural gas onshore on the North Slope of Alaska range from 14 to 49 trillion cubic feet. Offshore estimates range from 5 to 50 trillion cubic feet. That is a projection of some 20 to 132 trillion cubic feet that may still be discovered and delivered. No one really knows. But until there is a system capable of removing any gas that has already been discovered, there is absolutely no incentive to find any additional gas. It should be noted that the gas pipeline would be available to deliver other gas from the remainder of Alaska as well.

Fifth, the project will provide great national net economic benefit. Simply stated, that means jobs and tax dollars. Of the $10 to $14 billion cost of construction, some 70 percent will be expended in the United States, nearly equally divided between Alaska and the rest of the areas of construction in the Lower 48. At the peak of construction, some 20,300 people will be employed in construction. Several thousand miles of pipe will have to be made in American steel plants. Countless thousands of related jobs and products will be needed to supplement construction. Regardless of how you figure it, the construction of the gasline will provide significant economic stimulus.

Finally, inclusion of Alaskan gas in the domestic supply in 1985 will actually decrease the weighted average price of domestic production. You have heard that Alaska gas will be expensive and you have even heard proponents of both the conference report and the gasline say that, "Well, it may be more expensive, but it will be a necessary addition to our supply picture." It will be a necessary addition, but it will also have the additional salutary effect of driving down the average price of gas in the United States when it is delivered to the markets in the Lower 48 in 1985. Read the analysis done by the Energy Information Administration. Look at table XI. The overall retail price of gas in 1985 will be less with North Slope gas on line than without. The reason is simple: Without Alaskan gas, some source of new gas will be necessary to provide what Alaska would have supplied. Without Alaska gas, the average price of new gas under the compromise will be 15 cents per mcf higher.

Mr. President, it is obvious to me that the pipeline to deliver gas from our North Slope must be built, and built soon. The conference report will provide the necessary measures to permit financing to be completed and to allow construction to begin. Without those provisions, we will add $1 billion to the cost of construction for every year of delay. That is pointless. I support the conference report so that

this project, which Congress authorized last year, may begin.●

● Mr. RIBICOFF. Mr. President, for almost a year and a half the effort to formulate a comprehensive national energy policy has dominated the Congress and public affairs more than any single domestic issue. The enactment of a broad-based national energy program has been a top legislative priority throughout the 95th Congress. This goal has yet to be achieved.

Today we continue to debate a key element of the President's energy proposal, the natural gas compromise. The world is watching and waiting to see how we act on this controversial measure. Our trading partners in Western Europe and Japan are anxious to know whether we have the will and ability to deal with our energy challenges in an affirmative manner. Americans throughout the country look to us to take meaningful steps to curb and reverse the inflationary spiral which has been fueled by our indecision on an energy policy.

As consideration of the natural gas conference report begins I want to share with my colleagues the article by Senator MUSKIE which appears in this morning's Washington Post. In a most cogent and well-reasoned fashion, the distinguished chairman of the Senate Budget Committee outlines the major issues involved in the natural gas debate. Senator MUSKIE focuses on the impact this legislation will have in restoring world confidence in the value of the dollar and its impact in controlling inflation at home. I believe Senator MUSKIE's article very successfully sums up why the natural gas compromise warrants our support and I commend it to my colleagues' attention. I ask that the article be inserted in the RECORD.

The article follows:

[From the Washington Post, Sept. 11, 1978]

NATURAL-GAS COMPROMISE: THE COST OF DELAY

(By Edmund S. Muskie)

Two things are certain about the natural-gas compromise. First, it is nowhere near so bad as the opponents claim. Second, if the Senate does not approve it, the consequences are likely to be much worse than learning to live with the new policy.

The country is so evenly split between energy-importing states and energy exporters that finding a satisfactory compromise is almost impossible. But compromise we must. In the 16 months the Senate has wrestled with the price of gas, we have been playing economic roulette. We are losing.

Very little else is certain about the bill or its consequences, although "facts" are abundant. No one really knows what will happen to energy prices and supplies if we pass the bill, or even if we defeat it.

But the compromise is infinitely preferable to doing nothing at all. The bill will bring some desperately needed certainty to the question of natural-gas prices. People who were laid off or cold the last two winters cannot be enthusiastic about the present policy. Neither should the Senate be.

And the present uncertainty clearly affects business decisions as well as the average family's budgeting. Here at home this "confidence factor" is difficult to measure. But internationally we do have a yardstick: the value of the dollar.

The dollar's value on the international market is in one sense almost purely a measure of the confidence the international community has in the dollar's long-term value. That judgment is based on perceptions of American economic policy. Since the natural-gas debate began, the dollar has lost 10 percent of its value against all other currencies. Against stronger currencies like the West German mark and Japanese yen, the dollar's value has plummeted by as much as 30 percent.

The overall 10 percent decline has increased inflation here at home by about 1 percent. That means American consumers are already in the process of losing $15 billion to $20 billion in purchasing power in a single year—more than the natural-gas bill would cost in seven years.

There is abundant evidence that the lack of an energy policy is a prime cause, along with inflation, of the dollar's decline. The dollar has dropped 4 percent in value since the August summit on energy. The international community is less concerned with present policy than it is with the long-term trend. The international community must be convinced that America is indeed committed to an energy policy and to controlling inflation. If it remains unconvinced, it will continue to bet against the dollar. We must begin to prove the international community wrong.

If we do not, we face at least the possibility of more inflation, more restrictive interest rates and slower economic growth; an increase in the price of foreign oil; and growing demands from our allies for a voice in America's economic policy.

And the consequences could be much worse.

The bill itself is a moderate attempt to bridge the yawning gulf that has separated the House and Senate on the question.

Predictions are impossible in a highly complex and uncertain field. But from the information we do have, coupled with an independent review by the Congressional Budget Office, we can say this much about the natural-gas compromise:

1. It will allow prices to rise gradually enough to avoid serious consequences to our economy. CBO estimates that by 1985 the price of gas will be 5 to 8 percent higher under the bill than under current policy. With the gross national product approaching $4 trillion by then, the inflationary effect of that increase would be negligible.

The price increase will not be trifling to the individual consumer, but even by 1985 he will still be paying less for natural gas than he would pay for alternative fuels such as heating oil and electricity. In addition, the bill throws the bulk of the new cost on industrial users.

2. Supplies will increase and the supply will be more stable. The distinction between gas produced and consumed in a single state and gas on the interstate market will be abolished. There should be enough gas to avoid curtailments and allow increased residential use. Industrial users will be encouraged to switch to alternative fuels.

3. Finding a "quick fix" to replace the bill is impossible. If the question were easy we would have answered it by now. Congress is not being dilatory. Energy is the most difficult political, economic and social question to come before the Congress in our lifetime. The natural-gas compromise may not be perfect, but I am not so foolish as to think that given time much improvement could be made in it.

So I will vote for the natural-gas compromise. It is not perfect. It will not entirely satisfy anyone. It is by no means the last word on energy policy. But the consequences of our remaining mute are already costing us dearly.●

## FEDERAL INFORMATION CENTERS ACT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate now proceed to the consideration of Calendar Order No. 1048.

Mr. BAKER. Mr. President, I have no objection to the request by the majority leader. This item is cleared on our calendar and we have no objection to proceeding to its consideration.

The PRESIDING OFFICER. Without objection, the clerk will state the bill by title.

The legislative clerk read as follows:

A bill (S. 3259) to authorize the permanent establishment of a system of Federal Information Center.

The Senate proceeded to consider the bill.

UP AMENDMENT NO. 1829

Mr. ROBERT C. BYRD. Mr. President, I on behalf of Mr. CHILES, I send an amendment to the desk and ask that it be stated by the clerk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from West Virginia (Mr. ROBERT C. BYRD) for Mr. CHILES proposes an unprinted amendment.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Page 1, line 5, after Sec. 2 insert the following: "(a)"

Page 1, line 11, strike out "Information Centers" and insert in lieu thereof the following: "information centers"

Page 2, line 6, strike out "Information Centers" and insert in lieu thereof the following: "information centers"

Page 2, after line 10, insert the following:

"(b) The table of contents of the Federal Property and Administrative Services Act of 1949 is amended by inserting immediately after the item pertaining to section 111 the following new item:"

"Sec. 112. Federal Information centers."

Mr. ROBERT C. BYRD. This is a group of technical amendments.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and to be read a third time.

The bill was read the third time, and passed, as follows:

S. 3259

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Federal Information Centers Act".

SEC. 2. (a) Title I of the Federal Property and Administrative Services Act of 1949 is amended by adding at the end thereof the following new section:

"FEDERAL INFORMATION CENTERS

"SEC. 112. (a) The Administrator is authorized to establish within the General Services Administration a nationwide network of Federal information centers for the purpose of providing the public with information about the programs and procedures of the Federal Government and for other appropriate and related purposes.

"(b) The Administrator is authorized to prescribe such rules and regulations as may

be necessary to the functioning of the Federal information centers.

"(c) There is hereby authorized to be appropriated $7,000,000 for the fiscal year ending September 30, 1980, and such sums as may be necessary for each succeeding fiscal year for carrying out the purposes of this section.".

(b) The table of contents of the Federal Property and Administrative Services Act of 1949 is amended by inserting immediately after the item pertaining to section 111 the following new item:

"Sec. 112. Federal information centers.".

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1129), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE AND SUMMARY OF THE ACT

The purpose of S. 3259 is to establish legislative authority for a national system of Federal information centers.

Federal information centers provide direct help to citizens with questions about Federal Government services, programs and regulations. They provide better access to the Federal Government, cut redtape and reduce paperwork for many citizens who merely seek basic information about Government.

The Federal Information Centers Act authorizes the Administrator of the General Services Administration (GSA) to establish a nationwide network of Federal information centers. The centers are to provide the public with information about programs and procedures of the Federal Government.

The Administrator is further authorized to prescribe necessary regulations for managing the information centers. A sum of $7 million for fiscal year 1980 and such sums as may be necessary for succeeding fiscal years are also authorized to finance the program.

NEED FOR LEGISLATION

Federal Information Centers were first proposed by President Johnson in 1965. The first pilot center was opened in Atlanta, Ga., the following year. The GSA has developed a 12-year experience with this demonstration program.

Presently, information centers are located in 38 major metropolitan areas. An additional 47 cities are connected by toll-free tielines. (See appendix A.) In fiscal year 1977 more than 8 million inquiries were answered. Half of the Nation's population have the advantage of this service. While every segment of society has access to the centers, the principal beneficiaries were poor people least informed and knowledgeable about Government.

In early 1977, the Office of Management and Budget (OMB) conducted a study of the information centers program. (See appendix B for executive summary of study.) The OMB found that the centers operate at a high degree of responsiveness to the substantial volume and diversity of questions they receive.

The OMB further found that the centers could be improved through strengthened overall management, better information system design, improved support facilities and expansion of the population served.

The study concluded that before improvements should be undertaken, legislative authorization and separate appropriations should be sought from the Congress in order to better assure central control and accountability for center operations. Presently 17 agencies reimburse the GSA for the costs of the centers.

Permanent establishment of Federal information centers was also recommended by the Federal Paperwork Commission because of the frustration the Commission found many citizens experienced in just trying to obtain simple information about Government.

S. 3259 will meet the need to provide a permanent legislative basis for greater central control and accountability for center operations. The bill will also enable the program to expand and meet the needs of citizens in 22 States who do not have information centers today.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## CONSIDERATION OF CERTAIN MEASURES ON THE CALENDAR

Mr. ROBERT C. BYRD. Mr. President, there are two other bills that are cleared for action by unanimous consent. They are Calendar Orders No. 1099 and 1105. I ask unanimous consent that the Senate proceed to consideration of those two orders.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Reserving the right to object, Mr. President, there is no objection. These items are cleared on our calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ISSUANCE OF SUBSTITUTE TREASURY CHECKS

The bill (H.R. 13087) to authorize the issuance of substitute Treasury checks without undertakings of indemnity, except as the Secretary of the Treasury may require, was considered, ordered to a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1176), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

H.R. 13087 would authorize the Department of the Treasury to issue substitute checks to replace checks which have been received by the payee and subsequently lost, stolen, destroyed, mutilated, or defaced, except as the Secretary of the Treasury may require.

Under existing law, before a substitute check may be issued for an amount in excess of $200, the payee must agree to indemnify the United States by formally promising to repay the Treasury, in the event that both the original and the substitute checks are lawfully cashed.

Enactment of H.R. 13087 would eliminate this requirement, unless the Secretary of the Treasury determined that an undertaking of indemnity was necessary to protect the interests of the United States.

BACKGROUND

CURRENT LAW

Section 3646(a) of the Revised Statutes, as amended (31 U.S.C. 528(a)), requires that an undertaking of indemnity be obtained by the Secretary of the Treasury before a substitute Treasury check can be issued to replace an outstanding Treasury check where the check has been lost, stolen, destroyed, mutilated or defaced. In the undertaking, the claimant agrees to reimburse the Federal Government if both the original and substitute checks are cashed.

Section 3646(b) (31 U.S.C. 528(b)) lists five exceptions to the requirement for an undertaking of indemnity, but nevertheless authorizes the Secretary of the Treasury to require such an undertaking, even in the excepted situations if he deems it essential to the public interest.

Among the exceptions are loss of a check while in the custody of the Government prior to delivery to the payee, checks issued for $200 or less, and claims filed by the United States, a State, certain other political subdivisions, a foreign government, or a Federal Reserve bank.

EXPERIENCE UNDER CURRENT LAW

The Treasury Department has advised the committee that the current requirement that undertakings of indemnity be obtained unnecessarily delays for weeks, and even months, the settlement of valid claims from members of the public for relatively small amounts of money.

The Treasury Department advised further that at present, substitute check claims not included in the five exceptions in subsection (b) constitute between 7 and 8 percent of the claims processed by the Department. The undertakings which are obtained are generally without sureties, private or corporate, because of the small amounts involved. Therefore, the undertaking of indemnity provides only the promise of the claimant to reimburse the amount of any overpayment caused by the cashing of both the original and substitute checks.

Technically, the undertakings have some significance in view of the fact that they obligate the claimant to refund the proceeds of the checks whether or not he or she has received an overpayment. However, the Treasury states that they are not of practical significance because the Department does not as a rule seek reimbursement from a claimant who has not participated in the negotiation of the original check. Further, the Department does not use the undertakings as a legal basis for taking action against a claimant in the event of a double payment, but instead relies solely upon the grounds of the overpayment itself.

The Treasury Department advises that of the exceptions appearing in subsection (b), only that which excepts checks issued for $200 or less is of concern, since the other exceptions are of limited applicability and the Department does not now and would not in the future use Treasury's discretionary authority to require bonds of indemnity in the situations described in the other exceptions.

The $200 or less exception was established in 1945 when it was raised from $50. In the intervening 30 years, the dollar amount of checks has escalated dramatically. In a survey taken in August 1975, 1,500 checks were chosen at random, and 41.4 percent of them exceeded $200. Thus, what was, in 1945, a small percentage of checks has now become nearly a majority. The same survey revealed that 2.5 percent of the checks exceed $500, 1.3 percent exceed $750, and 0.9 percent exceed $1,000.

The Department concluded that these figures indicate the need to eliminate the requirement for undertakings of indemnity, except in the discretion of the Secretary of the Treasury, rather than to raise the amount of the exception provided. The Department concluded further that a newly established amount would soon become outdated if check amounts continue to escalate.

NEED FOR LEGISLATION

In requesting enactment of this legislation, the Treasury Department has stated that (1) a total of $18,000 is expended an-

nually for clerical time and supplies in the procurement of undertakings of indemnity for a relatively small number of cases; (2) settlement actions on over 12,000 valid claims per year are unnecessarily delayed for long periods of time because of the indemnification requirement; (3) a 1978 survey revealed that over 50 percent of Treasury claims were for checks in excess of $200—a dollar limit originally set in 1945 when claims in this amount were relatively rare; (4) since the Federal Government receives no benefit whatever from the undertakings of indemnity, the administrative burden involved in handling them is unwarranted; and (5) since the Secretary of the Treasury has the authority under section 3646(d) of the Revised Statutes to issue regulations, if the subject bill is enacted, the Secretary would exercise that authority to establish the criteria for undertakings of indemnity.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## CMDR. EDWARD WHITE RAWLINS

The Senate proceeded to consider the bill (H.R. 1445) conferring jurisdiction upon the U.S. Court of Claims to hear, determine, and render judgment upon the claim of Comdr. Edward White Rawlins, U.S. Navy (retired), which had been reported from the Committee on the Judiciary with an amendment on page 2, beginning with line 15, insert the following:

SEC. 3. If such court renders judgment in favor of such claim, such court may award, in addition to any amount awarded for retroactive active-duty pay and allowances and retirement pay, reasonable litigation costs, and a reasonable attorney's fee in an amount not to exceed five percent of the amount awarded for retroactive active-duty pay and allowances and retirement pay.

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1182), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill, as amended, is to waive applicable limitations, lapses of time or laches and to confer jurisdiction upon the U.S. Court of Claims to hear, determine and render judgment upon the claim of Comdr. Edward White Rawlins, U.S. Navy (retired) of Washington, D.C., for retroactive active-duty pay and allowances and retirement pay for his nonpromotion to the grade of captain, such nonpromotion allegedly being the probable consequence of improper and inequitable actions within the Department of Navy. The bill, as amended, stipulates that any suit instituted under its provisions must be brought within 1 year of the date of enactment and that its enactment does not constitute an inference of liability on the part of the United States.

FACTUAL SUMMARY

Comdr. Edward White Rawlins, U.S. Navy, retired, [hereinafter, "claimant"], now 76, was graduated from the U.S. Naval Academy on June 4, 1924. Effective the following day, he was appointed to the grade of ensign, U.S. Navy, and served continuously on active duty until July 1, 1951, when he was retired in the grade of commander upon his own application, pursuant to the provisions of section 6, act of February 21, 1946, 60 Stat. 26, 27, as amended 34 U.S.C. 410(b) (1952); see 10 U.S.C. 6323 (1970). During his active service, claimant received the following promotions: Lieutenant (junior grade), June 5, 1927; lieutenant, June 30, 1942; lieutenant commander, May 22, 1939; and commander (temporary), August 30, 1942.

In June 1942, just prior to claimant's last promotion in grade, supra, the Department of the Navy instituted a "panel" system to review roster of names submitted by the Secretary for temporary promotions to commander and captain. Each panel member, who was one of a number of senior naval officers at both domestic and foreign duty stations selected by the Secretary, would review the roster of names and check off those names of eligible candidates who he felt were "qualified for temporary promotion."[1] Once the rosters were returned, the "votes" were tabulated and a composite list of nominees was prepared for the President's approval. Claimant, along with other line commanders, was considered for temporary promotion to the grade of captain by three such panels, convened during the following periods: August–November 1943; June–August 1944; and January–April 1945. Claimant failed to be nominated for promotion in all three instances.

At the close of 1945, the Navy utilized at least one "administrative board" in effecting promotions. That type of board, consisting of some 15 members (8 Regular Navy and 7 Naval Reserve officers), also considered commanders for temporary promotion to the grade of captain. Members of the Board, which convened in Washington, D.C., were furnished the names and records of officers (Regular and Reserve) eligible for such promotions and were instructed to recommend "only those officers who are considered qualified to assume the responsibilities of the higher rank."[2] In November–December 1945, one such board considered, but did not recommend, claimant for promotion.

By letter dated June 9, 1947, claimant petitioned the Secretary of the Navy for promotion, with the "lineal position" he would have occupied had he been nominated by the first panel, for "reasons of equity and justice as supported by the facts set forth" in his letter. His request was denied, in substance on the ground that, between 1943 and 1945, four duly constituted selection boards had considered his "name and official record" and had failed to recommend him and further that there was no evidence of unfairness or partiality in the history of the case.

Twice in 1950, once in January and again in October, claimant's eligibility for promotion was passed upon by statutory selection boards convened pursuant to the Officer Personnel Act of 1947, 61 Stat. 795, as amended. He was not selected for promotion by either Board and, in 1951, submitted his application for retirement in lieu of mandatory retirement which was accepted.

[1] It was never established whether panel members on foreign duty had regular access to complete personnel files for record review purposes. Rather, overseas panel members were "'authorized to confer with a senior officers in two areas as desired in making your selections.'" *Rawlins* v. *United States*, 197 Ct. Cl. 972, 980 (1972).

[2] Rawlins, *supra*, n. 1, at 981–82.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## TECHNICAL AND CLERICAL CORRECTIONS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make technical and clerical corrections in the engrossment of the Senate amendment to H.R. 9370.

The PRESIDING OFFICER. Without objection, it is so ordered.

## FOREIGN INTELLIGENCE SURVEILLANCE ACT OF 1978

Mr. ROBERT C. BYRD. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 1566.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

*Resolved*, That the bill from the Senate (S. 1566) entitled "An Act to amend title 18, United States Code, to authorize applications for a court order approving the use of electronic surveillance to obtain foreign intelligence information", do pass with the following amendments:

Strike out all after the enacting clause, and insert: That this Act may be cited as the "Foreign Intelligence Surveillance Act of 1978".

TABLE OF CONTENTS

TITLE I—ELECTRONIC SURVEILLANCE WITHIN THE UNITED STATES FOR FOREIGN INTELLIGENCE PURPOSES

Sec. 101. Definitions.

TITLE II—CONFORMING AMENDMENTS

Sec. 201. Amendments to chapter 119 of title 18, United States Code.

TITLE III—EFFECTIVE DATE

Sec. 301. Effective date.

TITLE I—ELECTRONIC SURVEILLANCE WITHIN THE UNITED STATES FOR FOREIGN INTELLIGENCE PURPOSES

DEFINITIONS

SEC. 101. As used in this title:

(a) "Foreign power" means—

(1) a foreign government or any component thereof, whether or not recognized by the United States;

(2) a faction of a foreign nation or nations, not substantially composed of United States persons;

(3) an entity that is openly acknowledged by a foreign government or governments to be directed and controlled by such foreign government or governments;

(4) a group engaged in international terrorism or activities in preparation therefor;

(5) a foreign-based political organization,

not substantially composed of United States persons; or

(6) an entity that is directed and controlled by a foreign government or governments.

(b) "Agent of a foreign power" means—

(1) any person other than a United States person, who—

(A) acts in the United States as an officer, member, or employee of a foreign power; or

(B) acts for or on behalf of a foreign power which engages in clandestine intelligence activities in the United States contrary to the interests of the United States, when the circumstances of such person's presence in the United States indicate that such person may engage in such activities in the United States, or when such person knowingly aids or abets any person in the conduct of such activities or knowingly conspires with any person to engage in such activities; or

(2) any person who—

(A) knowingly engages in clandestine intelligence gathering activities for or on behalf of a foreign power, which activities involve or may involve a violation of the criminal statutes of the United States;

(B) pursuant to the direction of an intelligence service or network of a foreign power, knowingly engages in any other clandestine intelligence activities for or on behalf of such foreign power, which activities involve or are about to involve a violation of the criminal statutes of the United States;

(C) knowingly engages in sabotage or international terrorism, or activities that are in preparation therefor, for or on behalf of a foreign power; or

(D) knowingly aids or abets any person in the conduct of activities described in subparagraph (A), (B), or (C) or knowingly conspires with any person to engage in activities described in subparagraph (A), (B), or (C).

(c) "International terrorism" means activities that—

(1) involve violent acts or acts dangerous to human life or property that are or may be a violation of the criminal laws of the United States or of any State, or that might involve a criminal violation if committed within the jurisdiction of the United States or any State;

(2) appear to be intended—

(A) to intimidate or coerce a civilian population;

(B) to influence the policy of a government by intimidation or coercion; or

(C) to affect the conduct of a government by assassination or kidnapping; and

(3) occur totally outside the United States, or transcend national boundaries in terms of the means by which they are accomplished, the persons they appear intended to coerce or intimidate, or the locale in which their perpetrators operate or seek asylum.

(d) "Sabotage" means activities that involve or may involve a violation of chapter 105 of title 18, United States Code, or that might involve such a violation if committed against the United States.

(e) "Foreign intelligence information" means—

(1) information that relates to and, if concerning a United States person, is necessary to the ability of the United States to protect against—

(A) actual or potential attack or other grave hostile acts of a foreign power or an agent of a foreign power;

(B) sabotage or international terrorism by a foreign power or an agent of a foreign power; or

(C) clandestine intelligence activities by an intelligence service or network of a foreign power or by an agent of a foreign power; or

(2) information with respect to a foreign power or foreign territory that relates to and, if concerning a United States person, is necessary to—

(A) the national defense or the security of the United States; or

(B) the conduct of the foreign affairs of the United States.

(f) "Electronic surveillance" means—

(1) the acquisition by an electronic, mechanical, or other surveillance device of the contents of any wire or radio communication sent by or intended to be received by a particular, known United States person who is in the United States, if the contents are acquired by intentionally targeting that United States person, under circumstances in which a person has a reasonable expectation of privacy and a warrant would be required for law enforcement purposes;

(2) the acquisition by an electronic, mechanical, or other surveillance device of the contents of any wire communication to or from a person in the United States, without the consent of any party thereto, if such acquisition occurs in the United States;

(3) the intentional acquisition by an electronic, mechanical, or other surveillance device of the contents of any radio communication, under circumstances in which a person has a reasonable expectation of privacy and a warrant would be required for law enforcement purposes, and if both the sender and all intended recipients are located within the United States; or

(4) the installation or use of an electronic, mechanical, or other surveillance device in the United States for monitoring to acquire information, other than from a wire or radio communication, under circumstances in which a person has a reasonable expectation of privacy and a warrant would be required for law enforcement purposes.

(g) "Attorney General" means the Attorney General of the United States (or Acting Attorney General) or the Deputy Attorney General.

(h) "Minimization procedures", with respect to electronic surveillance means—

(1) specific procedures, which shall be adopted by the Attorney General, that are reasonably designed in light of the purpose and technique of the particular surveillance, to minimize the acquisition, retention, and dissemination of nonpublicly available information concerning unconsenting United States persons consistent with the need of the United States to obtain, produce, and disseminate foreign intelligence information;

(2) procedures that require that nonpublicly available information, which is not foreign intelligence information, as defined in subsection (e)(1), shall not be disseminated in a manner that identifies any individual United States person, without such person's consent, unless such person's identity is necessary to understand foreign intelligence information or assess its importance;

(3) notwithstanding paragraphs (1) and (2), procedures that allow for the retention and dissemination of information that is evidence of a crime which has been, is being, or is about to be committed and that is to be retained or disseminated for the purpose of preventing the crime or enforcing the criminal law; and

(4) notwithstanding paragraphs (1), (2), and (3), with respect to any electronic surveillance approved pursuant to section 102(a), procedures that require that no contents of any communication to which a United States person is a party shall be disclosed, disseminated, or used for any purpose or retained for longer than twenty-four hours unless a court order under section 105 is obtained or unless the Attorney General determines that the information may indicate a threat of death or serious bodily harm to any person.

(i) "United States person" means a citizen of United States, an alien lawfully admitted for permanent residence (as defined in section 101(a)(20) of the Immigration and Nationality Act), an unincorporated association a substantial number of members of which are citizens of the United States or aliens lawfully admitted for permanent residence, or a corporation which is incorporated in the United States, but does not include a corporation or an association which is a foreign power, as defined in subsection (a)(1), (2), or (3).

(j) "United States", when used in a geographic sense, means all areas under the territorial sovereignty of the United States and the Trust Territory of the Pacific Islands.

(k) "Aggrieved person" means a person who is the target of an electronic surveillance or any other person whose communications or activities were subject to electronic surveillance.

(l) "Wire communication" means any communication while it is being carried by a wire, cable, or other like connection furnished or operated by any person engaged as a common carrier in providing or operating such facilities for the transmission of interstate or foreign communications.

(m) "Person" means any individual, including any officer or employee of the Federal Government, or any group, entity, association, corporation, or foreign power.

(n) "Contents", when used with respect to a communication, includes any information concerning the identity of the parties to such communication or the existence, substance, purport, or meaning of that communication.

(o) "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Trust Territory of the Pacific Islands, and any territory or possession of the United States.

AUTHORIZATION FOR ELECTRONIC SURVEILLANCE FOR FOREIGN INTELLIGENCE PURPOSES

SEC. 102. (a)(1) Notwithstanding any other law, the President, through the Attorney General, may authorize electronic surveillance without a court order under this title to acquire foreign intelligence information for periods of up to one year if the Attorney General certifies in writing under oath that—

(A) the electronic surveillance is solely directed at—

(i) communications exclusively between or among foreign powers, as defined in section 101(a)(1), (2), or (3); or

(ii) the acquisition of technical intelligence from property or premises under the open and exclusive control of a foreign power, as defined in section 101(a)(1), (2), or (3); and

(B) the proposed minimization procedures with respect to such surveillance meet the definition of minimization procedures under section 101(h); and

if the Attorney General shall report such minimization procedures and any changes thereto to the House Permanent Select Committee on Intelligence and the Senate Select Committee on Intelligence at least thirty days prior to their effective date, unless the Attorney General determines immediate action is required and notifies the committees immediately of such minimization procedures and the reason for their becoming effective immediately.

(2) An electronic surveillance authorized by this subsection may be conducted only in accordance with the Attorney General's certification and the minimization procedures adopted by him.

(3) With respect to electronic surveillance authorized by this subsection, the Attorney General may direct a specified communication common carrier to—

(A) furnish all information, facilities, or technical assistance necessary to accomplish the electronic surveillance in such a manner as will protect its secrecy and produce a min-

imum of interference with the services that such carrier is providing its customers; and

(B) maintain under security procedures approved by the Attorney General and the Director of Central Intelligence any records concerning the surveillance or the aid furnished which such carrier wishes to retain.

The Government shall compensate, at the prevailing rate, such carrier for furnishing such aid.

(b) Applications for a court order under this title are authorized if the President has, by written authorization, empowered the Attorney General to approve applications to a United States district court, and a judge to whom an application is made may, notwithstanding any other law, grant an order, in conformity with section 105, approving electronic surveillance of a foreign power or an agent of a foreign power for the purpose of obtaining foreign intelligence information, except that the court shall not have jurisdiction to grant any order approving electronic surveillance directed solely as described in paragraph (1)(A) of subsection (a) unless such surveillance may involve the acquisition of communications of any United States person.

JURISDICTION

SEC. 103 (a) The United States district courts shall have jurisdiction to receive applications for court orders under this title and to issue orders under section 105 of this title.

(b) Proceedings under this title shall be conducted as expeditiously as possible. If any application to the United States district court is denied, the court shall record the reasons for that denial, and the reasons for that denial shall, upon the motion of the party to whom the application was denied, be transmitted under seal to the United States court of appeals.

APPLICATION FOR AN ORDER

SEC. 104. (a) Each application for an order approving electronic surveillance under this title shall be made by a Federal officer in writing upon oath or affirmation to a judge having jurisdiction under section 103. Each application shall require the approval of the Attorney General based upon his finding that it satisfies the criteria and requirements of such application as set forth in this title. It shall include—

(1) the identity of the Federal officer making the application;

(2) the authority conferred on the Attorney General by the President of the United States and the approval of the Attorney General to make the application;

(3) the identity, if known, or a description of the target of the electronic surveillance;

(4) a statement of the facts and circumstances relied upon by the applicant to justify his belief that—

(A) the target of the electronic surveillance is a foregn power or an agent of a foreign power; and

(B) each of the facilities or places at which the electronic surveillance is directed is being used, or is about to be used, by a foreign power or an agent of a foreign power;

(5) a statement of the proposed minimization procedures;

(6) a detailed description of the nature of the information sought and the type of communications or activities to be subjected to the surveillance;

(7) a certification or certifications by the Assistant to the President for National Security Affairs and an executive branch official or officials designated by the President from among those executive officers employed in the area of national security or defense and appointed by the President with the advice and consent of the Senate—

(A) that the certifying official deems the information sought to be foreign intelligence information;

(B) that the purpose of the surveillance is to obtain foreign intelligence information;

(C) that such information cannot reasonably be obtained by normal investigative techniques;

(D) that designates the type of foreign intelligence information being sought according to the categories described in section 101(e); and

(E) including a statement of the basis for the certification that—

(i) the information sought is the type of foreign intelligence information designated; and

(ii) such information cannot reasonably be obtained by normal investigative techniques;

(8) a statement of the means by which the surveillance will be affected;

(9) a statement of the facts concerning all previous applications that have been made to any judge under this title involving any of the persons, facilities, or places specified in the application, and the action taken on each previous application;

(10) a statement of the period of time for which the electronic surveillance is required to be maintained, and if the nature of the intelligence gathering is such that the approval of the use of electronic surveillance under this title should not automatically terminate when the described type of information has first been obtained, a description of facts supporting the belief that additional information of the same type will be obtained thereafter; and

(11) whenever more than one electronic, mechanical or other surveillance device is to be used with respect to a particular proposed electronic surveillance, the coverage of the devices involved and what minimization procedures apply to information acquired by each device.

(b) Whenever the target of the electronic surveillance is a foreign power, as defined in section 101(a) (1), (2), or (3), and each of the facilities or places at which the surveillance is directed is owned, leased, or exclusively used by that foreign power, the application need not contain the information required by paragraph (6), (7)(E), (8), and (11) of subsection (a), but shall contain such information about the surveillance techniques and communications or orther information concerning United States persons likely to be obtained as may be necessary to assess the proposed minimization procedures.

(c) The Attorney General may require any other affidavit or certification from any other officer in connection with the application.

(d) The judge may require the applicant to furnish such other information as may be necessary to make the determinations required by section 105.

ISSUANCE OF AN ORDER

SEC. 105. (a) Upon an application made pursuant to section 104, the judge shall enter an ex parte order as requested or as modified approving the electronic surveillance if he finds that—

(1) the President has authorized the Attorney General to approve applications for electronic surveillance for foreign intelligence information;

(2) the application has been made by a Federal officer and approved by the Attorney General;

(3) on the basis of the facts submitted by the applicant there is probable cause to believe that—

(A) the target of the electronic surveillance is a foreign power or an agent of a foreign power: *Provided*, That no United States person may be considered a foreign power or an agent of a foreign power solely upon the basis of activities protected by the first amendment to the Constitution of the United States; and

(B) each of the facilities or places at which the electronic surveillance is directed is being used, or is about to be used, by a foreign power or an agent of a foreign power;

(4) the proposed minimization procedures meet the definition of minimization procedures under section 101(h); and

(5) the application which has been filed contains all statements and certifications required by section 104 and, if the target is a United States person, the certification or certifications are not clearly erroneous on the basis of the statement made under section 104(a)(7)(E) and any other information furnished under section 104(d).

(b) An order approving an electronic surveillance under this section shall—

(1) specify—

(A) the identity, if known, or a description of the target of the electronic surveillance;

(B) the nature and location of each of the facilities or places at which the electronic surveillance will be directed;

(C) the type of information sought to be acquired and the type of communications or activities to be subjected to the surveillance;

(D) the means by which the electronic surveillance will be effected;

(E) the period of time during which the electronic surveillance is approved; and

(F) whenever more than one electronic, mechanical, or other surveillance device is to be used under the order, the authorized coverage of the devices involved and what minimization procedures shall apply to information subject to acquisition by each device; and

(2) direct—

(A) that the minimization procedures be followed;

(B) that, upon the request of the applicant, a specified communication or other common carrier, landlord, custodian, or other specified person furnish the applicant forthwith any and all information, facilities, or technical assistance necessary to accomplish the electronic surveillance unobstrusively and in such manner as will protect its secrecy and produce a minimum of interference with the services that such carrier, landlord, custodian, or other person is providing that target of electronic surveillance;

(C) that such carrier, landlord, custodian, or other person maintain under security procedures approved by the Attorney General and the Director of Central Intelligence any records concerning the surveillance or the aid furnished that such person wishes to retain; and

(D) that the applicant compensate, at the prevailing rate, such carrier, landlord, custodian, or other person for furnishing such aid.

(c) Whenever the target of the electronic surveillance is a foreign power, as defined in section 101(a) (1), (2), or (3), and each of the facilities or places at which the surveillance is directed is owned, leased, or exclusively used by that foreign power, the order need not contain the information required by subparagraphs (C), (D), and (F) of subsection (b)(1), but shall generally describe the information sought, the communications or activities to be subjected to the surveillance, and the type of electronic surveillance involved, including whether physical entry is required.

(d)(1) An order issued under this section may approve an electronic surveillance for the period necessary to achieve its purpose, or for ninety days, whichever is less, except that an order under this section shall approve an electronic surveillance targeted against a foreign power, as defined in section 101(a) (1), (2), or (3), for the period specified in the application or for one year, whichever is less.

(2) Extensions of an order issued under this title may be granted on the same basis as an original order upon an application for an extension and new findings made in the

same manner as required for an original order, except that an extension of an order under this chapter for a surveillance targeted against a foreign power, as defined in section 101(a) (4), (5), or (6), may be for a period not to exceed one year if the judge finds probable cause to believe that no communication of any individual United States person will be acquired during the period.

(3) At the end of the period of time for which electronic surveillance is approved by an order or an extension, the judge may assess compliance with the minimization procedures by reviewing the circumstances under which information concerning United States persons was acquired, retained, or disseminated.

(e) Notwithstanding any other provision of this title, when the Attorney General reasonably determines that—

(1) an emergency situation exists with respect to the employment of electronic surveillance to obtain foreign intelligence information before an order authorizing such surveillance can with due diligence be obtained; and

(2) the factual basis for issuance of an order under this title to approve such surveillance exists;

he may authorize the emergency employment of electronic surveillance if a judge having jurisdiction under section 103 is informed by the Attorney General or his designee at the time of such authorization that the decision has been made to employ emergency electronic surveillance and if an application in accordance with this title is made to that judge as soon as practicable, but not more than twenty-four hours after the Attorney General authorizes such surveillance. If the Attorney General authorizes such emergency employment of electronic surveillance, he shall require that the minimization procedures required by this title for the issuance of a judicial order be followed. In the absence of a judicial order approving such electronic surveillance, the surveillance shall terminate when the information sought is obtained, when the application for the order is denied, or after the expiration of twenty-four hours from the time of authorization by the Attorney General, whichever is earliest. In the event that such application for approval is denied, or in any other case where the electronic surveillance is terminated and no order is issued approving the surveillance, no information obtained or evidence derived from such surveillance shall be received in evidence or otherwise disclosed in any trial, hearing, or other proceeding in or before any court, grand jury, department, office, agency, regulatory body, legislative committee, or other authority of the United States, a State, or political subdivision thereof, and no information concerning any United States person acquired from such surveillance shall subsequently be used or disclosed in any other manner by Federal officers or employees without the consent of such person, except with the approval of the Attorney General if the information may indicate a threat of death or serious bodily harm to any person. A denial of the application made under this subsection may be reviewed as provided in section 103.

(f) Notwithstanding any other provision of this title, officers, employees, or agents of the United States are authorized in the normal course of their official duties to conduct electronic surveillance not targeted against the communications of any particular person or persons, under procedures approved by the Attorney General, solely to—

(1) test the capability of electronic equipment, if—

(A) it is not reasonable to obtain the consent of the persons incidentally subjected to the surveillance;

(B) the test is limited in extent and duration to that necessary to determine the capability of the equipment; and

(C) the contents of any communication acquired are retained and used only for the purpose of determining the capability of the equipment, are disclosed only to test personnel, and are destroyed before or immediately upon completion of the test;

(2) determine the existence and capability of electronic surveillance equipment being used by persons not authorized to conduct electronic surveillance, if—

(A) it is not reasonable to obtain the consent of persons incidentally subjected to the surveillance;

(B) such electronic surveillance is limited in extent and duration to that necessary to determine the existence and capability of such equipment; and

(C) any information acquired by such surveillance is used only to enforce chapter 119 of title 18, United States Code, or section 605 of the Communications Act of 1934, or to protect information from unauthorized surveillance; or

(3) train intelligence personnel in the use of electronic surveillance equipment, if—

(A) it is not reasonable to—

(i) obtain the consent of the persons incidentally subjected to the surveillance;

(ii) train persons in the course of surveillances otherwise authorized by this title; or

(iii) train persons in the use of such equipment without engaging in electronic surveillance;

(B) such electronic surveillance is limited in extent and duration to that necessary to train the personnel in the use of the equipment; and

(C) no contents of any communication acquired are retained or disseminated for any purpose, but are destroyed as soon as reasonably possible.

(g) Certifications made by the Attorney General pursuant to section 102(a) and applications made and orders granted under this title shall be retained for a period of at least ten years from the date of the application and shall be stored at the direction of the Attorney General under security procedures approved by the Director of Central Intelligence.

USE OF INFORMATION

SEC. 106. (a) Information acquired from an electronic surveillance conducted pursuant to this title concerning any United States person may be used and disclosed by Federal officers and employees without the consent of the United States person only in accordance with the minimization procedures required by this title. No otherwise privileged communication obtained in accordance with, or in violation of the provisions of this title shall lose its privileged character. No information acquired from an electronic surveillance pursuant to this title may be used or disclosed by Federal officers or employees except for lawful purposes.

(b) No information acquired pursuant to this title shall be disclosed for law enforcement purposes unless such disclosure is accompanied by a statement that such information, or any information derived therefrom, may only be used in a criminal proceeding with the advance authorization of the Attorney General.

(c) Whenever the Government intends to enter into evidence or otherwise use or disclose in any trial, hearing, or other proceeding in or before any court, department, officer, agency, regulatory body, or other authority of the United States, against an aggrieved person, any information obtained or derived from an electronic surveillance of that aggrieved person pursuant to the authority of this title, the Government shall, prior to the trial, hearing, or other proceeding or at a reasonable time prior to an effort to so disclose or so use that information or submit it in evidence, notify the aggrieved person and the court or other authority in which the information is to be disclosed or used that the Government intends to so disclose or so use such information.

(d) Whenever any State or political subdivision thereof intends to enter into evidence or otherwise use or disclose in any trial, hearing, or other proceeding in or before any court, department, officer, agency, regulatory body, or other authority of a State or a political subdivision thereof, against an aggrieved person any information obtained or derived from an electronic surveillance of that aggrieved person pursuant to the authority of this title, the State or political subdivision thereof shall notify the aggrieved person, the court or other authority in which the information is to be disclosed or used, and the Attorney General that the State or political subdivision thereof intends to so disclose or so use such information.

(e) Any person against whom evidence obtained or derived from an electronic surveillance to which he is an aggrieved person is to be, or has been, introduced or otherwise used or disclosed in any trial, hearing, or other proceeding in or before any court, department, officer, agency, regulatory body, or other authority of the United States, a State, or a political subdivision thereof, may move to suppress the evidence obtained or derived from such electronic surveillance on the grounds that—

(1) the information was unlawfully acquired; or

(2) the surveillance was not made in conformity with an order of authorization or approval.

Such a motion shall be made before the trial, hearing, or other proceeding unless there was no opportunity to make such a motion or the person was not aware of the grounds of the motion.

(f) Whenever a court or other authority is notified pursuant to subsection (c) or (d), or whenever a motion is made pursuant to subsection (e) and the Government concedes that information obtained or derived from an electronic surveillance pursuant to the authority of this title as to which the moving party is an aggrieved person is to be, or has been, introduced or otherwise used or disclosed in any trial, hearing, or other proceeding, the Government may make a motion before the court to determine the lawfulness of the electronic surveillance. The motion may not be heard by a judge who granted or denied an order or extension involving the surveillance at issue. Such motion shall stay any action in any court or authority to determine the lawfulness of the surveillance. In determining the lawfulness of the surveillance, the court shall, notwithstanding any other law, if the Attorney General files an affidavit under oath with the court that disclosure would harm the national security of the United States or compromise foreign intelligence sources and methods, review in camera the application, order, and such other materials relating to the surveillance as may be necessary to determine whether the surveillance of the aggrieved person was lawfully authorized and conducted. In making this determination, the court may disclose to the aggrieved person, under appropriate security procedures and protective orders, portions of the application, order, or other materials if there is a reasonable question as to the legality of the surveillance and if disclosure would likely promote a more accurate determination of such legality, or if such disclosure would not harm the national security.

(g) Except as provided in subsection (f), whenever any motion or request is made pursuant to any statute or rule of the United States or any State before any court or other authority of the United States or any State to discover or obtain applications or orders or other materials relating to surveillance pursuant to the authority of this title or to discover, obtain, or suppress any information obtained from electronic surveillance pursuant to the authority of this title, and the court or other authority determines

that the moving party is an aggrieved person, if the Attorney General files with the United States court of appeals an affidavit under oath that an adversary hearing would harm the national security or compromise foreign intelligence sources and methods and that no information obtained or derived from an electronic surveillance pursuant to the authority of this title has been or is about to be used by the Government in the case before the court or other authority, the Special Court of Appeals shall, notwithstanding any other law, stay the proceeding before the other court or authority and review in camera and ex parte the application, order, and such other materials as may be necessary to determine whether the surveillance of the aggrieved person was lawfully authorized and conducted. In making this determination, the court of appeals shall disclose, under appropriate security procedures and protective orders, to the aggrieved person or his attorney portions of the application, order, or other materials relating to the surveillance only if necessary to afford due process to the aggrieved person.

(h) If the court pursuant to subsection (f) or the court of appeals pursuant to subsection (g) determines the surveillance was not lawfully authorized and conducted, it shall, in accordance with the requirements of the law, suppress the evidence which was unlawfully obtained or derived from electronic surveillance of the aggrieved person or otherwise grant the motion of the aggrieved person. If the court pursuant to subsection (f) or the court of appeals pursuant to subsection (g) determines the surveillance was lawfully authorized and conducted, it shall deny the motion of the aggrieved person except to the extent that due process requires discovery or disclosure.

(i) Orders granting or denying motions or requests under subsection (h), decisions under this section as to the lawfulness of electronic surveillance, and, absent a finding of unlawfulness, orders of the district court or court of appeals granting or denying disclosure of applications, orders, or other materials relating to a surveillance shall be final orders and binding upon all courts of the United States and the several States except the court of appeals and the Supreme Court.

(j) In circumstances involving the unintentional acquisition by an electronic, mechanical, or other surveillance device of the contents of any radio communication, under circumstances in which a person has a reasonable expectation of privacy and a warrant would be required for law enforcement purposes, and if both the sender and all intended recipients are located within the United States, such contents shall be destroyed upon recognition, unless the Attorney General determines that the contents may indicate a threat of death or serious bodily harm to any person.

(k) If an emergency employment of electronic surveillance is authorized under section 105(e) and a subsequent order approving the surveillance is not obtained, the judge shall cause to be served on any United States person named in the application and on such other United States persons subject to electronic surveillance as the judge may determine in his discretion it is in the interest of justice to serve, notice of—

(1) the fact of the application;

(2) the period of the surveillance; and

(3) the fact that during the period information was or was not obtained.

On an ex parte showing of good cause to the judge the serving of the notice required by this subsection may be postponed or suspended for a period not to exceed ninety days. Thereafter, on a further ex parte showing of good cause, the court shall forego ordering the serving of the notice required under this subsection.

REPORT OF ELECTRONIC SURVEILLANCE

SEC. 107. In April of each year, the Attorney General shall transmit to the Administrative Office of the United States Courts and to Congress a report setting forth with respect to the preceding calendar year—

(a) the total number of applications made for orders and extensions of orders approving electronic surveillance under this title; and

(b) the total number of such orders and extensions either granted, modified, or denied.

CONGRESSIONAL OVERSIGHT

SEC. 108. (a) On a semiannual basis the Attorney General shall fully inform the House Permanent Select Committee on Intelligence and the Senate Select Committee on Intelligence concerning all electronic surveillance under this title. Nothing in this title shall be deemed to limit the authority and responsibility of those committees to obtain such additional information as they may need to carry out their respective functions and duties.

(b) The Permanent Select Committee on Intelligence of the House of Representatives and the Select Committee on Intelligence of the Senate may periodically review the information provided under subsection (a). If either such committee determines that an electronic surveillance of a United States person under this title has produced no foreign intelligence information and that the disclosure of the fact of such surveillance to such United States person would not harm the national security, such committee shall inform such person of the fact of such surveillance and that no foreign intelligence information was derived from such surveillance.

PENALTIES

SEC. 109. (a) OFFENSE.—A person is guilty of an offense if he intentionally engaged in electronic surveillance under color of law except as authorized by statute.

(b) DEFENSE.—It is a defense to a prosecution under subsection (a) that the defendant was a law enforcement or investigative officer engaged in the course of his official duties and the electronic surveillance was authorized by and conducted pursuant to a search warrant or court order of a court of competent jurisdiction.

(c) PENALTY.—An offense described in this section is punishable by a fine of not more than $10,000 or imprisonment for not more than five years, or both.

(d) JURISDICTION.—There is Federal jurisdiction over an offense under this section if the person committing the offense was an officer or employee of the United States at the time the offense was committed.

CIVIL LIABILITY

SEC. 110. CIVIL ACTION.—An aggrieved person, other than a foreign power or an agent of a foreign power, as defined in section 101 (a) or (b)(1)(A), respectively, who has been subjected to an electronic surveillance or whose communication has been disseminated or used in violation of section 109 shall have a cause of action against any person who committed such violation and shall be entitled to recover—

(a) actual damages, but not less than liquidated damages of $1,000 or $100 per day for each day of violation, whichever is greater;

(b) punitive damages; and

(c) reasonable attorney's fees and other investigation and litigation costs reasonably incurred.

AUTHORIZATION DURING TIME OF WAR

SEC. 111. Notwithstanding any other law, the President, through the Attorney General, may authorize electronic surveillance without a court order under this title to acquire foreign intelligence information for periods up to one year during a period of war declared by the Congress.

TITLE II—CONFORMING AMENDMENTS

AMENDMENTS TO CHAPTER 119 OF TITLE 18, UNITED STATES CODE

SEC. 201. Chapter 119 of title 18, United States Code, is amended as follows:

(a) Section 2511(2)(a)(ii) is amended to read as follows:

"(ii) Notwithstanding any other law, communication common carriers, their officers, employees, and agents, landlords, custodians, or other persons, are authorized to provide information, facilities, or technical assistance to persons authorized by law to intercept wire or oral communications or to conduct electronic surveillance, as defined in section 101 of the Foreign Intelligence Surveillance Act of 1978, if the common carrier, its officers, employees, or agents, landlord, custodian, or other specified person, has been provided with—

"(A) a court order directing such assistance signed by the authorizing judge, or

"(B) a certification in writing by a person specified in section 2518(7) of this title or the Attorney General of the United States that no warrant or court order is required by law, that all statutory requirements have been met, and that the specified assistance is required,

setting forth the period of time during which the provision of the information, facilities, or technical assistance is authorized and specifying the information, facilities, or technical assistance required. No communication common carrier, officer, employee, or agent thereof, or landlord, custodian, or other specified person shall disclose the existence of any interception or surveillance or the device used to accomplish the interception or surveillance with respect to which the person has been furnished an order or certification under this subparagraph, except as may otherwise be required by legal process and then only after prior notification to the Attorney General or to the principal prosecuting attorney of a State or any political subdivision of a State, as may be appropriate. No cause of action shall lie in any court against any communication common carrier, its officers, employees, or agents, landlord, custodian, or other specified person for providing information, facilities, or assistance in accordance with the terms of an order or certification under this subparagraph.".

(b) Section 2511(2) is amended by adding at the end thereof the following new provisions:

(e) Notwithstanding any other provision of this title or section 605 or 606 of the Communications Act of 1934, it shall not be unlawful for an officer, employee, or agent of the United States in the normal course of his official duty to conduct electronic surveillance, as defined in section 101 of the Foreign Intelligence Surveillance Act of 1978, as authorized by that Act.

"(f) Nothing contained in this chapter, or section 605 of the Communications Act of 1934, shall be deemed to affect the acquisition by the United States Government of foreign intelligence information from international or foreign communications by a means other than electronic surveillance as defined in section 101 of the Foreign Intelligence Surveillance Act of 1978, and procedures in this chapter and the Foreign Intelligence Surveillance Act of 1978 shall be the exclusive statutory means by which electronic surveillance, as defined in section 101 of such Act, and the interception of domestic wire and oral communications may be conducted.".

(c) Section 2511(3) is repealed.

(d) Section 2518(1) is amended by inserting "under this chapter" after "communication".

(e) Section 2518(4) is amended by inserting "under this chapter" after both appearances of "wire or oral communication".

(f) Section 2518(9) is amended by striking out "intercepted" and inserting "inter-

cepted pursuant to this chapter" after "communication".

(g) Section 2518(10) is amended by striking out "intercepted" and inserting "intercepted pursuant to this chapter" after the first appearance of "communication".

(b) Section 2519(3) is amended by inserting "pursuant to this chapter" after "wire or oral communications" and after "granted or denied".

TITLE III—EFFECTIVE DATE

EFFECTIVE DATE

SEC. 301. The provisions of this Act and the amendments made hereby shall become effective upon the date of enactment of this Act, except that any electronic surveillance approved by the Attorney General to gather foreign intelligence information shall not be deemed unlawful for failure to follow the procedures of this Act, if that surveillance is terminated or an order approving that surveillance is obtained under title I of this Act within ninety days following such date of enactment.

Amend the title so as to read: "An Act to authorize electronic surveillance to obtain foreign intelligence information.".

Mr. ROBERT C. BYRD. Mr. President, I move that the Senate disagree to the amendments of the House.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ORDER TO HOLD H.R. 12026 AT DESK

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that if and when H.R. 12026 is received from the other body, it be held at the desk pending further disposition.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business not to extend beyond 30 minutes, with statements therein limited to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

## MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

## EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

## MESSAGES FROM THE HOUSE

ENROLLED BILL SIGNED

At 9:35 a.m., a message from the House of Representatives delivered by Mr. Berry, one of its reading clerks, announced that the Speaker has signed the following enrolled bill:

S. 3107. An act to amend the Bankruptcy Act to provide for uniform supervision and control of employees of referees in bankruptcy.

The enrolled bill was subsequently signed by the Acting President pro tempore (Mr. PAUL G. HATFIELD).

At 12:12 p.m., a message from the House of Representatives delivered by Mr. Hackney, one of its reading clerks, announced that the Speaker has appointed Mr. THOMPSON, Mr. GAYDOS, and Mr. BUCHANAN on the part of the House as additional conferees in the conference on the disagreeing votes of the two Houses on the amendment of the Senate to H.R. 11445, an act to amend the Small Business Act and the Small Business Investment Act of 1958, solely for the consideration of sections 117 and 118 (OSHA).

The message also announced that the House has passed the following bill with amendments in which it requests the concurrence of the Senate:

S. 1566. An act to amend title 18, United States Code, to authorize applications for a court order approving the use of electronic surveillance to obtain foreign intelligence information.

At 1:08 p.m., a message from the House of Representatives delivered by Mr. Berry, announced that the Speaker has signed the following enrolled bills:

H.R. 8112. An act to repeal chapter 27 of title 44, United States Code;

H.R. 9471. An act to amend title 5, United State Code, to provide that Japanese-Americans shall be allowed civil service retirement credit for time spent in World War II internment camps; and

H.R. 12915. An act to amend section 2310 of title 44, relating to the National Archives Trust Fund Board.

The enrolled bills were subsequently signed by the Acting President pro tempore (Mr. PAUL G. HATFIELD).

At 1:56 p.m., a message from the House of Representatives delivered by Mr. Berry, announced that the House has passed the following bill, without amendment:

S. 3454. An act to amend the Act of August 29, 1974 (88 Stat. 795; 10 U.S.C. 8202 note), relating to the authorized numbers for the grades of lieutenant colonel and colonel in the Air Force and to authorize the President to suspend certain provisions of law when he determines that the needs of the Armed Forces so require, and for other purposes.

The message also announced that the House disagrees to the amendments of the Senate to H.R. 12936, an act making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1979, and for other purposes; agrees to the conference requested by the Senate on the disagreeing votes of the two Houses thereon; and that Mr. BOLAND, Mr. TRAXLER, Mr. BAUCUS, Mr. STOKES, Mr. BEVILL, Mrs. BOGGS, Mr. BURLISON of Missouri, Mr. ALEXANDER, Mr. MAHON, Mr. COUGHLIN, Mr. MCDADE, Mr. YOUNG of Florida, and Mr. CEDERBERG were appointed managers of the conference on the part of the House.

## ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, September 12, 1978, he presented to the President of the United States the following enrolled bill:

S. 3107. An act to amend the Bankruptcy Act to provide for uniform supervision and control of employees of referees in bankruptcy.

## ORDER FOR STAR PRINT OF REPORT NO. 95-1175

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that a star print be made on the report on H.R. 2329, the Fish and Wildlife Improvement Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

## COMMUNICATIONS

The PRESIDING OFFICER laid before the Senate the following communications, together with accompanying reports, documents, and papers, which were referred as indicated:

EC-4296. A communication from the Director, Office of Mangement and Budget, Executive Office of the President, transmitting, pursuant to law, a cumulative report on rescissions and deferrals, September 1978; to the Committee on the Budget, the Committee on Appropriations, the Committee on Agriculture, Nutrition, and Forestry, the Committee on Foreign Relations, the Committee on Armed Services, the Committee on the Judiciary, the Committee on Human Resources, the Committee on Governmental Affairs, the Committee on Banking, Housing, and Urban Affairs, the Committee on Commerce, Science, and Transportation, the Committee on Energy and Natural Resources, and the Committee on Finance, jointly, pursuant to order of January 30, 1975.

EC-4297. A communication from the Director, Office of Legislative Affairs, Department of the Navy, reporting, pursuant to law, of the intention of the Department to donate certain surplus property to the Japanese Foundation for the Promotion of Maritime Science, Tokyo, Japan, a nonprofit educational organization under the jurisdiction of the Japanese Government's Ministry of Transportation; to the Committee on Armed Services.

EC-4298. A communication from the Secretary of Housing and Urban Development, reporting, pursuant to law, on the late submission of a report on the progress of states and units of general purpose local government in adopting and enforcing energy conservation standards; to the Committee on Banking, Housing, and Urban Affairs.

EC-4299. A communication from the Vice President, Governmental Affairs, National Railroad Passenger Corporation, transmitting, pursuant to law, a report on (1) total itemized revenues and expenses; (2) revenues and expenses of each train operated; and (3) revenues and total expenses attributable to each railroad over which service is provided, for the month of May 1978; to the Committee on Commerce, Science, and Transportation.

EC-4300. A communication from the Administrator, Energy Information Administration, Department of Energy, transmitting,

pursuant to law, a report on changes in the market shares of the statutory categories of retail gasoline marketers; to the Committee on Energy and Natural Resources.

EC–4301. A communication from the Administrator, Energy Information Administration, Department of Energy, transmitting, pursuant to law, a report on changes in the refiner distribution and market shares of the statutory categories of refined petroleum products; to the Committee on Energy and Natural Resources.

EC–4302. A communication from the Administrator, Energy Information Administration, Department of Energy, transmitting, pursuant to law, a report on changes in the market shares of the statutory categories of retail gasoline marketers; to the Committee on Energy and Natural Resources.

EC–4303. A communication from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting, pursuant to law, international agreements other than treaties hereafter entered into by the United States within sixty days of the execution thereof; to the Committee on Foreign Relations.

EC–4304. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "What Causes Food Prices to Rise: What Can Be Done About It?" September 8, 1978; to the Committee on Governmental Affairs.

EC–4305. A communication from the Chairman, National Advisory Council on Adult Education, transmitting, pursuant to law, the Council's 1978 annual report; to the Committee on Human Resources.

EC–4306. A communication from the Commissioner of Education, Department of Health, Education, and Welfare, transmitting, pursuant to law, the 27th annual report of the Commissioner of Education on the administration of Public Laws 81–874 and 81–815, 81st Congress, as amended, for the fiscal year which ended on September 30, 1977; to the Committee on Human Resources.

EC–4307. A communication from the Secretary of Labor, transmitting, pursuant to law, a report on the 1978 Summer Youth Jobs Programs; to the Committee on Human Resources.

EC–4308. A communication from the U.S. Commissioner of Education, Department of Health, Education, and Welfare, transmitting, pursuant to law, a report on Graduate Fellowships and Assistance for Fiscal Year 1977; to the Committee on Human Resources.

EC–4309. A communication from the President of the United States, transmitting a proposed reduction in fiscal year 1978 supplemental appropriations in the amount of $200,000,000 and an amendment to the request for appropriations for the fiscal year 1979 in the amount of $1,831,640,000 for International Monetary Programs; to the Committee on Appropriations.

## PETITIONS

The PRESIDING OFFICER laid before the Senate the following petitions and memorials, which were referred as indicated:

POM–786. A resolution adopted by the Council of the American Library Association, relating to funding for the Library of Congress; ordered to lie on the table.

## REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. EASTLAND, from the Committee on the Judiciary, with amendments:

S. 1147. A bill to relieve the liability for the repayment of certain erroneously made contributions by the United States (Rept. No. 95–1183).

By Mr. EASTLAND, from the Committee on the Judiciary, without amendment:

H.R. 1427. An act for the relief of Marie Grant (Rept. No. 95–1184).

H.R. 3460. An act for the relief of William J. Elder and the estate of Stephen M. Owens, deceased (Rept. No. 95–1185).

H.R. 5097. An act for the relief of Doctor Daryl C. Johnson (Rept. No. 95–1186).

H.R. 6760. An act for the relief of Charles M. Metott (Rept. No. 95–1187).

FEDERAL PESTICIDE ACT OF 1978—CONFERENCE REPORT

Mr. LEAHY, from the committee of conference, submitted a report on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1678) to amend the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (Rept. No. 95–1188).

## EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. CANNON, from the Committee on Commerce, Science, and Transportation:

Gloria Schaffer, of Connecticut, to be a member of the Civil Aeronautics Board, for the remainder of the term expiring December 31, 1978, and for the term of 6 years expiring December 31, 1984.

(The above nomination from the Committee on Commerce, Science, and Transportation was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. SPARKMAN, from the Committee on Foreign Relations:

Edith Huntington Jones Dobelle, of Massachusetts, for the rank of Ambassador during her tenure of service as Chief of Protocol for the White House.

(The above nomination from the Committee on Foreign Relations was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

POLITICAL CONTRIBUTIONS STATEMENT

Nominee: Edith J. Dobelle.
Post: U.S. Chief of Protocol.
Contributions, amount, date, and donee:
1. Self, all contributions were joint.
2. Spouse, Evan S. Dobelle, $15.00, 1977, Lt. Gov. Thomas O'Neil, Massachusetts; $50.00, 1977, Mayor Paul Brindle, Pittsfield, Mass.; $200.00, 1976, Jimmy Carter for Pres.; and $200.00, 1975, Evan S. Dobelle for Mayor of Pittsfield, Mass.
3. Children and Spouses, none.
4. Parents, Mary C. and Hays Jones, none.
5. Grandparents, Not living.
6. Brothers and Spouses, Hays Jones, none.
7. Sisters and Spouses, Alice and Alexander Chorin, Mary Ellen Jones, none.

I have listed above the names of each member of my immediate family including their spouses. I have asked each of these persons to inform me of the pertinent contributions made by them. To the best of my knowledge, the information contained in this report is complete and accurate.

By Mr. SPARKMAN, from the Committee on Foreign Relations:

William H. Luers, of Illinois, to be Ambassador Extraordinary and Plenipotentiary of the United States to Venezuela.

(The above nomination from the Committee on Foreign Relations was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

POLITICAL CONTRIBUTIONS STATEMENT

Nominee: William H. Luers.
Post: U.S. Ambassador to Venezuela.
Contributions, (If none, write none), amount, date, and donee:
1. Self, William H. Luers, none.
2. Spouse, Jane F. Luers, none.
3. Children and Spouses, Mark B., David L., William F., Amy L., none.
4. Parents, deceased.
5. Grandparents, deceased.
6. Brothers and Spouses, none.
7. Sisters and Spouses, Mr. and Mrs. Richard Phelps, $25.00, Fall 1976, Jimmy Carter; (brother-in-law), $100.00, Fall 1976, Misc. Massachusetts; and Dr. and Mrs. John J. McCaffrey, none, State and Local officials.

I have listed above the names of each member of my immediate family including their spouses. I have asked each of these persons to inform me of the pertinent contributions made by them. To the best of my knowledge, the information contained in this report is complete and accurate.

## INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. BUMPERS:

S. 3492. A bill for the relief of Ahmad Shuja Khan McGuire, to the Committee on the Judiciary.

By Mr. NELSON:

S. 3493. A bill to amend the Internal Revenue Code of 1954 to provide simplification, reform, and relief for small business; to the Committee on Finance.

By Mr. NELSON (for himself and Mr. PERCY):

S. 3494. A bill to amend title 44 to insure the preservation of and public access to the official records of the President, and for other purposes; to the Committee on Governmental Affairs.

## STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. NELSON:

S. 3493. A bill to amend the Internal Revenue Code of 1954 to provide simplification, reform, and relief for small business; to the Committee on Finance.

SMALL BUSINESS DEPRECIATION REFORM ACT OF 1978

● Mr. NELSON. Mr. President, I am introducing today a bill to reform the depreciation system for small business.

This bill would permit any business to recover more rapidly the capital which it has invested in machinery and equipment by allowing depreciation deductions to be taken over a 3–year period for purchases of up to $100,000 of such property each year. This provision would be optional, and those firms which elected it would apply only straight-line depreciation, so that this system would make available a massive simplification of depreciation for the 97 percent of the 14 million U.S. businesses which are defined as small business.

With one significant exception, this bill is identical to a bill I introduced earlier this year, S. 2742. The major difference is that this bill will allow all companies to recover their capital investment faster and still receive the full benefit of the 10-percent investment tax credit.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3493

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE.

This Act may be cited as the "Small Business Depreciation Reform Act of 1978".

SEC. 2. DEPRECIATION REFORM.

Section 167 of the Internal Revenue Code of 1954 (relating to depreciation) is amended by adding at the end thereof the following new subsection:

"(q) THREE-YEAR USEFUL LIFE, STRAIGHT-LINE DEPRECIATION.—

"(1) GENERAL RULE.—In the case of a taxpayer who has made an election under this subsection for the taxable year, the term 'reasonable allowance' as used in subsection (a) means (with respect to property which has a useful life of 36 months or more) an allowance based on a useful life of 36 months computed under the straight-line method (within the meaning of subsection (b)(1)).

"(2) $100,000 BASIS LIMITATION.—For purposes of this subsection, the basis (as determined under subsection (g)) of property placed in service during the taxable year shall, to the extent that such basis exceeds $100,000 for the taxable year, not be taken into account.

"(3) ELECTION.—An election under this subsection for any taxable year shall be made at such time, in such manner, and subject to such conditions as may be prescribed by the Secretary by regulations.".

SEC. 3 Subsection (c) of section 46 is amended by adding at the end thereof the following new paragraph:

"(6) APPLICABLE PERCENTAGE IN THE CASE OF THREE-YEAR USEFUL LIFE, STRAIGHT-LINE DEPRECIATION.—

Notwithstanding subsection (c) (2), in the case of property with respect to which an election under section 167(q) applies, the useful life of any such property for purposes of this subpart shall be the useful life determined without regard to section 167(q).".

SEC. 4. EFFECTIVE DATE.

The amendment made by sections 2 and 3 of this Act shall apply in the case of property acquired after the date of enactment of this Act and placed in service in taxable years ending after the date of enactment of this Act.●

---

By Mr. NELSON (for himself and Mr. PERCY):

S. 3494. A bill to amend title 44 to insure the preservation of and public access to the official records of the President, and for other purposes; to the Committee on Governmental Affairs.

PRESIDENTIAL RECORDS ACT OF 1978

● Mr. NELSON. Mr. President, for myself and Mr. PERCY, I am today introducing a revised version of the Presidential Records Act of 1978. This legislation will assert public ownership of the documentary materials created or received by future Presidents and their staffs and establish procedures governing retention of those documents and access to them and would take effect in January 1981.

This bill is similar to H.R. 13364, which was introduced on June 29, 1978, in the House by Congressmen PREYER, BRADEMAS, and ERTEL and which has been reported by the House Government Operations Committee, and is now awaiting action by the full House. The bill reflects a compromise between the so-called Freedom of Information Act and historical records approaches to the issue of public ownership of Presidential records. These approaches were embodied in H.R. 10998 and H.R. 11001/S. 2596 respectively. I believe that the present legislation incorporates the best aspects of the previous bills and represents a balanced and reasonable approach to this difficult problem.

This bill is being cosponsored by the ranking minority member of the Committee on Governmental Affairs, the distinguished senior Senator from Illinois, Mr. PERCY. The administration has cooperated fully with us in developing this bill, which, in its present form, will have the President's support.

On February 27, 1978, I introduced S. 2596. At that time I spoke at some length on the need for legislation to provide for public ownership of Presidential papers. I reviewed the past practices of Presidents under the system of private ownership of Presidential papers, the recommendations of the National Study Commission on Records and Documents of Federal Officials, upon which I served, and the constitutional issues which must be dealt with when legislating in this area.

My conclusions were that legislation to assert public ownership was essential, but that the legislation must be carefully drawn to insure protection of the President's constitutional rights to privacy and freedom of association and to safeguard the confidentiality of the White House decisionmaking process. I believe that the legislation which I am introducing today meets these criteria and is worthy of the support of all who believe that the documentary materials of future Presidencies should be preserved and should find their way into the public domain under the rule of law.

The legislation would divide "Presidential papers" into two categories. "Personal records," as defined in the bill, would remain the personal property of those who create them. "Personal records" are defined as all documentary materials of a purely private or nonpublic character which do not relate to or have an affect upon the carrying out of the constitutional, statutory, or other official or ceremonial duties of the President. Diaries, journals, personal notes, and materials relating to private political associations of the President or his aides would be included under this definition. It is hoped that allowing former Presidents considerable leeway in the definition of "personal records" will encourage those Presidents to make available those records after a reasonable length of time.

"Presidential records," which the legislation defines as documentary materials created or received by the President, his immediate staff, or a unit or individual of the Executive Office of the President whose function it is to advise and assist the President in carrying out of his official duties, would become public property. "Presidential records" would include any documentary materials relating to the political activities of the President or members of his staff, but only if such activities related to or had a direct effect upon the carrying out of constitutional, statutory, or other official or ceremonial duties of the President. At the conclusion of a President's term of office, the Archivist of the United States would assume control over these records.

The line between "personal" and "Presidential" records cannot be drawn with absolute certainty. The bill's definitions provide guidance to the Archivist in making individual determinations, but leave the necessary flexibility which allows for the exercise of informed professional judgment.

The bill grants to the outgoing President the right to impose restrictions on access to the Presidential records of his administration for a period not to exceed 13 years within one or more of the following categories:

(1)(A) Records specifically authorized under criteria established by an Executive order to be kept secret in the interest of national defense of foreign policy and (B) in fact properly classified pursuant to such Executive order;

(2) Records relating to appointments to executive or judicial positions;

(3) Records specifically exempted from disclosure by statute (other than the Freedom of Information Act), provided that such statute (A) requires that the material be withheld from the public in such a manner as to leave no discretion on the issue, or (B) establishes particular criteria for withholding or refers to particular types of material to be withheld;

(4) Records containing trade secrets and commercal or financial information obtained from a person and privileged or confidential;

(5) Records concerning confidential communications requesting or submitting advice, between the President and his advisors, or between such advisors; or

(6) Personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy; and

(7) Investigatory records compiled for law enforcement purposes, but only to the extent that the production of such records would (A) interfere with enforcement proceedings, (B) deprive a person of a right to a fair trial or an impartial adjudication, (C) constitute an unwarranted invasion of personal privacy, (D) disclose the identity of a confidential source and, in the case of a record compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, confidential information furnished only by the confidential source, (E) disclose investigative techniques and procedures, or (F) endanger the life or physical safety of law enforcement personnel.

The legislation provides that a former President could waive a previously imposed restriction and that restrictions would be lifted on any Presidential record placed in the public domain by publication by a former President.

Any Presidential record which is left

unrestricted by an outgoing President would be exempt from disclosure until the earlier of (A) the date which is 5 years after the date on which the Archivist obtains custody of such records or (B) the date on which the Archivist completes the processing and organization of such records.

The legislation's essential concern is with the treatment of Presidential records once a President leaves office. However, the condition of these records will depend on the manner in which the President maintains the records of his administration while in office. The degree to which outsiders can or should interfere with White House recordkeeping while a President is in office has been a source of considerable controversy among those concerned with the question of Presidential papers. The approach to this problem chosen in this legislation is a straightforward one. The President is merely enjoined not to dispose of those of his Presidential records which have administrative, historical, informational, or evidentiary value and the bill provides that the Archivist shall advise the President about the potential value of Presidential records proposed for disposal.

The legislation also provides that the Archivist will establish guidelines to determine the types of Presidential records deemed to have administrative, historical, informational or evidentiary value. The bill also requires the Archivist to provide guidance to the President concerning records whose value may be difficult to assess.

During the period of restricted access, the legislation provides that decisions concerning the proper classification of documents shall be made by the Archivist, though the former President may challenge any decision of the Archivist in U.S. district court. Here again, the intent is to provide for a sensible balance between the public interest and the rights of the former President.

At the conclusion of the period of restricted access, Presidential records shall be administered as agency records under the terms of the Freedom of Information Act, 5 United States Code section 552. Under the terms of the FOIA, properly classified materials pertaining to national security would continue to be protected from disclosure until the need for their classification had lapsed.

Also, after the 13 years were concluded, the Archivist would retain discretion under the FOIA to prevent the disclosure of materials whose disclosure would violate other statutes and could maintain the confidentiality of trade secrets, investigatory records and the like.

Mr. President, this legislation is fair to all parties concerned and will insure the creation of a fully documented, rich historical record of all future Presidencies. It will also contribute to the achievement of greater governmental accountability to the people than presently exists. I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3494

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Presidential Records Act of 1978".

RECORDS MANAGEMENT, PRESERVATION, AND PUBLIC AVAILABILITY

SEC. 2. (a) Title 44 of the United States Code is amended by adding immediately after chapter 21 the following chapter:

"Chapter 22.—PRESIDENTIAL RECORDS

"Sec.
"2201. Definitions
"2202. Ownership of Presidential records.
"2203. Management and custody of Presidential records.
"2204. Restrictions on access to Presidential records.
"2205. Exceptions to restrictions on access.
"2206. Regulations.
"2207. Vice-Presidential records.

"Sec. 2201. Definitions

"As used in this chapter—

"(1) The term 'documentary material' means all books, correspondence, memorandums, documents, papers, pamphlets, works of art, models, pictures, photographs, plats, maps, films, and motion pictures, including, but not limited to, audio, audiovisual, or other electronic or mechanical recordations.

"(2) The term 'Presidential records' means documentary materials created or received by the President, his immediate staff, or a unit or individual of the Executive Office of the President whose function is to advise and assist the President, in the course of conducting activities which relate to or have an effect upon the carrying out of the constitutional, statutory, or other official or ceremonial duties of the President. Such term—

"(A) includes any documentary materials relating to the political activities of the President or members of his staff, but only if such activities relate to or have a direct effect upon the carrying out of constitutional, statutory, or other official or ceremonial duties of the President; but

"(B) does not include any documentary materials that are (i) official records of an agency (as defined in section 552(c) of title 5, United States Code); (ii) personal records; (iii) stocks of publications and stationery; or (iv) extra copies of documents produced only for convenience of reference, when such copies are clearly so identified.

"(3) The term 'personal records' means all documentary materials of a purely private or nonpublic character which do not relate to or have an effect upon the carrying out of the constitutional, statutory, or other official or ceremonial duties of the President. Such term includes—

"(A) diaries, journals, or other personal notes serving as the functional equivalent of a diary or journal which are not prepared or utilized for, or circulated or communicated in the course of, transacting Government business, and

"(B) materials relating to private political associations, and having no relation to or direct effect upon the carrying out of constitutional, statutory, or other official or ceremonial duties of the President.

"(4) The term "Archivist' means the Archivist of the United States.

"(5) The term 'former President', when used with respect to Presidential records, means the former President during whose term or terms of office such Presidential records were created.

"Sec. 2202. Ownership of Presidential records

"The United States shall reserve and retain complete ownership, possession, and control of Presidential records; and such records shall be administered in accordance with the provisions of this chapter.

"Sec. 2203. Management and custody of Presidential records

"(a) Through the implementation of records management controls and other necessary actions, the President shall take all such steps as may be necessary to assure that the activities, deliberations, decisions, and policies that reflect the performance of his constitutional, statutory, or other official or ceremonial duties are adequately documented and that such records are maintained as Presidential records pursuant to the requirements of this section and other provisions of law.

"(b) Documentary materials produced or received by the President, his staff, or units or individuals in the Executive Office of the President the function of which is to advise and assist the President, shall, to the extent practicable, be categorized as Presidential records or personal records upon their creation or receipt and be filed separately.

"(c)(1) During his term of office, the President may not dispose of those of his Presidential records which have administrative, historical, informational, or evidentiary value. The Archivist shall advise the President about the potential value of Presidential records proposed for disposal.

"(c)(2) The Archivist shall promulgate guidelines to establish the types of Presidential records which shall be deemed to have administrative, historical, informational, or evidentiary value. The President shall be governed by these guidelines in determining whether or not Presidential records scheduled for disposal ought to be retained. The Archivist may specify categories of Presidential records whose potential administrative, historical, informational, or evidentiary value may be difficult to assess. The President may dispose of Presidential records which fall within any such category only after he obtains the views, in writing, of the Archivist concerning the proposed disposal of such records. The Archivist may review any such records prior to submitting his views.

"(d)(1) Upon the conclusion of a President's term of office, or if a President serves consecutive terms upon the conclusion of the last term, the Archivist of the United States shall assume responsibility for the custody, control, and preservation of, and access to, the Presidential records of that President.

"(2) The Archivist shall deposit all such Presidential records in a Presidential archival depository or another archival facility operated by the United States. The Archivist is authorized to designate, after consultation with the former President, a director at each depository or facility, who shall be responsible for the care and preservation of such records.

"(3) The Archivist is authorized to dispose of such Presidential records which he has appraised and determined to have insufficient administrative, historical, informational, or evidentiary value to warrant their continued preservation. Notice of such disposal shall be published in the Federal Register at least 60 days in advance of the proposed disposal date. Publication of such notice shall constitute a final agency action for purposes of review under chapter 7 of title 5, United States Code.

"Sec. 2204. Restrictions on access to Presidential records

"(a) Prior to the conclusion of his term of office or last consecutive term of office, as the case may be, the President shall specify durations, not to exceed 13 years, for which access shall be restricted with respect to information, in a Presidential record, within one or more of the following categories:

"(1)(A) specifically authorized under criteria established by an Executive order to be kept secret in the interest of national defense or foreign policy and (B) in fact properly classified pursuant to such Executive order;

"(2) relating to appointments to Federal office;

"(3) specifically exempted from disclosure by statute (other than sections 552 and 552b of title 5, United States Code), provided that such statute (a) requires that the material be withheld from the public in such a manner as to leave no discretion on the issue, or (B) establishes particular criteria for withholding or refers to particular types of material to be withheld;

"(4) trade secrets and commercial or financial information obtained from a person and privileged or confidential;

"(5) confidential communications requesting or submitting advice, between the President and his advisers, or between such advisers; or

"(6) personnel and medical files and similar files, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

"(7) investigatory records compiled for law enforcement purposes, but only to the extent that the production of such records would (A) interfere with enforcement proceedings, (B) deprive a person of a right to a fair trial or an impartial adjudication, (C) constitute an unwarranted invasion of personal privacy, (D) disclose the identity of a confidential source and, in the case of a record compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, confidential information furnished only by the confidential source, (E) disclose investigative techniques and procedures, or (F) endanger the life or physical safety of law enforcement personnel;

"(b)(1) Any Presidential record or reasonably segregable portion thereof containing information within a category restricted by the President under subsection (a) shall be so designated by the Archivist and access thereto shall be restricted until the earlier of—

"(A)(i) the date on which the former President waives the restriction on disclosure of such record, or

((ii) the expiration of the duration specified under subsection (a) for the category of information on the basis of which access to such record has been restricted; or

"(B) upon a determination by the Archivist that such record or reasonably segregable portion thereof, or of any significant element or aspect of the information contained in such record or reasonably segregable portion thereof, has been placed in the public domain through publication by the former President.

"(2) Any such record which does not contain information within a category restricted by the President under subsection (a), or contains information within such a category for which the duration of restricted access has expired, shall be exempt from the provisions of subsection (c) until the earlier of—

"(A) the date which is 5 years after the date on which the Archivist obtains custody of such record pursuant to section 2203(d)(1); or

"(B) the date on which the Archivist completes the processing and organization of such records or integral file segment thereof.

"(3) During the period of restricted access specified pursuant to subsection (b)(1), the determination whether access to a Presidential record or reasonably segregable portion thereof shall be restricted shall be made by the Archivist, in his discretion, after consultation with the former President, and, during such period, such determinations shall not be subject to judicial review, except that initiated by such President. The Archivist shall establish procedures whereby any person denied access to a Presidential record because such record is restricted pursuant to a determination made under this paragraph, may file an administrative appeal of such determination. Such procedures shall provide for a written determination by the Archivist or his designee, within 30 working days after receipt of such an appeal, setting forth the basis for such determination.

"(c) Subject to the limitations on access imposed pursuant to subsections (a) and (b), Presidential records shall be administered in accordance with section 552 of title 5, United States Code, and for the purposes of such section such records shall be deemed to be records of the National Archives and Records Service of the General Services Administration. Access to such records shall be granted on nondiscriminatory terms.

"(d) Upon the death or disability of a President or former President, any discretion or authority the President or former President may have had under this chapter shall be exercised by the Archivist unless otherwise previously provided by the President or former President in a written notice to the Archivist.

"(e) The United States District Court for the District of Columbia shall have jurisdiction over any claim of the former President that a determination made by the Archivist of the United States made after the period of Presidentially-imposed restrictions violates his rights or privileges.

"Sec. 2205. Exceptions to restricted access

"Notwithstanding any restrictions on access imposed pursuant to section 2204—

"(1) the Archivist and persons employed by the National Archives and Records Service of the General Services Administration who are engaged in the performance of normal archival work shall be permited access to Presidential records in the custody of the Archivist;

"(2) subject to any rights, defenses, or privileges which the United States or any agency or person may invoke, Presidential records shall be made available—

"(A) pursuant to subpoena or other judicial process issued by a court of competent jurisdiction for the purposes of any civil or criminal investigation or proceeding;

"(B) to an incumbent President if such records contain information that is needed for the conduct of current business of his office and that is not otherwise available; and

"(C) to either House of Congress, or, to the extent of matter within its jurisdiction, to any committee or subcommittee thereof if such records contain information that is needed for the conduct of its business and that is not otherwise available; and

"(3) the Presidential records of a former President shall be available to such former President or his designated representative.

"Sec. 2206. Regulations

"The Archivist shall promulgate in accordance with section 553 of title 5, United States Code, regulations necessary to carry out the provisions of this chapter. Such regulations shall include—

"(1) provisions for advance public notice and description of any Presidential records scheduled for disposal pursuant to section 2203(d)(3); and

"(2) provisions for providing notice to the former President when materials to which access would otherwise be restricted pursuant to section 2204(a) are to be made available in accordance with section 2205(2).

"Sec. 2207. Vice-Presidential records.

"Vice-Presidential records shall be subject to the provisions of this chapter in the same manner as Presidential records. The duties and responsibilities of the Vice President, with respect to Vice-Presidential records, shall be the same as the duties and responsibilities of the President under this chapter with respect to Presidential records. The authority of the Archivist with respect to Vice-Presidential records shall be the same as the authority of the Archivist under this chapter with respect to Presidential records, except that the Archivist may, when the Archivist determines that it is in the public interest, enter into an agreement for the deposit of Vice-Presidential records in a non-Federal archival depository. Nothing in this chapter shall be construed to authorize the establishment of separate archival depositories for such Vice-Presidential records.".

(b)(1) The table of chapters for title 44, United States Code, is amended by inserting immediately after the item relating to chapter 21 the following new item:

"22. Presidential Records ---------- 2201".

(2) Section 2107 of ttile 44, United States Code, is amended by adding at the end thereof the following new sentence: "This section shall not apply in the case of any Presidential records which are subject to the provisions of Chapter 22 of this title.".

(3) Section 2108(c) of title 44 is amended by adding at the end thereof the following: "Only the first two sentences of this subsection shall apply to Presidential records as defined in section 2201(2) of this title.".

EFFECTIVE DATE

SEC. 3. The amendments made by this Act shall be effective with respect to any Presidential records (as defined in section 2201(2) of title 44, as amended by section 2 of this Act) created during a term of office of the President beginning on or after January 20, 1981.

SEPARABILITY

SEC. 4. If any provision of this Act is held invalid for any reason by any court, the validity and legal effect of the remaining provisions shall not be affected thereby.●

## ADDITIONAL COSPONSORS

S. 2388

At the request of Mr. JAVITS, the Senator from Michigan (Mr. RIEGLE) was added as a cosponsor of S. 2388, the Employee Education Assistance Act.

S. 2978

At the request of Mr. MCCLURE, the Senator from Pennsylvania (Mr. HEINZ) was added as a cosponsor of S. 2978, a bill to amend the Occupational Safety and Health Act of 1970 to prohibit restrictions on work rules in locations in which there is hunting, fishing, or shooting sports, and for other purposes.

SENATE JOINT RESOLUTION 153

At the request of Mr. ANDERSON, the Senator from Nevada (Mr. CANNON) was added as a cosponsor of Senate Joint Resolution 153, to authorize the President to proclaim the third week in June, 1979, as "National Veterans Hospital Week."

SENATE JOINT RESOLUTION 155

At the request of Mr. ZORINSKY, the Senator from Colorado (Mr. HASKELL), the Senator from North Dakota (Mr. YOUNG), the Senator from North Dakota (Mr. BURDICK), and the Senator from Alabama (Mrs. ALLEN) be added as cosponsors of Senate Joint Resolution 155, to increase the price support for milk, wheat, corn, soybeans, and cotton to not less than 90 percent of the respective parity prices therefor, and for other purposes.

AMENDMENT NO. 3437

At the request of Mr. LEAHY, the Senator from Michigan (Mr. RIEGLE) was added as a cosponsor of amendment No.

3437 intended to be proposed to S. 2584, the Nuclear Regulatory Commission authorization.

AMENDMENT NO. 3478

At the request of Mr. NELSON, the Senator from Colorado (Mr. HART) was added as a cosponsor of amendment No. 3478, intended to be proposed to H.R. 5285, the Medicare-Medicaid Reform Act.

SENATE RESOLUTION 557

At the request of Mr. ROTH, the Senator from Nebraska (Mr. CURTIS), the Senator from Kansas (Mr. DOLE), the Senator from Utah (Mr. GARN), the Senator from Michigan (Mr. GRIFFIN), the Senator from Utah (Mr. HATCH), the Senator from Virginia (Mr. SCOTT), and the Senator from Texas (Mr. TOWER) were added as cosponsors of Senate Resolution 557, requesting the President of the United States to appoint a Special Prosecutor in connection with the General Services Administration.

## AMENDMENTS SUBMITTED FOR PRINTING

### REVENUE ACT OF 1978—H.R. 13511

AMENDMENT NO. 3585

(Ordered to be printed and referred to the Committee on Finance.)

Mr. BAKER (for himself, Mr. BELLMON, Mr. RIBICOFF, and Mr. DANFORTH) submitted an amendment intended to be proposed by them, jointly, to H.R. 13511, an act to amend the Internal Revenue Code of 1954 to reduce income taxes, and for other purposes.

JOB CREATION CREDIT

Mr. BAKER. Mr. President, on behalf of Senators BELLMON, RIBICOFF, DANFORTH and myself, I send to the desk an amendment to H.R. 13511, the bill presently pending before the Senate Finance Committee, and ask that it be so referred.

Mr. President, in March of this year Senators BELLMON, RIBICOFF, DANFORTH and I introduced a welfare reform bill which was called the Job Opportunities and Family Security Act of 1978. As the title indicates, major emphasis was placed upon unemployment, with particular attention to the creation of private sector jobs for the structurally unemployed.

Although an employment tax credit has been in existence for almost a year, it is not targeted upon any particular class of unemployed individuals. I consider that a major drawback to the provision and called for a targeted employment tax credit last December.

Since then, the administration has endorsed a targeted employment tax credit and Members of this body have proposed various targeted tax credits. The employment tax credit amendment which we offer today represents a revision and improvement upon the tax credit provision in S. 2777, the so-called Baker-Bellmon welfare bill.

Mr. President, I ask unanimous consent that a summary of that amendment, as well as the text of the amendment, be printed in the RECORD at the conclusion of my remarks.

There can be no doubt, Mr. President, that a targeted employment tax credit has broad support in both the House and the Senate. In light of that support and the need for an effective incentive for private employers to hire structurally unemployed, I hope that the Senate Finance Committee will give our amendment, and those which are similar to it, the most careful consideration.

There being no objection, the amendment and summary were ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 3585

On page 76, beginning with line 1, strike out all through page 91, line 8, and insert in lieu thereof the following:

JOB CREATION CREDIT

SEC. 315. (a) IN GENERAL.—Section 51 (relating to amount of credit for employment of certain new employees) is amended to read as follows:

"SEC. 51. AMOUNT OF CREDIT.

"(a) DETERMINATION OF AMOUNT.—The amount of the credit allowable by section 44B for any taxable year shall be equal to the sum of—

"(1) one dollar multiplied by the number of qualified first-year new employee hours for such year, and

"(2) 50 cents multiplied by the number of qualified second-year new employee hours for such year.

"(b) $100,000 or 20 PERCENT PER YEAR LIMITATION ON CREDIT.—The amount of the credit determined under this subpart for any employer (and the amount of the credit allowable by section 44B to any taxpayer) with respect to any calendar year shall not exceed the greater of—

"(1) $100,000, or

"(2) an amount equal to 20 percent of the taxpayer's total employee hours.

"(c) DEFINITIONS.—For purposes of this subpart—

"(1) NEW EMPLOYEE.—The term 'new employee' means any individual employed after December 31, 1978, who is certified by the designated agency of the State in which he is employed as being an individual who—

"(A) is receiving aid to families with dependent children provided under a State plan approved under part A of title IV of the Social Security Act;

"(B) is receiving supplemental security income benefits under title XVI of the Social Security Act (including supplemental security income benefits of the type described in section 616 of such Act or section 212 of Public Law 93-66); or

"(C) is an unemployed youth who has attained 18 years of age (or graduated from secondary school) but not 25 years of age and whose family income does not exceed 70 percent of the lower living standard income level published by the Bureau of Labor Statistics.

"(2) EMPLOYEE HOURS.—The term 'employee hours' means the number of hours of employment for which the taxpayer compensates an employee at a rate of pay not less than the prevailing rate for the occupation and job classification of individuals employed by the same employer but only to the extent such hours exceed 30 hours and are not more than 40 hours in any full calendar week. An employee whose compensation is not determined on an hourly basis shall be considered, for purposes of this paragraph, to be compensated for not more than 40 hours of employment for each full calendar week he is employed.

"(3) QUALIFIED FIRST-YEAR NEW EMPLOYEE HOURS.—The term 'qualified first-year new employee hours' means, with respect to any new employee, the number of employee hours during the 1-year period beginning with the day such employee begins work for the employer.

"(4) QUALIFIED SECOND-YEAR NEW EMPLOYEE HOURS.—The term 'qualified second-year new employee hours' means, with respect to any new employee, the number of employee hours during the 1-year period beginning on the day after the last day of the 1-year period described in paragraph (3).

"(5) DESIGNATED AGENCY OF A STATE.—The term 'designated agency of a State' means—

"(A) the State agency administering the State plan under part A of title IV of the Social Security Act, or

"(B) the State employment agency, and which is selected by the chief executive officer of the State to certify employees under this subpart.

"(d) RULES FOR APPLICATION OF SECTION.—For purposes of this subpart—

"(1) REMUNERATION MUST BE FOR TRADE OR BUSINESS EMPLOYMENT WITHIN UNITED STATES.—Remuneration paid by an employer to an employee during any calendar year shall be taken into account only if more than one-half of the remuneration so paid is for services performed in the United States in a trade or business of the employer.

"(2) SPECIAL RULE FOR CERTAIN DETERMINATIONS.—Any determination as to whether paragraph (1) of this subsection applies with respect to any employee for any calendar year shall be made without regard to subsections (a) and (b) of section 52.".

(b) TECHNICAL AND CONFORMING AMENDMENTS.—

(1) Subsections (a) and (b) of section 52 (relating to special rules in determining credit for employment of new employees) are amended by striking out "unemployment insurance wages" and inserting in lieu thereof "new employee hours".

(2) (A) Section 52 (relating to special rules for computing credit for employment of certain new employees) is amended—

(i) by striking out subsections (c), (e), and (j), and

(ii) by redesignating subsections (d), (f), (g), (h), and (i) as subsections (c), (d), (e), (f), and (g), respectively; and

(iii) by adding at the end thereof the following new subsection:

"(h) CERTAIN DISMISSALS.—If any employer dismisses any employee for the purpose of securing (or increasing) a credit under section 44B for any taxable year, the amount of the credit allowable under section 44B for such year (determined without regard to this subsection) shall be decreased by an amount equal to 2 times any increase in such credit which would (but for this subsection) have resulted in whole or in part by reason of such dismissal.".

(B) Subsection (e) (3) of section 52 (as redesignated by subparagraph (A)) is amended—

(i) by striking out "$100,000" the first place it appears; and

(ii) by striking out "$100,000" the second place it appears and inserting in lieu thereof "such amount".

(C) Subsection (g) of section 52 (as so redesignated) is amended—

(i) by striking out "$50,000" in the heading; and

(ii) by striking out "$50,000 in lieu of $100,000" and inserting in lieu thereof "one-half of the amount specified in such section".

(3) AMENDMENT OF SECTION 53.—Section 53 (relating to limitation based on amount of tax) is amended by striking out subsection (b) and by redesignating subsection (c) as subsection (b).

(4) (A) Section 280C (relating to portion of wages for which credit is claimed under section 44B) is amended—

(i) by inserting "attributable to qualified first-year and second-year new employee hours" after "year"; and

(ii) by inserting "with respect to such hours" before "determined".

(B) (i) The heading for section 280C is amended by striking out "PORTION OF WAGES" and inserting in lieu thereof "AMOUNT".

(ii) The table of sections for part IX of subchapter B of chapter 1 is amended by striking out "Portion of wages" in the item relating to section 280C and inserting in lieu thereof "Amount".

(c) Effective Date.—

(1) IN GENERAL.—Except as otherwise provided in this subsection, the amendments made by this section shall apply to amounts paid or incurred after December 31, 1978, in taxable years ending after such date.

(2) TRANSITIONAL RULE.—In the case of a taxable year which begins in 1978 and ends after December 31, 1978, the amount of the credit allowable by section 44B of the Internal Revenue Code of 1954 (determined without regard to section 53 of such Code) shall be the sum of—

(A) the amount of the credit which would be so allowable without regard to the amendments made by this section, plus

(B) the amount which would be so allowable by reason of the amendments made by this section.

SUMMARY OF AMENDMENTS TO THE TAX BILL

EMPLOYMENT TAX CREDIT

We would propose an employment tax credit with the following provisions:

(1) Private and non-profit employers would be provided a tax credit equal to $1 per hour of employment for one full year and $.50 per hour for the second year;

(2) The individuals who would be eligible for this credit consist of employable AFDC recipients, employable SSI recipients, and unemployed youth (age 18-24) from families whose income does not exceed 70 percent of the BLS lower living standard income level;

(3) The States would have the option of selecting between the state welfare agency or the state employment agency as the administering agency with primary responsibility for certifying eligibility;

(4) There would be a ceiling of $100,000 per firm each year or 20 percent of the firm's employees, whichever is higher;

(5) There would be a requirement that employers sign a statement affirming that no non-subsidized salary employee performing comparable work at a comparable salary was laid off within the previous 60 days in order to hire a tax credit eligible employee (an appropriate penalty should be included); and

(6) Employers would be required to reduce their business expense deductions for wages by the amount of the credit claimed.

## TARIFF TREATMENT OF FILM, STRIPS, SHEETS, AND PLATES OF CERTAIN PLASTICS OR RUBBER—H.R. 5285

AMENDMENT NO. 3586

(Ordered to be printed and to lie on the table.)

Mr. BUMPERS (for himself, Mr. SPARKMAN, Mr. BROOKE, Mr. BENTSEN, Mr. TOWER, Mr. MATHIAS, Mr. STONE, Mr. FORD, Mr. SARBANES, Mr. HODGES, Mrs. ALLEN, Mr. HUDDLESTON, Mr. ANDERSON, Mr. GLENN, Mr. SASSER, Mr. DECONCINI, Mr. RIEGLE, Mr. MCINTYRE, Mr. RANDOLPH, Mr. MAGNUSON, Mr. CHILES, Mr. LUGAR, Mr. CURTIS, and Mr. SCHWEIKER) submitted an amendment intended to be proposed by them, jointly, to H.R. 5285, an act to amend the Tariff Schedules of the United States with respect to the tariff treatment accorded to film, strips, sheets, and plates of certain plastics or rubber.

● Mr. BUMPERS. Mr. President, I am submitting an amendment that will repeal a portion of section 227 of Public Law 92-603, which was passed in 1972 and changed the method of medicare reimbursement for physicians in teaching hospitals from a fee-for-service to a cost basis.

Regulations have been proposed by the Department of Health, Education, and Welfare pursuant to section 227. This section was to have become effective in 1973, but Congress has postponed the effective date several times. Unless Congress takes action, regulations implementing section 227 will be implemented on October 1, 1978.

A further delay in the implementation date does not solve the problem facing teaching hospitals. Therefore, I am proposing to repeal a section of the law which, if implemented, would create a two-class system of care based on the patient's ability to pay.

The amendment that I am introducing to H.R. 5285 does not repeal those sections of section 227 providing that hospitals may elect to be reimbursed on a cost basis. Only 27 teaching hospitals have elected this method of payment, but my amendment will not disturb their election.

If section 227 is implemented, it will have the following effects on teaching hospitals:

First. The change to a cost-based method of reimbursement will result in an inability to retain the services of the teaching physicians who now provide direct and personal patient care, regardless of the patients' ability to pay. In the end the patients would suffer most, since these physicians would be forced to leave the teaching faculty and join a non-teaching hospital in order to remain eligible for reimbursement for medicare patients.

Second. All medical school faculties are supported in some part by professional fee revenues; a reduction in revenues will result in the need to identify replacement revenue, reduce faculty, reduce faculty time in intern-resident supervision, and reduce faculty time in patient care.

Third. Any reductions in the number of house staff positions might fall in the needed primary care specialties because training in ambulatory care is expensive but contributes relatively little to hospital revenues.

Fourth. The effect of the fiscal test restriction will be to force teaching hospitals into one of two categories: To become either a hospital for indigents or a hospital for paving patients. The current highly desirable situation in which both classes of patients are served would be impossible.

Mr. President, since implementation of Section 227 will create these inequities, I propose an amendment, and I ask unanimous consent to have the amendment printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 3586

At the end of the bill insert the following new section:

PAYMENT FOR SERVICES OF PHYSICIANS RENDERED IN A TEACHING HOSPITAL

SEC. 26. (a) Section 1861(b)(7) of the Social Security Act is amended to read as follows:

"(7) a physician where the hospital has a teaching program approved as specified in paragraph (6), if (A) the hospital elects to receive any payment due under this title for reasonable costs of such services, and (B) all physicians in such hospital agree not to bill charges for professional services rendered in such hospital to individuals covered under the insurance program established by this title.".

(b) Section 1832(a)(2)(B)(i)(II) of such Act is amended to read as follows:

"(II) a physician to a patient in a hospital which has a teaching program approved as specified in paragraph (6) of section 1861 (b) (including services in conjunction with the teaching programs of such hospital whether or not such patient is an inpatient of such hospital), where the conditions specified in paragraph (7) of such section are met, and".

(c) Section 1861(v)(1)(C) of such Act is amended by inserting after "services as such hospital," the following: "and where the conditions of subsection (b)(7) have been met,".

(d) The amendments made by this section shall apply with respect to accounting periods beginning on or after October 1, 1978.

On page 3, amend the table of contents by adding at the end thereof the following:

SEC. 36. Payment for services of physicians rendered in a teaching hospital.●

## REVENUE ACT OF 1978—H.R. 13511

AMENDMENT NO. 3587

(Ordered to be printed and referred to the Committee on Finance.)

Mr. BUMPERS submitted an amendment intended to be proposed by him to H.R. 13511, an act to amend the Internal Revenue Code of 1954, to reduce income taxes, and for other purposes.

● Mr. BUMPERS. Mr. President, all of us from time to time receive letters from constituents calling our attention to various inequities and omissions in the Internal Revenue Code—precisely the kind of complaint that led President Carter, during his campaign for election, to refer to the code as "a disgrace to the human race." I can associate myself with this characterization without reservation, and I would like to offer for the edification of my colleagues a particularly glaring example that has been called to my attention by one of my constituents, Mr. Joe Redding of North Little Rock, Ark. There are many ironies in his case, not the least of which is that Mr. Redding, before he was compelled to retire on account of permanent and total disability, served the Internal Revenue Service as an agent for 25 years.

In 1954, when the Internal Revenue Code was enacted, Congress wisely saw fit, in section 105, to recognize the special situation in which ill, injured, or disabled citizens find themselves. Under this provision, which was substantially unchanged for 22 years, an employee could exclude from income up to $100 a week received under wage-continuation plans when he was absent from work on

account of injury, sickness, or disability. Persons in this category obviously have special problems and special demands on their resources. The sick-pay exclusion, as section 105 came to be called, is a recognition of these problems much like the deduction for medical and hospital expenses.

The Congress and President Ford then enacted the so-called Tax Reform Act of 1976. I say "so-called" because the title of this act is a complete misnomer. As a matter of fact, I joined 21 other Senators in voting to strike the word "Reform" from the title of the bill, but unhappily the motion failed. In any case, section 505 of this act, which is now Public Law 94–455. repealed the sick-pay exclusion and provided in its place an exclusion of up to $5,200 a year for retirees under age 65 who are permanently and totally disabled. This exclusion is to be phased out dollar for dollar for adjusted gross income in excess of $15,000, the theory being, I suppose, that people with income in that range do not need the exclusion so much.

In view of the tremendous costs that illness and disability can bring, I question the validity of this premise, but the portion of the act that has attracted my attention is even more unfair. New section 105(d)(4), as added by the 1976 act, requires married taxpayers to file a joint return if they are to get any benefit from the exclusion. The purpose of this requirement is unhappily clear. It is simply to attribute to a taxpayer whatever income his or her spouse may have for purposes of computing the $15,000 phaseout level. A taxpayer will lose the benefit of the exclusion, in other words, just as surely if his spouse has income as if he has income himself. No showing is required that the taxpayer actually benefits from his spouse's income, nor is account taken of the fact that the spouse also may be disabled or ill, with high medical expenses.

Furthermore, Mr. President, the law goes on to say that a married taxpayer can get the benefit of the exclusion, even if he does not file a joint return, if he and his spouse live apart at all times during the taxable year.

I cannot imagine a clearer financial incentive for the separation of families. The provision is especially cruel because the incentive, by definition, applies only to taxpayers who are permanently and totally disabled.

In other words, Mr. President, a permanently and totally disabled citizen can exclude his disability payments from gross income regardless of what his spouse earns if he gets a divorce or separates himself from her completely. But if he continues to live with his family, and if his spouse works and earns a living, he loses the benefit of this important exclusion. No doubt there are many quirks in the Internal Revenue Code and many inequities, but I defy my colleagues to come up with one so striking as this. Those who wrote the 1976 act probably thought that by adding section 105(d)(4) they were protecting the public revenues, and there is no doubt that revenue probably will be increased, to some extent, because this provision is in the statute. I cannot believe, however, that the minuscule increase to the Treasury is worth the hardship and suffering, mental and economic, that this kind of law can provoke. I am therefore, Mr. President, today submitting an amendment for appropriate reference to repeal section 105(d)(4) of the Internal Revenue Code. The general rule that sick-pay exclusion phases out at $15,000 of adjusted gross income will remain untouched. The only effect of my amendment will be to restore to taxpayers their customary election whether to file a joint or separate return, and the amendment will also, of course, remove one of those incentives, with which the Internal Revenue Code is strangely full, for the splitting up of families.

Mr. President, I ask unanimous consent that the text of my amendment be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 3587

At the appropriate place in the bill, add the following new section:

"SEC. . (a) Paragraphs (4) and (6) of subsection (d) of section 105 of the Internal Revenue Code of 1954, as amended by subsection (a) of section 505 of the Tax Reform Act of 1976, Public Law 94–455, approved October 4, 1976, are hereby repealed.

(b) Paragraphs (5) and (7) of subsection (d) of section 105 of the Internal Revenue Code of 1954, as amended by subsection (a) of section 505 of the Tax Reform Act of 1976, Public Law 94–455, approved October 4, 1976, are hereby renumbered (4) and (5).

(c) The amendments made by this section shall be effective as of the effective date of section 505 of the Tax Reform Act of 1976, Public Law 94–455, approved October 4, 1976.●

## NOTICES OF HEARINGS

COMMITTEE ON GOVERNMENTAL AFFAIRS

● Mr. PERCY. Mr. President, I wish to announce that the Committee on Governmental Affairs will hold a hearing on September 15, 1978, concerning the Presidential Records Act of 1978, Senate bill 3494. The hearing will be at 1 p.m. in room 3302, Dirksen Building.●

SUBCOMMITTEE ON CIVIL SERVICE AND GENERAL SERVICES

● Mr. SASSER. Mr. President, I wish to announce that the Subcommittee on Civil Service and General Services will hold a hearing on September 27, 1978 at 9 a.m. in room 3302 of the Dirksen Senate Office Building regarding S. 1390 which would authorize certain national guard employment to be credited for civil service retirement.●

SUBCOMMITTEE ON CIVIL SERVICE AND GENERAL SERVICES

● Mr. SASSER. Mr. President, I wish to announce that the Subcommittee on Civil Service and General Services will hold a hearing on September 27, 1978 at 10 a.m. in room 3302 of the Dirksen Senate Office Building regarding S. 1821 which would provide paid leave for a Federal employee participating in certain athletic activities as an official representative of the United States.●

## AUTHORITY FOR COMMITTEES TO MEET

PERMANENT INVESTIGATIONS SUBCOMMITTEE

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the permanent Investigations Subcommittee of the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Wednesday, September 13, 1978 and Thursday, September 14, 1978 to hold a hearing on arson for profit.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Governmental Affairs Committee be authorized to meet during the session of the Senate on Friday, September 15, to discuss legislation dealing with Presidential papers.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON RULES AND ADMINISTRATION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Committee on Rules and Administration be authorized to meet during the session of the Senate on Thursday, September 14, 1978 to consider Senate Joint Resolution 142, the Franklin Delano Roosevelt project, and other legislative matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ADDITIONAL STATEMENT

## HEALTH CARE

● Mr. BUMPERS. Mr. President, an article that appeared in the September 10 issue of the Washington Post pointed out most dramatically the effect of competition on the health care delivery system. I have supported the initiatives of the administration to encourage the development of health maintenance organizations. However, until we review the experience in Minneapolis-St. Paul, we may not understand the end result of these efforts. The health-care delivery experience in the Twin Cities is one of the most encouraging illustrations of the proper way to reduce health-care costs—through competition.

Mr. President, I ask that the article by John Iglehart be printed in the RECORD.

The article follows:

COMPETITION CUTS MEDICAL COSTS: TRADITIONAL PLANS MEETING CHALLENGE OF HMOs IN MINNESOTA

MINNEAPOLIS-ST. PAUL.—While Government repeatedly has failed to impose cost controls on the burgeoning medical industry, physicians here have clamped mandatory constraints on their own prices without government uttering a word.

The phenomenon does not stem from greater altruism among the 1,700 physicians in the Twin Cities orbit; rather, it is one consequence of a mounting struggle for patients in an area where doctors, hospitals and private purchasers of health care are demonstrating that medicine is susceptible to economic competition.

Consider these developments: seven health maintenance organizations now compete for customers against conventional health

insurance plans on the basis of price, convenience of service and benefit coverage.

These health maintenance organizations, or HMOs, now serve 224,000 people, 11.6 percent of the area's population, and all have experienced substantial growth in the past year as more employers offer their employes a choice between HMOs and traditional insurance coverage.

HMOs have stimulated competitive responses from Blue Cross and Blue Shield of Minnesota and the Hennepin County Medical Society, the local affiliate of the American Medical Association. The Blues and the medical society formed their own HMOs to counter the loss of patients.

With their emphasis on keeping the rate at which they hospitalize patients to an absolute minimum, the Twin Cities' HMOs are adding to an already serious community problem, a surplus of hospital beds.

Doctors who plunged into the rivalry for patients against HMOs never dreamed that the initial result would be fiscal chaos and, ultimately, the imposition of strict cost controls to save their own HMO, Physicians Health Plan, from bankruptcy. But that is what happened when physicians created their plan and thought they could compete effectively without changing their traditional practices. "We kept telling doctors they could practice medicine as they always had," said Dr. Richard Simmons, chairman of the Physicians Health Plan, "but we found out we were wrong."

Health maintenance organization was the label former President Nixon attached to his administration's effort to inject marketplace economics into health care. Unlike in most economic markets, consumer choice plays only a limited role in medicine, and price competition is not very important because insurance makes the buyer less conscious of its cost.

In traditional medicine, the consumer pays for care on a piecemeal basis, depending on the number of times he or she visits the doctor. There is no limit on how much a consumer can pay. HMOs, on the other hand, provide services for a fixed monthly fee.

This prepaid feature, as Nixon noted when he first promoted HMOs in 1971 as an answer to soaring medical costs, reverses the "illogical incentive" of traditional medicine, in which "the more illnesses [doctors] treat and the more services they render, the more their income rises."

HEW Secretary Elliot L. Richardson testified in 1971 that, by 1976, the department expected 1,700 HMOs to be in operation, serving some 40 million members. But today, owing to HEW's mismanagement of the program over its seven-year history and a reticence on the part of medicine and the public to chance the cottage industry approach to medical care, there are only 175 HMOs serving 6.5 million members.

When President Carter assumed office in January 1977, his administration strongly embraced the HMO concept. HEW Secretary Joseph A. Califano Jr., has sought to develop more HMOs by upgrading the program from a tiny bureaucratic outpost to a more central position in the department.

REMARKABLE GROWTH

Ironically, the federal government has had little to do with HMO growth in Minnesota, but HEW officials point to the Twin Cities as one of the few areas in the country where the kind of HMO incentives the administration advocates actually are being demonstrated in the medical marketplace.

HEW Secretary Hale Champion, addressing the 20th annual meeting of the oldest and largest (114,156 members) HMO in the area, Group Health Plan Inc., noted the "remarkable [enrollment] growth in the Twin Cities—from 2 to 11.6 percent of the population—in just seven years. . . HMO competition inspires healthy change leading to the formation of more HMOs. This area now has seven. And third-party insurers, Blue Cross particularly, are instituting cost controls and offering fuller benefit packages. Also, physicians are changing their behavior—in some cases moving voluntarily to mandatory cost controls such as preadmission certification, length-of-stay reviews and limitations on fees and charges per visit."

Dr. Paul M. Ellwood Jr., the physician who sold the HMO concept to the Nixon administration and continues to work with HEW to nurture it, also underscored the significance of the Twin Cities' experience. "The idea of a competitive medical care environment where consumers have a real choice and where most providers are competing with each other on price and other considerations has until now been an attractive but largely theoretical goal. But the Twin Cities appears to be the first large-scale health-care market in which one could say there is active price competition involving a majority of the area's 20 hospitals and approximately 1,700 doctors. If this community is a fair test, then the competitive market strategy appears to work."

The progressive environment of Minneapolis-St. Paul has been an important ingredient in fostering HMO development. Paul L. Parker, executive vice president of General Mills Inc., which is based in Minneapolis, said: "Corporate leaders are reasonably liberal on social issues here. They don't raise the specter of communists around every corner."

In fact, 57 local employers now offer their workers a choice between HMOs and conventional insurance plans, and most health care providers are vying for this business.

Among major employers offering a choice are Cargill Inc., Control Data Corp., Dayton Hudson Corp., General Mills, Honeywell Inc., International Multifoods Corp., Minnesota Mining and Manufacturing Co., Pillsbury Co. and the Prudential Insurance Co. Significantly, more than half of the employes here of Prudential, a major indemnity insuror, have opted for HMO coverage because of its broader benefits and lower cost.

The first step in the competitive struggle for HMOs is to convince employers to offer their workers this choice. "HMO administrators and marketing agents identify the enthusiasm of the employer as a primary factor determining the ability of HMOs to enroll employes," said Jon B. Christianson, an economist at InterStudy, a private health policy research organization based here and headed by Ellwood. "They believe that when employers allow HMOs to market directly to employe groups, the HMO enrollment share is substantially increased for initial enrollments," Christianson wrote in a study last April.

General Mills provides the clearest example of what can happen when corporate leadership pushes the HMO idea. Sixty per cent of the company's employes here, 1,600 salaried, nonunion workers, have opted for HMO coverage. General Mills provides company time for HMOs to explain their plans.

In other General Mills plants, such as those in Chicago and northern California, HMO penetration has been much lower, around 5 percent. Employes there who are unionized have less rapport with management, and it is more difficult to provide company time in a production plant for HMO education sessions, Parker said. "One sticking point is moving into an area where it might look like management is trying to play Big Brother," he added.

COMPARATIVE COSTS

Because HMO benefit packages are more extensive than those generally offered by traditional insurers, the monthly premium is sometimes, but not always, higher. The major items covered by HMOs, but not by indemnity plans are routine visits to a physician's office, physical examinations, immunization and other preventive services.

In 1977, for example, Minnesota state employes were given a choice between the Blue Cross-Blue Shield high option plan for $94.78 a month, the Nicollet-Ethel HMO for $92.24 and Group Health Plan for $87.26.

In selected instances, HMOs that once were more expensive are now less so, because rising costs have impacted more severely on indemnity coverage.

At General Mills, for example, the corporation first offered its employees an HMO option in March 1973. Family HMO coverage cost the worker $9 a month, while the regular insurance plan required no employee contribution.

Today, however, General Mills foots the entire bill for both forms of coverage, $103 per family per month for indemnity coverage and $93 for HMO membership. But eventually, Parker said, the company will have to decide whether it should permanently subsidize the employe who selects the more expensive health insurance coverage or require the worker to pay the extra cost.

In calculating their rates, HMOs are no more altruistic than the private insurance business. They are able to offer members more health care per dollar because they aggressively control the rate at which they hospitalize their members, a lesson that Physicians Health Plan learned only after flirting with bankruptcy.

HMOs in the Twin Cities have hospital utilization rates ranging from 375 to 650 days per 1,000 members a year. The annual hospital bed rate for the metropolitan population is 1,350 days per 1,000 individuals.

Thomas Hoban, executive director of the Hennepin County Medical Society, said: "Without the competition, we could not have imposed those controls. The doctors would not have tolerated those controls, but they're willing to go along with the system because they feel it is important to have a stake in the HMO market. Nearly every major industry in town has made a commitment to offer the HMO option."

The HMO movement has by no means transformed the Twin Cities into a marketplace mecca, where supply matches demand for medical services with any precision. Indeed, the area has an acknowledged surplus of hospital beds, more doctors than the medical society says are needed, and a prestigious health complex at the University of Minnesota that has all but ignored the competitive struggle.

Major parties with a stake in the economics of health care, including government and organized labor, have not been heard from or, at best, have played only limited roles in the struggle for the private health dollar here.

Federal and state laws helped shape the competitive environment by requiring employers of 25 or more to offer their employes, on request, a choice between HMO and indemnity insurance coverage. But neither level of government has nurtured the HMO concept by purchasing services directly from these facilities, a shortcoming that afflicts HMOs throughout the country.

HMOs here have virtually no members who receive care under Medicare or Medicaid, which finance the medical care of some 50 million elderly and poor individuals. Medicare reimburses HMOs for medical care rendered on a basis that provides such facilities little financial incentive to enroll elderly patients, who generally need health care about twice as often as younger individuals.

The state of Minnesota has not aggressively pressed HMOs to enroll beneficiaries of Medicaid, a federal-state program that underwrites the health care of poor families. Without the enrollment of a segment of society's most vulnerable citizens, HMOs can hardly lay claim to being the answer to the health cost problem.

Howard Veit, director of the federal HMO program, said several weeks after he visited here to discuss developments with area HMO directors, "Our basic view of the Twin Cities is that it represents in many ways the prototypical community for the future development of HMOs."

The HMO saga here remains only partially written. Thus far, Blue Cross-Blue Shield and the commercial insurors like Prudential have suffered the most in lost business. The first time Honeywell offered its Twin Cities employes an option in 1977, one-third of its workers, about 4,000 people, dropped the conventional Blue Cross coverage and chose an HMO plan. "The growth of our traditional insurance program would have been a lot higher without the HMOs here, there's no doubt about that," said George Halvorsen, director of affiliated services for Blue Cross and Blue Shield of Minnesota.●

## PUERTO RICO

● Mr. SASSER. Mr. President, on August 28, the Governor of Puerto Rico testified before the Committee on Decolonization of the United Nations. His statement is an eloquent affirmation of the freedom that American citizens, including Puerto Ricans, cherish.

Without taking a position on the question of Puerto Rico's statehood, I would like to join with my colleague, Senator DOLE in commending the statement of Gov. Carlos Romero-Barceló to my colleagues. I ask that the testimony be printed in the RECORD.

The testimony follows:

TESTIMONY BY THE HONORABLE CARLOS ROMERO-BARCELÓ, GOVERNOR OF PUERTO RICO

Mr. Chairman, members of the Committee: My name is Carlos Romero-Barceló. I am the Governor of Puerto Rico, elected to a four-year term by the people of Puerto Rico on November 2, 1976.

In 1946, during the United Nations' first full year in existence, the United States of America offered voluntarily to submit annual reports on the status of its non-self-governing territories, in keeping with the spirit of Article 73 of the United Nations Charter. Those territories then included Alaska, Guam, Hawaii, Puerto Rico, American Samoa, and the United States Virgin Islands. Annual reports on Alaska and Hawaii were discontinued upon their admission in 1959 as the forty-ninth and fiftieth of the United States of America.

A quarter of a century ago, the United Nations Committee on Information from Non-Self-Governing Territories—also known as the Fourth Committee—determined that the people of Puerto Rico enjoyed a full measure of self-government. In response to that determination, the United Nations General Assembly, at its Eighth Session, adopted on November 27, 1953 its Resolution 748, wherein it relieved the United States of America from any responsibility for filing annual reports concerning Puerto Rico's political status, and wherein the General Assembly declared that, and I quote, "in the framework of their Constitution and of the compact agreed upon with the United States of America, the people of the Commonwealth of Puerto Rico have been invested with attributes of political sovereignty which clearly identify the status of self-government attained by the Puerto Rican people as that of an autonomous political entity." End of quote.

That was twenty-five years ago.

Since then, the people of Puerto Rico have elected a total of five different men from among two different political parties to lead them as Governor. During that interval, the people of Puerto Rico have also held a plebiscite on their political status.

During that period of time, not one of the island's five governors has come before any instrumentality of the United Nations to register a complaint against the United States, nor to request any review or reconsideration of Resolution 748 of the Eighth General Assembly Session. Indeed, until today, no Governor of Puerto Rico had ever formally approached the United Nations on any matter related to our island's relationship with the United States.

Nevertheless, despite the absence of any initiative on the part of any duly elected Government of Puerto Rico, your Committee has since 1972 been discussing "the Puerto Rico question" on a regular basis.

These discussions have been held at the behest of an adversary of the United States, in support of a political faction in Puerto Rico whose electoral strength has remained at less than seven percent of the voting public for two decades.

During our twenty-five years as a community enjoying "a full measure of self-government," Puerto Rico's democratic institutions have received the enthusiastic support of the island's inhabitants. From three to six political parties have appeared on the ballot in each general election. An average of four-fifths of Puerto Rico's eligible voters have participated in each election. Both men and women possess the right to vote, and in 1970 the minimum voting age was lowered from twenty-one to eighteen years.

But perhaps the most eloquent demonstration of the strength and integrity of Puerto Rico's democratic system of government has been the fate of incumbent Administrations: in each of the last three quadrennial elections held in Puerto Rico, the political party in power has gone down to defeat; moreover, the last five elections in Puerto Rico have elevated no less than five different men to the governorship, even though the Puerto Rican Constitution permits an incumbent Governor to seek re-election to an indefinite number of terms. And I might add that each change of Administration was effected lawfully and peacefully.

As we survey the Puerto Rican people's aggressive and responsible exericse of their electoral prerogative over the past quarter-century, one highly significant fact stands out clearly: each and every time the Puerto Rican people have removed from office an incumbent Governor and/or political party, they have chosen a new Governor and/or political party which, like their predecessors, firmly espoused the principle of permanent union between Puerto Rico and the United States of America.

In each of these elections, candidates advocating Puerto Rico's independence participated freely, energetically, and without constraint. And in each election they were resoundingly defeated. In 1976, even the local Communist faction took its case to the electorate. Calling itself the Puerto Rico Socialist Party, it campaigned throughout the island, yet won only seven-tenths of one perecnt of the total vote, and elected no candidates. The non-Communist Puerto Rico Independence Party elected two Representatives and one Senator in 1972, but lost all three seats in 1976.

Just as is the case in Puerto Rico, I am confident that virtually all of the twenty-four nations here represented contain within their borders political factions which are firmly opposed to the policies of the government in power. As is not the case in Puerto Rico, however, opposition political factions in some of these twenty-four nations are severely inhibited—and in some instances officially prohibited—from working openly and freely to enlist broad public support for their causes, and from seeking peacefully to have the ruling party removed from power.

Should an opposition faction within any of the twenty-four nations here represented solicit the assistance of a foreign power in bringing its case before the United Nations, I strongly suspect that the government of the nation in question—regardless of its political system, regardless of its economic system, regardless of its alignment or nonalignment vis-a-vis the major world powers—would firmly oppose United Nations involvement, on the grounds that the matter at issue constituted a strictly internal affair, over which no international body whatsoever had any claim to jurisdiction.

Nevertheless, this Committee has repeatedly agreed to entertain discussion of the political status of Puerto Rico under precisely the above circumstances: the separatist political faction in Puerto Rico has solicited the assistance of a foreign power—in this case Cuba—to urge United Nations intervention in the internal affairs of the people of Puerto Rico.

All five elected Governors of Puerto Rico have until now abstained from involvement in these discussions. We have done so because we too recognize the issue to be strictly an internal matter, to be debated and resolved within Puerto Rico itself, in consultation with the Government of the United States, the nation of which we are all citizens.

Among the five elected Governors of Puerto Rico, there is no unanimity of opinion as to what our island's ultimate political destiny should be; we differ considerably among ourselves on both large and small aspects of the question. We are, however, fully in agreement regarding the capacity of the Puerto Rican people to reach a final decision independently. Moreover, we recognize that a decision of such magnitude not only can be reached independently, but must be reached in such a manner, if it is to be valid and permanently binding upon the people of our island

If, as is true, we have not yet reached a final decision, then the responsibility for our inaction lies with us and with us alone. We have the means to change our political status. Whether and how we shall use those means is for us and us alone to decide. All three political status alternatives—statehood, independence, and commonwealth—appeared on the ballot in our 1967 plebiscite, and Puerto Rico's voters elected to retain commonwealth status. I have publicly stated on numerous occasions that I believe a new plebiscite should be held after the 1980 general election, to allow our people to express themselves once again. And if I am re-elected to the governorship, the holding of such a plebiscite will be a firm commitment of my Administration's second term.

So long as we continue to possess the means to determine our own destiny, however, we shall neither welcome nor tolerate outside interference in this ongoing process.

So it is that I come before you today not to request that you intervene, but rather to explain why I believe you should not even consider attempting to intervene.

I come before you in the knowledge that most of you are devoting your time and energy to the Puerto Rico question with the best of good intentions. I am sure you are all aware of the ulterior motives that have prompted one member of your Committee to bring this issue before you. Nevertheless, I have no doubt that most of you are acting in the best of faith in giving it your consideration. I thank you for that, despite my firm conviction that intervention by this Committee is neither necessary nor appropriate, and is totally unacceptable to the people of Puerto Rico.

In the past, this Committee has reaffirmed Puerto Rico's right to self-determination. No one in Puerto Rico—myself included—disputes that principle, so long as it is clearly understood that the concept of self-determi-

nation includes the right to move from commonwealth to statehood as well as the right to move from commonwealth to independence.

Were I to conclude that Puerto Rico were in any way being impeded from exercising its right to self-determination, then I would not hesitate for a moment to seek the support of this Committee, or any other responsible international institution, in helping our people to re-establish beyond doubt our right to self-determination.

I have the highest admiration for the United Nations. It is a pioneer confronting enormous obstacles in a slow and painful quest toward a goal upon which hinges the survival of our species: peaceful cooperation and coexistence among the enormously diverse peoples and philosophies which exist in even-increasing interdependence upon this planet. As must be expected in a pioneering venture, tangible progress has been achieved neither easily nor quickly. In its finest hours, the universal human emotions which fuel this noble institution are hope, purposefulness, and good will. All three are indispensable if it is to succeed in its mission. Both now and in the future, I shall always be available to contribute whatever I can to further the goals so eloquently set forth in the United Nations Charter.

Indeed, it is in part for that very reason that I appear before you now: in the hope that I may perhaps be of assistance to you in your important work.

Setting aside for a moment the hemispheric rivalries and/or international ideological struggles which, in reality, we all know are responsible for the presence of the Puerto Rico issue on the agenda of this Committee, allow me to examine with you now the seemingly legitimate concerns that might prompt those who are truly impartial members of this Committee to regard the Puerto Rico question as a matter worthy of study on its own merits.

Basically, I submit that these concerns are three.

Foremost among them, without doubt, must be the undeniably ambiguous nature of the island's present political status. Neither a sovereign nation nor a fully integrated unit of the United States of America, Puerto Rico occupies an ill-defined middle ground; which might understandably arouse the curiosity—if not the suspicion—of an impartial international observer.

Coupled with this is the apparent imbalance in political leverage between a medium-sized Caribbean island and a continental super-power. Here again, the disinterested outsider might understandably have occasion to wonder whether the smaller partner in this relationship could truly be at liberty to chart its own course toward a final political destiny.

And finally, there are obvious cultural and linguistic disparities, which might prompt the observer to wonder whether there can really be an authentic social, psychological, or spiritual basis for the existence of a harmonious political union between Puerto Rico and the fifty existing United States.

To the above points I should add a fourth consideration: that there is evident dissatisfaction with the status quo among the people of Puerto Rico themselves. At these hearings will appear Puerto Ricans of widely differing viewpoints; yet most, if not all, of them will agree that Puerto Rico's current political status does not in its present form adequately fulfill the legitimate aspirations of the Puerto Rican people.

Given the above facts, I can readily appreciate that a fair-mined member of this Committee could reasonably conclude that the case of Puerto Rico might well merit investigation.

Indeed, I myself am on record to the effect that Puerto Rico's relationship with the United States retains vestiges of colonialism.

Yet I do not come before you to solicit your intervention.

Why?

Because I believe such intervention can never be either appropriate, relevant, or in the least degree effective until and unless it can be demonstrated that Puerto Rico lacks the wherewithal to freely determine its own destiny.

For most of this decade, this Committee has annually given consideration to the political status of Puerto Rico. Yet at no time has this Committee undertaken to investigate firsthand the extent to which the Puerto Rican people have the capacity to exercise for themselves their inalienable right to self-determination.

I cordially invite this Committee to conduct just such an investigation. I cordially invite the delegates of each nation here represented to visit Puerto Rico. Come whenever you wish; stay as long as you like; talk to whomever you please; study our institutions for yourselves.

The Government of Puerto Rico does not fear the consequences of such an inspection. On the contrary, we would welcome it.

If you come, you will hear a variety of opinion, just as you will hear a variety of opinion during these hearings. That is because Puerto Rico is an open society, in which every citizen is entitled to express himself, and in which any citizen or group of citizens is entitled to work peacefully to effect change.

We have no illusions, however. We are all aware that Puerto Rico is an imperfect society, as is every society of human beings in every community on earth. Nevertheless, we are a people who take great pride in the progress we have made—economically, politically, and socially—during the twentieth century.

It is no accident that Puerto Rico's per capita income and standard of living are markedly higher than those to be found anywhere else in the Caribbean, or in Central or South America. Despite our island's very high population density of more than nine hundred persons per square mile, despite our severe shortage of mineral resources, and despite the massive poverty which existed in Puerto Rico only a few decades ago, we have in recent years emerged as a people blessed not only with free institutions of government, but also with the extraordinary increase in prosperity that only hard work and a private enterprise economy can make possible.

Today, each child born in Puerto Rico has a statistical life expectancy that actually exceeds that of the average American citizen born elsewhere in the Nation. Moreover, the per capita enrollment of our young people in colleges and universities exceeds the United States national average.

Puerto Rico's spectacular advances in health care, education, in economic opportunity, and in democratic self-government have been accomplished by the Puerto Rican people themselves, through our determination to leave to our children and grand children a better way of life than we ourselves knew as children and young adults.

Because of Puerto Rico's small size, dense population, and limited resources, much of our recent progress would have been extremely difficult, if not impossible, to achieve without the friendship and cooperation of fellow American citizens from other parts of the Nation, and without the comprehension and financial support of the United States Government.

The Puerto Rico of today is still not especially wealth; we are not mighty; our people do not live in total internal harmony. Nevertheless, ladies and gentlemen, we do enjoy, individually and collectively, the basic human rights which define a free society. And believe me, the people of Puerto Rico appreciate with every fiber of their being how rare and how precious a blessing freedom is.

Moreover, we know why we are free.

We know that we are free precisely because we are natural-born citizens of the freest and most open and most culturally diverse nation in the history of mankind: the United States of America.

We are free, if we so desire, to continue enduring the vestiges of colonialism that characterize our so-called commonwealth relationship with the United States. We are free to declare ourselves an independent nation, and to have that decision respected by the United States. And we are free to incorporate our island fully into the Republic as the fifty-first of those United States.

Should the day come when the people of some future date choose to do so, I recognize that it has the military might to act illegally and immorally to abrogate those freedoms. We have no illusions in that regard, either. Although the overwhelming majority of our people have demonstrated at every opportunity that we treasure our United States citizenship and our permanent political union with the United States, we all recognize that, like our own and like every other community on earth, the United States too is an imperfect society.

Should the day come when the people of Puerto Rico were to find themselves oppressed by the United States, it would not be necessary for a totalitarian adversary of the United States to bring the matter to the attention of this Committee: I can assure you that the freedom-loving people of Puerto Rico would virtually lay siege to this building in their clamor for redress of grievances. And I should emphatically add that I myself would not hesitate to stand at the forefront of such a movement.

Yet I remain fully confident that no such action will ever be necessary. Because, for all its occasional faults, the Government of the United States has by and large conducted itself with grace and with fairness in its relationship with the American citizens of Puerto Rico. And I have every reason to believe that it will continue to do so.

Individuals and groups of individuals within every state of the United States have, at one time or another, expressed indignation at, and intense opposition to, actions or inactions for which they perceived the Federal Government to be responsible. In nearly every instance, these conflicts have gradually been resolved through compromise and consensus, and a resumption of cordial relations between the parties involved has followed. And thus it has been also with Puerto Rico.

Although the people of Puerto Rico cherish our identity as a unique community within the American nation, we likewise cherish our right to participate in the process by which our nation as a whole arrives at decisions in the common interests of all.

It is no accident that I address you today in the Spanish language. For more than four centuries Spanish has been the first language of the people of Puerto Rico. It will continue to be our first language, regardless of the changes we may make in our political status. Our cultural heritage as a people has not been, and shall not be, an obstacle to the exercise of our rights as United States citizens. So long as we remain true to the principles of governance that bind our Nation together, we shall always remain free to exercise our inalienable human right to life, liberty, and the pursuit of happiness in accordance with the specific personal traits which define us as Puerto Ricans.

On December 31, 1976, when President Gerald Ford announced his support for the admission of Puerto Rico to the Union of States, he did not attach any cultural or linguistic provisos. His call was uncondi-

tional. He was prepared to accept us as Puerto Ricans.

On July 25, 1978, President Jimmy Carter issued a proclamation in observance of the 26th anniversary of the adoption of Puerto Rico's local Constitution. In that proclamation he said to the Puerto Rican people, and I quote, "Since 1898, and as American citizens since 1917, you have made a rich contribution to the life of the United States, while preserving your own unique culture and traditions within the broader community . . . My administration will respect the wishes of the people of Puerto Rico and your right to self-determination. Whatever decision the people of Puerto Rico may wish to take—statehood, independence, commonwealth status or mutually-agreed modifications in that status—it will be yours, reached in accordance with your own traditions, democratically and peacefully . . . The people of the United States are proud of our cultural and political associations with Puerto Rico over the last eighty years. We know that we can best honor our friendship, and our own democratic principles, by respecting your free choice about your own future." End of quote.

Not only did President Carter not attach cultural conditions, he underscored clearly the United States Government's acceptance of and commitment to the defense of the inherent right of the Puerto Rican people to retain and enhance our individual qualities as a people.

How can this be possible?

Simply because that is the tradition of the American nation. Tolerance of individual differences is a cornerstone of American freedom. Instances of individual intolerance exist everywhere on earth. So do instances of institutional intolerance—even in the United States.

But the overwhelming majority of all United States citizens understand fully that the acceptance of diversity—racial, cultural, religious, regional, ethnic, linguistic—is fundamental to the existence of liberty in a nation whose population is the product of immigration from every corner of the globe.

And because the people of Puerto Rico have the self-confidence and the determination to demand that our rights as United States citizens be recognized and respected, we look to the future with optimism, certain of our ability to resolve our political destiny in an environment characterized by civil debate, unconditional self-determination, and respect for the rights of the individual.

Before I continue, I should like to invite your attention to one especially blatant example of the hypocrisy of the separatists' position.

In regard to the question of language and culture, they firmly oppose the teaching of English in Puerto Rico. They oppose having our people become fully bilingual. They say it would undermine our identity as a people.

What is ironic, however, is that these same separatists are without exception bilingual themselves. They know English, and yet their sense of identity as Puerto Ricans seems not to have been impaired in the slightest. Indeed, they regard themselves as the purest of Puerto Rican patriots. Can it be, therefore, that their true motivation is not the preservation of our identity as a people, but rather the preservation of their own elite status as self-appointed bilingual spokesmen for our people? Why else would they propose to deny to the rest of the Puerto Rican people an advantage they themselves enjoy? It is something to think about.

It is these individuals—the separatist elements within Puerto Rican society—who year after year have sought United Nations intervention in our internal affairs. This too reflects their hypocrisy.

Let me explain.

We must keep in mind not only that, within Puerto Rico itself, the separatist forces have been massively and repeatedly repudiated at the polls, but that these same elements have never at any time seriously challenged our elections as fraudulent. They know they have been defeated fair and square.

That they have responded to their internal rejection by seeking support for their cause outside of Puerto Rico demonstrates eloquently their own cynical disregard for the principle of self-determination for our people.

Instead of respecting the clearly and repeatedly expressed will and wisdom of the Puerto Rican electorate, they resort to maneuvers in the international arena, hoping to have their political status preference imposed upon Puerto Rico from outside. Why? Obviously it is because they realize that within Puerto Rico itself they have been making no headway whatsoever.

In 1952, the year our commonwealth constitution took effect, political parties favoring independence for Puerto Rico polled a total of 19 percent of the vote in the island-wide general election. Political parties favoring statehood polled only 12.9 percent of the vote that year.

In our most recent election—in November 1976—independence parties polled only 6.4 percent of the vote—just one-third of their electoral strength twenty-four years earlier. In dramatic contrast, the pro-statehood political party which I lead won that 1976 election with 48.3 percent of the vote, nearly four times the pro-statehood total of 1952.

It has been this indisputable trend within the Puerto Rican electorate which has prompted the pro-independence forces to seek refuge in international forums, and to mount a calculated betrayal of the principle of self-determination by turning their backs on their own people as the sole legitimate judges of the course Puerto Rico should set for itself.

Where are Puerto Rico's political exiles? There are none.

Separatist Puerto Ricans operate openly from within Puerto Rico itself. They travel the world preaching their gospel, carrying United States passports. They run for elective office in Puerto Rico, and their political parties—despite their lack of significant voter support—receive regular allotments of public funds, equal in amount to those received by non-separatist political parties. Separatists speak out virtually every day on television and radio news and panel discussion programs, and their pronouncements are given ample coverage in every daily newspaper. In addition, some of them publish their own newspapers.

Separatist Puerto Ricans take full advantage of Federal law, federally-funded programs, and the protection of the Federal courts. Like many other American citizens in other parts of the Nation, Puerto Rican separatists have invoked the recently-enacted Federal Freedom of Information Law to search for evidence of abuses they allege have been perpetrated against them in the past by the Federal Bureau of Investigation.

Wherever they may have occurred, within Puerto Rico or elsewhere in the United States, such abuses are contemptible and I repudiate them unequivocally. But it must never be overlooked that the same government which may have been guilty of abuses also provides the mechanisms for bringing them to light, and for correcting them. And of course it is precisely this extraordinary capacity for self-criticism and self-improvement which makes the United States of America a source of wonder and inspiration for the many peoples residing in nations which are less free and less blessed with effective democratic institutions of government.

During four centuries of Spanish rule, dissident Puerto Ricans were often summarily jailed or exiled. Indeed, my own great-grandfather was jailed and exiled by Spain for advocating the abolition of slavery. The American citizens of Puerto Rico are not ignorant of the liberating changes that have occurred on our island during the eight decades since the United States flag was first raised over Puerto Rico's shores.

Where are Puerto Rico's political prisoners? There are none. Those Puerto Ricans dubbed political prisoners by our separatist elements are individuals tried and convicted in open court for the commission of such violent crimes as murder, attempted murder, kidnapping, arson, or assault. No Puerto Rican has ever been defined as a "prisoner of conscience" by the Nobel Prize-winning human rights organization Amnesty International.

Ladies and gentlemen, not only do Puerto Ricans not flee the island because of alleged political persecution, but, on the contrary, the exact opposite occurs: tens of thousands of persons from foreign countries—including over thirty thousand from Cuba alone—have in recent years fled to Puerto Rico precisely to escape political persecution in their homelands.

This then is a small part of the panorama that is Puerto Rico's contemporary political reality. As I mentioned earlier, you are cordially invited to examine it for yourselves. Not on a carefully sanitized government tour, but as individual men and women, free to go where you wish and to talk to whomever you please: not just to politicians and ideologues, but to housewives, students, laborers, shopkeepers and farmers.

In the meantime, we the people of Puerto Rico shall continue to advance toward a final decision on our political destiny, free of outside pressure and secure in the knowledge that our decision will be respected by the Executive, Legislative, and Judicial branches of the Federal Government, as well as by our fellow American citizens in the fifty existing United States of America.

Thank you.●

## CRIME VICTIM COMPENSATION

● Mr. BIDEN. Mr. President, yesterday the Senate passed S. 551, as amended. The amendment offered by Senator KENNEDY to S. 551 yesterday was the result of several weeks of negotiations between the staff of the Subcommittee on Criminal Laws which I chair and the staffs of members who had concerns about this bill, including Senators HUMPHREY, MATSUNAGA, WALLOP, and MCCLURE.

The result in an excellent compromise between those who feel that the States should have the prerogative to design their own programs and those who are concerned that certain uniform standards should apply to these programs as a precondition to Federal financing. At the heart of the compromise is a provision that gives any State which has a crime victims compensation program until the end of the next State legislative session to seek any necessary conforming amendments.

Another important feature of the amendment offered today is an effort to take into account the unique problems faced by elderly victims of crime. S. 551 was processed by the Criminal Laws Subcommittee before I was named its chairman and once the bill was reported to the floor it was brought to my attention that at least in one respect the bill

might be strengthened as it relates to elderly victims.

We worked with the National Council of Senior Citizens and other senior citizen groups to improve the bill through the amendment offered by Senator KENNEDY today. The most important feature of the amendment as it relates to senior citizens is the provision that relaxes the minimum claim requirement of $100 for older Americans .

Over 40 percent of senior citizens are at or below the poverty level. As a recent report of the House Select Committee on Aging pointed out, the loss of $20 can represent a much greater relative loss to a senior citizen whose only source of income is his or her social security check. A $20 loss can deprive the elderly person of food, essential drugs or cause a utility bill to go unpaid.

In conclusion I might point out that the concept of a crime victimization program was first experimented in the States not the Federal Government. Indeed Delaware was one of the first States to develop such a program and this legislation is modeled in large part after the Deleware program. Furthermore, Delaware is one State which has a program which is entirely consistent with the proposed Federal statute and if it is enacted Delaware will be immediately eligible for Federal assistance.●

## INTERNATIONAL AIRCRAFT SALES

● Mr. STEVENSON. Mr. President, the Department of the Treasury has responded to two letters from Senators PROXMIRE, BROOKE, HEINZ and myself, concerning excessive and unfair foreign government intervention in international aircraft sales. In several recent cases foreign governments have taken, or are alleged to have taken, actions which violate the letter or spirit of international understandings limiting government measures to secure export sales. Such actions harm U.S. producers and exporters, and can provoke further wasteful competition in government subsidization of export sales.

The Treasury Department has told the foreign governments involved that the United States will insist upon fair trade practices with respect to export sales. The OECD "Standstill" agreement on aircraft sales and the International Arrangement on Export Credits must be strengthened and negotiations to that end are underway. The United States will be prepared to take effective countermeasures if unfair official export credit competition is not curbed.

The International Finance Subcommittee of the Senate Banking Committee, which I chair, has held extensive hearings on export competition and the need for a comprehensive U.S. export policy to meet foreign government-supported export competition. S. 3077, the legislation to extend and enlarge the Export-Import Bank, will strengthen the U.S. negotiating position by providing sufficient authority to meet foreign official credit competition when necessary. I expect the bill to be called up for floor consideration soon and hope the Senate will act promptly in a manner that leaves no doubt abroad that this country will not tolerate foreign volations of international understandings limiting official export credits and other export subsidies.

Mr. President, I ask that the correspondence to which I referred be printed in the RECORD.

The correspondence follows:

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS,
*Washington, D.C., June 7, 1978.*

Hon. W. MICHAEL BLUMENTHAL,
*Secretary of the Treasury*
*Washington, D.C.*

DEAR MR. SECRETARY: We urge you to exercise your authority under section 303 of the Tariff Act of 1930, as amended by section 331 of the Trade Act of 1974, to initiate a formal investigation of two recent cases in which foreign governments appear to have subsidized, directly or indirectly, the sale of aircraft and aircraft engines to U.S. airlines. The two cases to which we refer are the purchase by Eastern Airlines of 23 A-300-B4 aircraft from Airbus Industrie and the purchase by Pan American World Airways of 12 Lockheed L-1011-500 aircraft.

According to information obtained by the International Finance Subcommittee, Eastern Airlines purchase was arranged by means of a 15-year lease offered by Airbus Industrie in addition to an initial "free trial" period of six months for four of the aircraft. The leasing arrangements and other financing provided by Airbus Industrie would not have been possible without extensive financial underwriting of Airbus Industrie by European governments.

In the case of the Pan American purchase of the Lockheed aircraft, the Subcommittee has been informed that the British Government furnished guarantees of 15-year debt for the full purchase price of the aircraft although the Rolls Royce engines are the only British components of the aircraft. The British Government appears to have violated the terms of the OECD standstill agreement of 1975 with respect to aircraft.

The subsidies provided by foreign governments in both cases may constitute a bounty or grant within the meaning of the statutes which provide for the imposition of countervailing duties upon imports fostered by such bounties or grants. If your investigation reveals that domestic industries have in fact been subjected to unfair competition, we trust you will act promptly to remedy that situation.

The U. S. companies involved, as you know, are reluctant to initiate action in these cases because they fear that foreign governments will find ways to retaliate against the companies' operations abroad. U. S.-headquartered multinational corporations cannot be relied upon to protect our national interests when their international offices and sales are the implicit hostages of foreign governments bent upon capturing U. S. markets at any cost. The responsibility for ensuring that fair trading practices are observed by our foreign competitors rests with public officials.

We hope that you will give prompt attention to this matter. Rumors abound that U. S. aircraft and engine manufacturers are giving fresh consideration to shifting major portions of their production abroad in order to enjoy the benefits of foreign subsidies of international aircraft sales.

With best wishes,
Sincerely,

H. JOHN HEINZ, III,
*Ranking Minority Member.*

---

THE SECRETARY OF THE TREASURY,
*Washington, D.C., August 28, 1978.*

DEAR MR. CHAIRMAN: In the Secretary's absence I want to assure you that he and I are in complete sympathy with your letter of June 7, 1978 concerning what we believe to be the danger of excessive government intervention in international trade. The two cases you cited—the sale of Airbus Industrie of A-300's to Eastern Airlines and the sale of Rolls Royce engines to Pan American World Airways for installation on Lockheed L-1011 aircraft—have caused us great concern and are matters which emphasize the need for a broadened and strengthened International Arrangement on Export Credits. Moreover, as you know, we continue to hope for, and work diligently to achieve, international agreement on the use of production and export subsidies affecting trade in the context of the MTN. These cases well illustrate the need for the code we are negotiating.

Whatever terms may have been offered by private industry competitors to Rolls Royce, we do not believe those terms provide a basis for the action taken by the British Government. As you know, the U.K. export credit agency provided a 15-year loan guarantee (which we understand may be reduced to 10 years) for 100 percent of the value of the Rolls Royce engines and a financial guarantee for 100 percent of the value of the Lockheed airframe on the sale to Pan American. Our strong feelings on this matter were conveyed to the British authorities as soon as we found out about it. Subsequently, Secretary Blumenthal discussed our views with Prime Minister Callaghan during his visit here on June 1, 1978.

The British Government formally told us that they hope and trust this instance will prove to be unique. In my reply, I told them that if this should turn out not to be the case, we will have no choice but to initiate a countervailing duty investigation or take other action under our trade laws as we consider appropriate.

With regard to the sale of the A-300 in the United States, we have consistently stated that the Government support of Airbus Industrie sales should be in accordance with the terms of OECD understandings. However, this case is but one being discussed with the Europeans in the light of the general question of aircraft financing and the need to improve the International Arrangement on Export Credits. Secretary Blumenthal strongly emphasized the need for such negotiations at the OECD Ministerial Conference on June 15. On that occasion, he advised the OECD Ministers of our views that the recently concluded International Arrangement on Export Credits—while good in its way—only goes part way to meet the need for eliminating destructive competitive practices in official export financing activities. This Arrangement came into effect in April of this year, but it needs to be strengthened and expanded. The Secretary urged the Ministers to negotiate this year to obtain the necessary substantive improvements.

He left no doubt that if there are no restraints on unfair official export credit competition, and such competition continues to escalate, there will be swift and effective U.S. reaction. One possible action we could take would be recourse to the remedies available under the U.S. Countervailing Duty Law which you cited. The fact that a particular export finance transaction violates an international credit arrangement does not *per se* make the aid a "bounty or grant" under our law. The possible violation of international understandings, however, such as those involved here, provides us with a basis for further examination of the facts and issues.

In this case, we must of course always consider the possibility of foreign retaliation, a matter of particular concern in the aircraft industry where U.S. dominance is perceived abroad—in part due to alleged past U.S. Government subsidies—and where our own sales of aircraft to foreign airlines are enormous. We also must take into account the in-depth discussions occurring in Geneva and in other international forums which are

focusing on these problems. While we stand willing and able to take unilateral action should any of these talks yield no comprehensive resolution to the issues, we must insure that premature unilateral actions do not jeopardize the chances for more satisfactory and long-term solutions.

Sincerely,

ROBERT CARSWELL,
*Acting Secretary.*

---

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS,
*Wahington, D.C., August 11, 1978.*

Hon. W. MICHAEL BLUMENTHAL,
*Secretary of the Treasury,*
*Washington, D.C.*

DEAR MR. SECRETARY: We have received reports that the French have offered China Airlines landing rights in Paris in exchange for the purchase of the Airbus A-300. Landing rights tied to an aircraft sale would violate the OECD understanding with respect to the sale of aircraft.

We urge you to investigate the allegation and take appropriate action. Aircraft sales should be based on fair competition in conformity with the international rules previously agreed upon by the principal exporting countries.

We look forward to receiving the results of your investigation.

With best wishes,

Sincerely,

WILLIAM PROXMIRE,
*Chairman, Committee on Banking, Housing, and Urban Affairs.*
EDWARD W. BROOKE,
*Ranking Minority Member.*
ADLAI E. STEVENSON,
*Chairman, Subcommittee on International Finance of the Committee on Banking, Housing, and Urban Affairs.*
H. JOHN HEINZ,
*Ranking Minority Member.*

---

THE SECRETARY OF THE TREASURY,
*Washington, D.C., August 30, 1978.*

Hon. ADLAI E. STEVENSON,
*Chairman, Subcommittee on International Finance of the Committee on Banking, Housing and Urban Affairs, United States Senate, Washington, D.C.*

DEAR MR. CHAIRMAN: Thank you for your letter of August 11 to Secretary Blumenthal. As he is out of town, I have taken the liberty of answering for him. We appreciate the concern which you and Senators Brooke, Heinz and Proxmire expressed over the reported offer by the French to grant landing rights to China Airlines in exchange for the purchase of the Airbus A-300. As you know, there have been several reports that certain foreign governments may be engaging in unfair competitive practices in the export of aircraft. Such practices are of particular concern to me, and have been under investigation by Treasury staff.

The report that China Airlines has decided to purchase the Airbus is particularly distressing inasmuch as they—according to a press report—had previously considered the Airbus a "third choice" behind the DC-10 and the L-1011. The decision to buy the Airbus would certainly suggest the possibility that special concessions had been offered to make the A-300 more appealing.

Treasury has, therefore, undertaken to investigate the validity of the press and industry reports. Information from our Embassy in Taipei indicates that Airbus Industrie representatives offered to intercede with the French Government to obtain landing rights in Paris. The French, however, have denied that they would offer landing rights in linkage with aircraft sales. They further state that an offer of landing rights would in fact be harmful to their relations with the People's Republic of China. Nevertheless, we are watching developments in this case closely. Should the Airbus sale to Taiwan materialize and be followed by approval of landing rights in Paris for China Airlines, there would be a valid presumption of a linkage.

We have impressed upon the Taiwanese that any linkage of landing rights and aircraft purchases would introduce unfair competition into the market place and thus violate the spirit of OECD understandings on aircraft sales. At present the OECD Aircraft Standstill does not prohibit the use of such special inducements, although they are against the stated policy of both the United States and France. We intend to seek an agreement to broaden and strengthen the International Arrangement on Export Credits, including a better understanding on sales of aircraft, so that only market considerations—price, quality and service—will influence the choice of aircraft by an airline. We hope we have your support in this.

For the present, our approaches through diplomatic channels are intended to encourage both the French and Taiwanese governments to recognize the impropriety of linking landing rights to aircraft sales and to reconsider the wisdom of such offers. If developments in this case are not satisfactory to us, we would intend to take further action.

I want to assure you of our continuing efforts to guarantee an equal competitive opportunity for the American aircraft industry by insisting on fair trade practices by foreign governments in the world market.

Sincerely,

ROBERT CARSWELL,
*Acting Secretary.*●

## COLUMBIA, THE GEM OF SOUTH CAROLINA

● Mr. HOLLINGS. Mr. President, in the September edition of "Nation's Business" magazine, there appears an article entitled "Columbia, The Gem of South Carolina," which I commend to my colleagues.

It was written by Mr. W. D. Workman, Jr., an old friend and a perceptive observer of the political, economic, and social development of our native State. Bill Workman currently serves as editorial analyst of the State newspaper in Columbia, and for many years he has enjoyed a well-deserved reputation as an outstanding journalist. No one could be better qualified to write about our capital city, and he has done a splendid job in this article.

We hear so much these days about the "New South" and the "Sunbelt" that it seems, at times, as though the South has arrived at its present condition through an almost magical combination of events.

But if the South—and South Carolina—has arrived at the mainstream of American life in the decade of the 1970's, there has been little magic involved. Its strength and security today were not inevitable or automatic consequences. What has moved the South is what has moved Columbia, S.C., for so many years: commonsense government, a hard-working citizenry, an imaginative approach to educational and industrial development, and a dedication to the future.

Though the article describes Columbia as "The Gem of South Carolina," it could just as well be called "The Gem of the South," because it is representative of what is happening everywhere. I congratulate Bill Workman on the article and "Nation's Business" for presenting it, and I ask that it be printed in the RECORD for the benefit of the Senate.

The article follows:

[From Nation's Business, Sept. 1978]

THE GEM OF SOUTH CAROLINA

(By W. D. Workman, Jr.)

Long before Congress created the District of Columbia and engaged the noted French engineer, Pierre L'Enfant, to design the nation's capital, another planned city called Columbia was taking shape in South Carolina. In 1786, the general assembly decided to move the state's seat of government from the historic port city of Charleston to a central site.

Exercising a foresight still appreciated almost two centuries later, the legislators directed Columbia's builders "to lay off a tract of land of two miles square, near Friday's Ferry, on the Congaree River, including the plain of the hill whereon Thomas and James Taylor, Esquires, now reside, into lots of half an acre each, and the streets shall be of such dimensions, not less than 60 feet wide, as they shall think convenient and necessary, with two principal streets, running through the centre of the town at right angles, of 150 feet wide. . . ."

RAVAGED BY FLAMES

By 1790, when Congress initially established the District of Columbia, South Carolina's legislature was convening in Columbia.

There is another parallel between Columbia and the District of Columbia: Both capitals were ravaged by flames after being overrun by invading armies. Washington's ordeal by fire came in 1814 from the British; Columbia's came in 1865 during a brief visitation by the Union forces under Gen. William Tecumseh Sherman. After what might be called an early federal urban renewal program, Columbia rose from the ashes and began a pattern of growth that is best described as progress by design.

Much of that progress can be attributed to favorable climatic, physical, and political features. Columbia's location in the center of the state makes it a natural marketing center, easily reached from the mountains or the sea. The central location also affords Columbians convenient vacation spots along the Atlantic coast or within the Blue Ridge mountains.

"We can be at the beach in two hours with no crowds," says Mrs. Ruth MacLean, who, with her doctor husband, came to Columbia from Canada five years ago. Dr. Lloyd MacLean, a urologist at Lexington County Hospital, used to have to drive more than 100 miles to go hunting. Now he travels only a few miles into the mountains to pursue one of his favorite pastimes.

As the seat of state government, Columbia has a stable tax income, direct and indirect. This is not an unmixed blessing, however, because property owned by the state produces none of the ad valorem taxes needed to sustain city and county services.

A similar mix of gain and loss characterizes the considerable acreage occupied by colleges and universities within the Columbia area. The venerable University of South Carolina, charactered in 1801, accounts for 222 acres of untaxed land immediately adjacent to the capitol complex. But, on the positive side, the university's enrollment of 23,500 students at the Columbia campus, coupled with a faculty of 1,350, constitutes a continuing and predictable economic asset.

Besides the economic benefits, USC contributes meaningfully to the intellectual, social, cultural, and recreational life of Columbians, as do other institutions of higher learning in the area, including Columbia College, the Lutheran Theological Southern

Seminary, Columbia Bible College, Allen University, and Benedict College.

"It's exciting living in a university town," says Rhonnie Newton, who moved to Columbia when her husband, Will, became general agent for Connecticut Mutual Life Insurance Co.

"The university attracts people skilled in many areas. We really enjoy being in an academic community where things are happening, and new ideas are whirling."

TRAINING FOR TODAY

Another category of higher education is that state's technical education. Conceived in 1961, that system was designed to provide workers with the technical training demanded by modern industry. Today, 16 Technical Education Centers—some identified as TEC college—operate throughout the state. Altogether, they have trained about 700,000 South Carolinians—male and female, young and old, black and white—for jobs in fields ranging from air conditioning to nuclear engineering.

Midlands Technical College has one Metropolitan Airport in Lexington County, and a third opening this winter in Harbison on the northwestern fringe of metropolitan Columbia. A fourth campus is projected for 22 acres near the intersection of U.S. 21 and Interstate 77 northeast of Columbia.

One notable feature of the TEC program is the tailoring of special training courses for particular industries. While a new plant is being constructed, its work force is being trained—through state and corporate cooperation—in the technologies required to operate the plant. More than 480 industrial establishments have benefited from this special feature.

EXPLOSIVE GROWTH

Through its Economic Development Commission, Columbia has shared substantially in South Carolina's industrial development. The annual industrial product for the Columbia Standard Metropolitan Statistical Area increased from $170.5 million in 1960 to $1.16 billion in 1976.

A significant aspect of this increase is the growth of industries other than textile plants which have long dominated the South Carolina scene. Today, textiles make up about eight percent of the Columbia area's total industrial product, compared to 29 percent only 18 years ago.

A brief roll call of some of the larger industries in the two counties discloses some familiar names. Anchor Continental, Inc. Hewitt-Robins, Hobart Manufacturing, Rockwell International Corp., Stone Manufacturing Co., Inc., Square D Co., and Westinghouse are in Richland County.

Allied Chemical Corp., Burlington Industries, Inc., Menco/Electra, Inc. (a subsidiary of North American Philips Corp.), Canron, Ltd., Colite Industries, Inc., Horsman Dolls, Inc., Monroe Calculator, and NCR Communications Division are in Lexington County.

Nassau Recycle Corp., a Western Electric affiliate and recent addition to that list, moved its corporate headquarters as well as plant to the Columbia area. So did Artex Hobby Products, Inc., and Wheel Trueing Tool Co.

"Our employees relate very much to our plant and are genuinely interested in its being a success. As a result, they have a great attitude, which results in excellent productivity. This attitude and pride are very common in the area and contribute to the success of most companies that have located here."

Simultaneous with this industrial movement has been a series of continuing economic studies to determine how Columbia and the metropolitan area might improve municipal services, involve the total community in progressive development, and avoid the urban blight and fiscal crises which have plagued many American cities.

SURVEYS OF PROGRESS

Columbians periodically survey their assets and liabilities, weigh progress against potential, and attempt to reconcile past planning with contemporary conditions. In 1905, for example, landscape architects from Boston were brought in to assess how much Columbia was deviating from its original pattern and to devise a plan for land use and urban development compatible with a "new kind of tomorrow."

Similar surveys have been conducted repeatedly ever since, especially in the past two decades. The sponsoring organizations have changed, but almost always the groups have involved both public and private sectors in the two-county area.

In 1959, the Columbia-Richland County Industrial Development Commission engaged an economic research firm to assess the development potential of the Columbia area. Two years later, the Columbia City Planning Commission produced its own comprehensive report, "In Step With Tomorrow."

TRANSPORTATION NEEDS

The year 1965 brought forth another survey, the "Citizens' Design for Progress," which involved hundreds of Columbia's business, professional, civic, and government leaders. Within six months, yet another report, this one called "The Economy of Metropolitan Columbia," was in circulation.

A study of the area's transportation needs was made in 1966; by then the spectacular growth of the two-county region had spawned traffic and parking problems. The Columbia Area Transportation Study sought not only to cope with the burgeoning development but also to anticipate future growth patterns.

Another specialized study was made in 1969, this one on the continued viability of the downtown area in the face of proliferating and attractive shopping centers and malls around the perimeter of Columbia. Local architects, engineers, and planners were involved in the study, which became known as the Doxiadis report. Recommendations ranged from the obvious to the imaginative, from short-range to long-term, and from the generally acceptable to the highly problematical.

The most spectacular consequence of the Dioxiadis report has been the revamping of Main Street, a costly project which converted a conventional main drag into an artistic thoroughfare replete with flowers, trees, floodlights, and a mall atmosphere which caters to both pedestrian and vehicular traffic, although buses and other through traffic have been diverted away from Main Street.

Other goals include the concentration of city, county, and federal government offices in a complex at the other end of Main Street from the capitol complex.

More distant goals are the development of the large tract between the central business district and the Congaree waterfront, the channeling of railroad and vehicular traffic into corridors, and the provision of middle and upper-income housing in the downtown area.

There is increasing interest in converting the upper floors of stores on Main Street and nearby into apartments for those people who want to live downtown. Along with this interest is a continuing project to refurbish the facades of the Main Street stores. The Capital City Development Foundation provided much help toward these goals in directing the Main Street renovation. But, in recent months, the foundation has gone out of business.

J. Willis Cantey, the banker who headed the organization during its restructuring of Main Street, feels that its own mission has been accomplished. He wants the foundation leadership and staff to turn to other projects suggested in the Doxiadis and similar reports.

SYMPTOM AND STIMULUS

The spectacular increase in air traffic at Metropolitan Airport, which is served by Delta, Eastern, Southern, and Piedmont airlines is a symptom and a stimulus of the area's growth.

The annual passenger flow in and out of the airport has increased by more than 100,000 since 1975 and now exceeds 800,000 a year. The tonnage of mail and cargo has also increased.

In the course of its growth since the end of World War II, Columbia has gained intermittent national recognition. In 1951, Columbia was designated an All-American City in the competition sponsored by the National Municipal League. In 1964, there was a repeat performance. Broadcast executive Charles A. Batson, then president of the Greater Columbia Chamber of Commerce, praised the city for again winning national laurels. But he reminded his fellow citizens that there remained another Columbia, which needed constant attention to stave off urban blight, raise per capita income, increase civil facilities, and meet the challenge of a burgeoning metropolitan area.

"Let's enjoy to the fullest this wonderful All-American recognition," he said. "Then let's get back to work."

Back to work it was, with the goal of convincing the nation that Columbia was, in the words of then Mayor Lester L. Bates, "the South at its best." During the next decade, the Columbia area became one of the leaders of the emerging Sunbelt. Just last May, Columbia was listed eighth among the top ten U.S. cities with the most favorable growth prospects.

One Columbian deeply involved with the city's achievements and challenges is John T. Campbell, who served two terms as mayor (1970–78) after two four-year terms on the city council. A pharmacist and drugstore proprietor, Mr. Campbell is proud not only of Columbia's dramatic growth but also of the city's ability to hold the line on taxes.

LOW TAX INCREASES

"During the eight years that I was mayor," he says, "we had only two small increases—nothing like the rate of inflation. We have had less tax increase in Columbia than any city in the Southeast.

"I received some criticism for using federal revenue sharing money to help operate the city, but, after all, those federal funds were designed to help local people, and I don't know of any better way to help them than to keep taxes down. We made a lot of capital improvements, too, but we tried to keep the costs of government to a minimum."

The former mayor sees one major obstacle to further development of the central city. An essential element of the Doxiadis report is conversion of the acreage fronting on the Congaree River into a residential area, with recreational facilities. Such a conversion close to downtown Columbia would help to rejuvenate the central city.

The big roadblock is the location in the riverfront area of the grim and gray state prison known as CCI (Central Correctional Institution).

"Once we get CCI out of that location," says Mr. Campbell, "we'll see the entire area west of Main Street blossom into a tremendous development. Those 28 acres occupied by CCI are holding up the whole thing. It all depends on what the state does."

LOBBYING IN WASHINGTON

Columbia's present mayor, Kirkman Finlay, Jr., has some ideas of his own on that subject. He sees the need for closer coordination with state and Federal governments.

"We need someone to lobby systematically for our best interests, and I intend to do that—not just with our state legislators but with those who represent us in Washington."

Mayor Finlay will need that kind of help with the long-range goal of rechanneling the railroad tracks which penetrate the city. The costs involved in such a massive undertaking will require much more money than can reasonably be expected from the city and from the railroads, which have no financial incentive to invest the large sums needed.

Mayor Finlay shows even greater enthusiasm, however, for the development of 1,000 under-utilized acres between the main business district and the Congaree riverfront. He believes that this area has great potential for residential and commercial use. Development would include a green belt of parkland extending from the river almost to Main Street.

The mayor is convinced that Columbia can continue to gain population, productivity, and reputation without sacrificing the city's historic assets. He sees a positive developmental opportunity in restoring and revitalizing the many historical residences and other structures in the central city area. Already, a number of former residences have been converted into legal, medical, or business offices, thus preserving the traditional appearance of the structures while providing needed work space.

PRESERVING HISTORY

Much credit for this rehabilitation rather than demolition goes to the Historic Columbia Foundation, an organization supported by 1,000 individuals, corporations, and civic and professional groups. The foundation raised $700,000 in the early 1960's to restore the handsome Classic Revival house designed in 1823 by Robert Mills, an architect and engineer who also designed the Washington Monument and the Old Treasury Building in the nation's capital.

Today, the Mills house is visited annually by 15,000 to 20,000 people, many of whom also see the Tuscan villa-style residence nearby where President Woodrow Wilson lived as a boy.

Columbia's cultural appetitie has long been satisfied—and whetted—by the Columbia Museum of Art. Its exhibits, lectures, and classes have been matched in another cultural realm by the Columbia Music Festival Association's presentation of ballet, lyric opera, and symphonic music.

Ultimately, Columbia hopes to have its own center for the performing arts. Current expectations hinge on the admittedly ambitious prospect of establishing such a center in the area scheduled for development along the Congaree riverfront.

The underdeveloped potential of that riverfront is one of the major concerns of the new president of the Greater Columbia Chamber of Commerce. Robert L. Gandy, Jr., president of the Richtex Corp., wants the chamber to play a major role in bringing about such development.

CONSOLIDATION CONSIDERED

As another major objective, Mr. Gandy wants to develop greater coordination, perhaps leading to consolidation, of the municipalities in the greater Columbia area. That possibility has long been discussed—and cussed—by city and county political leaders, but prospects are much improved today. Columbia City Council and Richland County Council are conferring about specifics such as providing fire protection, sewer and water lines, and other services to the urban areas outside the city limits.

Whatever the obstacles and the opportunities, the business, civic, and governmental leadership of the two-county community is determined that the Columbia area will continue its progress by design.●

## OLD DEFENDERS DAY

Mr. MATHIAS. Mr. President, September 12 is Old Defenders Day in Maryland. It is one of the State's most significant holidays because it marks the anniversary of the battles of North Point and Fort McHenry where the resolute and gallant citizens of Baltimore successfully defended the city against the British onslaught. Those battles were a turning point in the War of 1812. They are a proud chapter in the history of Baltimore, of Maryland and of our country.

As we celebrate Old Defenders Day, it is sweet to reflect on these past glories. But we would badly serve the memory of the heroic men and women who defended North Point and Fort McHenry if, on Old Defenders Day, we did not also consider contemporary questions of defense as well.

Today, there is no more serious defense issue on our national agenda than the SALT II agreement being negotiated at Generva. And that treaty is in trouble.

SALT is under attack from a number of directions, but it suffers especially because the administration has not made a strong case for it. The President, of course, is hampered in this by not having a completed agreement to defend. But it is not really necessary for the President to go into the details of this particular agreement in order to let the American people know that the issue itself is absolutely vital. A world with the capacity for the ultimate crime of total genocide should not hesitate too long before renouncing that fatal course. For the sober, the prudent, the wise, the courageous, all know there is no alternative to a cooperative effort to end the arms race.

My greatest hope for this Old Defenders Day 1978 is that the President of the United States will take the lead in moving this country toward the conclusion of a SALT II agreement that will enhance our national security. Otherwise, there may some day be something far worse than those old-fashioned "bombs bursting in air" above Fort McHenry as they did 166 years ago today.

## CENSORSHIP OF ADMIRAL HOLLOWAY

Mr. THURMOND. Mr. President, administration efforts to suppress the views of our military leaders reached a new high this summer when attempts were made to muzzle the retiring Chief of Naval Operations, Adm. James L. Holloway III, in his farewell address at the Naval Academy July 1.

Columnists Rowland Evans and Robert Novak reported on these events in the September 4, 1978 issue of the Washington Post newspaper under a heading entitled "Washington's Naval Battle."

This article reveals previously unreported events by the Carter administration to muzzle the Navy's leadership in their determination to maintain U.S. Naval supremacy against arms control advocates in the Pentagon, White House, and Arms Control and Disarmament Agency.

First, President Carter denied Admiral Holloway the usual end of tour courtesy visit by a retiring Chief of a military service apparently because the Admiral insisted on his final speech including the words "maritime superiority."

Evans and Novak reported in their column that when Admiral Holloway submitted his farewell remarks for review he was informed that five references to "maritime superiority" must be eliminated or softened. Holloway appealed this ruling making clear he would talk about "maritime superiority" with or without approval. All but one of the changes was then rescinded.

Mr. President, this column also reveals the blanket opposition within the Navy to the administration's shipbuilding policies. It further points out the pressure being placed on the new Chief of Naval Operations, Adm. Thomas Hayward, to support the administration drive to ax the nuclear carrier and cut back on earlier supported shipbuilding plans.

In announcing his veto of the nuclear carrier President Carter made the statement that not one of his advisers favored it. When one looks at his advisers, this is not a surprising statement. The military leaders with experience in these matters are being shut out. They are not only being denied access to the President, they are also being censored within the Pentagon itself.

These events are similar to those of the days of former Defense Secretary Robert McNamara who put such a muzzle on military leaders Congress eventually held hearings aimed at breaking this effort. While civilian authority must be supreme once decisions are made, military leaders must be free to give their views to the President rather than shut out as was done in the case of Admiral Holloway.

Many of the McNamara appointees are back in the Pentagon in key positions. Their influence has damaged our already weak defense programs in the past 2 years, and they would be doing more if they thought they could get away with it. Now is the time for Congress to send them a message that such policies will not be tolerated.

Mr. President, I ask unanimous consent that the Evans and Novak article cited earlier be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WASHINGTON'S NAVAL BATTLE

President Carter's effort to put a short leash on his admirals has run into their determination to maintain U.S. naval supremacy against arms-control pressures inside the administration.

Adm. Thomas B. Hayward, newly installed Chief of Naval Operations, is caught in the middle. On Aug. 18, he gave verbal orders to senior officers not to speak out against the president's veto of the defense bill (which authorized a new nuclear aircraft carrier of the Nimitz class). But those orders evoked such anger in the Navy that Hayward's private memo to flag officers a week later was an exercise in ambiguity that avoided clear support of the president.

In truth, the naval brass clearly support an override of the president's veto with nothing less at stake than naval superiority—not mere equivalence with the Soviet fleet. Arms-control advocates dominating the national-security bureaucracy oppose naval supremacy as inimical to U.S.-Soviet strategic balance. To admirals and arms controllers alike, the

nuclear carrier is integral to naval supremacy.

The conflict resulted in peculiar circumstances attending the retirement of Hayward's predecessor, Adm. James L. Holloway III, two months ago. Holloway, who advocates a nuclear carrier, was denied the visit with the president traditionally accorded to a military chief completing his term.

Even more revealing was Holloway's experience in making farewell remarks at Annapolis July 1. Submitting prepared remarks to the office of the secretary of defense June 28, the admiral was informed that five references to "maritime superiority" must be eliminated or softened. An aide to Holloway snapped that Pentagon civilians would have midshipmen exhorting their football team to "tie Army" next year.

Holloway appealed the blue-pencilling, making clear he would talk about "maritime superiority" at Annapolis, with or without approval. Deputy Assistant Secretary of Defense Tom Lambert rescinded all but one of the changes but insisted on keeping one.

Hayward had been no less an advocate than Holloway of naval supremacy and the nuclear carrier, but encountered new White House determination to leash the Joint Chiefs of Staff. That resolve hardened after the defense-bill veto became a centerpiece of the president's campaign for political rehabilitation.

Accordingly, meeting with several assistant chiefs and other flag officers at the Pentagon Aug. 18, Hayward supported the veto and ordered the officers not to help the override. His motives seem clear: not to jeopardize White House backing for a conventionally powered (non-nuclear) carrier next year. Besides, the president's veto then seemed sure to be sustained.

But Hayward was rocked by criticism from naval officers over his capitulation to Mr. Carter just as support for the override was building in Congress. The result was an Aug. 25 "confidential" memorandum from Hayward (signed "Tom") for "eyes only" of the Navy's flag officers. It is a masterpiece of obfuscation.

"Our fundamental goal at this point must be to preserve the momentum already obtained for the early authorization and funding of a follow-on carrier to replace [the] Midway," Hayward told his fellow admirals. "My position has been, and remains, that we must start as soon as possible on a replacement for Midway, and that the replacement must be at least as capable as the ship replaced." This Delphic utterance falls obviously short of Defense Secretary Harold Brown's desire that a conventional carrier be endorsed.

Nor does Hayward's memo flatly instruct the admirals to stay clear of the veto override fight, saying instead: "It is important that we refrain from any actions that could jeopardize the existing basic support for a follow-on carrier, or diminish our influence over decisions relating to it." This could be interpreted as follows: If you lobby to override the veto, don't get caught.

Although hard-nosed admirals feel Hayward abandoned naval interests, it is doubtful whether he could do more under the intense pressure he faces—as when he attended the Armed Forces Policy Council meeting Aug. 28. Deputy Defense Secretary Charles Duncan instructed all present to help sustain the president's veto (informing them they would be coordinated by Richard Moe, political aide to Vice President Mondale).

The admirals view such activity as incompatible not only with traditions of American naval strategy, as laid down by Adm. Alfred Mahan, but with Defense Department Directive 5100.1 instructing the Navy "to gain and maintain general naval supremacy." In a difficult hour, Hayward's memo avoids violating that trust.

## U.S. POLICY TOWARD ARGENTINA

Mr. THURMOND. Mr. President, U.S. foreign policy must not be structured in such a way as to drive friendly governments into situations where they become easy prey for a Communist takeover.

Recent testimony before Congress by Assistant Secretary of State Patricia Derian was most damaging to continuance of friendly relations with Argentina as well as other South American allies.

Secretary Derian, a key proponent of President Carter's human rights policy, is using this policy in such a way that the effect is to encourage revolutionary forces and possible Communist takeovers in South America.

While every American is concerned about the human rights of all people, most of us know that human rights amounts to zero if the Communists gain control. If our human rights policy leads to or encourages Communist takeovers the end result is to reduce those values we all cherish for many people in foreign lands.

Mr. President, a column by Rowland Evans and Robert Novak entitled "Undiplomatic Incident" on this subject appeared in the September 6, 1978, issue of the Washington Post newspaper. I ask unanimous consent it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

"UNDIPLOMATIC" INCIDENT

A thrice-repeated but unsubstantiated indictment of Argentina by Assistant Secretary of State Patricia Derian testifying publicly before Congress reveals the shattering impact on U.S. foreign policy of human-rights crusading.

Under questioning Aug. 9 by the House inter-American affairs subcommittee, human-rights chief Derian responded with language seldom used by one friendly power to another, accusing the Argentine regime of killings, kidnappings and torture. So harsh was her language that the State Department tried to expunge it from the record. But apart from being undiplomatic, there is considerable doubt of accuracy.

The impact could prove tragic for U.S.-Argentine relations and perhaps for Argentina itself. Moderate and pro-U.S. elements within the Argentine junta have been weakened; deterioration of the U.S. position in the strategic southern corner of South America has been accelerated.

This cannot be dismissed as merely unfortunate ardor by an idealist unfamiliar with diplomacy. Deterioration of U.S. relations with Brazil, Chile and now Argentina too closely follows the scenario of Latin American specialists in the Carter administration who privately predicted the human-rights crusade would foster the left in the Western Hemisphere.

Concern that the human-rights tail is wagging the foreign-policy dog is spreading in both the administration and Congress. On Capitol Hill, growing attention is paid to the imminent loss of up to $1.4 billion in sales to Argentina—including $620 million in Export-Import Bank transactions.

So, when Derian testified Aug. 9, she was asked by subcommittee chairman Gus Yatron (D-Pa.) why her human-rights office recommended against the Export-Import Bank loans. Even Derian's own aides were taken aback by her answer.

"The reason for our advice was the continuing violation of basic human rights by Argentina. The systematic use of torture, summary execution of political dissidents, the disappearance and the imprisonment of thousands of individuals without charge, including mothers, churchmen, nuns, labor leaders, journalists, professors and members of human-rights organizations."

Moments later, Derian repeated her indictment, adding "kidnappings" and "unwarranted killings" this time. In her soft Mississippi accent, she read the litany a third time, concluding, "We see nothing to indicate that there is a genuine trend toward human rights."

Horrified officials in the State Department's Inter-American Bureau crossed out Derian's indictment in the transcript, but it was too late. Word had gone to Argentina, where Pat Derian has become a household word. The U.S. ambassador in Buenos Aires was called in for a stiff protest; the Argentine ambassador in Washington was called home.

The tragedy is that Derian's outburst may well weaken the junta's relatively moderate elements headed by the president, Gen. Jorge Rafael Videla, and strengthen the extreme right. While President Carter's human-rights admonitions probably have improved conditions in Argentina, the point of diminishing returns has been reached.

Apart from undiplomatic ravages, was Derian telling the truth? Her office insists the Argentine junta has "executed 3,000 persons since seizing power in 1976 and at least another 5,000 persons are missing." But those figures come from private sources of dubious reliability. U.S. government bureaus with vastly more experience than Derian's say the figures cannot be verified and seem inflated.

Actually, the junta, in confronting bloody far-left revolt in 1976, used an iron fist to prevent a communist takeover. But many killings and kidnappings are traceable to rightist paramilitary groups not under government control and should not be counted as government "executions." Moreover, objective observers agree that Argentina's human-rights record has improved markedly in the past year.

Those nuances are disregarded by Derian's office. While unable to draw distinctions between moderates and extremists inside the junta, the human-rights crusaders claim that military rule in Argentina cannot last much longer and that the United States should disengage from the Junta. Such a prospect is rejected by Latin American experts, whatever their ideology.

But behind the naiveté, a pattern emerges. Before Carter took office, a prediction was made by Brady Tyson, now with the U.S. mission to the United Nations, that human rights would be used to support revolutionary forces in the hemisphere. An identical prediction was made privately last year by Robert Pastor of the National Security Council staff. Derian's undiplomatic incident could help fulfill those prophecies.

## THE MIDDLETON FAMILY AND MIDDLETON PLACE

Mr. THURMOND. Mr. President, I find it most heartening in these days when we are struggling to find solutions for today's problems in this great Nation that there are still those American citizens who serve us well by reminding us again of the great leadership and sacrifices of the Founding Fathers of this Nation. My particular reference here is to an article written by Mr. Horace Sutton of United Press International and appearing in the Washington Post on September 10, 1978. The article is titled, "A Place Worth a Detour."

Mr. Sutton's article is directed primarily to describing the beauty and the history of Middleton Place, including its gardens of unusual splendor and beauty, near Charleston, S.C. It is indeed a glorious place to visit and to feel again the grandeur and historical significance of this cradle of earliest America. The gardens were begun in 1741 by Henry Middleton, the president of the First Continental Congress.

Middleton Place is a centerpiece of southern American history and threaded through it all is the Middleton family. Edward Middleton emigrated from England to Barbados and then on to South Carolina in 1678, 300 years ago. It was his grandson, Henry Middleton, who represented South Carolina at the First Continental Congress and who actively opposed the British. One of the signers of the Declaration of Independence was Henry's son, Arthur.

Mr. President, the courage, loyalty, and responsibility of these great American leaders is an inspiration to all of us as we attempt to serve this Nation today.

The attached article by Mr. Sutton provides additional information about Middleton Place and the illustrious Middleton family.

Mr. President, I ask unanimous consent that the article to which I have referred be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A PLACE WORTH A DETOUR

(By Horace Sutton)

MIDDLETON PLACE, S.C.—Plantation life in the Old South may evoke images of Tara, "Aunt Jemimah" cooks in white aprons and red kerchiefs scurrying about the halls, and field hands picking cotton. But the serenity and the elegance that come to life here at Middleton Place are of a different sort.

The soft hand of style is everywhere, and the grandeur of European influence is surely reflective of what its creators had seen in the great gardens of France and England. It is a sight that remains today as purely refined as anything on the continent. In the imperative words of Michelin, that French arbiter of taste, style and public interest, Middleton Place is worth a detour.

Fourteen miles from downtown Charleston, and nearer still to the airport that serves the city, Middleton Place is a broad expanse of splendid gardens, a family seat that watched over the fortunes of 20 other rice plantations. It still maintains the stableyards, and the Gentlemen's Guest Wing, a handsome red brick house that after the Civil War served as the family residence.

Threaded through it all is the Middleton family, an illustrious lot that served government, country and region as loyalty and responsibility dictated. It was Henry Middleton, the president of the First Continental Congress, who began the gardens in 1741. The use of slaves in the English colonies was common then, and it took over 100 workers more than a decade to create the ornamental lakes, the velvet green terraces and the grand allees that cover 65 acres of formal gardens.

Visitors who come now park near the long Reflection Pool. From there one can promenade through allees like green tunnels perfumed in January and February with camellias.

The 19th-century azaleas come in March and April, then the magnolia, the roses and the mountain laurel. Crepe myrtle is summer's bloom, and through it all, as a green backdrop, are the pines, the palmetto and the live oak.

The Great Middleton Oak, beyond the formal Sundial Garden, is a huge canopy of a tree reputed to be over more than 900 years old, a growing relic that had its origins in Indian days and survived good and bad through Middleton's historic years. It stands 85 feet high, its limbs reaching out for 145 feet, a growing, living symbol of durability.

Middleton Lake commands a site above the Ashley River, flowing by and providing the irrigation for the rice fields, for Rice Mill Pond and for the Butterfly Lakes, those delicate ornamental ponds spread like wings just below the broad green terraces, descending from the ruins of the Great House.

Edward Middleton started it all, emigrating from England to Barbados and then on to South Carolina in 1678. His son Arthur was an activist who begat Henry. Middleton Place was part of the dowry of Henry's wife, Mary Williams. It was Henry who represented South Carolina at the First Continental Congress and Henry who rebuffed the British.

His son Arthur, educated in England, and both cultivated and radical, signed the Declaration of Independence. Arthur's son, the so-called second Henry, served in the state legislature, became governor of South Carolina and then America's first minister to Russia.

Henry's friends, the French botanist Andre Michaux, brought the first camellias to Middleton in 1786. Williams Middleton, Henry's son, signed the Ordinance of Secession, and so when Sherman's troops came through, they put the torch to the plantation. Only the Gentlemen's Wing survived and it became the main house.

Restored now to much of its glory, Middleton Place fairly throbs with southern American history—the riches brought by rice, indigo and cotton, the battle against the British and the civil struggle.

The stableyards have been recreated and enlivened with farm animals. There is a fowl house and hog crawl and a blacksmith shop as well as sheep, goats, rabbits, peacocks and a wagon pulled by mules.

All sorts of events are celebrated on the grounds at Middleton Place—a Greek festival in spring, a Highland gathering in late September, a lancing tournament in October and plantation days in November. But best of all is Arthur Middleton's birthday, celebrated in June with colonial lawn games, a concert of 18th-century music he'd by the Butterfly Lakes and a torchlight tour of the gardens.

A fife and drum corps parades in revolutionary rig on Arthur's birthday, and muskets are fired when the field music is played. It pleases the revolutionary bones of Arthur Middleton, buried on the grounds in a shady glen.

## MODERN WAR TECHNOLOGY NECESSITATES A GENOCIDE TREATY

Mr. PROXMIRE. Mr. President, for the past several years I have urged ratification of the Genocide Convention. The purpose of the treaty is to make the "intent to destroy, in whole or in part, a national, ethnical, racial, or religious group" an international crime.

Today the threat of genocide is greater than ever before. The numbers of people and conflicting beliefs continue to grow. The biggest and most frightening development, however, has been in the weapons of war. Modern technology has given us a wide array of techniques which make it easier than ever to selectively eliminate particular groups.

Biological warfare, particularly germ warfare, can be selectively targeted. In the French and Indian War, masses of Indians were purposely killed by giving them blankets infected with smallpox. The tragedy of this genocidal use of biological warfare is increased when we consider the many other tactics available to make genocide an easy feat. Chemical warfare and nuclear warfare are grave tools of war. We cannot forget the instant destruction of Hiroshima and Nagasaki. Add to these methods of warfare, conventional weaponry, which Hitler proved unquestionably effective in wiping out millions of innocent people.

It is obvious that the world's rapidly advancing war technology compels us to act. We have no hesitancy about working from the strategic end—the SALT talks. Why then are we so hesitant to condemn the actions which would make use of weaponry? The Genocide Convention is a treaty which gets at the core of the issue; it condemns genocide and genocidal attempts and morally obligates those who sign it to do all they can to prevent these heinous murders. The United States has not done this. What must the rest of the world think of us?

Mr. President, 82 other countries have ratified the Genocide Convention because they know it is a valuable foundation for international harmony, an expression of international morality we all can, and must, share in order to survive.

## APPOINTMENT BY THE PRESIDENT PRO TEMPORE

The PRESIDING OFFICER (Mr. STEVENSON). The Chair, on behalf of the President pro tempore of the Senate, pursuant to Public Law 94-201, appoints Mr. Clement John Sobotka, Jr., to the Board of Trustees of the American Folklife Center, effective January 3, 1979, for the remainder of the term which expires March 1982, in lieu of Mr. John Voight.

## SPECIAL ORDER FOR THURSDAY, SEPTEMBER 14, 1978

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on Thursday, after the two leaders have been recognized under the standing order, Mr. KENNEDY be recognized for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ORDER FOR RECESS UNTIL 10 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until the hour of 10 o'clock tomorrow morning.

The PRESIDING OFFICER. Without objection, it is so ordered.

## RESUMPTION OF CONFERENCE REPORT ON NATURAL GAS TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that after the two leaders or their designees are recognized under the standing order tomor-

row, the Senate resume its consideration of the conference report on natural gas pricing.

The PRESIDING OFFICER. Without objection, it is so ordered.

### RECESS TO 10 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in recess until the hour of 10 o'clock tomorrow morning.

The motion was agreed to; and at 6:33 p.m. the Senate recessed until tomorrow, Wednesday, September 13, 1978, at 10 a.m.

### NOMINATIONS

Executive nominations received by the Senate September 12, 1978:

INTERNATIONAL MONETARY FUND

G. William Miller, of California, to be U.S. Alternate Governor of the International Monetary Fund for a term of 5 years, vice Arthur F. Burns.

CIVIL AERONAUTICS BOARD

Marvin S. Cohen, of Arizona, to be a member of the Civil Aeronautics Board for the remainder of the term expiring December 31, 1979, vice G. Joseph Minetti.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

Armando M Rodriguez, of California, to be a member of the Equal Employment Opportunity Commission for the term expiring July 1, 1983, vice Lowell W. Perry.

DEPARTMENT OF STATE

Ambler Holmes Moss, Jr., of Virginia, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Panama.

# HOUSE OF REPRESENTATIVES—*Tuesday, September 12, 1978*

The House met at 12 o'clock noon.

Father Warren F. Braun, State chaplain, State of Florida Veterans of Foreign Wars, Pompano Beach, Fla., offered the following prayer:

Let us pray.

We ask Your blessing, Almighty God, on this opening session of Congress and beg that this blessing continue as long as the people act so as to deserve good men representing them in a government operating under God's grace. Relying on the purity of their intentions, the justice of their cause, and the integrity and intelligence of the people, our Founding Fathers established the Congress of the United States under an overruling providence which has so singularly protected our country to this very moment. Divine being, supreme over all, patron of order, fountain of justice, continue Your blessing on this Nation and the men responsible for its laws so their acts may always be consistent with the ends of Your providence. Amen.

### CALL OF THE HOUSE

Mr. ASHBROOK. Mr. Speaker, under clause 1, rule I, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. WRIGHT. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 753]

| | | |
|---|---|---|
| Ambro | Dickinson | Ireland |
| Ammerman | Diggs | Johnson, Colo. |
| Andrews, N.C. | Dingell | Kasten |
| Archer | Dodd | Kemp |
| Armstrong | Drinan | Kostmayer |
| Ashley | Edwards, Calif. | Krueger |
| Barnard | Fary | Leach |
| Bellenson | Fish | Leggett |
| Breaux | Fithian | Lehman |
| Brown, Mich. | Flowers | Long, Md. |
| Brown, Ohio | Ford, Tenn. | McCloskey |
| Burke, Calif. | Forsythe | McDonald |
| Burke, Fla. | Fraser | McKinney |
| Burton, John | Frey | Mathis |
| Butler | Fuqua | Meeds |
| Byron | Garcia | Mikulski |
| Cederberg | Gibbons | Miller, Calif. |
| Chisholm | Goldwater | Mitchell, Md. |
| Clawson, Del | Hansen | Murphy, N.Y. |
| Clay | Harrington | Ottinger |
| Cochran | Harsha | Pepper |
| Conyers | Heckler | Pursell |
| Davis | Holtzman | Quie |
| Delaney | Huckaby | Railsback |
| Rangel | Shuster | Traxler |
| Richmond | Skubitz | Tsongas |
| Risenhoover | Spellman | Tucker |
| Rodino | St Germain | Udall |
| Rudd | Stockman | Van Deerlin |
| Santini | Stokes | Vander Jagt |
| Sarasin | Stratton | Waggonner |
| Sawyer | Stump | Wiggins |
| Scheuer | Symms | Young, Alaska |
| Shipley | Teague | Zeferetti |

The SPEAKER. On this rollcall 330 Members have recorded their presence by electronic device, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

### THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

### MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment bills of the House of the following titles:

H.R. 8112. An act to repeal chapter 27 of title 44, United States Code; and

H.R. 12915. An act to amend section 2301 of title 44, relating to the National Archives Trust Fund Board.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3816) entitled "An act to amend the Federal Trade Commission Act to expedite the enforcement of Federal Trade Commission cease and desist orders and compulsory process orders; to increase the independence of the Federal Trade Commission in legislative, budgetary, and personnel matters; and for other purposes."

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 3447. An act to strengthen the economy of the United States through increased sales abroad of American agricultural products.

### FATHER WARREN F. BRAUN

(Mr. YOUNG of Florida asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. YOUNG of Florida. Mr. Speaker, in the absence of my colleague, J. HERBERT BURKE, I would like to introduce Father Warren F. Braun who offered the opening prayer for the U.S. House of Representatives today. Father Braun is the State chaplain of Florida's Veterans of Foreign Wars. He retired to Florida for health reasons after many years of service in the Youngstown, Ohio, diocese, and despite his health problems has been vigorously active in community affairs.

Father Braun was born and raised in the Pittsburgh, Pa., area, the son of a professional baseball player. He attended Duquesne College and St. Mary's of the West and enjoyed a career as a professional dancer for seven seasons prior to being ordained in the Catholic Church.

He has always been active in veterans organizations. He is a past national chaplain of the Veterans of Foreign Wars and chaplain emeritus of the VFW in Ohio. Although Father Braun is now a Floridian, many of you may know him from Ohio or Pennsylvania or from his fine work with the VFW.

His accomplishments have been many and his friends are legion. It is an honor and privilege to know this man of God and I hope you will make him welcome in Congressman BURKE's absence. The Florida primary is today and regrettably Congressman BURKE will not be able to hear Father Braun's prayer, but I know he will read it when it is published.

### MILITARY POST EXCHANGE PRIVILEGES

(Mr. DAN DANIEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DAN DANIEL. Mr. Speaker, for a number of years now, military personnel and critics of the Department of Defense have questioned that there is a financial advantage from shopping at post exchanges. Recently I have obtained the results of a survey showing Armed Forces personnel save an average of 22 percent on items purchased from Army-Air Force Exchange Service. The pilot retail price

comparison survey, conducted by the A. C. Nielsen Co., lays that question to rest.

This survey was commissioned by AAFES to develop methods and procedures for documenting the savings provided by the exchange service and for determining the relative position of AAFES pricing in order to evaluate the need for revisions in pricing procedures. The individual markets surveyed were Fort Dix-McGuire AFB, N.J., area, Fort Lewis-McChord AFB, Washington area, San Antonio area, and Fort Benning, Ga.

After applying standard sampling techniques, Nielsen's local market observers checked prices at 41 stores in the Tacoma, Wash., area around Fort Lewis and McChord AFB, and at 53 stores in the Wrightstown, N.J., shopping area serving the Fort Dix-McGuire market. In San Antonio, 48 stores were checked and in Columbus, Ga., serving Fort Benning, a total of 48 stores were surveyed.

In all, 3,203 comparative prices were collected in the civilian stores in August, and "prices of the day"—including specials and other promotions—were reported for comparison against identical items sold by AAFES.

Nielsen called AAFES prices "very competitive" and said the survey showed that prices were higher on only 9 percent of the observations and that 89 percent of the observations were lower; 2 percent were the same.

Each month it becomes more difficult for the military services to attract and retain the quality of personnel needed for the maintenance of defense. Repeatedly, I have been told by these fine men and women that they feel they have been "had" insofar as the nonpay items which they have been promised are concerned. PX privileges and prices are among these items. I believe it is important that enlistees and careerists be made aware of the dollar value realized in this area.

## MEMBERS URGED TO REJECT OFFER OF FINANCIAL ASSISTANCE IN EXCHANGE FOR VOTE ON JARVIS PLAN

(Mr. CORMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CORMAN. Mr. Speaker, in what appears to be tantamount to a bribe, Howard Jarvis, as chairman of the American Tax Reduction Movement, sent wires to many Members of the House pledging financial support to candidates favoring his Freedom for Taxpayers National Tax Plan.

The wire briefly sketches a meat ax-like approach to cut Federal spending, and gives no indication of how or where meaningful and reasonable cuts could be made.

Mr. Jarvis espouses that his proposal is the only one that would bring relief to taxpayers, and threatens to publicly portray any congressional candidate not supporting his plan as an "opponent" of tax fairness and reform.

His message is not merely an attempt to rally support for his proposal, but rather a blatant effort to coerce candidates to succumb to bribery. According to Mr. Jarvis' mailogram a candidate pledging support for his tax plan could receive financial and/or media assistance in the November election from the Tax Reduction Movement Political Action Committee. Any offer of financial assistance in return for support of any legislative action is illegal, as is acceptance of such an offer.

Section 201(b) of title 18, United States Code, makes it an offense for any person to directly or indirectly, corruptly give, offer, or promise anything of value to any public official or person elected to any public office to influence an official act. It is clear that the message of the wire holds out an offer of financial assistance to those Members of this body and other candidates who are willing to take certain legislative actions. It raises serious questions of propriety either as a violation of the Federal statute or at the very least an attempt to improperly influence the Members of this body.

As chairman of the Democratic Congressional Campaign Committee and an individual Member of the House, I believe the Jarvis attempt to bribe public officials and pressure them into possible misconduct must be crushed. This can be accomplished by rejecting this offer of financial support or public endorsement and any other contribution which attaches similar illicit conditions. No candidate should ever fall victim to a threat of dire political consequences because he or she does not support specific legislation.

Public financial support and determination to maintain honest and ethical political action committees are shattered by the Jarvis effort to subvert funds for the purpose of bribery. It prostitutes the entire PAC system, and places a heavy cloud over the integrity of all political action committees.

## FOURTH CONGRESSIONAL DISTRICT STUDENTS OF INDIANA WELCOMED

(Mr. QUAYLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. QUAYLE. Mr. Speaker, it is my pleasure to welcome the second group of fourth congressional district students from Indiana to the House of Representatives. Mr. Speaker, these students were selected on a nonpartisan, competitive basis and I commend them for their success and enthusiasm.

The purpose of the program is to stimulate student interest in our Government. As the adage says "the youth of today are the leaders of tomorrow." These high school students are getting an inside look at Washington which may encourage them or their friends to seek public service at some juncture in their career.

The congressional student program is an annual event with the funding and operations of the program derived from a nonpartisan, not-for-profit organization.

The following list of students are this year's participants:

Jim Nolan, Leo High School.
Pamela Lynne Geiger, Bishop Dwenger High School.
Byron S. Collier, Elmhurst High School.
Mark E. Kiefer, South Side High School.
Deborah Reynolds, Fort Wayne Christian School.
Tony L. McCarrol, Wayne High School.
Gigi Salij, Paul Harding High School.
Larry Stoller, Woodlan High School.
Beth Bechler, Carroll High School.
Keith E. Schuman, Whitko High School.
Randall L. Stump, Churubusco High School.
Barry Eppley, Southwood High School.
Jennefer Kay Shockley, Huntington North High School.
Elizabeth Boone, Fremont High School.
Keith Howard, Hamilton High School.
Miriam Graham, Eastside High School.
Kelly Sue Odell, Lakeland High School.
Denise L. Smolek, Central Noble High School.
Amy Hartzler, West Noble High School.

Again, Mr. Speaker, it is my honor to welcome these students and insert for the RECORD their presence in the House this afternoon.

## PERMISSION TO FILE CONFERENCE REPORT ON H.R. 12934, DEPARTMENTS OF STATE, JUSTICE, COMMERCE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATIONS

Mr. SLACK. Mr. Speaker, I ask unanimous consent that the managers may have until midnight tonight, Tuesday, September 12, 1978, to file a conference report on the bill (H.R. 12934) making appropriations for the Departments of State, Justice, and Commerce, the Judiciary, and related agencies for the fiscal year ending September 30, 1979, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

## APPOINTMENT OF CONFEREES ON H.R. 12936, HUD APPROPRIATIONS

Mr. BOLAND. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 12936) making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1979, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts? The Chair hears none, and appoints the following conferees: Messrs. BOLAND, TRAXLER, BAUCUS, STOKES, and BEVILL, Mrs. BOGGS, and Messrs. BURLISON of Missouri, ALEXANDER, MAHON, COUGHLIN, MCDADE, YOUNG of Florida, and CEDERBERG.

## AMENDING ARMED FORCES ACT OF AUGUST 29, 1974

Mr. NICHOLS. Mr. Speaker, I ask unanimous consent to take from the

Speaker's table the Senate bill (S. 3454) to amend the Act of August 29, 1974 (88 Stat. 795; 10 U.S.C. 8202 note), relating to the authorized numbers for the grades of lieutenant colonel and colonel in the Air Force and to authorize the President to suspend certain provisions of law when he determines that the needs of the Armed Forces so require, and for other purposes, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

Mr. MITCHELL of New York. Mr. Speaker, reserving the right to object, I do so only to provide the chairman of the Subcommittee on Military Compensation, the gentleman from Alabama (Mr. NICHOLS) an opportunity to explain what we are attempting to do here.

The SPEAKER. May the Chair ask the gentleman from Alabama if he has cleared this with the leadership on both sides? The Chair has no knowledge of this bill being brought up.

Mr. NICHOLS. Mr. Speaker, it has been cleared with the leadership on both sides.

Mr. Speaker, will the gentleman from New York yield?

Mr. MITCHELL of New York. I yield to the gentleman from Alabama.

Mr. NICHOLS. Mr. Speaker, H.R. 5503—the Defense Officer Personnel Management Act (DOPMA)—passed earlier this year by the House will not be acted on by the Senate during this Congress. As a result of the National Emergencies Act of 1976, on September 14, 1978, certain powers and authorities of the President to act under a period of national emergency terminate.

Severe problems will arise if action is not taken to extend some of these authorities. Most of the required actions were included in the House-passed version of DOPMA. The Senate has taken the most urgent provisions and incorporated them in S. 3454.

A periodic problem that the Congress has faced in the past is the temporary extension of authority for the Air Force to exceed the grade limitations imposed under title 10, United States Code, section 8202. The Officer Grade Limitation Act of 1954 established ceilings on the number of Air Force lieutenant colonels and colonels significantly below their cohorts in the other services. This was done at that time recognizing that the Air Force was a young service and required fewer senior officers. Of course, as the Air Force matured, the Congress has passed temporary relief from these grade limitations. The current authority for temporary grade ceilings expires on September 30, 1978. DOPMA would have solved this problem permanently.

As a result of the National Emergencies Act of 1976 (Public Law 94-412), on September 14, 1978, certain powers and authorities of the President to act under a period of national emergency terminate. Severe problems will arise—particularly in the Navy—if action to extend some of these authorities is not taken. Most of the required actions were included in the House-passed version of DOPMA.

Those provisions that are affected by the National Emergencies Act are as follows:

A 2-year sea duty requirement for promotion of certain naval officers to lieutenant commander or above would be reinstated. Because of rotational problems, this requirement has been suspended since 1964. If the suspension is not continued, considerable personnel turbulence would be caused as the Navy attempts to order officers back to sea in order to qualify for promotion.

Below the zone selection for regular Navy and Marine Corps officers would be made inconsistent with the other services. Consistency has been maintained since 1970. If current authority is not extended approximately 20 limited duty officers would revert in grade, regular officers would have a 5 percent limitation placed on below the zone selection, and reserve officers would have no limitation.

Time in grade requirements for establishing promotion eligibility for Navy and Marine Corps officers would be reinstated. The requirements for different grades have been suspended beginning at various times since 1954. If current authority is not extended, promotion opportunity would be increased to fill the expected vacancies.

Spot promotion of Navy lieutenants serving in critical lieutenant commander engineering billets would be terminated. Approximately 140 officers would revert in grade if authority for these temporary promotions is not extended.

Membership on Marine Corps Major General Selection Boards would be restricted to require that each major general serve on the board every other year.

Members with less than 8 years of service would not be eligible for disability retirement unless the disability were incurred as a proximate result of the performance of active duty. Presently the disability system covers individuals if the disability is incurred in line of duty.

Recognizing that DOPMA would not be passed in this Congress, the Senate passed S. 3454, which would:

First. Extend the authorization—for 1 year—of an increase in the number of Air Force lieutenant colonels and colonels;

Second. Authorize the President to suspend the application of certain laws—currently suspended—through September 30, 1979, thereby maintaining current personnel practices for the military in these areas.

Third. Extend authority for 1 year to allow temporary promotions of certain junior officers, to allow below the zone promotion for Navy limited duty officers, and to allow temporary Marine Corps major generals to sit on the Major General Selection Boards.

Mr. MITCHELL of New York. Mr. Speaker, because all the provisions are simple 1-year extensions of existing law, and because there is nothing new in this legislation at all, and because of the urgency associated with the legislation and extreme disruptions which could take place if we delay action on this legislation, I support the provisions of the Senate bill and withdraw my reservation of objection.

Mr. ASHBROOK. Mr. Speaker, further reserving the right to object, I understand the need for the bill.

I just want the assurance from my colleague that there is nothing in the Senate bill that would not have been germane under the House rules.

Mr. MITCHELL of New York. I am sure there is not.

Mr. ASHBROOK. I thank the gentleman.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 3454

An Act to amend the Act of August 29, 1974 (88 Stat. 795; 10 U.S.C. 8202 note), relating to the authorized numbers for the grades of lieutenant colonel and colonel in the Air Force and to authorize the President to suspend certain provisions of law when he determines that the needs of the Armed Forces so require, and for other purposes

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the Act of August 29, 1974 (88 Stat. 795; 10 U.S.C. 8202 note), is amended by striking out "through September 30, 1978" and inserting in lieu thereof "through September 30, 1979".

SEC. 2. (a) For the period beginning on September 15, 1978, and ending on September 30, 1979, the President is authorized to suspend application of the following provisions of title 10, United States Code:

(1) Section 5707(c).

(2) Section 5751 (a), (b), and (e).

(3) Section 5770.

(b) No suspension invoked by the President under authority of subsection (a) shall be effective after September 30, 1979.

SEC. 3. Effective only for the period beginning September 15, 1978, and ending September 30, 1979—

(1) Section 1201(3) of title 10, United States Code, is amended as follows:

(A) striking out the word "or" at the end of subclause (B)(ii);

(B) striking out the period at the end of subclause (B)(iii) and inserting in lieu thereof a semicolon and the word "or"; and

(C) adding at the end of subclause (B) a new item as follows:

"(iv) the disability was incurred in line of duty during the period beginning on September 15, 1978, and ending on September 30, 1979, except that the condition provided for in this item shall not be effective during such period unless the President determines that such condition should be effective during such period and issues an Executive order to that effect.".

(2) Section 1203(4)(A) of such title is amended by—

(A) striking out the word "or" at the end of item (i);

(B) striking out the semicolon at the end of item (ii) and inserting in lieu thereof a comma and the following: "or (iii) incurred in line of duty during the period beginning on September 15, 1978, and ending on September 30, 1979, except that the condition provided for in this item shall not be effective during such period unless the President determines that such condition should be

effective during such period and issues an Executive order to that effect;".

(3) Section 1203(4)(C) of such title is amended by striking out "the proximate result of performing active duty nor incurred in line of duty in time of war or national emergency" and inserting in lieu thereof "(i) the proximate result of performing active duty, (ii) incurred in line of duty in time of war or national emergency, nor (iii) incurred in line of duty during the period beginning on September 15, 1978, and ending on September 30, 1979, except that the condition provided for in this item shall not be effective during such period unless the President determines that such condition should be effective during such period and issues an Executive order to that effect".

SEC. 4. (a) Chapter 545 of title 10, United States Code, is amended by inserting after section 5787c a new section as follows:

"§ 5787d. Navy lieutenants: temporary promotion

"(a) Line officers not restricted in the performance of duty in the grade of lieutenant, possessing skills in a critical shortage and serving in lieutenant commander billets requiring such skills, may be temporarily promoted to lieutenant commander under such regulations as the Secretary of the Navy may prescribe. Temporary appointment under this section shall be made by the President alone.

"(b) Temporary appointments under this section do not change the permanent, probationary, or acting status of members so appointed, prejudice them in regard to other promotions or appointments, or abridge their rights or benefits.

"(c) Temporary promotions under this section may be made only upon the recommendation of a board of officers convened for that purpose. In addition to recommending officers for promotion, a board so convened shall make the report required by section 6384 of this title.

"(d) Each temporary appointment under this section, unless expressly declined, is, without formal acceptance, regarded as accepted on the date made, and the member so appointed is entitled to the pay and allowances of the grade to which promoted from that date.

"(e) Temporary appointments under this section will terminate upon an officer's detachment from a qualifying billet so designated by the Secretary of the Navy. When an officer, whose name is on a promotion list as a result of selection to lieutenant commander other than under this section, is detached, an appointment will be issued to include the interim period between the subject officers' detachment from the qualifying billet and the date of promotion as a result of selection board action.

"(f) When his temporary appointment under this section is terminated or expires, each member of the naval service on active duty shall have the grade he would hold if he had not received any such appointment.

"(g) No appointments may be made under this section after September 30, 1979.".

(b) The table of sections at the beginning of chapter 545 of such title is amended by inserting

"5787d. Navy lieutenants: temporary promotion."

below

"5787c. Navy and Marine Corps, warrant officers: temporary promotion.".

SEC. 5. Section 5504(d) of title 10, United States Code, is amended by inserting "or 5787d" after "5787".

SEC. 6. (a) Section 5786(c) of title 10, United States Code, is amended by inserting "or 5787d" after "5787".

(b) Section 5791(a) of such title is amended by inserting "and 5787d" after "5787".

SEC. 7. Section 6325(b) of title 10, United States Code, is amended by inserting "or 5787d" after "5787".

SEC. 8. (a) Section 6384(a) of title 10, United States Code, is amended by inserting "and each board of officers convened under section 5787d" after "under chapter 543".

(b) Section 6385 of such title is amended by striking out "or 5787" and inserting in lieu thereof "5787, or 5787d".

(c) The catchline of such section is amended by striking out "and 5787" and inserting in lieu thereof "5787, or 5787d".

(d) The table of sections at the beginning of chapter 573 of such title is amended by striking out "and 5787" in the item relating to section 6385 and inserting in lieu thereof "5787, or 5787d".

SEC. 9. Section 905(h) of title 37, United States Code, is amended by inserting "or 5787d" after "5787".

SEC. 10. (a) Section 5703(a)(1) of title 10, United States Code, is amended to read as follows:

"(1) A board to recommend brigadier generals for promotion to the grade of major general, consisting of nine officers serving in the grade of major general or above.".

(b) The amendment made by subsection (a) shall be effective only for the period beginning on September 15, 1978, and ending on September 30, 1979.

SEC. 11. (a) Section 5787c of title 10, United States Code, is amended to read as follows:

"§ 5787c. Navy and Marine Corps; warrant officers and officers designated for limited duty; temporary promotion

"(a) Warrant officers may be temporarily promoted to higher warrant officer grades under such regulations as the Secretary of the Navy may prescribe.

"(b)(1) Officers designated for limited duty may be temporarily promoted to a higher grade under such regulations as the Secretary may prescribe.

"(2) No promotion may be made under this subsection under September 30, 1979.".

(b) The table of sections at the beginning of chapter 545 of such title is amended by striking out the item relating to section 5787c and inserting in lieu thereof

"5787c. Navy and Marine Corps; warrant officers and officers designated for limited duty; temporary promotion.".

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

## ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. Pursuant to the provisions of clause 3(b) of rule XXVII, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

After all motions to suspend the rules have been entertained and debated and after those motions, to be determined by "nonrecord" votes have been disposed of, the Chair will then put the question on each motion on which the further proceedings were postponed.

The Chair hopes that the Members will take into consideration that there are 14 primaries, that about 100 Members, including some from each side, are running, and that there are about 100 Members absent according to the latest quorum.

## RHODE ISLAND INDIAN LAND CLAIMS SETTLEMENTS

Mr. RONCALIO. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 12860) to settle Indian land claims within the State of Rhode Island and Providence Plantations, and for other purposes, as amended.

The Clerk read as follows:

H.R. 12860

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Rhode Island Indian Claims Settlement Act".

CONGRESSIONAL FINDINGS AND DECLARATION OF POLICY

SEC. 2. Congress finds and declares that—

(a) there are pending before the United States District Court for the District of Rhode Island two consolidated actions that involve Indian claims to certain public and private lands within the town of Charlestown, Rhode Island;

(b) the pendency of these lawsuits has resulted in severe economic hardships for the residents of the town of Charlestown by clouding the titles to much of the land in the town, including lands not involved in the lawsuits;

(c) the Congress shares with the State of Rhode Island and the parties to the lawsuits a desire to remove all clouds on titles resulting from such Indian land claims within the State of Rhode Island; and

(d) the parties to the lawsuits and others interested in the settlement of Indian land claims within the State of Rhode Island have executed a Settlement Agreement which requires implementing legislation by the Congress of the United States and the legislature of the State of Rhode Island.

DEFINITIONS

SEC. 3. For the purposes of this Act, the term—

(a) "Indian Corporation" means the Rhode Island nonbusiness corporation known as the "Narragansett Tribe of Indians";

(b) "land or natural resources" means any real property or natural resources, or any interest in or right involving any real property or natural resource, including but not limited to, minerals and mineral rights, timber and timber rights, water and water rights, and rights to hunt and fish;

(c) "lawsuits" means the action entitled "Narragansett Tribe of Indians v. Southern Rhode Island Land Development Co., et al., C.A. No. 75-0006 (D.R.I.)" and "Narragansett Tribe of Indians v. Rhode Island Director of Environmental Management, C.A. No. 75-0005 (D.R.I.)";

(d) "private settlement lands" means approximately nine hundred acres of privately held land outlined in red on the map marked "Exhibit A" attached to the Settlement Agreement that are to be acquired by the Secretary from certain private landowners pursuant to sections 5 and 8 of this Act;

(e) "public settlement lands" means the lands described in paragraph 2 of the Settlement Agreement that are to be conveyed by the State of Rhode Island to the State Corporation pursuant to legislation as described in section 7 of this Act;

(f) "settlement lands" means those lands defined in subsection (d) and (e) of this section;

(g) "Secretary" means the Secretary of the Interior;

(h) "settlement agreement" means the document entitled "Joint Memorandum of Understanding Concerning Settlement of the Rhode Island Indian Land Claims", executed as of February 28, 1978, by representatives of the State of Rhode Island, of the town of Charlestown, and of the parties to the law-

suits, as filed with the Secretary of the State of Rhode Island;

(i) "State Corporation" means the corporation created or to be created by legislation enacted by the State of Rhode Island as described in section 7 of this Act; and

(j) "transfer" includes but is not limited to any sale, grant, lease, allotment, partition, or conveyance, any transaction the purpose of which was to effect a sale, grant, lease, allotment, partition, or conveyance, or any event or events that resulted in a change of possession or control of land or natural resources.

RHODE ISLAND INDIAN CLAIMS SETTLEMENT FUND

SEC. 4. There is hereby established in the United States Treasury a fund to be known as the Rhode Island Indian Claims Settlement Fund into which $3,500,000 shall be deposited following the appropriation authorized by section 11 of this Act.

OPTION AGREEMENTS TO PURCHASE PRIVATE SETTLEMENT LANDS

SEC. 5. (a) The Secretary shall accept assignment of reasonable two-year option agreements negotiated by the Governor of the State of Rhode Island or his designee for the purchase of the private settlement lands: *Provided*, That the terms and conditions specified in such options are reasonable and that the total price for the acquisition of such lands, including reasonable costs of acquisition, will not exeed the amount specified in section 4. If the Secretary does not determine that any such option agreement is unreasonable within sixty days of its submission, the Secretary will be deemed to have accepted the assignment of the option.

(b) Payment for any option entered into pursuant to subsection (a) shall be in the amount of 5 per centum of the fair market value of the land or natural resources as of the date of the agreement and shall be paid from the fund established by section 4 of this Act.

(c) The total amount of the option fees paid pursuant to subsection (b) shall not exceed $175,000.

(d) The option fee for each option agreement shall be applied to the agreed purchase price in the agreement if the purchase of the defendant's land or natural resources is completed in accordance with the terms of the option agreement.

(e) The payment for each option may be retained by the party granting the option if the property transfer contemplated by the option agreement is not completed in accordance with the terms of the option agreement.

APPROVAL OF PRIOR TRANSFERS AND EXTINGUISHMENT OF CLAIMS AND ABORIGNAL TITLE INVOLVING THE NARRAGANSETT TRIBE AND THE TOWN OF CHARLESTOWN, RHODE ISLAND

SEC. 6. (a) If the Secretary finds that the State of Rhode Island has satisfied the conditions set forth in section 7 of this Act, he shall publish such findings in the Federal Register and upon such publication—

(1) any transfer of land or natural resources located anywhere within the United States from, by or on behalf of the Indian Corporation or any other entity presently or at any time in the past known as the Narragansett Tribe of Indians, or any predecessor or successor in interest, member or stockholder thereof, and any transfer of land or natural resources located anywhere within the town of Charlestown, Rhode Island, by, from, or on behalf of any Indian, Indian nation, or tribe of Indians, including but not limited to a transfer pursuant to any statute of any State, shall be deemed to have been made in accordance with the Constitution and all laws of the United States that are specifically applicable to transfers of land or natural resources from, by, or on behalf of any Indian, Indian nation or tribe of Indians (including but not limited to the Trade and Intercourse Act of 1790, Act of July 22, 1790, ch. 33, sec. 4, 1 Stat. 137, and all amendments thereto and all subsequent versions thereof), and Congress does hereby approve any such transfer effective as of the date of said transfer;

(2) to the extent that any transfer of land or natural resources described in subsection (a) may involve land or natural resources to which the Indian Corporation or any other entity presently or at any time in the past known as the Narragansett Tribe of Indians, or any predecessor or successor in interest, member or stockholder thereof, or any other Indian, Indian nation, or tribe of Indians, had aboriginal title, subsection (a) shall be regarded as an extinguishment of such aboriginal title as of the date of said transfer; and

(3) by virtue of the approval of a transfer of land or natural resources effected by this section, or an extinguishment of aboriginal title effected thereby, all claims against the United States, any State or subdivision thereof, or any other person or entity, by the Indian Corporation or any other entity presently or at any time in the past known as the Narragansett Tribe of Indians, or any predecessor or successor in interest, member or stockholder thereof, or any other Indian, Indian nation, or tribe of Indians, arising subsequent to the transfer and based upon any interest in or right involving such land or natural resources (including but not limited to claims for trespass damages or claims for use and occupancy) shall be regarded as extinguished as of the date of the transfer.

(b) Any Indian, Indian nation, or tribe of Indians (other than the Indian Corporation or any other entity presently or at any time in the past known as the Narragansett Tribe of Indians, or any predecessor or successor in interest, member or stockholder thereof) whose transfer of land or natural resources was approved or whose aboriginal title or claims were extinguished by subsection (a) of this section may, within a period of one hundred and eighty days after publication of the Secretary's findings pursuant to section 6, bring an action against the State Corporation in lieu of an action against any other person against whom a cause may have existed in the absence of this section. In any such action, the remedy shall be limited to a right of possession of the settlement lands.

FINDINGS BY THE SECRETARY

SEC. 7. Section 6 of this Act shall not take effect until the Secretary finds—

(a) that the State of Rhode Island has enacted legislation creating or authorizing the creation of a State chartered corporation satisfying the following criteria:

(1) the corporation shall be authorized to acquire, perpetually manage, and hold the settlement lands;

(2) the corporation shall be controlled by a board of directors, the majority of the members of which shall be selected by the Indian Corporation or its successor, and the remaining members of which shall be selected by the State of Rhode Island; and

(3) the corporation shall be authorized, after consultation wih appropriate State officials, to establish is own regulations concerning hunting and fishing on the settlement lands, which need not comply with regulations of the State of Rhode Island but which shall establish minimum standards for the safety of persons and protection of wildlife and fish stock; and

(b) that the State of Rhode Island has enacted legislation authorizing the conveyance to the State Corporation of land and natural resources that substantially conform to the public settlement lands as described in paragraph 2 of the Settlement Agreement.

PURCHASE AND TRANSFER OF PRIVATE SETTLEMENT LANDS

SEC. 8. (a) When the Secretary determines that the State Corporation described in section 7(a) has been created and will accept the settlement lands, the Secretary shall exercise within sixty days the options entered into pursuant to section 5 of this Act and assign the private settlement lands thereby purchased to the State Corporation.

(b) Any moneys remaining in the fund established by section 4 of this Act after the purchase described in subsection (a) shall be returned to the general Treasury of the United States.

(c) Upon the discharge of the Secretary's duties under sections 5, 6, 7, and 8 of this Act, the United States shall have no further duties or liabilities under the Act with respect to the Indian Corporation or its successor, the State Corporation, or the settlement lands; Provided, however, That if the Secretary subsequently acknowledges the existence of the Narragansett Tribe of Indians, then the settlement lands may not be sold, granted, or otherwise conveyed or leased to any one other than the Indian Corporation, and no such disposition of the settlement lands shall be of any validity in law or equity, unless the same is approved by the Secretary pursuant to regulations adopted by him for that purpose: Provided, however, That nothing in this Act shall affect or otherwise impair the ability of the State Corporation to grant or otherwise convey (including any involuntary conveyance by means of eminent domain or condemnation proceedings) any easement for public or private purposes pursuant to the laws of the State of Rhode Island.

APPLICABILITY OF STATE LAW

SEC. 9. Except as otherwise provided in this Act, the settlement lands shall be subject to the civil and criminal laws and jurisdiction of the State of Rhode Island.

FEDERAL BENEFITS PRESERVED

SEC. 10. Nothing contained in this Act or in any legislation enacted by the State of Rhode Island as described in section 7 of this Act shall affect or otherwise impair in any adverse manner any benefits received by the State of Rhode Island under the Federal Aid in Wildlife Restoration Act of September 2, 1937 (16 U.S.C. 669–669(i)), or the Federal Aid in Fish Restoration Act of August 9, 1950 (16 U.S.C. 777–777(k)).

AUTHORIZATION OF FUNDS

SEC. 11. There is hereby authorized to be appropriated $3,500,000 to carry out the purposes of this Act.

LIMITATION OF ACTIONS

SEC. 12. Notwithstanding any other provision of law, any action to contest the constitutionality of this Act shall be barred unless the complaint is filed within one hundred and eighty days of the date of enactment of this Act. Exclusive jurisdiction over any such action is hereby vested in the United States District Court for the District of Rhode Island.

APPROVAL OF PRIOR TRANSFERS AND EXTINGUISHMENT OF CLAIMS AND ABORIGINAL TITLE OUTSIDE THE TOWN OF CHARLESTOWN, RHODE ISLAND, AND INVOLVING OTHER INDIANS IN RHODE ISLAND

SEC. 13. (a) Except as provided in subsection (b)—

(1) any transfer of land or natural resources located anywhere within the State of Rhode Island outside the town of Charlestown from, by, or on behalf of any Indian, Indian nation, or tribe of Indians (other than transfers included in and approved by section 6 of this Act), including but not limited to a transfer pursuant to any statute of any State, shall be deemed to have been made in accordance with the Constitution and all laws of the United States that are specifically applicable to transfers of land or natural resources from, by, or on behalf of any Indian, Indian nation, or tribe of Indians (including but not limited to the Trade and Intercourse Act of 1970, Act of July 22, 1970 (ch. 33, 1 Stat. 137), and all amendments thereto and all subsequent versions thereof), and Congress

does hereby approve any such transfer effective as of the date of said transfer;

(2) to the extent that any transfer of land or natural resources described in paragraph (1) may involve land or natural resources to which such Indian, Indian nation, or tribe of Indians had aboriginal title, paragraph (1) shall be regarded as an extinguishment of such aboriginal title as of the date of said transfer; and

(3) by virtue of the approval of such transfers of land or natural resources effected by this subsection or an extinguishment of aboriginal title effected thereby, all claims against the United States, any State or subdivision thereof, or any other person or entity, by any such Indian, Indian nation, or tribe of Indians, arising subsequent to the transfer and based upon any interest in or rights involving such land or natural resources (including out not limited to claims for trespass damages or claims for use and occupancy), shall be regarded as extinguished as of the date of the transfer.

(b) This section shall not apply to any claim, right, or title of any Indian, Indian nation, or tribe of Indians that is asserted in an action commenced in a court of competent jurisdiction within one hundred and eighty days of the date enactment of this Act: *Provided*, That the plaintiff in any such action shall cause notice of the action to be served upon the Secretary and the Governor of the State of Rhode Island.

The SPEAKER. Is a second demanded?

Mr. LAGOMARSINO. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from Wyoming (Mr. RONCALIO) and the gentleman from California (Mr. LAGOMARSINO) will be recognized for 20 minutes each.

The Chair recognizes the gentleman from Wyoming (Mr. RONCALIO).

Mr. RONCALIO. Mr. Speaker, I yield myself as much time as I may consume.

Mr. Speaker, H.R. 12860 provides for the settlement of the Narragansett Indian claims to lands in the town of Charlestown, R.I. These claims are for possession of the lands and for monetary damages for trespass to such lands.

The claims are based upon alleged violation of the Indian Trade and Intercourse Act of 1790, as amended and supplemented, when the State of Rhode Island acquired these lands from the Indians in 1880. This act provides that any sale or conveyance of Indian-owned lands to any party other than the United States, without the consent of the United States, is null and void.

Before getting into details of the bill, let me make four points very clear.

One, this bill implements a settlement agreement involving the State of Rhode Island; the town of Charlestown; the individual non-Indian defendants; and the Indian tribe. As amended, the bill has the full support of the Rhode Island congressional delegation and the administration and the Senate has already passed a nearly identical bill.

Two, the administration has already determined that the legal claims of the tribe are credible and not at all frivolous.

Three, the State of Rhode Island is sharing in this settlement by contributing 900 acres of State-owned lands, which has been appraised at between $1,000,000 and $2,000,000.

Four, if this bill passes, it will cost the United States $3,500,000.

The bill provides for the creation of a State-chartered, Indian-controlled corporation to administer the land settlement. The State will transfer the 900 acres of State lands to this corporation.

The United States would appropriate $3,500,000 for the purpose of purchasing approximately 1,000 acres of private lands subject to the suit for transfer to the State corporation. The State corporation would administer the settlement lands primarily for conservation purposes.

In return for this settlement, the Narragansett Indian tribe would agree and the act provides that any and all claims they may have to lands or interests in lands in the town of Charlestown and in the rest of the State would be extinguished. In addition, the bill provides for the extinguishment of any claims any other Indian tribe or group may have to lands in the State of Rhode Island.

Mr. Speaker, I am pleased to bring this negotiated settlement to the House for legislative ratification and hope that it is a precursor of other settlements of like claims in other eastern States.

However, I would like to make this last general comment.

There has been a growing resentment and antagonism against the Indian tribes for asserting their claims to lands and other resources or rights. We have seen that resentment evident in the deliberations and debates in this House.

But these Indians are not asserting any rights or claims based upon their laws and in their courts. They are asserting claims and rights based upon the Constitution and laws of the United States in the courts of the United States. If we can act to deny them their right to pursue their claims under the laws of our Nation, and if we can close our courts to them, then it will not be long before our laws and our courts are set against any view which is unpopular in our eyes.

Mr. Speaker, the parties to this dispute have reached an amicable accord which requires legislative ratification by the Congress. This bill provides that ratification and I urge the passage of the bill.

Mr. Speaker, I assure my colleagues, including the gentleman from Washington, that this is not an Indian claim act or such. It is substantively a request for a congressional act putting a stamp of approval upon a negotiated settlement between three negotiating parties: First, the corporation or town of Charleston; second, the State of Rhode Island and its involvement; and third, the individual non-Indian defendants, and the Indians whose ancestors were in this group.

The lawsuit has been pursued since it was filed in May of 1963. As the litigation proceeded toward trial, negotiations began, and a settlement was arrived at then that could be speedily and amicably arranged. About 1,800 acres would be involved in the settlement of this claim.

First, the bill implements a settlement agreement involving these entities: the State of Rhode Island; the town of Charlestown; the individual non-Indian defendants; and the Indian tribe. As amended, the bill has the full support of the Rhode Island congressional delegation and the administration, and the Senate has already passed a nearly identical bill.

The administration has already determined that the legal claims of the tribe are credible and not at all frivolous.

The State of Rhode Island is sharing in this settlement by contributing 900 acres of land owned by the State of Rhode Island appraised at between $1 and $2 million in value.

If this bill passes, it will cost the United States $3.5 million.

The bill provides for the creation of a State-chartered, Indian-controlled corporation to administer this land settlement. The State will transfer the 900 acres of State lands to this corporation plus the 900 acres they would otherwise acquire.

This will cost the United States about $3,500,000. It will probably cost the United States of America that much anyway, either by judgment of a court of law or by this approval of the Congress.

In return for the settlement, the Narragansett Indian Tribe agrees to extinguish all claims on lands—and, Mr. Speaker, I must interrupt to say that I have not had a memory like this since World War II days. You know, I was an infantryman in World War II, and I began in North Africa. I can remember crawling around on my belly with my rifle, and once in a while I could catch a German helmet in my gunsight, running around from place to place and then it would duck and I would put my rifle down again, and I can recall those times in World War II as I see the gentleman from Washington (Mr. CUNNINGHAM), and the gentleman from Maine (Mr. COHEN), heads up, staring at me, I am reminded of my days in World War II.

But, Mr. Speaker, to get back, in return for this bill we have an amicable settlement of the claims. I believe I could not more strongly recommend the passage of the simple piece of legislation for the approval of this settlement as a most wise and appropriate act of this Congress.

It is inconceivable to me to find anybody who may object to this, the above named Members excepted.

Now I will yield to the two gentlemen.

Mr. COHEN. Mr. Speaker, if the gentleman will yield, I wonder if the gentleman would like to clarify his statement that he feels as if he were emerging from the trenches in World War II in looking at the gentleman from Maine, I was not sure exactly what the import of that statement was.

Mr. RONCALIO. The fact that I have had such great success in handling Indian legislation recently, and for Hawaiian natives just last week, I feel much like a soldier who has been fired at.

Mr. CUNNINGHAM. Mr. Speaker, if the gentleman will yield, and I appreciate the gentleman yielding, I would like to assure my colleague, the gentleman from Maine (Mr. COHEN), that I am sure the gentleman in the well in his

remarks meant that it was nice to see a friendly face.

So, if the gentleman will yield further for the purpose of a question, I understand from the report that the specifics of the claims have really not been adjudicated and no one has made a determination stating that there is a claim or not; is that correct?

Mr. RONCALIO. I do not believe it is correct. I believe the specifics of the claims have been negotiated and the claim has been found not to be frivolous.

Mr. CUNNINGHAM. Mr. Speaker, if the gentleman will yield still further.

Mr. RONCALIO. I yield further.

Mr. BEARD of Rhode Island. Mr. Speaker, will the gentleman yield?

Mr. CUNNINGHAM. The gentleman in the well has control of the time.

Mr. RONCALIO. I yield to the gentleman from Rhode Island.

Mr. BEARD of Rhode Island. Mr. Speaker, if the gentleman will yield to me so that I might answer the question directly, since I come from the State of Rhode Island, the Department of Interior has reviewed the entire claim, and they say it is correct and accurate.

Mr. CUNNINGHAM. If the gentleman in the well would yield still further, it is my understanding that this arises from the threat of a suit but that the suit has not been resolved, is that correct?

Mr. RONCALIO. It has been filed, there may be a threat of a judgment, but it has not proceeded to judgment, a final appealable order.

Mr. CUNNINGHAM. If the gentleman will yield further, it is my understanding that this bill originally said, as proposed by the administration, when advised about this compromise worked out by the State of Maine, that the Secretary would not pay this until he had made a determination. My understanding is that section has been deleted, is that correct?

Mr. RONCALIO. That is correct.

Mr. CUNNINGHAM. So what I am really saying, if the gentleman would yield further, is that the State of Maine, in recognizing that there is——

Mr. RONCALIO. The State of Rhode Island, not the State of Maine.

Mr. CUNNINGHAM. I stand corrected, these are concerns of the State of Rhode Island.

Mr. RONCALIO. The gentleman has to go south a little bit in New England.

Mr. CUNNINGHAM. The State of Rhode Island, in trying to respond to a suit that was filed, but not yet adjudicated in this case, has proposed that the State of Rhode Island resolve the suit through settlement in which the State is giving approximately $2½ million worth of land, 1,000 acres, is that correct?

Mr. RONCALIO. Plus 900 acres.

Mr. CUNNINGHAM. And they have volunteered the Federal Government to cough up $3½ million and therefore the suit can be settled out of court, is that correct?

Mr. RONCALIO. That is a pretty rough, roughly, roughly. The $3½ million goes towards purchasing additional land, you have about a 1,800 acre tract which will be acceptable by the parties involved in lieu of the 3,200 acres that they asked for originally.

Mr. CUNNINGHAM. Mr. Speaker, if the gentleman will yield further, by concern is whether we are volunteering to get involved before we have been properly and legally mandated to be involved, and we have other similar claims in other States, such as Massachusetts and Maine, to be specific, on virtually the same issue.

I wonder whether the gentleman would care to comment as to whether he feels that we are setting a precedent.

Mr. RONCALIO. Precedential legislation? I do not think we are setting a precedent as such. But the Congress has put its stamp of approval upon settlements of complaints in virtually every year of its 200-year existence, so to the extent that we are being used as a final arbiter between citizens, the answer is not, it is not precedential.

I hope that it is precedential, if it will lead toward amicable settlements of disputes and put them to rest. I would assume that the gentleman from Washington (Mr. CUNNINGHAM) would join me in that hope.

Mr. CUNNINGHAM. I agree with the gentleman in the well that settlements are always advantageous, but I would hope, from the point of legislative intent and for legislative history, that we are not suggesting the U.S. Congress is going to take taxpayers' dollars and get involved in settlements that have yet to go the full legal course, as part of our Constitution says they will do.

Mr. RONCALIO. Let me answer that twofold.

I practiced law for much of my adult life. If I can make a fair albiet poor settlement, I would rather do it any day for my client than to win a good case in court. My client would be better off money-wise, and in spirit with that kind of disposition of his case. That has been proven; it is irrefutable.

If we are going to settle this claim by acquiring 900 acres of land today for $3.5 million, I believe history will show that we are much wiser than to wait until a judgment issues and then we try to buy the land for that $3.5 million.

I have just been through 10 years of watching land acquisitions for national parks; and every time we wait a few years, we pay that much more. It is tremendous in its exponential growth of costs of land.

The town of Charlestown, R.I., has an interest in these lands; and if the Indians involved have come to a negotiated settlement, and if the court feels that that terminates the litigation, I do not think it would be in order for any of us to vote against this type of settlement. The stamp of approval of Congress is necessary.

Mr. CUNNINGHAM. If the gentleman will yield further, one of the things which concerns me is that I understand that some of the litigants we have today are third-and fourth-generation persons. In the future they could question the legal authority of their ancestors to enter into these claim settlements, and I certainly wonder whether in this case, without going the full legal course, we are leaving that possible door ajar again.

With that, Mr. Speaker, I thank the gentleman for yielding very much.

Mr. MARLENEE. Mr. Speaker, will the gentleman yield?

Mr. RONCALIO. I yield to the gentleman from Montana.

Mr. MARLENEE. Mr. Speaker, I certainly compliment the gentleman from Wyoming (Mr. RONCALIO) on the amount of work that has been gotten out of that subcommittee this year.

In the gentleman's opening statement he said that this was merely a stamp of approval on a negotiated settlement. Is it the gentleman's opinion that this will not set a precedent and not be used as a case history in settling other land or territorial claims by these Indians?

Mr. RONCALIO. I would be happy to respond. Insofar as the use of an act of Congress as a means of stamp of approval of pending negotiated settlements is concerned, it is not a precedent; in the fact that it is used now on a particular Indian claim, that may be a precedent. I hope it will be a precedent if it means that a good settlement of a claim will resolve these disputes once and forever, rather than dragging claims out interminably in courts of law, and rather than seeing them almost paralyze the cities of an area by clouding land titles, and rather than seeing title company people put out of business. I would much rather see a good precedent set. That is my answer.

Mr. MARLENEE. However, each case would be studied on its own merits; is that correct?

Mr. RONCALIO. Of course, just as any other case is considered on a new set of facts.

Mr. MARLENEE. Mr. Speaker, I thank the gentleman.

Mr. RONCALIO. Mr. Speaker, I yield such time as he may consume to the gentleman from Rhode Island (Mr. BEARD).

Mr. BEARD of Rhode Island. Mr. Speaker, it has been mentioned today that there are approximately 100 Members of the House missing because of the various elections across the Nation. I also have a primary in Rhode Island, but I consider this to be extremely important—extremely important legislation for the State of Rhode Island. First of all, we are the smallest State in the union. We are approximately 50 miles in length and about 30 miles in width. It is a very small State. This legislation affects a good portion of the southern part of the State of Rhode Island. We are not trying to set a precedent for other States. What we are trying to do is unscramble problems since 1790 in the State of Rhode Island.

We have a bipartisan agreement on this. Senator CHAFEE, a Republican Senator from Rhode Island, supported it in the U.S. Senate. Senator CLAIBORNE PELL has supported it. The gentleman from Rhode Island of this Chamber, Mr. ST GERMAIN, has supported this legislation. We have support from the Narragansett Indians. We have support from the residents who cannot sell their land or buy land in such a dilemma in the Charlestown area. We have support of the Gov-

ernor of the State of Rhode Island in this. We have support of the Republican and Democrat members of the General Assembly in Rhode Island. We have support of the administration. I know very few people who openly really oppose this particular bill. It is important. It is 1800 acres.

We are asking the Federal Government to put the stamp of approval on what has already been approved out of court. The parties have agreed in Rhode Island. They have agreed that this is right. If I have ever been bugged in the 4 years that I have been in Congress with telephone calls, it has been on this legislation. I can report to the Members that we have a tremendous amount of cooperation from every segment of Rhode Island in support of this legislation.

They are waiting to hear from me when this vote takes place because of its importance to the State of Rhode Island.

It has not been too often in the 4 years that I have taken the floor, and I have never had too many opportunities, to really speak on one piece of legislation for the smallest State of the Union. But today I am here fighting for an awful lot of people back home who need the Members' cooperation and their support.

As I said in the beginning, we are not setting a precedent. Every State, every situation is different, but please remember our dilemma. Please remember the size of our State, and please remember that all parties have agreed.

Mr. Speaker, I yield back the remainder of my time.

Mr. LAGOMARSINO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, in the absence of the gentleman from Colorado (Mr. JOHNSON) who is the ranking member of the Subcommittee on Indian Affairs and Public Lands, who is in strong support of this legislation, I rise in support of H.R. 12860 which provides for settlement of the claims of the Narragansett Indian Tribe against the State of Rhode Island and other parties. The claims of the tribe arise from alleged violations of the Trade and Intercourse Act of 1790 occurring in 1880 when the State of Rhode Island allowed illegal transfer of tribal lands. This bill provides the mechanism whereby those claims will be extinguished, thereby relieving the cloud which hangs over the titles to the acreage involved. The lawsuits which claim some 3,200 acres of land as being in violation and, therefore, subject to the rights of the Indians were consolidated into a single action. And I think this is a very important point. The tribe won a favorable ruling on a preliminary motion to strike certain defenses raised by the State. To paraphrase, perhaps, what my colleague, the gentleman from Wyoming (Mr. RONCALIO) has pointed out, in the practice of law it is often said—and this was one of the first things I was told when I started practicing law; I did not necessarily always follow it, sometimes to my regret—that a poor settlement is better than a good lawsuit for both sides. I think that this bill, which as has already been pointed out, provides for a total transfer of 1,800 acres to the Narragansett Tribe, 900 owned by the State and 900 by private owners is a good one. The Federal Government, in the interest of promoting an equitable settlement of Indian claims, and to assist in the restoration of economic vitality to the local community—which I understand is in dire straits as a result of this claim—will contribute $3.5 million for the purchase of private lands, and the State will contribute the 900 acres that it owns free across-the-board with no claim or no compensation at all.

All claims of the Narragansett Tribe will be extinguished. As has already been pointed out by the gentleman from Rhode Island, the agreement has the support of all interested parties, including the Federal Government, the State, the tribe, and private parties.

The Rhode Island delegation supports the bill and I believe it will provide an excellent model, if not a precedent, for future and fair settlement of claims under the Trade and Intercourse Act. I think the Federal Government does have a moral, if not a legal obligation here, because the Federal Government was involved, as I understand, in the ratification of the land transfers that gave rise to this claim that is now before us.

Mr. Speaker, I urge my colleagues to vote for the bill, H.R. 12860.

Mr. RONCALIO. Mr. Speaker, I yield 2 minutes to my friend, the gentleman from Washington (Mr. MEEDS), who will be taking leave of these Chambers in a few months.

Mr. MEEDS. Mr. Speaker, I thank the gentleman from Wyoming for yielding this time.

Mr. Speaker, I am not as familiar with the Narragansett claim as I would like to be. I do not know all the facts of this aboriginal claim, but I do know some things.

First of all, I know that I might not even agree with the original claim. I have some substantial disagreement with a lot of the claims that have been made in the Northeast under the Nonintercourse Act. I will not go into the details of that disagreement, but I do want the House to know in the final aspect I might not even agree with the Narragansett claim. But I do know the Narragansett claim has clouded title on substantial acres of Rhode Island land and townships, particularly in one town which has been under clouded title for some time. They have been unable to convey their land and it has caused a very substantial problem.

I know, second, that the Narragansetts have won a very important preliminary legal skirmish, when they won some very crucial motions on this; so at this time, as a lawyer, I would have to say they have the better side of this lawsuit, at least at this time.

I know, third, that this settlement before us will be shared equally by the Federal Government, which is putting up money to secure 900 acres and the State of Rhode Island is going to provide 900 acres. It is an equally shared settlement, and if there was fault under the Nonintercourse Act, it should be borne equally by the State and by the Federal Government.

The SPEAKER. The time of the gentleman from Washington has expired.

Mr. RONCALIO. Mr. Speaker, I yield 1 additional minute to the gentleman from Washington (Mr. MEEDS).

Mr. MEEDS. Mr. Speaker, I know, fourth, and most importantly, that this agreement has been agreed upon by everyone in a position of authority in the State of Rhode Island, by everyone in a position of authority representing the State of Rhode Island in the Congress, by the administration, by this subcommittee and, indeed, everyone who has dealt with this in any substantial regard has agreed to this settlement.

Now, while I do not know all about the claim, I know that if that set of facts were presented to me as a Member, knowing a lot about some claims in the State of Washington, and if there were a settlement that was agreed upon by all the parties, as this has been agreed upon, I would think it would be a good resolution of the problem. I hope this bill passes.

Mr. LAGOMARSINO. Mr. Speaker, I yield 5 minutes to the gentleman from Maine (Mr. COHEN).

Mr. COHEN. Mr. Speaker, first, I would like to indicate to the chairman of the subcommittee of the Committee on the Interior and Insular Affairs that I would hope that while over the years we have served in Congress together, while we may not always have been on the same side, we have been adversaries on an intellectual basis only and certainly I took the gentleman's comments in jest when the gentleman suggested that the gentleman felt that he was popping his head out of a trench in World War II looking at an enemy across the line.

The gentleman and I have had many occasions to engage in debate, and we have always done so in a very positive and constructive spirit.

So by taking this position today, I hope I can convey the sincerity with which I am going to reluctantly oppose this particular measure. I do so on two counts.

First, as has been pointed out, there are over 100 Members missing from this body today. I do so on the basis that we are bringing up a matter of this magnitude under suspension, which normally is reserved for noncontroversial matters.

I also point out to my good friend, the gentleman from Rhode Island (Mr. BEARD), that he said we are trying to unravel the problems going all the way back to 1790, and here we are trying to resolve an issue that has been with us since 1790 on a primary day, under suspension, with approximately 100 Members missing. We are doing this under a procedure which is normally reserved for noncontroversial matters.

Mr. BEARD of Rhode Island. Mr. Speaker, will the gentleman yield?

Mr. COHEN. I will yield to the gentleman when I finish.

Mr. Speaker, the second point on which I object is the basis on which we ought to be considering these claims under the Nonintercourse Act. They should be considered on a comprehensive rather than

a piecemeal basis. As pointed out when the question was asked by the gentleman from Washington (Mr. CUNNINGHAM), the question is whether or not this is going to set a precedent.

I would note that the committee report points out this bill is the first legislation submitted in Congress to resolve Indian land claims under the 1790 Nonintercourse Act, and it will serve as a landmark for the resolution of other land claims by the Eastern tribes under the 1790 act.

It has been pointed out previously that these are a number of cases pending. It is my understanding, as a matter of fact, that there are at least 10 States that now have similar claims pending. Rhode Island is one. Other States are Florida, Louisiana, my own State of Maine, Massachusetts, Nevada, New York, Oklahoma, and South Carolina, as well as Rhode Island. They all have similar claims or at least they have an issue involving a similar statute as the Nonintercourse Act of 1790.

I would also question the statement that it is always better to settle out of court under any circumstances rather than going through to full litigation in a matter of this magnitude. I would point out, for example, that that certainly did not apply to the State of Massachusetts, which has endured a similar type of difficulty over the past year or so. The matter to which I refer has gone to suit, and serious financial harm has been caused to the town of Mashpee. Yet they went to court and were successful in court.

Under this particular settlement arrangement, if it is going to serve as a landmark. I would like to call the attention of my colleagues to exactly what is involved here, because this is the way it works out: Perhaps my mathematics is wrong, but it works out to a payment of about $4,000 an acre for the purchase of that land.

In the State of Maine we have an issue that will be coming up, if not in this session, surely in the next session, that encompasses two-thirds of the land area in the State of Maine, some 12 million acres of land. Certainly if we apply the figure of $4,000 an acre, we can see how much would be involved for the Federal Treasury if we would settle on a similar basis even assuming the claims were confined to 500,000 acres of land.

That brings me to the point about this being a model for other States to follow. Here we have a 50–50 settlement basis, one-half by the State and one-half by the Federal Government. Let me tell the Members what has happened as far as settlement goes in the State of Maine.

The White House Task Force has recommended a settlement to resolve the issue currently before the State of Maine by extinguishing the claim of two tribes to all privately owned land in exchange for a payment of $25 million by the Federal Government. This would result in extinguishing claims to the people who own land under 50,000 acres. For all those who own over 50,000 acres, they would have the following voluntary option:

They would have the option of selling to the Federal Government 300,000 acres of their land, not at $4,000 an acre but at $5 an acre. That is the White House proposal to the State of Maine, to take the large landowners of the State of Maine and give them an option of divesting themselves of 300,000 acres at $5 an acre.

The SPEAKER pro tempore (Mr. SISK). The time of the gentleman from Maine (Mr. COHEN) has expired.

Mr. LAGOMARSINO. Mr. Speaker, I yield 4 additional minutes to the gentleman from Maine (Mr. COHEN).

Mr. COHEN. Mr. Speaker, those landowners, of course, would have an option of giving up another 200,000 acres at the fair market value. The State of Maine would either have to contribute $25.5 million over a 15-year period or be sued for all its holdings, and the private landowners who refused to settle under the White House's proposed plan would then be subject to suit for all 3 million acres of their holdings.

So we can seen that it is not always the most desirable thing to settle under any circumstances in order to avoid litigation.

The basic point I would make here is that I understand the issue and I am totally sensitive to what Rhode Island has been enduring, because indeed the one factor that is involved is that it does place a cloud on the title of real estate. It prohibits the purchase of homes and the sale of homes, and it has an effect upon the bond markets of local and State governments. I am certainly sensitive to that issue as far as Rhode Island is concerned.

The course on which we are embarking today is going to set a precedent which I believe we will come to regret. I would only hope that we would reject setting that precedent under a procedure which is ordinarily classified as noncontroversial. We would in fact be setting a landmark or a precedent for the other 10 States involved to follow and which I think will prove to be quite costly.

Mr. BEARD of Rhode Island. Mr. Speaker, will the gentleman yield?

Mr. COHEN. I yield to the gentleman from Rhode Island.

Mr. BEARD of Rhode Island. I thank the gentleman for yielding.

When I first arrived in Congress I was embarrassed to find out that when I looked at the weather map that they did not even have Rhode Island on the weather map. I had to call the Weather Bureau. In speaking for all of us in the State, all we are saying to the strangers, all of you on the outside of the State of Rhode Island, is that you give us an equitable decision for Rhode Island, for all of the parties. We are just asking to resolve this thing on a proper basis or we are in serious trouble.

Mr. COHEN. Let me just respond to my colleague, the gentleman from Rhode Island, that, as I indicated, I am truly sensitive to the economic pressure under which the State of Rhode Island has been operating. I see my colleague from Massachusetts, who has been laboring under a similar problem in his State. What I am suggesting today is that there are a number of other States who are going to be under similar threats of lawsuits or the actual filing of lawsuits, which will cause havoc with their economic climate, much as has occurred in the gentleman's own State. What I am suggesting is that, rather than handling these particular claims on a piecemeal basis, the Congress does have the responsibility of resolving the disputes surrounding the applicability of the 1790 Nonintercourse Act. It is my belief, based on extensive research, that this act was never designed to apply to eastern States. I have suggested one way, perhaps, of resolving all of these claims, and that would be to allow a direct suit to the Supreme Court, and if we had a ruling by the Court perhaps these matters could be settled on a compromise or a settlement basis. But to take these cases one by one and say that these should be settled out of court or to say that this is a landmark settled on a 50–50 basis, we are committing ourselves to a course that in the years ahead we will regret.

For these reasons, I would urge the Members to reject this measure.

Mr. RONCALIO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like to use the remainder of my time to make a few statements in rebuttal to the statements made by my dear friend and colleague, the gentleman from Maine.

First of all, it is a noncontroversial matter, compared to the many things that we labor with here week after week in the House of Representatives. If we allow 20 minutes of debate on each side in a matter involving 9 million acres and millions of dollars, then we ought to be spending 6 months on legislation such as the appropriations bill passed last week. We vote to spend trillions of dollars in this body, and I believe it is not inappropriate that we spend only a few minutes on this matter. In my opinion, it is fair to make the observation that if the other 10 claims similarly passed can be settled as readily, and as easily, and as amicably to the local economy and to the well-being of all the people, as this matter is being asked to be settled, then we are indeed a fortunate nation to be able to so resolve our Indian disputes.

There may be a precedent value in it, but it is not on all fours with every other similar dispute. Obviously, a State as small as Rhode Island is unique, as compared to a large State like Wyoming or like a State such as Alaska. I think each case has to be settled on its own merits, but I think in order to have balance you have to have something that is just and equitable.

I think this is a good case which can be solved with a comparable contribution from the State and the Federal Government, and that seems to be the best way to do it.

Mr. COHEN. Mr. Speaker, will the gentleman yield?

Mr. RONCALIO. I yield to the gentleman from Maine.

Mr. COHEN. Mr. Speaker, once again the gentleman has slipped into the use of wartime jargon. I submit, by referring to the troops over here on this side. I would have the gentleman take note that I have indeed supported a number of

claims during the past few years, and have not rejected each and every one out of any sense of arbitrariness or lack of understanding of the issues.

But, I would ask the gentleman from Wyoming as to whether or not, if we should settle these other cases, if we could do so on the same or comparable basis, would he support the allocation of $4,000 per acre on the settlement of the Maine case?

Mr. RONCALIO. No, I do not know enough about the relative values of land, in the two States and I do not know enough about the relative merits in each case.

Mr. LAGOMARSINO. Mr. Speaker, I yield 5 minutes to the gentleman from Washington (Mr. CUNNINGHAM).

Mr. CUNNINGHAM. Mr. Speaker, I thank the gentleman for yielding. I sympathize with my colleague from Rhode Island and know of his desire to try to resolve this particular problem. I appreciate the position of the gentleman from Wyoming, but I must agree with my colleague from Maine that we should recognize that we have this specific problem in 10 other States, and we are wrong to go about it in a piecemeal fashion.

In the State of Washington we have many problems, as the Members have heard before, arising from judicial interpretations, but at least we have gone to the courts. I would strongly suggest that this should go to the courts, and we should not preempt the judicial solution that is a constitutional guarantee to all of us. Admittedly, Rhode Island has gone ahead and has made a settlement. Fine. Let them settle it. They can settle this whole thing without involving us one iota.

Mr. RONCALIO. Mr. Speaker, will the gentleman yield?

Mr. CUNNINGHAM. I yield to the gentleman with Wyoming.

Mr. RONCALIO. That is precisely the point. If the courts could settle it without congressional approval, it would be done. But Congress—the United States—is the guardian of the Indians, and they are our wards. There is no way to settle without the approval of the U.S. Congress. That is why we are here, so the argument of the gentleman falls.

Mr. CUNNINGHAM. Would the gentleman respond to this question: Is it our stamp of approval or our 3.5 million taxpayer dollars that they really need?

Mr. RONCALIO. I think they need the approval of the Congress to the specifics of their settlement.

Mr. CUNNINGHAM. Then why was this bill not brought up so that we could strike the appropriation, so that it could be amended and delete the $3.5 million?

Mr. RONCALIO. We did request a rule. We cannot do everything perfectly in this committee; you know that. We are like the gentleman on his side; we do the best we can.

Mr. CUNNINGHAM. I agree with the gentleman that we do not do everything perfectly, but at the same time my colleague should understand that using these dollars, if the solution in Maine is arrived at in similar fashion, the taxpayers of the United States—using these figures on the 50–50 participation—stand to have a liability of $25 billion.

Mr. BEARD of Rhode Island. Mr. Speaker, will the gentleman yield?

Mr. CUNNINGHAM. I yield to the gentleman from Rhode Island.

Mr. BEARD of Rhode Island. Mr. Speaker, would it not be a lot better, what we are trying to do here is, we are trying to spend some money, some Federal dollars to help a State on something that we have all agreed on. There are a lot of arguments every week here. For instance, when we talk about foreign aid to foreign countries. We are talking about a very small State, an individual situation, and I do not think it is too much to ask because it is something the Federal Government missed the boat on many, many years ago. That is why we are in this dilemma today.

Mr. CUNNINGHAM. I appreciate the gentleman's comments and charges, but frankly, coming from the State of Washington, I would rather work with my colleagues and others who have similar problems to reach a universal and fair solution rather than this piecemeal approach.

Mr. RONCALIO. I would wish the gentleman well and hope that he could achieve a universal and correct solution for all Indian claims, but that is almost an impossibility.

For half a moment, let me correct the gentleman's main analogy. Maine would not come down to $25 billion in cost. This administration offered $25 million (not billion), and the Indians were willing to accept that for the Federal portion of the Maine dispute, but the negotiations were derailed. That is a vast difference. I do not think we can take the gentleman's argument and measure with that yardstick the other 10 cases. Each case must be reviewed on its own unique merits and differing facts.

Mr. CUNNINGHAM. I appreciate the gentleman's viewpoint, but just mathematically, price times acreage times 50 percent does come out to that figure.

Mr. LAGOMARSINO. Mr. Speaker, I yield 1 minute to the chairman of the committee, the gentleman from Arizona (Mr. UDALL).

Mr. UDALL. Mr. Speaker, H.R. 12860 is a legislative ratification of a negotiated settlement of the land claims of the Narragansett Tribe of Indians against the State of Rhode Island and several private landholders in the town of Charleston, R.I.

As many of the Members know, there are several of these kinds of land claims by Indian tribes along the eastern seaboard. These claims relate to the transfer of tribal lands to various eastern States under conditions alleged to be in violation of the Indian Trade and Intercourse Act of 1790. This act and its later versions prohibit such conveyances without the consent of the United States. Where transfers of lands have been made by Indian tribes to States or other parties without the consent of the United States, the conveyances are null and void and the underlying title of the Indians is unaffected.

The various claims which have been filed by Indian tribes seek possession of the lands and damages for past trespasses to the land.

Mr. Speaker, it is difficult to assess the validity of these claims. Ultimately, that is a matter for the courts. We do know that, in some of the cases including the Narragansett claim, the administration has determined the claims to be legally credible.

We also know that, while these claims may be ancient and the existing land titles of longstanding duration, the Indians have a clear legal right to pursue their claims under our laws and in our courts.

Finally, we know that because of alleged violation of a Federal law by the States in the early 19th century, the land titles, the economy, and the society in the communities subject to these claims have been severely disrupted and isolated cases of extreme hardship have resulted.

It is clear that the United States has no legal liability to the States or the non-Indian defendants because of these claims. However, since the United States did not act to prevent the alleged illegal transfers or to ratify the transfers contemporaneous with the conveyances, some moral responsibility attaches to the United States to prevent undue hardship.

In addition, if these land titles are ever to be fully clear, Congress, under the law, must act.

It is with this background that we bring this legislation to the House for approval. The parties have negotiated a settlement, with each one giving up a part of its claims or defense as a contribution to the settlement.

The State is contributing 900 acres of State lands.

The private parties have agreed to sell some of their lands to the Indians by way of compromise.

The tribe has agreed to drop its suit and have its title extinguished in return for the settlement lands which will be administered by them primarily for conservation purposes.

The contribution of the United States, which is supported by all the parties and by the administration, is the amount of $3,500,000 to be used to purchase the private held lands for the benefit of the Indian party.

Mr. Speaker, I urge the Members to vote for passage of this bill.

Mr. LAGOMARSINO. Mr. Speaker, I would like to add a few more words in closing.

I think it would be very nice too if we could have a comprehensive settlement of all Indian claims, but I do not think that is a very practical thing to aspire to at this time. Look how long it has taken us to get to the base of a settlement of a relatively simple claim like this where all parties agree. But how much longer will it take when the properties are different and the claims are different and the interests of the people involved are different? It seems to me in this case, where

the administration recognizes that the Indians do have a credible claim and the court has recognized that by its ruling on the motion that was made, and where all the parties as in this case can agree, it behooves the Federal Government to go along and assist in settling this matter.

If we drag it out I think the Federal Government is going to be not only responsible for a lot of economic chaos in Rhode Island but also we may be ultimately responsible for a lot more money that might be required to settle this.

Mr. COHEN. Mr. Speaker, if the gentleman will yield, I would like to point out that in some of the other cases the land is different and the facts are different and the claims are different and therefore this has no precedential value, in the gentleman's opinion, does it?

Mr. LAGOMARSINO. I think where all parties agree and the Federal Government agrees there is a valid claim and where perhaps the courts have made an initial determination, that is a pretty good pattern to follow. I agree it is not a precedent for all.

Mr. COHEN. But the fact that there is an initial court ruling that indicates the claim is not frivolous does not mean that it is a valid claim. What it means is there is a justiciable issue. but it does not mean they have a valid claim, which may be one reason why we might want to refer there matters to the Court of Claims for a judicial review of the merits and therefore perhaps an award of monetary value for the claims may be made eventually.

● Mr. ST GERMAIN. Mr. Speaker, I rise in support of this legislation, which I have cosponsored. It is intended to settle once and for all the claims of aboriginal title being asserted by the Narragansett Indians to lands in the town of Charles Town on the grounds that past transfers of those lands were made in violation of the Nonintercourse Act.

The bill is drawn against the background of an agreement reached by the State of Rhode Island, the southern Rhode Island Land Development Co. and the Narragansett Indians at the culmination of a 3-year dispute. Under this agreement the State of Rhode Island must contribute approximately 900 acres of land to a State-chartered corporation to be established to hold the land in trust. In addition, the agreement calls for the acquisition of an additional 900 acres of land from private owners who are willing to sell their lands at the fair market value.

The funding for this additional 900 acres is to be provided by the Federal Treasury. The bill before us today performs this function. It authorizes the payment of $3.5 million to the State chartered corporation for the purpose of purchasing property from private landowners who are willing to sell their lands. If enacted, this legislation would effectively implement the settlement reached by all parties involved.

Mr. Speaker, I have mentioned that this legislation is intended to aid in resolving a dispute which is 3 years old. Throughout these 3 years this dispute has brought economic hardship not only to those parties directly involved, but to all of the citizens of the town. It has created a cloud on the validity of the real property titles of those directly involved, resulting in their inability to sell, mortgage, or develop their lands. Likewise, due to the fear that subsequent claims on the other land in Charles Town might be asserted by the Narragansett tribe, citizens who are not directly involved in the present dispute find that the titles to their lands are also clouded. The result has been economic stagnation for the entire town. This unfortunate situation will continue for some time unless this legislation is enacted.

The bill was drafted with the help of the White House, the Interior Department, and the appropriate committee counsels in both the House and Senate. It will eliminate the uncertainty which now exists for the defendents in the litigation and the private landowners in the town of Charles Town. Because all parties are currently in agreement as to the resolution of this problem, I believe that this bill is a matter of some urgency and must be passed without delay. Therefore, I hope that my colleagues here in the House will look favorably upon this measure and vote for its passage.●

The SPEAKER pro tempore (Mr. SISK). The question is on the motion offered by the gentleman from Wyoming (Mr. RONCALIO) that the House suspend the rules and pass the bill, H.R. 12860, as amended.

The question was taken.

Mr. EMERY. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 3 of rule XXVII, and the Chair's prior announcement, further proceedings on this motion will be postponed.

## PORTS AND WATERWAYS SAFETY AMENDMENTS

Mr. BIAGGI. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 13311) to amend the Ports and Waterways Safety Act of 1972, and for other purposes, as amended.

The Clerk read as follows:

H.R. 13311

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Port Safety and Tank Vessel Safety Act of 1978".

SEC. 2. PORTS AND WATERWAYS SAFETY AND PROTECTION OF THE MARINE ENVIRONMENT

The Ports and Waterways Safety Act of 1972 (Public Law 92-340, 86 Stat. 424) is amended to read as follows:

"SECTION 1. STATEMENT OF POLICY.

"The Congress finds and declares—

"(a) that navigation and vessel safety and protection of the marine environment are matters of major national importance;

"(b) that increased vessel traffic in the Nation's ports and waterways creates substantial hazard to life, property, and the marine environment;

"(c) that increased supervision of vessel and port operations is necessary in order to—

"(1) reduce the possibility of vessel or cargo loss, or damage to life, property, or the marine environment;

"(2) prevent damage to structures in, on, or immediately adjacent to the navigable waters of the United States or the resources within such waters;

"(3) insure that vessels operating in the navigable waters of the United States shall comply with all applicable standards and requirements for vessel construction, equipment, manning, and operational procedures; and

"(4) insure that the handling of dangerous articles and substances on structures in, on, or immediately adjacent to the navigable waters of the United States is conducted in accordance with established standards and requirements; and

"(d) that advance planning is critical in determining proper and adequate protective measures for the Nation's ports and waterways and the marine environment, with continuing consultation with other Federal agencies, State representatives, affected users, and the general public, in the development and implementation of such measures.

"SEC. 2. VESSEL OPERATING REQUIREMENTS.

"(a) IN GENERAL.—Subject to the requirements of section 3, the Secretary of the department in which the Coast Guard is operating (hereinafter referred to as "Secretary") may—

"(1) in any port or place under the jurisdiction of the United States, in the navigable waters of the United States, or in any area covered by an international agreement negotiated pursuant to section 9, establish, operate, and maintain vessel traffic services, consisting of measures for controlling or supervising vessel traffic or for protecting navigation and the marine environment and can include, but need not be limited to one or more of the following: reporting and operating requirements, surveillance and communications systems, routing systems, and fairways;

"(2) require vessels which operate in an area of a vessel traffic service to utilize or comply with that service;

"(3) require vessels to install and use specified navigation equipment, communications equipment, electronic relative motion analyzer equipment, or any electronic or other device necessary to comply with a vessel traffic service: *Provided*, That the Secretary shall not require fishing vessels under 300 gross tons or recreational vessels 65 feet or less to possess or use the equipment or devices required by this subsection solely under the authority of this Act;

"(4) control vessel traffic in areas subject to the jurisdiction of the United States which the Secretary determines to be especially hazardous, or under conditions of reduced visibility, adverse weather, vessel congestion, or other hazardous circumstances by—

"(A) specifying times of entry, movement, or departure;

"(B) establishing vessel traffic routing schemes;

"(C) establishing vessel size, speed, draft limitations and vessel operating conditions; and

"(D) restricting operation, in any hazardous area or under hazardous conditions, to vessels which have particular operating characteristics or capabilities which he considers necessary for safe operation under the circumstances; and

"(5) require the receipt of prearrival messages from any vessel, destined for a port or place subject to the jurisdiction of the United States, in sufficient time to permit advance vessel traffic planning prior to port entry, which shall include any information which is not already a matter of record and which the Secretary determines necessary for the control of the vessel and the safety of the port and the environment.

"(b) SPECIAL POWERS.—The Secretary may order any vessel, in a port or place subject to the jurisdiction of the United States or in the navigable waters of the United States, to operate or anchor in a manner he directs if—

"(1) he has reasonable cause to believe such vessel does not comply with any regulation issued under this Act or any other applicable law or treaty;

"(2) he determines that such vessel does not satisfy the conditions for port entry set forth in section 7; or

"(3) by reason of weather, visibility, sea conditions, port congestion, other hazardous circumstances, or the condition of such vessel, he is satisfied that such directive is justified in the interest of safety.

"(c) PORT ACCESS ROUTES.—

"(1) In order to provide safe access routes for the movement of vessel traffic proceeding to or from ports or places subject to the jurisdiction of the United States, and subject to the requirements of paragraph (3) hereof, the Secretary shall designate necessary fairways and traffic separation schemes for vessels operating in the territorial sea of the United States and in high seas approaches, outside the territorial sea, to such ports or places. Such a designation shall recognize, within the designated area, the paramount right of navigation over all other uses.

"(2) No designation may be made by the Secretary pursuant to this subsection, if such a designation, as implemented, would deprive any person of the effective exercise of a right granted by a lease or permit executed or issued under other applicable provisions of law: *Provided*, That such right has become vested prior to the time of publication of the notice required by clause (A) of paragraph (3) hereof: *Provided further*, That the determination as to whether the designation would so deprive any such person shall be made by the Secretary, after consultation with the responsible official under whose authority the lease was executed or the permit issued.

"(3) Prior to making a designation pursuant to paragraph (1) hereof, and in accordance with the requirements of section 3, the Secretary shall—

"(A) within six months after date of enactment of this Act (and may, from time to time thereafter), undertake a study of the potential traffic density and the need for safe access routes for vessels in any area for which fairways or traffic separation schemes are proposed or which may otherwise be considered and shall publish notice of such undertaking in the Federal Register;

"(B) in consultation with the Secretary of State, the Secretary of the Interior, the Secretary of Commerce, the Secretary of the Army, and the Governors of affected States, as their responsibilities may require, take into account all other uses of the area under consideration (including, as appropriate, the exploration for, or exploitation of, oil, gas, or other mineral resources, the construction or operation of deepwater ports or other structures on or above the seabed or subsoil of the submerged lands or the Outer Continental Shelf of the United States, the establishment or operation of marine or estuarine sanctuaries, and activities involving recreational or commercial fishing); and

"(C) to the extent practicable, reconcile the need for safe access routes with the needs of all other reasonable uses of the area involved.

"(4) In carrying out his responsibilities under paragraph (3), the Secretary shall proceed expeditiously to complete any study undertaken. Thereafter, he shall promptly issue a Notice of Proposed Rulemaking for the designation contemplated or shall have published in the Federal Register a notice that no designation is contemplated as a result of the study.

"(5) In connection with a designation made pursuant to this subsection, the Secretary—

"(A) shall issue reasonable rules and regulations governing the use of such designated areas, including the applicability of rules 9 and 10 of the International Regulations for Preventing Collisions at Sea, 1972, relating to narrow channels and traffic separation schemes, respectively, in waters where such regulations apply;

"(B) to the extent that he finds reasonable and necessary to effectuate the purposes of the designation, make the use of designated fairways and traffic separation schemes mandatory for specific types and sizes of vessels, foreign and domestic, operating in the territorial sea of the United States and for specific types and sizes of vessels of the United States operating on the high seas beyond the territorial sea of the United States;

"(C) may, from time to time, as necessary, adjust the location or limits of designated fairways or traffic separation schemes, in order to accommodate the needs of other uses which cannot be reasonably accommodated otherwise: *Provided*, That such an adjustment will not, in the judgment of the Secretary, unacceptably adversely affect the purpose for which the existing designation was made and the need for which continues; and

"(D) shall, through appropriate channels, (i) notify cognizant international organizations of any designation, or adjustment thereof, and (ii) take action to seek the cooperation of foreign States in making it mandatory for vessels under their control to use any fairway or traffic separation schemes designated pursuant to this subsection in any area of the high seas, to the same extent as required by the Secretary for vessels of the United States.

"(d) EXCEPTION.—Except pursuant to international treaty, convention, or agreement, to which the United States is a party, this Act shall not apply to any foreign vessel that is not destined for, or departing from, a port or place subject to the jurisdiction of the United States and that is in——

"(1) innocent passage through the territorial sea of the United States, or

"(2) transit through the navigable waters of the United States which form a part of an international strait.

"SEC. 3. CONSIDERATIONS BY SECRETARY.

"In carrying out his duties and responsibilities under section 2, the Secretary shall—

"(a) take into account all relevant factors concerning navigation and vessel safety and protection of the marine environment, including but not limited to—

"(1) the scope and degree of the risk or hazard involved;

"(2) vessel traffic characteristics and trends, including traffic volume, the sizes and types of vessels involved, potential interference with the flow of commercial traffic, the presence of any unusual cargoes, and other similar factors;

"(3) port and water configurations and variations in local conditions of geography, climate, and other similar factors;

"(4) the need for granting exemptions for the installation and use of equipment or devices for use with vessel traffic services for certain classes of small vessels, such as self-propelled fishing *vessels* and recreational vessels;

"(5) the proximity of fishing grounds, oil and gas drilling and production operations, or any other potential or actual conflicting activity;

"(6) environmental factors;

"(7) economic impact and effects;

"(8) existing vessel traffic services; and

"(9) local practices and customs, including voluntary arrangements and agreements within the maritime community; and

"(b) at the earliest possible time, consult with and receive and consider the views of representatives of the maritime community, ports and harbor authorities or associations, environmental groups, and other parties who may be affected by the proposed actions.

"SEC. 4. WATERFRONT SAFETY.

"(a) The Secretary may take such action as is necessary to—

"(1) prevent damage to, or the destruction of, any bridge or other structure on or in the navigable waters of the United States, or any land structure or shore area immediately adjacent to such waters; and

"(2) protect the navigable waters and the resources therein from vessel or structure damage, destruction, or loss. Such action may include, but need not be limited to—

"(A) establishing procedures, measures, and standards for the handling, loading, unloading, storage, stowage, and movement on the structure (including the emergency removal, control, and disposition) of explosives or other dangerous articles and substances, including oil or hazardous material as those terms are defined in section 4417a of the Revised Statutes, as amended;

"(B) prescribing minimum safety equipment requirements for the structure to assure adequate protection from fire, explosion, natural disaster, and other serious accident or casualty;

"(C) establishing water or waterfront safety zones, or other measures for limited, controlled, or conditional access and activity when necessary for the protection of any vessel, structure, waters, or shore area; and

"(D) establishing procedures for examination to assure compliance with the requirements prescribed under this section.

"(b) Nothing contained in this section, with respect to structures, prohibits a State or political subdivision thereof from prescribing higher safety equipment requirements or safety standards than those prescribed by regulations hereunder.

"SEC. 5. PILOTAGE.

"The Secretary may require federally licensed pilots on any self-propelled vessel, foreign or domestic, engaged in the foreign trade, when operating in the navigable waters of the United States in areas and under circumstances where a pilot is not otherwise required by State law. Any such requirement shall be terminated when the State having jurisdiction over the area involved establishes a requirement for a State licensed pilot and has so notified the Secretary.

"SEC. 6. INVESTIGATORY POWERS.

"(a) SECRETARY.—The Secretary may investigate any incident, accident, or act involving the loss or destruction of, or damage to, any structure subject to this Act, or which affects or may affect the safety or environmental quality of the ports, harbors, or navigable waters of the United States.

"(b) BOARD.—The National Transportation Safety Board shall, upon its request, be made a party in interest, with all the rights attendant thereto, in the investigation of any transportation-related incident conducted pursuant to this section.

"(c) POWERS.—In an investigation under this section, the Secretary may issue subpenas to require the attendance of witnesses and the production of documents or other evidence relating to such incident, accident, or act. If any person refuses to obey a subpena, the Secretary may request the Attorney General to invoke the aid of the appropriate district court of the United States to compel compliance with the subpena. Any district court of the United States may, in the case of refusal to obey a subpena, issue an order requiring compliance with the subpena, and failure to obey the order may be punished by the court as contempt. Witnesses may be paid fees for travel and attendance at rates not exceeding those allowed in a district court of the United States.

"SEC. 7. CONDITIONS FOR ENTRY TO PORTS OF THE UNITED STATES.

"No vessel, subject to the provisions of

section 4417a of the Revised Statutes, as amended, shall operate in the navigable waters of the United States or transfer cargo or residue in any port or place under the jurisdiction of the United States, if such vessel—

"(1) has a history of accidents, pollution incidents, or serious repair problems which, as determined by the Secretary, creates reason to believe that such vessel may be unsafe or may create a threat to the marine environment; or

"(2) fails to comply with any applicable regulation issued under this Act, under section 4417a of the Revised Statutes, as amended, or under any other applicable law or treaty; or

"(3) discharges oil or hazardous material in violation of any law of the United States or in a manner or quantities inconsistent with the provisions of any treaty to which the United States is a party; or

"(4) does not comply with any applicable vessel traffic service requirements; or

"(5) is manned by one or more officers who are licensed by a certificating state which the Secretary has determined, pursuant to section 4417a(11) of the Revised Statutes, as amended, does not have standards for licensing and certification of seafarers which are comparable to or more stringent than United States standards or international standards which are accepted by the United States; or

'(6) is not manned in compliance with manning levels as determined by the Secretary to be necessary to insure the safe navigation of the vessels; or

"(7) while underway, does not have at least one licensed deck officer on the navigation bridge who is capable of clearly understanding English:

*Provided*, That clauses (1), (2), (3), and (4) shall not apply if the owner of such vessel proves, to the satisfaction of the Secretary, that such vessel is no longer unsafe or a threat to the marine environment, and is no longer in violation of any applicable regulation, law, treaty, or condition, as appropriate: *Provided further*, That clauses (5) and (6) shall become applicable eighteen months after the effective date of this section.

"SEC. 8. APPLICABILITY.

"This Act shall not apply to the Panama Canal. The authority granted to the Secretary under sections 2, 3, 4, and 5 of this Act shall not be delegated with respect to the Saint Lawrence Seaway to any agency other than the Saint Lawrence Seaway Development Corporation. Any other authority granted the Secretary under this Act shall be delegated to the Saint Lawrence Seaway Development Corporation to the extent he determines such delegation is necessary for the proper operation of the Saint Lawrence Seaway.

"SEC. 9. INTERNATIONAL AGREEMENTS.

"(a) TRANSMITTAL OF REGULATIONS.—The Secretary shall transmit, via the Secretary of State, to appropriate international bodies or forums, any regulations issued under this Act, for consideration as international standards.

"(b) Agreements.—The President is authorized and encouraged to—

"(1) enter into negotiations and conclude and execute agreements with neighboring nations, to establish compatible vessel standards and vessel traffic services, and to establish, operate, and maintain international vessel traffic services, in areas and under circumstances of mutual concern; and

"(2) enter into negotiations, through appropriate international bodies, and conclude and execute agreements to establish vessel traffic services in appropriate areas of the high seas.

"(c) OPERATIONS.—The Secretary, pursuant to any agreement negotiated under subsection (b) which is binding upon the United States in accordance with constitutional requirements, may—

"(1) require vessels in the vessel traffic service area to utilize or to comply with the vessel traffic service, including the carrying or installation of equipment and devices as necessary for the use of the service; and

"(2) waive, by order or regulation, the application of any United States law or regulation concerning the design, construction, operation, equipment, personnel qualifications, and manning standards for vessels operating in waters over which the United States exercises jurisdiction if such vessel is not en route to or from a United States port or place, and if vessels en route to or from a United States port or place are accorded equivalent waivers of laws and regulations of the neighboring nation, when operating in waters over which that nation exercises jurisdiction.

"SEC. 10. REGULATIONS.

"(a) In accordance with the provisions of the Administrative Procedure Act, as amended, the Secretary shall issue, and may from time to time amend or repeal, regulations necessary to implement this Act.

"(b) The Secretary, in the exercise of this regulatory authority, shall establish procedures for consulting with, and receiving and considering the views of—

"(1) interested Federal departments and agencies,

"(2) officials of State and local governments,

"(3) representatives of the maritime community,

"(4) representatives of port and harbor authorities or associations,

"(5) representatives of environmental groups,

"(6) any other interested parties who are knowledgeable or experienced in dealing with problems involving vessel safety, port and waterway safety, and protection of the marine environment, and

"(7) advisory committees consisting of all interested segments of the public when the establishment of such committees is considered necessary because the issues involved are highly complex or controversial.

"SEC. 11. PENALTIES.

"(a) CIVIL PENALTY.—

"(1) Any person who found by the Secretary, after notice and an opportunity for a hearing, to have violated this Act or a regulation issued hereunder shall be liable to the United States for a civil penalty, not to exceed $25,000 for each violation. Each day of a continuing violation shall constitute a separate violation. The amount of such civil penalty shall be assessed by the Secretary, or his designee, by written notice. In determining the amount of such penalty, the Secretary shall take into account the nature, circumstances, extent, and gravity of the prohibited acts committed and, with respect to the violator, the degree of culpability, any history of prior offenses, ability to pay, and such other matters as justice may require.

"(2) The Secretary may compromise, modify, or remit, with or without conditions, any civil penalty which is subject to imposition or which has been imposed under this section.

"(3) If any person fails to pay an assessment of a civil penalty after it has become final, the Secretary may refer the matter to the Attorney General of the United States, for collection in any appropriate district court of the United States.

"(b) CRIMINAL PENALTY.—

"(1) Any person who willfully and knowingly violates this Act or any regulation issued hereunder shall be fined not more than $50,000 for each violation or imprisoned for not more than a year, or both.

"(2) Any person who, in the willful and knowing violation of this Act or of any regulation issued hereunder, uses a dangerous weapon, or engages in conduct that causes bodily injury or fear of imminent bodily injury to any officer authorized to enforce the provisions of this Act or the regulations issued hereunder, shall, in lieu of the penalties prescribed in paragraph (1), be fined not more than $100,000, or imprisoned for not more than ten years, or both.

"(c) IN REM LIABILITY.—Any vessel subject to the provisions of this Act, which is used in violation of this Act or any regulations issued hereunder, shall be liable in rem for any civil penalty assessed pursuant to subsection (a) and may be proceeded against in the United States district court for any district in which such vessel may be found.

"(d) INJUNCTION.—The United States district courts shall have jurisdiction to restrain violations of this Act or of regulations issued hereunder, for cause shown.

"(e) DENIAL OF ENTRY.—The Secretary may, subject to recognized principles of international law, deny entry into the navigable waters of the United States or to any port or place under the jurisdiction of the United States to any vessel not in compliance with the provisions of this Act or the regulations issued hereunder.

"(f) WITHHOLDING OF CLEARANCE.—The Secretary of the Treasury shall withhold or revoke, at the request of the Secretary, the clearance, required by section 4197 of the Revised Statutes of the United States, as amended (46 U.S.C. 91), of any vessel, the owner or operator of which is subject to any of the penalties in this section. Clearance may be granted in such cases upon the filing of a bond or other surety satisfactory to the Secretary.".

SEC. 3. STUDY OF MONITORING SYSTEMS.

(a) CONTENT.—The Secretary, in consultation with the Secretary of Commerce and other appropriate departments or agencies of the Federal Government, shall study possible shore-station systems for monitoring vessels, including fishing vessels, within the Fishery Conservation Zone as defined in section 3(8) of the Fishery Conservation and Management Act of 1976. Each system examined shall be capable of reporting vessel position, identification, course, and speed using either a land, sea, or space monitoring technique.

(b) REPORT.—Within two years after the date of the enactment of this Act, the Secretary shall report his findings to the Congress. This report shall describe the capabilities, limitations, and cost effectiveness of each monitoring system examined from the standpoint of both the Federal Government and any vessel owners who would be affected by the imposition of each approach. The report shall also include the Secretary's recommendations for a single, comprehensive, cost effective shore-station system for monitoring vessels within the Fishery Conservation Zone.

(c) APPROPRIATIONS.—There are authorized to be appropriated to the Secretary for the purposes of this section, not to exceed $500,000 for the fiscal year ending September 30, 1980, and not to exceed $500,000 for the fiscal year ending September 30, 1981.

SEC. 4. IMPROVED PILOTAGE STANDARDS.

Section 4442 of the Revised Statutes of the United States (46 U.S.C. 214) is amended to read as follows:

"SEC. 4442. (a) The Secretary of the department in which the Coast Guard is operating shall, in accordance with subsection (b) of this section, establish eligibility requirements for the issuance of a Federal license to pilot any steam vessels.

"(b) No person may be issued a Federal license to pilot any steam vessel unless he—

"(1) is at least twenty-one years of age;

"(2) is of sound health and has no physical limitations which would hinder or prevent the performance of a pilot's duties;

"(3) agrees to have a thorough physical examination each year while holding such license;

"(4) demonstrates, to the satisfaction of the Secretary, that he possesses the requisite general knowledge and skill to hold such license;

"(5) demonstrates proficiency in the use of electronic aids to navigation;

"(6) maintains adequate knowledge of the waters to be navigated and knowledge of regulations for the prevention of collisions in such waters;

"(7) has sufficient experience, as determined by the Secretary, to evidence his ability to handle any vessel of the type and size which he may be authorized to pilot; and

"(8) meets any other requirement which the Secretary considers reasonable and necessary.

"(c) No Federal license to pilot a steam vessel shall be valid for a term longer than five years. Upon expiration of any such license, the holder may reapply for an additional term and may be reissued a license if he meets the requirements specified under subsection (b) of this section.".

SEC. 5. VESSELS CARRYING CERTAIN CARGOES IN BULK.

Section 4417a of the Revised Statutes of the United States, as amended (46 U.S.C. 391a), is further amended to read as follows:

"SEC. 4417a. (1) STATEMENT OF POLICY.—The Congress hereby finds and declares—

"(A) that the carriage by vessels of certain cargoes in bulk or in residue creates substantial hazards to life, property, the navigable waters of the United States (including the quality thereof) and the resources contained therein and to the adjoining land, including but not limited to fish, shellfish, and wildlife, marine and coastal ecosystems, and recreational and scenic values;

"(B) that existing standards for the design, construction, alteration, repair, maintenance, operation, equipping, personnel qualification, and manning of all such vessels, which use any port or place subject to the jurisdiction of the United States or which operate in the navigable waters of the United States, must be more stringent and comprehensive for the mitigation of the hazards to life, property, or the marine environment;

"(C) that existing international standards for inspection and enforcement are incomplete, that those international standards that are in existence are often left unenforced by some flag states, and that there is a need to prevent substandard vessels from using any port or place subject to the jurisdiction of the United States or from operating in the navigable waters of the United States, for the mitigation of the hazards to life, property, or the marine environment;

"(D) that standards developed through regulations shall incorporate the best available technology and shall be required unless clearly shown to create an adverse economic impact which is not outweighed by the benefits to navigation and vessel safety or protection of the marine environment;

"(E) that standards developed through regulations shall not impede or interfere with the right of innocent passage or any legitimate use of the high seas in accordance with recognized principles of international law; and

"(F) that the United States should continue to actively support and encourage efforts to obtain international agreements concerning navigation and vessel safety and protection of the marine environment.

"(2) DEFINITIONS.—As used in this section, unless the context otherwise requires—

"(A) 'Discharge' includes, but is not limited to, any spilling, leaking, pumping, pouring, emitting, emptying, or dumping, however caused.

"(B) 'Foreign vessel' means any vessel of foreign registry or operated under the authority of any nation other than the United States.

"(C) 'Hazardous material' means any liquid material or substance which is—

"(i) flammable or combustible; or

"(ii) designated a hazardous substance under section 311(b) of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1321); or

"(iii) designated a hazardous material under section 104 of the Hazardous Material Transportation Act (49 U.S.C. 1803).

"(D) 'Marine environment' means the navigable waters of the United States and the land and resources therein and thereunder; the waters and fishery resources of any area over which the United States asserts exclusive fishery management authority; and the seabed and subsoil of the Outer Continental Shelf of the United States, the resources thereof and the waters superjacent thereto.

"(E) 'Oil' includes oil of any kind or in any form, including, but not limited to, petroleum, fuel oil, sludge, oil refuse, and oil mixed with wastes other than dredged spoil.

"(F) 'Person' means any individual (whether or not a citizen or national of the United States), or any corporation, partnership, association, or other entity (whether or not organized or existing under the laws of any State), and any Federal, State, local, or foreign government or any entity of any such government.

"(G) 'Public vessel' means a vessel which—

"(i) is owned, or chartered by demise, and operated by the United States or any foreign government; and

"(ii) is not engaged in commercial service.

"(H) 'Commercial service' means all types of trade or business involving the transportation of goods or persons, excluding the service performed by combatant vessels.

"(I) 'Secretary' means the Secretary of the department in which the Coast Guard is operating.

"(J) 'State' includes each of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Canal Zone, Guam, American Samoa, the United States Virgin Islands, the Trust Territories of the Pacific Islands, the Commonwealth of the Northern Marianas, and any other commonwealth, territory, or possession of the United States.

"(K) 'United States', when used in a geographical context, means all the States thereof.

"(L) 'Vessel of the United States' means any vessel documented or numbered under the laws of the United States.

"(M) 'Tanker' means a vessel constructed or adapted primarily to carry oil or hazardous materials in bulk in the cargo spaces.

"(N) 'Crude oil tanker' means a tanker engaged in the trade of carrying crude oil.

"(O) 'Product carrier' means a tanker engaged in the trade of carrying oil, other than crude oil, or hazardous materials.

"(P) 'Major conversion' means a conversion of an existing vessel which substantially alters the dimensions or carrying capacity of the vessel; or changes the type of vessel; or substantially prolongs its life; or which otherwise so alters the vessel that it is essentially a new vessel, as determined by the Secretary.

"(Q) 'New' means, with respect to various types of vessels subject to subsection (7), a vessel—

"(i) for which the building contract is placed after June 1, 1979; or

"(ii) in the absence of a building contract, the keel of which is laid, or which is at a similar stage of construction after January 1, 1980; or

"(iii) the delivery of which is after June 1, 1982; or

"(iv) which has undergone a major conversion, which is contracted for after June 1, 1979, or construction work of which is begun after January 1, 1980, or completed after June 1, 1982.

"(R) 'Existing' means, with respect to various types of vessels subject to subsection (7), a vessel which is not a new vessel.

"(S) 'Crude oil' means any liquid hydrocarbon mixture occurring naturally in the earth, whether or not treated to render it suitable for transportation, and includes crude oil from which certain distillate fractions may have been removed, and crude oil to which certain distillate fractions may have been added.

"(3) APPLICABILITY.—Except as provided in subsections (4) and (5), this section shall apply to any vessel—

"(A) regardless of tonnage, size, or manner of propulsion;

"(B) whether self-propelled or not;

"(C) whether carrying freight or passengers for hire or not;

"(D) which is a vessel of the United States, or which operates on or enters the navigable waters of the United States, or which transfers oil or hazardous materials in any port or place subject to the jurisdiction of the United States; and

"(E) which carries oil or any hazardous materials in bulk as cargo or in residue.

Any such vessel shall be deemed to be a steam vessel for the purpose of title 52 of the Revised Statutes of the United States and shall be subject to the provisions thereof.

"(4) EXCEPTION.—This section shall not apply to—

"(A) any public vessel; or

"(B) any vessel of not more than 500 gross tons, documented in the service of oil exploitation, which is not a tanker and which would be subject to this section only because of the transfer of fuel from fuel supply tanks of such vessels to offshore drilling or production facilities, if the crew member in charge of such transfer is certificated as a tankerman; or

"(C) cannery tenders, fishing tenders, and fishing vessels of not more than 500 gross tons, used in the salmon or crab fisheries of the State of Oregon, Washington, and Alaska, when engaged exclusively in the fishing industry; or

"(D) any foreign vessel not destined for, or departing from, a port or place subject to the jurisdiction of the United States that is in innocent passage through the territorial sea of the United States or in transit through the navigable waters of the United States which form a part of an international strait.

"(5) FISH PROCESSING VESSELS.—This section shall not apply to vessels of not more than 5,000 gross tons used in the processing and assembling of fishery products in the fisheries of the States of Oregon, Washington, and Alaska, and such vessel shall be allowed to have on board flamable or combustible liquid cargo in bulk to the extent authorized, and upon such conditions as may be required, by regulations issued by the Secretary.

"(6) REGULATORY AUTHORITY.—

"(A) In accordance with the provisions of the Administrative Procedure Act, as amended, the Secretary shall issue, and may from time to time amend or repeal, regulations for the design, construction, alteration, repair, maintenance, operation, equipping, personnel qualification, or manning of vessels to which this section applies, as may be necessary for protection against hazards to life and property, for navigation and vessel safety, and for protection of the marine environment. The regulations issued by the Secretary under this subsection shall be in addition to any other regulations, issued under other provisions of law, that may apply to such vessels. The regulations issued by the Secretary under this subsection shall include, but need not be limited to, requirements relating to—

"(i) superstructures, hulls, cargo holds or tanks, fittings, equipment, appliances, propulsion machinery, auxiliary machinery, and boilers;

"(ii) the handling or stowage of cargo, the manner of such handling or stowage of cargo, and the machinery and appliances used in such handling or stowage;

"(iii) equipment and appliances for lifesaving, fire protection, and prevention and mitigation of damage to the marine environment;

"(iv) the manning of such vessels and the duties, qualifications, and training of the officers and crew thereof, in accordance with subsections (9), (10), and (11);

"(v) improvements in vessel maneuvering and stopping ability and other features which reduce the possibility of collision, grounding, or other accidents;

"(vi) the reduction of cargo loss in the event of a collision, grounding, or other accident; and

"(vii) the reduction or elimination of discharges during ballasting, deballasting, tank cleaning, cargo handling, or other such activity.

"(B) In issuing regulations under paragraph (A), the Secretary shall give due consideration to the kinds of grades of cargo permitted to be on board such vessel.

"(C) The Secretary, in the exercise of this regulatory authority, shall establish procedures for consulting with, and receiving and considering the views of—

"(i) interested Federal departments and agencies,

"(ii) officials of State and local governments,

"(iii) representatives of the maritime community,

"(iv) representatives of port and harbor authorities or associations,

"(v) representatives of environmental groups, and

"(vi) any other interested parties who are knowledgeable or experienced in dealing with problems involving vessel safety, port and waterways safety, and protection of the marine environment.

"(7) MINIMUM STANDARDS.—In issuing regulations pursuant to subsection (6), the Secretary shall require that any self-propelled vessel shall, as a minimum—

"(A) if a new crude oil tanker of 20,000 deadweight tons or above, be equipped with—

"(i) segregated ballast tanks which are protectively located;

"(ii) a crude oil washing system; and

"(iii) a cargo tank protection system, consisting of a fixed deck froth system and a fixed inert gas system;

"(B) if a new product carrier of 30,000 deadweight tons or above, be equipped with segregated ballast tanks which are protectively located;

"(C) if a new product carrier of 20,000 deadweight tons or above, be equipped with a cargo tank protection system consisting of a fixed deck forth system and a fixed inert gas system or, if such a product carrier carries dedicated products which are incompatible with such a cargo tank protection system, an alternate protection system as authorized by the Secretary;

"(D) if an existing crude oil tanker of 40,000 deadweight tons or above, not later than June 1, 1981, be equipped with—

"(i) segregated ballast tanks; or

"(ii) a crude oil washing system:

*Provided*, That compliance many be delayed for vessels operating with dedicated clean ballast tanks if of 70,000 deadweight tons or above until June 1, 1983, or until June 1, 1985, for all other such vessels;

"(E) if an existing crude oil tanker of 20,000 deadweight tons or above but less than 40,000 deadweight tons, fifteen years or older, not later than January 1, 1986, or the date on which it reaches fifteen years of age, whichever is later, be equipped with segregated ballast tanks or a crude oil washing system;

"(F) if an existing crude oil tanker of 20,000 deadweight tons or above, not later than June 1, 1985, be equipped with an inert gas system: *Provided*, That for a crude oil tanker of less than 40,000 deadweight tons not fitted with high capacity tank washing machines, the Secretary may grant an exemption, if the vessel's owner can clearly show that compliance would be unreasonable and impracticable due to the vessel's design characteristics: *Provided further*, That an existing crude oil tanker of 70,000 deadweight tons or above must be in compliance herewith not later than June 1, 1983;

"(G) if an existing product carrier of 40,000 deadweight tons or above, not later than June 1, 1981, be equipped with segregated ballast tanks or, in lieu thereof, may operate with dedicated clean ballast tanks;

"(H) if an existing product carrier of 20,000 deadweight tons or above but less than 40,000 deadweight tons, fifteen years or older, not later than January 1, 1986, or the date on which it reaches fifteen years of age, whichever is later, be equipped with segregated ballast tanks or may operate with dedicated clean ballast tanks;

"(I) if an existing product carrier of 40,000 deadweight tons or above, or an existing product carrier of 20,000 deadweight tons or above but less than 40,000 deadweight tons, which is fitted with high-capacity tank washing machines, not later than June 1, 1985, be equipped with an inert gas system: *Provided*, That an existing product carrier of 70,000 deadweight tons or above must be in compliance herewith not later than June 1, 1983;

"(J) if of 10,000 gross tons or above, not later than June 1, 1979, be equipped with—

"(i) a dual radar system, one with short-range and one with long-range capabilities and each with true-north features;

"(ii) an electronic relative motion analyzer;

"(iii) an electronic position fixing device;

"(iv) adequate communications equipment;

"(v) a sonic depth finder;

"(vi) a gyrocompass; and

"(vii) up-to-date charts:

*Provided*, That the effective date of compliance with the requirement of clause (ii) shall be July 1, 1982 or such earlier date as agreed to internationally and accepted by the United States;

"(K) if a new tanker of 10,000 gross tons or above, be equipped with—

"(i) two remote steering gear control systems operable separately from the navigating bridge;

"(ii) main steering gear control in the steering gear compartment;

"(iii) means of communication and rudder angle indicators on the navigating bridge, remote steering gear control station, and the steering gear compartment;

"(iv) two or more identical and adequate power units for the main steering gear;

"(v) an alternative and adequate power supply, either from an emergency source of electrical power or from another independent source of power located in the steering gear compartment; and

"(vi) means of automatic starting and stopping of power units with attendant alarms at all steering stations;

"(L) if an existing tanker of 10,000 gross tons or above, not later than June 1, 1981, be equipped with—

"(i) two remote steering gear control systems operable separately from the navigating bridge;

"(ii) main steering gear control in the steering gear compartment; and

"(iii) means of communications and rudder angle indicators on the navigating bridge, remote steering gear control station, and the steering gear compartment;

"(M) if an existing crude oil tanker of 20,000 deadweight tons and above, which is engaged in the transfer of oil from an offshore oil exploitation or production facility on the Outer Continental Shelf of the United States, not later than June 1, 1979, be equipped with segregated ballast tanks or may operate with dedicated clean ballast tanks; and

"(N) in accordance with relevant international agreements to which the United States is a party, exempt vessels from the minimum requirements established in this subsection for segregated ballast, dedicated clean ballast, or crude oil washing if he determines that shore-based reception facilities are a preferred method of handling dirty ballast, and that adequate facilities are readily available.

In prescribing minimum requirements, unless otherwise required by law, the Secretary shall apply standards which are consistent with the International Convention for Prevention of Pollution from Ships, 1973, and the International Convention for Safety of Life at Sea, 1974, as modified by the respective Protocols of 1978 relating thereto. After the effective date of this subsection, the installation of segregated ballast tanks, a crude oil washing system, or an inert gas system, required by regulations issued hereunder, on a vessel which is entitled to engage in coastwise trade in accordance with section 27 of the Merchant Marine Act of 1920 (46 U.S.C. 883) shall be effected within the United States, its territories (not including trust territories), or its possessions, and vessels which fail to comply with this requirement shall thereafter not have the right to engage in the coastwise trade.

"(8) EVIDENCE OF COMPLIANCE.—

"(A) No vessel of the United States to which this section applies shall have on board oil or hazardous materials in bulk as cargo or in residue until it has a Certificate of Inspection, issued under the provisions of title 52 of the Revised Statutes of the United States, and such certificate has been endorsed to indicate that the vessel is in compliance with the regulations issued under this section. If any such vessel is found not to be in compliance, the Secretary shall notify the owner or agent of the vessel and indicate how the vessel may be brought into compliance.

"(B) No foreign vessel to which this section applies shall operate on or enter the navigable waters of the United States, or transfer oil or hazardous materials in any port or place under the jurisdiction of the United States, unless such vessel has been issued a Certificate of Compliance by the Secretary. The Secretary shall not issue such certificate until the vessel has been examined by the Secretary and found to be in compliance with the provisions of this section and the regulations issued hereunder. If such vessel is found not to be in compliance, the Secretary shall notify the owner or agent of the vessel and indicate how the vessel may be brought into compliance. The Secretary may allow provisional entry for the purposes of conducting examinations.

"(C) The Secretary may accept, in whole or in part, a certificate, endorsement, or document issued by any foreign nation pursuant to any treaty, convention, or other international agreement to which the United States is a party, as a basis for issuance of a Certificate of Compliance.

"(D) No vessel may carry any kind or grade of oil or hazardous materials in bulk as cargo or in residue unless its certificate is endorsed to allow such carriage. No such certificate may allow any vessel to carry any material prohibited by section 4472(3) of the Revised Statutes, as amended (46 U.S.C. 170).

"(E) A certificate issued under this section

shall be valid for a period not to exceed twenty-four months and may be renewed as specified by the Secretary. The Secretary may issue a temporary certificate under this section in appropriate circumstances; except that the temporary certificate shall be valid for not more than thirty days. Any certificate shall be revoked or suspended if the Secretary finds that the vessel involved no longer complies with the conditions upon which the certificate was issued.

"(9) PERSONNEL AND MANNING STANDARDS FOR VESSELS OF THE UNITED STATES.—The Secretary shall prescribe standards for the manning of any vessel of the United States subject to the provisions of this section and the duties, qualifications, and training of the officers and crew thereof, including, but not limited to, standards relating to—

"(A) instruction in vessel and cargo handling and vessel navigation under normal operating conditions in coastal and confined waters and on the high seas;

"(B) instruction in vessel and cargo handling and vessel navigation in emergency situations and under accidental or potential accident conditions;

"(C) license qualifications by specific type and size of vessels;

"(D) qualification for licenses by use of simulators for the practice or demonstration of marine-oriented skills;

"(E) minimum health and physical fitness criteria for various grades of licenses and certificates: *Provided*, That the Secretary shall waive the applicability of such criteria to any individual holding a license or certificate in effect on the effective date of this subsection, including subsequent renewals thereof: *Provided further*, That, when such a waiver is granted, the Secretary may prescribe conditions or limitations to the license or certificate, or the renewal thereof, as he may find reasonable and necessary for the safety of any vessel on which the individual may be employed;

"(F) periodic retraining, and special training for upgrading positions, changing vessel type or size, or assuming new responsibilities; and

"(G) determination of licenses and certificates, conditions of licensing or certification and period of licensing or certification by reference to experience, amount of training completed, and regular performance testing.

"(10) TANKERMAN REQUIREMENTS.—

"(A) Any vessel of the United States having on board oil or hazardous materials in bulk as cargo or in residue shall have a specified number of the crew certificated as tankerman, as may be required by the Secretary, and such requirement shall be so noted on the Certificate of Inspection issued to the vessel.

"(B) Any foreign vessel having on board oil or hazardous materials in bulk as cargo or in residue shall have a specified number of personnel certificated as tankerman, or equivalent, as may be required by the Secretary, when the vessel transfers oil or hazardous materials in any port or place subject to the jurisdiction of the United States; and such requirement shall be noted in applicable terminal operating procedures. No transfer operations may take place unless the crew member in charge is capable of clearly understanding instructions in English.

"(C) The Secretary shall prescribe procedures, standards, and qualifications for the issuance of certificates or endorsements as tankerman, stating the kinds of oil or hazardous materials that can be handled with safety to the vessel and the marine environment.

"(D) Certificates or endorsements as tankerman shall be subject to suspension and revocation on the same grounds and in the same manner as provided for under the provisions of section 4450 of the Revised Statutes of the United States, as amended (46 U.S.C. 239).

"(11) PERSONNEL AND MANNING STANDARDS FOR FOREIGN VESSELS.—The Secretary shall issue regulations and procedures for the verification of manning, training, qualification, and watchkeeping standards promulgated by the certificating state of any foreign vessel which operates on or enters the navigable waters of the United States, and transfers oil or hazardous materials in any port or place under the jurisdiction of the United States. Such regulations and procedures shall include, but need not be limited to, provisions relating to—

"(A) the receipt through the Inter-Governmental Maritime Consultative Organization or from the certificating state of the English text of laws, decrees, orders, regulations, specimen licenses and certificates, and other pertinent documents pertaining to manning, training, qualification, and watchkeeping of seafarers;

"(B) the publication and distribution of, or otherwise making available to the public and appropriate enforcement personnel, copies of materials received as provided for in paragraph (A);

"(C) the evaluation, at intervals of not less than five years, of each foreign state's system for licensing and certification of seafarers, including study course content and duration, examination requirements and prerequisites for licensing and certification, and related controls;

"(D) determination, after the evaluation required by clause (C), of whether or not the foreign state, whose system for licensing and certification of seafarers was evaluated, has standards which are comparable to or more stringent than United States standards or international standards which are accepted by the United States;

"(E) publication in the Federal Register of each determination made pursuant to clause (D), together with a brief explanation of the reasons therefore; and

"(F) manning levels, based on vessel size and type of operation, when operating in the navigable waters of the United States, or in the safety zone in connection with utilization of deepwater ports.

"(12) MODIFICATIONS.—The Secretary may modify any regulation or standard prescribed under this section to conform to the provisions of an international treaty, convention, agreement, or an amendment thereto, which is ratified by the United States.

"(13) PROHIBITED ACTS.—

"(A) It is unlawful for any person—

"(i) to violate any provision of this section or any regulation issued under this section; or

"(ii) to refuse to permit any officer, authorized by the Secretary to enforce the provisions of this section, to board any vessel or to enter any shore area, place, or premises, under such person's control for purposes of inspection under this section; or

"(iii) to refuse to obey any lawful directive issued under this section.

"(B) It is unlawful for any vessel subject to the provisions of this section—

"(i) to operate in or on the navigable waters of the United States, or to use any port or place subject to the jurisdiction of the United States, while not in compliance with any provision of this section or any regulation issued hereunder; or

"(ii) to fail to comply with any lawful directive issued pursuant to this section.

"(14) PENALTIES.—

"(A) CIVIL PENALTY.—

"(i) Any person who is found by the Secretary, after notice and an opportunity for a hearing, to have violated this section or a regulation issued hereunder shall be liable to the United States for a civil penalty, not to exceed $25,000 for each violation. Each day of a continuing violation shall constitute a separate violation. The amount of such civil penalty shall be assessed by the Secretary, shall take into account the nature, circumstances, extent, and gravity of the prohibited acts committed and, with respect to the violator, the degree of culpability, any history of prior offenses, ability to pay, and such other matters as justice may require.

"(ii) The Secretary may compromise, modify, or remit, with or without conditions, any civil penalty which is subject to imposition or which has been imposed under this section.

"(iii) If any person fails to pay an assessment of a civil penalty after it has become final, the Secretary may refer the matter to the Attorney General of the United States, for collection in any appropriate district court of the United States.

"(B) CRIMINAL PENALTY.—

"(i) Any person who willfully and knowingly violates this section or any regulation issued hereunder shall be fined more than $50,000 for each violation or imprisoned for no more than a year, or both.

"(ii) Any person who, in the willful and knowing violation of this section or any regulation issued hereunder, uses a dangerous weapon, or engages in conduct that causes bodily injury or fear of imminent bodily injury to any officer authorized to enforce the provisions of this Act or the regulations issued hereunder, shall, in lieu of the penalties prescribed in subparagraph (1), be fined not more than $100,000, or imprisoned for not more than ten years, or both.

"(C) IN REM LIABILITY.—Any vessel subject to the provisions of this section, which is used in violation of this section or any regulation issued hereunder, shall be liable in rem for any civil penalty assessed pursuant to paragraph (A) and may be proceeded against in the United States district court for any district in which such vessel may be found.

"(D) INJUNCTION.—The United States district courts shall have jurisdiction to restrain violations of this section or of regulations issued hereunder, for cause shown.

"(E) DENIAL OF ENTRY.—The Secretary may, subject to recognized principles of international law, deny entry into the navigable waters of the United States or to any port or place subject to the jurisdiction of the United States to any vessel not in compliance with the provisions of this section or the regulations issued hereunder.

"(F) WITHHOLDING CLEARANCE.—The Secretary of the Treasury shall withhold or revoke, at the request of the Secretary, the clearance, required by section 4197 of the Revised Statutes of the United States, as amended (46 U.S.C. 91), of any vessel, the owner or operator of which is subject to any of the penalties in this subsection. Clearance may be granted in such cases upon the filing of a bond or other surety satisfactory to the Secretary.

"(15) INSPECTION.—

"(A) NATIONAL PROGRAM.—

"(i) The Secretary shall establish a national program for inspection of any vessel subject to this section. Each such vessel shall be inspected or examined at least once each year. Any such vessel over ten years of age shall undergo a special and detailed inspection of structural strength and hull integrity, as specified by the Secretary.

"(ii) An inspection or examination may be conducted by any officer authorized by the Secretary. If any such officer is not reasonably available, the Secretary may contract for the conduct of inspections or examinations in the United States and in foreign countries. Under such contract, an inspector may be authorized to act on behalf of the Secretary, except that no such inspector may issue a Certificate of Inspection or Certificate of Compliance, but may issue a temporary certificate.

"(iii) Notwithstanding the provisions of

section 1 of the Act of June 19, 1886, as amended (46 U.S.C. 331), the Secretary shall prescribe by regulation reasonable fees for any inspection or examination which is conducted pursuant to this section outside the geographical limits of the United States, or which, involving a foreign flag vessel, is conducted pursuant to the contract authority provided for in subparagraph (ii) of this paragraph. The owner or operator of any vessel inspected or examined by the Secretary or his designee shall be liable for such fees. Amounts received as fees shall be credited to the General Treasury.

"(B) VESSEL DOCUMENTS.—Any vessel subject to provisions of this section shall have on board such documents as the Secretary deems necessary for inspection or enforcement under this section, including, but not limited to, documents indicating—

"(i) the kind, grade, and approximate quantities of any cargo on board;

"(ii) the shipper and consignee of the cargo;

"(iii) the points of origin and destination of the vessel; and

"(iv) the name of an agent in the United States authorized to accept legal process.

"(16) MARINE SAFETY INFORMATION SYSTEM.—

"(A) IN GENERAL.—The Secretary shall establish a marine safety information system which shall contain information with regard to any vessel subject to this section which operates on or enters the navigable waters of the United States, or which transfers oil or any hazardous materials in any port or place under the jurisdiction of the United States. The Secretary may, by regulation, require any such vessel to furnish such data or other information as he deems necessary, in order to carry out the purposes of this subsection, including, but not limited to—

"(i) the names of any person with an ownership interest in such vessel;

"(ii) details of compliance with the financial responsibility requirements of applicable statutes or regulations;

"(iii) registration information, including all changes in the name of the vessel;

"(iv) the history of accidents or serious repair problems of the vessel; and

"(v) a record of all inspections or examinations of a vessel conducted under subsection (15).

"(B) INTERAGENCY COOPERATION.—The head of each department or agency of the Federal Government shall, upon a written request from the Secretary, furnish any available information which the Secretary deems necessary to confirm the information received pursuant to paragraph (A).

"(17) LIGHTERING.—

"(A) IN GENERAL.—After the effective date of regulations issued by the Secretary pursuant to paragraph (B), no vessel may transfer oil or hazardous materials in a port or place subject to the jurisdiction of the United States, if the cargo has been transferred from another vessel in the navigable waters of the United States or in the marine environment unless—

"(i) the transfer was conducted in accordance with regulations issued by the Secretary, and

"(ii) both the delivering and receiving vessels had, on board at the time of transfer, a Certificate of Inspection or a Certificate of Compliance, as would have been required under subsection (8), had the transfer taken place in a port or place subject to the jurisdiction of the United States.

"(B) REGULATIONS.—The Secretary shall issue, and may from time to time, amend or repeal regulations for the transferring of oil or hazardous materials in the navigable waters of the United States or in the marine environment when such oil or hazardous material is destined for a port or place subject to the jurisdiction of the United States. Such regulations shall include, but need not be limited to—

"(i) minimum safe operating conditions, including sea state, wave height, weather, proximity to channels or shipping lanes, and other similar factors;

"(ii) prevention of spills;

"(iii) equipment for responding to any spill;

"(iv) prevention of any unreasonable interference with navigation or other reasonable uses of the high seas, as such uses are defined by treaty, convention, or customary international law;

"(i) establishment of lightering zones; and

"(vi) requirements for communication and pre-arrival messages.

"(18) TANK WASHINGS.—

"(A) No vessel may transfer cargo in a port or place subject to the jurisdiction of the United States, if the vessel has discharged tank washings containing oil or hazardous materials in violation of any law of the United States or in a manner or quantities inconsistent with the provisions of any treaty to which the United States is a party, in preparation for loading cargo in any port or place subject to the jurisdiction of the United States.

"(B) The Secretary shall establish effective control and supervisory measures to implement the provisions of this subsection.

"(19) REPORT.—Within six months after the end of each calendar year, the Secretary shall submit to the Congress—

"(A) a report on the administration of this section during the preceding calendar year;

"(B) a summary of inspection and enforcement activities during the preceding calendar year; and

"(C) recommendations to the Congress for any additional legislative authority necessary to improve navigation and vessel safety and protection of the marine environment.".

SEC. 6. SAVINGS CLAUSE.

(6) Regulations previously issued under statutory provisions which are amended by section 2 of this Act shall continue in effect as though issued under the authority of the Ports and Waterways Safety Act of 1972, as amended by this Act, until expressly abrogated, modified, or amended by the Secretary. Any proceeding under title I of Public Law 92-340 for a violation which occurred before the effective date of this Act may be initiated or continued to conclusion as though such public law had not been amended by this Act.

(b) Regulations previously issued under statutory provisions which are amended by section 5 of this Act shall continue in effect as though issued under the authority of section 4417a of the Revised Statutes of the United States, as amended by this Act, until expressly abrogated, modified, or amended by the Secretary. Any proceeding under the provisions of section 4417a of the Revised Statutes of the United States, as it existed prior to amendment by this Act, for a violation which occurred before the effective date of this Act, may be initiated or continued to conclusion as though such section had not been amended by this Act.

(c) If a provision of this Act or the application of such provision to any person or circumstances shall be held invalid, the remainder of the Act and the application of such provision to persons or circumstances other than those to which it is held invalid shall not be affected thereby.

The SPEAKER pro tempore. (Mr. SISK). Is a second demanded?

Mr. RUPPE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from New York (Mr. BIAGGI) and the gentleman from Michigan (Mr. RUPPE) will be recognized for 20 minutes each.

The Chair recognizes the gentleman from New York (Mr. BIAGGI).

Mr. Speaker, before I make my comments in connection with the bill, I would like to take this opportunity to commend the members of the Subcommittee on Coast Guard and Navigation of the full Committee on Merchant Marine and Fisheries, the staff, and all those responsible, for their commitment, dedication, and diligence in producing this product.

Mr. Speaker, I urge the support of the House in passing H.R. 13311—a landmark piece of maritime safety legislation—which concerns itself with the safety of our ports and waterways—the safety of tank vessels—and the protection of the marine environment.

As you no doubt are aware, many Members of the House—as well as many of our colleagues in the Senate—have been and continue to be gravely concerned over these major issues and the problems they have created.

Early in this Congress, more than two dozen bills were introduced in the House reflecting these congressional concerns. Many involved proposals for oil pollution liability and compensation—which, I am happy to state, resulted in the passage by the House of H.R. 6803—now pending in the Senate.

Other proposals were related to the safety of our ports and the vessels themselves. In preparing for the consideration of these bills—as chairman of the Subcommittee on Coast Guard and Navigation—I held a series of oversight hearings for a number of days on the overall marine safety program of the Coast Guard.

The subcommittee also held 5 days of hearings on specific legislative proposals—including S. 682, a similar bill which had been passed by the Senate during the first session.

Since the President, in his March 17, 1977 message to the Congress, placed heavy emphasis on the international aspects of tank vessel safety—I felt it necessary to provide delegation representation to the International Conference on Tanker Safety and Pollution Prevention held in London during February of this year—and to await a review of the conference results.

The subsequent hearings culminated in 6 days of markup—with considerable opportunity to air all matters of controversial concern. I believe we have accommodated most of the concerns which have been expressed—while also reflecting and accommodating the concerns of many of our colleagues in both Houses.

As you no doubt are aware, the need to amend the "Ports and Waterways Safety Act of 1972" and the "Tank Vessel Act of 1936" resulted from the fact that existing law has not been completely satisfactory.

The general concern which resulted in the 1972 enactment arose from:

The increasing growth of maritime traffic in the ports and harbors of the U.S.;

The increased congestion resulting therefrom;

The increase in the size of vessels involved; and

The increasing number of marine casualties.

Since 1972, the maritime traffic has continued to expand—marine casualties have continued to occur—and the marine environment has been increasingly damaged by pollution. In addition, there has been a severe problem with the control of foreign tank vessels using our ports.

Also, since 1972, there has been a massive increase in the importation of oil and oil products—particularly crude oil—with the United States now importing more than 8 million barrels of crude oil per day. This movement of crude oil means that approximately 35 tank vessels enter U.S. ports every day—and this number of tanker movements is expected to continue at a high level for many years to come.

This shipping activity obviously increases the potential for marine casualties—which run the gamut from simple groundings and minor collisions to more serious groundings, major collisions, and disastrous explosions and fires.

I need not remind you of the most noteworthy of a series of casualties during the winter of 1976–77 involving the Liberian tank vessel *Argo Merchant* which grounded in international waters about 28 miles southeast of Nantucket Island in the early morning hours of December 15, 1976.

While the casualty resulted with no loss of life and no personal injuries, the resulting oil pollution involved some 204,000 barrels of heavy heating oil destined for the Boston area.

I would also like to point out that the report of the Liberian Marine Board of Investigation which inquired into this tragedy made certain recomendations which are strikingly similar to some of the conclusions contained in the President's March 1977 message to the Congress on tanker safety and oil pollution. They are also similar to various legislative initiatives before us today.

Another noteworthy casualty which occurred in December 1976 involved the Liberian tank vessel *Sansinena*—which suffered an explosion and fire while taking on ballast and fuel at an oil terminal in Los Angeles Harbor.

In addressing some of these problems, H.R. 13311 will provide for greater supervision and control over all types of vessels—foreign and domestic—which operate in our waters or ports.

It will also provide for an effective inspection and compliance program for all tank vessels—foreign and domestic—which transport or transfer oil or hazardous cargoes in ports or places subject to the jurisdiction of the United States.

With specific reference to tank vessels, this bill includes many actions endorsed by the administration and the international maritime community concerning standards for new and existing tank vessels—with respect to segregated ballast—crude oil washing systems—inert gas systems—steering gear systems—and navigation equipment.

It provides a stringent and comprehensive program dealing with the design, construction, alteration, repair, maintenance, operation, equipping, personnel qualifications, and manning of all vessels which desire to use our ports to transfer cargoes of oil and hazardous materials.

This legislation has widespread support—and a number of the controversial issues have been accommodated. However, it is the consensus of many that something had to be done to cover the international maritime community's failure to address construction and oil pollution prevention standards for the smaller existing tank vessels—those of 20,000 deadweight tons or above, but less than 40,000 deadweight tons.

We have recognized the technical difficulty—the cost of redesign and retrofit—and the need for continuing international cooperation by requiring compliance with certain standards within a reasonable and realistic timeframe.

These smaller vessels will have to be equipped with segregated ballast tanks—or a crude oil washing system—if they are 15 years or older—not later than January 1, 1986 or the date on which the vessel reaches 15 years of age, whichever is later.

It is my belief that the dates agreed to will provide sufficient lead time to enable vessel owners to make valid judgments with respect to retrofit, layup, scrapping, replacement, or reassignment. I also believe it will provide the international community with the time necessary to evaluate what must be done to upgrade these smaller tankers.

I believe this is an absolutely necessary requirement when you realize that somewhere near 80 percent of the tankers using our ports are within this tonnage range.

I want to make it very clear that—in developing this requirement for the lower tonnage tank vessels—there was and remains a general recognition of the excellent results which were achieved by international agreement—and also recognition of the dedicated efforts of the U.S. delegation during the February 1978 conference on tanker safety and pollution prevention.

The bill also includes regulatory authority over areas not previously covered—such as participation with neighboring nationals in coordinated vessel traffic systems in boundary waters—and the control of dumping of tank washings at sea in preparation for loading cargoes in U.S. ports.

It also provides, for the first time, regulatory control over lightering operations—that is, the offshore transfer of oil or hazardous cargoes from large vessels to smaller ones for delivery to our shallow-water ports.

It also permits the development of improved personnel qualifications—as well as realistic manning standards for all tank vessels using our ports.

Finally, H.R. 13311 also provides for the initiation of a study looking into comprehensive cost-effective shore station systems for monitoring vessels operating off our coasts.

Mr. Speaker, in this comprehensive port safety and tank vessel safety legislation, it is my firm belief that we have reported a bill which will accommodate domestic concerns—as well as meet international objectives within a flexible framework.

It is my opinion that the bill meets the President's overall objective when—on March 17, 1977, in his message to Congress—he announced a number of measures to be adopted, designed to reduce the risks associated with the marine transportation of oil.

I, therefore, urge all Members to support the passage of H.R. 13311—as developed by the Subcommittee on Coast Guard and Navigation—and as reported by the Committee on Merchant Marine and Fisheries.

Mr. RUPPE. Mr. Speaker, I yield myself so much time as I may consume.

Mr. Speaker, I would like to join my colleagues in supporting H.R. 13311, the "Port Safety and Tank Vessel Safety Act of 1978."

In recent years the volume of vessel and tanker traffic off our coasts, and in our ports, has increased significantly. To a large extent this is the result of the dramatic increase in the importation of oil into the United States. This increase in vessel traffic creates a serious potential for marine casualties such as groundings, collisions, and disastrous explosions and fires.

During December 1976, there was a rash of serious tanker casualties. Most noteworthy was the grounding and subsequent breakup of the SS *Argo Merchant* off Nantucket, Mass. and the explosion of the SS *Sansinena* at an oil terminal in Los Angeles Harbor. Marine casualties such as these brought about a demand, both nationally and internationally, for improved marine safety standards.

On March 17, 1977, the President announced his initiative on marine oil pollution. This initiative directed the Secretary of Transportation to prepare, within 60 days, proposed new regulations governing tanker construction and equipment. The initiative also instructed the Department of State to begin diplomatic efforts to improve the international system of inspection and certification of tankers and called for an early convening of an International Conference of Training and Certification of Seafarers. These international efforts culminated in the International Conference on Tanker Safety and Pollution Prevention of February 1978, and the International Conference on Training and Certification of Seafarers of June 1978.

H.R. 13311 amends the Ports and Waterways Safety Act of 1972, the Tank Vessel Act of 1936 and 46 United States Code 214 concerning pilotage.

The Ports and Waterways Safety Act Amendments would, among other things, authorize the Coast Guard to establish vessel operating requirements. This

would include vessel traffic services in waters subject to U.S. jurisdiction and, in accordance with negotiated international agreements, in areas of the high seas. The Secretary can also establish necessary fairways and traffic separation schemes and provide safe access routes for U.S. ports.

The Ports and Waterways Safety Act Amendments also authorize the Coast Guard to establish conditions of entry for tank vessels into U.S. ports. A tank vessel can be denied entry if it: has a history of accidents, pollution incidents, or serious repair problems; does not comply with applicable laws or treaty; discharges oil or hazardous material in violation of U.S. laws or treaties; does not comply with the applicable vessel traffic service; or is improperly manned.

Recognizing that tankers do not transit areas of particular concern in isolation, the Secretary is also directed to study and report on the feasibility of shore-based monitoring systems for all vessels trafficking within the Fishery Conservation Zone.

The principal amendment to the Tank vessel can be denied entry if it: Has a construction standards for United States and foreign tankers, product carriers, and other vessels which enter U.S. navigable waters or use any port or place under U.S. jurisdiction. These minimum construction standards are in most respects consistent with the provisions of the International Conference on Tanker Safety and Pollution Prevention. Depending on vessel size, and whether the vessel is new or old, these standards include: segregated ballast tanks; a crude oil washing system; an inert gas system; or dedicated clean ballast tanks.

The Coast Guard is also directed by the tank vessel act amendments to establish minimum personnel and manning standards for U.S. tank vessels and for foreign vessels entering the U.S. navigable waters for the discharge of oil or hazardous materials in any port or place under U.S. jurisdiction.

Finally, the amendment to 46 United States Code 214 directs the Coast Guard to establish eligibility requirements and sets certain minimum standards for the issuance of a Federal pilot's license.

I believe we have a good bill, one that is comprehensive and takes a systems approach to the problems at hand. It provides for minimum safe operating, construction, personnel and manning, and pilotage standards. I strongly urge your support of its passage.

Mr. Speaker, I would like to congratulate the gentleman from New York (Mr. BIAGGI), the chairman of the subcommittee, for the gentleman's long and very careful work in insuring what I think is a complete and very satisfactory bill which is before us today.

Mr. Speaker, I yield 3 minutes to the distinguished gentleman from California (Mr. MCCLOSKEY).

Mr. MCCLOSKEY. Mr. Speaker, I take this time, because in the report on this bill, the minority views that I submitted to that report indicated my concern that the provisions of the bill, as then written, went beyond the IMCO agreement which was so painfully negotiated by our representatives in London. The IMCO agreement was the subject of a breakthrough in February which finally achieved tough international standards at the instance of the United States. Those standards were relatively close to the provisions of this bill.

Mr. Speaker, I would like to commend the gentleman from New York (Chairman BIAGGI), the gentleman from Massachusetts (Mr. STUDDS), and the gentleman from Louisiana (Mr. TREEN) for the incredibly long and painful process they went through in drafting this bill and to state clearly that after examining the provisions of IMCO and discussing it with our representatives at IMCO, I am satisfied there are no serious differences of substance between this bill and the terms of the IMCO agreement. Because the bill appears to be reasonably consistent in matters of substance with the IMCO Treaty, I do not think it is an act of bad faith, as was once suggested by the Secretary of Transportation before the bill was amended.

Mr. GILMAN. Mr. Speaker, will the gentleman yield?

Mr. MCCLOSKEY. I yield to the gentleman from New York.

Mr. GILMAN. Mr. Speaker, I know the gentleman has acted as a congressional liaison in the Law of the Sea Conference and has been actively engaged in discussing some of the waterways safety regulations at that conference.

Is the gentleman also satisfied this bill meets some of those problems that have been raised in the Law of the Sea Conference and the proposed treaty our Nation has been urging?

Mr. MCCLOSKEY. Mr. Speaker, I do not think this agreement in any way conflicts with the Law of the Sea Treaty. There still remains a difference between our position at the Law of the Sea negotiations and the Ports and Waterways Safety Act; but this bill does not intrude in any way on that position, so far as I can tell.

Mr. GILMAN. Mr. Speaker, I thank the gentleman.

Mr. BIAGGI. Mr. Speaker, will the gentleman yield?

Mr. MCCLOSKEY. I yield to the gentleman from New York.

Mr. BIAGGI. Mr. Speaker, I want to thank the gentleman from California for these kind comments; but even more importantly, the gentleman's invaluable contribution. As the gentleman well knows, it is the purpose of our subcommittee and the chairman, under whom I serve on that subcommittee, to meet the objective, the stated goal, and try to accommodate all the concerns, without losing sight of the primary objective.

I daresay that it has been an arduous road. We are embarking on new areas, but I am satisfied that the solution we offer all Members and our country is a satisfactory one. It should produce the kind of relief and safeguards that we have been clamoring for and that the Nation as well as the world needs.

Mr. Speaker, once again let me say we are grateful for the gentleman's contribution.

Mr. MCCLOSKEY. Mr. Speaker, I want to thank the gentleman from New York (Mr. BIAGGI) and again congratulate him upon achieving the delicate balance between what we could achieve by international negotiations and what our own people expected us to impose as pollution control standards for tankers entering U.S. waters. It seems to me the gentleman has crafted a very fine compromise.

The concern that has been expressed by certain foreign nations that the differences between the precise language of IMCO and the precise language of this bill result in differences in substance has not been proven to me, and I am hopeful that Congress will enact the bill into law.

Mr. BIAGGI. Mr. Speaker, I yield 5 minutes to the gentleman from Wisconsin (Mr. ZABLOCKI).

Mr. ZABLOCKI. Mr. Speaker, I rise in support of H.R. 13311, the Port Safety and Tank Vessel Safety Act of 1978.

Mr. Speaker, I also want to commend the Committee on Merchant Marine and Fisheries, its chairman the gentleman from New York (Mr. MURPHY), our colleague, the gentleman from New York (MARIO BIAGGI), as well as the minority member of that committee, the gentleman from Michigan (Mr. RUPPE). I also commend the members of my own committee, the Committee on International Relations, including the gentleman from Massachusetts (Mr. STUDDS), for their efforts on this particular piece of very necessary legislation.

Mr. Speaker, this bill was sequentially referred to the Committee on International Relations on July 21, for consideration of subsections (A) and (B) of section 9. On August 3, by voice vote, the committee ordered the bill favorably reported with amendments.

The committee believes that section 9 of the Ports and Waterways Safety Act of 1972, which deals with international agreements, is an important provision. This section encourages the President to enter into negotiations with neighboring states and within international bodies to establish appropriate international standards to prevent and control pollution. The committee amendments to the section make explicit the President's authority not only to negotiate, but also to conclude and execute international agreements with respect to vessel standards and vessel traffic services.

The International Relations Committee has had a continuing interest in the efforts of international organizations to solve the global problem of prevention and control of marine pollution. The committee also has a general concern for the implications that domestic legislation to control marine pollution may have for U.S. foreign relations, particularly U.S. policy in multilateral agencies such as the Intergovernmental Maritime Consultative Organization (IMCO). The committee would like to congratulate the U.S. delegation to the recent IMCO Conferences for their hard work in successfully negotiating new international agreements in two important areas: One on tanker safety and pollution preven-

tion, and the other on standards of training and certification of seafarers.

Mr. Chairman, I would like to add that the Committee on International Relations recently received an aide memoire concerning this bill from the Governments of Belgium, Denmark, Finland, Italy, Japan, the Netherlands, and the United Kingdom. These governments expressed their concern that certain provisions of H.R. 13311 go beyond the recently negotiated IMCO Agreement on tanker safety and pollution prevention, to which the United States was party. While the committee supports the bill in its present form, as amended, it is incumbent on the International Relations Committee that these concerns be made known. I, therefore, include the text of the aide memoire in the RECORD at this point.

DEPARTMENT OF STATE,
*Washington, D.C., September 1, 1978.*

Hon. CLEMENT J. ZABLOCKI,
*Chairman, Committee on International Relations,*
*House of Representatives*

DEAR MR. CHAIRMAN: I have been asked by representatives of Belgium, Denmark, Finland, Italy, Japan, the Netherlands, and the United Kingdom to transmit to you the enclosed Aide Memoire to the Department of State concerning H.R. 13311.

In the Aide Memoire, the above-mentioned governments expressed their concern that the bill's provisions differ substantially from those agreed internationally at the February 1978 Intergovernmental Maritime Consultative Organization Conference on Tanker Safety and Pollution Prevention, to which the United States was party.

Thank you for your consideration.

Sincerely,

J. BRIAN ATWOOD,
*Acting Assistant Secretary for Congressional Relations.*

---

AIDE MEMOIRE

The Governments of Belgium, Denmark, Finland, Italy, Japan, the Netherlands and the United Kingdom refer to Bill HR13311 entitled the "Port Safety and Tank Vessel Safety Act of 1978", approved by the House of Representatives Committee on Merchant Marine and Fisheries on 22 June and 8 August and the Committee on International Relations on 3 August.

The above-mentioned Governments have noted with concern that the Bill contains provisions which go beyond the standards agreed internationally at the February 1978 Inter-Governmental Maritime Consultative Organisation Conference on Tanker Safety and Pollution Prevention. The agreements reached at that Conference, which was convened primarily in response to a timely initiative by the President of the United States, mark a noteworthy achievement in responsible international cooperation in IMCO and should lead to significant improvements in tanker safety and pollution prevention. The above-mentioned Governments therefore consider that it would be regrettable if the United States, on return from an international meeting at which its delegation (which included Congressional observers) participated fully in discussions with delegations of other nations, were to adopt different standards, applicable to foreign-flag tankers, in its national legislation. Such action would impede the free movement of international shipping, could not but undermine the value of international discussion in IMCO to which the President attaches importance, and might create a precedent for similar action by other nations.

The above Governments have welcomed the testimony presented by the Departments of State and Transportation and other witnesses on 27 July before the Subcommittees of the International Relations Committee, expressing concern about the unilateral provisions in HR13311 which parallels their own. They welcome the changes to the Bill made on 8 August, which they understand may have been in response to this testimony. Nevertheless, they still consider that there are differences of substance between the provisions of the Bill and those contained in the IMCO Protocol of February 1978, and express the hope that, in the light of the considerations outlined above, the Government of the United States will not enact national standards at variance with those agreed in IMCO.

Mr. BIAGGI. Mr. Speaker, I yield such time as he may consume to the gentleman from Ohio (Mr. VANIK).

Mr. VANIK. Mr. Speaker, I would like to ask the distinguished gentleman from New York (Mr. BIAGGI) whether in this legislation there is any requirement that there be special fire control systems or navigational procedures for vessels that are bringing into our ports highly explosive or volatile materials.

More and more the people from whom we are buying oil are going to insist that some of it come in here in processed, in gasoline, naphtha and in other forms.

As these shipments increase into this country, with refining going on offshore, what insurance do we have that these ships are capable of resisting and controlling a fire or an explosion that might break out on a vessel carrying highly inflammable or explosive materials?

Mr. BIAGGI. If the gentleman will yield, one of the purposes of the bill is to incorporate the type of design that would minimize the possibility of any inadvertent development, any catastrophe, any untoward incident.

The gentleman asks, further, what can we do in the event of an explosion. I would suggest at that point that we say a prayer. But on a more serious note, we are dealing with the law.

Mr. VANIK. I pray that we might write proper law here today.

Mr. BIAGGI. The gentleman's question dealt with the question of an explosion. If we are talking about design, design deals with structure, as far as carrying capacity, the safety and the ability to carry that oil safely and also the prevention of any possible fire and explosion. The ship would have to incorporate in its design the necessary firefighting equipment. But the important thing is, for the first time these vessels will be required, as a matter of law—not just a matter of proper seaman's practice, but as a matter of law—to have the proper kind of design, the proper kind of prevention equipment and procedures; and, of course, the proper type of firefighting ability. But if we are talking about the kind of explosion we see periodically, that it just goes up in the air, that is one of the things I do not know if we can deal with.

Mr. VANIK. Mr. Speaker, I commend the gentleman's committee and I commend the gentleman's efforts. Will there be any provision or any authority to provide that such vessels would probably operate at times of little commercial transport?

In other words, by allocating their movement to and from ports during times when there might be a minimum hazard of collision, a minimum hazard of exposure to the other vessels such as we do when we transport flammable and explosive material over bridges. On bridges we allow special security coverage, and at times when there is a minimal amount of other traffic, so that the hazard is reduced for that kind of catastrophe.

Mr. BIAGGI. The gentleman makes a valid point, and his theory is a substantial one. The Coast Guard has already embarked on this type of program in many ways. We are talking in terms of carrying hazardous substances, very volatile substances. In Boston, when that occurs all vessel traffic stops. The only vessel permitted to go is that vessel. We have a vessel-traffic control system which is being put into effect in the major ports of our Nation, a separate and distinct Coast Guard program, which should produce the kind of safe conditions we want.

Mr. RUPPE. Mr. Speaker, I yield 3 minutes to the gentleman from Louisiana (Mr. TREEN), the distinguished ranking member of the subcommittee that has developed this legislation.

Mr. TREEN. Mr. Speaker, first of all, I want to commend the chairman of the subcommittee, the gentleman from New York (Mr. BIAGGI), for his very diligent efforts and competent work in presenting this bill to the full committee and to the floor, the gentleman from Massachusetts (Mr. STUDDS), who brought his usual wisdom in the crafting of this bill, and the staff of both the majority and the minority, who have worked diligently on this bill.

Mr. Speaker, I join my colleagues in supporting H.R. 13311, the Port Safety and Tank Vessel Safety Act of 1978.

The use of petroleum has played a major role in the development of the U.S. economy. The continued need for oil for the foreseeable future is unquestioned. Currently, the United States imports about 43 percent of its oil requirements. Most of the oil imported into the United States comes by vessel, with over 96 percent imported on foreign vessels.

The amount of oil we import will increase. The United States presently imports over 7.7 million barrels of petroleum products a day. By 1980, the total should reach 10 million barrels a day. This constitutes a 71 percent increase in foreign imports between 1975 and 1980, and it is estimated will increase port calls by over 89 percent. These figures no not include the amount of petroleum which is not imported but moved by vessels in the domestic trade.

This increase in shipping activity will result in an increase in the danger of marine casualties resulting from groundings, collisions, and fires and explosions.

During the month of December 1976, a series of tanker casualties occurred. This included the grounding of the SS *Argo Merchant* 28 miles southeast of Nantucket which released an estimated 204,000 barrels of oil, and the massive

explosion of the SS *Sansinena* in Los Angeles harbor.

As a result of these incidents, the Secretary of Transportation established a special departmental task force to undertake a comprehensive review of marine safety and oilspill regulations. This review, and a subsequent interdepartmental review, constituted the basis for the President's initiatives on marine oil pollution of March 17, 1977.

Part of the President's initiative called for diplomatic efforts to improve the international system of inspection and certification of tankers, and for an early convening of the International Conference on Training and Certification of Seamen. These efforts resulted in the International Conference on Tanker Safety and Pollution Prevention of February 1978, and the International Conference on Training and Certification of Seafarers of June 1978.

H.R. 13311 amends the Ports and Waterways Safety Act of 1972, the Tank Vessel Act of 1936, and 46 U.S.C. 214 (concerning pilotage). The bill authorizes the Secretary of the Department in which the Coast Guard is operating to: Establish vessel operating requirements, including traffic services; establish fairways and vessel traffic separation schemes; establish conditions of entry into U.S. ports; provide for waterfront safety; provide for eligibility requirements for federally licensed pilots; establish a Marine Information System; regulating lightering; establish minimum manning standards for United States and foreign vessels; and establish minimum construction standards for large tankers, product carriers and other vessels which enter or use any port or place in U.S. jurisdiction. The minimum construction standards adopted by H.R. 13311 are basically the same as those adopted at the International Conference on Tanker Safety and Pollution Prevention. Depending on the size of the vessel, the minimum standards may include: Segregated ballast tanks; a crude oil washing system; and inert gas system; and dedicated clean ballast tanks.

Rather than discuss each individual provision of the bill, I would like to highlight several sections I feel are of significance.

MINIMUM CONSTRUCTION STANDARDS

Vessels engaged in the U.S. coastwise trade are protected by law from competition from foreign vessels. In return for this protection, the vessels must be built in the United States and owned by U.S. citizens. The coastwise trade laws also provide that any vessel entitled to engage in coastwise trade which is "rebuilt" will lose that privilege unless the "entire rebuilding, including the construction of any components of the hull or superstructure of the vessel" is done in the United States, its territories, or possessions.

H.R. 13311 will require the installation of segregated ballast tanks, a crude oil washing system or an inert gas system on certain vessels. The Coast Guard has ruled that the installation of this equipment on vessels entitled to engage in coastwise trade is not "rebuilding" within the intent of the coastwise trade laws. This is perplexing, since the U.S. Customs has also ruled that the installation of this equipment on U.S. vessels in foreign shipyards would be regarded as a rebuilding through an alteration of the hull and, therefore, not dutiable as a "repair of equipment" under the Tariff Act of 1930.

H.R. 13311 makes it clear that the installation of this required equipment on vessels entitled to engage in the coastwise trade must be effected within the United States, its territories or possessions. Vessels which fail to comply with this provision lose the privilege of engaging in the coastwise trade.

PILOTAGE

Under the admiralty and martime jurisdiction of the United States, Congress clearly has the authority to determine whether pilotage will be regulated by the Federal or State government, and under what terms or conditions. However, except for pilotage in the coastwise trade and on the Great Lakes, Congress has, since 1978, felt it best to leave the regulation of local pilotage areas to the various States. This was because different conditions existed in each State with regard to its harbors, ports and waterways and, therefore, it was best to allow the States to promulgate different rules based on local knowledge of these conditions. For the same reason, it was thought best to allow the States to determine the competency of pilots to navigate these local conditions.

Recently, the Coast Guard has sought to exercise disciplinary authority over pilots. This is particularly true with regard to Federal licenses which are required as a condition of a State pilot's license. However, the courts have denied the Coast Guard this authority.

Several individuals who testified before the Committee on Merchant Marine and Fisheries stated that "statistics" indicated a need for Federal regulation of State pilotage. However, when asked for these statistics, none were forthcoming. On the other hand, the American Pilot's Association submitted to the committee a letter from the Chief of the Coast Guard's Office of Merchant Marine Safety which states that based on spot checking "the actions of the State pilot commissioners are about the same as the (Coast Guard's) administrative law judges."

The State pilots feel that only they have the specialized knowledge of local waters and conditions necessary to regulate pilotage properly. They also feel that over the years they have done a very good job. Since this system of pilotage has been in existence since 1789, I feel we should have strong proof that the system is no longer functioning properly before we change it. That proof was simply not presented. H.R. 13311 upholds State regulation of pilotage by providing that the Federal Government may require a federally licensed pilot on a vessel engaged in foreign trade only where "not otherwise required by State law."

LIGHTERING

Lightering is the practice of transferring cargoes at sea from a large deep-draft vessel to a shallow-draft vessel for subsequent transfer ashore. The practice of lightering oil from large crude tankers, or "superships," to smaller tankers at sea has increased greatly due to the inability of most new large tankers to enter the relatively shallow ports of the United States. This transfer may occur very close to our shoreline, or as far offshore as 100 or 200 miles. Testimony indicated that as much as 1 million barrels of oil are lightered daily in my area of the country, the Gulf of Mexico, alone.

Currently, the practice of lightering is not regulated when it occurs beyond our territorial jurisdiction. The oil industry testified that lightering has been going on for many years under strict industry guidelines, and that its safety record was excellent. However, there is always the possibility that less reputable operators may become involved in lightering operations. H.R. 13311 will provide legislative authority to control lightering operations by prohibiting any tanker, which has engaged in lightering, from unloading any cargo of oil or hazardous material in any port or place under the jurisdiction of the United States unless the lightering is performed in accordance with regulations isued by the Secretary of Transportation. These regulations would apply to lightering in the navigable waters of the United States; waters over which the United States asserts exclusive management authority; and waters superjacent to the Outer Continental Shelf.

I believe this bill is a good bill and I urge its passage.

Mr. BIAGGI. Mr. Speaker, will the gentleman yield?

Mr. TREEN. I yield to the gentleman from New York.

Mr. BIAGGI. Mr. Speaker, I would like to thank the gentleman from Louisiana (Mr. TREEN), the ranking minority member of the subcommittee, for his kind comments; but even more importantly, for his diligence and his contribution, the absence of which would have resulted in a lesser bill for our consideration today.

Mr. TREEN. I thank the gentleman.

Mr. RUPPE. Mr. Speaker, I yield 3 minutes to the gentleman from Washington (Mr. PRITCHARD).

Mr. PRITCHARD. Mr. Speaker, I rise in support of H.R. 13311, an amendment to the Ports and Waterways Safety Act which will provide for an overall reduction of the risk associated with the marine transport of oil. Chairman BIAGGI has been diligent in putting together a package of legislation which meets our Nation's need to provide greater protection for the marine environment.

In the Puget Sound area many of the citizens are reluctant to see any increase in the level of oil transport because of such incidents as the *Argo Merchant* and the *Torrey Canyon* disasters. In Puget Sound, being a deepwater estuary, a large oil spill could have drastic impacts on marine life. Therefore, it is essential that we enact this legislation which will provide clear guidelines for safe tanker

operations. This legislation would provide for an improved vessel traffic safety system, by applying available technology. This legislation includes standards for new and existing vessels with respect to segregated ballasts, crude oil washing systems, inert gas systems, steering gear systems, and navigation equipment. It also provides for improved personnel qualifications and manning standards for all oil tankers using U.S. ports. This legislation is important in that it encourages the application of existing and new technologies to the marine transport of oil. There are many available technologies which could significantly reduce the risk of oilspills in the marine environment. Given the importance which fishermen, recreationists, and others attach to an unspoiled marine environment, I think it essential that we begin to invest in reducing the risk of oilspills. I feel that this bill is a major move in this direction and I strongly support it.

Mr. RUPPE. Mr. Speaker, I yield 3 minutes to the gentleman from New York (Mr. GILMAN).

Mr. GILMAN. Mr. Speaker, I rise in support of H.R. 13311, a bill to amend the Ports and Waterways Safety Act of 1972, and commend the gentleman from New York (Mr. BIAGGI), the chairman of the subcommittee of the Committee on Merchant Marine and Fisheries, and the ranking minority member, the gentleman from Louisiana (Mr. TREEN) for their diligence in bringing this measure to the floor of the House.

H.R. 13311 is part of a concerted effort by the United States to join with other nations of the world in an effort to prevent pollution of the marine environment. This much-needed legislation will help provide for the safety of U.S. ports and waterways, the safety of tank vessels, and the protection of the marine environment.

In recognition of the fact that marine pollution resulting from oilspills is a global problem, section 9 of this bill encourages the President to enter into negotiations with neighboring states and within international bodies to establish appropriate international standards to prevent and control pollution.

In this regard, some concern was expressed by the executive branch about the implications of this legislation since some provisions contained in it exceed international standards agreed upon by the United Nations' Intergovernmental Maritime Consultative Organization (IMCO). I share these concerns as they relate to our efforts to gain international cooperation, but I feel that the overall positive effect of this legislation requires our support. Marine pollution knows no boundaries. To be effective, we must approach the problem in a global fashion. The legislation before us, H.R. 13311, provides the tools to coordinate U.S. efforts in the international arena.

As our distinguished chairman of the Committee on International Relations (Mr. ZABLOCKI) noted, on September 1, 1978, the representatives of Belgium, Denmark, Finland, Italy, Japan, the Netherlands, and the United Kingdom transmitted an aide memoir with regard to this legislation. While those nations welcomed the action of the Congress to join in support of the agreements reached at the IMCO meetings, they expressed their concern about the unilateral enactment of national standards at variance with those IMCO agreements.

It was in response to such international concerns that our Committee on International Relations added language to authorize the President not only to negotiate, but to conclude and execute international agreements with respect to vessel standards and vessel traffic services.

Accordingly, Mr. Speaker, I urge my colleagues to join with me in support of this important legislation.

Mr. RUPPE. Mr. Speaker, I yield 5 minutes to the distinguished gentleman from California (Mr. LAGOMARSINO).

Mr. LAGOMARSINO. Mr. Speaker, I rise in support of the bill H.R. 13311, the Port Safety and Tank Vessel Safety Act of 1978. This legislation is sorely needed to protect the Nation's waterways, harbors, fisheries resources, and coastal communities from tragic marine transportation accidents. From the *Torrey Canyon* to the *Amoco Cadiz* we have, I hope, learned valuable lessons about the critical need to improve safety standards among American flag vessels and foreign vessels entering American waters, improve traffic management systems, and conditions in the Nation's harbors to eliminate wherever possible the threat of potential disasters. As the size of the massive vessels used to transport the Nation's energy supplies continues to increase, the problem, and the potential magnitude of tanker accidents grows. We must act and I am pleased that today we have such a responsible bill before us.

I would like to commend the gentleman from New York (Mr. BIAGGI) and the subcommittee for their tireless efforts to deal constructively and effectively with the substantial and complex problems of tanker and harbor safety. The bill before us today is a good one and one which I urge my colleagues to support it.

At this time, I would like to take a few minutes and outline for the benefit of my colleagues the basis for my strong support and interest in H.R. 13311.

Mr. Speaker, my congressional district encompasses the Santa Barbara Channel and adjoining coastal areas which have the dubious distinction of experiencing the first major oilspill in the United States. In fact, many believe that the 1969 oilspill, which poured millions of gallons of crude oil into the channel, was the catalyst for the environmental movement. Following the massive spill of 1969, we are perhaps more sensitive to the dangers inherent to offshore energy activities—both OCS exploration and production, and marine transportation systems. Yet at the same time, we recognize this Nation's need for increased domestic energy supplies and have not sought unilaterally to put a halt to all energy activities which impact the channel. We do expect, however, that we make these kinds of activities as safe and as environmentally compatible as is reasonably possible. Concrete steps can, and must, be taken to lessen the potential hazards and environmental impacts which result from offshore energy activities without unduly restricting domestic energy production, transportation, or distribution. That is the purpose of the bill before us today and I believe the legislation meets this criteria.

It would be my hope that efforts to improve and enhance tanker safety and marine transportation systems would not stop with this bill. While this legislation makes a serious and important step to deal with tanker safety we must continue to identify, analyze, and deal constructively with potential problems which threaten public safety and environmental integrity. It is my hope that the Congress and the Coast Guard would identify hazardous and congested shipping traffic patterns and implement a higher level of traffic management—before accidents happen. The magnitude of a supertanker accident and the potential for environmental property and commercial damage clearly should prompt us to increase the level of safety to prevent accidents and not just to respond to them after they happen and the damage is done. One way to fulfill our responsibilities is to increase the level of traffic management systems in and around hazardous shipping lanes.

The Coast Guard has recently implemented a navigational system in Puget Sound in Washington which allows them to monitor and communicate with all traffic in the area. The system operates much the same way as the sophisticated traffic management capabilities of the Nation's commercial airways. Individual vessels can be monitored and alerted to potential danger in time to take evasive action. A vessel communication system is also now in use in San Francisco Bay. I believe we should seriously consider expanding these systems to other areas of the Nation's waterways to improve safety and help alleviate the danger of tanker accidents.

I was pleased to be able to participate in the development of this legislation, through hearings which the subcommittee, chaired by my colleague and friend from New York, Mr. BIAGGI, held in Santa Barbara this summer. At the hearings, testimony was offered indicating the desirability of establishing a vessel traffic monitoring system in the Santa Barbara Channel. Several companies carrying taps crude have volunteered to cooperate in such a study, in an effort to determine the feasibility, assets and liabilities of using different routes through this area. Such a test would aid immensely in deciding the safest and best way to handle this traffic. Specifically, I would like to establish: First, continuous radar monitoring of the Point Conception—Point Fermin and Gulf of Santa Catalina traffic separation schemes; second, establish a suitable radio network to permit communication with all vessels

using the traffic separation schemes; third, undertake field tests examining the various tanker routing options available off southern California and the merits of various electronic aids; and fourth, require a report of Congress on the results of these tests and related actions.

I would like to ask my colleague, the gentleman from New York (Mr. BIAGGI), whether the subcommittee will continue to work with me and my staff and the Coast Guard in order to resolve this issue to the satisfaction of all the interested parties?

Mr. BIAGGI. If the gentleman will yield, as the gentleman knows we did respond to his initial request by going to Santa Barbara and making firsthand observations and listening to the testimony of the witnesses.

Of course there is a problem which requires further attention, and I pledge to the gentleman that our committee and our staff will continue to work closely in attempting to find some suitable solution.

Mr. LAGOMARSINO. I thank the gentleman.

But that is in the future. Today, we have an opportunity to take concrete action now to help improve safety on the shipping lanes and in the harbors. I urge adoption of the bill H.R. 13311.

Mr. RUPPE. Mr. Speaker, I yield such time as he may consume to the gentleman from Massachusetts (Mr. STUDDS), who has worked probably harder than anyone else to see that we have before us an effective bill on the floor today.

Mr. STUDDS. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I rise in strong support of H.R. 13311, the proposed Port Safety and Tank Vessel Safety Act of 1978.

This legislation was promised to the American people in the aftermath of the *Argo Merchant* and other tanker accidents two winters ago. Its primary purpose is to reduce the amount of oil pollution resulting from tanker traffic in American ports and waterways in future years.

Accordingly, this legislation will establish a series of minimum construction and operating safety standards for tankers which must be met as a condition of entry into a U.S. port. These include:

The installation of segregated ballast tanks or a crude oil washing system on all new crude oil tankers over 20,000 deadweight tons, on all existing tankers which exceed 40,000 dwt., and on existing tankers between 20,000 to 40,000 dwt., which are more than 15 years old beginning in 1986;

All crude oil tankers over 20,000 tons, new and existing, will be required to install a gas inerting system, to prevent explosions during loading and unloading operations;

All tankers above 10,000 gross tons will be required to have on board a collision avoidance system, an electronic position fixing device, adequate communications equipment, a sonic depth finder, a gyrocompass, and up-to-date charts;

All crude oil tankers above 5,000 dwt. which are carrying oil from an offshore oil facility to shore will be required to have segregated ballast tanks; and

No tanker will be allowed in a U.S. port if it does not have at least one licensed deck officer on the navigation bridge who is capable of clearly understanding English, or if it comes from a country whose crew training standards have been found by the Secretary of Transportation to be inferior to those of the United States.

The major controversy surrounding this legislation has involved the extent to which it differs from the international tanker safety agreement negotiated earlier this year in Geneva. This agreement—called the IMCO agreement—represents a major step forward in international cooperation on marine pollution issues, and the Coast Guard deserves high praise for the success which has been achieved.

The primary failure at IMCO, however, was the decision of the negotiators to refrain from requiring new construction standards on existing oil tankers of less than 40,000 dwt. The Merchant Marine and Fisheries Committee, while giving due attention to the international agreement in most areas, wisely chose to extend segregated ballast requirements to those tankers which are between 20,000 to 40,000 dwt., and which are more than 15 years of age. Due to administration objections, this requirement will not go into effect until 1986.

The importance of the committee's decision should not be minimized, for without it, this tanker safety bill would be little more than a sham. If the Congress chose, as did the international negotiators, to ignore tankers below 40,000 dwt., particularly the older tankers in this category, we would be ignoring the primary reason for this legislation. The *Argo Merchant*, for example, was a 28,000 dwt. vessel of more than 15 years, which would probably not have been operating at all if the provisions of this bill had been in effect 2 years ago. The international agreement, however, would not have affected the *Argo Merchant*, or comparably sized rustbuckets flying the flag-of-convenience banners of Liberia, Panama, or Greece, at all.

The statistics speak for themselves:

About one-half of all tanker pollution incidents in our waters are caused by tankers over 15 years old;

Fifty-seven percent of Panama's crude oil tankers and 68 percent of their product carriers entering U.S. ports in 1976 were over 15 years old; similar percentages apply with respect to the Liberian and Greek fleets;

Thirty-nine percent of Panama's tankers and 66 percent of their product carriers entering U.S. ports are under 40,000 dwt; similar percentages apply with respect to the Greek and Liberian fleets;

Tankers from Liberia, Greece and Panama accounted for 59 percent of all entries into U.S. ports in 1976; and

Well over 50 percent of tanker pollution incidents in U.S. waters are from tankers below 40,000 dwt.

Any meaningful tanker safety legislation must deal with the tankers which are responsible for the bulk of the tanker accidents. I am grateful that H.R. 13311 meets this standard.

The oil transportation safety problem is an extremely important one for the coastal regions of the United States, and, indeed, for the entire country. Our continued dependence on foreign oil, the expansion of offshore oil drilling operations into new areas of the country, and the beginning of the Alaska pipeline trade, all contribute to the expanding tanker and barge traffic which threatens our coastlines.

The recent *Amoco Cadiz* spill off the coast of France has resulted in the virtual destruction of the economy of an area very similar in its beauty and value to the coast of Cape Cod. If the prevailing winds had been different, the entire cargo of the *Argo Merchant* might have washed up on the shores of Nantucket and Martha's Vineyard. Smaller spills, from barges operating in the Cape Cod Canal and Chesapeake Bay, have decimated shellfish populations, closing commercial operations for months and years at a time. The need for tanker safety legislation is urgent. H.R. 13311 is a significant improvement over existing law; it represents the best possible bill which can be approved by the House this session; it is long overdue, and it ought to become law before this Congress adjourns.

Mr. Speaker, there is something singularly nonpartisan about an oilspill, or about an explosion in a tanker, or about one's intense concern for the integrity and the sanctity of the marine environment.

I have enjoyed immensely my experience in the past 2 years in working with this committee and this subcommittee on the oilspill liability and the tanker safety legislation, both of which bills were aptly characterized by the chairman of the subcommittee as "landmark."

The island of Nantucket, 27 miles off whose shores the *Argo Merchant* grounded two winters ago, is in my district. The legislation we are about to pass today is in response to that incident, and in response to the tragic oilspill off the coast of Brittany in northwestern France earlier this year, and it is my fervent hope that the Port Safety and Tank Vessel Safety Act, along with the oilspill liability legislation, will be passed this fall and will become the law of the land.

Let me also say that we owe a deep debt of gratitude to the gentleman from New York (Mr. BIAGGI), the gentleman from Louisiana (Mr. TREEN), and other members of both majority and minority who have worked so long and so hard in bringing forth this effective legislation.

Mr. HUGHES. Mr. Speaker, will the gentleman yield?

Mr. STUDDS. I am happy to yield to the gentleman from New Jersey (Mr. HUGHES).

Mr. HUGHES. Mr. Speaker, I rise in strong support of the Port Safety and Tank Vessel Safety Act of 1978.

I am proud to be a cosponsor of this

legislation. It is one of the major environmental measures being considered by the 95th Congress. It represents a landmark in our efforts to protect the Nation's shorelines and coastal waters from the devastation of a major oilspill.

The need for the legislation is readily apparent to anyone who has followe the news reports of the *Argo Merchant*, the *Amoco Cadiz*, and the other major oilspills in the last couple years. The *Amoco Cadiz* spill, for example, covered miles of the French coastline with oil slicks, not only creating a terrible mess on the beaches, but wiping out valuable shellfish beds and killing waterfowl as well. The daily traffic along our coasts of vessels carrying hundreds of thousands of gallons of oil makes it clear that a tanker safety bill is necessary.

The need for legislation is also borne out by a study by the National Academy of Sciences. According to the study, the marine transportation of oil and petroleum products is the greatest single source of oil pollution in the world's oceans. Tanker accidents, normal tanker operations—cleaning and deballasting, drydocking, bilges, and terminal operations are the major cause of oil entering ocean waters, accounting for approximately 35 percent of oil pollution in marine waters, the study reports.

Consequently, it is noteworthy that this legislation establishes a broad program to prevent the pollution of our waters by tankers and their operations. The bill sets in statute tough new standards for the design, construction, operation, and manning of all tankers, foreign and domestic, that use our ports and navigable waters. Under the bill, tankers must make use of the best available technology to prevent pollution, unless the economic impact of such technology clearly outweighs its benefits. In addition, the bill calls for an effective inspection and enforcement program for these tankers.

One of the major initiatives in the bill is its focus on the serious problems caused by tankers between 20,000 and 40,000 deadweight tons that are at least 15 years old. To be candid, many of these aging vessels are nothing more than rustbuckets. Moreover, in terms of oil spilled, these vessels are, by far, the greatest threat to our marine environment. It is thus significant that the legislation requires that, by January 1, 1986, these vessels must be refittted with either segregated ballast or crude oil washing systems. Otherwise, they must be taken out of service altogether.

In another major initiative, the legislation grants the Coast Guard the authority to prohibit foreign vessels with histories of unsafe operations from entering our ports and navigable waters. This is the first time the Coast Guard has been given this authority by statute. The authority also enables the Coast Guard to bar entry to foreign vessels that illegally discharge oil or hazardous materials, violate applicable vessel traffic service requirements, or fail to have a crew adequately trained and qualified in accordance with the Tank Vessel Act.

Another significant initiative in the bill has a special importance to south Jersey, the area I am privileged to represent in the Congress. About 60 miles off the shores of south Jersey, a number of oil companies are engaged in exploratory drilling for oil and gas. If successful, the exploratory drilling will lead to actual production in the next several years. Under the bill, any tanker over 20,000 deadweight tons transporting oil produced from a facility on the Outer Continental Shelf will be required to have segregated ballast tanks or be operated with dedicated clean ballast tanks. This requirement, I feel, will strongly encourage the oil companies to transport oil and gas ashore through pipelines, a method with much less risk to the environment.

The provisions I have just described, along with the many other initiatives in the bill, will provide needed protection to our oceans and coastal environment. The legislation is stringent but fair, and fully deserves the support of this House.

I urge my colleagues to vote for it.

● Mr. MURPHY of New York. Mr. Speaker, H.R. 13311 is a bill to improve the safety of our ports and waterways, to improve the operation of tankers transiting our waters and to improve the protection of the marine environment from the threat of pollution.

The United States is the greatest trading nation in the world, and billions of tons of cargo move into and out of our ports each year. Ever larger vessels ply our waters, carrying every imaginable type of raw material and finished product to meet the needs of our economy and send goods to our trading partners overseas.

As more and more traffic moves through our ports, it is obvious that the increased congestion creates problems brought on by the increased risk of accidents to the vessels involved, and it is a continuing battle to devise means to reduce the likelihood of those potential accidents, which not only threaten injury and loss of life, but also economic loss resulting from damage to vessels and cargo, and environmental damage ensuing from the release of polluting materials into the marine environment.

The list of laws involving the construction, operation, and manning of vessels is a long one, going all the way back to the founding of our Nation. In almost each case, the enacted law addressed new measures necessary to control specific problems involved in changed methods of operation or the adoption of new technologies, such as the change from sail to steam, or the later development of the gasoline engine.

The needs are continuing ones, and the latest involve the increased congestion in our waters, the ever increasing number of foreign vessels calling at our ports, the ever larger vessels being built, the increased reliance on sophisticated equipment, the numerical explosion in the types of exotic cargoes being transported, and the increased need to preserve the quality of our marine environment from massive deterioration through pollution.

One of the laws addressed to the most recently perceived needs was the Ports and Waterways Act of 1972 whose enactment, I am proud to say, was one with which I was involved. That act was an extremely significant one. For the first time, it created permanent authority in the Secretary of Transportation to address the problems of port safety. It authorized him to begin the creation of vessel traffic systems in our waterways designed to reduced vessel collisions and assist in maintaining an orderly flow of marine traffic to the benefit of the marine industry and the country. It also made more specific his authority over the construction, operation, and manning of the increasing number of vessels carrying cargoes in bulk which were either flammable or combustible, or otherwise hazardous, constituting a threat to the safety of their personnel and to the surrounding areas through which they passed.

The Ports and Waterways Act has served us well, but its implementation has demonstrated the need for some refinement and expansion. H.R. 13311 accomplishes that purpose.

The bill, in effect, amends and reenacts the Ports and Waterways Safety Act of 1972 and the Tank Vessel Act of 1936, already amended several times, most recently by the Ports and Waterways Act, itself. In so doing, H.R. 13311 incorporates provisions to remove ambiguities from present law and to mandate new requirements to improve the safety of vessels and to lessen their threat to the marine environment. While I would not describe the changes as massive, they are necessary and significant.

In relation to vessel traffic systems, the Secretary of the Department in which the Coast Guard is operating first, is given broadened authority to establish traffic services in certain areas outside the territorial limits, pursuant to international agreements—which the President is authorized and encouraged to negotiate; second, is authorized to require certain advance information for vessels destined for the United States; and third, is given more positive control to terminate the movement of vessels which he has reason to believe are in violation of law or regulation, until the matter is clarified. In addition, the Secretary is authorized to establish safe access routes for vessels proceeding to and from U.S. ports and to issue regulations governing the use of such routes.

In connection with the entry of vessels into U.S. waters, specific requirements are listed which are designed to insure that the vessel is not likely to constitute a danger to the United States, including the necessary furnishing of advance information which will be useful to the Secretary to make appropriate determinations, both as to likely condition of the vessel and of value in responding to any incident in which the vessel might become involved.

In developing necessary regulations, the Secretary is specifically directed to establish procedures, in addition to the rulemaking process, which should guarantee that such regulations are developed with full cognizance of the views of all

interested parties, including Federal agencies, State, and local officials, all segments of the marine transportation industry, environmental groups, and concerned individuals.

In amending the Tank Vessel Act, the bill establishes minimum standards that are mandatory for certain vessels, varying between vessels according to their size, the types of cargo being carried, and whether the vessel is a new or existing one. Some of the features involved are segregated ballast tank construction, protectively located, crude oil tank washing systems, cargo tank protection systems, dual radars, steering gear control systems with backup features, and specific navigational and communications equipment. In addition, there are specific requirements related to personnel licenses, qualifications, training, competence, physical fitness, and specific duties.

While the approach taken to personnel on foreign vessels is somewhat different from that taken to those on U.S. vessels, essentially the Secretary is given broadened authority to insure that any foreign vessel operating in U.S. waters, and any U.S. vessel operating anywhere, is manned with a sufficient crew, competent and adequately trained. Foreign vessels operating in U.S. waters are also required to meet the same construction, equipment, and operating standards as are applicable to U.S. vessels.

The bill also requires the Secretary to establish an expanded national inspection program designed to insure compliance with applicable laws and regulations and to issue certificates of inspection or compliance attesting to such compliance. He is also directed to establish a marine safety information system which will contain data, promptly retrievable, relating to any tank vessel operating in the navigable waters of the United States, including details of its ownership, a history of its accidents or repair problems, a record of its inspections or examinations, and details of its compliance with applicable financial responsibility requirements. Finally, the amendments provide regulatory authority in relation to offshore lightering operations and impose specific sanctions for violations of law involving dumping of tank washings at sea, in preparation for loading at a U.S. port.

The bill resulted from long and careful consideration of the issues. It received a large part of its impetus from the rash of tanker accidents in December 1976, starting with the grounding and breakup of the tanker *Argo Merchant*, off Nantucket Island, in the early morning hours of December 15, resulting in a massive pollution of the surrounding waters with fuel oil. With total loss of ship and cargo and an indeterminate damage to the fisheries resources of the area, it was followed shortly thereafter with several other accidents, including the explosion and fire on board the tanker *Sansinena* loading fuel in Long Beach, Calif., with attendant loss of life and extensive damage to port facilities. These accidents made it even more obvious that tightened requirements relating to tankers, particularly foreign flag tankers, should be carefully considered.

In early 1977, the Subcommittee on Coast Guard and Navigation felt what was even more crucial was the establishment of a comprehensive liability and compensation fund, created to protect damaged parties, legislation that had been considered in the 94th Congress but was not finally enacted as it was overtaken by time in the waning days of that Congress. Immediate attention was given to that aspect of the problem and on September 12, 1977, this House passed H.R. 6803, establishing such a fund. Hopefully, the other body will complete action on that bill shortly, and we can carry that legislation to final conclusion.

In the meantime, early in the present Congress, the other body addressed its first attention to the issues addressed by this bill and passed S. 682, which is now pending in this House. Upon completion of this bill, it is my intention to move to take that bill up for immediate consideration and amend it with the language contained in this bill.

Action on the various House bills and on S. 682 were postponed to await the outcome of international negotiations, held in London at the instigation of the United States to carry out the President's declared intention to solve the problems, if at all possible, through international action. The results of the February Conference on Tanker Safety and Pollution Prevention and those of the June–July Conference on Training and Certification of Seafarers reflect great credit on those governments participating, in reaching international solutions, and the U.S. delegation is to be commended for achieving many of its goals.

The bill before you today has incorporated those agreements as minimum standards which the Secretary must apply by regulation, without waiting for them to come into force. In addition, the bill includes requirements for tankers between 20,000 and 40,000 tons, 15 years old which, by 1986, must meet certain standards in order to call in U.S. waters. While this requirement does, technically, go somewhat beyond the requirements of the international agreement, it is consistent with the goals announced in one of the conference resolutions directed to dealing with all existing tankers of comparable size by 1986. Because the older, smaller tankers constitute such a large part of those transporting oil cargoes in our waters, the committee felt it imperative to address the problem, at least in some measure, now, without awaiting the final international solution. Should a reasonable alternative develop internationally, by 1986, we can, of course, act to bring our requirements into conformity.

When the original report on the bill was filed, included was an expression of minority views by one member, indicating an intention to propose certain amendments on the floor. Consideration of his views resulted in some changes, adopted by the committee, which meets his basic concerns. Those changes have been incorporated in the committee amendments to the bill, enabling us to bring that bill up under suspension of the rules, rather than adding further to the long list of bills awaiting hearings before the Committee on Rules.

In addition, the Committee on International Relations, to whom the bill was sequentially referred, has proposed some strengthening of the language relating to negotiations on international agreements. Those amendments are also included in the bill before us today, and I wholeheartedly support them.

The bill is a comprehensive bill, an effective bill, a well reasoned bill, and a badly needed one. I ask for your support in its passage.●

● Mr. LEGGETT. Mr. Speaker, as chairman of the Subcommittee on Fisheries and Wildlife Conservation and the Environment—and as a member whose district borders on one of the greatest waterways and port areas of this great Nation—the San Francisco Bay—I join my colleagues on the Merchant Marine and Fisheries Committee in the House to support passage of H.R 13311.

I have been, and continue to be, gravely concerned over the safety of our ports and the protection of our marine environment. I need not remind you that not only have the Northeast and Southwest suffered tank vessel casualties and marine pollution incidents—as a result of marine disasters and ineffective enforcement and control—but so have many other ports along our massive coastline. The collision of the tankers *Arizona Standard* and *Oregon Standard* in San Francisco Bay on January 18, 1971 still remains fresh in the memories of many of my constituents and many other Americans concerned with protecting our environment and interested in marine safety.

Existing law has not been completely satisfactory for a number of reasons, and we hope that this bill will close the loopholes and provide for aggressive supervision and control of all tank vessels—foreign and domestic. We can only provide the administration with the tools to do the job, and we certainly hope that the enforcers, the Coast Guard, will now pursue a vigorous policy which assures the denial of port access to vessels which are substandard. These deteriorating and inadequately maintained vessels, and those that are inadequately or incompetently maintained, pose the greatest hazards to our marine environment and to other ships and crews.

Mr. Speaker, the legislation before the House is the result of 3 years of work by the Merchant Marine and Fisheries Committee. We have worked closely with the administration and have watched closely the proceedings of the International Conference on Tanker Safety and Pollution Prevention held in London in February 1978. Our bill is a reasonable effort to place the United States at the forefront of the international community in this area, a move I believe all Americans will support who have witnessed the effects of oilspills in the last several years.

Since 1972, there has been a massive increase in the importation of oil and oil products, particularly crude oil. The United States is now importing more than 8 million barrels of crude oil every day—or more than a quarter of the total oil moving in worldwide trade. Approximately 35 tank vessels enter U.S. ports every day. Even if the President's energy package is passed and the rate of in-

crease in imported oil slows down, the volume of tanker movements in U.S. ports will continue at a high level for many years to come.

If the United States is to protect itself against damaging oilspills and promote marine safety, a comprehensive national policy is needed. The framework for such a policy is contained in this legislation.

Mr. Speaker, the Port Safety and Tank Vessel Safety Act of 1978 contains in statutory language for the first time a prohibition against unsafe vessels and vessels with a past history of violations for carrying oil or other hazardous material in the navigable waters of the United States. In another strong section of the bill, this measure requires the Secretary of Transportation to adopt minimum construction and equipment standards for ships operating in American waters. Such a requirement goes beyond vague directions that the Secretary promulgate regulations creating such standards. The Merchant Marine and Fisheries Committee, after lengthy consideration, and consultation with all concerned parties, has placed these standards in the statute. I believe this vigorous policy will clearly signal our intentions to the international merchant marine community and insure that firm action is taken by the administration to implement his legislation.

I would also point out that the standards adopted by the committee in almost all instances mirror those agreed upon by the London conference. Should the basic convention agreed upon by the participating nations be adopted by 15 states with a total of 50 percent of the world's gross tonnage on the vessels covered, the convention's requirements would become applicable to all participants. The target date for entry into force of the Safety of Life at Sea Convention was established as June 1979, and the target date for entry into force of the Marine Pollution Convention was established as June 1981. By adopting this legislation today, the Congress will create the mechanism for U.S. participation in this convention and allow our Coast Guard to energetically enforce its requirements. Additionally, we will signal the international community that the United States takes tanker and port safety quite seriously and passage of this legislation will place the United States at the forefront of maritime nations in the area of established strict, yet sanely drafted, laws governing maritime safety and pollution requirements.

As chairman of the subcommittee which has primary jurisdiction over the 200-mile fishery conservation zone, it might appear that I do not have any sympathy or understanding for the international aspects of maritime and tank vessel safety. Quite to the contrary, I do recognize the problems of the international maritime community, and I believe we have accommodated their concerns. We have, in this bill, also indicated our concern over the need to move the international community along at a faster pace—and the need to consider broader and wider international standards. I believe this is a very responsible position.

Mr. Speaker, before I close, I would like to highlight one section of this bill, section 3, addressing the 200-mile fishery conservation zone, which I consider to be very important and which quite possibly may lead to further advances in our ability to control the ocean just off our coastline. Section 3 of the bill directs the Secretary of Transportation to initiate, in consultation with other Federal departments and agencies, a study looking toward a comprehensive shorestation system for monitoring vessels operating within 200 miles of our coasts. He is directed to report his findings to the Congress within 2 years after enactment of the act, describing certain features as to each possible approach, together with his recommendations for a single, comprehensive, cost-effective system. A thorough reasonable authorization for appropriations of $500,000 for each of the fiscal years 1979 and 1980 is provided.

Our efforts to monitor our 200-mile fishing zone with currently available ships and aircraft needs strengthening. Unless we are prepared to spend substantial more funds on the Coast Guard, the type of system this study is commissioned to develop is sorely needed. Even though I will have retired from the Congress when this study is complete, I want to assure my colleagues that it will receive my close attention upon completion and I trust that you also will weigh the results of this study seriously.

Three years ago, the Congress reviewed the progress of the Law of the Sea Conference and its deliberations on appropriate national fishing limits. We chose to get out front and mandate a 200-mile fishery conservation zone for the United States. Despite some warnings that we should wait for the international community to act first, the Congress wisely chose to enact H.R. 200. Other nations followed our lead shortly thereafter and I believe we will all agree that in retrospect our action in 1976 was neither hasty nor ill-conceived.

A similar opportunity faces the Congress this afternoon. Should we act favorably on this bill, we will demonstrate our commitment to more stringent port and tanker safety requirements to the world community and spur action to adopt and implement the London convention.

Mr. Speaker, I urge my colleagues to join with the members of the Merchant Marine Committee in making this commitment to safer ports and safer ships through enactment of H.R. 13311.●

The SPEAKER pro tempore (Mr. MURTHA). The question is on the motion offered by the gentleman from New York (Mr. BIAGGI) that the House suspend the rules and pass the bill H.R. 13311, as amended.

The question was taken.

Mr. ASHBROOK. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 3 of rule XXVII, and the Chair's prior announcement, further proceedings on this motion will be postponed.

## INDIAN PEAKS WILDERNESS AREA

Mr. RONCALIO. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 12026) to create the Indian Peaks Wilderness Area and the Arapaho National Recreation Area and to authorize the Secretary of the Interior to study the feasibility of revising the boundaries of the Rocky Mountain National Park as amended.

The Clerk read as follows:

H.R. 12026

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SHORT TITLE

SECTION 1. This Act may be cited as the "Indian Peaks Wilderness Area, the Arapaho National Recreation Area and the Oregon Islands Wilderness Area Act".

FINDINGS AND PURPOSES

SEC. 2. The Congress finds that it is in the national interest—

(1) to include the land within the Arapaho and the Roosevelt National Forests known as the Indian Peaks Area in the National Wilderness Preservation System so as to protect the area's enduring scenic and historic wilderness character and its unique wildlife and to preserve the area's scientific, educational, recreational, and inspirational resources and challenges; and

(2) to create the Arapaho National Recreation Area within the Arapaho and the Roosevelt National Forests and the Colorado Big Thompson project so as to preserve and protect the natural, scenic, historic, pastoral, and wildlife resources of the area and to enhance the recreational opportunities provided.

INDIAN PEAKS WILDERNESS AREA

SEC. 3. (a) An area of land comprising approximately seventy thousand acres located in Boulder and Grand Counties, Colorado, within the Arapaho and the Roosevelt National Forests (as generally depicted as the "Indian Peaks Wilderness Area" on a map entitled "Indian Peaks Wilderness Area and Arapaho National Recreation Area", dated July 1978) is designated for purposes of the Wilderness Act (16 U.S.C. 1131–1136) as a wilderness area and shall be known as the Indian Peaks Wilderness Area.

(b) The Indian Peaks Wilderness Area shall be administered by the Secretary of Agriculture (hereafter in this Act referred to as the "Secretary") pursuant to those provisions of the Wilderness Act which govern areas designated by that Act as wilderness areas, except that any reference in such provisions to the effective date of the Wilderness Act shall be deemed to be a reference to the effective date of this Act.

ARAPAHO NATIONAL RECREATION AREA

SEC. 4. (a) An area of land comprising approximately thirty-six thousand two hundred thirty-five acres located in Grand County, Colorado, within the Arapaho and the Roosevelt National Forests and the Colorado Big Thompson project (as generally depicted as the "Arapaho National Recreation Area" on a map entitled "Indian Peaks Wilderness Area and Arapaho National Recreation Area", dated July 1978) is established as the Arapaho National Recreation Area.

(b) The Secretary shall administer the Arapaho National Recreation Area, in accordance with the laws and regulations applicable to the national forests, in such a manner as will best provide for—

(1) public recreation and enjoyment;

(2) the conservation and development of the scenic, natural, historic, and pastoral values of the area;

(3) the management, utilization, and disposal of natural resources such as timber

grazing, and mineral resources so that their utilization will not substantially impair the purposes for which the recreation area is established; and

(4) The management of water quality in the recreation area consistent with the development of needed water supply and wastewater systems, including the control of aquatic vegetation in the streams, lakes, and reservoirs within the recreation area.

(c) The Secretary shall develop an overall management plan for the Arapaho National Recreation Area. This plan shall be developed in consultation with State and local political subdivisions and other interested persons.

RECREATION AREA

SEC. 5. (a) (1) The Secretary is authorized to acquire by donation, purchase with donated or appropriated funds, exchange, or bequest, any lands or lesser interests therein, including mineral interests and scenic easements, which the Secretary determines are needed to establish and manage the Arapaho National Recreation Area. In determining what private property is needed to establish and manage the Arapaho National Recreation Area the Secretary shall utilize the approved county zoning plan to identify those properties whose use or intended use is not in conformance with the overall intent of this Act.

(2) As used in this section, the term "scenic easement" means the right to control the use of land in order to carry out this Act, but shall not preclude the continuation of any use that is compatible with the overall management plan for the Arapaho National Recreation Area developed pursuant to subsection (c) of section 4.

(b) In exercising the authority conferred by this section to acquire lands, the Secretary shall give prompt and careful consideration to any offer made by an individual owning any land, or interest in land, within the Arapaho National Recreation Area. In considering any such offer, the Secretary shall take into consideration any hardship to the owner which might result from any undue delay in acquiring the property. Purchases made under this authority shall be made on a willing buyer, willing seller basis.

(c) In exercising the authority conferred by this section to acquire property by exchange, the Secretary may accept title to any non-Federal land, or interests therein, located within the Arapaho National Recreation Area and the Secretary may convey in exchange therefor any federally owned lands or interests in lands within the State of Colorado which are classified by the Secretary as suitable for exchange and which are under the Secretary's administrative jurisdiction. The values of any lands or interests in lands so exchanged shall be approximately equal, or if they are not approximately equal, they shall be equalized by the payment of cash to the grantor or to the Secretary so long as payment does not exceed 25 per centum of the total value of the land or interest in land. In utilizing cash equalization in exchanges the Secretary shall try to reduce the amount of the payment of money to as small an amount as possible. In the exercise of his exchange authority, the Secretary may utilize authorities and procedures available to him in making exchanges of national forest lands.

(d) Any land or interest in land owned by the State of Colorado or any of its political subdivisions may be acquired only by donation or exchange.

(e) Notwithstanding any other provision of law, any Federal lands or interests in lands located within the Arapaho National Recreation Area shall be transferred without consideration to the administrative jurisdiction of the Secretary for use by the Secretary in carrying out this Act. Lands within the Arapaho National Recreation Area acquired by the Secretary or transferred to the Secretary's administrative jurisdiction shall become part of that recreation area and of the national forest within or adjacent to which they are located: *Provided, That* the operation and facilities of the Colorado Big Thompson project shall remain under the jurisdiction of the United States Bureau of Reclamation.

HUNTING AND FISHING IN THE ARAPAHO NATIONAL RECREATION AREA

SEC. 6. The Secretary shall permit hunting and fishing on lands and waters under the Secretary's jurisdiction within the boundaries of the Arapaho National Recreation Area in accordance with the laws of the United States and the State of Colorado, except that the Secretary may designate zones where, and establish periods when, no hunting or fishing shall be permitted for reasons of public safety, area general administration, or public use and enjoyment. Except in emergencies, any regulations made by the Secretary pursuant to this section shall be put into effect only after consultation with the appropriate State fish and game department.

PERMITS FOR FACILITIES AND SERVICES IN THE ARAPAHO NATIONAL RECREATION AREA

SEC. 7. The Secretary shall cooperate with other Federal agencies, with State and local public agencies, and with private individuals and organizations in the issuance of permits for facilities and services in the Arapaho National Recreation Area and the development and operation of those facilities and services.

APPLICATION OF STATE WATER LAWS TO THE ARAPAHO NATIONAL RECREATION AREA

SEC. 8. The jurisdiction of the State of Colorado and the United States over waters of any stream included in the Arapaho National Recreation Area shall be determined by established principles of law. Nothing in this Act shall constitute an express or implied claim or denial on the part of the Federal Government as to exemption from State water laws.

FILING OF MAPS

SEC. 9. As soon as practicable after the date of enactment of this Act, the Secretary shall file a map and legal description of the Indian Peaks Wilderness Area and the Arapaho National Recreation Area with the Committee on Energy and Natural Resources of the Senate and the Committee on Interior and Insular Affairs of the House of Representatives and such description shall have the same force and effect as if included in this Act, except that correction of any clerical or typographical errors in such map and description may be made Such map and the map entitled "Indian Peaks Wilderness Area and Arapaho National Recreation Area", dated July 1978, shall be on file and made available for public inspection in the offices of the Chief of the Forest Service, Department of Agriculture.

STATE CIVIL AND CRIMINAL JURISDICTION

SEC. 10. Nothing in this Act shall diminish, enlarge, or modify any right of the State of Colorado, or any political subdivision thereof, to exercise civil and criminal jurisdiction within the Indian Peaks Wilderness Area or the Arapaho National Recreation Area or of rights to tax persons, franchises, or property, including mineral or other interests, in or on lands or waters within those areas.

AUTHORIZATION OF APPROPRIATIONS

SEC. 11. Effective October 1, 1979, there are authorized to be appropriated to carry out sections 1 through 10 of this Act $5,000,000 for the acquisition of lands and interests in lands and $5,000,000 for water quality and recreation development. Moneys appropriated from the Land and Water Conservation Fund shall be available for the acquisition of lands and interests therein within the Arapaho National Recreation Area.

OREGON ISLANDS WILDERNESS

SEC. 12. (a) In accordance with subsection 3(c) of the Wilderness Act (78 Stat. 892), certain lands in the Oregon Islands National Wildlife Refuge, Oregon, which comprise approximately four hundred fifty-nine acres, which are depicted on a map entitled "Oregon Islands Wilderness—Proposed", dated June 1972 (revised July 1972), is hereby designated as wilderness and shall become a part of the existing "Oregon Islands Wilderness".

(b) As soon as practicable after this Act takes effect, the Secretary of the Interior shall file a map and legal description of the Oregon Islands Wilderness with the Committee on Energy and Natural Resources of the Senate and the Interior and Insular Affairs Committee of the House of Representatives and such map and description shall have the same force and effect as if included in this Act: *Provided, however,* That correction of clerical and typographical errors in such legal description and map may be made. A map and legal description of the Oregon Islands Wilderness shall be on file and available for public inspection in the Office of the Director, Fish and Wildlife Service, Department of the Interior.

(c) The lands designated by this Act as the Oregon Islands Wilderness shall be administered in accordance with the applicable provisions of the Wilderness Act governing areas designated by that Act as wilderness areas, except that any reference in such provisions to the effective date of the Wilderness Act shall be deemed to be a reference to the effective date of this Act and, where appropriate, any reference to the Secretary of Agriculture shall be deemed to be a reference to the Secretary of the Interior.

ROCKY MOUNTAIN NATIONAL PARK STUDY

SEC. 13. Within one year of the date of enactment of this Act, the Secretary of Agriculture and the Secretary of the Interior shall jointly develop and submit to the Committee on Interior and Insular Affairs of the House of Representatives and the Committee on Energy and Natural Resources of the Senate, a comprehensive report studying and evaluating the suitability of revising the boundaries of Rocky Mountain National Park to include all or part of the Indian Peaks Wilderness Area as established by this Act and examining the possible addition or deletion of other lands designated as "Park Study Area" on a map entitled "Indian Peaks Wilderness Area and Arapaho National Recreation Area" dated July 1978: *Provided,* That regardless of the ultimate administration of the areas to be studied under this section, the seventy thousand-acre Indian Peaks Wilderness Area established by this Act shall remain as a component of the National Wilderness Preservation System.

The SPEAKER pro tempore. Is a second demanded?

Mr. LAGOMARSINO. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Wyoming (Mr. RONCALIO) and the gentleman from California (Mr. LAGOMARSINO) will be recognized for 20 minutes each.

The Chair recognizes the gentleman from Wyoming (Mr. RONCALIO).

Mr. RONCALIO. Mr. Speaker, I yield myself such time as I may consume, not to exceed 10 minutes.

Mr. Speaker, it is with great pleasure that I rise in support of H.R. 12026, which will provide permanent legislative protection for the natural values of one of Colorado's most spectacular and accessi-

ble mountain regions. Protection for the Indian Peaks area has been proposed since the establishment of Rocky Mountain National Park in 1915, and has gained broad public support in recent years with the rapid growth of the Denver metropolitan area.

The 70,000-acre Indian Peaks wilderness proposed by H.R. 12026 lies contiguous to the southern boundary of Rocky Mountain National Park and like much of the land within the park, retains its primeval wilderness character of outstanding scenic values, glaciers, numerous pristine streams and lakes, and abundant wilderness-related wildlife species. Because both the park and the proposed Indian Peaks wilderness are within a short drive of the Denver metropolitan area, the Indian Peaks present one of the finest remaining opportunities in the Lower 48 States to preserve a nearby wilderness experience for several million Americans. This potential was legislatively recognized in 1972 when Congress directed the Secretary of Agriculture to formally study the Indian Peaks for inclusion in the National Wilderness Preservation System. That study has been completed, with the administration recommending the 70,000-acre wilderness boundary of H.R. 12026. In addition, the question of whether all or part of the proposed wilderness (plus some other areas contiguous to Rocky Mountain National Park) should be added to the park to complete a logical park ecosystem, needs to be addressed. To that end, H.R. 12026 directs the Secretaries of Interior and Agriculture to undertake a 1-year review of the park boundaries with a view toward establishing final boundaries which make the most sense from an environmental and administrative standpoint.

The desirability of the Indian Peaks wilderness is heightened by the fact that the proposed wilderness has virtually no conflicts with other resource uses. Whereas other wilderness proposals often require intense scrutiny and difficult decisions to reach a balance between wilderness protection versus resource development, the Indian Peaks wilderness values are clearly paramount, and wilderness will not jeopardize other uses. For example, timber resources in the proposed wilderness are insignificant, and the Forest Service has kept the bulk of the area off limits to off road vehicles for many years to protect its fragile terrain and outstanding solitude. Indeed, enactment of H.R. 12026 will involve the closure of less than 1 mile of a rapidly deteriorating primitive road on which off-road vehicle use is currently allowed. A recent joint study by the U.S. Geological Survey and the Bureau of Mines further reveals that the area "contains no known mineral deposits that can be mined profitably now or in the foreseeable future".

To minimize other possible resource conflicts, the committee amended H.R. 12026 to exclude some 2,500 acres in the vicinity of Devils Thumb for a potential future winter sports site, and 2,500 acres on Niwot Ridge for the creation of a Niwot Ridge international biosphere reserve. It is the understanding of all parties involved that the 2,500-acre Niwot Ridge exclusion will be managed by Forest Service to strictly protect its terrain and vegetation for scientific research and educational purposes, and I would point out that this may require the Forest Service to restrict or prohibit any recreational use of the 2,500-acre proposed biosphere reserve.

During our committee's deliberations on H.R. 12026, it was also brought to our attention that the proposed wilderness contains several small water impoundments which are used for water supply and downstream power generation. I note that such small impoundments are present in many existing wilderness areas, and that ample precedent exist for access to, and operation and maintenance of, these facilities. Congress has determined on numerous occasions that the operation and maintenance of small water impoundments (including the operation of hydroelectric facilities in the Desolation Wilderness as established by Public Law 91-82) is not inconsistent with wilderness values, and the committee's report on H.R. 12026 elaborates on the issue. In this regard, I would mention that the impoundment at Lake Isabelle, as well as any others which may not be specifically mentioned in the committee's report, are certainly intended to be covered by the language on page 10 of the report discussing Jasper and Skyscraper Reservoirs.

While the establishment of the Indian Peaks wilderness will serve the increasing demand for wilderness-oriented recreation, the need for developed recreation facilities on Federal lands near the Denver metropolitan area is also growing. The 36,235-acre Arapaho National Recreation Area proposed by H.R. 12026 fills this need perfectly. Composed of lower elevation forested lands, open spaces, and several large lakes which form the existing Shadow Mountain National Recreation Area, the area is already highly popular, and receives heavy use, especially during the summer months. Creation of the Arapaho National Recreation Area will expand the Shadow Mountain Recreation Area to promote developed recreation use, while at the same time preserving the area's magnificent scenic and natural values by the use of scenic easements or land acquisitions, where necessary. The bill also provides funding to facilitate the maintenance and improvement of the water quality in the heavily used lakes.

In summary, Mr. Speaker, it is my feeling that the proposed Indian Peaks wilderness, when combined with the contiguous Arapaho National Recreation Area, will provide a land management direction that will unquestionably constitute the highest and best use of over 100,000 acres of Federal lands that are vital to the aesthetic and recreational interests of both the citizens of Colorado's Front Range as well as the Nation. This is an extremely well-balanced piece of legislation, and one that is deserving of my colleague's unconditional support.

In addition to the Colorado lands, section 12 of H.R. 12026 would add 58 islands in the Oregon Islands Wildlife Refuge, comprising some 459 acres, to the existing Oregon Islands wilderness. These islands are a haven for hundreds of thousands of petrel, cormorants, murres, puffins, and other sea birds, as well as sea lions, sea otters, and harbor seals. Wilderness will insure that important nesting and breeding sites remain undisturbed and unaltered by man's activities, and I am informed that Senator HATFIELD has agreed to the inclusion of these islands in H.R. 12026.

Finally, I should note that the bill we are asking be approved contains two changes from the bill reported by the committee. The first change is a technical change requested by the Forest Service, and adds language to clarify the bill's intention that Land and Water Conservation moneys be available for the acquisition of lands within the Arapaho National Recreation Area. The second change deletes a sentence in section 8 which might possibly be read by some water law experts to inject ambiguity or confusion into the delicate area of State versus Federal water rights. This certainly was not the intention of the sentence, but water law experts on both the House and Senate committees, as well as Forest Service legal counsel have recommended that the language be stricken so as to avoid any controversy.

I urge swift passage of H.R. 12026.

Mr. Speaker, I yield such time as he may consume to the gentleman from Colorado (Mr. WIRTH).

Mr. WIRTH. Mr. Speaker, I thank the gentleman for yielding.

At this point I would like to again note for the record the splendid leadership which the gentleman from Wyoming (Mr. RONCALIO) has given to all of us in the Rocky Mountain region. Further, I would like to state again how much we are going to miss him here in the Congress, particularly as he is such a great spokesman for the interests of the Rocky Mountain area.

Mr. Speaker, I thank the gentleman from Wyoming (Mr. RONCALIO) very much.

I wanted to point out that the history of this legislation goes back to Teddy Roosevelt, who was the first individual who proposed the protection of the Indian Peaks area.

Since then, there have been controversies surrounding mineral, timber, and cattle interests in the area. Over the last decade, all of these have been resolved. The USGS has studied the area extensively. There are no known mineral reserves in the area. There is no commercially valuable timber, and the cattle grazing rights have been deeded back to the Federal Government. Therefore, there are no commercial interests or controversies in the area which might further delay the protection of the area.

After the commercial questions were solved, the next question became how large the Indian Peaks area should be and who should manage that area.

We put together in Colorado an Indian Peaks Advisory Committee representing just about every interest involved in and concerned about the Indian Peaks area. They came back with a recommendation which is essentially H.R. 12026, which is a combination, as the gentleman from Wyoming (Mr. RONCALIO), the chairman, pointed out, of approximately 70,000 wil-

derness acres on the eastern side of the Continental Divide and approximately 36,000 acres of national recreation area on the western side of the Continental Divide, the former in the district which I represent, and the latter in the district represented by the gentleman from Colorado (Mr. JOHNSON).

Both of those received the unanimous support of the Boulder County commissioners on the eastern side and the Grand County commissioners on the western side, Governor Lamm, and any number of other groups.

During the hearings that we held in July under the chairmanship of the gentleman from Colorado (Mr. RONCALIO) four questions came up, and I wonder if I might, Mr. Speaker, just highlight the five issues and how the committee took care of those.

The first related to water resources and Lake Isabell in questions that were raised in particular by the people of the city of Longmont and by the Longmont Chamber of Commerce.

The wilderness boundaries of H.R. 12026 as reported by the committee, encompass several existing reservoir sites. My question to the gentleman concerns Lake Isabell. Will this wilderness designation impair the access to, or operation and maintenance of this reservoir?

Mr. RONCALIO. Mr. Speaker, the answer is "No." As is pointed out in my statement, small water impoundments are located in many existing wilderness areas, and wilderness does not interfere with their operation and maintenance. While congressional and Forest Service policy would certainly encourage access and maintenance by nonmechanized methods where practical, the use of mechanized equipment for the operation and maintenance of small water impoundments is entirely permissible within wilderness areas where it is necessary.

Mr. WIRTH. Sometimes an area of land proposed for wilderness classification impacts persons or organizations who represent uses which might be in conflict with wilderness. How would this wilderness designation affect the motorized recreational vehicle interests?

Mr. RONCALIO. Hardly at all. The bulk of the proposed wilderness has been closed to off-road vehicle use for many years in order to protect the area's fragile terrain and solitude. In addition, some of the off-road vehicle users who testified at our hearings on H.R. 12026 pointed out that the lands we are proposing to set aside in wilderness are not those lands which are heavily used for snowmobiling or other off-road vehicle use. The lands which are heavily used by motorized recreationists lie within proposed Arapaho National Recreation Area, and national recreation area status should help promote off-road vehicle use and other developed recreation facilities. The committee also included language in its report on H.R. 12026 requesting the Secretary of Interior to examine the possibility of allowing snowmobile use on a presently closed trail on the east shore of Shadow Mountain Lake to facilitate the linking up of several popular snowmobile routes.

Mr. WIRTH. I will ask the gentleman from Wyoming, How did the committee reconcile the 2,200 acres in the Devil's Thumb area that might be used for a ski area?

Mr. RONCALIO. The committee deleted approximately 2,500 acres in the Devil's Thumb area to allow for a potential winter sports site.

Mr. WIRTH. The Forest Service recommended that the wilderness boundary be adjusted to exclude the research facilities on Niwot Ridge. Who, then, is to manage and protect this area and its terrain and vegetation?

Mr. RONCALIO. All parties have agreed that the Forest Service will strictly manage the area so as to preserve its terrain and vegetation unimpaired for scientific research and educational purposes. This is to be done even in the event a proposed international biosphere reserve is not created on the 2,500 acres of Niwot Ridge. However, I should add that it is our firm expectation that such a biosphere reserve will be established in the near future.

Mr. WIRTH. My last question, Mr. Chairman, concerns the park study provision. The Indian Peaks Advisory Committee has recommended that H.R. 12026 contain provisions for a park suitability study of the entire Indian Peaks and adjoining areas. Who will be conducting the study, and what criteria should the park study take into consideration?

Mr. RONCALIO. The Secretaries of Interior and Agriculture will jointly study the issue of park expansion. The criteria for the study are listed on page 9 of the committee's report on H.R. 12026 (H. Rept. No. 95–1460).

Mr. WIRTH. I thank the gentleman from Wyoming very much for his answers to those questions and the resolution of the five issues that came up during those hearings.

Mr. Speaker, I urge my colleagues to support H.R. 12026.

Mr WIRTH. Mr. Speaker, I would like to comment further on H.R. 12026, which would create a wilderness area in the Indian Peaks area of Colorado. As the principal author of this important piece of legislation, I would like to share with you some of the background and history of this bill.

The proposal to create a wilderness area at Indian Peaks represents an example of what involved citizens can do when we open up the Government and allow them to get involved. The combined effort and testimony from the Indian Peaks Advisory Committees, sportsmen, environmental, and other groups, and the fair, nonpartisan examination given by the subcommittee and full committee makes this piece of legislation a significant victory for a broad-based coalition of involved citizens.

I can say unequivocally that without the selfless work of a great many Coloradans—and others who have grown to love this beautiful area—we would not be able to vote on this bill today. There is a degree of controversy involved in the establishment of any wilderness area. But I have never seen a proposal which received the endorsement of so many diverse interests and groups. This point was underscored by the subcommittee chairman during the hearings in Colorado earlier this summer, when he said he had never witnessed before such a vast consensus of special interest groups toward a proposed protected area.

In the early 20th century, when then-President Theodore Roosevelt was visiting Colorado, the subject of protecting the Indian Peaks area was first discussed. Since that time, countless Coloradans and others have urged that the area receive the protection it so rightly deserves. But until today, the Congress has not had an opportunity to create an Indian Peaks Wilderness Area. We now have that opportunity. Following the introduction of the bill by me, with cosponsorship by my distinguished colleague from Colorado (Mr. JOHNSON), the subcommittee held extensive hearings in Boulder and Grandby. We had an opportunity to hear testimony and a variety of points of view from many Coloradans. This thorough groundwork has developed almost universal support for the bill. Support for this legislation was voiced by Governor Lamm, the Grand County commissioners, the Boulder city council, the Boulder County commissioners, numerous civic organizations, and hundreds of interested citizens of Colorado.

H.R. 12026 establishes the Indian Peaks Wilderness Area in the Arapaho and Roosevelt National Forests of Colorado, and directs the Secretary of Interior to study the feasibility of revising the boundaries of Rocky Mountain National Park. In addition, the bill establishes a national recreation area, to the West of Indian Peaks, on land which is more appropriate for recreational emphasis.

Finally, I would like to share with you my own personal experiences in the Indian Peaks area. Just this past month, I went camping with my wife and two children in the eastern section of the area. We started midday and hiked for several miles along a trail that slowly twisted its way up the mountain. At about 11,000 feet we called a halt to the day's activity. Our campsite featured a shallow pond, clumps of snow lingering from the previous winter, and a view that must be one of the most spectacular panoramas I have ever seen. By the time we finished dinner, washed the dishes and set up camp, the down jackets we packed became the most precious item on the trip. It was so cold that when we got up the next morning, I half expected to see a fresh layer of snow on the ground. We were spared the snow, but the pond had been topped by a layer of thin ice. Breakfast was brief, and the descent brought us some warmth. This wilderness experience renewed my commitment to seeing this legislation passed during the current session of Congress. My only regret is that I am unable to describe the natural beauty of this setting—but perhaps some of you might be able to visit Indian Peaks in the future, and share this experience with me.

Mr. WIRTH. Mr. Speaker, will the gentleman yield further?

Mr. RONCALIO. I yield to the gentleman from Colorado.

Mr. WIRTH. I thank the gentleman for yielding.

The gentleman from Wyoming noted the park study. At this point I also want to note for the record the great cooperation of the gentleman from California (Mr. PHILLIP BURTON) in helping to move this legislation through the Committee on Interior and Insular Affairs, and to resolve the issue of the park study.

Mr. RONCALIO. I thank the gentleman.

Mr. LAGOMARSINO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, in the absence of the gentleman from Colorado (Mr. JOHNSON) who is the ranking member of the subcommittee that considered this legislation, I rise in support of H.R. 12026 which, as has been pointed out, designates a 70,000-acre wilderness in the Arapaho and Roosevelt National Forest in Colorado. It also establishes an adjoining national recreation area of about 36,000 acres.

By designating both the wilderness area and a recreation area, this bill recognizes the competing interests for which this land may be used. For the residents of Denver, the Indian Peaks wilderness will provide an opportunity for a primitive experience less than 2 hours from the heart of the city.

At the same time, the Arapaho Recreation Area will provide opportunities for other recreational uses and development which are incompatible with wilderness, but just as much in the public interest.

This bill has the strong support of both the gentleman from Colorado (Mr. JIM JOHNSON), ranking member of the Subcommittee on Public Lands, and the gentleman from Colorado (Mr. TIM WIRTH), the two Members whose districts would be affected. It has been the result of considerable study and input on both the national and local levels.

I would like to note that included in these studies were findings by the U.S. Geological Survey and Bureau of Mines that no substantial mineral, oil, or gas potential exists. In addition, the area is not suitable for commercial timber use.

There is some concern when we talk about wilderness area about private inholdings and, as the report points out, the Wilderness Act itself provides such rights as may be necessary to assure adequate access to State-owned and private-owned land, so the people in the area will continue to have access to them.

In addition, the Wilderness Act prohibits the Secretary from acquiring such publicly owned lands, unless the owner concurs in such acquisition.

Mr. Speaker, I believe that this bill represents a fair compromise of "people" use of the land and I urge my colleagues to join me in support.

Mr. RONCALIO. Mr. Speaker, I yield such time as he may consume to my colleague, the gentleman from Ohio (Mr. SEIBERLING).

Mr. SEIBERLING. Mr. Speaker, I just want to commend the chairman of this subcommittee, the gentleman from Wyoming (Mr. RONCALIO) and his colleagues on the subcommittee for bringing out this bill and for doing an outstanding job in this legislation.

A year ago last July when the Interior Subcommittee on Alaska Lands was holding hearings in Denver, I took the occasion on the day following the hearings, Sunday, to go up to the Indian Peaks area and get a sort of bird's eye view of the whole area. It is an exceptionally beautiful natural area, and particularly important, because of its nearness to Denver and the Denver metropolitan area.

I certainly think that it merits study for inclusion in the Rocky Mountain National Park. I would hope that that study will eventually produce that result. I commend the gentleman from Wyoming for providing also for that in this legislation, as well as the other members of the committee who participated in it.

Mr. LAGOMARSINO. Mr. Speaker, I reserve the balance of my time.

Mr. RONCALIO. Mr. Speaker, I yield such time as he may consume to the gentleman from Ohio (Mr. VANIK).

Mr. VANIK. Mr. Speaker, this legislation extends tax jurisdiction into the new territory that is acquired. I would like to ask the gentleman from Wyoming what does this refer?

Mr. RONCALIO. I would not have the faintest idea, unless it means cranking in the payments in lieu of taxes each year, the fact that more land goes into the national interest category, and is lost from potential tax rolls.

Mr. VANIK. I was reading from the provision in the bill, in the statement in the report it says that in addition Colorado would retain the right to exercise civil, criminal, and tax jurisdiction within both the Indian Peaks Wilderness Area and the Arapaho National Recreation Area.

I would suppose that would probably apply to the imposition of State taxes to any business operations that were authorized in the area?

Mr. RONCALIO. I should think so.

Mr. VANIK. Making those operations subject to items like sales taxes?

Mr. RONCALIO. With the retention of the jurisdiction which they already have.

Mr. VANIK. Yes, and which is normally in the State's jurisdiction.

Mr. SEIBERLING. Mr. Speaker, will the gentleman yield?

Mr. RONCALIO. I yield to the gentleman from Ohio.

Mr. SEIBERLING. Mr. Speaker, my recollection from visiting the area is that there are some private inholdings, vacation homes, and that sort of thing.

When I read this, I assumed that that was the kind of property over which the jurisdiction that was being retained. Perhaps the gentleman from Colorado (Mr. WIRTH) has some information he could reveal to us.

Mr. WIRTH. Mr. Speaker, will the gentleman yield?

Mr. RONCALIO. I yield to the gentleman from Colorado.

Mr. WIRTH. Mr. Speaker, on page 9 of the report there is carefully detailed a description of the private inholdings and that was also outlined by the gentleman from California (Mr. LAGOMARSINO).

The purpose of this is to make sure that even though they have inholdings within the jurisdiction of the recreational area or the wilderness, they are still not exempt from taxes.

Mr. VANIK. Including State taxes?

Mr. WIRTH. That is right.

● Mrs. SCHROEDER. Mr. Speaker, I was delighted by the House passage of H.R. 12026, the Indian Peaks wilderness bill. House passage smooths the way for wilderness designation of 70,000 acres of national forest land adjacent to Rocky Mountain National Park. An additional 36,000 acres would be set aside as a recreation area. This land, some of the most spectacular in the Rockies, straddles the Continental Divide and offers abundant opportunities for camping, hiking, and other outdoor activities.

The bill reflects the best in Colorado politics and is the product of the careful work of Representatives TIM WIRTH and JIM JOHNSON. The sponsors represent very different parts of the State, but they worked together to insure that the areas will remain for the benefit of all Colorado residents, as well as visitors nationwide.

The bill provides for a 1-year study by the Interior and Agriculture Departments to determine whether the wilderness portion of Indian Peaks should be added to Rocky Mountain National Park. I hope the Departments opt for full wilderness protection. There are no resource conflicts within the wilderness itself, and the recreation area provides opportunities for development that can boost the local economy while providing visitors with additional options for enjoying the land.●

The SPEAKER pro tempore (Mr. SISK). The question is on the motion offered by the gentleman from Wyoming (Mr. RONCALIO) that the House suspend the rules and pass the bill H.R. 12026, as amended.

The question was taken.

Mr. VOLKMER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 3, rule XXVII, and the Chair's prior announcement, further proceedings on this motion will be postponed.

---

## MISCELLANEOUS REVENUE ACT OF 1978

Mr. ULLMAN. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 12578) to amend the Internal Revenue Code of 1954 to make certain technical changes, as amended.

The Clerk read as follows:

H.R. 12578

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE; AMENDMENT OF 1954 CODE.

(a) SHORT TITLE.—This Act may be cited as the "Miscellaneous Revenue Act of 1978".

(b) AMENDMENT OF 1954 CODE.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

SEC. 2. DIVIDENDS PAID AFTER CLOSE OF TAXABLE YEAR BY CERTAIN PERSONAL HOLDING COMPANIES.

(a) IN GENERAL.—Subsection (b) of section 563 (relating to dividends paid after close of taxable year) is amended to read as follows:

"(b) PERSONAL HOLDING COMPANY TAX.—

"(1) IN GENERAL.—In the determination of the dividends paid deduction for purposes of the personal holding company tax imposed by section 541, a dividend paid after the close of any taxable year and on or before the date prescribed by law for filing the return of tax under this chapter for the taxable year (including extensions thereof) shall, to the extent the personal holding company elects in its return for the taxable year, be considered as paid during such taxable year. The preceding sentence shall apply with respect to any dividend only if the person receiving the dividend agrees, in a consent filed with the return of the personal holding company in accordance with regulations prescribed by the Secretary, to treat the dividend as received on the last day of the taxable year of the personal holding company.

"(2) LIMITATION.—The amount allowed as a dividend by reason of the application of this subsection with respect to any taxable year shall not exceed the undistributed personal holding company income of the corporation for the taxable year, computed without regard to this subsection."

(b) TECHNICAL AMENDMENTS.—

(1) Subsection (c) of section 563 (relating to dividends considered as paid on last day of taxable year) is amended by striking out "and on or before the 15th day of the third month following the close of the taxable year"

(2) Clause (ii) of section 543 (a)(2)(B) (relating to rents) is amended by striking out "(as limited by the second sentence of section 563(b))".

(c) EFFECTIVE DATE. The amendments made by this section shall apply to taxable years ending on or after December 31, 1978.

SEC. 3. SUBCHAPTER S ELECTION NOT TERMINATED BY BANKRUPTCY OF SHAREHOLDER

(a) IN GENERAL.—Section 1371 (relating to definitions for purposes of subchapter S) is amended by adding at the end thereof the following new subsection:

"(g) BANKRUPTS' ESTATES.—For purposes of subsection (a), the estate of an individual in a proceeding under the Bankruptcy Act may be a shareholder."

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to taxable years beginning after December 31, 1978.

SEC. 4. PAYMENT OF INTEREST WHERE LEVY HAS BEEN WRONGFULLY MADE AND MONEY RECEIVED BY UNITED STATES

(a) IN GENERAL.—Section 6343 (relating to release of levy and return of property) is amended by adding at the end thereof the following new subsection:

"(c) INTEREST.—Interest shall be allowed at an annual rate established under section 6621—

"(1) in a case described in subsection (b)(2), from the date the Secretary receives the money to the date of return, or

"(2) in a case described in subsection (b)(3), from the date of the sale of the property to the date of return."

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to levies made after the date of the enactment of this Act.

SEC. 5. REPEAL OF REQUIREMENT THAT TRANSFERORS OF CERTAIN PROPERTY TO EXEMPT ORGANIZATIONS MUST FILE RETURNS.

(a) GENERAL RULE.—Section 6050 (relating to returns relating to certain transfers to exempt organizations) is hereby repealed.

(b) CLERICAL AMENDMENT.—The table of sections for subpart B of part III of subchapter A of chapter 61 is amended by striking out the item relating to section 6050.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to transfers after the date of the enactment of this Act.

SEC. 6. SIMPLIFICATION OF PRIVATE FOUNDATION RETURN AND REPORTING REQUIREMENTS.

(a) AMENDMENT OF SECTION 6033.—Section 6033 (relating to returns by exempt organizations) is amended by redesignating subsection (c) as subsection (e) and by inserting after subsection (b) the following new subsections:

"(c) ADDITIONAL PROVISIONS RELATING TO PRIVATE FOUNDATIONS.—In the case of an organization which is a private foundation (within the meaning of section 509(a))—

(1) the Secretary shall by regulations provide that the private foundation shall include in its annual return under this section such information (not required to be furnished by subsection (b) or the forms or regulations prescribed thereunder) as would have been required to be furnished under section 6056 (relating to annual reports by private foundations) as such section 6056 was in effect before the enactment of this subsection,

"(2) a copy of the notice required by section 6104(d) (relating to public inspection of private foundations' annual returns), together with proof of publication thereof, shall be filed by the foundation together with the annual return under this section, and

"(3) the foundation managers shall furnish copies of the annual return under this section to such State officials and other persons, at such times, and under such conditions, as the Secretary may by regulations prescribe.

Nothing in paragraph (1) shall require the inclusion of the name and address of any recipient (other than a disqualified person within the meaning of section 4946) of 1 or more charitable gifts or grants made by the foundation to such recipient as an indigent or needy person if the aggregate of such gifts or grants made by the foundation to such recipient during the year does not exceed $1,000.

"(d) SECTION TO APPLY TO NONEXEMPT CHARITABLE TRUSTS AND NONEXEMPT PRIVATE FOUNDATIONS.—The following organizations shall comply with the requirements of this section in the same manner as organizations described in section 501(c)(3) which are exempt from tax under section 501(a).

"(1) NONEXEMPT CHARITABLE TRUSTS.—A trust described in section 4947(a)(1) (relating to nonexempt charitable trusts).

"(2) NONEXEMPT PRIVATE FOUNDATIONS.—A private foundation which is not exempt from tax under section 501(a)."

(b) PUBLIC INSPECTION OF PRIVATE FOUNDATIONS' ANNUAL RETURNS.—

(1) IN GENERAL.—The first sentence of subsection (d) of section 6104 (relating to public inspection of private foundations' annual reports) is amended to read as follows: "The annual return required to be filed under section 6033 (relating to returns by exempt organizations) by any organization which is a private foundation within the meaning of section 509(a) shall be made available by the foundation managers for inspection at the principal office of the foundation during regular business hours by any citizen on request made within 180 days after the publication of notice of its availability."

(2) CONFORMING AMENDMENTS.—Such subsection (d) is amended—

(A) by striking out "ANNUAL REPORTS" in the heading and inserting in lieu thereof "ANNUAL RETURNS"; and

(B) by striking out "annual report" each place it appears in the second and third sentences and inserting in lieu thereof "annual return".

(c) REPEAL OF PRIVATE FOUNDATION ANNUAL REPORTING REQUIREMENTS.—Subpart D of part III of subchapter A of chapter 61 (relating to information concerning private foundations) is hereby repealed.

(d) TECHNICAL AMENDMENTS.—

(1) Section 6034 (relating to returns by trust described in section 4947(a) or claiming charitable deductions under section 642(c)) is amended—

(A) by striking out "section 4947(a)" in subsection (a) and inserting in lieu thereof "section 4947(a)(2)";

(B) by adding at the end of subsection (b) the following new sentence: "This section shall not apply in the case of a trust described in section 4947(a)(1).";

(C) by striking out "EXCEPTION" in the heading of subsection (b) and inserting in lieu thereof "EXCEPTIONS";

(D) by striking out "SECTION 4947(a)" in the section heading and inserting in lieu thereof "SECTION 4947(a)(2)".

(2)(A) The first sentence of section 6652(d)(3) (relating to annual reports) is amended to read as follows: "In the case of a failure to comply with the requirements of section 6104(d) (relating to public inspection of private foundations' annual returns), on the date and in the manner prescribed therefor (determined with regard to any extension of time for filing), unless it is shown that such failure is due to reasonable cause, there shall be paid (on notice and demand by the Secretary and in the same manner as tax) by the person failing to meet such requirement, $10 for each day during which such failure continues, but the total amount imposed hereunder on all such persons for such failure with respect to any one annual return shall not exceed $5,000."

(B) The heading of paragraph (3) of section 6652(d) is amended by striking out "REPORTS" and inserting in lieu thereof "RETURNS".

(3) Subsection (b) of section 6104 (relating to inspection of annual information returns) is amended by striking out "6056,".

(4) Section 6685 (relating to assessable penalties with respect to private foundation annual reports) is amended to read as follows:

"SEC. 6685. ASSESSABLE PENALTIES WITH RESPECT TO PRIVATE FOUNDATION ANNUAL RETURNS.

"In addition to the penalty imposed by section 7207 (relating to fraudulent returns, statement, or other documents), any person who is required to comply with the requirements of section 6104(d) (relating to private foundations' annual returns) and who fails to so comply with respect to any return, if such failure is willful, shall pay a penalty of $1,000 with respect to each such return."

(5) Section 7207 (relating to fraudulent returns, statements, or other documents) is amended by striking out "sections 6047(b) or (c), 6506, or 6104(d)" and inserting in lieu thereof "subsection (b) or (c) of section 6047 or pursuant to subsection (d) of section 6104".

(e) CLERICAL AMENDMENTS.—

(1) The table of sections for subpart A of part III of subchapter A of chapter 61 is amended by striking out "4947(a)" in the

item relating to section 6034 and inserting in lieu thereof "4947(a)(2)".

(2) The table of subparts for part III of subchapter A of chapter 61 is amended by striking out the item relating to subpart D.

(3) The table of sections for subchapter B of chapter 68 is amended by striking out "reports" in the item relating to section 6685 and inserting in lieu thereof "returns".

(f) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1978.

SEC. 7. TREATMENT OF CERTAIN INTERESTS HELD BY DECEDENT'S FAMILY FOR PURPOSES OF THE EXTENSION OF TIME FOR PAYMENT OF ESTATE TAX PROVIDED BY SECTION 6166.

(a) INTEREST HELD BY MEMBER OF DECEDENT'S FAMILY TREATED AS HELD BY DECEDENT.—Paragraph (2) of section 6166(b) (relating to definitions and special rules) is amended by adding at the end thereof the following new subparagraph:

"(D) CERTAIN INTERESTS HELD BY MEMBERS OF DECEDENT'S FAMILY.—All stock and all partnership interests held by the decedent or by any member of his family (within the meaning of section 267(c)(4)) shall be treated as owned by the decedent."

(b) ELECTION FOR PURPOSES OF THE 20-PERCENT REQUIREMENTS WITH RESPECT TO PARTNERSHIP INTERESTS AND STOCK WHICH IS NOT READILY TRADABLE.—Subsection (b) of section 6166 (relating to definitions and special rules) is amended by adding at the end thereof the following new paragraph:

"(7) PARTNERSHIP INTERESTS AND STOCK WHICH IS NOT READILY TRADABLE.—

"(A) IN GENERAL.—If the executor elects the benefits of this paragraph (at such time and in such manner as the Secretary shall by regulations prescribe), then—

"(i) for purposes of paragraph (1)(B)(i) or (1)(C)(i) (whichever is appropriate) and for purposes of subsection (c), any capital interest in a partnership and any non-readily-tradable stock which (after the application of paragraph (2)) is treated as owned by the decedent shall be treated as included in determining the value of the decedent's gross estate,

"(ii) the executor shall be treated as having selected under subsection (a)(3) the date prescribed by section 6151(a), and

"(iii) section 6601(j) (relating to 4-percent rate of interest) shall not apply.

"(B) NON-READILY-TRADABLE STOCK DEFINED.—For purposes of this paragraph, the term 'non-readily-tradable stock' means stock for which, at the time of the decedent's death, there was no market on a stock exchange or in an over-the-counter market."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to the estates of decedents dying after the date of the enactment of this Act.

The SPEAKER pro tempore. Is a second demanded?

Mr. FRENZEL. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Oregon (Mr. ULLMAN) will be recognized for 20 minutes. and the gentleman from Minnesota (Mr. FRENZEL) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Oregon (Mr. ULLMAN).

Mr. ULLMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 12578 contains miscellaneous technical amendments to the Federal tax laws These amendments have been developed from a list of legislative recommendations submitted by the Treasury Department, the American Bar Association, the American Institute of Certified Public Accountants, and various other groups including State and local bar and accounting associations.

Mr. Speaker, I yield the balance of my time to the distinguished chairman of the subcommittee, the gentleman from Louisiana (Mr. WAGGONNER), who will handle both the remainder of the time and the measure.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Louisiana (Mr. WAGGONNER).

Mr. WAGGONNER. Mr. Speaker, I yield myself such time as I may consume.

The bill contains provisions relating to: First, the treatment of dividends paid by a personal holding company after the close of a taxable year; second, the eligibility of an estate of an individual in bankruptcy as a shareholder in a subchapter S corporation; third, the payment of interest to a person whose property is wrongfully seized by the Internal Revenue Service; fourth, the elimination of the reporting requirement for certain transfers of property to an exempt organization; fifth. the simplification of private foundation return and reporting requirements; and sixth, the treatment of business interests held by members of a decedent's family as held by the decedent for purposes of qualifying for extensions of time for the payment of estate tax attributable to a closely held business.

All witnesses, including representatives of the Treasury Department, who testified at the hearings on this bill recommended its adoption.

It is estimated that the provisions of the bill will not have any significant revenue effect.

Mr. Speaker, this bill will improve a number of miscellaneous requirements of the tax laws. I urge that H.R. 12578 be adopted.

Mr. FRENZEL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 12578.

Mr. Speaker, I concur in the description given by the distinguished chairman of the subcommittee, the gentleman from Louisiana (Mr. WAGGONNER).

The bill makes some miscellaneous and technical changes. The ideas did not spring full-blown from the forehead of the subcommittee. They were brought to us by professional organizations and by the Treasury. All of them are approved by the Treasury.

I would also call attention to the statement of the chairman of the subcommittee that the net budget effect of this bill is nil, and it is expected to be nil during the 5-year period for which the analysis was made. The Treasury concurs in this estimate.

Mr. Speaker, I hope the bill will be swiftly passed. I have no requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Oregon (Mr. ULLMAN) that the House suspend the rules and pass the bill H.R. 12578, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds have voted in the affirmative.

Mr. VOLKMER. Mr. Speaker, on that I demand the yeas and nays.

The SPEAKER pro tempore. The gentleman from Missouri (Mr. VOLKMER) demands the yeas and nays. All those in favor of taking this vote by the yeas and nays will rise and remain standing until counted.

Not a sufficient number have risen.

PARLIAMENTARY INQUIRY

Mr. VOLKMER. Mr. Speaker, I have a parliamentary inquiry.

Is the requirement one-fifth of the Members present?

The SPEAKER pro tempore. Yes. The Chair will state that the requirement is that one-fifth of the Members present be standing for the yeas and nays, and there is not one-fifth of the Members standing.

Mr. VOLKMER. Mr. Speaker, I count four Members standing.

The SPEAKER pro tempore. In the opinion of the Chair, an insufficient number have arisen.

The Chair will be glad to count, if the gentleman desires.

Mr. VOLKMER. Would the Chair count, please? I believe there are only 25 Members here.

The SPEAKER pro tempore. The Chair will count. Thirty Members are present.

Two-thirds having voted in the affirmative, the rules are suspended and the bill, as amended, is passed, and without objection, a motion to reconsider is laid on the table.

There was no objection.

## EXTEND DUTY SUSPENSION ON WASTE AND SCRAP METALS

Mr. VANIK. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 12165) to extend until the close of June 30, 1981, the existing suspension of duties on certain metal waste and scrap, unwrought metal, and other articles of metal, as amended.

The Clerk read as follows:

H.R. 12165

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That subpart B of part 1 of the Appendix to the Tariff Schedules of the United States (19 U.S.C. 1202) is amended—

(1) by striking out the colon at the end of the superior heading to items 911.10, 911.11, and 911.12 and inserting in lieu thereof "or to be processed by shredding, shearing, compacting or similar processing which renders them fit only for the recovery of the metal content:"; and

(2) by striking out "6/30/78" in each of items 911.10, 911.11, and 911.12 and inserting in lieu thereof "6/30/81".

SEC. 2. The amendments made by the first section of this Act shall apply with respect to articles entered, or withdrawn from warehouse, for consumption after June 30, 1978.

The SPEAKER pro tempore. Is a second demanded?

Mr. STEIGER. Mr. Speaker, I demand a second.

PARLIAMENTARY INQUIRY

Mr. SEIBERLING. Mr. Speaker, is it in order to appeal the ruling of the Chair on the last vote?

The SPEAKER pro tempore. (Mr. SISK). The Chair will state to the gentleman that no appeal lies on the count of the Chair.

Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Ohio (Mr. VANIK) will be recognized for 20 minutes, and the gentleman from Wisconsin (Mr. STEIGER) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Ohio (Mr. VANIK).

Mr. VANIK. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the purpose of H.R. 12165 is to extend until June 30, 1981, the existing suspension of the rates of duty on certain metal waste and scrap, unwrought metal, and other articles of metal.

H.R. 12165 was introduced by our colleague, Mr. VANDER JAGT of Michigan.

The column 1 (MFN) and column 2 (applicable to Communist countries) tariffs applying to the articles of interest (for copper articles and scrap, only column 1) have been suspended, usually for 2-year periods, almost continuously since 1942. Such articles were initially transferred from the dutiable to the free list to assist steel producers in some sections of the country to obtain adequate supplies of one of their raw materials. The conditions which led to the suspension of the duties continue to exist.

A favorable report was received from the Department of Treasury, and reports with no objections were received from the Departments of State and Commerce.

The bill was amended to extend the suspension of the duty now provided on articles of metal—except certain enumerated articles—which are imported to be used in remanufacture by melting, to include articles of metal that are imported to be processed by shredding, shearing, compacting, or similar processing which renders them fit only for the recovery of the metal content.

The committee was unanimous in reporting H.R. 12165, as amended, and I urge its passage.

Mr. STEIGER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I join my colleague in supporting passage of H.R. 12165, a bill to continue through June 30, 1981, the existing suspension of duty on the importation of certain metal waste and scrap.

The bill merely continues for another 3-year period the tariff status that has applied to metal waste and scrap, unwrought metal, and other articles of metal almost continuously since the duty on these items was first lifted in 1942. The duty suspension applies to both column 1 and column 2 rates, except in the case of copper where imports from Communist countries, or column 2 entries, will continue to have the duty levied.

Public hearings held in May of this year affirmed the fact that conditions which warranted suspension of the duties over these many years still exist. Domestic smelters continue to depend on imported metal scrap in the same way as domestic producers of primary metals depend on imported metal ores. Metal scrap is an important raw material for which there is a longstanding shortage in this country. If the duty suspension is not continued, steel producers will have to turn solely to higher priced ores which also have to be imported.

In addition, when H.R. 12165 was considered by the Trade Subcommittee, the duty suspension was expanded somewhat. Now included on the free list would be metal articles to be remanufactured by methods other than melting, to which the original suspension applied exclusively. Thus, the duty suspension would apply to metal waste and scrap imported for remanufacture by methods other than melting if entered in such a state that "renders them fit only for the recovery of the metal content."

Mr. Speaker, the Ways and Means Committee unanimously agreed that H.R. 12165 is justified at this time. The administration supports the legislation and no objection to it has been heard from any source. I urge my colleagues to approve the measure unanimously.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. VANIK. Mr. Speaker, I have no further requests for time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Ohio (Mr. VANIK) that the House suspend the rules and pass the bill H.R. 12165, as amended.

The question was taken; and on a division (demanded by Mr. VOLKMER) there were—yeas 13; nays 1.

Mr. VOLKMER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were refused.

So (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

---

## TEMPORARY SUSPENSION OF DUTY ON FLUORSPAR

Mr. VANIK. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 5265) to provide for the temporary suspension of duty on the importation of fluorspar, as amended.

The Clerk read as follows:

H.R. 5265

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That subpart B of part 1 of the Appendix to the Tariff Schedules of the United States (19 U.S.C. 1202) is amended by inserting immediately after item 909.01 the following new item:

| | | | |
|---|---|---|---|
| " 909.05 | Fluorspar (provided for in items 522.21 and 522.24, part 1J, schedule 5) | Free | No change On or before 6/30/80 ". |

SEC. 2. The amendments made by the first section of this Act shall apply with respect to articles entered, or withdrawn from warehouse, on or after the date of enactment of this Act.

The SPEAKER pro tempore. Is a second demanded?

Mr. STEIGER. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Wisconsin (Mr. STEIGER) will be recognized for 20 minutes.

Mr. STEIGER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I join my colleague in supporting enactment of H.R. 5265, a bill to temporarily suspend the duty on the importation of fluorspar.

As previously described by the gentleman from Ohio, the bill suspends until June 30, 1980 the duty on column I entries of both acid grade and metallurgical grade fluorspar. Fluorspar is a mineral, composed of calcium fluoride, that is used in the production of both aluminum and steel.

Hearings held early last year on this bill revealed that domestic production of fluorspar meets less than 25 percent of domestic demand for its use. Consuming industries, therefore, must import a substantial portion of the fluorspar they need. Currently, Mexico is the primary supplier of imported fluorspar.

Although, in the case of aluminum production, a particular industrial byproduct acid can be used as a substitute for fluorspar, such a substitute does not begin to compensate for the huge amount of fluospar that now must be imported. Consequently, both aluminum and steel processors are placed at a competitive disadvantage to the extent that they must use imported fluorspar. Of course, it is the consumer who ultimately pays the bill.

One U.S. company that produces fluorspar for domestic use has objected to the duty suspension because they have access to a large deposit of undeveloped ore from which fluorspar can be extracted. However, market conditions make development of the ore impractical at the present time or in the near future. The temporary nature of the suspension will permit the Congress to review this situation, along with other factors, after a period of about 2 years.

In general, the domestic fluorspar industry does not oppose suspension of the duty in this instance if on a temporary basis. A protective tariff means little since they are unable at this time to increase their production by any significant degree. The administration has expressed support for the legislation.

Mr. Speaker, the Trade Subcommittee has reviewed this legislation twice over the past 2 years and believes it to be meritorious. I urge unanimous approval of H.R. 5265 at this time.

Mr. JEFFORDS. Mr. Speaker, will the gentleman yield?

Mr. STEIGER. I yield to the gentleman from Vermont.

Mr. JEFFORDS. Mr. Speaker, it is my understanding this will allow the temporary suspension of duty on fluorspar and in the event it becomes feasible to produce the fluorspar the effort will be made to reimpose the duty. Is that it?

Mr. STEIGER. I will say to the gentleman from Vermont, and my colleague, the chairman of the Trade Subcommittee, might wish to enter into this—this is a temporary suspension of duty. It is fairly clear the Trade Subcommittee will look very carefully at what in fact has happened within the domestic industry. If there is an increase of production available from domestic sources and therefore an adequate supply to meet the needs of the aluminum and steel industries, I think it is fairly clear the Trade Subcommittee would not attempt to continue the suspension unless it were further justified. We are doing it on a temporary basis because of that concern that has been raised and because of the potential for further domestic fluorspar development.

Mr. VANIK. Mr. Speaker, will the gentleman yield?

Mr. STEIGER. I yield to the gentleman from Ohio.

Mr. VANIK. Mr. Speaker, I want to say I heartily concur in what my colleague, the distinguished gentleman from Wisconsin, said. That is absolutely correct. We must recall that this suspension is for a very short time for the specific purpose of letting us measure the status of domestic production and the effect it has on the domestic producer.

Mr. SIMON. Mr. Chairman, will the gentleman yield?

Mr. STEIGER. Let me say first—and then I will yield to my friend, the gentleman from Illinois, who circulated a "dear colleague" letter on this—Members will notice the date is June 30, 1980. That is different from the date we have had on all the other suspensions, just for this one reason, because we do want to take a look at it. The other suspensions, both last year and this year, I think all go to 1981. So we will look at it from that standpoint.

I yield now to the gentleman from Illinois (Mr. SIMON).

Mr. SIMON. Mr. Speaker, I thank the gentleman for yielding.

If I could respond to my colleague further, there is in fact an ample domestic supply. The question is: Do we want to put out of business that 20 percent of the fluorspar industry that is in business now?

In response to my colleagues, the gentleman from Ohio and the gentleman from Wisconsin, it seems to me we should measure the impact before we take off the duty, rather than measure the impact after we take off the duty.

What we are doing with a very strategic mineral is moving somewhat precipitously without any kind of reciprocal action on the part of the other nations. Ordinarily on this kind of thing we would enter into GATT or some other form of negotiations. We ought to know the impact on the domestic industry before we move. And we should get movement by other countries.

Why would some of the fluorspar companies—and I stress it is some of them—be interested in having this duty removed? One of the reasons is that some of them are owned by the aluminum companies and the steel companies and some are in the international field, and they can make more money producing fluorspar in South Africa than they can in Vermont or Illinois.

Mr. STEIGER. May I comment to my friend, the gentleman from Illinois, there are about 11 domestic producers of fluorspar. Of that 11, 2 of them express concern about the bill. It is true that there are at least 2, maybe 3 multinational companies that are involved in here, which supply the bulk, 80 percent, if my figures are correct, of that 25 percent.

So you have an interesting kind of situation.

I must say I do not concur with the gentleman from Illinois (Mr. SIMON) when he says that this temporary suspension will put the domestic industry out of business. That is not the position taken by the domestic industry, the bulk of it, nor is it the position taken by the administration that urged the bill to be passed.

Mr. JEFFORDS. Mr. Speaker, if the gentleman will yield still further, I am somewhat reassured but not yet convinced.

Mr. STEIGER. Mr. Speaker, I reserve the balance of my time.

Mr. VANIK. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois (Mr. SIMON).

Mr. SIMON. Mr. Speaker and my colleagues in the House, I thank the Members for their attention to this relatively small item that affects one mineral that most people have not even heard of and that affects about 1,000 jobs around this Nation, but those 1,000 jobs are important and this mineral is extremely important.

The States that will be adversely impacted if this bill passes are Illinois, Kentucky, Colorado, Texas, Arizona, Nebraska, Utah, and Montana and potentially some others, particularly Tennessee and Alaska where there are sizable deposits of fluospar.

Fluorspar is an essential ingredient in the production of steel and aluminum and fissionable uranium and in fluorine chemicals.

We now import—and my good colleague, the gentleman from Wisconsin (Mr. STEIGER) uses the figure of 75 percent, but the figure I have is 81 percent. Precisely which is correct, I do not know—but somewhere between 75 and 81 percent right now is imported.

We ought to look at what our national security interests are here. Is it desirable to be virtually totally dependent on those foreign imports?

We have in this Nation what we call national stockpile objectives where we stockpile certain essential minerals. There are two types of fluorspar. One type we have is the metallurgical, and we have one-sixth of the national stockpile objective there, and the other is the acid grade, which is a little over one-half of the national stockpile objectives.

One of the questions we have to face as we move on this legislation is that fundamental question: Should we become solely dependent on foreign sources for our fluorspar? The second question is the matter of domestic employment. Do we simply go ahead and then measure the impact afterwards as has been suggested?

So we have about 1,000 people involved and if my good friend, the gentleman from Wisconsin (Mr. STEIGER) is correct, only the marginal fluorspar mines are going to be put out of business. The only problem is that almost all the fluorspar mines are marginal in the United States. Also the places where we put people out of jobs happen to be places where right now there already is high unemployment.

In my district fluorspar miners live in three counties, unemployment is high in all those three counties. Pope County has 14.1 percent unemployment. Hardin County has 9.2 percent unemployment. And Massac County has 10.6 percent unemployment.

Further, what benefit do the American taxpayers get out of all of this, and the American consumers?

We are talking about an import duty that on every $100 worth of aluminum, steel or uranium means two-thirds of 1 percent, or 2 cents on every $100 worth of steel and aluminum.

We have to balance that against the number of people we are going to put out of work and who are going to be on welfare or unemployment compensation. We have a lot of other things which we have to take a look at. The lost revenue will be somewhere between $3 million and $6 million a year. The lost revenue will be experienced through the passage of this bill, and we also adversely impact the balance of payments. I do not need to tell the Members that the balance of payments is already bad.

Mr. Speaker, who benefits? That is a very interesting question. The beneficiaries are, No. 1, South Africa. South Africa is increasingly the major source of outside fluorspar, and in South Africa we have three corporations, one British and two American, who will be the beneficiaries. They have thousands of tons of fluorspar stockpiled, just ready for this bill to pass, which will enable them to flood the market and make a good, healthy profit.

Who loses? Our security, I think, is impaired.

The SPEAKER pro tempore. The time of the gentleman from Illinois (Mr. SIMON) has expired.

Mr. VANIK. Mr. Speaker, I yield 2 additional minutes to the gentleman from Illinois (Mr. SIMON).

Mr. SIMON. Mr. Speaker, I thank the gentleman for yielding.

Our security is impaired. We are increasingly dependent on foreign fluorspar and on a source that might not be a reliable source for fluorspar in the future. We are going to have Americans put out of work, and we do it contrary to the usual pattern of negotiating. If we got some kind of reciprocal action by other countries, that would be one thing.

Interestingly enough—and my colleague, the gentleman from Nevada (Mr. SANTINI), pointed this out to me—we now have a 2-year study going on on what our policy ought to be on basic minerals. Here is a basic mineral, and we are not considering the strategic impact of it. We are moving ahead despite the fact that the beneficiaries are not going to be the people of the United States.

Mr. Speaker, I would hope that we will get one-third of the Members of the House who will vote against this bill and not move ahead in this area.

Mr. VANIK. Mr. Speaker, I yield myself such time as I may consume.

I just want to point out to my colleague, the gentleman from Illinois (Mr. SIMON), that given the present demand pressure which there is for fluorspar, there should be no problem with the domestic fluorspar industry. I think we should be able to use all that is produced in this country.

The duty suspension is only for a limited time, and we expect to very carefully monitor the level of imports, domestic supplies, and help the domestic industry.

I want to point out to my distinguished colleague, the gentleman from Illinois, that I share his concern with respect to the domestic industry and jobs in America. However, the request for this suspension did not come from foreign producers; it came from other domestic industries in this country who claim that they desperately need this fluorspar in order to carry on their normal production.

Again, we are going to very carefully monitor these imports. I want to assure my distinguished colleague, the gentleman from Illinois (Mr. SIMON), that if we find that the importation is indeed not necessary or injurious to the American sources of supply, I think we can take appropriate action at that particular time.

Mr. VOLKMER. Mr. Speaker, will the gentleman yield?

Mr. VANIK. I yield to the gentleman from Missouri.

Mr. VOLKMER. Mr. Speaker, I want to ask the gentleman this question: Does this bill merely lift a duty or a quota along with the duty?

Mr. VANIK. It just suspends a duty.

Mr. VOLKMER. It just suspends a duty?

Mr. VANIK. Temporarily.

Mr. VOLKMER. I understand that, but I understand that fluorspar is used primarily in this country in the steel and aluminum industries; is that correct?

Mr. VANIK. That is correct.

Mr. VOLKMER. For manufacturing?

Mr. VANIK. That is correct.

Mr. VOLKMER. With the duty on it, United States Steel, Bethlehem Steel or Kaiser Aluminum or anybody else is not prevented from acquiring all the fluorspar they want to acquire from any producer; is that correct?

Mr. VANIK. No, excepting that it is added to the cost of producing steel and reduces the competitiveness of the American industry.

One of our problems today is the extremely vigorous competition there is the world. We are endeavoring to keep our industry competitive by doing such things as we can to hold down the cost of production in America, to which a great many other jobs are related.

Mr. VOLKMER. And with the duty removed——

Mr. VANIK. Suspended.

Mr. VOLKMER [continuing]. Or suspended, or removed for the period of the suspension, the cost of imported fluorspar will be less than domestically produced fluorspar; is that not correct?

Mr. VANIK. Yes; it will come in at a lower price.

Mr. VOLKMER. And they can acquire all they need from foreign producers; is that correct?

Mr. VANIK. As I indicated in my colloquy with the distinguished gentleman from Illinois (Mr. SIMON), if we find that our steel industry is not consuming all of the supplies of domestic fluorspar we can take some action.

If we find that they are favoring the imported fluorspar over that which is produced in the United States, then I think I will be among the first Members of this body to do something about correcting the situation.

Mr. VOLKMER. Would it not have been better to provide in the bill for a quota that could be acquired from foreign nations to insure that our domestic producers are not out of business, because we have seen enough of our domestic producers of all kinds of commodities put out of business? I am sure that United States Steel, the steel industry and the aluminum industry, can more readily absorb the cost rather than the domestic producing fluorspar industry. What I am afraid of is we are putting a lot of people or at least a thousand people out of jobs in favor of someone else, and that bothers me to a great extent.

Mr. VANIK. I want to say to the gentleman that we import 86 percent of our consumption today.

Mr. VOLKMER. It has gone up to 86 percent. It was 75 percent. Then it was 81 percent.

Mr. VANIK. No, no.

Mr. VOLKMER. Over on this side it was 75 percent. On the minority side it was 75 percent. The gentleman from Illinois said 81 percent. Now the majority leader side says 86 percent. If we keep going once more on the Republican side, we might get 90 percent.

Mr. VANIK. The gentleman knows the figures depend on what one uses as a criterion, whether one uses value or whether one uses quantity. Let me say this, the percent of imports related to apparent consumption is as follows: In 1972, 83 percent; 1973, 83 percent; 1974, 87 percent; 1975, 90 percent; 1976, 83 percent; 1977, 86 percent.

Mr. VOLKMER. Is that value or total?

Mr. VANIK. That is quantity.

Mr. VOLKMER. That is quantity.

Mr. VANIK. In value, the value was 74 percent in 1972; 75 percent in 1973; 82 percent in 1974; 85 percent in 1975; 77 percent in 1976; and 79 percent in 1977. The source of these figures is from the official figures of the U.S. Department of the Interior. The imports and exports are compiled from the official records of the U.S. Department of Commerce.

Mr. SIMON. Mr. Speaker, will my colleague, the gentleman from Ohio, yield?

Mr. VANIK. I will be happy to yield to the gentleman from Illinois.

Mr. SIMON. I thank the gentleman for yielding. It is important to talk about that 86 percent of imports—and the gentleman says how healthy the industry is. I happen to know they are barely surviving. The gentleman said the demand for this is not coming from foreign countries or foreign companies; it is coming from domestic industries. Let us be candid. The domestic industry that is demanding this most is the domestic industry that was referred to by my good colleague, the gentleman from Missouri, United States Steel. Who is one of the three corporations in South Africa who is going to be the major beneficiary of this legislation? Why, lo and behold, it is that domestic corporation called United States Steel, which has fluorspar mines in South Africa.

Let us face it. We are not passing this for the consumers of this Nation; we are passing it for one substantial corporation and two other corporations are going to be major beneficiaries also.

Mr. VANIK. Let me just point this out, that most of the fluorspar we use comes from Mexico and Spain and Italy. Of the total consumption of $75 million worth in 1976, $7 million came from South Africa.

Mr. SIMON. Will my colleague yield?

Mr. VANIK. I yield to the gentleman from Illinois.

Mr. SIMON. What country has been going up strongly in sales and has now surpassed Mexico? Mexico was No. 1, is now No. 2 in the importation of fluorspar.

Mr. VANIK. I really cannot tell the gentleman.

Mr. SIMON. It is South Africa. South Africa has hundreds of thousands of pounds of fluorspar waiting until this bill passes, and if this bill passes, South Africa is going to come into the United States with a massive supply of fluorspar.

Then one final point, if my colleague will yield.

Mr. VANIK. I would be happy to yield.

Mr. SIMON. Mr. Speaker, the gentleman mentioned we are temporarily suspending the duties—and we temporarily suspend the jobs in the meantime while we temporarily suspend the duties—and then the gentleman says the Committee on Ways and Means is going to "carefully monitor" what happens in the fluorspar industry.

I do not mean any disrespect to my

colleague from Ohio. I am usually with the gentleman and, in fact, later tomorrow afternoon I will be with the gentleman in a fight; but the gentleman has his hands full with a thousand and one things to do and the gentleman simply is not going to have time to monitor what happens in the fluorspar industry.

Mr. VANIK. Mr. Speaker, I would like to respond to the gentleman on that score. We are now in a situation where we are monitoring almost all the imports to the United States. We have established through the Customs Service and the Department of Commerce a very, very accurate monitoring and early warning system. We are endeavoring to check the level of all imports to this country; so if anything rises at an extraordinary level it is going to trigger our attention and we are going to try to determine the reasons why.

We are very distressed about our imbalance in trade and the factors that contribute to that imbalance. I want to assure the gentleman that I think for the first time, at least in my recollection, we are establishing very firm and accurate accounting handles on the levels of imports and those things that contribute to a sudden urge.

Mr. SIMON. Mr. Speaker, will my colleague yield once again?

Mr. VANIK. I am happy to yield.

Mr. SIMON. Mr. Speaker, the gentleman mentioned his careful concern about the balance of trade. Is not this bill going to adversely affect the balance of trade?

Mr. VANIK. Well, every import affects the balance of trade and we have to deal with the whole spectrum, from fluorspar to steel, to automobiles, to television sets, to the whole spectrum of commercial goods and agricultural products.

Mr. SIMON. But this action is taken unilaterally by our Nation without any reciprocal action and it adversely affects our balance of trade.

Mr. VANIK. I would say by all analyses we anticipate no increase in the level of imports, and if there is an increase in imports injurious to the gentleman's community, I will be happy to have this matter reviewed, I will assure the gentleman of that.

Mr. SIMON. Mr. Speaker, I wish I were as sanguine as my colleague from Ohio.

Mr. CHARLES H. WILSON of California. Mr. Speaker, will the gentleman yield?

Mr. VANIK. I am happy to yield to the gentleman from California.

Mr. CHARLES H. WILSON of California. Mr. Speaker, I am inclined to support the bill; but I would like to ask the gentleman, What will happen in the event this bill will not pass? What is the serious effect?

Mr. VANIK. Well, the duty will be added. The same amount of imports will occur. It is a 13-percent duty and it is going to be added to the cost of everything that is produced in the steel and aluminum industry. The American consumer is going to be very heavily impacted by the added cost which will result from the imposition of the duty. Our effort to suspend the duty relates from our belief that the consumer in America generally will suffer less by this action than he will if the duty is not suspended.

Mr. CHARLES H. WILSON of California. Mr. Speaker, I would be interested in knowing how the proponents feel about that.

Mr. STEIGER. Mr. Speaker, I yield myself 2 minutes.

Mr. Speaker, somebody around the floor said it must be the time of the full moon. In all the time we have had the chance to debate trade issues, I have rarely heard one so uniquely twisted by the kind of arguments used by those opposing this bill. I have profound respect for my able Lincoln scholar from Illinois; but the gentleman is absolutely wrong in the kind of approach the gentleman has used and the analyses the gentleman has given. The gentleman is not talking about 50 States or 1,000 jobs. The gentleman is talking about one producer of 6 percent of the production that is worried about what will happen.

The gentleman is not talking about cutting off the domestic industry and cutting off the supply from foreign sources. What the gentleman is talking about is whether or not we temporarily suspend the duty on fluorspar and allow the domestic steel and aluminum industry to have an adequate supply; thus, to reduce the price to the consumer and, thus, help our anti-inflation campaign.

Mr. Speaker, I will be darned if I will sit here idly by and watch that kind of debate go on. The bill is a good bill, and it is supported by the administration. It ought to be passed.

Mr. VOLKMER. Mr. Speaker, will the gentleman yield?

Mr. STEIGER. Mr. Speaker, I yield back the balance of my time.

Mr. VOLKMER. Does the gentleman from Ohio (Mr. VANIK) have any time left?

● Mr. JEFFORDS. Mr. Speaker, while the discussion I have had with my colleague from Wisconsin (Mr. STEIGER) has clarified several points for me, I am still opposed to H.R. 5265 which is before us. This legislation, which would temporarily suspend the duty on imported fluorspar, would be seriously detrimental to our domestic fluorspar industry. The chief argument I hear from my colleagues on the Ways and Means Committee is that the current duty serves to increase the cost to consuming industries, primarily the steel and aluminum industries, with little compensating benefits to our domestic fluorspar industry. It is maintained that enactment of this measure would place U.S. steel producers, as well as other consumers of fluorspar, in a better competitive position vis-a-vis foreign producers.

This legislation was brought to my attention by Umont Mining, Inc., a small mining exploration company located in my State of Vermont. They have pointed out to me that the benefit to the U.S. steel industry would be on the order of only 15 cents per ton of steel produced. This is a very small savings when taking into account the fact that this legislation may result in the total elimination of domestic production of fluorspar, which is listed as a strategic and critical mineral. The following represents an analysis of the impacts of this legislation which was developed by Umont Mining, Inc. I hope my colleagues will seriously examine the potential impacts of this legislation and join me in opposing it. I urge defeat of this measure:

NOTES ON U.S. FLUORSPAR RESERVES AND ECONOMICS

The steel companies are urging the passage of H.R. 5265 which would remove the tariff on fluorspar (a non-metallic flux mineral essential to making steel). The removal of the duty would result in a reduction of only 15¢ in the manufacture of one ton of steel.

Here is background on what this action would mean:

1. At present, even with the present duty imposed, our few operating fluorspar producers have great difficulty in competing with foreign sources, mainly Mexico, Africa, and Thailand. Our present spar resources are limited and marginal. Exploration for this non-metalic mineral would come to a standstill.

2. Spar is essential to the making of steel, aluminum, refrigerants, fluorine.

3. Approximately 80% of our supply is foreign due to the relatively low price of imports (even when including the present duty).

4. In the making of steel and aluminum a very small percentage of spar is used as a flux (thus the low cost for spar (15¢) per ton of steel).

5. Fluorspar is on this U.S. list of 34 strategic minerals. It is also on the "critical" list.

6. To reduce the price of spar from $91 per ton to $71 per ton, for example, would virtually kill U.S. exploration and production of this vital mineral resource, all for a miniscule saving in the cost per ton of end product.

7. Umont Mining, a small exploration company, has worked on the development of a fluorspar discovery in the Bayhorse District of Idaho for seven years. Approximately $2,000,000 of private capital has been spent on this project. The end result so far is a proven four million ton fluorspar orebody of excellent grade, with the likelihood of its being increased in the future to much larger tonnage. As a result of this, in the opinion of a number of geologists, the Bayhorse District in Idaho may have the largest fluorspar reserves in the nation.

8. At present no mining company is willing to invest in a mine and mill at Bayhorse because of high freight rates. Removal of the tariff certainly would kill this project and very probably also the few remaining producers of fluorspar in the United States.

9. The end result of this short range thinking is more and more dependence on foreign nations for a not generally understood but critical natural resource.

10. Question: Are we willing to destroy an industry (fluorspar production) for a fifteen cent saving per ton in the cost of steel?

COST CALCULATION

Assume 15 lbs. national average $CaF_2$ (fluorspar) used per ton of steel.

$91.00 imported cost per ton fluorspar (July, 1978 price of 70% effective metallurgical grade flourspar).

At a price of $91.00 per ton $CaF_2$ would cost 68.25¢ per ton steel ($15 \times 4.55$¢)

At a price of $71.00 per ton (no tariff) $CaF_2$ would cost 53.25¢ ($15 \times 3.55$¢)

Difference: $68.25¢ - 53.25¢ = 15¢$ saving per ton of steel.●

The SPEAKER pro tempore. All time has expired.

The question is on the motion offered by the gentleman from Ohio (Mr. VANIK) that the House suspend the rules and pass the bill, H.R. 5265, as amended.

The question was taken; and on a division (demanded by Mr. VOLKMER) there were—yeas 8, nays 4.

Mr. SIMON. Mr. Speaker, I demand the yeas and nays.

The SPEAKER pro tempore. The Chair will state that there is a question as to the gentleman from Illinois (Mr. SIMON) having been timely on his feet.

Is the gentleman's demand for the yeas and nays?

Mr. SIMON. Yes, Mr. Speaker, the demand is for the yeas and nays.

The SPEAKER pro tempore. All those in favor of taking this vote by the yeas and nays will rise and remain standing until counted.

Evidently a sufficient number have arisen, and the yeas and nays are ordered.

Pursuant to clause 3, rule XXVII, and the Chair's prior announcement, further proceedings on this motion will be postponed.

---

## CONCURRING IN SENATE AMENDMENTS TO H.R. 1337, EXCISE TAXES ON CERTAIN TRUCKS, BUSES, TRACTORS, ET CETERA

Mr. CORMAN. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 1342) providing that immediately upon the adoption of this resolution the bill (H.R. 1337) to amend the Internal Revenue Code of 1954 with respect to excise tax on certain trucks, buses, tractors, et cetera, together with the Senate amendments thereto, be taken from the Speaker's table to the end that; First, the Senate amendment to the title of the bill be agreed to; and second, the Senate amendment to the text of the bill be agreed to with amendments.

The SPEAKER pro tempore. The Clerk will report the resolution.

The Clerk read as follows:

H. RES. 1342

*Resolved*, That immediately upon the adoption of this resolution the bill (H.R. 1337) to amend the Internal Revenue Code of 1954 with respect to excise tax on certain trucks, buses, tractors, et cetera, together with the Senate amendments thereto be, and the same is hereby, taken from the Speaker's table to the end that (1) the Senate amendment to the title of the bill be, and the same is hereby, agreed to; and (2) the Senate amendment to the text of the bill be, and the same is hereby, agreed to with the following amendments:

Page 3, line 25, of the Senate engrossed amendments, insert a comma after "18 years of age".

Page 4 of the Senate engrossed amendments, strike out lines 1 through 3 and insert the following:

age (if any) established by law applicable in the locality in which the household is situated at which beer may be sold to individuals, whichever is greater."

Page 4, line 19, of the Senate engrossed amendments, strike out "illegally produced beer" and insert in lieu thereof "to illegally produced beer".

Page 8, line 7, of the Senate engrossed amendments, strike out "paragraph (4)" and insert in lieu thereof "paragraph (4))".

Page 8, beginning in line 12, of the Senate engrossed amendments, strike out "the first section of this Act" and insert in lieu thereof "this section".

Page 8 of the Senate engrossed amendments, strike out line 16 and all that follows down through line 9 on page 13, and insert:

SEC. 4. PARTIAL ROLLOVERS OF LUMP SUM DISTRIBUTIONS.

(a) PARTIAL ROLLOVER FROM EMPLOYEES' TRUSTS PERMITTED.—Paragraph (5) of section 402(a) of the Internal Revenue Code of 1954 (relating to rollover amounts) is amended to read as follows:

"(5) ROLLOVER AMOUNTS.—

"(A) GENERAL RULE.—If—

"(i) the balance to the credit of an employee in a qualified trust is paid to him in a qualifying rollover distribution,

"(ii) the employee transfers any portion of the property he receives in such distribution to an eligible retirement plan, and

"(iii) the amount so transferred consists of the property (other than money) distributed.

then such distribution (to the extent so transferred) shall not be includible in gross income for the taxable year in which paid.

"(B) MAXIMUM AMOUNT WHICH MAY BE ROLLED OVER.—In the case of any qualifying rollover distribution, the maximum amount transferred to which subparagraph (A) applies shall not exceed the fair market value of all the property the employee receives in the distribution, reduced by the employee contributions.

"(C) TRANSFER MUST BE MADE WITHIN 60 DAYS OF RECEIPT.—Subparagraph (A) shall not apply to any transfer of a distribution made after the 60th day following the day on which the employee received the property distributed.

"(D) DEFINITIONS.—For purposes of this paragraph—

"(i) QUALIFYING ROLLOVER DISTRIBUTION.—The term 'qualifying rollover distribution' means 1 or more distributions—

"(I) within 1 taxable year of the employee on account of a termination of the plan of which the trust is a part or, in the case of a profit-sharing or stock bonus plan, a complete discontinuance of contributions under such plan, or

"(II) which constitute a lump sum distribution within the meaning of subsection (e)(4)(A) (determined without reference to subsection (e)(4)(B)).

"(ii) EMPLOYEE CONTRIBUTIONS.—The term 'employee contributions' means—

"(I) the excess of the amounts considered contributed by the employee (determined by applying section 72(f)), over.

"(II) any amounts theretofore distributed to the employee which were not includible in gross income.

"(iii) QUALIFIED TRUST.—The term 'qualified trust' means an employees' trust described in section 401(a) which is exempt from tax under section 501(a).

"(iv) ELIGIBLE RETIREMENT PLAN.—The term 'eligible retirement plan' means—

"(I) an individual retirement account described in section 408(a),

"(II) an individual retirement annuity described in section 408(b) (other than an endowment contract),

"(III) a retirement bond described in section 409,

"(IV) a qualified trust, and

"(V) an annuity plan described in section 403(a).

"(E) SPECIAL RULES.—

"(i) TRANSFER TREATED AS ROLLOVER CONTRIBUTION UNDER SECTION 408.—For purposes of this title, a transfer described in subparagraph (A) to an eligible retirement plan described in subclause (I), (II), or (III) of subparagraph (D)(iv) shall be treated as a rollover contribution described in section 408(d)(3).

"(ii) SELF-EMPLOYED INDIVIDUALS AND OWNER-EMPLOYEES.—An eligible retirement plan described in subclause (IV) or (V) of subparagraph (D)(iv) shall not be treated as an eligible retirement plan for the transfer of a distribution if any part of the distribution is attributable to a trust forming part of a plan under which the employee was an employee within the meaning of section 401(c)(1) at the time contributions were made on his behalf under the plan."

(b) PARTIAL ROLLOVER OF ANNUITY CONTRACTS PERMITTED.—Subsection (a) of section 403 of such Code (relating to taxability of beneficiary under a qualified annuity plan) is amended by striking out paragraph (4) and (5) and inserting in lieu thereof the following new paragraph:

"(4) ROLLOVER AMOUNTS.—

"(A) GENERAL RULE.—If—

"(i) the balance to the credit of an employee in an employee annuity described in paragraph (1) is paid to him in a qualifying rollover distribution,

"(ii) the employee transfers any portion of the property he receives in such distribution to an eligible retirement plan, and

"(iii) the amount so transferred consists of the property (other than money) distributed,

then such distribution (to the extent so transferred) shall not be includible in gross income for the taxable year in which paid.

"(B) CERTAIN RULES MADE APPLICABLE.—Rules similar to the rules of subparagraphs (B) through (E) of section 402(a)(5) and of paragraph (6) of section 402(a) shall apply for purposes of subparagraph (A)."

(c) TAXATION OF PORTION NOT ROLLED OVER.—

(1) IN GENERAL.—Paragraph (6) of section 402(a) of such Code (relating to special rollover rules) is amended by adding at the end thereof the following new subparagraph:

"(C) TREATMENT OF PORTION NOT ROLLED OVER.—If any portion of a lump sum distribution is transferred in a transfer to which paragraph (5)(A) applies, paragraph (2) of subsection (a), and paragraphs (1) and (3) of subsection (e) shall not apply with respect to such lump sum distribution."

(2) CONFORMING AMENDMENTS.—Paragraph (6) of section 402(a) of such Code is amended—

(A) by striking out "For purposes of paragraph (5)(A)(i)",

(B) by striking out "A complete" in subparagraph (A) and inserting in lieu thereof "For purposes of paragraph (5)(D)(i), a complete", and

(C) by inserting "For purposes of paragraph (5)(D)(i)—" after "ASSETS.—" in subparagraph (B).

(d) EFFECTIVE DATES.—

(1) IN GENERAL.—The amendments made by subsections (a), (b), and (c) shall apply with respect to taxable years beginning after December 31, 1974.

(2) VALIDATION OF CERTAIN ATTEMPTED ROLLOVERS.—If the taxpayer—

(A) attempted to comply with the requirements of section 402(a)(5) or 403(a)(4) of the Internal Revenue Code of 1954 for a taxable year beginning before the date of the enactment of this Act, and

(B) failed to meet the requirements of such section that all property received in the distribution be transferred,

such section (as amended by this section) shall be applied by treating any transfer of property made on or before December 31, 1978, as if it were made on or before the 60th day after the day on which the taxpayer received such property. For purposes of the preceding sentence, a transfer of money shall be treated as a transfer of property received in a distribution to the extent that the amount of the money transferred does not exceed the highest fair market value of the property distributed during the 60-day period beginning on the date on which the taxpayer received such property.

Mr. CORMAN (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the House amendments to the Senate amendments be dispensed with, and that they be printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER pro tempore. Is a second demanded on the resolution?

Mr. STEIGER. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from California (Mr. CORMAN) will be recognized for 20 minutes, and the gentleman from Wisconsin (Mr. STEIGER) will be recognized for 20 minutes.

The Chair recognizes the gentleman from California (Mr. CORMAN).

Mr. CORMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 1337, as passed by the Senate, is a combination of three small bills which have been passed by the House plus several Senate amendments.

The first section of the bill provides that the use of the administratively developed "cost floor" rule is specifically prohibited as an alternative tax base for purposes of computing the excise tax on trucks, buses and other highway equipment sold by manufacturers at retail. Under a Senate amendment to the House bill, the September 30, 1977, effective date was changed so that this rule will apply prospectively beginning with the first calendar quarter which begins more than 30 days after enactment.

In this connection, I want to emphasize that the intent of the Committee on Ways and Means concerning the constructive sale price percentage for a type of taxable article is that the percentage is to be determined by reference to a comparison between the price at which these articles are sold at retail and the price at which these articles are predominately sold at other than retail, even though these latter sales may comprise a minority of the total sales of such articles.

The second section of the bill deals with excise taxes on beer and wine. It corrects problems in interpreting present law so that an adult may brew beer or make wine in limited quantities for personal and family use without incurring beer or wine excise taxes or being subject to certain penalties. Under a Senate amendment to the House-passed provisions, which were contained in H.R. 2028, the treatment of homebrewing is made parallel to the treatment of home winemaking so that homebrewers will be able to brew up to 200 gallons of beer each year without being subject to the 30-gallon-on-hand limitation and the registration requirement contained in the House bill. However, there are several clarifying amendments that are made to conform the language contained in the Senate amendment to that of the House bill.

The third section of the bill expands the farming exemption from fuel taxes to enable an aerial crop duster who uses fuel for farming purposes to claim the tax refund or credit. A Senate amendment to the House-passed provision, which was contained in H.R. 2852, requires that the farmer must waive his right to refund or credit in order for the crop duster to claim it. A technical amendment is made to correct the effective date as contained in the Senate amendment.

The fourth section of the bill is a Senate provision which would allow tax-free treatment for any portion of a lump-sum distribution from a qualified retirement plan which is deposited in an individual retirement account or another qualifying plan. There is also a special makeup rule for individuals who previously attempted to make a rollover deposit but failed to transfer the required amount.

In addition to various technical amendments, an amendment is made which is necessary to this Senate amendment to extend the relief provided by the bill to plans funded by annuity contracts. A similar makeup rule would apply to individuals who previously attempted to roll over distributions from annuity plans, but failed to transfer the entire amount of the distribution.

The final section of the Senate-passed bill deals with supplemental security income and is identical to H.R. 13814, which was favorably reported by the Committee on Ways and Means on August 16. It addresses a problem which has recently arisen regarding the SSI program in California.

The Senate amendment contained in section 5 of H.R. 1337 amends section 8(d) of Public Law 93–233. It provides that, upon the request of the State of California, the Secretary of Health, Education, and welfare would make a monthly cash payment equal to the minimum food stamp allotment for an eligible one-person household ($10) to noninstitutionalized, SSI recipients who do not have an eligible spouse. This additional payment would be included in or with the individual's SSI check. Eligible SSI individuals would receive this $10 monthly cash payment in place of food stamps. These cash payments in lieu of food stamps could not be made before October 1, 1978 nor continue beyond September 30, 1979.

This amendment is identical to a bill, H.R. 13814, that has been approved by the Committee on Ways and Means and is scheduled to be considered by the House under a supsension of the Rules.

The purpose of the Senate amendment and the Committee approved bill is to provide eligible SSI individuals in California with a Federal payment equivalent to their food stamp entitlement in a manner that reduces administrative procedures and costs. Under both, noninstitutionalized SSI individuals in the State would receive a monthly $10 cash payment in lieu of food stamps. The amendment would allow California to resume the "cash-out" status for SSI recipients that has been in effect since the SSI program was implemented in January of 1974.

The Congressional Budget Office (CBO) estimates that, for fiscal 1979, the payments provided under this amendment will cost approximately $60 million; $57 million for benefits and $3 million for administration. CBO estimates that if this amendment is not enacted, and SSI recipients in California remain eligible for food stamps, annual Federal food stamp cost will increase by $50 million, $30 million of which would be for benefits and $20 million for the Federal share of administrative expenditures. Since States pay half the food stamp administrative costs, the CBO estimate indicates that California would pay an additional $20 million in yearly administrative costs if SSI recipients remain eligible for food stamps. In other words, it would cost approximately $40 million ($20 million Federal and $20 million State) to administer $30 million in food stamp benefits. Whereas, under this Senate amendment and the committee bill, it would cost only $3 million to administer $57 million in benefits. Almost twice as many needy aged, blind, and disabled individuals would receive the Federal benefits to which they are entitled at a fraction of the administrative cost, and at a comparable total cost to the Federal Government.

Mr. Speaker, I urge adoption of this resolution, which will allow the House to return H.R. 1337 to the Senate with the modifications we have just described.

Mr. STEIGER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 1337 as passed by the other body consolidates three House-passed bills (H.R. 1337, H.R. 2028, and H.R. 2852), one Ways and Means Committee passed bill (H.R. 13814) and a provision concerning pension rollovers.

The original House-passed bill dealt with the issue of the proper method of computation of the 10-percent excise tax on trucks and buses. The excise tax normally is applied on the manufacturer's wholesale price. In situations where the manufacturer is also its own retailer, the IRS deems the wholesale price to be the higher of the cost of manufacture or a certain percentage of the retail sales price. H R. 1337 prohibits the IRS from using the cost of manufacture as the basis for imposing the excise tax.

Mr. Speaker, H.R. 1337 contains provisions to make technical modifications in the way in which truck and trailer manufacturers compute excise tax on their sales to consumers. It is not intended to raise revenues or lose revenues, but merely to assure that a manufacturer's sale at retail will have about the same tax base as the sale of the same article at wholesale. It is intended to reflect the discount between retail sales to consumers and sales at other than retail to wholesale distributors or dealers. If the preponderance of nonretail sales in a particular industry is to wholesale distributors, the discount should be the difference between the highest retail price and the highest price to wholesale distributors in the ordinary course of

trade. If the preponderance of nonretail sales is to dealers, the IRS should set the discount at the difference between the retail price and the lowest price to retailers.

Since publication of revenue ruling 54–61, the retail discount has been 25 percent. Today that discount rate for trucks and trailers is somewhat between 10 and 20 percent, depending upon which industry is affected, trucks, truck bodies, tractors, trailers, or buses. While it is clear that IRS is authorized under this bill to alter the discount, it should not do so until it has thoroughly investigated each affected industry to determine what an average and reasonable rate should be to govern each industry and assure itself that the change will not have an inflationary impact.

H.R. 1337 contains an expanded version of House-passed H.R. 2028, dealing with the excise tax treatment of home producers of beer or wine. It permits households of two or more adults to produce up to 200 gallons per year of beer or wine without incurring any alcohol tax or penalties. The other body removed both the requirement that beer producers register with the Treasury Department and the 30-gallon limitation on beer in storage. Originally, the registration of beer producers was directed at monitoring possible moonshine whiskey operations, but the procedure has proven to be more of a nuisance than a useful enforcement tool.

The third House-passed bill contained in H.R. 1337 as passed by the other body is H.R. 2852. This provision permits agricultural aerial crop sprayers to claim the refund for the excise tax on gasoline used in agricultural operations. Under present law the farmer must apply for the refund. However, in situations where a farmer hires a crop duster to service his fields, he often fails to claim the refund. This provision would permit the crop duster to claim the refund if the farmer waives his right to claim it.

A new provision added by the other body concerns the issue of lump-sum pension distributions. Under present law, a person receiving a lump-sum distribution from a qualified retirement plan is required to deposit the entire sum in another qualified plan account in order to obtain tax-free rollover treatment. Situations have occurred where a person received the lump-sum pension distribution and reinvested all but a small amount in a qualified pension account. Nevertheless, the entire lump-sum amount was taxed. The amendment would permit partial rollovers, that is, the portion of a lump-sum distribution reinvested in a qualified plan would receive tax-free rollover treatment, while the amounts not so reinvested would be taxed. The effective date is January 1, 1975. The present operation of the law is a glaring anomaly and the other body's amendment will help bring equitable relief to the person who might otherwise be harmed.

Finally Mr. Speaker, one of the Senate amendments to H.R. 1337 has unique interest and application in the State of California. Its intent is to permit the continuation of payments of cash in lieu of food stamps to California SSI recipients, as has been the practice in that State since the inception of the SSI program. Without the adoption of this provision, SSI recipients there will become entitled to apply for food stamps because the State, as a result of decisions reached in the wake of proposition 13, is no longer complying with one of two statutory conditions of Public Law 94–379 under which it has been permitted since 1976, to maintain its "cash-out" status.

The Congressional Budget Office has estimated that the $10 bonus payments which the Federal Government would provide under this bill to noninstitutionalized SSI individuals not having an eligible spouse will cost approximately $60 million, $57 million of which will be for benefits. CBO has estimated that without the enactment of this measure, Federal food stamp benefit costs will increase by $30 million and Federal administrative costs by $20 million, despite a projected participation rate of less than 50 percent.

The Ways and Means Committee reported legislation identical to this measure on August 17 of this year. The provision's net cost over that of the otherwise unavoidable alternative—the increase in food stamp costs—is estimated at $10 million.

It should be emphasized that this legislation's life is limited to a single year. We must more carefully study the broader ramifications of the SSI food stamp cash-out, and closely monitor the special California situation, before reaching a more lasting judgment as to the procedure to be followed there and elsewhere.

Mr. Speaker, I support H.R. 1337, as amended by the other body. It consolidates several House bills together with correcting a glaring anomaly in the tax treatment of pension rollovers.

Mr. Speaker, I yield 5 minutes to the gentleman from Maryland (Mr. BAUMAN).

Mr. BAUMAN. Mr. Speaker, last Thursday, September 7, when this bill came up in the form of a unanimous-consent request of the gentleman from California (Mr. CORMAN), I expressed concern about the procedure being used because of one of the five sections of the bill added in the other body. I do not have any less apprehension today about the procedure being used.

I think the House ought to have a chance to vote separately on whether we wish to agree to this particular amendment. It is the custom to hang ornaments on the tree, in some fashion or the other, when Ways and Means bills are sent over to the other body. And this bill has some rather attractive ornaments on it. The precedent embodied in section 5 is what I am worrying about. Because of the situation in California we are in fact stepping in and bailing out the State of California's current government which does not, obviously, wish to comply with the previous law the Congress passed giving special treatment to California under the food stamp program. Under that law which was passed, I believe, about 2 years ago, Congress set certain conditions in Federal law that California had to meet in order to qualify for the special treatment. And after proposition 13, the legislature refused to comply with that special law that Congress passed. So now we are faced with the question today of whether or not we will step in and bail them out by financing the action that they refused to take. It may well be that the administrative cost and the actual benefit cost only results in about a net added cost of about $10 million, but we are not kidding anybody. The California voters who voted on proposition 13 are going to pay Federal taxes in the same numbers as they would have before, and their money will be used to pay for this, as will all other U.S. taxpayers.

It seems to me that the State of California obligation is the one that ought to be taken care of by their own government and not by the Federal taxpayers at large. Worse than that, I can see the possibility that if other States follow in passing tax and spending limitation amendments, all of them will come to Congress and ask for this sort of assistance, and there should be none.

This is the first time this body has faced this issue, and if we are really concerned about saving taxpayers' money, then we ought to vote no on this resolution.

Mr. CORMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the gentleman from Maryland (Mr. BAUMAN) is as inaccurate as he is articulate in his analysis of this matter. He claims California has received special treatment. In fact, California has for several years received fewer Federal dollars per capital for SSI recipients than other States because, at the State's option, SSI recipients in the State have been ineligible for food stamps. In place of food stamps, at an additional cost to the State, California has included in its State SSI supplement an amount in cash generally equal to the food stamp benefit. This action by the State, which the gentleman from Maryland (Mr. BAUMAN) refers to as special treatment, has saved the Federal Government many millions of dollars in food stamp benefits over the past 4 years and has cost the State an equivalent amount. I do not think this is accurately characterized as special treatment.

SSI recipients in Maryland receive the Federal SSI benefit, just as do those in California, but in addition in Maryland they receive food stamps which are federally funded. Now, because California could not supplement the Federal SSI payment as much this year as they had the prior years, SSI recipients in the State—as the SSI recipients in Maryland—are entitled to the Federal SSI cash payment plus food stamps. It should be clear, however, that SSI recipients in California will not be eligible for as much in food stamps as those in Maryland because Maryland has been less generous in providing for its needy, aged, blind, and disabled.

The pertinent fact is that, as of Sep-

tember 1, certain Californians drawing SSI are also entitled to $10 worth of food stamps, and that will cost the Federal Government $10 for the benefit plus whatever it costs to administer the program. Food stamp administrative costs are divided equally between the Federal Government and the State. The gentleman may harangue all he wants about bailing out California. The fact of the matter is that it is going to cost the Federal Government $50 to $60 million for food stamps if we do nothing. This bill simply converts those food stamps to cash, and thereby saves substantial administrative costs for both the State and the Federal Government.

These are the pertinent facts of the matter, and I hope the House will adopt this motion.

Mr. Speaker, I reserve the balance of my time.

Mr. STEIGER. Mr. Speaker, I yield an additional 1 minute to the gentleman from Maryland (Mr. BAUMAN).

Mr. BAUMAN. Mr. Speaker, I regret that the gentleman from California disagrees with my characterization of the situation, but I do not agree with his implication that I am inaccurate in what I am saying. The fact of the matter is, in 1976 Congress did pass a Federal law that granted a special status for California, and according to the gentleman's own committee staff memorandum—which I am sure he has read at some point; it is a well-written memorandum—California received this special treatment, allowing the cash out, only so long as the legislature passed through to the SSI recipients any cost-of-living increases provided in Federal benefits.

Second, the law provided a yearly cost-of-living increase in the State's SSI payments. California did not live up to the second of those two Federal criteria, because of proposition 13. In an effort to cut welfare spending, the legislature decided not to grant that cost-of-living increase. Now, the State government comes to Congress and asks us to pass this law today to give them special treatment and $60 million. If that is inaccurate, the gentleman can correct me. We should not grant this request.

Mr. Speaker, for the further edification of the gentleman from California, I include as part of my remarks, a copy of the pertinent part of the staff memorandum regarding this matter:

5. Section 5 of the Senate amendments is virtually identical to H.R. 13814 as reported by the Ways and Means Committee on August 17, 1978. The section would permit the continued payment of cash in lieu of food stamps to California SSI recipients.

First as an SSI "hold harmless" State, but since 1976 under the specific authority of P.L. 94-379, California has been able to provide SSI recipients with an additional amount of cash generally equivalent to, and in place of, food stamps. Under P.L. 94-379, California was permitted to do this so long as it met two conditions: (1) it had to pass through to SSI recipients any cost-of-living increases provided in the Federal SSI benefits; and (2) it had to provide a yearly cost-of-living increase in the State supplementary payment. California has met these two conditions until now, but beginning September 1, will not be in compliance with No. 2. This stems from the State's decision with respect to holding the line on welfare costs in the wake of Proposition 13.

If Congress does not act at this time, food stamps will be made available to California SSI recipients. As of the first of the year, this will have to be done on a case-by-case basis, as categorical eligibility will no longer be utilized in the food stamp program. It is thought that most noninstitutionalized aged or disabled individuals (who do not have an eligible spouse) will qualify for the minimum food stamp allotment of $10 value per month, but SSI couples and most single, blind recipients will not qualify because of the level of their SSI payments. Institutionalized SSI recipients will not qualify because they do not constitute a household under the food stamp law.

CBO estimates that if food stamps become effective for these persons, Federal food stamp benefit costs will increase by $30 million, and administrative costs by $20 million. Participation rates can be projected to be quite low (perhaps below 50%). The cost of the proposed solution is $60 million, $57 million of which would be for benefits. The net Federal cost of the legislation over food stamps is $10 million, according to CBO. California's own estimates project an even lesss favorable food stamp benefit vs. administrative cost ratio.

Under the Senate amendment and H.R. 13814, the Federal Government would include an additional $10 in the SSI benefit checks of noninstitutionalized SSI individuals not having an eligible spouse. They would receive this $10 in lieu of food stamps. These payments could not continue beyond September 30, 1979; Congress would have the opportunity to monitor the California situation and examine the broader issues involved, before continuing this beyond the one-year time frame.

The basic question which someone might raise is why Congress should make yet another special accomodation for California, when that State, by virtue of its own decision in the wake of Proposition 13, has failed to comply with the conditions of the original special arrangement. But it should be borne in mind that Federal costs will increase without the adoption of this measure due to increases in food stamp costs. The net Federal cost of $10 million must be weighed against the State's having to depart from the practice it has followed, with respect to these SSI recipients, throughout the history of that program.

Mr. CORMAN. Mr. Speaker, I yield myself such time as I may consume.

The fact remains, under existing law approximately 500,000 SSI recipients in California became eligible for food stamps as of September 1, at Federal expense. It is cheaper to give them this Federally financed benefit in cash. I hope we will soon provide cash in place of food stamps for SSI recipients in all States. I hope that we pass this today.

Mr. STEIGER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would just simply say that I recognize the argument made by the gentleman from Maryland. My hope is, however, given the fact that we are doing the bill in the way that we are, the Members will understand that an aye vote is important notwithstanding this dispute about California. I hope the bill is passed, and I urge its adoption.

● Mr. PICKLE. Mr. Speaker, H.R. 2852 modifies the procedure for obtaining refunds of Federal excise taxes on aviation fuels used for agricultural spraying and crop dusting. Today this refund is available to the individual farmer. This bill merely puts the aerial aircraft operators in place of the farmers to obtain gasoline tax refund for use on farm land.

The Senate added an amendment to the bill that requires that the farmer must waive his right to the refund or credit in writing in order for the crop duster to claim it. I want to be sure that this is handled in some simple fashion so that it does not result in a lot of complicated bookkeeping. The amount that an individual farmer would have collected is not that large—for example, the refund per acre would be one-fourth cent or $1.40 for a 100-acre farm. This hardly justifies much paperwork. It would be silly to make an applicator go banging on doors looking for farmers to get a $2 refund.

It seems to me that the logical way to handle this is just to include on the bill "I hereby waive my right to collect the refund of the Federal excise taxes on aviation fuels used for this agricultural spraying and crop dusting." This could easily be added to the statement and would fulfill the requirement.

Today more and more of our farm operations are being handled by air. Planting as well as spraying are increasingly done by air. It saves fuel, is more efficient and faster and uses less manpower. This bill will help the aerial operator by giving him, the person who buys the gasoline, the gasoline exemption already available to the farmer.●

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. CORMAN) that the House suspend the rules and agree to the resolution (H. Res. 1342).

The question was taken.

Mr. BAUMAN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 3, rule XXVII, and the Chair's prior announcement, further proceedings on this motion will be postponed.

## U.S. CODE AMENDMENTS FOR FEDERAL DISTRICT COURTS

Mr. KASTENMEIER. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 13331) to amend title 28 of the United States Code to make certain changes in the places of holding Federal district courts, in the divisions within judicial districts, and in judicial district dividing lines, as amended.

The Clerk read as follows:

H.R. 13331

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SHORT TITLE

SECTION 1. This Act may be cited as the "Federal District Court Organization Act of 1978".

PLACES OF HOLDING COURT

SEC. 2. (a) The last sentence of section 97 (a) of title 28, United States Code, is amended to read as follows:

"Court for the Eastern District shall be held at Ashland, Catlettsburg, Covington, Frankfort, Jackson, Lexington, London, Pikeville, and Richmond.".

(b) The last sentence of section 104(a)(1) of title 28, United States Code, is amended to read as follows:

"Court for the eastern division shall be at Aberdeen, Ackerman, Corinth.".

DIVISIONS WITHIN JUDICIAL DISTRICTS

SEC. 3. (a) Section 98(c) of title 28, United States Code, is amended to read as follows:

"Western District

"(c) The Western District comprises the parishes of Acadia, Allen, Avoyelles, Beauregard, Bienville, Bossier, Caddo, Calcasieu, Caldwell, Cameron, Catahoula, Claiborne, Concordia, Jefferson Davis, De Soto, East Carroll, Evangeline, Franklin, Grant, Iberia, Jackson, Lafayette, La Salle, Lincoln, Madison, Morehouse, Natchitoches, Ouachita, Rapides, Red River, Richland, Sabine, Saint Landry, Saint Martin, Saint Mary, Tensas, Union, Vermilion, Vernon, Webster, West Carroll, and Winn.

"Court for the Western District shall be held at Alexandria, Lafayette, Lake Charles, Monroe, Opelousas, and Shreveport.".

(b) Section 114 of title 28, United States Code, is amended—

(1) in paragraph (2), by striking out "Sheridan, Steele, Stutsman, and Wells" and inserting in lieu thereof "Steele, and Stutsman";

(2) in paragraph (3), by striking out "Bottineau," "McHenry,", and "Pierce,"; and

(3) by amending paragraph (4) to read as follows:

"(4) The Northwestern Division comprises the counties of Bottineau, Burke, Divide, McHenry, McKenzie, Mountrail, Pierce, Renville, Sheridan, Ward, Wells, and Williams.".

JUDICIAL DISTRICT DIVIDING LINES

SEC. 4. (a) Section 89 of title 28, United States Code, is amended—

(1) in the first paragraph of subsection (a), by inserting "Madison," immediately after "Liberty,"; and

(2) in the first paragraph of subsection (b), by striking out "Madison,".

(b)(1) Section 93 of title 28, United States Code, is amended to read as follows:

"§ 93. Illinois

"Illinois is divided into three judicial districts to be known as the Northern, Central, and Southern District of Illinois.

"Northern District

"(a) The Northern District comprises two divisions.

"(1) The Eastern Division comprises the counties of Cook, De Kalb, Du Page, Grundy, Kane, Kankakee, Kendall, Lake, La Salle, McHenry, and Will. "Court for the Eastern Division shall be held at Chicago.

"(2) The Western Division comprises the counties of Boone, Carroll, Jo Daviess, Lee, Ogle, Stephenson, Whiteside, and Winnebago.

"Court for the Western Division shall be held at Freeport and Rockford.

"Central District

"(b) The Central District comprises the counties of Adams, Brown, Bureau, Cass, Champaign, Christian, Coles, De Witt, Douglas, Edgar, Ford, Fulton, Greene, Hancock, Henderson, Henry, Iroquois, Knox, Livingston, Logan, McDonough, McLean, Macaupin, Marshall, Mason, Menard, Mercer, Montgomery, Morgan, Moultrie, Peoria, Piatt, Pike, Puntnam, Rock Island, Sangamon, Schuyler, Scott, Shelby, Stark, Tazewell, Vermilion, Warren, and Woodford.

"Court for the Central District shall be held at Danville, Peoria, Quincy, Rock Island, and Springfield.

"Southern District

"(c) The Southern District comprises the counties of Alexander, Bond, Calhoun, Clark, Clay, Clinton, Crawford, Cumberland, Edwards, Effingham, Fayette, Franklin, Gallatin, Hamilton, Hardin, Jackson, Jasper, Jefferson, Jersey, Johnson, Lawrence, Madison, Marion, Massac, Monroe, Perry, Pope, Pulaski, Randolph, Richland, St. Clair, Saline, Union, Wabash, Washington, Wayne, White, and Williamson.

"Court for the Southern District shall be held at Alton, Benton, Cairo, and East Saint Louis.".

(2) Section 133 of title 28, United States Code, is amended by striking out the item relating to Illinois and inserting in lieu thereof the following:

"Illinois:

| | |
|---|---|
| "Northern | 13 |
| "Central | 2 |
| "Southern | 2". |

(c) Section 112 of title 28, United States Code, is amended—

(1) in the first paragraph of subsection (a), by inserting "Columbia," immediately after "Clinton,", by inserting "Greene," immediately after Fulton,", and by inserting "Ulster," immediately after "Tompkins,"; and

(2) in the first paragraph of subsection (b), by striking out "Columbia,", "Greene,", and "Ulster,".

EFFECTIVE DATE

SEC. 5. (a) The amendments made by this Act shall take effect 180 days after the date of enactment of this Act.

(b) Nothing in this Act shall affect the composition or preclude the service of any grand or petit juror summoned, empaneled, or actually serving in any judicial district on the effective date of this Act.

The SPEAKER pro tempore. Is a second demanded?

Mr. RAILSBACK. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Wisconsin (Mr. KASTENMEIER) and the gentleman from Illinois (Mr. RAILSBACK) will be recognized for 20 minutes each.

The Chair recognizes the gentleman from Wisconsin (Mr. KASTENMEIER).

Mr. KASTENMEIER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the bill which the Judiciary Committee brings to the floor today is a noncontroversial, heavily supported measure which is designed to keep the Federal judicial system up-to-date with demographic and societal changes in several of its districts.

In brief, the legislation creates two new places of holding Federal district court. First, it authorizes Ashland as a place of holding court in the eastern district of Kentucky. Second, it authorizes Corinth as a place of holding court in the northern district of Mississippi.

The legislation also abolishes the judicial divisions in the western district of Louisiana and realines the four divisions in the judicial district of North Dakota.

Lastly, the legislation realines district dividing lines in three States. In Florida one county—Madison—is transferred from the middle district to the northern district. In Illinois the three judicial districts are realined to better respond to the needs of that State. In New York three counties—Columbia, Greene, and Ulster—are taken from the southern district and placed in the northern district. All of these changes result in closer access to the Federal courthouse doors for the lawyers and litigants involved.

H.R. 13331 is an omnibus package. It is the view of my subcommittee that the processing of district court legislation is more efficiently, fairly, and expeditiously dealt with in this manner. In this regard, I can attest to the Members present that H.R. 13331 is a noncontroversial proposal, with no opposition. It is enthusiastically supported by the Administrative Office of the U.S. Courts, the U.S. Department of Justice and the congressional delegations involved.

I note that on August 21, 1978, a virtually identical bill (S. 3375) unanimously passed the Senate by voice vote. I ask your support for this legislation and I strongly recommend its passage.

Now, I would like to defer to several of my colleagues who introduced various sections of H.R. 13331 and who can address themselves to situations in their home States.

Mr. RAILSBACK. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like to join with the chairman of the subcommittee in voicing my support for H.R. 13331. This bill, as it affects Illinois, corresponds to S. 2838 which was introduced earlier by Senator CHARLES H. PERCY and ADLAI E. STEVENSON III of Illinois.

Presently, Illinois is divided into three judicial districts: The northern, eastern, and southern districts. Because of changing demographic and economic patterns, the existing judicial structure has not kept pace with recent needs resulting in several defects.

H.R. 13331 would provide for the realinement of the existing eastern and southern districts into central and southern districts respectively, with a common boundary running east to west. As a result, the new central and southern districts would be geographically compact and cohesive, eliminating much of the unnecessary cost and inconvenience now confronted by the residents of Illinois.

The redistricting has the support of the active Federal judges in the southern and eastern districts of Illinois and the Judicial Council of the Seventh Circuit. It is important to note that there are no disadvantages or costs associated with the redistricting of the downstate Illinois Federal district courts. I urge my colleagues to support H.R. 13331.

Mr. KASTENMEIER. Mr. Speaker, before I yield, briefly I should also add that this is an ongoing exercise. There are a number of other proposals before the subcommittee affecting other courts in the country which may not have been quite as noncontroversial. Some issues may have been raised respecting these other districts. These are possibilities for future enactment. As a matter of fact even at this time the subcommittee is processing a piece of legislation involving several other situations which can be rectified.

I say this to inform the membership that if a particular proposal they as-

sumed was going forward is not included in this bill that it may be in these later bills.

Mr. McCLORY. Mr. Speaker, will the gentleman yield?

Mr. KASTENMEIER. I yield to the gentleman from Illinois (Mr. McCLORY).

Mr. McCLORY. Mr. Speaker, I would like to join with my colleague from Illinois in supporting H.R. 13331 which provides for the redistricting of the downstate Illinois Federal district courts.

Various areas of the State have a commonality of interests. However, the present district lines split these local regions. This would be corrected by the new district lines and benefit all the citizens of downstate Illinois. The litigants, jurors, and lawyers would not have to travel as far to the courthouse. For example, most grand juries in the eastern district of Illinois are convened in East St. Louis. The grand jurors come from all over the district, including Danville and Kankakee which are over 200 miles away. This is a substantial burden to place on Illinois citizens. With the new district lines citizens will not have to travel as far to serve on the grand jury and, by the same token, the grand jurors will have a better sense of the community where the suspected crimes took place.

The elongated eastern district of Illinois also places a burden on the judges and reduces the time that they otherwise would spend deciding cases. For example, Judge Wise, who is stationed in Danville, has frequently had to travel to Benton, 200 miles away, to try cases.

The new district lines will cure these and other problems caused by the present boundary lines.

I urge my colleagues to support H.R. 13331, as it will help the citizens of Illinois and greatly aid the administration of justice.

Mr. KASTENMEIER. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. PATTISON). The gentleman from New York (Mr. PATTISON) was interested in his own district and in the State of New York and is to be congratulated on his contribution to the legislation.

Mr. PATTISON of New York. Mr. Speaker, I thank my colleague, the gentleman from Wisconsin (Mr. KASTENMEIER) for yielding me this time, and I thank and compliment my former colleagues on the Committee on the Judiciary for passing this legislation.

Section 4 of the legislation deals with two counties in my congressional district and one county in the congressional district of my colleague to the south, the gentleman from New York (Mr. FISH). It realines those three counties so that they will be part of the northern district of New York, the main courtroom for which is in Albany, N.Y. Those counties are culturally part of the Albany scene as opposed to the New York City scene so that it is almost impossible for litigants or lawyers from the two counties in my district and diffcult at least for lawyers and litigants from the one county in Congressmen FISH's district to take their cases to the southern district of New York which has its headquarters in New York City.

So the passage of this legislation will really open up the Federal courts for people from those three counties for the first time.

They are rural counties. There is not a great deal of Federal court business, but they surely should have the option of using those courts where appropriate.

I circulated this proposal 3 years ago before I introduced this legislation among the members of the bar of the two counties that I represent and the gentleman from New York (Mr. FISH) also circulated the proposal among the members of the bar of Ulster County. In the two counties that I represent, the response was 100 percent in favor of realinement of these three counties to the northern district of New York.

So I am delighted that this is finally being done and once again thank my colleagues for preparing this legislation and getting it to the point where it will become law this year.

Mr. RAILSBACK. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. FISH).

Mr. FISH. Mr. Speaker, I thank the gentleman for yielding time to me.

At the outset, Mr. Speaker, I would like to express my appreciation both to the chairman of the subcommittee, the gentleman from Wisconsin (Mr. KASTENMEIER) and the ranking member of the committee, the gentleman from Illinois (Mr. RAILSBACK) for their care and study in this matter and their consideration of the wishes of both the lawyers and the litigants in the realinement of these districts because at present, residents of Columbia, Greene, and Ulster Counties of New York on Federal court business must travel a considerable distance to downtown New York City. Yet all three counties are much closer to Albany, the principal place of holding court in the northern district. Ulster was added at my request responding to a resolution adopted by the Ulster County Bar Association favorable to the transfer.

The committee found that—

People from Columbia, Greene and Ulster Counties have centered their lifestyles around Albany and not New York City. Moreover, the three counties are part of the Third Judicial District of New York State and the attorneys from there often travel to Albany on judicial business.

According to the chief judge of the northern district, James T. Foley—

The new litigation that will be caused by this addition can be managed and disposed of efficiently and with reasonable dispatch if the judicial manpower here is increased.

A pending omnibus judgeship bill gives the northern district an additional judge, so it will have no difficulty in handling its increased caseload.

Both lawyers and litigants will be better served by Ulster County's transfer to the northern district.

Mr. Speaker, I again wish to express my deep appreciation to the chairman of the subcommittee, the gentleman from Wisconsin (Mr. KASTENMEIER) and the ranking minority member, the gentleman from Illinois (Mr. RAILSBACK).

Mr. RAILSBACK. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. GILMAN).

Mr. GILMAN. Mr. Speaker, I am pleased to join with the gentleman from New York in urging that Ulster County, N.Y., be transferred from the southern judicial district of New York to the northern district of New York.

In the interests of geographic proximity and the efficient administration of justice, I urge the adoption of this Federal District Court Organization Act proposal—a proposal which will benefit and which is supported by both the bar and the public of Ulster County, the portion of which I represent.

Mr. RAILSBACK. Mr. Speaker, I yield such time as he may consume to the gentleman from Illinois (Mr. O'BRIEN).

Mr. O'BRIEN. Mr. Speaker, I thank the gentleman for yielding.

I recognize the strain and effort which have gone into the business of putting together new Federal court districts. However, I rise to speak for lawyers, judges, and litigants in one county of my district, the county of Kankakee.

I do not know what consultation took place with regard to the preference of the attorneys and judges who work and serve the Kankakee area. I, for one, have spoken to a Kankakee attorney, who is the immediate past president of the Illinois State Bar Association; to the current president of the Kankakee County Bar Association; to five different lawyers of all political fidelities; and to a highly respected senior State judge from the county of Kankakee. We have made contact with approximately 100 people on the fringe and in the body of the legal profession. Not one of them favors the inclusion of this particular county in the northern division of Illinois.

Mr. Speaker, they have heretofore appeared in the Federal court sitting in Danville, Ill., which is a normal downstate habitat for them. And they have been quite content with this situation over the years. To change their way of life now and send them to Chicago is an adjustment more than just not to their liking; it is abhorrent to them.

Therefore, Mr. Speaker, with all due respect to the efforts that have gone into this complex bill, my district has been seriously detrimented by it, and I vigorously oppose it.

The SPEAKER pro tempore (Mr. SISK). The question is on the motion offered by the gentleman from Wisconsin (Mr. KASTENMEIER) that the House suspend the rules and pass the bill H.R. 13331, as amended.

The question was taken.

Mr. GEPHARDT. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 3 of rule XXVII and the Chair's prior announcement, further

proceedings on this motion will be postponed.

## ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Debate has been concluded on all motions to suspend the rules.

Pursuant to clause 3, rule XXVII, the Chair will now put the question on each motion on which further proceedings were postponed in the order in which that motion was entertained.

Votes will be taken in the following order, all by yeas and nays:

H.R. 12860;
H.R. 13311;
H.R. 12026;
H.R. 5265;
H. Res. 1342; and
H.R. 13331.

The Chair will reduce to 5 minutes the time for any electronic votes after the first such vote in this series.

## RHODE ISLAND INDIAN LAND CLAIMS SETTLEMENTS

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill H.R. 12860, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wyoming (Mr. RONCALIO) that the House suspend the rules and pass the bill H.R. 12860, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 249, nays 122, not voting 61, as follows:

The Clerk announced the following pairs:

Mr. Addabbo with Mr. Armstrong.
Mr. Mitchell of Maryland with Mr. Ruppe.
Mr. Richmond with Mr. Quie.
Mr. Delaney with Mr. Vander Jagt.
Mr. Zeferetti with Mr. Wiggins.
Mr. Teague with Mr. Frey.
Mr. St Germain with Mr. Barnard.
Mr. Ashley with Mr. Brown of Ohio.
Mr. Ammerman with Mr. Hansen.
Mr. Rodino with Mr. Hubbard.
Mr. Byron with Mr. Kasten.
Mr. Fary with Mr. Long of Maryland.
Mr. Krueger with Mr. Stump.
Ms. Mikulski with Mr. Skubitz.
Mr. Fuqua with Mr. Burke of Florida.
Mr. Garcia with Mr. Cochran of Mississippi.
Ms. Holtzman with Mr. Dickinson.
Mrs. Chisholm with Mr. Tsongas.
Mr. Murphy of New York with Mr. Sarasin.
Mr. Ford of Michigan with Mr. Rudd.
Mr. Breaux with Mr. Fraser.
Mrs. Burke of California with Mr. Del Clawson.
Mr. Conyers with Mr. Huckaby.
Mr. Diggs with Mr. Flowers.
Mr. Ireland with Mr. Young of Alaska.
Mr. Harrington with Mr. Scheuer.
Mr. Gibbons with Mr. D'Amours.
Mr. Miller of California with Mr. Cavanaugh.
Mr. Lehman with Mr. Risenhoover.
Mr. Stratton with Mr. Evans of Indiana.

Messrs. YOUNG of Florida, GREEN, McCLORY, CAPUTO, CORCORAN of Illinois, STEIGER, and KEMP changed their vote from "yea" to "nay."

Messrs. SLACK, CHARLES H. WILSON of California, MOTTL, GAYDOS, WHITTEN, CHAPPELL, MURTHA, LEACH, AMBRO, WATKINS, MILFORD, HALL, GLICKMAN, and MANN changed their vote from "nay" to "yea."

So (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. RONCALIO. Mr. Speaker, I ask unanimous consent for the immediate consideration of the Senate bill (S. 3153) to settle Indian land claims within the State of Rhode Island and Providence Plantations, and for other purposes, a bill similar to the bill just passed.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wyoming?

Mr. ASHBROOK. Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is heard.

## ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 3(b)(3) of rule XXVII, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device may be taken on all the additional motions to suspend the rules on which the Chair has postponed further proceedings.

## PORTS AND WATERWAYS SAFETY AMENDMENTS

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill, H.R. 13311, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New York (Mr. BIAGGI) that the House suspend the rules and pass the bill H.R. 13311, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 366, nays 6, not voting 60, as follows:

[Roll No. 755]

Mr. St Germain with Mr. Flowers.

Mr. Delaney with Ms. Mikulski.

Mr. Stratton with Mr. Harrington.

So (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. BIAGGI. Mr. Speaker, I ask unanimous consent that the Committee on Merchant Marine and Fisheries and the Committee on International Relations be discharged from further consideration of the Senate bill (S. 682) to amend the Ports and Waterways Safety Act of 1972, and for other purposes, a bill similar to the bill just passed by the House, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate bill as follows:

S. 682

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Tanker and Vessel Safety Act of 1977".

SEC. 2. DECLARATION OF POLICY AND DEFINITIONS.

The Ports and Waterways Safety Act of 1972 (33 U.S.C. 1221 et seq.) is amended by inserting the following new sections immediately after the first section thereof and immediately before title I:

"SEC. 2. FINDINGS, PURPOSES, AND POLICY.

"(a) FINDINGS.—The Congress finds and declares the following:

"(1) Navigation and vessel safety and protection of the marine environment are matters of major national importance. Increased vessel traffic in the Nation's ports and waterways creates substantial hazard to life, property, and the marine environment.

"(2) International standards for navigation and vessel safety and protection of the marine environment are incomplete and fail to provide adequate protection of the marine environment. The Federal Government should seek to require more stringent standards for any vessel using (A) any port of the United States or (B) operating in the navigable waters of the United States.

"(3) Standards developed through regulations under this Act shall incorporate the best available technology. Such standards shall be required unless clearly shown to create undue economic hardship which is not outweighed by environmental benefits.

"(4) Increased inspection and enforcement efforts by the Federal Government are necessary to reduce the possibility of vessel or cargo loss, or damage to life, property, or the marine environment.

"(b) PURPOSES.—It is therefore the purposes of Congress in this Act—

"(1) to authorize a comprehensive inspection and enforcement program for increased navigation and vessel safety and enhanced protection of the marine environment:

"(2) to direct the Federal Government to establish stringent standards for the design,

construction, equipment, maintenance, alteration, repair, operation, and manning of all vessels which (A) use any port of the United States or (B) operate in the navigable waters of the United States; and

"(3) to establish a program to prevent any substandard vessel from (A) using any port of the United States or (B) operating in the navigable waters of the United States.

"(c) POLICY.—It is further declared to be the policy of the Congress in this Act—

"(1) to authorize no impediment to, or interference with, the right of innocent passage or any recognized legitimate use of the high seas; and

"(2) to support and encourage continued active United States efforts to obtain international agreements concerning navigation and vessel safety and protection of the marine environment.

"SEC. 3. DEFINITIONS.

"As used in this Act, unless the context otherwise requires:

"(1) The term 'discharge' includes, but is not limited to, any spilling, leaking, pumping, pouring, or emptying, however caused.

"(2) The term 'domestic trade' means trade between ports or places in the United States, its territories or possessions, either directly or via a foreign port, including trade on the navigable waters of the United States.

"(3) The term 'foreign trade' means any trade other than the domestic trade.

"(4) The term 'foreign vessel' or 'vessel of a foreign nation' means any vessel documented or numbered under the laws of any nation other than the United States.

"(5) The term 'hazardous material' means any material or substance which is—

"(A) flammable or combustible;

"(B) designated a hazardous polluting substance under section 311(b) of the Federal Water Pollution Control Act Amendments of 1972 (33 U.S.C. 1321); or

"(C) designated a hazardous material under section 104 of the Hazardous Material Transportation Act (49 U.S.C. 1803).

"(6) The term 'high seas' means all waters beyond the territorial sea of the United States and beyond the territorial sea of any foreign nation, to the extent that such sea is recognized by the United States.

"(7) The term 'marine environment' means the coastal zone, defined in section 304(1) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1453(1)); the seabed, subsoil, natural resources, and waters of the territorial sea of the United States; the waters of the contiguous zone; the waters and fishery resources of any zone over which the United States asserts exclusive fishery management authority; the waters of the high seas; and the seabed and subsoil of the Outer Continental Shelf of the United States.

"(8) The term 'oil' means oil of any kind or in any form, including, but not limited to, petroleum, fuel oil, sludge, oil refuse, and oil mixed with wastes other than dredged spoil.

"(9) The term 'person' means any individual (whether or not a citizen or national of the United States), or any corporation, partnership, association, or other entity (whether or not organized or existing under the laws of any State), and any Federal, State, local, or foreign government or any entity of any such government.

"(10) The term 'public vessel' means a vessel which—

"(A) is owned, or chartered by demise, and operated by the United States or any foreign government; and

"(B) is not engaged in commercial service.

"(11) The term 'Secretary' means the Secretary of Transportation.

"(12) The term 'State' means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, Guam, and any other commonwealth, territory, or possession of the United States, including the Trust Territory of the Pacific Islands.

"(13) The term 'United States', when used in the geographical context, means all the States thereof.

"(14) The term 'vessel' means every description of watercraft or other artifical contrivance used, or capable of being used, as a means of transportation through or on water.

"(15) The term 'vessel of the United States' means any vessel documented or numbered under the laws of the United States.".

SEC. 3. NAVIGATIONAL AND VESSEL SAFETY AND PROTECTION OF THE MARINE ENVIRONMENT.

Title I of the Ports and Waterways Safety Act of 1972 (33 U.S.C. 1221–1227) is amended to read as follows:

"TITLE I—NAVIGATION AND VESSEL SAFETY AND PROTECTION OF THE MARINE ENVIRONMENT

"SEC. 101. VESSEL TRAFFIC SERVICES.

"(a) IN GENERAL.—The Secretary, in accordance with section 103, may, in the ports, harbors, navigable waters of the United States and in any area covered by any international agreement negotiated pursuant to section 303—

"(1) establish, operate, and maintain vessel traffic services;

"(2) require any vessel except self-propelled fishing or recreational vessels under 300 dead weight tons, which operates within waters subject to any vessel traffic service, to utilize or comply with any such service, including requiring the installation and use of any electronic or other device necessary for such utilization or compliance;

"(3) control vessel traffic by—

"(A) specifying times of entry, movement, or departure;

"(B) establishing vessel traffic routing schemes;

"(C) establishing vessel size and speed limitations and vessel operating conditions; and

"(D) restricting operation, in any hazardous area or under hazardous conditions, by any vessel which has particular operating characteristics or capabilities, in a manner deemed necessary for safe operation under the circumstances.

The Secretary shall publish and distribute any relevant information with regard to actions taken under this section to all interested persons, including citizens of any foreign country.

"(b) SPECIAL POWERS.—The Secretary may order any vessel to operate or anchor in a manner he directs if—

"(1) he has reasonable cause to believe such vessel does not comply with any regulation promulgated under this Act or any other applicable law or treaty;

"(2) he determines that such vessel does not satisfy the conditions for port entry set forth in section 106; or

"(3) by reason of weather, visibility, sea conditions, or the condition of such vessel, he is satisfied that such directive is justified in the interest of safety.

"(c) EXTENDED SERVICES.—The Secretary shall, in accordance with section 103, establish advisory vessel traffic services in appropriate areas of the high seas. The Secretary shall take appropriate action to have any routing measures associated with such services adopted by the relevant international organization.

"(d) EXCEPTION.—This title shall not apply to any vessel of any foreign nation (1) that is in transit through the navigable waters of the United States which form a part of any international strait, and (2) that is destined for any port outside the United States, except pursuant to international treaty, convention, or agreement.

"SEC. 102. WATERFRONT SAFETY.

"The Secretary, in cooperation with the Secretary of the Army, may take such action as is necessary (1) to prevent damage to, or the destruction or loss of, any dock, bridge, or other structure on or in the navigable waters of the United States, or any structure on land, or any shore area, immediately adjacent to any such waters; and (2) to protect the navigable waters and the resources therein from vessels operation damage, destruction or loss or from structure damage, destruction or loss. Such action may include, but need not be limited to—

"(A) establishing procedures, measures, and standards for the handling, loading, unloading, storage, stowage, and movement on any such structure (including the emergency removal, control, and disposition) of any oil or hazardous material;

"(B) prescribing minimum safety equipment requirements for any such structure to assure adequate protection from fire, explosion, natural disasters, and other serious accidents or casualties;

"(C) establishing water or waterfront safety zones, or other measures for limited, controlled, or conditional access and activity of vessels when necessary for the protection of any vessel, structure, waters, or shore area; and

"(D) establishing procedures for inspection to assure compliance with minimum safety requirements for such structures.

"SEC. 103. CONSIDERATIONS BY SECRETARY.

"The Secretary shall, in carrying out his duties and responsibilities under section 101, take into account all relevant factors concerning navigation and vessel safety and protection of the marine environment, including, but not limited to—

"(1) the scope and degree of the risk or hazard involved;

"(2) vessel traffic characteristics and trends, including traffic volume, the sizes and types of vessels involved, potential interference with the flow of commercial traffic, the presence of any unusual cargoes, and other similar factors;

"(3) port and waterway configurations and variations in local conditions of geography, climate, and other similar factors;

"(4) the proximity of fishing grounds, oil and gas drilling and production operations, or any other potential or actual conflicting activity;

"(5) environmental factors;

"(6) economic impact and effects;

"(7) existing vessel traffic services;

"(8) local practices and customs, including voluntary arrangements and agreements within the maritime community; and

"(9) the Secretary shall establish procedures for consulting with, and receiving and considering the views of, officials of State and local governments, and persons within the maritime community, who are knowledgeable about and experienced in dealing with local problems of vessel traffic.

"SEC. 104. PILOTAGE.

"The Secretary may require a pilot on (1) any self-propelled vessel of the United States engaged in the foreign trade, and (2) any foreign vessel, operating in the navigable waters of the United States in areas and under circumstances where a pilot is not otherwise required by State law. Such pilot may be required until the State involved establishes a requirement for a pilot in any such area or under the circumstances involved.

"SEC. 105. INVESTIGATORY POWERS.

"(a) SECRETARY.—The Secretary may investigate any incident, accident, or act which—

"(1) results in any loss or destruction of, or damage to, any structure or area referred to in section 102, or any vessel; or

"(2) affects, or may affect, vessel safety or environmental quality in any port, harbor, or the navigable waters of the United States.

"(b) BOARD.—(1) The National Transportation Safety Board may investigate any transportation-related incident, accident, or act which—

"(A) results in any loss or destruction of, or damage to, any structure or area referred to in section 102, or any vessel; or

"(B) affects, or may affect, transportation or vessel safety in any port, harbor, or the navigable waters of the United States.

"(2) Investigations conducted by the Board under this section shall be for the purpose of determining the facts, circumstances, and the cause or probable cause, of any accident, incident, or act investigated under paragraph (1).

"(c) POWERS.—In any such investigation, the Secretary or the Board may issue subpenas to require the attendance of any witness and the production of any document or other evidence relating to any such incident, accident, or act. If any person refuses to obey any such subpena, the Secretary or the Board may request the Attorney General to invoke the aid of the appropriate district court of the United States to compel compliance with such a subpena. Any of the district courts of the United States may, in the case of such refusal to obey such a subpena, issue an order requiring compliance with such subpena, and any failure to obey such order may be punished by the court as a contempt thereof. Witnesses may be paid fees for travel and attendance at such rates not exceeding those allowed in a district court of the United States.

"SEC. 106. CONDITIONS FOR ENTRY TO PORTS OF THE UNITED STATES.

"(a) IN GENERAL.—No vessel which carries, or is designed to carry, oil or any hazardous material in bulk as cargo shall operate in the navigable waters of the United States, or transfer cargo in, any port or place under the jurisdiction of the United States if such vessel—

"(1) has a history of accident, pollution incidents, or serious repair problems which, as determined by the Secretary, creates reason to believe that such vessel may (A) be unsafe or (B) create a threat to the marine environment;

"(2) fails to comply with any applicable regulation issued under this Act or any other law or treaty;

"(3) discharges any oil in violation (A) of any treaty to which the United States is a party or (B) of any law of the United States; or

"(4) does not comply with any vessel traffic service established by the Secretary under section 101;

unless and until the owner of such vessel proves, to the satisfaction of the Secretary, that such vessel is (A) no longer unsafe or a threat to the marine environment, or (B) complies with the applicable regulation, law, or treaty, as appropriate.

"(b) EFFECTIVE DATE.—This section shall become effective on the date of enactment of the Tankers and Vessels Safety Act of 1977, except subsection (a)(3) shall not become effective until January 1, 1979, unless before such date, the Secretary, by regulation, provides that such subsection will become effective before January 1, 1979, in which case, such subsection (a)(3) shall become effective on the date provided by the Secretary.

"SEC. 107. MARINE SAFETY INFORMATION SYSTEM.

"(a) IN GENERAL.—The Secretary shall establish a marine safety information system. Such system shall contain information with regard to any vessel (which carries, or is designed to carry, oil or any hazardous material in bulk as cargo) which enters, or transfers cargo in, any port or place under the jurisdiction of the United States. Such information shall include, but need not be limited to—

"(1) the names of any person with an ownership interest in any such vessel, in accordance with regulations prescribed by the Secretary;

"(2) financial responsibility information, if required for any vessel under section 311 (p) of the Federal Water Pollution Control Act Amendments of 1972 (33 U.S.C. 1321);

"(3) registration information, including all changes in the name of any such vessel;

"(4) the history of accidents or serious repair problems of any such vessel;

"(5) a record of all inspections or examinations of any such vessel conducted under section 202; and

"(6) any other data or information which the Secretary deems appropriate to carry out the purposes of this Act.

"(b) INTERAGENCY COOPERATION.—The head of each department, agency, or other instrumentality of the Federal Government shall, upon a written request from the Secretary, furnish any available data or information which the Secretary deems necessary to carry out the provisions of this Act.

"SEC. 108. LIGHTERING.

"(a) IN GENERAL.—After June 30, 1978, no vessel may unload any cargo of oil or hazardous material at any port of the United States if such cargo has been transferred from another vessel on the high seas or in the navigable waters of the United States, unless such transfer was conducted in accordance with regulations prescribed by the Secretary pursuant to subsection (b).

"(b) REGULATIONS.—The Secretary shall, by June 30, 1978, prescribe, and may amend or repeal, regulations for transferring, in whole or in part, any cargo of oil or hazardous material on the high seas or in the navigable waters of the United States. Regulations prescribed by the Secretary under this subsection shall include, but need not be limited to, standards for—

"(1) minimum safe operating conditions, including sea state, wave height, weather, proximity to channels or shipping lanes, and other similar factors;

"(2) prevention of oil spills;

"(3) equipment for responding to any oil spill;

"(4) prevention of any unreasonable interference with international navigation or other reasonable uses of the high seas, as defined by treaty, convention, or customary international law; and

"(5) other matters which the Secretary deems necessary to promote navigation and vessel safety and protect the marine environment.

"(c) PROHIBITION.—No transfer of cargo at sea may be authorized under this section if such transfer is engaged in for the purpose of aiding the avoidance of standards relating to the design, construction, equipment, maintenance, alteration, repair, operation or manning of vessels promulgated under this Act or section 4417a of the Revised Statutes of the United States.

"SEC. 109. APPLICATION OF TITLE.

"This title shall not apply to the Panama Canal. The authority granted the Secretary under this title may be delegated to the Saint Lawrence Seaway Development Corporation to the extent the Secretary determines such delegation is necessary for the proper operation of the Seaway.".

SEC. 4. VESSELS CARRYING CERTAIN CARGOES IN BULK.

Section 4417a of the Revised Statutes of the United States (46 U.S.C. 391a) is amended to read as follows:

"SEC. 4417a. (1) APPLICABILITY.—Except as provided in subsections (2) and (3), this section shall apply to any vessel—

"(A) regardless of tonnage, size, or manner of propulsion;

"(B) whether self-propelled or not;

"(C) whether carrying freight or passengers for hire or not;

"(D) which is documented or numbered under the laws of the United States, which operates in the navigable waters of the United States, or which transfers cargo in any port or place under the jurisdiction of the United States; and

"(E) which carries, or is designed to carry, oil or any hazardous material in bulk as cargo.

Any such vessel shall be deemed to be a steam vessel for the purposes of title 52 of the Revised Statutes of the United States and shall be subject to the provisions thereof.

"(2) EXCEPTIONS.—This section shall not apply to—

"(A) any public vessel;

"(B) any vessel of not more than 500 gross tons documented in the service of oil exploitation which are not tank vessels and which would be subject to this section only because of the transfer of fuel from fuel supply tanks of such vessel to offshore drilling or production facilities; or

"(C) any vessel of any foreign nation (i) that is in transit in navigable waters of the United States which form a part of any international strait and (ii) that is destined for any port or place outside the United States.

"(3) FISHING VESSELS.—Notwithstanding the other provisions of this section, cannery tenders, fishing tenders, and fishing vessels of not more than 500 gross ton used in the salmon or crab fisheries of the State of Oregon, Washington, or Alaska, when engaged exclusively in the fishing industry, shall be allowed to have on board inflammable or combustible cargo in bulk to the extent and upon conditions as may be required by regulations promulgated by the Secretary.

"(4) STANDARD-SETTING AUTHORITY.—(A) The Secretary shall issue, and may from time to time amend or repeal, regulations, containing standards for the design, construction, alteration, repair, operation, manning, or maintenance of vessels to which this section applies, as may be necessary for increased navigation and vessel safety and enhanced protection of the marine environment. The standards issued by the Secretary under this subsection shall be in addition to any other standards, promulgated under other provisions of law, that may apply to such vessels. The standards issued by the Secretary under this subsection shall include, but need not be limited to, standards relating to—

"(i) superstructures, hulls, cargo holds or tanks, fittings, equipment, appliances, propulsion machinery, auxiliary machinery, and boilers;

"(ii) the handling or stowage of cargo, the manner of such handling or stowage of cargo, and the machinery and appliances used in such handling or stowage;

"(iii) equipment and appliances for life saving, fire protection, and prevention and mitigation of damage to the marine environment;

"(iv) requirements for the manning of such vessels and the duties and qualifications of the officers and crew, in accordance with subsection (7);

"(v) improvements in vessel maneuvering and stopping ability and other features which reduce the possibility of collision, grounding, or other accidents;

"(vi) the reduction of cargo loss in the event of a collision, grounding, or other accident;

"(vii) the reduction or elimination of discharges during ballasting, deballasting, cargo handling, or other such activity; and

"(viii) the reduction or elimination of discharges aboard vessels during cargo handling, tank cleaning, ballasting, deballasting, and other such activity.

"(B) In establishing standards under paragraph (A), the Secretary shall give due consideration to the kinds and grades of cargo permitted to be on board any such vessel.

"(5) MINIMUM STANDARDS.—In addition to any standards prescribed by the Secretary pursuant to subsection (4), or pursuant to any other law, any self-propelled vessel in excess of 20,000 dead weight tons which carries, or is designed to carry, oil in bulk, as cargo shall—

"(A) not later than June 30, 1979, be equipped with—

"(i) a dual radar system, one with short-range and one with long-range capabilities and each with true-north features;

"(ii) a collison avoidance system;

"(iii) a long-range navigation aid;

"(iv) adequate communications equipment;

"(v) a fathometer;

"(vi) a gyrocompass;

"(vii) up-to-date charts; and

"(B) not later than June 30, 1983, be equipped with—

"(i) a segregated ballast system;

"(ii) a transponder, or such other appropriate position-fixing equipment as the Secretary determines to be appropriate;

"(iii) a gas inerting system; and

"(iv) for any vessel the construction of which is contracted for, or actually commenced, after January 1, 1980, a double bottom (fitted throughout the cargo length of such vessel).

The Secretary may prescribe standards to substitute for any standard listed above if such substitute standard provides, as appropriate, equivalent or improved navigation accuracy, vessel safety, or environment protection. Such equivalency or improvement shall be determined by the Secretary on the record after a hearting in accordance with section 553 of title 5, United States Code.

"(6) EVIDENCE OF COMPLIANCE.—(A) No vessel of the United States to which this section applies, shall have on board oil or hazardous materials in bulk as cargo until (i) it has been issued a certificate of inspection issued under the provisions of title 52 of the Revised Statutes of the United States, and (ii) such certificate has been endorsed to indicate that the vessel is in compliance with the rules and regulations established under this section. If any vessel is found not to be in compliance, the Secretary shall notify the owner of the vessel and indicate how the vessel may be brought into compliance.

"(B) No foreign vessel to which this section applies, shall operate in the navigable waters of the United States or transfer cargo in any port or place under the jurisdiction of the United States unless such vessel has been issued a certificate of compliance by the Secretary. The Secretary shall not issue such certificate until the vessel has been examined by the Secretary and found to be in compliance with the provisions of this section and the rules and regulations promulgated hereunder. If any such vessel is found not to be in compliance, the Secretary shall notify the owner of the vessel and indicate how the vessel may be brought into compliance. The Secretary may allow provisional entry for the purposes of conducting the examination.

"(C) The Secretary may accept, as evidence of compliance with this section (in whole or in part), a certificate, endorsement, or document issued by any foreign nation pursuant to any treaty, convention, or other international agreement to which the United States is a party.

"(D) No vessel may carry any kind or grade of cargo unless its certificate of compliance is endorsed to allow such carriage. No such endorsement may allow any vessel to carry any material prohibited by section 4472(3) of this title.

"(E) A certificate of compliance, or an endorsement, issued under this subsection shall be valid for a period not to exceed 1 year, as specified by the Secretary, and may be renewed. The Secretary may issue a temporary certificate of compliance, or a temporary endorsement, under this subsection in appropriate circumstances; except that such temporary certificate or endorsement shall be valid for not more than 30 days. Any certificate or endorsement shall be revoked or suspended if the Secretary finds that the vessel involved no longer complies with the conditions upon which such certificate or endorsement was issued.

"(7) RETROFIT OF CERTAIN MANDATORY REQUIREMENTS.—(A) On and after July 1, 1980, the Secretary shall not issue a certificate of compliance to any vessel to which subsection (5) applies, unless—

"(i) such vessel has a segregated ballast system (as required under subsection (5)(B)(i)) and a gas inerting system (as required under subsection (5)(B)(iii); or

"(ii) the Secretary determines that tanks in such vessel have been designated for, and are used only for carrying ballast water alone; and the owner of such vessel has paid a retrofit incentive fee levied on such vessel by the Secretary.

"(B) the Secretary shall determine the amount of the retrofit incentive fee applicable to any vessel (according to classes of vessels based on size, displacement, and configuration) by determining for vessels in each such class the estimated annualized cost of compliance with the requirements of subsections (5)(B)(i) and (5)(B)(iii). The Secretary shall estimate the annualized cost of compliance, based on a retrofit technique that he determines would enable typical vessels in each class to comply with such requirements, taking into account planning and design costs, equipment costs (including purchase, transportation, installation, and start-up or testing), operating and maintenance costs, cost of capital, inflation, taxes, and other relevant costs. The Secretary shall propose retrofit incentive fees for each class of vessels not later than July 1, 1979, and shall adopt fees, in accordance with section 553 of title 5, United States Code, not later than January 1, 1980. The Secretary may by regulation adjust the fee for a class of vessels if he determines that the fee varies significantly from the actual or probable annualized costs of compliance with such requirements, and he may provide for the automatic adjustment of a fee based on the performance of a suitable index or indices. The Secretary may, in his discretion, waive the fee if he determines that a good faith effort has been made to comply with the provisions of this paragraph.

"(C) Any interested person may seek judicial review of the action taken by the Secretary under paragraph (B) to establish retrofit incentive fees by filing a petition therefor in the Court of Appeals of the United States for the circuit in which such person resides. Such petition shall be filed within 90 days after the date of such action, or, if such petition is based solely on grounds which arose after such ninetieth day, any time thereafter. Action by the Secretary with respect to which review could have been obtained under this paragraph shall not be subject to judicial review in any civil or criminal proceeding relating to enforcement or collection of the fee established by such action. In any action brought under this paragraph, no court shall grant any stay, injunction or other similar relief before final judgment by such court in such action.

"(D) the Secretary shall prescribe, and may from time to time modify or repeal, such regulations as he deems necessary to carry out this subsection. Such regulations may include, but need not be limited to, requirements respecting—

"(i) submission of technical and cost information relating to compliance with the requirements of subsections (5)(B)(i) and (5)(B)(iii);

"(ii) marking areas designated as ballast areas for easy identification; and

"(iii) reporting of information relating to the designation of areas as ballast areas and the installation of segregated ballast and gas inerting systems.

"(E) Any retrofit incentive fee which is not paid in a timely basis shall be subject to a late payment penalty in an amount determined by the Secretary, but which shall not be more than 20 percent of the amount of such fee unpaid.

(F) If any person or vessel fails to comply with any provision of this subsection, in addition to denying certification (as provided in paragraph (A) of this subsection), assessing a late payment penalty (as provided in paragraph (E) of this subsection), and assessing a civil penalty (as provided in section 203(a) of the Ports and Waterways Safety Act of 1972), the Secretary may pursue any other appropriate remedy authorized by any other applicable provision of law.

"(8) MANNING AND TRAINING REQUIREMENTS.—The Secretary shall prescribe standards for the manning of any vessel subject to the provisions of this section and the duties, qualifications, and training of the officers and crew thereof, including, but not limited to, standards relating to—

"(A) instruction in vessel and cargo handling and vessel navigation under normal operating conditions in coastal and confined waters and on the high seas;

"(B) instruction in vessel and cargo handling and vessel navigation in emergency situations and under accident or potential accident conditions;

"(C) license qualifications by specific class and size of vessels;

"(D) measurement of qualifications for licenses by use of simulators developed for the training of marine-oriented skills;

"(E) health and physical fitness criteria for all personnel;

"(F) periodic retraining, and special training for upgrading positions, changing vessel class or size, or assuming new responsibilities;

"(G) determination of licenses, conditions of licensing, and period of licensing by reference to experience, amount of training completed, and regular performance testing; and

"(H) recordation of safety and pollution control violations on licenses.

"(9) MODIFICATIONS.—The Secretary may modify any regulation or standard prescribed under this section to conform to an international treaty, convention, agreement, or an amendment thereto, which is ratified by the United States.".

SEC. 5. IMPROVED PILOTAGE STANDARDS.

(a) Section 4442 of the Revised Statutes of the United States (46 U.S.C. 214) is amended to read as follows:

"SEC. 4442. (a) The Commandant of the United States Coast Guard shall, in accordance with subsection (b) of this section, establish eligibility requirements for the issuance of a license to pilot any steam vessel.

"(b) No person may be issued a license to pilot any steam vessel unless he—

"(1) is at least 21 years of age;

"(2) is of sound health and has no physical limitations which would hinder or prevent the performance of a pilot's duties;

"(3) agrees to have a thorough physical examination each year while holding a pilot's license;

"(4) demonstrates, to the Commandant's satisfaction, that he possesses the requisite general knowledge and skill to hold a pilot's license;

"(5) maintains adequate knowledge of the waters to be navigated as a pilot;

"(6) has sufficient experience, as determined by the Commandant, to evidence his ability to handle any vessel of the type and size which he may be endorsed to pilot; and

"(7) meets any other requirement which the Commandant considers reasonable and necessary.

"(c) No license to pilot any steam vessel shall be valid for a term longer than 5 years. Upon expiration of any such license, the holder may reapply for an additional term and may be reissued a license if he meets the requirements specified under subsection (b) of this section.

"(d) The Commandant may revoke or suspend any license to pilot any steam vessel, after notice and an opportunity for a hearing, upon satisfactory evidence of—

"(1) negligence;

"(2) unskillfulness;

"(3) failure to adhere to any requirements for a license;

"(4) willful violation of title 52 of the Revised Statutes; or

"(5) other just cause related to the performance of pilot duties, including conduct when acting solely under the authority of a State pilot license.

"(e) The Secretary shall develop and shall seek adoption by the States of uniform, minimum standards relating to the regulation of pilotage at least equal to those required of federally licensed pilots.".

(b) Section 304(a)(9)(B) of the Independent Safety Board Act of 1974 (49 U.S.C. 1903(a)(9)(B)) is hereby amended by replacing the final period with a semicolon, and adding: "or section 4442 of the Revised Statutes of the United States (46 U.S.C. 214).".

SEC. 6. INSPECTION AND ENFORCEMENT.

Title II of the Ports and Waterways Safety Act of 1972 (33 U.S.C. 1221 et seq.) is amended to read as follows:

"TITLE II—INSPECTION AND ENFORCEMENT

"SEC. 201. PROHIBITED ACTS.

"It is unlawful—

"(1) for any person—

"(A) to violate any provision of this Act or any regulation issued pursuant to this Act or section 4417a of the Revised Statutes of the United States;

"(B) to refuse to permit any officer authorized by the Secretary to enforce the provisions of this Act or section 4417a of the Revised Statutes of the United States to board any vessel, or enter any shore area, place, or premises, under such persons' control for purposes of inspection pursuant to this Act or section 4417a of the Revised Statutes of the United States; or

"(C) to refuse to obey any lawful directive issued pursuant to this Act or section 4417a of the Revised Statutes of the United States; and

"(2) for any vessel subject to the provisions of this Act or section 4417a of the Revised Statutes of the United States—

"(A) to operate in the navigable waters of the United States while not in compliance with any provision of this Act or any regulation issued pursuant to this Act or section 4417a of the Revised Statutes of the United States; or

"(B) to fail to comply with any lawful directive issued pursuant to this Act or section 4417a of the Revised Statutes of the United States.

"SEC. 202. INSPECTION.

"(a) NATIONAL PROGRAM.—(1) The Secretary shall establish a national program for inspection of any vessel subject to section 4417a of the Revised Statutes of the United States. Each such vessel shall be inspected or examined at least once each year. Any such vessel over 10 years in age shall undergo a special and detailed inspection of structural strength and hull integrity, as specified by the Secretary.

"(2) An inspection or examination may be conducted by any officer authorized by the Secretary. If any such officer is not reasonably available, the Secretary may contract for the conduct of inspections or examinations in the United States and in foreign countries. Under such contract, an inspector may be authorized to act on behalf of the Secretary; except that no such inspector may issue a certificate of inspection or compliance, but may issue a temporary such certificate.

"(3) The Secretary shall prescribe by regulation reasonable fees for any inspection or examination conducted pursuant to this section based on the cost incurred. The owner of any vessel inspected or examined by the Secretary or his designee shall be liable for such fee. Amounts received as fees under this paragraph shall be credited to the appropriations bearing the cost of such inspection or examination.

"(b) VESSEL DOCUMENTS.—Any vessel subject to the provisions of this section shall have on board such documents as the Secretary deems necessary for inspection or enforcement under this Act, including, but not limited to, documents indicating—

"(1) the kind, grade, and approximate quantities of any cargo on board such vessel;

"(2) the shipper and consignee of such cargo;

"(3) the points of origin and destination of such vessel; and

"(4) the name of an agent in the United States authorized to accept legal process.

"(c) RECIPROCITY.—The Secretary may accept, as evidence of compliance with the provisions of this Act, any certificate or document issued by any foreign nation pursuant to any treaty, convention, or other international agreement to which the United States is a party.

"SEC. 203. PENALTIES.

"(a) CIVIL PENALTY.—(1) Any person who is found by the Secretary, after notice and an opportunity for a hearing to have committed an act prohibited by this Act or by section 4417a of the Revised Statutes of the United States shall be liable to the United States for a civil penalty, not to exceed $25,000 for each violation. Each day of a continuing violation shall constitute a separate offense. The amount of such civil penalty shall be assessed by the Secretary, or his designee, by written notice. In determining the amount of such penalty, the Secretary shall take into account the nature, circumstances, extent, and gravity of the prohibited acts committed and, with respect to the violator, the degree of culpability, any history of prior offenses, ability to pay, and such other matters as justice may require.

"(2) The Secretary may compromise, modify, or remit, with or without conditions, any civil penalty which is subject to imposition or which has been imposed under this subsection.

"(3) If any person fails to pay an assessment of a civil penalty after it has become final, the Secretary may refer the matter to the Attorney General of the United States, for collection in any appropriate district court of the United States.

"(b) CRIMINAL PENALTY.—(1) A person is guilty of an offense if—

"(A) in reckless disregard of the risk that his conduct would cause damage to property, he commits any act prohibited by subparagraphs 202(1)(A) or 202(2)(A); or

"(B) he willfully and knowingly commits any other act prohibited by section 202.

"(2) Any offense described in paragraph (1) is punishable by a fine of not more than $50,000, or imprisonment for not more than 6 months, or both; except that if in the commission of any such offense the person uses a dangerous weapon, engages in conduct that causes bodily injury to any officer authorized to enforce the provisions of this Act, or places any such officer in fear of imminent bodily injury, the offense is punishable by a fine of not more than $100,000, or imprisonment for not more than 10 years, or both.

"(3) As used in this subsection, a person's state of mind is 'reckless' with respect to:

"(A) an existing circumstance if he is aware of a risk that the circumstance exists but disregards the risk; and

"(B) a result of his conduct if he is aware of a risk that the result will occur but disregards the risk.

The risk must be of such a nature and degree that its disregard constitutes a gross deviation from the standard of care that a reasonable person would exercise in such a situation.

"(c) FEDERAL JURISDICTION.—There is a Federal jurisdiction over any offense described in this section.

"(d) IN REM LIABILITY.—Any vessel subject to the provisions of this Act and found to be in violation of this Act shall be liable in rem and may be proceeded against in the United States district court for any district in which such vessel may be found.

"(e) INJUNCTION.—The United States district courts shall have jurisdiction to restrain violations of this Act or regulations issued hereunder, for cause shown.".

SEC. 7. MISCELLANEOUS PROVISIONS.

The Ports and Waterways Safety Act of 1972 (33 U.S.C. 1221 et seq.) is amended by adding the following new title at the end thereof:

"TITLE III—MISCELLANEOUS PROVISIONS

"SEC. 301. REGULATIONS.

"The Secretary is authorized to issue, amend, or repeal regulations to carry out the purposes and provisions of this Act, in accordance with the provisions of section 553 of title 5, United States Code. In preparing such regulations, the Secretary shall provide an opportunity for full consultation and cooperation with all other interested Federal agencies and departments (in particular the Environmental Protection Agency, the Department of Commerce, and the Department of State), and the States, and for consideration of views presented by any members of the general public, including representatives of the maritime community, environmental groups, consumer organizations, and persons concerned with navigation and vessel safety and protection of the marine environment.

"SEC. 302. REPORT.

"Within 6 months after the end of each fiscal year, the Secretary shall submit to the Congress (1) a report on the administration of this Act during the preceding fiscal year; (2) a summary of inspection and enforcement activities during the preceding fiscal year; and (3) recommendations to the Congress for any additional legislative authority necessary to improve navigation and vessel safety and protection of the marine environment.

"SEC. 303. INTERNATIONAL AGREEMENTS.

"(a) TRANSMITTAL OF REGULATIONS.—The Secretary and the Secretary of State shall undertake international negotiations, utilizing the appropriate international bodies or forums, to achieve acceptance of regulations promulgated or required under this Act as international standards.

"(b) NEGOTIATIONS.—The Secretary of State may—

"(1) enter into negotiations, in cooperation with the Secretary, with Canada and Mexico, and any other neighboring nation, to establish compatible vessel standards and vessel traffic services in appropriate areas and circumstances;

"(2) enter into negotiations through appropriate international bodies—

"(A) to establish mandatory vessel traffic services in appropriate areas of the high seas, and

"(B) to prohibit any discharge of oil in appropriate areas of the high seas;

"(3) enter into negotiations, in cooperation with the Secretary, with Canada and Mexico, and any other neighboring nation to establish, operate, and maintain inter-

national vessel traffic services in appropriate areas; and

"(4) enter into such other negotiations as may be necessary and appropriate to further the purposes, policy, and provisions of this Act.

"(c) OPERATIONS.—The Secretary, pursuant to any agreement negotiated under subsection (b), may—

"(1) require vessels to utilize or to comply with the vessel traffic service, including the carrying or installation of electronic or other devices necessary for the use of the service; and

"(2) waive, by order or regulation, the application of any law or regulation concerning the design, construction, manning, and equipment standards of vessels operating in waters over which the United States exercises jurisdiction if such vessel is not en route to or from a United States Port, and if vessels en route to or from ports of the United States are accorded equivalent waivers of laws and regulations of the foreign nation.

"SEC. 304. AUTHORIZATION OF APPROPRIATIONS.

"Beginning October 1, 1977, there are authorized to be appropriated to the Secretary, for the purpose of carrying out the provisions of this Act, such sums as may be necessary.".

SEC. 8. SAVINGS CLAUSE.

Regulations previously issued under statutory provisions repealed, modified, or amended by this Act shall continue in effect as though promulgated under the authority of section 4417a of the Revised Statutes of the United States (46 U.S.C. 391a) or the Ports and Waterways Safety Act of 1972 as amended by this Act, as the case may be, until expressly abrogated, modified, or amended by the Secretary. Any proceeding under section 4417a of the Revised Statutes of the United States or the Ports and Waterways Safety Act of 1972 for a violation which occurred before the effective date of this Act may be initiated or continued to conclusion as though such section or Act had not been amended thereby.

SEC. 9. STUDY OF MONITORING SYSTEMS.

(a) CONTENT.—The Secretary of Transportation, in consultation with the Administrator, the Secretary of Commerce, and other appropriate agencies or instrumentalities of the Federal Government, shall evaluate various shore-station monitoring systems of vessels, including fishing vessels, within the fishery conservation zone as defined in section 3(8) of the Fishery Conservation and Management Act of 1976. Each system examined shall be capable of reporting vessel position, identification, course, and speed using either a land, sea, or space monitoring technique.

(b) REPORT.—Within 2 years after the date of the enactment of this Act, the Secretary shall report his findings to Congress. This report shall describe the capabilities, limitations, and cost effectiveness of each monitoring system examined from the standpoint of both the Federal Government and any vessel owners who would be affected by the imposition of each approach. The report shall also include the Secretary's recommendation for a single, comprehensive, cost effective shore station monitoring system within the fishery conservation zone.

SEC. 10. AUTHORIZATION FOR APPROPRIATIONS.

There are authorized to be appropriated to the Secretary for the purposes of section 9, not to exceed $500,000 for the fiscal year ending September 30, 1978, and not to exceed $500,000 for the fiscal year ending September 30, 1979.

MOTION OFFERED BY MR. BIAGGI

Mr. BIAGGI. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BIAGGI moves to strike out all after the enacting clause of S. 682 and to insert in lieu thereof the provisions of H.R. 13311, as passed by the House.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

A similar House bill (H.R. 13311) was laid on the table.

## GENERAL LEAVE

Mr. BIAGGI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed, H.R. 13311.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

## INDIAN PEAKS WILDERNESS AREA

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill H.R. 12026, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wyoming (Mr. RONCALIO) that the House suspend the rules and pass the bill H.R. 12026, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 360, nays 9, not voting 63, as follows:

The Clerk announced the following pairs:

Mr. Addabbo with Mr. Armstrong.
Mr. Mitchell of Maryland with Mr. Frey.
Mr. Rodino with Mr. Quie.
Mr. Zeferetti with Mr. Brown of Ohio.
Mr. Teague with Mr. Hansen.
Mrs. Chisholm with Mr. Rudd.
Mr. Fary with Mr. Burke of Florida.
Mr. Fuqua with Mr. Kasten.
Mr. Garcia with Mr. Sarasin.
Ms. Holtzman with Mr. Del Clawson.
Mr. Risenhoover with Mr. Long of Maryland.
Mr. Richmond with Mr. Skubitz.
Mr. Murphy of New York with Mr. Cochran of Mississippi.
Mr. St Germain with Mr. Hubbard.
Mr. Stratton with Mr. Stockman.
Mr. Miller of California with Mr. Leggett.
Mr. Diggs with Mr. Wiggins.
Mr. Conyers with Mr. Young of Alaska.
Mr. Delaney with Mr. Vander Jagt.
Mr. Breaux with Mr. Stump.
Mr. Ashley with Mr. Dickinson.
Mr. Ammerman with Mr. Beard of Rhode Island.
Mr. D'Amours with Mr. Drinan.
Mr. Byron with Mr. Gibbons.
Mr. Ireland with Mr. Flowers.
Ms. Keys with Mr. Krueger.
Mr. Harrington with Mr. Lehman.
Ms. Mikulski with Mr. Tsongas.
Mr. Roybal with Mr. Scheuer.
Mr. Barnard with Mrs. Burke of California.
Mr. Huckaby with Mr. Fraser.

So (two-thirds having voted in favor thereof), the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

The title was amended so as to read: "A bill to create the Indian Peaks Wilderness Area and the Arapaho National Recreation Area, to authorize the Secretary of the Interior to study the feasibility of revising the boundaries of the Rocky Mountain National Park, and to add certain lands to the Oregon Islands Wilderness."

A motion to reconsider was laid on the table.

## TEMPORARY SUSPENSION OF DUTY ON FLUORSPAR

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill H.R. 5265, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Ohio (Mr. VANIK) that the House suspend the rules and pass the bill H.R. 5265, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 205, nays 166, not voting 61, as follows:

Mr. Ashley with Mr. Armstrong.
Mr. Fuqua with Mr. Brown of Ohio.
Mr. Rodino with Mr. Kasten.
Mr. Murphy of New York with Mr. Long of Maryland.
Mr. St Germain with Mr. Schulze.
Mr. Delaney with Mr. Sarasin.
Mrs. Chisholm with Mr. Cochran of Mississippi.
Mr. Byron with Mr. Del Clawson.
Mr. Ammerman with Mr. Dickinson.
Mrs. Burke of California with Mr. Young of Alaska.
Mr. Conyers with Mr. Stump.
Mr. Fary with Mr. Scheuer.
Mr. Diggs with Mr. Burke of Florida.
Mr. Harrington with Mr. Fraser.
Mr. Tsongas with Mr. Lehman.
Mr. Stratton with Mr. D'Amours.
Mr. Krueger with Mr. Gibbons.
Mr. Garcia with Mr. Flowers.
Mr. Beard of Rhode Island with Mr. Barnard.
Mr. Ireland with Mr. Huckaby.
Ms. Mikulski with Mr. Miller of California.
Mr. Zeferetti with Mr. Risenhoover.

Messrs. FOUNTAIN, McCLORY, ARCHER, and NEAL changed their vote from "yea" to "nay."

So (two-thirds having voted in favor thereof) the rules were suspended and the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

## UNITED STATES CODE AMENDMENTS FOR FEDERAL DISTRICT COURTS

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill H.R. 13331, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wisconsin (Mr. KASTENMEIER) that the House suspend the rules and pass the bill, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device and there were—yeas 362, nays 9, not voting 61, as follows:

[Roll No. 759]

Mr. Harrington with Mr. Moffett.
Mr. Tsongas with Mr. Risenhoover.
Mr. Rostenkowski with Mr. Murphy of New York.

So (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. KASTENMEIER. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of the Senate bill (S. 3375) to amend title 28 of the United States Code to make certain changes in the places of holding Federal district courts, in the divisions within judicial districts, and in judicial district dividing lines, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 3375

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SHORT TITLE

SECTION 1. This Act may be cited as the "Federal District Court Organization Act of 1978".

PLACES OF HOLDING COURT

SEC. 2. (a) The last sentence of section 97 (a) of title 28, United States Code, is amended to read as follows:

"Court for the Eastern District shall be held at Ashland, Catlettsburg, Covington, Frankfort, Jackson, Lexington, London, Pikeville, and Richmond.".

(b) The last sentence of section 104(a)(1) of title 28, United States Code, is amended to read as follows:

"Court for the eastern division shall be held at Aberdeen, Ackerman, and Corinth.".

DIVISIONS WITHIN JUDICIAL DISTRICTS

SEC. 3. (a) Section 98(c) of title 28, United States Code, is amended to read as follows:

"Western District

"(c) The Western District comprises the parishes of Acadia, Allen, Avoyelles, Beauregard, Bienville, Bossier, Caddo, Calcasieu, Caldwell, Cameron, Catahoula, Clairborne, Concordia, Jefferson Davis, De Soto, East Carroll, Evangeline, Franklin, Grant, Iberia, Jackson, Lafayette, La Salle, Lincoln, Madison, Morehouse, Natchitoches, Quachita, Rapides, Red River, Richland, Sabine, Saint Landry, Saint Martin, Saint Mary, Tensas, Union, Vermilion, Vernon, Webster, West Carroll, and Winn.

"Court for the Western District shall be held at Alexandria, Lafayette, Lake Charles, Monroe, Opelousas, and Shreveport.".

(b) Section 114 of title 28, United States Code, is amended—

(1) in paragraph (2), by striking out "Sheridan, Steele, Stutsman, and Wells" and inserting in lieu thereof "Steele, and Stutsman";

(2) in paragraph (3), by striking out "Bottineau," "McHenry," and "Pierce,"; and

(3) by amending paragraph (4) to read as follows:

"(4) The Northwestern Division comprises the counties of Bottineau, Burke, Divide, McHenry, McKenzie, Mountrail, Pierce, Renville, Sheridan, Ward, Wells, and Williams.".

JUDICIAL DISTRICT DIVIDING LINES

SEC. 4. (a) Section 89 of title 28, United States Code, is amended—

(1) in the first paragraph of subsection (a), by inserting "Madison," immediately after "Liberty,"; and

(2) in the first paragraph of subsection (b), by striking out "Madison,".

(b) (1) Section 93 of title 28, United States Code, is amended to read as follows:

"§ 93. Illinois.

"Illinois is divided into three judicial districts to be known as the Northern, Central, and Southern Districts of Illinois.

"Northern District

"(a) The Northern District comprises two divisions.

"(1) The Eastern Division comprises the counties of Cook, De Kalb, Du Page, Grundy, Kane, Kankakee, Kendall, Lake, La Salle, McHenry, and Will.

"Court for the Ehstern Division shall be held at Chicago.

"(2) The Western Division comprises the counties of Boone, Carroll, Jo Daviess, Lee, Ogle, Stephenson, Whiteside, and Winnebago.

"Court for the Western Division shall be held at Freeport and Rockford.

"Central District

"(b) The Central District comprises the counties of Adams, Brown, Bureau, Cass, Champaign, Christian, Coles, De Witt, Douglas, Edgar, Ford, Fulton, Greene, Hancock, Henderson, Henry, Iroquois, Knox, Livingston, Logan, McDonough, McLean, Macon, Macoupin, Marshall, Mason, Menard, Mercer, Montgomery, Morgan, Moultrie, Peoria, Piatt, Pike, Putnam, Rock Island, Sangamon, Schuyler, Scott, Shelby, Stark, Tazewell, Vermilion, Warren, and Woodford.

"Court for the Central District shall be held at Danville, Peoria, Quincy, Rock Island, and Springfield.

"Southern District

"(c) The Southern District comprises the counties of Alexander, Bond, Calhoun, Clark, Clay, Clinton, Crawford, Cumberland, Edwards, Effingham, Fayete, Franklin, Gallatin, Hamilton, Hardin, Jackson, Jasper, Jefferson, Jersey, Johnson, Lawrence, Madison, Marion, Massac, Monroe, Perry, Pope, Pulaski, Randolph, Richland, St. Clair, Saline, Union, Wabash, Washington, Wayne, White, and Williamson.

"Court for the Southern District shall be held at Alton, Benton, Cairo, and East St. Louis.".

(2) Section 133 of title 28, United States Code, is amended by striking out the item relating to Illinois and inserting in lieu thereof the following:

| | |
|---|---|
| "Illinois: | |
| "Northern | 13 |
| "Central | 2 |
| "Southern | 2". |

(c) Section 112 of title 28, United States Code, is amended—

(1) in the first paragraph of subsection (a), by inserting "Columbia," immediately after "Clinton,", by inserting "Greene," immediately after "Fulton,", and by inserting "Ulster," immediately after "Tompkins,"; and

(2) in the first paragraph of subsection (b), by striking out "Columbia,", "Greene," and "Ulster,".

EFFECTIVE DATE

SEC. 5. (a) The amendments made by this Act shall take effect one hundred and eighty days after the date of enactment of this Act.

(b) Nothing in this Act shall affect the composition or preclude the service of any grand or petit juror summoned, empaneled, or actually serving in any judicial district on the effective date of this Act.

MOTION OFFERED BY MR. KASTENMEIER

Mr. KASTENMEIER. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. KASTENMEIER moves to strike all after the enacting clause of the Senate bill S. 3375 and to insert in lieu thereof the text of the bill H.R. 13331, as passed by the House.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 13331) was laid on the table.

---

## CONFERENCE REPORT ON S. 1678, FEDERAL INSECTICIDE, FUNGICIDE AND RODENTICIDE ACT

Mr. FOLEY submitted the following conference report and statement on the Senate bill (S. 1678) to amend the Federal Insecticide, Fungicide, and Rodenticide Act, as amended:

CONFERENCE REPORT (H. REPT. No. 95-1560)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1678) to amend the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House to the text of the bill and agree to the same with an amendment as follows:

DEFINITIONS

SECTION 1. Section 2 of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by—

(1) adding at the end of subsection (c)(1) the following: "Any applicator who holds or applies registered pesticides, or use dilutions of registered pesticides consistent with section 2(ee) of this Act, only to provide a service of controlling pests without delivering any unapplied pesticide to any person so served is not deemed to be a seller or distributor of pesticides under this Act.";

(2) in subsection (e)(3), striking out "a certified" and inserting in lieu thereof "an";

(3) in subsection (g)(1), striking out the period at the end of clause (G), inserting "; or" in lieu thereof, and adding a new clause (H) as follows:

"(H) in the case of a pesticide not registered in accordance with section 3 of this Act and intended for export, the label does not contain, in words prominently placed thereon with such conspicuousness (as compared with other words, statements, designs, or graphic matter in the labeling) as to render it likely to be noted by the ordinary individual under customary conditions of purchase and use, the following: 'Not Registered for Use in the United States of America'.";

(4) in subsection (w), inserting "or active ingredient used in producing a pesticide" immediately after "or device" wherever that phrase appears therein;

(5) adding at the end of subsection (w) the following: "The dilution by individuals of formulated pesticides for their own use and according to the directions on registered labels shall not of itself result in such individuals being included in the definition of 'producer' for the purposes of this Act.";

(6) in subsection (dd), inserting "or active ingredient used in producing a pesticide" immediately after "or device"; and

(7) adding at the end thereof a new subsection (ee) as follows:

"(ee) TO USE ANY REGISTERED PESTICIDE IN A MANNER INCONSISTENT WITH ITS LABELING.—The term 'to use any registered pesticide in a manner inconsistent with its labeling' means to use any registered pesticide in a manner not permitted by the labeling: *Provided*, That the term shall not include (1) applying a pesticide at any dosage, concentration, or frequency less than that specified on the labeling, (2) applying a pesticide against any target pest not specified on the labeling if the application is to the crop, animal, or site specified on the labeling, unless the Administrator has required that the labeling specifically state that the pesticide may be used only for the pests specified on the labeling after the Administrator has determined that the use of the pesticide against other pests would cause an unreasonable adverse effect on the environment, (3) employing any method of application not prohibited by the labeling, or (4) mixing a pesticide or pesticides with a fertilizer when such mixture is not prohibited by the labeling: *Provided further*, That the term also shall not include any use of a pesticide in conformance with section 5, 18, or 24 of this Act, or any use of a pesticide in a manner that the Administrator determines to be consistent with the purposes of this Act: *And provided further*, That after March 31, 1979, the term shall not include the use of a pesticide for agricultural or forestry purposes at a dilution less than label dosage unless before or after that date the Administrator issues a regulation or advisory opinion consistent with the study provided for in section 27(b) of the Federal Pesticide Act of 1978, which regulation or advisory opinion specifically requires the use of definite amounts of dilution.".

USE OF DATA TO SUPPORT REGISTRATION; ADDITIONAL DATA TO SUPPORT EXISTING REGISTRATION

SEC. 2. (a) Section 3 of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by—

(1) amending subsection (c)(1)(D) to read as follows:

"(D) except as otherwise provided in subsection (c)(2)(D) of this section, if requested by the Administrator, a full description of the tests made and the results thereof upon which the claims are based, or alternatively a citation to data that appear in the public literature or that previously had been submitted to the Administrator and that the Administrator may consider in accordance with the following provisions:

"(i) with respect to pesticides containing active ingredients that are initially registered under this Act after the date of enactment of the Federal Pesticide Act of 1978, data submitted to support the application for the original registration of the pesticide, or an application for an amendment adding any new use to the registration and that pertains solely to such new use, shall not, without the written permission of the original data submitter, be considered by the Administrator to support an application by another person during a period of ten years following the date the Administrator first registers the pesticide: *Provided*, That such permission shall not be required in the case of defensive data;

"(ii) Except as otherwise provided in subparagraph (D)(i) of this paragraph, with respect to data submitted after December 31, 1969, by an applicant or registrant to support an application for registration, experimental use permit, or amendment adding a new use to an existing registration, to support or maintain in effect an existing registration, or for reregistration, the Administrator may, without the permission of the original data submitter, consider any such item of data in support of an application by any other person (hereinafter in this subparagraph referred to as the 'applicant') within the fifteen-year period following the date the data were originally submitted only if the applicant has made an offer to compensate the original data submitter and submitted such offer to the Administrator accompanied by evidence of delivery to the original data submitter of the offer. The terms and amount of compensation may be fixed by agreement between the original data submitter and the applicant, or, failing such agreement, binding arbitration under this subparagraph. If, at the end of ninety days after the date of delivery to the original data submitter of the offer to compensate, the original data submitter and the applicant have neither agreed on the amount and terms of compensation nor on a procedure for reaching an agreement on the amount and terms of compensation, either person may initiate binding arbitration proceedings by requesting the Federal Mediation and Conciliation Service to appoint an arbitrator from the roster of arbitrators maintained by such Service. The procedure and rules of the Service shall be applicable to the selection of such arbitrator and to such arbitration proceedings, and the findings and determination of the arbitrator shall be final and conclusive, and no official or court of the United States shall have power or jurisdiction to review any such findings and determination, except for fraud, misrepresentation, or other misconduct by one of the parties to the arbitration or the arbitrator where there is a verified complaint with supporting affidavits attesting to specific instances of such fraud, misrepresentation, or other misconduct. The parties to the arbitrations shall share equally in the payment of the fee and expenses of the arbitrator. If the Administrator determines that an original data submitter has failed to participate in a procedure for reaching an agreement or in an arbitration proceeding as required by this subparagraph, or failed to comply with the terms of an agreement or arbitration decision concerning compensation under this subparagraph, the original data submitter shall forfeit the right to compensation for the use of the data in support of the application. Notwithstanding any other provision of this Act, if the Administrator determines that an applicant has failed to participate in a procedure for reaching an agreement or in an arbitration proceeding as required by this subparagraph, or failed to comply with the terms of an agreement or arbitration decision concerning compensation under this subparagraph, the Administrator shall deny the application or cancel the registration of the pesticide in support of which the data were used without further hearing. Before the Administrator takes action under either of the preceding two sentences, the Administrator shall furnish to the affected person, by certified mail, notice of intent to take action and allow fifteen days from the date of delivery of the notice for the affected person to respond. If a registration is denied or canceled under this subparagraph, the Administrator may make such order as the Administrator deems appropriate concerning the

continued sale and use of existing stocks of such pesticide. Registration action by the Administrator shall not be delayed pending the fixing of compensation;

"(iii) after expiration of any period of exclusive use and any period for which compensation is required for the use of an item of data under subparagraphs (D)(i) and (D)(ii) of this paragraph, the Administrator may consider such item of data in support of an application by any other applicant without the permission of the original data submitter and without an offer having been received to compensate the original data submitter for the use of such item of data;"; and

(2) amending subsection (c)(2) by—

(A) inserting "(A)" immediately after "(2)";

(B) inserting immediately after "kind of information" in the second sentence the following: "under subparagraph (B) of this paragraph,";

(C) striking out "subsection (c)(1)(D) of this section and" from the third sentence; and

(D) adding at the end thereof a new subparagraph (B) as follows:

"(B) ADDITIONAL DATA TO SUPPORT EXISTING REGISTRATION.—

"(i) If the Administrator determines that additional data are required to maintain in effect an existing registration of a pesticide, the Administrator shall notify all existing registrants of the pesticide to which the determination relates and provide a list of such registrants to any interested person.

"(ii) Each registrant of such pesticide shall provide evidence within ninety days after receipt of notification that it is taking appropriate steps to secure the additional data that are required. Two or more registrants may agree to develop jointly, or to share in the cost of developing, such data if they agree and advise the Administrator of their intent within ninety days after notification. Any registrant who agrees to share in the cost of producing the data shall be entitled to examine and rely upon such data in support of maintenance of such registration.

"(iii) If, at the end of sixty days after advising the Administrator of their agreement to develop jointly, or share in the cost of developing, data, the registrants have not further agreed on the terms of the data development arrangement or on a procedure for reaching such agreement, any of such registrants may initiate binding arbitration proceedings by requesting the Federal Mediation and Conciliation Service to appoint an arbitrator from the roster of arbitrators maintained by such Service. The procedure and rules of the Service shall be applicable to the selection of such arbitrator and to such arbitration proceedings, and the findings and determination of the arbitrator shall be final and conclusive, and no official or court of the United States shall have power or jurisdiction to review any such findings and determination, except for fraud, misrepresentation, or other misconduct by one of the parties to the arbitration or the arbitrator where there is a verified complaint with supporting affidavits attesting to specific instances of such fraud, misrepresentation, or other misconduct. All parties to the arbitration shall share equally in the payment of the fee and expenses of the arbitrator.

"(iv) Notwithstanding any other provision of this Act, if the Administrator determines that a registrant, within the time required by the Administrator, has failed to take appropriate steps to secure the data required under this subparagraph, to participate in a procedure for reaching agreement concerning a joint data development arrangement under this subparagraph or in an arbitration proceeding as required by this subparagraph, or to comply with the terms of an agreement or arbitration decision concerning a joint data development arrangement under this subparagraph, the Administrator may issue a notice of intent to suspend such registrant's registration of the pesticide for which additional data is required. The Administrator may include in the notice of intent to suspend such provisions as the Administrator deems appropriate concerning the continued sale and use of existing stocks of such pesticide. Any suspension proposal under this subparagraph shall become final and effective at the end of thirty days from receipt by the registrant of the notice of intent to suspend, unless during that time a request for hearing is made by a person adversely affected by the notice or the registrant has satisfied the Administrator that the registrant has complied fully with the requirements that served as a basis for the notice of intent to suspend. If a hearing is requested, a hearing shall be conducted under section 6(d) of this Act: Provided, That the only matters for resolution at that hearing shall be whether the registrant has failed to take the action that served as the basis for the notice of intent to suspend the registration of the pesticide for which additional data is required, and whether the Administrator's determination with respect to the disposition of existing stocks is consistent with this Act. If a hearing is held, a decision after completion of such hearing shall be final. Notwithstanding any other provision of this Act, a hearing shall be held and a determination made within seventy-five days after receipt of a request for such hearing. Any registration suspended under this subparagraph shall be reinstated by the Administrator if the Administrator determines that the registrant has complied fully with the requirements that served as a basis for the suspension of the registration.

"(v) Any data submitted under this subparagraph shall be subject to the provisions of subsection (c)(1)(D) of this section. Whenever such data are submitted jointly by two or more registrants, an agent shall be agreed on at the time of the joint submission to handle any subsequent data compensation matters for the joint submitters of such data.".

(b) The amendment to section 3(c)(1)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act made by this section shall apply with respect to all applications for registration approved after the date of enactment of this Act.

MINOR USE REGISTRATIONS

SEC. 3. Section 3(c)(2)(A) of the Federal Insecticide, Fungicide, and Rodenticide Act, as redesignated by section 2 of this Act, is further amended by inserting immediately after the second sentence the following: "The Administrator, in establishing standards for data requirements for the registration of pesticides with respect to minor uses, shall make such standards commensurate with the anticipated extent of use, pattern of use, and the level and degree of potential exposure of man and the environment to the pesticide. In the development of these standards, the Administrator shall consider the economic factors of potential national volume of use, extent of distribution, and the impact of the cost of meeting the requirements on the incentives for any potential registrant to undertake the development of the required data.".

SIMPLIFIED REGISTRATION PROCEDURES; EXEMPTION FROM REQUIREMENTS FOR SUBMISSION OF DATA

SEC. 4. Section 3(e)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act is further amended by adding at the end thereof new subparagraphs (C) and (D) as follows:

"(C) SIMPLIFIED PROCEDURES.—Within nine months after the date of enactment of this subparagraph, the Administrator shall, by regulation, prescribe simplified procedures for the registration of pesticides, which shall include the provisions of subparagraph (D) of this paragraph.

"(D) EXEMPTION.—No applicant for registration of a pesticide who proposes to purchase a registered pesticide from another producer in order to formulate such purchased pesticide into an end-use product shall be required to—

"(i) submit or cite data pertaining to the safety of such purchased product; or

"(ii) offer to pay reasonable compensation otherwise required by paragraph (1)(D) of this subsection for the use of any such data.".

WAIVER OF DATA REQUIREMENTS PERTAINING TO EFFICACY

SEC. 5. Section 3(c)(5) of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by adding at the end thereof the following: "In considering an application for the registration of a pesticide, the Administrator may waive data requirements pertaining to efficacy, in which event the Administrator may register the pesticide without determining that the pesticide's composition is such as to warrant proposed claims of efficacy. If a pesticide is found to be efficacious by any State under section 24(c) of this Act, a presumption is established that the Administrator shall waive data requirements pertaining to efficacy for use of the pesticide in such State.".

REGISTRATION UNDER SPECIAL CIRCUMSTANCES; INTERIM ADMINISTRATIVE REVIEW

SEC. 6. Section 3(c) of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by adding at the end thereof new paragraphs (7) and (8) as follows:

"(7) REGISTRATION UNDER SPECIAL CIRCUMSTANCES.—Notwithstanding the provisions of subsection (c)(5) of this section—

"(A) The Administrator may conditionally register or amend the registration of a pesticide if the Administrator determines that (i) the pesticide and proposed use are identical or substantially similar to any currently registered pesticide and use thereof, or differ only in ways that would not significantly increase the risk of unreasonable adverse effects on the environment, and (ii) approving the registration or amendment in the manner proposed by the applicant would not significantly increase the risk of any unreasonable adverse effect on the environment. An applicant seeking conditional registration or amended registration under this subparagraph shall submit such data as would be required to obtain registration of a similar pesticide under subsection (c)(5) of this section: *Provided*, That, if the applicant is unable to submit an item of data because it has not yet been generated, the Administrator may register or amend the registration of the pesticide under such conditions as will require the submission of such data not later than the time such data are required to be submitted with respect to similar pesticides already registered under this Act.

"(B) The Administrator may conditionally amend the registration of a pesticide to permit additional uses of such pesticide notwithstanding that data concerning the pesticide may be insufficient to support an unconditional amendment, if the Administrator determines that (i) the applicant has submitted satisfactory data pertaining to the proposed additional use, and (ii) amending the registration in the manner proposed by the applicant would not significantly increase the risk of any unreasonable adverse effect on the environment. Notwithstanding the foregoing provisions of this subparagraph, no registration of a pesticide may be amended to permit an additional use of such pesticide if the Administrator has issued a notice stating that such pesticide, or any ingredient thereof, meets or exceeds risk criteria associ-

ated in whole or in part with human dietary exposure enumerated in regulations issued under this Act, and during the pendency of any risk-benefit evaluation initiated by such notice, if (i) the additional use of such pesticide involves a major food or feed crop, or (ii) the additional use of such pesticide involves a minor food or feed crop and the Administrator determines, with the concurrence of the Secretary of Agriculture, there is available an effective alternative pesticide that does not meet or exceed such risk criteria. An applicant seeking amended registration under this subparagraph shall submit such data as would be required to obtain registration of a similar pesticide under subsection (c)(5) of this section: *Provided*, That, if the applicant is unable to submit an item of data (other than data pertaining to the proposed additional use) because it has not yet been generated, the Administrator may amend the registration under such conditions as will require the submission of such data not later than the time such data are required to be submitted with respect to similar pesticides already registered under this Act.

"(C) The Administrator may conditionally register a pesticide containing an active ingredient not contained in any currently registered pesticide for a period reasonably sufficient for the generation and submission of required data (which are lacking because a period reasonably sufficient for generation of the data has not elapsed since the Administrator first imposed the data requirement) on the condition that by the end of such period the Administrator receives such data and the data do not meet or exceed risk criteria enumerated in regulations issued under this Act, and on such other conditions as the Administrator may prescribe: *Provided*, That a conditional registration under this subparagraph shall be granted only if the Administrator determines that use of the pesticide during such period will not cause any unreasonable adverse effect on the environment, and that use of the pesticide is in the public interest.

"(8) INTERIM ADMINISTRATIVE REVIEW.—Notwithstanding any other provision of this Act, the Administrator may not initiate a public interim administrative review process to develop a risk-benefit evaluation of the ingredients of a pesticide or any of its uses prior to initiating a formal action to cancel, suspend, or deny registration of such pesticide, required under this Act, unless such interim administrative process is based on a validated test or other significant evidence raising prudent concerns of unreasonable adverse risk to man or to the environment. Notice of the definition of the terms 'validated test' and 'other significant evidence' as used herein shall be published by the Administrator in the Federal Register.".

CLASSIFICATION PRIOR TO REREGISTRATION; CHANGE IN CLASSIFICATION FROM RESTRICTED USE TO GENERAL USE

SEC. 7. Section 3(d) of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by—

(1) inserting in paragraph (1)(A) immediately after the first sentence the following: "Pesticide uses may be classified by regulation on the initial classification, and registered pesticides may be classified prior to reregistration.";

(2) striking out "30 days" in paragraph (2) and inserting in lieu thereof "forty-five days"; and

(3) adding a new paragraph (3) at the end thereof as follows:

"(3) CHANGE IN CLASSIFICATION FROM RESTRICTED USE TO GENERAL USE.—The registrant of any pesticide with one or more uses classified for restricted use may petition the Administrator to change any such classification from restricted to general use. Such petition shall set out the basis for the registrant's position that restricted use classification is unnecessary because classification of the pesticide for general use would not cause unreasonable adverse effects on the environment. The Administrator, within sixty days after receiving such petition, shall notify the registrant whether the petition has been granted or denied. Any denial shall contain an explanation therefor and any such denial shall be subject to judicial review under section 16 of this Act.".

REREGISTRATION

SEC. 8. Section 3 of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by adding at the end thereof of new subsection (g) as follows:

"(g) REREGISTRATION OF PESTICIDES.—The Administrator shall accomplish the reregistration of all pesticides in the most expeditious matter practicable: *Provided*, That, to the extent appropriate, any pesticide that results in a postharvest residue in or on food or feed crops shall be given priority in the reregistration process.".

AUTHORITY OF ADMINISTRATOR TO CERTIFY APPLICATORS

SEC. 9. Section 4(a) of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by inserting in paragraph (1) immediately after "(1) FEDERAL CERTIFICATION.—" the following: "In any State for which a State plan for applicator certification has not been approved by the Administrator, the Administrator, in consultation with the Governor of such State, shall conduct a program for the certification of applicators of pesticides: *Provided*, That such program shall conform to the requirements imposed upon the States under the provisions of subsection (a)(2) of this section and shall not require private applications to take any examination to establish competency in the use of pesticides. Prior to the implementation of the program, the Administrator shall publish in the Federal Register for review and comment a summary of the Federal plan for applicator certification and shall make generally available within the State copies of the plan. The Administrator shall hold public hearings at one or more locations within the State if so requested by the Governor of such State during the thirty days following publication of the Federal Register notice inviting comment on the Federal plan. The hearings shall be held within thirty days following receipt of the request from the Governor. In any State in which the Administrator conducts a certification program, the Administrator may require any person engaging in the commercial application, sale, offering for sale, holding for sale, or distribution of any pesticide one or more uses of which have been classified for restricted use to maintain such records and submit such reports concerning the commercial application, sale, or distribution of such pesticides as the Administrator may by regulation prescribe.".

EXPERIMENTAL USE PERMITS

SEC. 10. Section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by—

(1) amending subsection (a) to read as follows:

"(a) ISSUANCE.—Any person may apply to the Administrator for an experimental use permit for a pesticide. The Administrator shall review the application. After completion of the review, but not later than one hundred and twenty days after receipt of the application and all required supporting data, the Administrator shall either issue the permit or notify the applicant of the Administrator's determination not to issue the permit and the reasons therefor. The applicant may correct the application or request a waiver of the conditions for such permit within thirty days of receipt by the applicant of such notification. The Administrator determines that the applicant needs such permit in order to accumulate information necessary to register a pesticide under section 3 of this Act. An application for an experimental use permit may be filed at any time."; and

(2) in subsection (f), striking out the word "may" the first time it appears in the first sentence and inserting in lieu thereof "shall".

ALTERNATIVE TO CANCELLATION

SEC. 11. Section 6(b) of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by inserting in the last sentence immediately after "In taking any final action under this subsection, the Administrator" the following: "shall consider restricting a pesticide's use or uses as an alternative to cancellation and shall fully explain the reasons for these restrictions, and".

CANCELLATION OF CONDITIONAL REGISTRATION

SEC. 12. Section 6 of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by redesignating subsection (e) as subsection (f) and inserting after subsection (d) a new subsection (e) as follows:

"(e) CONDITIONAL REGISTRATION.—

"(1) The Administrator shall issue a notice of intent to cancel a registration issued under section 3(c)(7) of this Act if (A) the Administrator, at any time during the period provided for satisfaction of any condition imposed, determines that the registrant has failed to initiate and pursue appropriate action toward fulfilling any condition imposed, or (B) at the end of the period provided for satisfaction of any condition imposed, that condition has not been met: *Provided*, That the Administrator may permit the continued sale and use of existing stocks of a pesticide whose conditional registration has been canceled under this subsection to such extent, under such conditions, and for such uses as the Administrator may specify if the Administrator determines that such sale or use is not inconsistent with the purposes of this Act and will not have unreasonable adverse effects on the environment.

"(2) A cancellation proposed under this subsection shall become final and effective at the end of thirty days from receipt by the registrant of the notice of intent to cancel unless during that time a request for hearing is made by a person adversely affected by the notice. If a hearing is requested a hearing shall be conducted under subsection (d) of this section: *Provided*, That the only matters for resolution at that hearing shall be whether the registrant has initiated and pursued appropriate action to comply with the condition or conditions within the time provided or whether the condition or conditions have been satisfied within the time provided, and whether the Administrator's determination with respect to the disposition of existing stocks is consistent with this Act. A decision after completion of such hearing shall be final. Notwithstanding any otehr provision of this section, a hearing shall be held and a determination made within seventy-five days after receipt of a request for such hearing.".

REGISTRATION OF ESTABLISHMENTS

SEC. 13. Section 7 of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by—

(1) in subsection (a), inserting "or active ingredient used in producing a pesticide subject to this Act" immediately after "any pesticide subject to this Act";

(2) in subsection (c)(1), inserting "and, if applicable, active ingredients used in producing pesticides" immediately after "pesticides"; and

(3) in subsection (d), inserting "other than the names of the pesticides or active ingredients used in producing pesticides produced, sold, or distributed at an establish-

ment" immediately after "pursuant to subsection (c)".

INSPECTION OF BOOKS AND RECORDS

SEC. 14. Section 8(b) of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by adding at the end thereof the following: "Before undertaking an inspection under this subsection, the officer or employee must present to the owner, operator, or agent in charge of the establishment or other place where pesticides or devices are held for distribution or sale, appropriate credentials and a written statement as to the reason for the inspection, including a statement as to whether a violation of the law is suspected. If no violation is suspected, an alternate and sufficient reason shall be given in writing. Each such inspection shall be commenced and completed with reasonable promptness.".

TRADE SECRET AMENDMENTS

SEC. 15. Section 10 of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by—

(1) in subsection (b), inserting immediately after "Notwithstanding any other provision of this Act" the following: "and subject to the limitations in subsections (d) and (e) of this section"; and

(2) adding at the end thereof new subsections (d), (e), (f), and (g) as follows:

"(d) Limitations.—

"(1) All information concerning the objectives, methodology, results, or significance of any test or experiment performed on or with a registered or previously registered pesticide or its separate ingredients, impurities, or degradation products, and any information concerning the effects of such pesticide on any organism or the behavior of such pesticide in the environment, including, but not limited to, data on safety to fish and wildlife, humans and other mammals, plants, animals, and soil, and studies on persistence, translocation and fate in the environment, and metabolism, shall be available for disclosure to the public: *Provided*, That the use of such data for any registration purpose shall be governed by section 3 of this Act: *Provided further*, That this paragraph does not authorize the disclosure of any information that—

"(A) discloses manufacturing or quality control processes,

"(B) discloses the details of any methods for testing, detecting, or measuring the quantity of any deliberately added inert ingredient of a pesticide, or

"(C) discloses the identity or percentage quantity of any deliberately added inert ingredient of a pesticide, unless the Administrator has first determined that disclosure is necessary to protect against an unreasonable risk of injury to health or the environment.

"(2) Information concerning production, distribution, sale, or inventories of a pesticide that is otherwise entitled to confidential treatment under subsection (b) of this section may be publicly disclosed in connection with a public proceeding to determine whether a pesticide, or any ingredient of a pesticide, causes unreasonable adverse effects on health or the environment, if the Administrator determines that such disclosure is necessary in the public interest.

"(3) If the Administrator proposes to disclose information described in clause (A), (B), or (C) of paragraph (1) or in paragraph (2) of this subsection, the Administrator shall notify by certified mail the submitter of such information of the intent to release such information. The Administrator may not release such information, without the submitter's consent, until thirty days after the submitter has been furnished such notice: *Provided*, That where the Administrator finds that disclosure of information described in clause (A), (B), or (C) of paragraph (1) of this subsection is necessary to avoid or lessen an imminent and substantial risk of injury to the public health, the Administrator may set such shorter period of notice (but not less than ten days) and such method of notice as the Administrator finds appropriate. During such period the data submitter may institute an action in an appropriate district court to enjoin or limit the proposed disclosure. The court shall give expedited consideration to any such action. The court may enjoin disclosure, or limit the disclosure or the parties to whom disclosure shall be made, to the extent that—

"(A) in the case of information described in clause (A), (B), or (C) of paragraph (1) of this subsection, the proposed disclosure is not required to protect against an unreasonable risk of injury to health or the environment; or

"(B) in the case of information described in paragraph (2) of this subsection, the public interest in availability of the information in the public proceeding does not outweigh the interests in preserving the confidentiality of the information.

"(c) DISCLOSURE TO CONTRACTORS.—Information otherwise protected from disclosure to the public under subsection (b) of this section may be disclosed to contractors with the United States and employees of such contractors if, in the opinion of the Administrator, such disclosure is necessary for the satisfactory performance by the contractor of a contract with the United States for the performance of work in connection with this Act and under such conditions as the Administrator may specify. The Administrator shall require as a condition to the disclosure of information under this subsection that the person receiving it take such security precautions respecting the information as the Administrator shall by regulation prescribe.

"(f) PENALTY FOR DISCLOSURE BY FEDERAL EMPLOYEES.—(1) Any officer or employee of the United States or former officer or employee of the United States who, by virtue of such employment or official position, has obtained possession of, or has access to, material the disclosure of which is prohibited by subsection (b) of this section, and who, knowing that disclosure of such material is prohibited by such subsection, willfully discloses the material in any manner to any person not entitled to receive it, shall be fined not more than $10,000 or imprisoned for not more than one year, or both. Section 1905 of title 18 of the United States Code shall not apply with respect to the publishing, divulging, disclosure, or making known of, or making available, information reported or otherwise obtained under this Act. Nothing in this Act shall preempt any civil remedy under State or Federal law for wrongful disclosure of trade secrets.

"(2) For the purposes of this section, any contractor with the United States who is furnished information as authorized by subsection (c) of this section, or any employee of any such contractor, shall be considered to be an employee of the United States.

"(g) DISCLOSURE TO FOREIGN AND MULTINATIONAL PESTICIDE PRODUCERS.—(1) The Administrator shall not knowingly disclose information submitted by an applicant or registrant under this Act to any employee or agent of any business or other entity engaged in the production, sale or distribution of pesticides in countries other than the United States or in addition to United States or to any other person who intends to deliver such data to such foreign or multinational business or entity unless the applicant or registrant has consented to such disclosure. The Administrator shall require an affirmation from any person who intends to inspect data that such person does not seek access to the data for purposes of delivering it or offering it for sale to any such business or entity or its agents or employees and will not purposefully deliver or negligently cause the data to be delivered to such business or entity or its agents or employees. Notwithstanding any other provision of this subsection, the Administrator may disclose information to any person in connection with a public procceding under law or regulation, subject to restrictions on the availability of information contained elsewhere in this Act, which information is relevant to a determination by the Administrator with respect to whether a pesticide, or any ingredient of a pesticide, causes unreasonable adverse effects on health or the environment.

"(2) The Administrator shall maintain records of the names of persons to whom data are disclosed under this subsection and the persons or organizations they represent and shall inform the applicant or registrant of the names and affiliations of such persons.

"(3) Section 1001 of title 18 of the United States Code shall apply to any affirmation made under paragraph (1) of this subsection.".

EXEMPTION FROM THE UNLAWFUL ACTS PROVISION

SEC. 16. Section 12(a)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by inserting immediately before the semicolon at the end of subparagraph (F) the following: ": *Provided*, That it shall not be unlawful to sell, under regulations issued by the Administrator, a restricted use pesticide to a person who is not a certified applicator for application by a certified applicator".

CIVIL PENALTIES FOR CERTAIN APPLICATORS; PROCEDURE FOR DETERMINING THE AMOUNT OF CIVIL PENALTIES

SEC. 17. Section 14(a) of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by—

(1) inserting immediately before the period at the end of paragraph (2) the following: ": *Provided*, That any applicator not included under paragraph (1) of this subsection who holds or applies registered pesticides, or use dilutions of registered pesticides, only to provide a service of controlling pests without delivering any unapplied pesticide to any person so served, and who violates any provision of this Act may be assessed a civil penalty by the Administrator of not more than $500 for the first offense nor more than $1,000 for each subsequent offense";

(2) striking out the last sentence in paragraph (3);

(3) redesignating paragraph (4) as paragraph (5); and

(4) inserting after paragraph (3) a new paragraph (4) as follows:

"(4) DETERMINATION OF PENALTY.—In determining the amount of the penalty, the Administrator shall consider the appropriateness of such penalty to the size of the business of the person charged, the effect on the person's ability to continue in business, and the gravity of the violation. Whenever the Administrator finds that the violation occurred despite the exercise of due care or did not cause significant harm to health or the environment, the Administrator may issue a warning in lieu of assessing a penalty.".

PESTICIDES AND DEVICES INTENDED FOR EXPORT

SEC. 18. (a) Section 17 of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by—

(1) amending subsection (a) to read as follows:

"(a) PESTICIDES AND DEVICES INTENDED FOR EXPORT.—Notwithstanding any other provision of this Act, no pesticide or device or active ingredient used in producing a pesticide intended solely for export to any foreign country shall be deemed in violation of this Act—

"(1) when prepared or packed according to the specifications or directions of the for-

eign purchaser, except that producers of such pesticides and devices and active ingredients used in producing pesticides shall be subject to sections 2(p), 2(q)(1)(A), (C), (D), (E), (G), and (II), 2(q) (2) (A), (B), (C), (i) and (iii), and (D), 7, and 8 of this Act; and

"(2) in the case of any pesticide other than a pesticide registered under section 3 or sold under section 6(a)(1) of this Act, if, prior to export, the foreign purchaser has signed a statement acknowledging that the purchaser understands that such pesticide is not registered for use in the United States and cannot be sold in the United States under this Act. A copy of that statement shall be transmitted to an appropriate official of the government of the importing country."; and

(2) adding at the end of subsection (b) the following: "Such notification shall, upon request, include all information related to the cancellation or suspension of the registration of the pesticide and information concerning other pesticides that are registered under section 3 of this Act and that could be used in lieu of such pesticide.".

(b) The amendment made by subsection (a)(1) of this section shall become effective one hundred and eighty days after the date of enactment of this Act.

DISPOSAL OF PESTICIDES

SEC. 19. Section 19 of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by adding at the end thereof a new subsection (c) as follows:

"(c) PROVISIONS FOR UNUSED QUANTITIES.—Notifications of cancellation of any pesticide shall include specific provisions for the disposal of the unused quantities of such pesticides.".

RESEARCH AND MONITORING ACTIVITIES

SEC. 20. Section 20 of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by—

(1) in the first sentence of subsection (a), striking out all after the phrase "and he shall" down through the end of the sentence and inserting in lieu thereof the following: "conduct research into integrated pest management in coordination with the Secretary of Agriculture"; and

(2) amending subsection (c) to read as follows:

"(c) MONITORING.—The Administrator shall undertake such monitoring activities, including, but not limited to, monitoring in air, soil, water, man, plants, and animals, as may be necessary for the implementation of this Act and of the national pesticide monitoring plan. The Administrator shall establish procedures for the monitoring of man and animals and their environment for incidental pesticide exposure, including, but not limited to, the quantification of incidental human and environmental pesticide pollution and the secular trends thereof, and identification of the sources of contamination and their relationship to human and environmental effects. Such activities shall be carried out in cooperation with other Federal, State, and local agencies.".

STATE COOPERATION, AID, AND TRAINING

SEC. 21. Section 23 of the Federal Insecticide, Fungicide, and Rodenticide Act is amended to read as follows:

"SEC. 23. STATE COOPERATION, AID, AND TRAINING.

"(a) COOPERATIVE AGREEMENTS.—The Administrator may enter into cooperative agreements with States and Indian tribes—

"(1) to delegate to any State or Indian tribe the authority to cooperate in the enforcement of this Act through the use of its personnel or facilities, to train personnel of the State or Indian tribe to cooperate in the enforcement of this Act, and to assist States and Indian tribes in implementing cooperative enforcement programs through grants-in-aid; and

"(2) to assist States in developing and administering State programs, and Indian tribes that enter into cooperative agreements, to train and certify applicators consistent with the standards the Administrator prescribes.

Effective with the fiscal year beginning October 1, 1978, there are authorized to be appropriated annually such funds as may be necessary for the Administrator to provide through cooperative agreements an amount equal to 50 percent of the anticipated cost to each State or Indian tribe, as agreed to under such cooperative agreements, of conducting training and certification programs during such fiscal year. If funds sufficient to pay 50 percent of the costs for any year are not appropriated, the share of each State and Indian tribe shall be reduced in a like proportion in allocating available funds.

"(b) CONTRACTS FOR TRAINING.—In addition, the Administrator may enter into contracts with Federal, State, or Indian tribal agencies for the purpose of encouraging the training of certified applicators.

"(e) INFORMATION AND EDUCATION.—The Administrator shall, in cooperation with the Secretary of Agriculture, use the services of the cooperative State extension services to inform and educate pesticide users about accepted uses and other regulations made under this Act.".

PESTICIDES FORMULATED FOR DISTRIBUTION AND USE WITHIN A STATE

SEC. 22. Section 24 of the Federal Insecticide, Fungicide, and Rodenticide Act is amended to read as follows:

"SEC. 24. AUTHORITY OF STATES.

"(a) A State may regulate the sale or use of any federally registered pesticide or device in the State, but only if and to the extent the regulation does not permit any sale or use prohibited by this Act.

"(b) Such State shall not impose or continue in effect any requirements for labeling or packaging in addition to or different from those required under this Act.

"(c)(1) A State may provide registration for additional uses of federally registered pesticides formulated for distribution and use within that State to meet special local needs in accord with the purposes of this Act and if registration for such use has not previously been denied, disapproved, or cancelled by the Administrator. Such registration shall be deemed registration under section 3 for all purposes of this Act, but shall authorize distribution and use only within such State.

"(2) A registration issued by a State under this subsection shall not be effective for more than ninety days if disapproved by the Administrator within that period. Prior to disapproval, the Administrator shall, except as provided in paragraph (3) of this subsection, advise the State of the Administrator's intention to disapprove and the reasons therefor, and provide the State time to respond. The Administrator shall not prohibit or disapprove a registration issued by a State under this subsection (A) on the basis of lack of essentiality of a pesticide or (B) except as provided in paragraph (3) of this subsection, if its composition and use patterns are similar to those of a federally registered pesticide.

"(3) In no instance may a State issue a registration for a food or feed use unless there exists a tolerance or exemption under the Federal Food, Drug, and Costmetic Act that permits the residues of the pesticide on the food or feed. If the Administrator determines that a registration issued by a State is inconsistent with the Federal Food, Drug, and Cosmetic Act, or the use of a pesticide under a registration issued by a State constitutes an imminent hazard, the Administrator may immediately disapprove the registration.

"(4) If the Administrator finds, in accordance with standards set forth in regulations issued under section 25 of this Act, that a State is not capable of exercising adequate controls to assure that State registration under this section will be in accord with the purposes of this Act or has failed to exercise adequate controls, the Administrator may suspend the authority of the State to register pesticides until such time as the Administrator is satisfied that the State can and will exercise adequate controls. Prior to any such suspension, the Administrator shall advise the State of the Administrator's intention to suspend and the reasons therefor and provide the State time to respond.".

AUTHORITY OF ADMINISTRATOR—REGULATIONS; SCIENTIFIC ADVISORY PANEL

SEC. 23. Section 25 of the Federal Insecticide, Fungicide, and Rodenticide Act is amended by—

(1) in subsection (a)(1), striking out the period at the end of the second sentence and adding the following: "and differences in environmental risk and the appropriate data for evaluating such risk between agricultural and nonagricultural pesticides.";

(2) adding at the end of subsection (a)(2)(B), the following: "In taking any final action under this subsection, the Administrator shall include among those factors to be taken into account the effect of the regulation on production and prices of agricultural commodities, retail food prices, and otherwise on the agricultural economy, and the Administrator shall publish in the Federal Register an analysis of such effect.";

(3) in subsection (d), striking out the third sentence and inserting in lieu thereof the following: "The Administrator shall also solicit from the advisory panel comments, evaluations, and recommendations for operating guidelines to improve the effectiveness and quality of scientific analyses made by personnel of the Environmental Protection Agency that lead to decisions by the Administrator in carrying out the provisions of this Act. The comments, evaluations, and recommendations of the advisory panel and the response of the Administrator shall be published in the Federal Register in the same manner as provided for publication of the comments of the Secretary of Agriculture under such sections. The Chairman of the advisory panel, after consultation with the Administrator, may create temporary subpanels on specific projects to assist the full advisory panel in expediting and preparing its evaluations, comments, and recommendations."; and

(4) adding at the end of subsection (d) the following: "The advisory panel established under this subsection shall terminate September 30, 1981. In performing the functions assigned by this Act, the panel shall consult and coordinate its activities with the Science Advisory Board established under the Environmental Research, Development, and Demonstration Authorization Act of 1978.".

STATE ENFORCEMENT; IDENTIFICATION OF PESTS; COOPERATION WITH DEPARTMENT OF AGRICULTURE'S PROGRAM; ANNUAL REPORT

SEC. 24. The Federal Insecticide, Fungicide, and Rodenticide Act is amended by—

(1) redesignating sections 26 (severability) and 27 (authorization for appropriations) as sections 30 and 31, respectively; and

(2) inserting after section 25 new sections 26 through 29 as follows:

"SEC. 26. STATE PRIMARY ENFORCEMENT RESPONSIBILITY.

"(a) For the purposes of this Act a State shall have primary enforcement responsibility for pesticide use violations during any period for which the Administrator determines that such State—

"(1) has adopted adequate pesiticide use laws and regulations: *Provided*, That the Administrator may not require a State to have pesticide use laws that are more stringent than this Act:

"(2) has adopted and is implementing adequate procedures for the enforcement of such State laws and regulations: and

"(3) will keep such records and make such reports showing compliance with paragraphs (1) and (2) of this subsection as the Administrator may require by regulation.

"(b) Notwithstanding the provisions of subsection (a) of this section, any State that enters into a cooperative agreement with the Administrator under section 23 of this Act for the enforcement of pesticide use restrictions shall have the primary enforcement responsibility for pesticide use violations. Any State that has a plan approved by the Administrator in accordance with the requirements of section 4 of this Act that the Administrator determines meets the criteria set out in subsection (a) of this section shall have the primary enforcement responsibility for pesticide use violations. The Administrator shall make such determinations with respect to State plans under section 4 of this Act in effect on the date of enactment of the Federal Pesticide Act of 1978 not later than six months after that date.

"(c) The Administrator shall have primary enforcement responsibility for those States that do not have primary enforcement responsibility under this Act. Notwithstanding the provisions of section 2(e)(1) of this Act, during any period when the Administrator has such enforcement responsibility, section 8(b) of this Act shall apply to the books and records of commercial applicators and to any applicator who holds or applies pesticides, or use dilutions of pesticides, only to provide a service of controlling pests without delivering any unapplied pesticide to any person so served, and section 9(a) of this Act shall apply to the establishment or other place where pesticides or devices are held for application by such persons with respect to pesticides or devices held for such application.

"SEC. 27. FAILURE BY THE STATE TO ASSURE ENFORCEMENT OF STATE PESTICIDE USE REGULATIONS.

"(a) Upon receipt of any complaint or other information alleging or indicating a significant violation of the pesticide use provisions of this Act, the Administrator shall refer the matter to the appropriate State officials for their investigation of the matter consistent with the requirements of this Act. If, within thirty days, the State has not commenced appropriate enforcement action, the Administrator may act upon the complaint or information to the extent authorized under this Act.

"(b) Whenever the Administrator determines that a State having primary enforcement responsibility for pesticide use violations is not carrying out (or cannot carry out due to the lack of adequate legal authority) such responsibility, the Administrator shall notify the State. Such notice shall specify those aspects of the administration of the State program that are determined to be inadequate. The State shall have ninety days after receipt of the notice to correct any deficiencies. If after that time the Administrator determines that the State program remains inadequate, the Administrator may rescind, in whole or in part, the State's primary enforcement responsibility for pesticide use violations.

"(c) Neither section 26 of this Act nor this section shall limit the authority of the Administrator to enforce this Act, where the Administrator determines that emergency conditions exist that require immediate action on the part of the Administrator and the State authority is unwilling or unable adequately to respond to the emergency.

"SEC. 28 IDENTIFICATION OF PESTS: COOPERATION WITH DEPARTMENT OF AGRICULTURE'S PROGRAM.

"The Administrator, in coordination with the Secretary of Agriculture, shall identify those pests that must be brought under control. The Administrator shall also coordinate and cooperate with the Secretary of Agriculture's research and implementation programs to develop and improve the safe use and effectiveness of chemical, biological, and alternative methods to combat and control pests that reduce the quality and economical production and distribution of agricultural products to domestic and foreign consumers.

"SEC. 29. ANNUAL REPORT.

"The Administrator shall submit an annual report to Congress before February 16 of each year and the first report shall be due February 15, 1979. The report shall include the total number of applications for conditional registration under sections 3(c)(7)(B) and 3(c)(7)(C) of this Act that were filed during the immediately preceding fiscal year, and, with respect to those applications approved, the Administrator shall report the Administrator's findings in each case, the conditions imposed and any modification of such conditions in each case, and the quantities produced of such pesticides.".

AUTHORIZATION OF APPROPRIATIONS

SEC. 25. Section 31 of the Federal Insecticide, Fungicide, and Rodenticide Act, as redesignated by section 24 of this Act, is amended by striking out "and for the period beginning October 1, 1976, and ending March 31, 1977, the sum of $23,600,000", and inserting in lieu thereof the following: "and for the period beginning October 1, 1976, and ending September 30, 1977, the sum of $46,636,000, and for the period beginning October 1, 1977, and ending September 30, 1978, the sum of $54,500,000, and for the period beginning October 1, 1978, and ending September 30, 1979, such sums as may be necessary, but not in excess of $700,000,000".

REVISION OF FIFRA TABLE OF CONTENTS

SEC. 26. Section 1(b) of the Federal Insecticide, Fungicide, and Rodenticide Act is amended to read as follows:

"(b) TABLE OF CONTENTS.—

"Section 1. Short title and table of contents.
"(a) Short title.
"(b) Table of contents.
"Sec. 2. Definitions.
"(a) Active ingredient.
"(b) Administrator.
"(c) Adulterated.
"(d) Animal.
"(e) Certified applicator, etc.
"(1) Certified applicator.
"(2) Private applicator.
"(3) Commercial applicator.
"(4) Under the direct supervision of a certified applicator.
"(f) Defoliant.
"(g) Desiccant.

"Sec. 31. Authorization for appropriations.".

STUDIES

SEC. 27. (a) The Administrator of the Environmental Protection Agency shall perform a study examining the feasibility of assessing and collecting fees from persons applying to register, or amend the registration of, pesticides to cover the costs incurred by the Environmental Protection Agency in processing such applications under the provisions of the Federal Insecticide, Fungicide, and Rodenticide Act. The Administrator shall complete this study and submit a report setting forth the findings of the study and recommendations for the implementation of these findings to the Senate Committee on Agriculture, Nutrition, and Forestry and the House Committee on Agriculture, not later than nine months after the date of enactment of this Act.

(b) The Administrator, in cooperation with the Secretary of Agriculture, and after consultation with appropriate State officials, shall review available scientific information dealing with issues involved in the methods of pesticide application, including, but not limited to, the advisability of ultra-low-volume methods of application, and shall recommend to the Senate Committee on Agriculture, Nutrition, and Forestry and the House Committee on Agriculture such changes as the Administrator may deem necessary in existing law relative to provisions of the Act pertaining to the use of a registered pesticide in a manner inconsistent with its labeling. The report shall be submitted as soon as practicable, but not later than six months after the date of enactment of this Act.

(c) The Administrator shall submit an updated study examining the problems of minor uses of pesticides not specifically permitted by labeling. The Administrator shall complete this study and submit a report setting forth the findings of the study and recommendations for the implementation of these findings to the Senate Committee on Agriculture, Nutrition, and Forestry and the House Committee on Agriculture, not later than nine months after the date of enactment of this Act.

EFFECTIVE DATES

SEC. 28. Section 4 of the Federal Environmental Pesticide Control Act of 1972 is amended by—

(1) in subsection (b), striking out the colon immediately after the second "thereunder" and all that follows down through the end of the subsection and substituting in lieu thereof a period;

(2) in subsection (c), striking out paragraph (2), and redesignating paragraphs (3), (4), and (5) as (2), (3), and (4), respectively; and

(3) in subsection (c)(3)(B), as redesignated, striking out "Within four years after the enactment of this Act each" and inserting in lieu thereof "Each".

SHORT TITLE

SEC. 29. This Act may be cited as the "Federal Pesticide Act of 1978".

And the House agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1678) to amend the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report. The differences between the Senate bill and the House amendment and the substitute agreed to in the conference are noted in the following outline, except for conforming, clarifying, and technical changes:

1. USE INCONSISTENT WITH LABELING

A. The *Senate* bill provides that the term "to use any registered pesticide in a manner inconsistent with its labeling" means to use any registered pesticide in a manner not permitted by labeling, with several listed exceptions.

The *House* amendment provides that the term means to use any registered pesticide in a manner not permitted by the labeling, *or not authorized by the Administrator of the Environmental Protection Agency, or not authorized by a State under section 24(c) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA)*, with several listed exceptions. [Section 24(c) of FIFRA authorizes States to register pesticides formulated for distribution and use within that State to meet special local needs.]

The *conference* substitute adopts the *House* provision with a modification to make clear that the term "to use any registered pesticide in a manner inconsistent with its labeling" does not include any use of a pesticide in conformance with section 5, 18, or 24 of FIFRA, or any use in a manner that the Administrator determines consistent with the purposes of FIFRA. Such determination by the Administrator may be made by regulation or by authorization in any other manner the Administrator may deem appropriate.

B. The *Senate* bill provides that the term "to use any registered pesticide in a manner inconsistent with its labeling" does not include, among other things, application of a pesticide against any target pest not specified on the labeling if the application is to the crop, animal, or site specified on the labeling.

The *House* amendment provides that the term does not include application of a pesticide against any target pest not specified on the labeling if the application is to the crop, animal, or site specified on the labeling *unless the Administrator has required that the label specifically state that the pesticide may be used only for the pests specified on the label after a determination that use against other pests would cause an unreasonable adverse effect on the environment.*

The *conference* substitute adopts the *House* provision.

C. The *Senate* bill provides that the term "to use any registered pesticide in a manner inconsistent with its labeling" does not include, among other things, "mixing a pesticide with a fertilizer not prohibited by the labeling".

The *House* amendment provides, instead, that the term does not include "mixing a pesticide or *pesticides* with a fertilizer *when such mixture* is not prohibited by the labeling".

The *conference* substitute adopts the *House* provision.

2. USE AT A DILUTION LESS THAN LABEL DOSAGE

The *House* amendment provides that prior to March 31, 1978, the use of a pesticide for agricultural and forestry purposes at a dilution less than label dosage (i.e., a stronger concentration than that specified on the label) will not be deemed a use inconsistent with the label. After March 31, 1978, no such use will be deemed inconsistent with the label unless and until the Administrator has

issued a regulation in accordance with FIFRA that specifically requires the use of definite amounts of dilution.

The *Senate* bill contains no comparable provision.

The *conference* substitute adopts the *House* provision with a modification that provides that after March 31, 1979, the use of a pesticide for agricultural or forestry purposes at a dilution less than label dosage will not be deemed to be a use inconsistent with the labeling unless before or after such date the Administrator issues a regulation or advisory opinion consistent with the study of pesticide application methods provided in section 27(b) of the bill, which regulation or advisory opinion specifically requires the use of definite amounts of dilution.

It is the intent of the *conferees* that articles designated as general use pesticides may be used at a lower dilution than that specified on the labeling unless such lower dilution is prohibited by the labeling or regulation or advisory opinion of the Administrator referred to above. While it would obviously be dangerous to permit more concentrated solutions of restricted use pesticides to be used, the *conferees* recognize the the need to apply the standard of use inconsistent with the labeling in a commonsense manner. Thus, for example, the use of pesticide solutions in lower amounts for aerial spraying, when determined to be safe, should be permitted.

3. STUDY OF PESTICIDE APPLICATION METHODS

The *House* amendment requires the Administrator, in cooperation with the Secretary of Agriculture and after consultation with appropriate State officials, to conduct a study of methods of pesticide application, including ultra-low-volume methods of application. It also directs the Administrator to make recommendations to the agriculture committees of Congress for changes in existing law that the Administrator may deem necessary relative to provisions in FIFRA pertaining to the use of a pesticide in a manner inconsistent with its labeling. The report must be submitted as soon as practicable, but not later than 6 months after the date of enactment of the bill.

The *Senate* bill contains no comparable provision.

The *conference* substitute adopts the *House* provision.

4. STATEMENT IN SUPPORT OF REGISTRATION

The *Senate* bill retains existing law, which requires applicants for registration of a pesticide to file with the Administrator a statement that includes, if requested by the Administrator, a full description of tests made and the results thereof on which claims for the pesticide are based.

The *House* amendment also retains this provision, but, in addition, provides that, as an alternative to describing tests made and results thereof, the applicant may cite data (1) that appear in the public literature or (2) that previously had been submitted to the Administrator by the original data submitter if the exclusive use and data compensation provisions are met.

The *conference* substitute adopts the *House* provision.

5. USE OF APPLICANT'S DATA

A. The *Senate* bill provides that restrictions on the use by an applicant for registration of a pesticide of another applicant's data will apply to data *generated, collected, or developed by, or at the expense of, and originally submitted in support of* an application by, the original applicant

The *House* amendment provides that the restrictions will apply to data *submitted* by the original data submitter.

The *conference* substitute adopts the *House* provision. The *conferees* intend that the exclusive use and data compensation provisions of FIFRA should apply only for those data submitters who are entitled to exclusive use or compensation, either because they generated the data, paid for its generation, or otherwise have legal ownership of the data.

B. The *Senate* bill provides that the restrictions on use will apply to data orginally submitted in support of an application for registration.

The *House* amendment contains the same provision, but also provides that the restrictions will apply to data submitted to support an application for an experimental use permit or to satisfy a request by the Administrator.

The *Senate* bill deletes the provision in existing law with respect to compensation for use of another applicant's data submitted to the Administrator on or after January 1, 1970, and provides instead, that no data may, without the written permission of the original data submitter, be considered by the Administrator in support of another person's application for registration within the 7-year period commencing on the date the data were first submitted to the Administrator, unless the applicant submits an offer to compensate the original data submitter for use of the data.

The *House* amendment also deletes provisions of existing law on data compensation and provides, instead, that data first submitted to the Administrator after January 1, 1970, may not, without the written permission of the original data submitter, be considered by the Administrator to support an application by another person with the following exceptions:

(1) In the case of data originally submitted to support an application for an experimental use permit or for registration of a new pesticide product, the Administrator may consider the data to support another person's application for registration after passage of a period of 5 years following the date the Administrator first issues a registration, to the extent the person has complied with the data compensation requirements.

(2) In the case of data submitted in support of an application for an amendment adding a new use or uses to an existing registration, and that pertains solely to such new use, the Administrator may consider such data in support of another person's application for registration after passage of a period of 5 years following the date the Administrator first registered the pesticide (and not 5 years after the date the Administrator registered the new use under this clause), to the extent the person has complied with the data compensation requirements.

(3) In the case of data requested by the Administrator and first submitted to support or maintain in effect an existing registration or to support reregistration, the Administrator may consider the data to support another person's application for registration after passage of a period of 5 years following the date of submission, to the extent the person has complied with the data compensation requirements.

The *House* amendment provides that—during the 5-year period commencing immediately upon the expiration of a period of exclusive use for an item of data—the Administrator may, without the permission of the original data submitter, consider such item of data in support of an application for registration only if the applicant has submitted to the Administrator an offer to compensate the original data submitter for the use of such data.

The *House* amendment specifically provides that after expiration of any period of exclusive use and any period for which compensation is required for the use of an item of data, the Administrator may consider such item of data in support of an application for registration by any other applicant without the permission of the original data submitter and without an offer having been received to compensate the original data submitter for the use of such data.

The *conference* substitute provides that—

(1) all test data submitted after December 31, 1969, will be compensable for a period of 15 years from the date the data are submitted;

(2) in the case of pesticides registered after the date of enactment of this provision, there will be a period of exclusive use for data submitted in support of the registration of a product containing a new active ingredient running for 10 years from the date the product is registered, except that there will be no exclusive use for defensive data; and

(3) there will be a period of exclusive use for data submitted in support of the new use registration of a product equal to the time of exclusivity remaining under any 10-year exclusive use period of the product.

The *conferees* intend that the term "defensive data" as used in the *conference* substitute means any data or information relating to a pesticide registered prior to the date of enactment of the *conference* substitute and submitted to the Administrator as required to support the continued registration of such a pesticide, or that concern an active ingredient in such a pesticide and are required by the Administrator when considering registration actions involving that ingredient. Therefore, data that concern an active ingredient that is contained in a pesticide registered prior to the date of enactment of the *conference* substitute are defensive data when they are submitted in connection with a new product or new use registration or in any other application or submission and, in each case, they relate only to that active ingredient.

Similarly, the *conferees* intend that the term "defensive data" also includes supplemental data (other than data submitted to satisfy the terms of a conditional registration and otherwise entitled to exclusive use) that support the continued registration of a pesticide first registered after the date of enactment of the *conference* substitute.

When data supporting the registration of a pesticide first registered after the date of enactment of the *conference* substitute that are given exclusive use protection under section 3(c)(1)(D)(i) of FIFRA are used within the 10-year period of exclusive use to support the registration of a different product, such data shall continue to have exclusive use protection for the balance of the 10-year period. If such data are used to support the registration of a different product after the expiration of the 10-year period of exclusive use, such data shall not be eligible for any additional period of exclusive use.

Data that concern the unique characteristics of several pesticide ingredients in combination would not be considered defensive data if submitted in support of the initial registration of the combination product. Such data or data supporting additional uses of the combination product would be eligible for exclusive use treatment to the extent otherwise provided by the *conference* substitute.

Whenever the Administrator imposes a new data requirement on any applicant that is also applicable to other pesticides, he shall do so by modifying the guidelines promulgated under section 3(c)(2) of FIFRA.

Data or information submitted to support a conditional registration under section 3(c)(7) of FIFRA are entitled to whatever exclusive use or compensation that would apply to data supporting a registration under section 3(c)(5).

Data submitted in support of a request for an experimental use permit for a pesticide containing a new active ingredient registered after the date of enactment of the bill or a new use for such pesticide will be considered as data to support the pending registration of such pesticide or new use.

Accordingly, such data will not be available to other applicants without the consent of the original data submitter for a period of 10 years from the date the product is initially registered.

ARBITRATION ON DATA COMPENSATION

A. The *Senate* bill provides that, in the event of arbitration to determine the terms and amount of compensation for use of another applicant's data, the findings and determination of the arbitrator shall be *binding and conclusive.*

The *House* amendment provides that the findings and determination of the arbitrator shall be *binding and not subject to further appeal.*

The *conference* substitute adopts the *House* provision with a modification to provide that the findings and determination of the arbitrator will be final and conclusive, and no official or court of the United States will have power or jurisdiction to review any such findings and determination, except for fraud, misrepresentation, or other misconduct by one of the parties to the arbitration or the arbitrator where there is a verified complaint with supporting affidavits attesting to specific instances of such fraud, misrepresentation, or other misconduct.

B. The *Senate* bill provides that the Administrator must furnish notice of intent to take action in response to failure by a person to reach agreement on compensation or to arbitrate, and allow 15 days for the affected person to respond.

The *House* amendment contains the same provision but requires that such notice be *in writing and by certified mail* and allows 15 days *from the date of furnishing the notice* for the affected person to respond.

The *conference* substitute adopts the *House* provision with a modification to provide that the 15-day period for response to a notice of intent to take action will begin on the date of *delivery* of the written notice.

7. ADDITIONAL DATA TO SUPPORT EXISTING REGISTRATIONS—CANCELLATION

The *Senate* bill provides that if the Administrator determines that a registrant (1) has failed to take appropriate steps to secure additional data to support an existing registration as required by the Administrator, or (2) with respect to any joint data development arrangement among the registrants of a pesticide, has failed to participate in a procedure for reaching agreement on the terms of the arrangement or in an arbitration proceeding, or (3) has failed to comply with the terms of the arrangement or an arbitration decision on the terms of the arrangement, the Administrator must cancel the registrant's registration of the pesticide for which additional data is required. This cancellation is to be made without further hearing, except that the Administrator must first furnish the affected person notice of intent to cancel and allow 15 days for such person to respond.

The *House* amendment contains the same provision requiring cancellation of the registration, but prescribes a different procedure for cancellation. The cancellation is to be made in accordance with section 6(b) of FIFRA.

The *conference* substitute authorizes the Administrator to enforce a defensive data requirement, or compliance with the terms of an agreement or arbitration decision concerning a joint data development arrangement, by instituting a procedure to suspend the registrant's registration until such time as the data are received or compliance obtained.

Any suspension proposed under this provision will become final and effective at the end of 30 days from receipt by the registrant of a notice of intent to suspend, unless during that time a request for hearing is made by a person adversely affected by the notice or the registrant has satisfied the Administrator that the registrant has complied fully with the requirements that served as a basis for the notice of intent to suspend. If a hearing is requested, a hearing will be conducted pursuant to section 6(d) of FIFRA. The only matters for resolution at that hearing will be whether the registrant has failed to take the action that served as the basis for the notice of intent to suspend concerning the pesticide for which additional data is required, and whether the Administrator's determination with respect to the disposition of existing stocks is consistent with FIFRA. If a hearing is held, a decision after completion of such hearing will be final. The hearing will be held and a determination made within 75 days after receipt of a request for such hearing. Any registration suspended under this provision will be reinstated upon the Administrator's determination that the registrant has complied fully with the requirements that served as a basis for the suspension of the registration.

The *Conferees* are concerned that in certain instances some registrants may fail to cooperate with other registrants in agreeing "to develop jointly, or share in the cost of developing", data to maintain in effect a registration. The *conferees* intend that certain registrants should not be permitted to "freeze-out" other registrants by refusing to agree to develop jointly or share in the cost of developing such data, and that no registrant should be permitted to obtain windfalls from delaying tactics employed in entering into such agreements. However, nothing in FIFRA prevents any single registrant from developing such data independently.

8. SIMPLIFIED REGISTRATION PROCEDURES

The *Senate* bill provides that the Administrator must by regulation prescribe simplified procedures for registration of pesticides.

The *House* amendment contains the same provision, but further requires that the regulations be issued within 9 months after the date of enactment of the bill.

The *conference* substitute adopts the *House* provision. The *conferees* do not intend that the simplified registration procedures (or the regulations issued under section 3(c)(2)(C) of FIFRA) negate rights otherwise enforceable under section 3(c)(1)(D) of FIFRA.

9. EXEMPTION FROM REQUIREMENTS FOR SUBMISSION OF DATA

The *Senate* bill provides that no applicant for registration who proposes to purchase a *registered pesticide* from another producer in order to formulate the purchased pesticide into an end-use product shall be required to (i) submit data pertaining to the safety of the purchased product or (ii) offer to pay reasonable compensation otherwise required for the use of such data.

The *House* amendment contains a similar provision. It provides that no applicant for registration of a pesticide who proposes to purchase a registered *basic pest control chemical* from another producer in order to formulate the purchased pesticide into an end-use product shall be required to (i) submit *or cite data* pertaining to the safety of the *basic pest control chemical as opposed to the safety of the formulated pesticide,* or (ii) offer to pay reasonable compensation otherwise required for the use of such data. The term "basic pest control chemical" is defined to mean a pesticide that is not intended to be applied for pest control purposes without further formulation, but is intended to be used in producing a formulated pesticide; and the term "formulated pesticide" is defined to mean a pesticide that is intended to be applied for pest control purposes without further mixing or formulation, or after mixing with water or other dilutant by the applicator.

The *conference* substitute adopts the *Senate* provision with a modification to permit citation of data as well as submission of data.

10. WAIVER OF DATA REQUIREMENTS PERTAINING TO EFFICACY

The *House* amendment provides that, if a pesticide is found to be efficacious by any State in connection with the registration by that State of a pesticide formulated to meet special local needs, a presumption is established that the Administrator shall waive data requirements pertaining to efficacy for use of the pesticide in such State.

The *Senate* bill contains no comparable provision.

The *conference* substitute adopts the *House* provision with a modification to clarify that if the Administrator waives data requirements pertaining to efficacy, the Administrator has the discretion to register the pesticide without determining that the pesticide's composition is such as to warrant proposed claims of efficacy.

In those instances in which the efficacy of a pesticide cannot be determined without submission of data, the *conferees* consider that this provision authorizes the Administrator to waive review of efficacy data on such pesticides provided that test protocols and data requirements are established or approved by the Administrator, data from a reliable testing facility that supports the application for registration are submitted, and the applicant provides a certified summary stating that the product passes the required tests for efficacy.

11. CONDITIONAL REGISTRATION

A. The *Senate* bill authorizes the Administrator to conditionally register or register products in certain situation, even though certain of the data that are required for complete registration or reregistration have not yet been generated, or, if on file with the Administrator, have not yet been reviewed for validity or sufficiency. Three kinds of conditional registrations would be authorized: conditional registration of pesticides identical or substantially similar to currently registered pesticides; conditional amendments to current registrations to add new uses; and conditional registration of pesticides containing active ingredients not contained in any currently registered pesticide.

The *House* amendment contains the same provisions, but, in addition, authorizes conditional registration, subject to specified conditions, if—with respect to pesticides identical or substantially similar to currently registered pesticides and proposal amendments to current registrations to add new uses—the applicant is unable to submit an item of data because it is an item of data to which the exclusive use or compensation requirements apply.

The *conference* substitute adopts the *Senate* provision.

B. The *Senate* bill prohibits the Administrator from granting conditional registration of a pesticide for additional uses, if—

(1) the Administrator has issued a notice that the pesticide, or any of its ingredients, meets or exceeds risk criteria related to human dietary exposure, and during the pendency of any risk-benefit evaluation initiated by the notice; and

(2) the additional use involves a minor food or feed crop and the Administrator determines that there is available an effective alternative pesticide that does not meet or exceed such risk criteria.

The *House* amendment contains the same provision, but also requires the concurrence of the Secretary of Agriculture that there is an effective alternative pesticide available.

The *conference* substitute adopts the *House* provision.

C. The *Senate* bill provides that the Administrator may conditionally register a pesticide containing an active ingredient not contained in any currently registered pesticide, subject to certain conditions: *Provided,* That the Administrator may grant such registration only if the Administrator determines that (1) use of the pesticide dur-

ing such period will not cause any unreasonable adverse effect on the environment, *and* (2) *use of the pesticide is required in the public interest.*

The *House* amendment contains the same provision, except that it does not require the Administrator's determination that the use of the pesticide is in the public interest.

The *conference* substitute adopts the *Senate* provision with a modification providing for the Administrator to determine as a condition to granting the registration that use of the pesticide is in the public interest and not, as in the *Senate* provision, *required* in the public interest.

The *conferees* have agreed to the inclusion of new sections 3(c)(7)(A), (B), and (C) in FIFRA to authorize the Administrator to register pesticides conditionally on a case-by-case basis. This authorization is intended to apply, with respect to conditional registrations of pesticides containing new ingredients, to situations, among others, where such a pesticide may be conditionally registered for a period sufficient to obtain the data required by the Administrator.

12. INTERIM ADMINISTRATIVE REVIEW

The *House* amendment provides that the Administrator may not initiate a public interim administrative review process to develop a risk-benefit evaluation of the ingredients of a pesticide or any of its uses (a rebuttable presumption against registration (RPAR)) prior to initiating a formal action to cancel, suspend, or deny registration of such pesticide, required under FIFRA, unless such interim administrative process is based on a validated test raising prudent concerns of unreasonable adverse risk to man or to the environment.

The *Senate* bill contains no comparable provision.

The *conference* substitute adopts the *House* provision with a modification providing that the interim administrative review process must be based on a validated test or other significant evidence raising prudent concerns of unreasonable adverse risk to man or the environment and that notice of the definitions of such test and significant evidence will be published by the Administrator in the Federal Register.

The Administrator shall insure that pesticides shall be subject to the RPAR process only on the basis of a validated test or other significant evidence (and not on the basis of unsubstantiated claims), that the term "validated test" be defined as a test conducted and evaluated in a manner consistent with accepted scientific procedures, and that the term "other significant evidence" be defined as evidence that relates to the use of a pesticide and their adverse risk to man or to the environment. It is the intent of the *conferees* that "other significant evidence" of adverse risk means factually significant information and is not to include evidence based only on misuse of the pesticide.

Under the *conference* substitute, the Administrator is directed to notify in writing the registrant of a pesticide product under special review of the exact scope and nature of any alleged unreasonable adverse effects to human health or the environment, prior to initiating an RPAR process. Such notification will be by private communication and afford the registrant a reasonable opportunity to correct or clarify through the submission of data any such risk associated with its pesticide product. This in turn could obviate the need for an RPAR to issue. This notification process will furnish a greater degree of protection for the property rights of pesticide registrants and ameliorate the indictment-like characteristics of the RPAR process.

Human exposure to pesticides through any medium or pathway is a central issue in evaluating the unreasonable adverse effects of pesticide products. Where this issue can be resolved without an RPAR being initialed, it shall be.

To avoid the time-consuming RPAR process, the Administrator is therefore directed to establish suitable scientific protocols for the development of human exposure data; to work cooperatively with the registrants in the assembling and collection of such data; and then to evaluate and weigh such data prior to initiating an RPAR process. If humans or their environment are not at risk or the potential for exposure is minimal, the Administrator is directed to forego the RPAR process and proceed with the reregistration of the pesticide product.

13. CLASSIFICATION PRIOR TO REREGISTRATION

The *House* amendment provides that, if the Administrator determines to change a pesticide from general to restricted use, the Administrator shall notify the registrant at least *60 days* before making the change.

The *Senate* bill continues existing law, under which a registrant in such circumstances must be given at least *30 days* notice.

The *conference* substitute requires that the registrant receive *45 days* notice of a proposed change in classification of a pesticide from general use to restricted use.

14. CHANGE IN CLASSIFICATION FROM RESTRICTED USE TO GENERAL USE

The *House* amendment provides that a registrant of a pesticide with one or more uses classified for restricted use may petition the Administrator to change any such classification from restricted use to general use with the requirement that the petition establish that reclassification would not cause unreasonable adverse effects on the environment. It also requires that the Administrator act upon the petition within 60 days and, in case the petition is denied, provide the registrant an explanation of the denial. It also provides that any denial of the petition is subject to judicial review under section 16 of FIFRA.

The *Senate* bill contains no comparable provision.

The *conference* substitute adopts the *House* provision with a technical amendment authorizing the Administrator to classify pesticide uses by regulation on the initial classification.

15. AUTHORITY OF THE ADMINISTRATOR TO CERTIFY APPLICATORS

A. The *Senate* bill requires the Administrator, in consultation with the Governor of the State, to conduct a program for the certification of applicators of pesticides in any State for which a State plan for applicator certification had not been approved by the Administrator by *October 20, 1977.*

The *House* amendment contains the same provision, but requires the Administrator to conduct the program *only if it is practicable* for the Administrator to do so, and if the State plan had not been approved by *February 20, 1978.*

The *conference* substitute adopts the *Senate* provision authorizing the Administrator to certify applicators in any State without an approved plan with a modification deleting the cutoff date.

B. The *Senate* bill provides that prior to implementation of any Federal certification program, the Administrator must publish in the Federal Register, for review and comment, a summary of the Federal plan, make copies of the plan generally available in the State, and hold public hearings within the State if requested by the Governor.

The *House* amendment contains no comparable provision.

The *conference* substitute adopts the *Senate* provision.

C. The *House* amendment provides that the Federal certification program must conform to requirements for State plans for applicator certification imposed under the provisions of section 4(a)(2) of FIFRA and must not require the private applicator to take any examination to establish competency in the use of pesticides.

The *Senate* bill contains no comparable provision.

The *conference* substitute adopts the *House* provision.

16. FEDERAL COST SHARING

The *House* amendment requires, effective with the fiscal year beginning October 1, 1978, that the Administrator share with each State on an equal basis the cost to that State of conducting an applicator certification program.

The *Senate* bill contains no comparable provision.

The *conference* substitute amends section 23 of FIFRA to assist States in developing and administering State programs, and Indian tribes entering into cooperative agreements, for the training and certification of applicators consistent with standards prescribed by the Administrator. The *conference* substitute provides that effective with the fiscal year beginning October 1, 1978, there are authorized to be appropriated annually such funds as may be necessary for the Administrator to provide through cooperative agreements an amount equal to 50 percent of the anticipated cost to each State and Indian tribe, as agreed to under such cooperative agreement, of conducting training and certification programs. If funds sufficient to pay 50 percent of the costs for any year are not appropriated, the share of each State and Indian tribe will be reduced in a like proportion in allocating available funds.

17. ALTERNATIVE TO CANCELLATION

The *Senate* bill amends existing law with respect to cancellation of registrations by providing that, in taking final action to cancel or change the classification of a pesticide, the Administrator *may* consider restricting a pesticide's use or uses as an alternative to cancellation.

The *House* amendment provides that the Administrator *shall* consider restricting a pesticide's use or uses as an alternative to cancellation and fully explain the reasons for such restrictions.

The *conference* substitute adopts the *House* provision.

18. TRADE SECRETS—INFORMATION AVAILABLE FOR DISCLOSURE

A. The *Senate* bill provides that, with certain exceptions, all information concerning the objectives, methodology, results, or significance of any test or experiment performed on or with a registered or previously registered pesticide or its separate ingredients, impurities, or degradation products, and any information concerning the effects of such pesticide on any organism or the behavior of the pesticide in the environment, will be available for disclosure to the public.

The *House* amendment contains the same provision, but adds examples of data on the behavior of pesticides in the environment that will be disclosed, to include data on safety to fish and wildlife, humans and mammals, plants, animals, and soil, and studies on persistence, translocation and fate in the environment, and metabolism.

The *conference* substitute adopts the *House* provision.

B. The *House* amendment specifically provides that such data as are authorized for release to the public, if used for any registration purpose, will be subject to the exclusive use and compensation provisions added to existing law by the bill.

The *Senate* bill does not add such specific provision to FIFRA. However, the provisions in FIFRA dealing with data compensation, as amended by the *Senate* bill, do not exclude information released to the public from the requirement for compensation.

The *conference* substitute adopts the *House* provision.

19. TRADE SECRETS—PROCEDURE FOR RELEASE OF CERTAIN INFORMATION

A. Both the *Senate* bill and the *House* amendment provide that the authority to make information concerning tests and experiments performed on or with pesticides, their ingredients, impurities, and degradation products, the effects of pesticides on organisms, and the behavior of pesticides in the environment available to the public does not authorize the disclosure of any information that—

(1) discloses manufacturing or quality control processes,

(2) discloses the details of any methods for analyzing the quantity of deliberately added inert ingredients of pesticides, or

(3) discloses the identity or percentage quantity of any deliberately added inert ingredient of a pesticide.

The *House* amendment further provides that, if the Administrator proposes to disclose such information, the Administrator must notify, in writing and by certified mail, the submitter of information of the intent to release the information. The information may not be released, without the submitter's consent, until 30 days after notice is given. However, where the Administrator finds that the disclosure of such information is necessary to avoid or lessen an imminent and substantial risk of injury to the public health, he may set such shorter period of notice (but not less than 10 days) and use such method of notice as he finds appropriate.

The *Senate* bill contains no comparable provision requiring notification and waiting periods prior to release of such information.

The *conference* substitute adopts the *House* provision.

B. The *Senate* bill requires notification and a 30-day waiting period with respect to the disclosure at a public proceeding, if necessary in the public interest, of trade secret information concerning production, distribution, sale, or inventories of a pesticide.

The *House* amendment contains the same provision, but provides for a shorter waiting period, of not less than 10 days, if the Administrator finds that disclosure is necessary to avoid or lessen an imminent and substantial risk of injury to the public health.

The *conference* substitute adopts the *House* provision.

C. The *House* amendment further provides that during the waiting period for the release of (1) manufacturing and ingredient information and (2) information concerning production, distribution, sale, or inventories of a pesticide, any data submitter may institute an action in an appropriate Federal district court to enjoin or limit the proposed disclosure. The court is required to give expedited consideration to any such action and may enjoin disclosure or limit the disclosure or the parties to whom disclosure is made to the extent that—

(1) in the case of the manufacturing and ingredient information, the proposed disclosure is not required to protect against unreasonable risk of injury to health or the environment; or

(2) in the case of information concerning production, distribution, sale, or inventories of a pesticide otherwise entitled to confidential treatment, the public interest in availability of the information in the public proceeding does not outweigh the interests in preserving the information's confidentiality.

The *Senate* bill contains no comparable provision.

The *Conference* substitute adopts the *House* provision.

20. TRADE SECRETS—DISCLOSURE TO CONTRACTORS

A. The *Senate* bill authorizes the Administrator to disclose to contractors trade secret or commercial or financial information otherwise protected from disclosure under section 10(b) of FIFRA.

The *House* ammendment authorizes the Administrator to disclose to contractors information that is exempt from disclosure under the Freedom of Information Act as trade secrets or as commercial or financial information obtained from a person and that is privileged or confidential.

The *conference* substitute adopts the *Senate* provision.

B. The *Senate* bill provides that such disclosure may be made to contractors with the United States and employees of such contractors if, in the opinion of the Administrator, such disclosure is necessary for the satisfactory performance by the contractor of work under the contract in connection with FIFRA and under such conditions as the Administrator may specify.

The *House* amendment provides that such disclosure may be made to persons other than officers or employees of the Environmental Protection Agency if the Administrator determines that the person requires the information in connection with an activity (1) that is undertaken under contract with the Administrator, (2) that relates to the administration of FIFRA, and (3) with respect to which the Administrator (or an officer or employee of the agency) is not prohibited from using such information. The Administrator is required to ensure that persons receiving such information take such security precautions to protect the information as may be prescribed by regulation.

The *conference* substitute adopts the Senate provision with a modification to include the last sentence of the *House* provision requiring that persons receiving information take such security precautions to protect the information as prescribed by the Administrator in regulations.

21. TRADE SECRETS—PENALTY FOR DISCLOSURE BY FEDERAL EMPLOYEES

The *Senate* bill provides that the willful disclosure to unauthorized persons by present or former Government employees of information protected from disclosure by the trade secret provisions of FIFRA, as amended by the bill, with knowledge that the disclosure of the material is so prohibited, will be a misdemeanor, punishable by imprisonment for up to 1 year, or by a fine of not more than $5,000, or by both such imprisonment and fine.

The *House* amendment contains the same provision except that the maximum fine is set at $10,000.

The *conference* substitute adopts the *House* provision setting the maximum fine at $10,000 with a modification providing that nothing in FIFRA shall preempt any civil remedy under State or Federal law for wrongful disclosuse of trade secrets.

22. TRADE SECRETS—DISCLOSURE TO FOREIGN AND MULTINATIONAL PESTICIDE PRODUCERS

The *House* amendment provides that the Administrator may not knowingly disclose information submitted by an applicant or registrant under FIFRA to any employee or agent of any business or other entity engaged in the production, sale, or distribution of pesticides in countries other than the United States, or in addition to the United States, or to any other person who intends to deliver such data to such foreign or multinational business entity, unless consent is given for such disclosure. The Administrator must require written affirmation from persons inspecting data that they do not seek access thereto for the purpose of delivering it or offering it for sale to any such business or entity or its agents or employees, and that they will not purposefully deliver, or negligently cause such data to be delivered to such business or entity or its agents or employees. The provisions of 18 U.S.C. 1001—the false statement statute—apply to the affirmations signed by persons inspecting data. In addition, the Administrator must maintain records of persons to whom data are disclosed as well as their affiliations, and this information will be provided to the registrant.

The *Senate* bill contains no comparable provision.

The *conference* substitute adopts the *House* provision with a modification providing that the Administrator may disclose information to any person in connection with a public proceeding conducted under law or regulations, subject to restrictions on the availability of information that are provided elsewhere in FIFRA, which information is relevant to a determination by the Administrator with respect to whether a pesticide, or any ingredient of a pesticide, causes unreasonable adverse effects on health or the environment.

23. ENFORCEMENT RESPONSIBILITY—PESTICIDE USE VIOLATIONS

A. The *Senate* bill requires the Administrator to delegate to the States the primary responsibility for the enforcement of the provisions of FIFRA relating to pesticide use violations.

The *House* amendment contains a similar requirement, but also provides that, in order to qualify for this enforcement responsibility, a State must—

(1) have a State plan for State certification of pesticide applicators that is approved by the Administrator; or

(2) have pesticide use laws and regulations no less stringent than those under FIFRA, adopt and implement adequate procedures for the enforcement of State pesticide use regulations, and keep required records and make required reports, as determined by the Administrator.

Also, the *House* amendment specifically provides that if a State does not have enforcement responsibility, because it neither has an approved State plan nor meets the other qualifications, the Administrator will have enforcement responsibility in the State.

The conference substitute adopts the *House* provision with modifications that would change the criteria in section 26(a)(1) of FIFRA, as added by the *House* amendment, concerning State laws and regulations that would qualify a State for primary enforcement responsibility. Rather than requiring the State laws and regulations to be as stringent as FIFRA, they would be required to be adequate for enforcement purposes. Under this provision, the Administrator could not require State laws and regulations to be more stringent than FIFRA. The *conference* substitute would also provide primary enforcement responsibility to those States that have entered into cooperative enforcement agreements with the Administrator under section 23 of FIFRA. In addition, with respect to other States, there would be a rapid evaluation, to be completed no later than 6 months after the date of enactment of the *conference* substitute, of State applicator certification and training plans approved by the Administrator under section 4 of FIFRA. Those States that are determined to have section 4 plans adequate for enforcement purposes would also have primary enforcement responsibility for pesticide use violations.

The Administrator may not use the cooperative agreements entered into under section 23 of FIFRA to obtain dual enforcement responsibility with the States.

B. The *House* amendment provides that effective with the 1979 fiscal year, the Administrator is to bear half the costs incurred by States in meeting their primary enforcement responsibilities for pesticide use violations.

The *Senate* bill contains no comparable provision.

The *conference* substitute deletes the *House* provision.

C. The *House* amendment requires the Administrator to refer complaints of pesticide

use violations to appropriate State officials in States exercising primary enforcement responsibility. If the State does not act on the complaint within 30 days, the Administrator will be authorized to commence action on the complaint.

The *Senate* bill contains no comparable provision.

The *conference* substitute adopts the *House* provision with a modification so that the Administrator could enforce FIFRA on the basis of any complaint or other information alleging or indicating a significant violation of the pesticide use provisions of FIFRA, in the absence of action by the State within 30 days after such matter has been referred to the State.

The *conference* substitute also clarifies provisions of the *Senate* bill and *House* amendment under which the Administrator shall notify the State that has primary enforcement responsibility if he determines that the State is not carrying out its responsibility, to include explicitly those cases where the State authority cannot carry out its responsibility due to lack of adequate legal authority. Under the *conference* substitute, if the State does not correct a deficiency in 90 days, the Administrator may rescind, in whole or in part, the State's primary enforcement responsibility.

D. The *Senate* bill provides that nothing in section 14 of the bill shall limit the Administrator's authority to enforce FIFRA in situations in which the Administrator determines that conditions exist that require action by the Administrator.

The *House* amendment contains a similar provision, but states that nothing in section 26 of FIFRA will limit the Administrator's overriding authority to enforce FIFRA and restricts such authority to *emergency* situations that require *immediate* action.

The *conference* substitute provides that neither new section 26 nor 27 of FIFRA will limit the authority of the Administrator to enforce FIFRA, when he determines that emergency conditions exist that require immediate action on the part of the Administrator and the State authority is unwilling or unable adequately to respond to the emergency.

24. USE OF COOPERATIVE STATE EXTENSION SERVICES

The *Senate* bill *authorizes*, but does not mandate, the Administrator to use the cooperative State extension services to inform and educate pesticide users about accepted uses for pesticides and other regulations under FIFRA.

The *House* amendment *requires* the Administrator to use the services of the cooperative State extension services for the conduct of this educational program.

The *conference* substitute adopts the *House* provision. Under this provision, the Administrator would not be prevented from using services of agencies other than the cooperative State extension services in conducting educational programs under FIFRA.

25. REGULATIONS UNDER FIFRA

A. The *House* amendment adds a new requirement that regulations prescribed by the Administrator to carry out FIFRA must take into account the differences in environmental risk and the appropriate data for evaluating such risk between agricultural and nonagricultural pesticides. (The Administrator is required, under existing law, to take into account "the difference in concept and usage between various classes of pesticides".)

The *Senate* bill contains no comparable provision.

The *conference* substitute adopts the *House* provision. In order to accelerate the overall registration process, the Administrator should expedite efforts to establish appropriate safety, efficacy, and labeling guidelines, as well as appropriate hazard evaluation criteria to distinguish between agricultural and nonagricultural pesticides.

B. The *House* amendment requires the Administrator to take into account, in taking final action on regulations to carry out FIFRA, the effect of such final action on production and prices, of agricultural commodities, retail food prices, and otherwise on the agricultural economy. The Administrator is also required to publish simultaneously an analysis of this effect in the Federal Register.

The *Senate* bill contains no comparable provision.

The *conference* substitute adopts the *House* provision.

26. CONGRESSIONAL VETO OF REGULATIONS

The *House* amendment provides that no rule or regulation under FIFRA may become effective if (1) within 90 days of continuous session after the date of promulgation both Houses of Congress adopt a concurrent resolution of disapproval, or (2) within 60 calendar days of continuous session after the date of promulgation one House of Congress adopts such a concurrent resolution and such resolution is not disapproved within 30 calendar days of continuous session thereafter by the other House. If, within 60 calendar days of continuous session after the date of promulgation, no committee of either House has reported or been discharged from further consideration of a concurrent resolution of disapproval, the rule or regulation may go into effect immediately. The *House* amendment also provides that congressional inaction or rejection of a resolution of disapproval is not deemed an expression of approval.

The *Senate* bill contains no comparable provision.

The *conference* substitute deletes the *House* provision.

27. SCIENTIFIC ADVISORY PANEL

A. The *House* amendment requires the Administrator to solicit from the scientific advisory panel established under FIFRA comments, evaluations, and recommendations for operating guidelines to improve the effectiveness and quality of scientific analyses by Environmental Protection Agency personnel that lead to decisions by the Administrator. The comments, evaluations, and recommendations, and the Administrator's response, are to be published in the Federal Register.

The *Senate* bill contains no comparable provision.

The *conference* substitute adopts the *House* provision.

B. The *House* amendment authorizes the chairman of the scientific advisory panel to create temporary subpanels on specific projects to assist the full panel in expediting and preparing its evaluations, comments, and recommendations.

The *Senate* bill contains no comparable provision.

The *conference* substitute adopts the *House* provision.

C. The *Senate* bill extends the life of the scientific advisory panel to January 1, 1981.

The *House* amendment makes the panel permanent.

The *conference* substitute adopts the *Senate* provision with a modification extending the life of the scientific advisory panel to September 30, 1981.

D. The *House* amendment requires that the scientific advisory panel consult and coordinate its activities with the Science Advisory Board established under the Environmental Research, Development, and Demonstration Authorization Act of 1978.

The *Senate* bill contains no comparable provision.

The *conference* substitute adopts the *House* provision.

28. EFFECTIVE DATES

A. The *House* amendment extends from October 20, 1977, through April 20, 1978—

(1) the effective date for any requirements that may be imposed under FIFRA that a pesticide be registered for use only by a certified pesticide applicator; and

(2) the deadline for the completion of certification of pesticide applicators.

The *Senate* bill contains no comparable provision.

The *conference* substitute deletes the *House* provision.

B. The *House* amendment also eliminates the October 20, 1976, deadline for the submission to the Administrator of State plans for applicator certification programs.

The *Senate* bill contains no comparable provision.

The *conference* substitute adopts the *House* provision.

29. PROFESSIONAL OR COMMERCIAL APPLICATORS

A. The *Senate* bill amends FIFRA to establish "professional applicators" as a class of persons separate from "sellers" and 'distributors". (Professional applicators are now considered as sellers or distributors for the purposes of enforcing FIFRA.) Specifically, the *Senate* bill adds to section 2 of FIFRA a definition of "professional applicator" to mean an applicator who applies pesticides for hire: and amends other sections of FIFRA to make professional applicators subject to the unlawful acts provisions, the stop sale, use, or removal order provisions, and the criminal and civil penalties in FIFRA.

The *House* amendment contains no comparable provision, but adds to the definition of "certified applicator" in FIFRA a provision that any certified applicator who holds and applies pesticides only to provide pest control service without delivering unapplied pesticides to any person so served is not to be deemed a "seller" or "distributor". Commercial applicators would normally fit this exception. The *House* amendment also expands the definition of "commercial applicator" in FIFRA to include noncertified as well as certified applicators. This has the effect of expanding the coverage of the penalty provisions of FIFRA to all persons who apply restricted use pesticides commercially, not just applicators certified under FIFRA.

The *conference* substitute adopts the *House* provision with a modification in the sentence added to the definition of "certified applicator" in section 2(e)(1) of FIFRA to provide that any *applicator* who holds or applies *registered pesticides, or use dilutions of registered pesticides consistent with section 2(ee) of FIFRA*, only to provide a service of controlling pests without delivering any unapplied pesticide to any person so served, is not a "seller" or "distributor" of pesticides under FIFRA.

This has the effect of providing that if there is a violation of FIFRA by an applicator who holds or applies an *unregistered pesticide*, or a use dilution of any such pesticide, solely to provide a service of controlling pests without delivering any unapplied pesticide to any person so served, such person would be considered a distributor of pesticides and would be subject to the higher penalties set forth in sections 14(a)(1) and 14(b)(1) of FIFRA. Likewise, such persons who violate FIFRA while using pesticides registered for *restricted use* are considered commercial applicators and subject to the same higher penalties. Any such person who holds or applies a pesticide registered for *general use*, or a use dilution of a pesticide registered for general use, who violates FIFRA, would be subject to the lower penalties as set forth in sections 14(a)(2) and 14(b)(2) of FIFRA.

The *conference* substitute amends the civil penalties in section 14(b)(2). If there is a violation by a person who commercially applies a pesticide registered for general use, or use dilution of such pesticide, a civil penalty of up to $500 may be imposed for the first offense and up to $1,000 for each subsequent offense.

B. The *Senate* bill amends section 1(a) of FIFRA to authorize the Administrator, in any State where the Administrator conducts a certification program, to require professional applicators to maintain records and submit reports concerning professional applications of the pesticide as the Administrator may prescribe.

The *House* amendment, in States where the Administrator conducts a certification program, applies to commercial applicators the same recordkeeping and reporting requirements as the *Senate* bill imposes on professional applicators.

The *conference* substitute adopts the *House* provision.

C. The *Senate* bill amends sections 8(b) and 9(a) of FIFRA to permit the Administrator, in enforcing FIFRA, to inspect the books and records, and enter the premises, of professional applicators.

The *House* amendment in section 26(c) of FIFRA, as added by the bill provides that the Administrator does not have authority to inspect the books and records, and enter without a warrant the establishments, of commercial applicators under sections 8(b) and 9(a) of FIFRA, except when the Administrator, rather than the State, has primary enforcement authority with respect to the pesticide use provisions of FIFRA.

The *conference* substitute adopts the *House* provision with an amendment to section 26(c) of FIFRA to make clear that when the Administrator has primary enforcement authority, the Administrator may inspect the books and records and the establishments of applicators who apply pesticides or use dilutions of pesticides commercially, regardless of whether the pesticide is unregistered or registered for general use or restricted use. The *conference* substitute also makes clear that the pesticides held by such applicators that may be examined and sampled include pesticides mixed or developed by the applicator as well as unopened packages labeled by a registered producer. (This provision does not apply to private applicators.)

30. PESTICIDES AND DEVICES INTENDED FOR EXPORT

A. Both the *Senate* bill and the *House* amendment provide that pesticides, devices, and active ingredients used in producing pesticides, intended solely for export, will be subject to the provisions of section 2(q) of FIFRA, which, as amended by the bill, states that a pesticide is to be considered "misbranded" if any of the 12 misbranding situations described in section 2(q) occur.

The *Senate* bill applies all 12 of the misbranding situations in section 2(q) to these export items.

The *House* amendment, which is to become effective 180 days after date of enactment, applies only some of the misbranding situations to export items.

The misbranding situations covered by both the *Senate* bill and the *House* amendment are as follows:

(1) false representations on the label;

(2) the pesticide is an imitation of another pesticide;

(3) the label of the pesticide does not bear the registration number of the establishment in which it was produced;

(4) if the pesticide is not registered under FIFRA and intended for export, the label does not contain a conspicuous statement that the pesticide is not registered for use in the United States;

(5) the label does not contain an ingredient statement;

(6) the container does not bear a label providing the name and address of the producer, the name, brand, or trademark under which the pesticide is sold, the net weight or measure of the contents of the container, and the registration number assigned to the pesticide, except that the *House* amendment does not require inclusion on such label of the name, brand, or trademark, or the registration number; and

(7) if the pesticide is highly toxic, the label does not bear the skull and crossbones, and the word "poison" in red, and an antidote.

The *House* amendment does not include the following situations:

(8) the pesticide is not contained in a package conforming to the Administrator's standards (which are to be consistent with those established under the Poison Prevention Packaging Act);

(9) the statements on the pesticide's label required by FIFRA are not conspicuous and in terms as making them likely to be read and understood by the ordinary individual;

(10) the label does not contain directions for use;

(11) the label does not contain necessary warning or caution statements; and

(12) the label does not contain a statement of use classification ("general use" or "restricted use") under which the product is registered (except that in the case of a pesticide not registered under section 3 and intended for export both the *Senate* bill and *House* amendment provide as stated in item A (4) above).

The *conference* substitute adopts the *House* provision with a modification to include three of the "misbranding" situations included only in the *Senate* bill as follows:

(1) the statements on the pesticide's label required by FIFRA are not conspicuous and in terms as making them likely to be read and understood by the ordinary individual:

(2) the label does not contain necessary warning or caution statements; and

(3) the label does not contain a statement of use classification ("general use" or "restricted use") under which the pesticide is registered.

B. The *House* amendment adds a provision to FIFRA, effective 180 days after the date of enactment, requiring foreign purchasers of unregistered pesticides to sign, prior to export, a statement that they understand that the pesticide is not registered for use in the United States and cannot be sold in the United States under FIFRA. A copy of the statement must be transmitted to an appropriate official of the government of the importing country.

The *Senate* bill contains no comparable provision.

The *conference* substitute adopts the *House* provision.

C. The *House* amendment expands the notification required to be sent to governments of other countries of the cancellation or suspension of a pesticide registration to include, upon request (1) all information related to the cancellation or suspension, and (2) information on registered pesticides that might be used as a substitute for the canceled or suspended pesticide.

The *Senate* bill contains no comparable provision.

The *conference* substitute adopts the *House* provision.

31. AUTHORIZATION OF APPROPRIATIONS FOR FISCAL YEAR 1979

The *Senate* bill authorizes appropriations to carry out FIFRA for fiscal year 1979. The appropriation is set at not to exceed $70 million.

The *House* amendment contains no comparable provision.

The *conference* substitute adopts the *Senate* provision.

32. STUDY OF MINOR USES OF PESTICIDES NOT SPECIFICALLY PERMITTED BY LABELING

The *House* amendment requires the Administrator to submit an updated study examining the problems of minor uses of pesticides not specifically permitted by labeling. Not later than 9 months after the date of enactment of the bill, the study is to be completed and submitted, with recommendations for the implementation of the findings, to the agriculture committees of Congress.

The *Senate* bill contains no comparable provision.

The *conference* substitute adopts the *House* provision.

33. REVISION OF THE TABLE OF CONTENTS

The *Senate* bill revises the table of contents of FIFRA.

The *House* amendment contains no comparable provision.

The *conference* substitute adopts the *Senate* provision with necessary conforming changes.

34. PROVISIONS RELATING TO "PESTS"

A. The *House* amendment adds a new section 28 to FIFRA requiring the Administrator, in coordination with the Secretary of Agriculture, to establish and maintain a list of pests in order of priority that need to be brought under control to assure improved agricultural production. The list is to be organized by agricultural product and geographic area. The Administrator is also required to coordinate and cooperate with the research and implementation programs of the Secretary of Agriculture to develop and improve the safe use and effectiveness of chemical, biological, and alternative methods of controlling pests that reduce the quality and economical production and distribution of agricultural products.

The *Senate* bill contains no comparable provision.

The *conference* substitute adopts the *House* provision with a modification to provide that the Administrator, in coordination with the Secretary of Agriculture, shall identify those pests that must be brought under control.

B. The *House* amendment amends the definition of "pest" to mean any form of plant or animal life, or virus, bacteria, or other microorganism that (1) is injurious to food or agricultural production, processing, storage, or transportation, or to health or the environment, and (2) the Administrator, after coordination with the Secretary of Agriculture, establishes as a pest under new section 28 (list of pests).

The *Senate* bill retains existing law under which the term "pest" means any such life form that is (1) injurious to health or the environment and (2) declared by the Administrator to be a pest.

The *conference* substitute deletes the *House* provision.

35. DEFINITION OF PRODUCER

The *House* amendment provides that the dilution by individuals of a formulated pesticide for their own use and according to the directions on registered labels will not of itself result in those individuals being included in the definition of "producer" of pesticides.

The *Senate* bill contains no comparable provision.

The *conference* substitute adopts the *House* provision.

36. EXPERIMENTAL USE PERMITS

A. The *House* amendment amends section 5 of FIFRA, which provides for the issuance of experimental use permits. Provisions are added to section 5 requiring the Administrator to review applications, and, not later than 90 days following receipt of an application and supporting data, either to issue the permit or notify the applicant that the application is being denied and supply the reasons for the denial. Also, provisions are added allowing an applicant to correct the application or request a waiver of conditions for the permit within 30 days of receipt of the Administrator's notification. Finally, the *House* amendment amends provisions of existing law that authorize issuance of an experimental use permit if the Administrator determines that the applicant needs the permit to obtain information necessary to register the pesticide, so as to make it clear that

an experimental use permit may be issued *only* if the Administrator makes such a determination.

The *Senate* bill contains no comparable provision.

The *conference* substitute adopts the *House* provision with a modification to extend from 90 days to 120 days the time for the Administrator to act on applications for experimental use permits.

B. The *House* amendment *requires* the Administrator, under such terms and conditions as the Administrator prescribes by regulation, to authorize States to issue experimental use permits for pesticides.

The *Senate* bill retains existing law under which this provision is permissive rather than mandatory.

The *conference* substitute adopts the *House* provision.

37. INSPECTION OF BOOKS AND RECORDS

The *House* amendment requires Environmental Protection Agency employees or officers, undertaking to inspect the books and records of establishments pursuant to section 8(b) FIFRA, to present to the owner, operator, or agent in charge of the establishment appropriate credentials and a written statement as to whether a violation of law is suspected. If no violation of law is suspected, an alternate and sufficient reason is to be given in writing for the inspection. Each inspection must be commenced and completed promptly.

The *Senate* bill contains no comparable provision.

The *conference* substitute adopts the *House* provision.

38. UNLAWFUL ACTS—SALE OF RESTRICTED USE PESTICIDES

The *House* amendment provides that the sale of a restricted use pesticide to a person who is not a certified applicator for application by a certified applicator is not illegal.

The *Senate* bill contains no comparable provision.

The *conference* substitute adopts the *House* provision with a modification to provide that the sale of restricted use pesticides to uncertified persons may be made only "under regulations issued by the Administrator".

39. DISPOSAL OF PESTICIDES

The *House* amendment requires the Administrator to include specific provisions for the disposal of unused quantities of a pesticide in the notification of cancellation of any pesticide.

The *Senate* bill contains no comparable provision.

The *conference* substitute adopts the *House* provision. The *conferees* intend that costs for disposal of the canceled pesticides not be borne by the Federal Government.

40. PESTICIDE RESEARCH

The *House* amendment requires the Administrator to coordinate research necessary to carry out the purposes of FIFRA with the Secretary of Agriculture, who shall give priority to research to develop biologically integrated alternatives for pest control.

The *Senate* bill retains existing law requiring the Administrator to give priority to research to develop biologically integrated alternatives for pest control.

The *conference* substitute provides that the Administrator will be required to conduct research into integrated pest management in coordination with the Secretary of Agriculture. The *conferees* consider that integrated pest management is the balanced use of such measures, cultural, biological, and chemical, as are most appropriate to a particular situation in the light of careful study of all the factors involved.

41. MONITORING ACTIVITIES

The *House* amendment amends monitoring requirements in existing law to require the Administrator to establish procedures for monitoring man, animals, and their environment for incidental pesticide exposure, including procedures for quantification of incidental human and environmental pesticide pollution and the secular trends thereof, and the identification of sources of contamination and their relationship to human and environmental effects.

The *Senate* bill contains no comparable provision.

The *conference* substitute deletes the *House* provision.

42. SOLICITATION OF COMMENTS

The *House* amendment requires the Administrator to solicit the views of the broad scientific community at an early stage of the Administrator's decisionmaking process in connection with any cancellation, suspension, or other action authorized under FIFRA.

The *Senate* bill contains no comparable provision.

The *conference* substitute deletes the *House* provision. Insofar as practicable and consistent with existing law, the *conferees* intend that the Administrator solicit the views of the scientific community at an early stage in the decisionmaking process. The *conferees* are of the opinion that the Environmental Protection Agency will be greatly aided by the wide range of scientific expertise that exists outside the Agency.

43. AUTHORITY OF STATES—PESTICIDES FORMULATED FOR DISTRIBUTION AND USE WITHIN A STATE

A. The *House* amendment modifies provisions of FIFRA that authorize the States to regulate the sale or use of pesticides and devices in the State, to restrict the authority to *federally registered* pesticides and devices.

The *Senate* bill contains no comparable provision.

The *conference* substitute adopts the *House* provision.

B. The *House* amendment changes the term "labeling" in section 24(b) of FIFRA to "label". The terms "labeling" and "label" are separately and differently defined in FIFRA.

The *Senate* bill contains no comparable provision.

The *conference* substitute deletes the *House* provision.

C. The *House* amendment repeals the condition in existing law that a State must be certified by the Administrator as capable of exercising adequate control over pesticides before the State can register pesticides formulated for distribution and use within the State to meet special local needs.

The *Senate* bill retains provisions of existing law.

The *conference* substitute provides in lieu of existing law that if the Administrator finds in accordance with standards set forth in regulations issued under section 25 of FIFRA that a State is not capable of exercising adequate controls to assure that such registration will be in accord with the purposes of FIFRA or has failed to exercise adequate controls, the Administrator may suspend the authority of the State to register pesticides until such time as the Administrator is satisfied that the State can and will exercise adequate controls. Prior to any such suspension, the Administrator will advise the State of the Administrator's intention to suspend and the reasons therefor and provide the State time to respond.

D. The *House* amendment provides that a State shall not be prohibited from registering ingredients or uses that are undergoing benefit-risk evaluation prior to a decision by the Administrator to cancel, suspend, or not to reregister. The *House* amendment also deletes provisions of existing law providing that distribution and use of a pesticide registered for special local needs within a State shall not be effective for more than 90 days if disapproved by the Administrator within that period.

The *Senate* bill contains no comparable provision.

The *conference* substitute provides that a registration issued by a State under section 24(c) of FIFRA will not be effective for more than 90 days if disapproved by the Administrator within that period. Prior to disapproval, the Administrator will advise the State of the Administrator's intention to disapprove and the reasons therefor, and provide the State time to respond.

The Administrator may not prohibit or disapprove a registration issued by a State on the basis of lack of essentiality of a pesticide, or if its composition and use patterns are similar to those of a federally registered pesticide. State registrations involving changed use patterns—changes from nonfood to food use, outdoor to indoor use, terrestrial to aquatic use, and nondomestic to domestic use—are considered by the *conferees* as not involving similar uses and thus subject to disapproval of the Administrator within a 90-day period. Other State registrations of federally registered pesticides will be considered as being similar in use and composition patterns to those of federally registered pesticides, except to the extent that the Administrator determines that they are not similar in accordance with standards that are set forth in regulations issued under section 25 of FIFRA after notice to the congressional agriculture committees, the United States Department of Agriculture, and the scientific advisory panel.

Notwithstanding the foregoing provisions, in no instance may a State issue a registration for a food or feed use unless there exists a tolerance or exemption under the Federal Food, Drug, and Cosmetic Act that permits the residues of the pesticide on the food or feed. If the Administrator determines that a registration issued by a State is inconsistent with the Federal Food, Drug, and Cosmetic Act, or the use of a pesticide under a registration issued by a State constitutes an imminent hazard, he may immediately disapprove the registration.

## PERMISSION FOR COMMITTEE ON THE JUDICIARY TO MEET TOMORROW AND THURSDAY DURING 5-MINUTE RULE

Mr. DANIELSON. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary may meet tomorrow and Thursday, September 13 and 14, 1978, notwithstanding the 5-minute rule.

The SPEAKER pro tempore. Is there

objection to the request of the gentleman from California?

Mr. ROUSSELOT. Mr. Speaker, I reserve the right to object.

Mr. Speaker, could the gentleman from California restate the necessity for meeting during the 5-minute rule when we have such important legislation before us on the floor tomorrow?

Mr. DANIELSON. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from California.

Mr. DANIELSON. Mr. Speaker, we have a backup of several rather important bills in the Judiciary Committee and it is becoming impossible to meet the tight schedule.

Among them are the Federal Tort Claims Act amendments, the Olympic games bill, the Tris bill. That is three that occur to me as I stand here.

There seems to be no way that we are going to be able to consider these unless we are going to have a chance to meet during the 5-minute rule.

Mr. ROUSSELOT. Mr. Speaker, further reserving the right to object, why is that the Committee on the Judiciary has not been able to handle these bills prior to this time?

Mr. DANIELSON. Because we have not had the opportunity to meet and to go into these bills for a number of weeks.

My understanding is that I know that there has been other business considered by the committee, but these we have not been able to take up.

I will respond to any other questions. I thought I had answered the pending question.

Mr. BEARD of Tennessee. Mr. Speaker, further reserving the right to object, in other words we are talking about the possibility of three or so more bills that will be coming out of the Committee on the Judiciary, is that correct? I thought the Committee on Rules had closed up shop.

We have got CETA, we have got all these other bills. When on Earth are we going to get around to these?

Mr. DANIELSON. Will the gentleman yield?

Mr. BEARD of Tennessee. Yes, certainly.

Mr. DANIELSON. We have a few bills which seem to be of great importance to some of the Members, at least they have contacted me and have asked when we are going to move them out.

I know there was a little bit of noise on the floor when I mentioned the bills that had occurred to me that needed attention and perhaps the gentleman from Tennessee might not have heard them and might be interested in say the Tris bill involving the treatment of fabrics which has resulted in a number of textile mills being compelled to close down their production. Then there is the bill regarding the Olympic games. I am sure the gentleman knows that we are reorganizing the Olympic Games Committee. That is one of the bills, and there are others such as the Federal Tort Claims Act amendments, and there are others and, as I stand here, as I say, I do not remember all of them, but those are the three principal bills.

Mr. ASHBROOK. Mr. Speaker, further reserving the right to object, and I am going to object, but I want to tell you in advance why I am going to object, Mr. Speaker, we were in session last night until 11:30 or later. We have a backlog, there are all sorts of discussions going on on the floor, there are Members here talking about adjournment on the 20th of October. I do not think any of these bills are of such character that they cannot wait until next year.

Mr. McCLORY. Mr. Speaker, will the gentleman yield?

Mr. ASHBROOK. Certainly I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Speaker, I was wondering if the request were made that we sit until 12 o'clock noon in order that the committee might consider the Olympic games sports bill, so that would enable us perhaps to complete action on that bill.

I am convinced that we will never get through the whole list of bills on the agenda, but if the gentleman would make his request in that way, and if the gentleman from Ohio would not feel constrained to object, then I think we might be able to continue work of the Committee on the Judiciary until noon and yet be here for amendments on the civil service reform bill.

Mr. DANIELSON. Mr. Speaker, if the gentleman will yield further, I think I heard the request of the gentleman from Illinois (Mr. McCLORY), but I am not sure that I did. Was the request of the gentleman that I change my request that we be permitted to sit until 12 o'clock noon?

Mr. McCLORY. Yes.

Mr. DANIELSON. Then, Mr. Speaker, I would amend my request and ask unanimous consent that we be permitted to meet until 12 o'clock noon on tomorrow and Thursday.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mr. ASHBROOK. Mr. Speaker, further reserving the right to object, it is my understanding that the civil service reform bill will be up tomorrow morning. That was the order of the business as I understood it at about midnight last night when we left here on Monday. I have the greatest admiration for my hardworking friend and colleague, the gentleman from Illinois (Mr. McCLORY), but if that bill is going to come up tomorrow, I am constrained to object and I do object.

The SPEAKER pro tempore. The Chair will state that it takes 10 Members to object, and the objectors will have to remain standing until counted.

An insufficient number have arisen.

Therefore, the request is granted.

Mr. ASHBROOK. Mr. Speaker, I appeal the ruling of the Chair.

The SPEAKER pro tempore. The Chair will state that no appeal is in order in a matter of this kind.

## TRANSFER OF U.S. REAL PROPERTY TO DISTRICT OF COLUMBIA REDEVELOPMENT LAND AGENCY

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 3119) to transfer certain real property of the United States to the District of Columbia Redevelopment Land Agency, and to consider this Senate bill in lieu of H.R. 13224, a similar bill, which is on the list of District of Columbia bills to be considered today, and I also ask unanimous consent that the Senate bill be considered in the House as in the Committee of the Whole.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the requests of the gentleman from California?

There was no objection.

The Clerk read the Senate bill, as follows:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That in accordance with the provisions of this Act, the Mayor of the District of Columbia, consistent with the approval by the Council of the District of Columbia of the urban renewal plan requiring such action, is authorized and directed on behalf of the United States to transfer to the Redevelopment Land Agency all right, title, and interest of the United States in and to the following real property in the District of Columbia:

A tract of land known for the purposes of assessment and taxation as lot 803 in square 493 and described as follows:

Beginning for the same at a point in the west line of Fourth Street Southwest, 269.0 feet south of the south line of C Street Southwest, and running thence due south, with said west line of Fourth Street Southwest, 169.34 feet;

thence northwesterly 603.44 feet to the east line of Sixth Street Southwest;

thence, with said east line of Sixth Street Southwest due north 20.75 feet;

thence southeasterly 201.17 feet;

thence due east 374.0 feet to the point of beginning, containing 40,927.75 square feet, all as shown on a plat survey recorded in the Office of the Surveyor for the District of Columbia in survey book 18 at page 91.

SEC. 2. The Redevelopment Land Agency is hereby authorized in accordance with the District of Columbia Redevelopment Act of 1945 (D.C. Code, secs. 5–701 through 5–719), to lease or sell, as an entirety or parts thereof separately, to one or more redevelopment companies or other lessees or purchaser, such real property as may be transferred to such Agency under the authority of this Act.

SEC. 3. No transfer or donation of any interest in real property under the authority of this Act shall constitute a local grant-in-aid connection with any urban renewal project being undertaken with Federal assistance under title I of the Housing Act of 1949, as amended.

SEC. 4. As used in this Act, the terms "lessee", "purchaser", "real property", and "redevelopment company" shall have the respective meanings provided for such terms by section 3 of the District of Columbia Redevelopment Act of 1945 (D.C. Code, sec. 5–702).

## GENERAL LEAVE

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent that all Members

may be permitted to revise and extend their remarks on the Senate bill presently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. DELLUMS. Mr. Speaker, I move to strike the last word.

Mr. Speaker, the bill authorizes the mayor to transfer title of a parcel of land adjacent to the Southwest Urban Renewal Project Area C to the D.C. Redevelopment Land Agency (RLA). The fee simple title is currently held by the United States.

The parcel, once an abandoned lot, was part of a larger parcel of land that was granted use by the United States to the surrounding railroads for work and storage areas in consideration for the exchange and transfer to the United States of certain lands then owned by the railroads. The railroads paid taxes to the District Government.

In view of the value of the land which the railroads transferred to the United States for the right to use the parcels in question, it was the opinion of the Government's appraisers that the value of the railroad's rights and interests in the parcels was equivalent to the value of the land had the legal title been held by the railroads.

The urban renewal plan for Southwest Project Area C requires that the RLA acquire these lands for commercial development. The RLA acquired the right and interests in the property from the railroads in 1970, but the United States still holds title. No development can occur until the United States transfers title to the District of Columbia.

The triangular-shaped property between 4th and 6th Streets SE., is surrounded by a public street on one side, a railroad on the second side, and an RLA parcel on the third side. The only appropriate use of the land is to develop it with the adjacent RLA parcel.

A development proposal for the parcel described and adjacent parcels includes an office building, parking facility, and motel for a cost of $40 to $50 million. Construction could commence this fall if the bill is passed.

In short, this is a pro forma transfer of title. The Federal Government has already received full value for its interests. The bill passed the House the last Congress by a unanimous vote.

Mr. Speaker, I yield to my distinguished colleague, the gentleman from Connecticut (Mr. McKINNEY), the ranking member of the committee.

Mr. McKINNEY. Mr. Speaker, I rise in support to S. 3119 and urge its adoption. S. 3119 involves transfer of bare legal title of a small triangular parcel of land in southwest Washington from the United States to the District of Columbia Redevelopment Land Agency. This land, and the land adjacent to it, was originally controlled by two railroad companies which subsequently sold the adjacent land and all rights and interest in the subject properties to the District of Columbia Redevelopment Land Agency.

The urban renewal plan for Southwest Project Area C calls for this land to be acquired by the RLA and sold or leased to private enterprise for development. However, without legal title to this particular piece of land this goal cannot be accomplished.

Because the land is of a triangular shape and is bordered by RLA property on one side, a sheer drop to the street on another side, and the railroad on the third side, the only appropriate way to use the land appears to be a use in conjunction with the other RLA property.

The District government testified that, given legal title, construction could begin almost immediately on this site. The planned development is to include motel facilities and office and parking space.

I would also assure my colleagues that transfer of title to the land would result in no costs to be incurred by either the District or Federal Governments. In fact, upon disposal, the city will receive from the private developer the full market value of the land, and the land will be put back on the city tax rolls.

● Mr. DIGGS. Mr. Speaker, the purpose of the bill (S. 3119)—which was requested by the mayor of the District of Columbia—is to direct the mayor to transfer title to certain real property in southwest Washington, between fourth and Sixth Streets, just north of the railway tracks, from the United States to the District of Columbia Redevelopment Land Agency (RLA). The RLA intends to sell or lease the land to a developer in accordance with the urban renewal plan for Southwest project area C.

Currently, a development proposal for the parcel described, and adjacent parcels, includes the building of a major office building, a parking facility, and a large motel, which is projected to cost between $40 and $50 million. A developer has been selected for this project, who advises that construction could commence on the project in the fall of 1978, depending upon the transfer of title to the parcel described in the bill.

The origin of this property goes back to the so-called "Union Station Acts" of Congress, approved on February 12, 1901 (31 Stat. 767) and on February 29, 1903 (32 Stat. 909), by which certain public streets in Southwest Washington were vacated and abandoned, and perpetual use of these areas was granted by the United States to the Philadelphia, Baltimore & Potomac Railroad Co., the Baltimore & Ohio Railroad Co., and the Terminal Co., in consideration for the exchange and transfer to the United States of certain lands in the District then owned by the railroads. When granting the uses referred to, the United States, however, retained title to the lands.

For many years, these lands were used by the railroads for such purposes as switch tracks, loading platforms, open air storage, truck-loading areas, and produce scales. During this time, the railroads paid taxes on these lands to the District of Columbia.

The RLA, under the urban renewal plan for Southwest Project Areas C, acquired the railroads' rights and interests in the subject property by negotiation in 1970 for $451,300. However, it is still necessary for the RLA to obtain the title to this property, now held by the United States.

When the RLA disposes of the land for private redevelopment, it will receive from the redeveloper the full fair market value of the land, thus compensating the government for the cost of acquiring the railroads' rights and interests. The property described in this bill is 41,000 square feet, and the property is adjacent to 145,000 square feet of property already held by the RLA.

Passage of S. 3119 by the Congress in order to enable transfer of title to the property in question is necessary, since it concerns property of the United States. While the Council of the District of Columbia has already approved an urban renewal plan which authorizes the RLA to dispose of the subject property (once title is acquired), the Council under section 602(c)(3) of the Home Rule Act is powerless to legislate as to property of the United States.

No expressions in opposition to the legislation have been received by the committee, at the hearings in the 94th and in the present Congress.

The departmental reports in support of the legislation are set forth in the committee report.

A similar bill (H.R. 9958) was passed by the House in the last Congress by a recorded vote of 341 to 0, but was not reached for action in the other body before adjournment.

The enactment of S. 3119 will involve no added costs to the Federal Government.●

Mr. DELLUMS. Mr. Speaker, I move the previous question on the Senate bill.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. ASHBROOK. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 354, nays 1, not voting 77, as follows:

[Roll No. 760]

The Clerk announced the following pairs:

Mr. Mitchell of Maryland with Mr. Wiggins.
Mr. Zeferetti with Mr. Stump.
Mr. Addabbo with Mr. Sarasin.
Mr. Richmond with Mr. Hansen.
Mr. Rostenkowski with Mr. Frey.
Mr. Stratton with Mr. Armstrong.
Mr. Waggonner with Mr. Brown of California.
Mr. Phillip Burton with Mr. Caputo.
Mrs. Chisholm with Mr. Del Clawson.
Mr. Breaux with Mr. Kasten.
Mr. Ammerman with Mr. Johnson of Colorado.
Mr. Ashley with Mr. Cochran of Mississippi.
Mr. Ireland with Mr. Dickinson.
Ms. Mikulski with Mr. Fish.
Mr. Murphy of New York with Mr. Leggett.
Mr. Tsongas with Mr. Livingston.
Mr. Teague with Mr. Long of Maryland.
Mr. St Germain with Mr. Thornton.
Mr. Rodino with Mr. Ruppe.
Mr. Risenhoover with Mr. Rudd.
Mr. Fuqua with Mr. Quie.
Ms. Holtzman with Mr. Vander Jagt.
Mr. Beard of Rhode Island with Mr. Young of Alaska.
Mr. Barnard with Mr. Whitten.
Mrs. Burke of California with Mr. Milford.
Mr. Byron with Mr. Fraser.
Mr. Delaney with Mr. Burke of Florida.
Mr. Fary with Mr. Brown of Ohio.
Mr. Conyers with Mr. Gibbons.
Mr. Diggs with Mr. Hubbard.
Mr. LaFalce with Mr. Meeds.
Mr. Garcia with Mr. Pritchard.
Mr. Charles H. Wilson of California with Mr. Scheuer.
Mr. D'Amours with Mr. Lehman.
Mr. Flowers with Mr. Huckaby.
Mr. Miller of California with Mr. Harrington.
Mrs. Schroeder with Mr. Krueger.
Mr. Stokes with Mr. Lundine.

So the Senate bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

A similar House bill (H.R. 13224) was laid on the table.

## HOME RULE CHARTER AMENDMENTS

Mr. DELLUMS. Mr. Speaker, by direction of the Committee on the District of Columbia, I call up the bill (H.R. 12116) to amend the District of Columbia Self-Government and Governmental Reorganization Act to repeal the authority of the President to sustain vetoes by the Mayor of the District of Columbia of acts passed by the Council of the District of Columbia and repassed by two-thirds of the Council, to change the period during which acts of the Council of the District of Columbia are subject to congressional review, and for other purposes, and ask unanimous consent that the bill be considered in the House as in the Committee of the Whole.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the District of Columbia Self-Government and Governmental Reorganization Act is amended as follows:

(1) Subsection (e) of section 404 is amended—

(A) in the fourth sentence, by striking out the period and inserting in lieu thereof "unless the Council by a recess of 10 days or more prevents its return, in which case it shall not become law."; and

(B) by striking out "be transmitted by the Chairman" in the fifth sentence and all that follows in such subsection and inserting in lieu thereof "become law subject to the provisions of section 602(e).".

(2) Section 602(c)(1) is amended—

(A) in the first sentence—

(i) by striking out "(and with respect to which the President has not sustained the Mayor's veto)";

(ii) by striking out "and every" and inserting in lieu thereof "each"; and

(iii) by striking out the period and inserting in lieu thereof ", and each initiated act and act subject to referendum which has been ratified by a majority of the registered qualified electors voting on the intiative or referendum."; and

(B) in the second sentence, by striking out "either House is not in session" and inserting in lieu thereof "neither House is in session because of an adjournment sine die, a recess of more than 3 days, or an adjournment of more than 3 days".

(3) Amendment No. 1 (relating to initiative and referendum) to title IV (the District Charter) is amended—

(A) by striking out sections 5 and 6 and inserting in lieu thereof the following:

"SEC. 5. If a majority of the registered qualified electors voting in a referendum approve an act or adopt legislation by initiative, then the adopted initiative or the act approved by referendum shall be an act of the Council upon the certification of the vote on such initiative or act by the District of Columbia Board of Elections and Ethics, and such act shall become law subject to the provisions of section 602(c).."; and

(B) by redesignating sections 7 and 8 as sections 6 and 7, respectively.

(4) Section 412(a) is amended by inserting "(other than an act to which section 446 applies)" in the third sentence after "Each proposed act".

SEC. 2. (a) Except as provided in subsection (b), the amendments made by this Act shall take effect on the date of the enactment of this Act.

(b)(1) The amendment made by subparagraph (A) of paragraph (1) of the first section of this Act shall apply with respect to acts of the Council of the District of Columbia presented to the Mayor of the District of Columbia after the date of the enactment of this Act.

(2) The amendment made by subparagraph (B) of paragraph (2) of the first section of this Act shall apply with respect to acts of the Council of the District of Columbia transmitted by the Chairman of the Council to the Speaker of the House of Representatives and the President of the Senate under section 602(c) of the District of Columbia Self-Government and Governmental Reorganization Act after the date of the enactment of this Act.

GENERAL LEAVE

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent that all Members may be permitted to revise and extend their remarks on the bill before the House.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. DELLUMS. Mr. Speaker, I move to strike the last word.

Mr. Speaker, the purpose of the bill (H.R. 12116) is to amend the Home Rule Act in order: First, to grant the Mayor authority to exercise a pocket veto; second, to repeal Presidential review of Council acts vetoed by the Mayor and overridden by the Council; third, to shorten and make more predictable the congressional-review period for acts passed by the Council; fourth, to conform the newly enacted referendum and initiative process to the congressional review procedures; and fifth, to increase the Council's review period for budget acts.

After 3 years of home rule it has become apparent that certain sections of the charter work unreasonable hardships on the city or are unnecessary. Many of the problem areas were discussed during meetings of the President's Task Force on the District of Columbia. Vice President MONDALE, the Task Force Chairman, stated that the administration wanted to reduce or eliminate Federal intrusion in local decisions. Among the recommendations were eliminating the Presidential veto and shortening the congressional review period.

CONGRESSIONAL REVIEW PERIOD

At present, only those days when both Houses of Congress are in session are counted in the review period, making the effective layover time an average of 60 days. One Council act took 7 months to become law. The bill provides that days when either House is in recess for less than 3 days may be counted, thus making the process more predictable.

ELIMINATING PRESIDENTIAL VETO

The precedent for including the Presidential veto in the Home Rule Act, according to testimony presented by Council Chairperson Tucker, was that at one time the President did have the power to sustain a veto of territorial Governors who were Presidential appointees. However, the President no longer has this power over territories with an elected government. The committee agreed with the task force and city officials that this provision should be eliminated for the District of Columbia.

MAYOR'S POCKET VETO

Under the Home Rule Act, the Mayor has 10 days in which to approve or disapprove a Council bill. If the Council adjourns prior to the expiration of that review time, a Council bill automatically becomes an act. This is contrary to Federal law and laws in Maryland and Virginia, wherein no bill can become law without the President's or Governor's signature. The committee agreed with the Mayor's request for pocket veto power to reduce the large number of bills sent to him by the Council during the last days of a legislative session when insufficient review time remains for thorough review by him, and to respond to the Legislative Counsel's opinion on the status of bills that become acts without the Mayor's signature.

COUNCIL'S REVIEW OF BUDGET

Another problem of timing involves the Council's consideration of the Mayor's budget. Section 446 of the charter requires the Council to adopt the budget by act. The effect of this is to reduce the 50-day budget review period to approximately 36 days since an act must have two votes held 13 days apart. The committee agreed with Council testimony that this is insufficient time to review complex legislation. H.R. 12116 eliminates the requirement for a second reading, thereby giving the Council an additional 13 days review time.

INITIATIVE AND REFERENDUM

Charter amendment No. 1 (approved by the Congress on March 10, 1978) allows a majority of the voters of the District of Columbia to approve an act by referendum or adopt an act by initiative. Such acts are considered acts of the Council and are subject to the Congressional review process of section 602(c) of the Home Rule Act. H.R. 12116 conforms the charter amendment to the Home Rule Act.

Mr. McKINNEY. Mr. Speaker, I move to strike the last word.

Mr. Speaker, I would simply say to the gentleman from Maryland that actually the great length of time now sort of subverts the review period process of Congress, because the City Council has a right to pass 90-day emergency legislation, which is what they have been doing, which does not come to us for review.

Mr. Speaker, H.R. 12116 presents us with an opportunity to reflect on the experience of the District Government to date with the procedures set up by the Home Rule Act in 1973, and in taking account of that experience, make needed improvements in those procedures.

Many of the changes proposed in this legislation are a result of discussions at meetings of President Carter's Task Force on the District of Columbia. H.R. 12116 is totally in line with the will of that task force and the administration to "reduce, and eliminate, where possible, Federal intrusion in decisions that are of purely local concern * * *."

Two provisions of H.R. 12116 in particular were included in the task force's recommendations. The first shortens and streamlines the rather burdensome process of congressional review over acts passed by the City Council. Currently, an act of the Council becomes law if during a 30-day period not including Saturdays, Sundays, and holidays, and days during which either House is not in session, a resolution of disapproval is not passed in both Houses of Congress. Due to the many days where either House of Congress is not in session as a result of recesses, District work periods and the like, the congressional review period can stretch out for as long as 7 months. The long delays lend considerable confusion to the legislative processes of the District. H.R. 12116 amends this provision so the review period is 30 days not including Saturdays, Sundays, and holidays, days when both Houses are not in session for more than 3 days, and adjournment sine die.

Another recommendation of the task force implemented by H.R. 12116 is the elimination of the Presidential veto of acts which have been repassed by the Council over the Mayor's veto. Neither Presidents Ford nor Carter availed themselves of this power, and the Carter administration, as well as the Ford administration before it, support this measure.

In addition to these provisions, H.R. 12116 provides that when the Council has adjourned before the end of the 10-day period in which the Mayor must sign or veto a Council act, the bill would not become law unless the Mayor signed it. This "pocket veto" authority is similar to that provided the President and the Governors of the 50 States. This amendment was added at the request of the Mayor and with the consent of the City Council.

H.R. 12116 also amends the budget review procedures of the Council to provide additional time to consider budget legislation. Currently, section 446 of the Home Rule Act requires the Council to adopt the budget by act 50 days after its receipt from the Mayor. Because Council acts require two legislative readings separated by a 13-day period, the effective review time for the Council is reduced to 36 days, which has proved to be inadequate. H.R. 12116 would remedy this by eliminating the requirement for a second reading of the budget and, thus, would provide for an additional 13 days of review time.

Finally, H.R. 12116 conforms the recently passed charter amendments providing for recall, referendum and initiative to the provisions of the Home Rule Act.

Passage of H.R. 12116 would do much to streamline the governmental processes of the District of Columbia and provide the citizens of the District with more efficient and timely government. Therefore, I urge my colleague's support for this bill.

● Mr. FAUNTROY. Mr. Speaker, I rise in support of H.R. 12116, a bill which seeks to amend the District of Columbia Self-Government and Governmental Reorganization Act.

After more than 3 years of home rule, it has become apparent that certain sections of the Home Rule Act either work

an unreasonable hardship on the local government's legislative process or are unnecessary to the process. H.R. 12116 will correct these deficiencies and undue burdens by:

First. Shortening and making more predictable the congressional layover period for acts passed by the District of Columbia Council;

Second. Repealing the authority of the President to sustain a Mayor's veto which has been overridden by the District of Columbia Council;

Third. Allowing the District of Columbia Council more time to review the Mayor's budget submission;

Fourth. Granting the Mayor the authority to exercise a pocket veto; and

Fifth. Conforming the newly enacted referendum and initiative process to the congressional review procedures.

Two of the proposed amendments were recommended by the President's Task Force on the District of Columbia. "To reduce and eliminate, where possible, Federal intrusion into decisions that are of purely local concern," the President's task force urged the repeal of the authority which now permits the President to review and overturn District of Columbia Council overrides of mayoral vetoes. In changing the congressional layover period for review of District of Columbia Council acts from 30 "legislative" days in which both the House and Senate are in session to 30 "calendar" days, we also follow the task force recommendation that, "where substantial Federal interests may be involved, [it is best] to streamline and simplify review procedures where possible." Although the task force recommended a review period of 60 calendar days, the committee believes that 30 calendar days allows sufficient time for Congress to act on a resolution of disapproval should one be introduced. Weekends, holidays, recesses, or adjournments over 3 days will of course be excluded. It should be noted that 30 calendar days would have accommodated any disapproving resolutions previously introduced.

The amendment to permit pocket vetoes by the Mayor would make the Home Rule Act similar to the pocket veto provisions of the Constitution of the United States and of the States of Maryland and Virginia. The amendment would prevent a Council act from becoming law merely because the Council, by adjourning, prevents the Mayor from vetoing and returning the act to the Council. Under H.R. 12116, the Mayor may pocket veto any bill presented to him if the Council by a recess of 10 days or more prevents him from returning the act to the Council.

The amendment to give the District of Columbia Council additional time to review the Mayor's budget submission is necessary because section 446 of the Home Rule Act requires the Council to adopt the budget by act. The result is that rather than the 50-day budget review period, the Council actually has only 36 days since an act must have two identical readings (votes) held 13 days apart. H.R. 12116 eliminates the requirement for a second reading, thereby giving the Council an additional 13 days review time.

The final amendment would subject the initiative and referendum authority recently enacted by the District of Columbia Council and approved by Congress to the same congressional review process required for council acts generally.

Mr. Speaker, each of these amendments will help to insure that the local government runs effectively and efficiently. No added costs to the Federal Government are involved. I urge passage of H.R. 12116.●

● Mr. DIGGS. Mr. Speaker, H.R. 12116 would amend the charter of the Home Rule Act to: First, grant the Mayor authority to exercise a pocket veto; second, repeal Presidential review of Council acts vetoed by the Mayor and overridden by the Council; third, shorten and make more predictable the congressional review period for acts passed by the Council; fourth, conform the newly enacted referendum and initiative process to the congressional review procedures; and fifth, increase the Council's review period budget acts.

The amendment to permit "pocket vetoes" by the Mayor, of Council acts, would conform the Home Rule Act to the pocket veto provisions of the Constitution of the United States and of the States of Maryland and Virginia. The amendment would prevent a Council act from becoming law merely because the Council, by adjourning, prevents the Mayor from vetoing and returning the act to the Council. If H.R. 12116 becomes law, the Mayor may sign such an act, or give same a pocket veto if the Council by adjourning has prevented him from returning the act to the Council.

The repeal of the authority for the "President's review" of Council overrides of mayoral vetoes of Council acts is recommended by the President's Task Force on the District of Columbia "to reduce and eliminate, where possible, Federal intrusion in decisions that are of purely local concern."

Changing the "congressional layover period" for review of Council acts from 30 legislative days when both Houses are in session, to 30 calendar days, excluding weekends, holidays, recesses, or adjournments over 3 days, gives ample time and certainty for congressional review of Council acts.

The remaining two amendments would give the Council additional time (13 days) to review the Mayor's budget, and would subject the initiative and referendum authority (H. Con. Res. 464) recently enacted by the Council to the same congressional review process required for Council acts generally.

At the hearing on this legislation before the Subcommittee on Fiscal and Government Affairs, representatives of the District of Columbia government (Chairman of the Council, and the special assistant to the Mayor) testified in support of the proposed legislation. No opposition thereto was then expressed or has since been received by the committee.●

Mr. DELLUMS. Mr. Speaker, I move the previous question on the bill.

The previous question was ordered.

There was no objection.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

---

## ENLARGING CONTRACTING AUTHORITY OF COMMISSION ON FINANCIAL OVERSIGHT

Mr. DELLUMS. Mr. Speaker, by direction of the Committee on the District of Columbia, I call up the Senate bill (S. 3120) to enhance the flexibility of contractual authority of the Temporary Commission on Financial Oversight of the District of Columbia, and ask unanimous consent that the bill be considered in the House as in the Committee of the Whole.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 3120

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That sections 2(c) and 3(c) of the Act entitled "An Act to provide for an independent audit of the financial condition of the government of the District of Columbia", approved September 4, 1976 (Public Law 94-339, 90 Stat. 1205), are each amended by striking out "fixed price".

SEC. 2. Section 2 of such Act is amended by adding at the end thereof the following new subsections:

"(h) The Commission may select the government of the District of Columbia as a qualified person under subsection (a), and the chairman of the Commission may enter into contracts with the government of the District of Columbia under subsection (c).

"(i)(1) The Commission is entitled, through an authorized representative, to inspect the facilities and audit the books and records of any contractor performing a contract under this Act, and any subcontractor performing any subcontract under a contract made by the Commission under this Act.

"(2) Each contract entered into under this Act shall provide that the Comptroller General and his representatives are entitled, until the expiration of three years after final payment, to examine any pertinent books, documents, papers, or records of the contractor or any of his subcontractors engaged in the performance of and involving transactions relating to such contract or subcontract.

"(j) Payments made by the Commission to the government of the District of Columbia under contracts entered into pursuant to the authority of this Act shall be available for matching purposes under any federally funded grant program provided that the grant is for a purpose similar to any purpose specified in section 2(a) of this Act.".

SEC. 3. Sections 3 and 4 of such Act are amended by striking out "1979" each place it appears therein and inserting in lieu thereof "1982".

GENERAL LEAVE

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent that all Members may be permitted to revise and extend their remarks on the Senate bill S. 3120, now before the House.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. DELLUMS. Mr. Speaker, I move to strike the last word.

Mr. Speaker, Members of the House, the purpose of S. 3120 is to enhance the flexibility of contractual authority of the Temporary Commission on Financial Oversight of the District of Columbia. Those amendments to the Audit Commission were recommended by the General Accounting Office (GAO).

The legislation, already passed by the Senate, would allow the Commission to negotiate "cost plus" contracts if the Director felt it was preferable. Current law provides that the Commission can only enter into "fixed priced" contracts.

The Commission Director testified that the Commission was having difficulty attracting enough qualified firms to bid on fixed price. They either refuse to bid or insert numerous conditions in proposals that make comparions of proposals impossible. The Director would continue to use fixed fee when feasible.

The bill would also allow the Commission to enter into contracts with the District of Columbia. The District already has underway, with the assistance of Federal matching grants, several system improvement projects, including one to control welfare eligibility and payments. The Commission could save money if it were permitted to contract with the city and pay only half of the cost. Both the Commission and GAO would monitor all contractors' and subcontractors' work.

The final section of the bill would change to 1983 the date of the first audit conducted by the District of Columbia. The Commission is responsible for the first three audits, and the GAO believes the first audit will not be feasible until 1980.

Mr. McKINNEY. Mr. Speaker, I move to strike the last word.

Mr. Speaker, I rise in support of S. 3120, a bill to enhance the flexibility of the contractual authority of the Temporary Commission on Financial Oversight of the District of Columbia.

To discharge its responsibility of designing and implementing new financial management and accounting systems for the District of Columbia, the Commission needs the added flexibility provided by this bill. The Commission is currently authorized to enter into negotiated fixed price contracts only for the design and implementation of the new systems. However, the Commission is meeting with some resistance from many potential bidders on the necessary contracts because of the difficulty that exists in estimating the costs associated with this type of work. The utilization of fixed price contracts in these circumstances could lead to fairly substantial overpayments or underpayments, as the case may be, which would not be in the best interests of either the Commission or the contractors.

One of the main provisions of this bill would remove the words "fixed price" from the enabling act, Public Law 94–399, which gave birth to the Commission. Consequently, the Commission would be empowered to award "cost-type" contracts wherever appropriate, although we have been assured by the Executive Director of the Commission that fixed price contracts would continue to be used for the majority of the projects currently contemplated.

S. 3120 also clarifies the authority of the Commission to finance that segment of any joint project between the District of Columbia and Federal Governments which was not financed by a Federal grant agency. Any such project that would be affected by this provision of the bill would have to have been undertaken by the Commission in any event under the requirements of the enabling act. To permit the Commission to combine its funds with Federal grant funds would thus provide the Commission with the added flexibility to stretch its funds and to meet the time constraints under which it is currently operating.

Finally, the bill authorizes the Commission to pay for audits of the District of Columbia's finances for fiscal years 1980, 1981, and 1982. The enabling act originally called for payment of audits of the District of Columbia's finances for fiscal years 1977, 1978, and 1979. However, due to unavoidable delays in the startup of the Commission's work, audits of the District's finances cannot take place prior to fiscal year 1980.

This legislation is noncontroversial and will provide the Commission with the flexibility it needs to carry out its task in an efficient and orderly manner. I therefore urge my colleagues to join me in supporting this measure.

● Mr. DIGGS. Mr. Speaker, the purpose of this Senate-passed bill (S. 3120) is to enhance the flexibility of contractual authority of the Temporary Commission on Financial Oversight of the District of Columbia so as to facilitate restructuring of the District's financial management systems and accomplish an audit of the District's financial position on an annual basis.

Specifically, S. 3120, if enacted, would amend Public Law 94–399, approved September 4, 1976 (90 Stat. 1205) entitled "An act to provide for an independent audit of the financial condition of the government of the District of Columbia", to authorize the Temporary Commission on Financial Oversight of the District of Columbia (so-called Audit Commission): First, to award cost-type contracts; second, to contract with the District of Columbia government; third, to audit the books and records of its contractors and subcontractors; fourth, to provide funds to the District government to meet matching requirements for certain Federal grants; fifth, to contract for annual audits of the financial operations of the District government through fiscal year 1982; and sixth, would also authorize the Comptroller General of the United States to examine pertinent books, documents, papers, or records of the Commission's contractors and subcontractors.

In the last Congress the District of Columbia Committee reported and the Congress enacted Public Law 94–399 after studies by the General Accounting Office and Arthur Anderson & Co., conducted respectively for the House and Senate District Committees, demonstrated the need for substantial improvement in the financial management systems of the District of Columbia government. The act was designed to help the District become more self-sufficient under the Home Rule Charter and established the specific requirement for the District's financial position to be audited annually by a certified public accountant.

The Audit Commission, which was set up by Public Law 94–399, requested the pending legislation (supported by the GAO) in order to give the Commission added flexibility in its contractual authority in negotiating its contracts, and to provide better procurement; to use the D.C. government and its agencies by contracting directly with them; and to move closer to the date when a complete and thorough independent audit of the District's financial conditions can be had.

This legislation, the committee states, well implements the machinery which the Congress created to improve the financial planning, reporting, and control systems of the D.C. government, and to assure the Congress that the city's management systems and financial situation are sound.

The enactment of S. 3120 will involve no added costs to the Federal Government, nor to the District of Columbia government.●

● Mr. FAUNTROY. Mr. Speaker, I rise in support of S. 3120. The General Accounting Office, in a meeting with Commission and congressional staff, has recommended the changes incorporated in this bill. The legislation already passed by the Senate would enhance the flexibility of contractual authority of the Commission, by allowing it to negotiate other types of contracts than fixed-price contracts, if the Director felt that it was preferable.

According to Bruce Rohrbacher, Executive Director of the Commission, they are finding it difficult to get enough qualified firms to bid at a fixed price. Mr. Rohrbacher will continue to use a fixed fee when appropriate, but the Commission needs the flexibility of negotiating other types of contracts.

In addition, the legislation would allow the Commission to enter into contracts with the District of Columbia; with payments from such contracts allowed for matching Federal grant programs. The Commission and the General Accounting Office would monitor all contractors' and subcontractors' work.

Finally, the General Accounting Office advised the committee that the first audit will not be feasible until fiscal year 1980. The bill changes the date for the first audit to be conducted by the city to fiscal year 1983. I move favorable consideration of the measure.●

Mr. DELLUMS. Mr. Speaker, I move the previous question on the Senate bill.

The previous question was ordered.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

## REVENUE BONDS FOR HOUSING FINANCE AGENCY

Mr. DELLUMS. Mr. Speaker, by direction of the Committee on the District of Columbia, I call up the bill H.R. 13243 to amend the District of Columbia Self-Government and Governmental Reorganization Act to authorize the Council of the District of Columbia to delegate its authority to issue revenue bonds for undertakings in the area of housing to any housing finance agency established by it and to provide that payments of such bonds may be made without further approval, and ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the bill, as follows:

H.R. 13243

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That section 490 of the District of Columbia Self-Government and Governmental Reorganization Act, relating to revenue bonds and other obligations, is amended by adding after subsection (f) the following new subsection:

"(g)(1) The authority of the Council under subsection (a) to issue revenue bonds, notes, and other obligations to borrow money to finance or assist in the financing of undertakings in the area of housing may be delegated by the Council to any housing finance agency established by it. Any such housing finance agency shall exercise by resolution any such authority delegated to it under the preceding sentence, and any such resolution shall not be considered to be an act of the Council.

"(2) The fourth sentence of section 446 shall not apply to (A) the expenditure of funds derived from the sale of any revenue bond, note, or other obligation issued by a housing finance agency established by the Council to which a delegation has been made under paragraph (1), or (B) the payment (as to either principal or interest or both) of any such bond, note, or other obligation.".

GENERAL LEAVE

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent that all Members may revise and extend their remarks on the bill H.R. 13243, which is before the House.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. DELLUMS. Mr. Speaker, I move to strike the last word.

Mr. Speaker, the purpose of H.R. 13243 is to amend the Home Rule Charter to authorize the Council of the District of Columbia to delegate its authority to issue revenue bonds to finance a housing finance agency established by the Council and to exempt principal and interest from the bonds from the congressional appropriations process. At present, the District is not eligible to receive certain Federal housing grants that are channeled only through State housing finance agencies.

This legislation is necessary for two reasons: First, the District of Columbia Corporation Counsel ruled that, under present law, the Council does not have authority to delegate power to issue revenue bonds to a housing finance agency, and second, a housing finance agency could not sucessfully market bonds if principal and interest were subject to a line item veto by Congress.

Standard & Poor's, in a letter to the subcommittee chairperson, stated:

> . . . We expect revenue bonds to be secured by a pledged revenue stream not requiring appropriations by any other government unit. . . ."

The District's bond counsels, Willkie Farr & Gallagher and Hudson & Leftwich, stated that legislation authorizing the D.C. government to establish an independent agency authorized to issue revenue bonds and exempting its assets and revenues from the appropriations process was a necessary prerequisite for the Council to establish a housing finance agency.

Although the Corporation Counsel questioned the council's authority to delegate the issuance of revenue bonds to an agency, it is the opinion of the committee that this authority is implicit in section 490 of the Home Rule Charter and in the legislative history. The bill before us merely reiterates the congressional intent that the Council's power to delegate authority to issue revenue bonds does exist.

The need for decent, safe, affordable housing in the District is great. A 1974 Washington Center for Metropolitan Studies survey found 27,000 low income families, including 9,000 elderly, living in substandard or overcrowded housing. The cost of single family homes in the District, according to the Federal Home Loan Bank Board, rose 63 percent in the last 5 years while median household income between 1974 and 1977 rose only 30 percent.

In addition, the District has experienced a loss of 13,000 units, primarily rental housing, since 1970; and the cost of available units has become increasingly expensive. As a result, the District has the highest proportion of rental-occupied units of the 20 largest cities—70 percent—and a very low vacancy rate.

The Council's Commission on Housing found that from 1977 to 1985 demand for residential units will exceed supply by nearly 20,000 units. To make up the shortage, net production will have to increase almost 4,000 units per year 1981 through 1985.

At present 41 States have established housing finance agencies to provide for low and moderate income housing. The lack of an agency in the District of Columbia has deprived the city of special HUD section 8 set-asides that are available only through housing finance agencies.

The Council has been considering a housing finance agency since May of 1977. Bills were introduced by Council Chairperson Sterling Tucker and Council Members Nadine Winter and John Wilson. After a series of roundtable discussions, bill sponsors agreed to a compromise bill that was passed by the Committee on Housing and Urban Development. The Council bill, 2–161, passed its first reading unanimously on July 25, 1978, and will have its second reading September 19 when the Council returns from its recess.

Under 2–161, the proposed housing finance agency will be empowered to participate in the construction or rehabilitation of singly-family and multifamily residential housing units for sale or lease, including apartments, townshouses and detached houses, condominiums, and cooperatives. The agency would issue revenue bonds and notes which are exempt from Federal and District of Columbia income taxes, but the agency would have the flexibility to issue taxable obligations.

Bonds and notes of the agency would not be debts or obligations of the District of Columbia, and the faith and credit of the District would not be pledged to pay the notes and bonds of the agency. It is important to note that the bonds would not be guaranteed by the Federal Government.

The city would have no legal liability for agency debts and all expenses of the agency would be payable solely from funds derived from assisted projects.

Mr. Speaker, if I have any time remaining, I would like to yield to my distinguished colleague, the ranking minority member, the gentleman from Connecticut (Mr. McKINNEY).

Mr. McKINNEY. Mr. Speaker, I thank the gentleman for yielding to me.

Mr. Speaker, I rise in support of H.R. 13243 and I would like to commend the gentlemen from Michigan and California for moving so expeditiously in reporting this measure to the floor. H.R. 13243 is a vital part of the effort to ease the severe housing problems in the District of Columbia.

This bill serves a dual purpose. First, it clarifies the ability of the Council of the District of Columbia to delegate its revenue bonding authority to an independent housing finance agency. This was requested by the District's Corporation Counsel and its Bond Counsel who felt that the Council did not have this authority under the Home Rule Act. While it was the committee's opinion that the Home Rule Act does not bar such a delegation, the bill was amended by the subcommittee to remove any doubt.

Second, H.R. 13243 amends the Home Rule Act to allow the expenditure of funds derived from the sale of revenue bonds by a housing finance agency and the payment of principal and interest on these bonds without further congressional action. This is similar to legislation passed by the Congress last year allowing the transfer of moneys derived from revenue bonds for the District's private colleges and universities.

It should be made clear at this point that these revenue bonds do not carry a

pledge of credit of either the District or Federal Governments. These bonds are secured only by the revenues derived from the projects they finance. This is the key to their marketability. If the payment of principal and interest of revenue bonds are in any way subject to the vagaries of the legislative process, their marketability declines drastically. Brentan Harries, President of Standard and Poor's credit rating agency wrote the committee that in determining the rating of a particular bond issue, "We expect revenue bonds to be secured by a pledged revenue stream not requiring appropriations by any other governmental unit * * *." And according to our former colleague Thomas Rees, "There is not a legislative body in the country that stands between the repayment of a revenue bond issue and the holders of the revenue bonds * * *."

This legislation is urgently needed to enable the District Council to create a housing finance agency. Many States and major cities have had excellent success with similar types of agencies. Further, because of the lack of a housing finance agency, the District has lost special HUD section 8 set-aside moneys which are available to such agencies.

The housing situation in the District is critical. While the District has suffered a large decline in available housing since 1970, the vacancy rate continues to be unusually low. Housing prices all over the Washington Metropolitan Area are alarming, but the situation is even worse in the District, where 53 percent of the region's poor reside and the median income is significantly lower than that of the surrounding areas. The problem is exacerbated by the dislocation of many of the city's lower income renters due to the recent trend toward restoration and renovation in the District.

Without a functioning housing finance agency, the District Government has few tools to combat its housing problems. A housing finance agency, with its ability to offer tax-free bonds, can generate a large pool of low cost loan money to be used to finance low and moderate income housing, thereby reducing some of the price pressure in the local housing market. Therefore, not only will this agency serve a useful social purpose, it will have an anti-inflationary impact as well.

None of this can happen, however, until Congress enacts H.R. 13243. I strongly urge that this body promptly pass this bill.

● Mr. FAUNTROY. Mr. Speaker, this is a clean bill which reflects the thinking of the Fiscal Affairs Subcommittee. It is rather narrowly drawn to assure that a D.C. Government Housing Finance Agency (HFA) has the ability to pay those obligations derived from the sale of revenue bonds and that the revenue bonds which may be issued by the HFA will be used only for housing. It is the subcommittee's position that the Congress must provide the delegation to the HFA to issue revenue bonds and that thinking is specifically reflected on page 2 at lines 1–9 of the bill.

I introduced H.R. 13243 to complement a measure which the D.C. Council has undertaken. H.R. 13243 does the following:

First. Amends section 490 of the District of Columbia Self-Government and Governmental Reorganization Act, relating to revenue bonds and other obligations.

Second. Exempts from the Congressional Appropriations process all proceeds derived from the sale of revenue bonds, notes or other obligations issued to finance the activities of any housing authority established by the D.C. City Council.

The District of Columbia Council's Committee on Housing and Urban Development has unanimously approved and favorably reported a bill creating a District of Columbia Housing Finance Agency.

With the passage of H.R. 13243 and the D.C. Council's Housing Finance Agency bill, the D.C. government will be authorized to:

Make direct payments of annual principal and interest to purchasers of revenue bonds.

Borrow money and issue low-interest tax-exempt revenue bonds and notes and pass on savings to stimulate the housing market for low and moderate income residents.

Make loans to sponsors for the financing, construction, reconstruction, or rehabilitation of residential housing for eligible persons.

Assign, encumber, sell or otherwise dispose of any real estate or personal property acquired by the agency.

To invest any funds not required for immediate disbursement, including funds held in reserve, in investments lawful for the District.

To consent to any modification with respect to rate of interest, time and payment of any installment of principal or interest, security or any other term of any contract, mortgage, mortage loan, or contract agreement of any kind to which the agency is a party.

To sell, at public or private sales, with or without public bidding, any mortgage or other obligation held by the agency.

The bill anticipates the raising of funds through the sale of revenue bonds. It is important to note that the Council's General Counsel has observed that investors would certainly be cautious of any proposal that subjected annual principal and interest payment to the appropriation process.

H.R. 13243 would remove the element of uncertainty from the minds of bond purchasers and make more secure the financial institutions that would play a prime role in the granting of credit to be secured by the projects financed.

H.R. 13243 will enable the D.C. Housing Finance Agency to generate funds from private sources to increase the supply and lower the cost of funds available for residential mortgages and construction loans and help alleviate the critical shortage of adequate housing in D.C.●

● Mr. DIGGS. Mr. Speaker, the purpose of H.R. 13243 is to amend the D.C. Home Rule Act: First, to authorize the Council of the District of Columbia to delegate its authority to issue revenue bonds for undertakings in the area of housing to any housing finance agency established by it, and second, to provide that the expenditure of funds derived from the sale of such bonds and the payments of principal and interest on such bonds may be made without further approval of the Congress.

NEED FOR THIS LEGISLATION

The need for this legislation (H.R. 13243) is clearly stated by bond counsel for the District of Columbia, that such legislation is a prerequisite to the Council establishing an independent agency with authority to issue revenue bonds to finance the development of housing, and to provide that the expenditure of such revenues or assets shall be exempt from the appropriation process by the Congress.

BACKGROUND

During the last 15 years, 39 States and some cities have created housing finance agencies as mechanism to provide low- and moderate-income housing.

These agencies issue revenue bonds, the proceeds of which are utilized by the agency to finance the construction, rehabilitation, conversion, and purchase of multi- and single-family residential structures which are consonant with stated public purposes of the agency. Primary among these purposes is provision of low- and moderate-income housing.

The need for a housing finance agency in the District of Columbia has been officially recognized for a number of years, beginning with the report of the Commission on the Organization of the Government of the District of Columbia (the Nelson Commission) issued in 1972.

In summary, the District's ability to respond to its housing problems is substantially handicapped by the lack of housing financing agency, and the creation of such an agency has broad-based support from all segments of the community.

COST

The Congressional Budget Office estimates no additional costs to the Government as a result of the enactment of this bill.

The legislation was approved, by voice vote, by the Subcommittee on Fiscal and Governmental Affairs (after hearing), and by the Full Committee.●

Mr. DELLUMS. Mr. Speaker, I move the previous question on the bill.

The previous question was ordered.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

## DISTRICT OF COLUMBIA RECIPROCAL TAX COLLECTION ACT

Mr. MAZZOLI. Mr. Speaker, by direction of the Committee on the District of Columbia, I call up the Senate bill (S. 1103) to permit States the reciprocal right to sue in the Superior Court of the District of Columbia to recover taxes due the State, and ask unanimous consent that the Senate bill be considered

in the House as in the Committee of the Whole.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1103

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. Any State, territory, or possession, by and through its lawfully authorized officials, shall have the right to sue in the Superior Court of the District of Columbia to recover any tax lawfully due and owing to it when the reciprocal right is accorded to the District by such State, territory, or possession, whether such right is granted by statutory authority or as a matter of comity.

SEC. 2. The certificate of the secretary of state or other authorized official of any State, territory, or possession, or subdivision thereof, to the effect that the official instituting the suit for collection of taxes in the Superior Court of the District of Columbia has the authority to institute such suit and collect such taxes shall be conclusive proof of that authority.

SEC. 3. For the purposes of this title, the term "taxes" shall include—

(1) any and all tax assessments lawfully made, whether they be based upon a return or other disclosure of the taxpayer, or upon the information and belief of the taxing authority, or otherwise;

(2) any and all penalties lawfully imposed pursuant to a taxing statute, ordinance, or regulation; and

(3) interest charges lawfully added to the tax liability which constitutes the subject of the suit.

SEC. 4. In any State, territory, or possession, or subdivision thereof, in which the District of Columbia is authorized under the laws of such State, territory, or possession, to bring suit for the purpose of recovering of such taxes, the Corporation Counsel or any of his assistants is authorized to bring such suit in the name of the District of Columbia in the courts of such State, territory, or possession, or subdivision. The Mayor of the District of Columbia is authorized, in connection with any such suit, to procure professional and other services, at such rates as may be usual and customary for such services in the jurisdiction concerned.

SEC. 5. This title may be cited as the "District of Columbia Reciprocal Tax Collection Act".

With the following committee amendments:

Strike out all after the enacting clause and insert in lieu thereof the following:

That this Act may be cited as the "District of Columbia Reciprocal Tax Collection Act".

SEC. 2. (a) Any State, acting through its lawfully authorized officials, shall have the right to sue in the Superior Court of the District of Columbia to recover any tax lawfully due and owing to it in any case in which such reciprocal right is accorded to the District of Columbia by such State, whether such right is granted by statutory authority or as a matter of comity.

(b) The certificate of the secretary of state, or of any other anuthorized official, of such State, or any subdivision thereof, to the effect that the official instituting a suit auhorized under subsection (a) for collection of taxes in the Superior Court of the District of Columbia has the authority to institute such suit and collect such taxes shall be conclusive proof of such authority.

SEC. 3. (a) In any State, or any subdivision thereof, in which the District of Columbia is authorized under the laws of such State to bring suit for the purpose of recovering taxes lawfully due and owing the District of Columbia, the Corporation Counsel is authorized to bring such suit in the name of the District of Columbia in the courts of such State, or any subdivision thereof.

(b) In connection with any such suit, the Mayor of the District of Columbia is authorized to secure professional and other services at such rates as may be usual and customary for such services in the jurisdiction involved.

SEC. 4. For the purposes of this Act:

(1) The term "taxes" means—

(A) any tax assessment lawfully made, whether based upon a return or any other disclosure of the taxpayer or upon the information and belief of the taxing authority involved;

(B) any penalty lawfully imposed pursuant to any law, ordinance, or regulation which imposes a tax; or

(C) any interest charge lawfully added to the tax liability which constitutes the subject of any suit brought under section 2 or 3.

(2) The term "State" means any of the several States, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Marianas, Guam, the Virgin Islands, American Samoa, the Trust Territory of the Pacific Islands, and any other territory or possession of the United States.

Mr. MAZZOLI. Mr. Speaker, I move to strike the last word.

Mr. Speaker, on July 17, 1978, the District of Columbia Committee by unanimous voice vote reported out S. 1103, a bill to permit States the reciprocal right to sue in Superior Court of the District of Columbia to recover taxes due the State.

The purpose of this bill is to authorize the several States of the United States to sue in the Superior Court of the District of Columbia to recover any taxes lawfully due that State, if a reciprocal right is accorded to the District of Columbia. At present, 44 States grant each other the reciprocal right to sue for taxes owing that State in courts of other States. There is no such law in the District of Columbia. The Congress has been requested to grant such a right on a reciprocal basis by the District of Columbia government. It is the District's belief that the passage of this legislation would aid the enforcement of the tax laws of the District of Columbia.

Therefore, Mr. Speaker, I urge all of my colleagues to vote for this bill.

Mr. Speaker, I yield the balance of my time to the gentleman from Connecticut (Mr. MCKINNEY).

Mr. MCKINNEY. Mr. Speaker, I rise in support of the bill S. 1103, which will permit an authorized official of any State, territory, or possession of the United States the right to sue in the Superior Court of the District of Columbia to recover taxes due the jurisdiction if such other jurisdiction permit the District to bring similar suits in their courts.

There are currently 44 States in the Union which have such reciprocity agreements. Ironically, the District of Columbia, with its uniquely tri-State geography and large amount of individual movement back and forth across its boundaries, does not have such an arrangement.

It is unfortunate that the District government cannot itself enact such legislation for the improvement of its own fiscal position and practices, for it has been a part of the Mayor's legislative program for enactment by both the 94th and 95th Congresses, with no result. Enactment of this bill is long overdue.

S. 1103 will significantly aid the enforcement of the District's tax laws, and improve the revenue-raising ability of the District. I urge that S. 1103 be adopted, as amended, so that the District can take advantage of the reciprocal provisions in other State laws as they apply to the collection of taxes.

The SPEAKER pro tempore (Mr. MCHUGH). The question is on the committee amendments.

The committee amendments were agreed to.

● Mr. FAUNTROY. Mr. Speaker, I support S. 1103, a bill which seeks to grant the District of Columbia the right to enter into reciprocity arrangements for the purpose of collecting taxes.

This proposed legislation would authorize the several States of the United States to sue in the Superior Court of the District of Columbia to recover any taxes, lawfully due that State, if a reciprocal right is accorded to the District of Columbia.

Specifically, the legislation:

First. Authorizes any State, territory, or possession to bring suit in the Superior Court of the District of Columbia to recover any tax lawfully due and owing to it, if a reciprocal right is accorded to the District by such State, territory, or possession.

Second. Provides for authorization by a certificate issued by the Secretary of State or other authorized official of a State, territory, or possession. Proof to the effect that the official bringing suit is so authorized by the State shall be conclusive proof of that authority.

Third. Defines taxes to include (a) tax assessments, (b) penalties lawfully imposed, and (c) interest charges lawfully added to the tax liability.

Presently, 44 States grant each other the reciprocal right to sue for taxes owing that State in the courts of the other States. There exists no such law in the District of Columbia. It is felt that passage of this legislation would aid in the enforcement of the tax law of the District of Columbia.

Enactment of the proposed legislation will incur no added costs to the D.C. government nor the Federal Government.

I urge passage of this bill—S. 1103.●

● Mr. DIGGS. Mr. Speaker, the purpose of this Senate-passed bill (S. 1103), which was introduced at the request of the Mayor of the District of Columbia, is to authorize any State to bring suit in the Superior Court of the District of Columbia to recover any tax lawfully due and owing to it, if a reciprocal right is accorded to the District by such State.

The bill also would authorize the Corporation Counsel of the District of Columbia to bring suit for the purposes of recovering D.C. taxes, in those States authorizing the District of Columbia to so litigate.

The bill defines taxes to include: first, tax assessments, second, penalties lawfully imposed, and third, interest charges lawfully added to the tax liability. It also defines the term "State" to include not only the several States but also the U.S. territories and possessions.

BACKGROUND

Individuals move out of the District of Columbia each year leaving unpaid District income taxes. In some instances, corporations, organizations, or individuals, located or operating outside the District, incur liability for District taxes. Some are able to evade compliance with District tax laws because they are not within the jurisdiction of the District for normal enforcement proceedings. It is the judgment of the committee that the passage of this legislation would aid significantly in the enforcement of the tax laws of the District of Columbia and the collection of revenue therefrom.

PRECEDENTS FOR THIS LEGISLATION

At the present time, 45 States—which are listed in the Committee Report (H. Rept. 95–1360)—grant each other full or partial reciprocity to sue for taxes owing that State in the courts of the other States. There is no such law in the District of Columbia. Only five States have no reciprocal statutes providing tax suits reciprocity, namely, Florida, Georgia, Montana, Nevada, and Utah.

The bill was favorably reported, by voice vote, by both the Subcommittee on the Judiciary—after hearing—and by the full committee. No expressions in opposition to the bill have been presented to the committee.

The enactment of S. 1103 will involve no added costs to the Federal or District of Columbia government.●

Mr. MAZZOLI. Mr. Speaker, I move the previous question on the Senate bill.

The previous question was ordered.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title was amended so as to read: An act to permit any State the reciprocal right to sue in the Superior Court of the District of Columbia to recover taxes due such State.

A motion to reconsider was laid on the table.

---

## DISTRICT OF COLUMBIA PRETRIAL SERVICES AGENCY

Mr. MAZZOLI. Mr. Speaker, by direction of the Committee on the District of Columbia, I call up the Senate bill (S. 2556) to change the name of the District of Columbia Bail Agency, and ask unanimous consent that the Senate bill be considered in the House as in the Committee of the Whole.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 2556

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That section 1301 of title 23, D.C. Code, is amended by deleting "District of Columbia Bail Agency" and inserting in lieu thereof "District of Columbia Pretrial Services Agency".

SEC. 2. Any law, rule, regulation, documents or record of the United States in which reference is made to the District of Columbia Bail Agency referred to in the first section of this Act shall be deemed to be a reference to the District of Columbia Pretrial Services Agency.

With the following committee amendments:

Strike out all after the enacting clause and insert the following:

That (a) the text of section 23–1301 of title 23, District of Columbia Code, is amended by striking out "District of Columbia Bail Agency" and inserting in lieu thereof "District of Columbia Pretrial Services Agency".

(b) The heading of such section is amended to read as follows:

"§ 23–1301. District of Columbia Pretrial Services Agency".

SEC. 2. (a) The heading of subchapter I of chapter 13 of title 23, District of Columbia, is amended to read as follows:

"SUBCHAPTER I.—DISTRICT OF COLUMBIA PRETRIAL SERVICES AGENCY".

(b) The item relating to subchapter I in the table of sections at the beginning of such chapter is amended to read as follows:

"Subchapter I—District of Columbia Pretrial Services Agency".

(c) The item relating to section 23–1301 in such table is amended to read as follows:

"23–1301. District of Columbia Pretrial Services Agency.".

(d) The heading of such chapter is amended to read as follows:

"CHAPTER 13.—PRETRIAL SERVICES AGENCY AND PRETRIAL DETENTION".

(e) The item relating to chapter 13 in the table of chapters at the beginning of such title is amended to read as follows:

"13. Pretrial Services and Pretrial Detention ---------- 23–1301".

SEC. 3. Any reference in any law, rule, regulation, document, or record of the United States or the District of Columbia to the District of Columbia Bail Agency shall be deemed to be a reference to the District of Columbia Pretrial Services Agency.

Mr. MAZZOLI. Mr. Speaker, I move to strike the last word.

Mr. Speaker, on July 17, 1978, the District of Columbia Committee by unanimous voice vote reported out S. 2556, a bill which changes the name of the District of Columbia Bail Agency to the District of Columbia Pretrial Services Agency.

The purpose of the bill is to give the agency a name that more appropriately reflects its function within the legal community. Even though the services provided by the agency have been expanded and refined to meet the needs of the Superior Court, the agency does not post monetary bonds for pretrial detainees. The present name of the agency has led to much confusion in that regard within the local community. The director of the bail agency, in requesting that Congress enact this legislation, deems the name change necessary to alleviate confusion as to the proper function of the agency.

Mr. Speaker, I urge all of my colleagues to vote for this bill.

Mr. Speaker, I yield to the gentleman from Connecticut (Mr. MCKINNEY).

Mr. MCKINNEY. Mr. Speaker, I rise in support of the bill S. 2556, which would change the name of the District of Columbia Bail Agency to the Pretrial Services Agency.

This action was requested by the Director of the District of Columbia Bail Agency in order to give that organization a title which more accurately reflects its present functions. In the years since its inception, the agency's services have evolved far beyond simple bond transactions to include pretrial detention, personal recognizance, and third-party custody as other viable pretrial alternatives. In addition, such a change would conform the agency's organizational title to that of other identical agencies created by Congress and modeled after the D.C. Bail Agency in 10 Federal districts.

It is unfortunate, however, that valuable congressional time should be spent on a local matter of this nature and points out the need for full home rule for the District of Columbia. Because of a prohibition contained in the District of Columbia Home Rule Charter, the City Council cannot amend title 23 of the D.C. Code, dealing with criminal procedure of which the designation of the name of the agency is a part. Consequently, congressional action is needed to legislate the name change.

I therefore urge my colleagues' support for this noncontroversial but necessary measure.

GENERAL LEAVE

Mr. MAZZOLI. Mr. Speaker, I ask unanimous consent that all Members may be permitted to extend their remarks in explanation of the bill presently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The SPEAKER pro tempore. The question is on the committee amendments.

The committee amendments were agreed to.

● Mr. FAUNTROY. Mr. Speaker, I support S. 2556, a bill which provides for changing the title of the D.C. Bail Agency.

In 1971, the bail agency's statute was amended to increase the agency's services and its functions so as to keep in step with changing methods of dealing with criminal defendants. At the time of the amendment other concerns precluded attention to the subtle and seemingly insignificant matter of its name. S. 2556 will correct this deficiency by:

First, Changing the title of the D.C. Bail Agency to D.C. Pretrial Services Agency.

Second. D.C. Bail Agency in printed matter shall be interpreted to be a reference to D.C. Pretrial Services Agency.

The present Director of the D.C. Bail Agency has requested this legislation because it would offer a more accurate description of the functions of the organization.

In addition, the present name of the Agency has resulted in some confusion on the part of the public and some employees in the criminal justice system as to the services available.

Moreover, in title 18, section 3152, of the United States Code, Congress created ten (10) Federal districts modeled after the D.C. Bail Agency. Each of these organizations are named "Pretrial Services Agency." The present legislation would make the District of Columbia title consistent with those other, identical agencies, as well as provide a more accurate and less confusing title.

Mr. Speaker, this bill will help to insure that the local government runs effectively and efficiently. There is no opposition to the name change and it appears that no additional cost to the Government would be incurred as a result of the enactment of this bill. I urge passage of S. 2556.

The purpose of S. 2556 is to change the name of the District of Columbia Bail Agency to the Pretrial Services Agency. The present Director of the District of Columbia Bail Agency requests this legislation because it would effect a more accurate description of the function of the organization. The character of the Agency's services and its functions have expanded over the years to include other methods of dealing with criminal defendants prior to trial.

In addition, the present name of the Agency has resulted in some confusion on the part of the public and some employees in the criminal justice system as to the services available.

Moreover, in title 18, section 3152, et seq., of the United States Code, Congress created 10 Federal districts modeled after the District of Columbia Bail Agency. Each of these organizations is named "Pretrial Services Agency." The present legislation would make the District of Columbia organizational title consistent with those other, identical agencies, as well as provide a more accurate and less confusing title.

There is no opposition to the name change and it appears that no additional cost to the Government would be incurred as a result of the enactment of this bill.●

● Mr. DIGGS. Mr. Speaker, the purpose of this Senate-passed bill (S. 2556) is to change the name of the District of Columbia Bail Agency to the District of Columbia Pretrial Services Agency.

The District of Columbia Bail Agency was created by the District of Columbia Bail Agency Act (Public Law 89–519, approved July 26, 1966) to implement the Federal Bail Reform Act of 1966 (Public Law 89–456; 80 Stat. 214).

The character of the Agency's services and its functions have evolved, over the years, to keep in step with the changing methods of dealing with criminal defendants prior to trial. Money bond, or bail, is no longer the only way of assuring the attendance of persons at their trials. Personal recognizance, third-party custody, and pretrial detention are only a few of the alternatives available to the court today. The research and information provided by the Agency have been expanded and refined to meet the needs of District of Columbia Superior Court judges.

In addition, the present name of the Agency has caused confusion on the part of the public and some employees in the criminal justice system as to the services it offers.

Finally, in title 18, section 3152, et seq., of the United States Code, Congress created 10 pilot agencies in 10 Federal districts modeled after the District of Columbia Bail Agency. Each of these organizations is to be named "Pretrial Services Agency." This bill would make the District of Columbia organization's title consistent with those other identical agencies, as well as provide a more accurate and less confusing appellation.

The relevant offices in the District of Columbia involved in proceedings of the Bail Agency, namely, that of the Mayor, the Corporation Counsel, the District of Columbia Court of Appeals and the Superior Court, the U.S. attorney, the Metropolitan Police Department, and the U.S. attorney's office, support the bill S. 2556. No opposition to this bill has been expressed to the committee.

The enactment of this proopsed legislation will involve no added costs to the Federal Government, nor to the District government.●

Mr. MAZZOLI. Mr. Speaker, I move the previous question on the Senate bill.

The previous question was ordered.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title was amended so as to read: An act to change the name of the District of Columbia Bail Agency to the District of Columbia Pretrial Services Agency.

A motion to reconsider was laid on the table.

---

## AMENDING THE DISTRICT OF COLUMBIA REDEVELOPMENT ACT OF 1945

Mr. DELLUMS. Mr. Speaker, by direction of the Committee on the District of Columbia, I call up the bill (H.R. 10311) to amend the District of Columbia Redevelopment Act of 1945, and for other purposes, and ask unanimous consent that the bill be considered in the House as in the Committee of the Whole.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the bill, as follows:

H.R. 10311

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That (a) section 12 of the District of Columbia Redevelopment Act of 1945 (D.C. Code sec. 5–711) is amended by deleting the first proviso thereof and substituting therefor the following: "*Provided,* That any such modification which affects the use or development of an area or part thereof which has been sold or leased, as governed by the area redevelopment plan as theretofore approved, shall not become effective as to such area or part without the consent in writing of the purchaser or lessee thereof:"

(b) The amendment made by this section shall be effective with respect to any approved project area redevelopment plan, regardless of the effective date or date of approval of such plan.

SEC. 2. In implementation of the authority reserved under section 21(a) of the District of Columbia Redevelopment Act of 1945 (D.C. Code sec. 5–718(a)), the Congress hereby amends the urban renewal plan for Southwest urban renewal area project "C" by adopting and approving the following modifications to the plan:

(1) Amendment numbered 22 (pertaining to parcel 76), as adopted by the National Capital Planning Commission on March 7, 1974, and approved by the Council of the District of Columbia on May 7, 1974; and

(2) Amendment numbered 23 (pertaining to parcel D–2–B), as adopted by the National Capital Planning Commission on May 30, 1974, and approved by the Council of the District of Columbia on August 30, 1974.

GENERAL LEAVE

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent that all Members be permitted to revise and extend their remarks in explanation of the bill before us.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. DELLUMS. Mr. Speaker, I move to strike the last word.

Mr. Speaker, the purpose of the bill is to clarify an ambiguity in the District of Columbia Redevelopment Act of 1945, and to approve certain amendments to the urban renewal plan for Southwest uprban renewal project area C in the District of Columbia. Presently, the provision regarding modification of an approved project in the redevelopment plan is unclear. The question is whether consent is required from all owners and lessees of property in the area who may deem themselves affected by the modification or whether consent is required only from the particular owner or lessee of the property whose planned use is being modified. The bill amends the District of Columbia Redevelopment Act to make clear that only the owner or lessee of the particular parcel of land whose use is being modified is required to give consent under the statute. In addition, the bill approves two urban renewal plan amendments in Southwest Washington.

In 1974, prior to home rule, the District of Columbia Redevelopment Land Agency (RLA), amended, in accordance with the RLA Act of 1945, the Southwest Washington urban renewal project area C to allow low- and moderate-income housing to be built on land previously planned for a church and allow the Channel Inn to expand from 100 to 150 rooms.

L'Enfant Plaza Properties, Inc., and a group of homeowners brought suit against RLA alleging that the law to modify an approved plan required the written consent of all landowners or lessees within the projected area.

The RLA argued that only the owners or lessees whose property is being modified are required to sign a consent. For others likely to be affected by the change, the law requires they be mailed a notice

of a public hearing by the D.C. Council. The RLA contends that since Congress specifically provided that neighboring landowners have an opportunity to testify at a public hearing, Congress did not intend that the owners be required to give consent.

The district court granted RLA's motion for summary judgment and dismissed the complaint. The homeowners and L'Enfant Plaza appealed and the suit was reversed and remanded back to the courts for trial. The judge ruled that the intent of Congress concerning plan modifications was not clear. No trial date has been set. H.R. 10311 responds to the court's suggestion for the need to clarify the ambiguity in D.C. Code, section 5–711.

The committee gave careful consideration to the problem because it affects the ongoing process of urban renewal not only in the Southwest Washington urban renewal project area C, but also in all other urban renewal areas in the District of Columbia. Urban renewal plans commonly control land use for long periods of time. The Southwest Washington project area plan, for example, extends for 40 years. It is unreasonable to expect that an urban renewal plan, once adopted, will remain unchanged throughout its duration. We heard testimony that the "freezing" of two urban renewal projects under the present ambiguous wording of D.C. Code section 5–711 seriously interferes with the primary goals of urban renewal in the District of Columbia; that is, the replacement of blighted residential and commercial neighborhoods with decent, affordable housing and an appropriate mix of commercial development.

Mr. Speaker, I would like now to yield to my distinguished colleague, the coauthor of the legislation, the gentleman from Wisconsin (Mr. REUSS).

Mr. REUSS. Mr. Speaker, I thank the gentleman for yielding and for the gentleman's leadership on this bill, which as I understand was unanimously reported out and enjoys bipartisan support.

Mr. Speaker, in a nutshell, one-fourth of the District of Columbia, Southwest Washington, was planned in the 1950's. There was just one thing wrong with the master plan of the thinkers who dreamed it up. There were hovels for the poor known as public housing. They were and are a disgrace. There were luxury apartments and townhouses for the affluent, which makes very nice living, indeed. I and a number of our colleagues are fortunate enough to live in them. My particular townhouse happens to be almost a mile from parcel 76 and about half a mile from Channel Inn, the motel which seeks to add on to its present number of rooms.

The SPEAKER. The time of the gentleman from California (Mr. DELLUMS) has expired.

(By unanimous consent, Mr. DELLUMS was allowed to proceed for an additional 5 minutes.)

Mr. DELLUMS. Mr. Speaker, I yield further to my colleague, the gentleman from Wisconsin (Mr. REUSS).

Mr. REUSS. Mr. Speaker, the community agencies of the Southwest, the community leaders, the Community Housing, the Southwest Assembly and others decided that some use ought to be found for parcel 76, which as you can see in the picture is a weed-infested, tin-can strewn, semilegal parking lot, and they conceived the idea that it would be nice to have some moderate-income, middle-income, nonprofit homeownership housing, so that middle-income people could leaven the rich and poor lump of the Southwest; so they proceeded and went to an agency set up by the Congress. It is a public semiprivate agency, the National Housing Partnership, which designed some excellent two- and three-story townhouses with prices which moderate-income people could afford.

All was well. The change was put through after the fullest due process by the District of Columbia Redevelopment Land Commission, by the District of Columbia Council, and then enter the Rochefellers. Well, the Rochefellers own L'Enfant Plaza and the gentleman who helps them on with their overcoats is our friend, Gen. Pete Quesada, and they decided they ought to fill it with all the tea in China; namely, a monopoly that might work in the District of Columbia and they got together with others in this lawsuit to stop the motel—not really competition, it was a mile away—from putting on 50 extra rooms and to stop the neighbors from putting moderate-income housing in parcel 76.

The circuit court of appeals not so long ago in the lawsuit I described said that the law Congress wrote in 1954 maybe had a little ambiguity in it and, if so, it would not be the first ambiguity which we have perpetrated; but there was a simple action which the Congress could take, namely, the bill before us, to say that only the owner of the property affected could say "Aye," "Yes," or "No," to a change in the redevelopment plan and that someone who lived a mile away or any of the other 8.000 assorted property owners in Southwest Washington cannot arbitrarily veto the thing.

So I hope this bill will overwhemingly pass and thus show that the Congress is interested in a community in which wealthier people and poor people and, above all. moderate middle-income people can live harmoniously. That is what it is all about and I congratulate Chairman DELLUMS and the committee for bringing the bill before us.

Mr. DELLUMS. Mr. Speaker, I thank my distinguished colleague. the gentleman from Wisconsin (Mr. REUSS), for his sensitive and eloquent remarks.

Mr. MCKINNEY. Mr. Speaker, will the gentleman yield?

Mr. DELLUMS. I yield to my distinguished colleague. the ranking minority member of the committee. the gentleman from Connecticut (Mr. MCKINNEY).

Mr. MCKINNEY. Mr. Speaker, I rise in support of H.R. 10311 and urge its adoption. There is probably no more pressing issue in the District than the lack of adequate and reasonably priced housing. H.R. 10311 would aid the District government's efforts to effectively address this issue.

H.R. 10311 does two things. First, it clarifies an ambiguity contained in the Redevelopment Act of 1945 concerning whose consent is necessary to make changes in a District of Columbia urban renewal plan. This ambiguity has led to litigation which has held up a much needed low- and moderate-income housing project in southwest for 4 years.

In essence the Redevelopment Act is unclear as to whether consent is required from all owners and lessees of property in the urban renewal plan area being modified or only from the specific owner of the property in the area being modified. According to the U.S. Court of Appeals for the District of Columbia in a decision remanding the pending lawsuit back to the U.S. district court for further hearing, the law can be read either way.

In order to clarify the congressional intent with regard to local procedures for modifying urban renewal plans, section 1 to H.R. 10311 utilizes Congress' reserved power under the act to directly modify District urban renewal plans to effect the changes in the southwest urban renewal plan so that construction on the low- and moderate-income housing in southwest can begin without further delay.

What we are saying is that Congress will directly effect this transfer now so that construction on this desperately needed housing can get underway, and at the same time will clarify the procedures for the local government to effect such changes in the future.

In view of the housing situation in the District, I believe that H.R. 10311 is important for the city, and I urge my colleagues to support this measure.

Mr. HARRIS. Mr. Speaker, will the gentleman yield?

Mr. DELLUMS. I yield to the gentleman from Virginia.

Mr. HARRIS. Mr. Speaker, I rise in support of the legislation.

The subcommittee hearings indicated that it is indeed unfortunate that this legislation was delayed to the extent it has been. I think it is important to get the legislation enacted.

Mr. KINDNESS. Mr. Speaker, I move to strike the requisite number of words.

Mr. Speaker, I would like to direct a question to any Member who would care to respond on behalf of the committee.

It is my understanding from the explanation which has been given that there would not be the necessity for the consent of any adjoining property owners to a change of use if this legislation is to become law; is that correct?

Mr. DELLUMS. Mr. Speaker, if the gentleman will yield, they would be allowed to participate in the hearings and to testify as to their feelings with respect to the modification, but their consent is not required nor are they capable of vetoing the modification.

Mr. KINDNESS. They would be entitled to notice of hearings?

Mr. DELLUMS. That is correct. That is mandated by the law.

Mr. KINDNESS. Mr. Speaker, I have one further question, if the gentleman will respond.

Is there any right at all that an adjoining property owner might be able to assert to keep a use from changing to

the detriment of that adjoining landowner?

Mr. DELLUMS. They could protest or reflect their views before the RLA or they could register their views with the Council, and if that did not work or if the Council decided to act in opposition to their concerns, they could go to court.

Mr. MATTOX. Mr. Speaker, will the gentleman yield?

Mr. KINDNESS. I yield to the gentleman from Texas.

Mr. MATTOX. Mr. Speaker, I think it is not accurate to say that they have any basis on which to go to court. They have no right at all to go to court, and they have no justification for a suit.

I am concerned that this legislation is before us, because basically what is happening in this legislation is that they are adopting a procedure that is different from any other zoning procedure in the entire country. Generally, when they engage in spot zoning—and that is in effect what this is—the property owners in the general area have a right to raise their objections. Property owners whose property is located perhaps 100 feet, 200 feet, or may be 300 feet away have a right to object to that spot zoning. If their objections are not heard or are not upheld and they are overruled by the governing body, then they have a right under ordinary circumstances to go to court.

But that would not be the fact in this particular circumstance. The agency can run roughshod right over the individual, and he or she has no rights to litigate. They can litigate, but they have no property rights to defend. In effect, this entire change in the law would modify the covenant agreement that exists between the Redevelopment Agency and those property owners around parcel 76 after they have developed their property.

Mr. KINDNESS. The gentleman is quite correct, and it concerns me that we may be treating this a little bit too quickly or lightly, in that the people who have developed or redeveloped properties in parcel C have done so in reliance on mutual covenants as to restricting the use of land to fit in with the redevelopment plan.

Obviously, that plan cannot remain constant forever, and I certainly do not mean to imply that there ought not be a procedure that could accommodate change, but I do feel that this bill may go too far in depriving adjoining property owners of the right to rely on the nature of the redevelopment of the property that adjoins them.

Mr. DELLUMS. Mr. Speaker, will the gentleman yield?

Mr. KINDNESS. I yield to the gentleman from California.

Mr. DELLUMS. I thank the gentleman for yielding.

Mr. Speaker, as I understand the consultation with our legal staff, that common law and property law would give standing in any court if, indeed, people felt that their property rights were being violated or that there was waste involved. After the administrative remedies have been exhausted, they then do have standing in the court, given common law and property law, on those two points, property rights and waste.

Mr. KINDNESS. Mr. Speaker, the gentleman is absolutely correct that, if there is a nuisance created on an adjoining property, there might be such a right, on that basis, in court, and if the adjoining property was to be further developed as to cut off light, some of the more ancient common law principles might be applied. But in a redevelopment area we are talking about reliance on adjoining properties being developed in accordance with a plan of redevelopment of a whole area, and I believe people have a right to rely on that to some degree. I believe we may be overreacting to a situation in which other property owners just may be getting in the way of what may be a very proper redevelopment in these parcels.

Mr. MATTOX. Mr. Speaker, I move to strike the requisite number of words, and I rise in opposition to this legislation.

Mr. Speaker, let me announce to the body at this time that I am, in effect, a property owner. My house is directly across the street from this redevelopment, so I speak with some interest about it. I think that the most important thing to point out is that this particular piece of legislation is a piece of legislation that changes basic zoning and covenant-type law in respect to parcel 76. I doubt if any Member of this House can cite me one single piece of zoning legislation or zoning ordinance in this entire country that allows only the individual who is selling the property to have the impact that is taking place in this legislation. I do not think anyone can cite it to me. The reason that that is the case, in effect, is that this redevelopment agency establishes a covenant with all of those people who developed the property around and in compliance with that particular plan. Then to summarily come in and change the plan, in effect, does not allow those property owners to carry out their property rights.

I think it is improper for that to take place. I suspect that this body and the committee here will probably pass this legislation, and I think that that would be improper, particularly when there is a lawsuit that is now pending and legal actions are still going on, to usurp the power of that court to formulate a decision. I think this is particularly true when those individuals out there are trying to carry out their property rights.

The part about the common law and what action you have in common law, you can sue anybody in common law, but if you pass this legislation, though, you are going to do away with your common law rights of the individuals, and I would hope that this body would reject this piece of legislation.

● Mr. FAUNTROY. Mr. Speaker, I rise in support of H.R. 10311, a bill amending the District of Columbia Redevelopment Act of 1945. I would also like to thank the chairmen of both the subcommittee and the full committee for their diligent work on this bill. This is a simple bill which seeks to do two things:

First. Clarify an ambiguity in the District of Columbia Code which presently may have as its effect the grant of a veto every owner or lessee in a designated urban renewal area over any plan amendment in the urban renewal area. This reading, which has been put upon the statute, creates an unworkable urban renewal process and is presently, with respect to the Southwest Urban Renewal Project Area C, preventing two projects, which have all of the other approvals necessary, from going forward and being implemented. If allowed to continue, this statutory ambiguity will have an adverse impact upon every other urban renewal district in this city. This bill aims to remove that ambiguity.

Second. Through the exercise of a right which is reserved exclusively and absolutely to the Congress itself, approve the two plan amendments which authorize the construction of housing on parcel 76 and an extension to a waterfront inn on parcel D–2–B. This is a right which the Congress may exercise with or without the consent being given by the other lessees or owners in such urban renewal areas. In this case, it will terminate the need for further litigation that has arisen over this ambiguity and permit the construction of housing which has been approved by all involved agencies and which was, in fact, a part of the original urban renewal plan. It will also permit a waterfront inn to construct an additional 50 rooms to which there is no expressed opposition from any of the parties in litigation as evidenced by the correspondence between them.

This leads me, Mr. Speaker, to my final point. We have, in this instance, an opportunity to assure that our goal of intermixing low-, moderate-, and upper-income housing can be fulfilled. Housing for persons of low and moderate income is an important component of successful urban renewal programs. The Southwest Urban Renewal Project is one of the oldest—both locally—and in the Nation. What this Congress does to implement the urban renewal project will largely determine whether or not other urban renewal undertakings purportedly aiding those with low and moderate incomes will have a chance to succeed.

This bill is important to me not only because it ends the ambiguity of the law, thus, permitting the completion of these important projects, but also because it reaffirms our decision that those with low and moderate incomes are an integral part of successful urban renewal projects in this Nation.●

● Mr. DIGGS. Mr. Speaker, the purposes of the bill (H.R. 10311) are first, to clarify an ambiguity in the District of Columbia Redevelopment Act of 1945, and second, to approve certain amendments to the urban renewal plan for Southwest Urban Renewal Project Area C in the District of Columbia.

Presently, there is an ambiguity concerning the scope of the class of persons whose written consent is required to effectuate a modification of an approved project area redevelopment plan. The ambiguity is whether consent is required from all owners and lessees of property in the area who deem themselves affected

by the modification, or whether consent is required only from the particular owner or lessee of the property whose planned use is being modified.

The bill would amend the District of Columbia Redevelopment Act to reaffirm the intent of the Congress that only the owner or lessee of the particular parcel of land whose use is being modified is required to give consent thereof under the statute. This was the intent when the Congress enacted the Redevelopment Act of 1945, and this is still the proper interpretation of the act, in the judgment of the Committee on the District of Columbia which authored the legislation in question.

Congress was the prime mover, starting in the District of Columbia, in slum clearance and redevelopment projects in our major cities. Hence, the enactment of the legislation authorizing the District of Columbia Redevelopment Land Agency to acquire and clear land in blighted and substandard areas, and sell it to private redevelopers for development in accordance with an areawide plan.

These land clearance and redevelopment projects of necessity involve long-range planning, and the RLA Act specifically details procedures therefor, adoption of an approved urban renewal plan, and provisions for modifications necessitated by desirable changes suggested or recommended by interested parties during prolonged hearings and consideration by the agencies delegated to study and approve the end project.

The committee report outlines some of the detailed efforts that have been a part of the "Parcel 76" proposed rehabilitation of the southwest District of Columbia area involved herein.

The committee, as stated in its report, finds it is unreasonable to expect an urban renewal plan, once adopted to remain unchanged throughout its duration.

So with proposed "modifications," parties in interest have a legitimate concern. But it is not responsible for them to assume that all property owners in an urban renewal area must consent to, and thus in effect, have the right to veto, all modifications for the duration of an urban renewal plan.

Hence, the clarifying change offered by the committee to enable the RLA to proceed toward its goals for the southwest area under what the committee feels is the proper interpretation of the 1945 act.

H.R. 10311, in addition, approves two urban renewal plan amendments in southwest Washington by authorizing first, a low- and moderate-income housing development, and second, a waterfront inn expansion project.

These proposals have already been the subject of lengthy hearings and study by the council, the National Capital Planning Commission, and the D.C. Redevelopment Land Agency.

The amendments will permit the District of Columbia to accomplish its objectives of providing much-needed housing on Parcel 76 in the southwest, and permitting long-delayed commercial expansion of the waterfront to proceed, thus contributing to the city's economic strength and vitality.

Adoption of H.R. 10311 will help measurable to start the pace of urban renewal in southwest Washington zoning again.●

Mr. DELLUMS. Mr. Speaker, I move the previous question on the bill.

The previous question was ordered.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

## CONFERENCE REPORT ON S. 3075, INTERNATIONAL SECURITY ASSISTANCE ACT OF 1978

Mr. ZABLOCKI. Mr. Speaker, I call up the conference report on the Senate bill (S. 3075) to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act, and for other purposes, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see Proceedings of the House of September 7, 1978.)

Mr. ZABLOCKI (during the reading). Mr. Speaker, I ask unanimous consent to dispense with further reading of the statement.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

The SPEAKER pro tempore. The gentleman from Wisconsin (Mr. ZABLOCKI) will be recognized for 30 minutes, and the gentleman from Michigan (Mr. BROOMFIELD) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Wisconsin (Mr. ZABLOCKI).

Mr. ZABLOCKI. Mr. Speaker, I yield myself such time as I may consume.

The major purpose of the conference report on S. 3075 is to authorize the appropriation of funds to finance U.S. international security asssistance programs for fiscal year 1979.

First, concerning our international security assistance programs for fiscal year 1979, as agreed to by the conferees on August 15, the report authorizes an appropriation for international security assistance of $2,817,500,000. Including the economic support fund, amounts for which the House authorized in the International Development and Food Assistance Act of 1978 (H.R. 12222), the total authorization represents a reduction of $36,800,000 from the amounts authorized by the House on August 2, a decrease of $32.5 million in the Senate figure, and an increase of over $28.2 million the amount requested by the executive branch.

The specific authorizations contained in the bill are as follows: $133.5 million for grant military assistance; $31.8 million for international military education and training; $1,902 million for the economic support fund; $30.9 mililon for peacekeeping operations; $674.3 million for foreign military sales financing. This amount will finance the sale of $2,085,500,000 worth of defense articles and defense services during fiscal year 1979; $5 million for the contingency fund; $40 million for international narcotics control programs.

On other items of major interest, the conference report also:

Lifts the Turkish arms embargo. The conference report follows the House provision which provided that the embargo on the export of arms to Turkey embodied in section 620(x) of the Foreign Assistance Act would be of no further force and effect. That fact would be contingent upon a Presidential determination and certification to the Congress covering two points: First, that resumption of full military cooperation with Turkey is in the national interest of the United States and in the interest of NATO; and second, that the Government of Turkey is acting in good faith to achieve a just and peaceful settlement of the Cyprus problem.

Those in the House who had strong views on the Turkish arms embargo question and who worked diligently to uphold their position can be assured that the House conferees succeeded in protecting their interests. This issue was carefully resolved by preserving more of the House provision than the Senate approach which involved a flat repeal of section 620(x). Further, the conference report stresses that Congress will continue to assess and examine how it can best promote political and military stability in the eastern Mediterranean, reduce tensions between Greece and Turkey, and help promote progress toward a Cyprus settlement.

Concerning the authorization for a transfer of military equipment to Korea, the committee of conference authorized the President to transfer defense articles and services to Korea only in conjunction with the withdrawal of the 2d Infantry Division and support forces. Thus, the rate and proportion of defense articles transferred shall correspond to the rate and proportion of the troop withdrawals. Further, the authorization of this equipment transfer in no way diminishes the expression of serious concern about the troop withdrawal program. Finally, it stipulates the expectation of full consultation in advance of further troop withdrawals.

Concerning the Rhodesia embargo, the House conferees kept in mind the strong sentiments of the House as expressed in the Ichord amendment. We therefore did our utmost to stay as close as possible to the House position.

The conference report provides that the United States shall not enforce sanctions against Rhodesia after December 31, 1978, provided that the President determines first that the Government of Rhodesia has demonstrated its willingness to negotiate in good faith at an all-parties conference held under international auspices on all relevant issues; and second, that a government has been in-

stalled chosen by free elections in which all political and population groups have been allowed to participate freely, with observation by impartial, internationally recognized observers.

This compromise provision thus embodies the following key features of the Ichord amendment, as opposed to the Case-Javits amendment:

The provision enables a permanent lifting of the embargo after a set date as in the Ichord amendment, rather than a temporary lifting during a limited period of time.

The Presidential determination regarding a peace conference and free elections is obligatory upon fulfillment of the conditions set forth in the law, as opposed to the Senate version which did not require a determination.

As is obvious, the language itself is predominantly taken from the language of the Ichord amendment and the overall structure, language and approach of the conference report is much closer to the straightforwardness of the Ichord amendment.

Mr. Speaker, the conference report on S. 3075 also contains important provisions aimed at improving the information available to the Congress concerning arms sales. For example:

A new reporting requirement was added for arms sales proposals which must be submitted to Congress by November 15 of each year. It will set forth the most authoritative estimate of major sales which the executive branch contemplates for possible submission to the Congress during the fiscal year.

A new quarterly report on security assistance surveys authorized during the preceding calendar quarter was added.

A new requirement for additional information relevant to major arms sales proposals submitted under 36(b) was added.

As mentioned earlier, the conference report authorizes $1,902 million for the Economic Support Fund. In the past, this program was designated "security supporting assistance." The conferees agreed that the term "economic support fund" more properly reflects its nature and purpose. It is economic assistance in areas of particular importance to the security and political interests of the United States.

Mr. Speaker, perhaps the most volatile region in the world today is the Middle East. Elusive as the prospects for a lasting peace seem, every effort must continue to be made toward a just settlement in that troubled area.

In an effort to help in this process toward peace, the conference committee recommends the use of $1,776 million from the economic support fund.

Of this amount, $785 million is earmarked for Israel, $750 million for Egypt, $93 million for Jordan.

In addition, it is the intent of the Committee of Conference that $90 million be provided for Syria, and $50 million for the Maqarin Dam project.

The total amount earmarked for Israel may be available as a cash transfer if the President insures that it does not have an adverse impact on U.S. nonmilitary exports to Israel.

Furthermore, to insure that the sentiments of Congress concerning the situation in the Middle East remain clear, the bill contains a policy statement that the United States should continue to promote negotiations and encourage other Arab states to enter into negotiations, and that the United States should be responsive to Israel's economic needs and defense requirements including the provision of additional advanced aircraft to maintain Israel's defense capability which is essential to peace.

With regard to the economic support fund assistance for southern Africa, the conference report authorized $60 million.

Finally, $15 million was earmarked in the conference report for refugee relief and reconstruction for Cyprus.

Mr. Speaker, this is a good conference report. It is the product of long hours of hard work and honest negotiation. House conferees were diligent and determined in upholding House interests and positions. In the judgment of the conferees, it combines the best features of both the House- and Senate-passed bills.

It fully merits support and I therefore urge my colleagues to approve the conference report.

Mr. BROOMFIELD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of the conference report to S. 3075—the International Security Assistance Act of 1978. The conference report preserves principal provisions of the security assistance legislation initially passed by the House and warrants our support.

In particular, the report we have before us provides for the maintenance of our overall security interests—and as a result—acts as an important counter to the ever-growing Soviet military threat.

As my colleagues well know, the projection of Soviet power in the eastern Mediterranean poses numerous problems to our good friends and allies on the southern flank of NATO. In this regard, I believe that the conference report we have before us today will help to encourage an accommodation in the eastern Mediterranean which will be in the best interests of all parties to the Atlantic Alliance. In particular, the $35 million earmarked for grant military assistance to Greece, which was included in the House-passed legislation and agreed to by the Senate conferees, is intended to maintain a balance in total security assistance for the eastern Mediterranean. In this way, the structure of NATO will be further strengthened against the Soviet threat. Also, conferees agreed to earmark $15 million for sorely needed refugee relief and reconstruction on Cyprus.

As my colleagues are aware, the Soviets, with growing military strength, are intent upon outflanking our near Eastern friends and jeopardizing our oil supplies. In this regard, the conference helps to offset the Soviet Union's increasing encirclement of the Middle East by providing essential support to our friends in that region of the world. The Senate conferees, for example, adopted the House position on the authorization of foreign military sales credits, which provides for a $1 billion foreign military sales program for Israel alone. This assistance is fundamental to Israel's security needs and will provide Israel with confidence in negotiating with its Arab neighbors for peace in the Middle East.

The conference also agreed to include an economic support fund, which was in the Senate Security Assistance bill and transferred from the House Economic Assistance bill. This fund earmarks money for Israel, Egypt, and Jordan. In relation to the economic support fund, the House adopted a provision of the Senate bill which would provide at least $65 million authorized for Egypt to be used for the development and encouragement of private enterprise.

Although the conference report is important in countering the ominous Soviet military threat worldwide—it does little to offset the Communist threat to our internal security, namely the influx of Communists into the United States. I was particularly disturbed when the Senate conferees failed to successfully defend its nonimmigrant visa provision as introduced by Senator BAKER and adopted on the Senate floor. This provision, which repealed the MCGOVERN amendment, would have had the effect of keeping members of proscribed organizations out of the United States unless the State Department requests a waiver to admit them.

To be sure, our policy toward the Soviet Union should be predicated to some extent on the Soviets' willingness to maintain their commitments as signatories to international agreements. While the Soviet Union continues to flagrantly violate human rights and has been far from fully satisfying the movement of people as provided by the Helsinki accords, I believe that the Baker provision would have been the more effective response, not only in potentially keeping Communist agents out of the United States, but also members of the Palestinian Liberation Organization.

Overall, however, the Committee of Conference retains a number of provisions initially approved by the House while at the same time providing for the achievement of important national and international security objectives. For these reasons, I urge my colleagues to approve the conference report to S. 3075—the International Security Assistance Act of 1978.

Mr. BROOMFIELD. Mr. Speaker, at this time I yield 2 minutes to the gentleman from Maryland (Mr. BAUMAN).

Mr. BAUMAN. Mr. Speaker, I rise for a number of reasons in opposition to this conference report, but I also want to ask some questions of the chairman regarding at least two sections of the bill.

First, let me point out to the membership that section 22 of the conference report contains an entirely new

authorization for foreign travel by Members of Congress and their staffs. In effect, this new section allows a perpetual authorization for the Secretary of the Treasury to purchase foreign currencies to be used for congressional travel expenses, without any of this money having to be appropriated by the Congress. I personally opposed this permanent appropriation and regret that an annual authorization was not required.

This section does contain, however, certain amendments which I offered requiring that any such expenditure of foreign currency by Members or their staff be reported within 30 days of their return and that each calendar quarter these records be made available in the RECORD. They will also be public as soon as they are filed. Perhaps this may act as a needed restraint on any excesses which may occur.

Now, Mr. Speaker, I would like to address some questions to the distinguished gentleman from Wisconsin (Mr. ZABLOCKI).

As the gentleman well knows, on page 6 of the conference report, the southern African program, funding is provided in the amount of $60 million. The other body had provided amounts of money earmarked for humanitarian assistance and establishment of educational and other training programs in Rhodesia. My concern stems from the statement appearing on page 45 of the report, which says that this assistance will be available to refugees "from or in Rhodesia," and shall be channeled through international organizations. I am concerned that in some manner or means these moneys may in fact go to the guerrilla forces or in some way be used to assist those who are fighting against the current transitional Government of Rhodesia. I think that is the last thing that we would want American tax dollars to be doing.

Mr. ZABLOCKI. Mr. Speaker, if the gentleman will yield, I can assure the gentleman that there are no funds for the guerrilla forces.

I might add that the other body had earmarked funds, for Rhodesia. The conference report we bring back does not earmark those funds as the language on page 6 will confirm.

As to the gentleman's question on page 45, the assistance to refugees "from or in Rhodesia" would be to bona fide refugees, and those programs would be administered by appropriate international organizations. If the Rhodesian Government, for example, would have an adequate and legitimate refugee program, then the answer that I presume the gentleman seeks would be yes and these funds would be available to the Rhodesian Government, in my opinion, for Rhodesian refugees.

Mr. BAUMAN. So that not only is it the intention of the conferees to prevent this money from assisting the guerrilla activities, but, in fact, there is no prohibition against direct aid to the current Government of Rhodesia for refugee purposes.

Mr. ZABLOCKI. If they were for refugee purposes, and, hopefully the Government of Rhodesia also would agree that whatever is available through international organizations, that they would support such a program.

The SPEAKER. The time of the gentleman has expired.

Mr. BROOMFIELD. Mr. Speaker, I yield 2 additional minutes to the gentleman from Maryland (Mr. BAUMAN).

Mr. BAUMAN. Mr. Speaker, I thank the gentleman for yielding me this additional time.

The other question I wanted to ask the gentleman is in regard to the language lifting the embargo, on page 30 of the conference report. In my view there is no question that the President is obligated to make a determination upon the occurring of the two events, that is, the willingness to negotiate on the part of the government and the holding of free elections on the part of the current government.

This report seems to indicate that any number of people, the phrase used is "many people may express their opposition to the internal settlement by voluntarily refraining from voting," might lend itself to an excuse not to determine that, in fact, these events had occurred. I would hope that this would not be used as an excuse to refuse to lift the embargo.

Mr. ZABLOCKI. That is the intention of the conferees, and it is not intended that the language the gentleman refers to in the statement of managers on page 30 "that many people may express their opposition," that is an exception, but by many people we do not mean two or three, it would have to be thousands before the President would consider a negative Presidential determination.

Mr. BAUMAN. I also assume that none of the international groups that are mentioned here that may supervise or deal with the funds I just mentioned, would include groups that have, in fact, shown partiality to the guerrilla groups, like the World Council of Churches.

Mr. ZABLOCKI. We would expect the international organization that would administer the refugee fund to be sympathetic to the refugees.

Mr. BAUMAN. I thank the gentleman for his responses, although I would like to see the immediate lifting of the embargo particularly in view of the guerrilla attack on the Rhodesian airliner in the last few days. This atrocity is only the latest in a lengthy chain of murderous acts committed by the guerrillas against blacks and whites, young and old, so that thousands have died at their hands.

It is clear that the use by the guerrillas of heat-seeking missiles against a defenseless civilian airliner is still more evidence of the Soviet involvement in Rhodesia. Only today I have heard rumors of the massing of Cuban troops on the borders of Rhodesia. And all this activity is directed against the official interim government which is headed by three blacks and one white, all seeking a peaceful transition to majority rule.

To me it is the shame of this administration that they have sided with the murderers and Communists, against those who seek a peaceful solution. By lifting the embargo now we could at least assist those who share our goals for a peaceful Africa in which the rights of all races are protected.

Mr. ZABLOCKI. Mr. Speaker, I yield 5 minutes to the gentleman from Missouri (Mr. ICHORD).

Mr. ICHORD. Mr. Speaker, I appreciate the gentleman's yielding.

I take this time for the purpose of further establishing a legislative record on the compromise Rhodesian amendment.

As the gentleman from Maryland (Mr. BAUMAN) and the chairman have stated, my amendment, which was adopted by the House, provided for lifting sanctions on December 31, 1978, unless the President found that certain things did not exist. The language of the compromise provides for a lifting of sanctions on December 31, 1978, provided the President finds that certain conditions do exist.

I do agree with the distinguished chairman of the committee. The compromise language is a distinct improvement over the original Case-Javits amendment, which was extremely ambiguous. However, I find that there is still some ambiguous language in my own mind; and I think that a clarification should be made for the record.

Therefore, Mr. Speaker, I would ask the distinguished chairman this question: It is the chairman's understanding, is it not, that prior to December 31, 1978, the President, under the conference committee language, under the compromise, is obliged to make a determination based upon the conditions set forth and that the basis of such a determination would be transmitted to both Houses of Congress for review?

Mr. ZABLOCKI. If the gentleman will yield, Mr. Speaker, I would say to the gentleman that the Rhodesian embargo would be lifted, and the United States would not enforce sanctions against Rhodesia after December 31, 1978, unless the conditions enumerated in the legislation are not met.

Mr. ICHORD. The compromise language provides that the sanctions shall be lifted on December 31, 1978, provided that the Government of Rhodesia has demonstrated its willingness to negotiate in good faith at an all-parties conference held under international auspices.

Let us suppose that the U.N. or the international body referred to does not choose to oversee the conferences, and also that they did not provide observers for the free elections provided therein. Would that be considered as making the conditions null and void?

Mr. ZABLOCKI. If the gentleman will yield further. I would say no. In my judgment, the United States and the British, acting as observers, would satisfy the requirement for international observers as included in the language which is presented in the conference report at page 17.

Mr. ICHORD. Would the distinguished chairman define for me the phrase "will-

ingness to negotiate?" It says that the sanctions shall be lifted provided the President determines that the Government of Rhodesia has demonstrated its "willingness to negotiate."

What I am asking is, What must the Rhodesian Government do to satisfy this precondition?

Mr. ZABLOCKI. It is my judgment that a willingness to negotiate would be satisfied once the Rhodesian Government has shown a readiness to go to the conference table on this issue; in other words, to attend and participate in the conference in good faith. That would, in my opinion, satisfy the requirement to which the gentleman refers, the "willingness to negotiate."

Mr. ICHORD. I would quote to the gentleman from the Washington Post. This morning's Washington Post quotes Nkomo as saying that the British-American plan for an all-parties conference to end the Rhodesian war is now dead and buried.

The SPEAKER pro tempore. The time of the gentleman from Missouri (Mr. ICHORD) has expired.

Mr. ZABLOCKI. Mr. Speaker, I yield 5 additional minutes to the gentleman from Missouri (Mr. ICHORD).

Mr. ICHORD. To continue, Mr. Speaker, it says that he would meet Rhodesian Prime Minister Ian Smith only at a surrender conference.

How is this going to affect the compromise amendment? Apparently Nkomo is not willing to have an all-parties conference as proposed by the British-American plan.

Mr. ZABLOCKI. I, unfortunately, have not read the article. It is my understanding, I will say to the gentleman, that Ian Smith has expressed the desire to cooperate and negotiate, and although Nkomo has taken a hard line in this matter he is only one person. The situation is moving so rapidly in Rhodesia that one cannot foresee what will happen. In my judgment Nkomo's position as reported in the Washington Post is not necessarily the final word.

Mr. ICHORD. The chairman would agree that it would not bar—that action of Nkomo as read from the Washington Post—the fulfilling of that condition.

Mr. ZABLOCKI. I would, yes.

Mr. ICHORD. As a final point, I would like to ask the chairman to define the term "relevant issues." The condition says the Government of Rhodesia has demonstrated its willingness to negotiate in good faith at an all-parties conference held under international auspices on all relevant issues. How would the chairman define the term "relevant issues"?

Mr. ZABLOCKI. Will the gentleman yield?

Mr. ICHORD. Yes, I yield to the gentleman.

Mr. ZABLOCKI. The report on page 30 clearly states under subsection (e)—

"All relevant issues" to be considered at an all-parties conference include, among other things, the terms of majority rule, the protection of minority rights, the Anglo-American plan, and the terms of the Salisbury Agreement.

The gentleman knows and is familiar with the explanation that I have just read from the statement on the part of the managers, in addition I would like to say to the gentleman that this is neither an all-inclusive or final list that I have read. It is illustrative of the issues which the conferees thought would be inherent in any discussion of a peaceful settlement of that conflict. In addition, I would say that it would also include other economic and political matters which would be of interest to the people of Rhodesia, including the white population, such as property and voting rights.

Mr. ICHORD. I appreciate the gentleman's clarifying the record on what I consider to be some of the ambiguous terms of the compromise. I realize that the position of the Senate conferees was very adamant, but I would still express the concern to the House that we put conditions upon the transitional government, but nowhere do we mention any conditions on the Patriotic Front, which is, of course, dedicated to achieving power at the point of a gun and a force responsible for the indiscriminate killing and raping and mutilating of innocent Rhodesians, both black and white. I particularly refer to Mugabe's forces, not so much to Nkomo's forces, because I think that Nkomo probably, or under certain conditions at least, would be willing, although he stated he would not, to sit down and negotiate. I can only hope that this language will help to bring about a government that truly represents the best aspirations of the Rhodesian people, both black and white.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. ZABLOCKI. Mr. Speaker, I yield myself 1 additional minute just to comment on the gentleman's observations. We all abhor the atrocities that are occurring in that area of the world. The conferees intend to establish the conditions in which cooperation in the area can develop. We have included in our conference report almost verbatim the gentleman's amendment, and I am sure we are just as sincere as he is to see that the right thing is done in that area of the world.

Mr. BROOMFIELD. Mr. Speaker, I yield 1 minute to the gentleman from Illinois (Mr. DERWINSKI).

Mr. DERWINSKI. Mr. Speaker, I urge my colleagues to support the conference report to S. 3075—the International Security Assistance Act of 1978. This report retains important provisions of security assistance legislation originally passed by the House.

Moreover, the conference report is fundamental to our national and international security interests—and will help to offset the current Soviet threat.

The Soviet Union continues to escalate its arms buildup and to project its naval power worldwide. In particular, the Soviets are now threatening to encircle our good friends and allies in the eastern Mediterranean.

In this regard, the conference report earmarks $35 million in grant military assistance to Greece. This amount of grant assistance to Greece was included in the House-passed legislation and was agreed to by the Senate conferees. To be sure, the grant military assistance to Greece will help to strengthen the structure of NATO and counter the Soviet threat.

The conference report to S. 3075 also provides necessary support to our Middle East friends. The conference, for example, provided for a $1 billion foreign military sales program for Israel and earmarked economic support fund moneys for Israel, Egypt, and Jordan.

Furthermore, the conference report to S. 3075 addresses U.S. security concerns in Asia. The conference authorized the transfer to Korea of U.S. defense equipment as the President withdraws U.S. forces from Korea. It also maintained the initially passed House position that the President shall submit a report to the Congress on the effect of any proposed withdrawal plan prior to further withdrawal. The committee of conference also adopted the position that proposed policy changes affecting the Mutual Defense Treaty with the Republic of China shall be a matter for prior consultation with the Congress—and not simply the Senate.

While this legislation is important in meeting the external Communist threat, it does not meet the problem of Communists and representatives of other proscribed organizations entering the United States under the guise of trade unionism. Unfortunately, the Senate conferees abandoned Senator BAKER'S nonimmigrant visa provision which was adopted by the full Senate.

To some extent, I was also disturbed over the fact that the conference did not provide the executive branch with more flexibility by increasing the amount of the contingency fund, consistent with my amendment.

I believe that overall, however, the committee of conference adequately provides for the meeting of important national and international security objectives. As a result, I urge a favorable vote on the conference report to S. 3075.

Mr. BROOMFIELD. Mr. Speaker, I yield 2 minutes to the gentleman from Ohio (Mr. ASHBROOK).

Mr. ASHBROOK. Mr. Speaker, I urge the defeat of the conference report on S. 3075, the International Security Assistance Act for fiscal year 1979. My objection centers on the provisions regarding Rhodesia.

I believe the House acted wisely when it approved the Ichord amendment on August 2. This important amendment would lift economic sanctions against Rhodesia once that nation holds free elections and a freely elected government is installed.

Unfortunately, the conferees have adopted language much closer to the Senate version. Sanctions would be lifted only if the President determines that a freely elected government is installed and that Rhodesia demonstrates its wil-

lingness to negotiate in good faith at an all-parties conference held under international auspices. What we are left with is language basically upholding President Carter's plan of imposing Patriotic Front rule in Rhodesia.

We have seen all too well the brutal activities of the Patriotic Front's black guerrillas. These pro-Communist terrorists use hit-and-run raids to slaughter innocent civilians.

A few weeks ago we saw photographs of the bloody massacre of a dozen British missionaries. We have seen pictures of women and their babies killed by these so-called liberation forces. And now this week they admittedly shot down a civilian Rhodesian airliner. After the crash, 10 of the 18 survivors were rounded up and executed by machine-gun fire and bayonet thrusts.

How long will we stand back and watch such activities continue? It is time to remove economic sanctions against Rhodesia and support the moderate internal settlement.

The conference report, however, backs the concept of an all-parties conference. Such a conference is dead. Let me quote what the radical guerrilla leader Joshua Nkomo said yesterday. As far as he is concerned, the British-American plan for an all-parties conference to end war is "dead now and buried." He will meet with Smith only at a "surrender" conference.

Why are we still insisting that Rhodesia show its good faith to participate in an all-parties conference while the leader of the black guerrillas has no intention of participating in any such conference? Our position is absurd.

Again, it is time to end our support for the terrorists and guerrillas. We should defeat the conference report and insist on language such as the Ichord amendment.

● Mr. YOUNG of Missouri. Mr. Speaker, because of a prior commitment I will be unable to cast my vote on the conference report on the International Security Assistance Act of 1978.

I supported the House version of this legislation, and I also support this conference report. Under the bill, the State of Israel would receive about $785 million in economic support funds as well as a substantial amount in military credit and sales. In addition, the report contains strong language in support of the continued U.S. military and economic assistance for Israel.

I believe it is essential for this Nation to continue it traditional commitment to Israel, and I believe that this conference report reflects that policy.●

● Mrs. LLOYD of Tennessee. Mr. Speaker today Members of the House of Representatives were asked to make a difficult decision about this country's ability to continue our international security assistance programs for fiscal year 1979. I opposed this funding because I do not feel that we can continue to ask taxpayers to sponsor deficit spending in this fashion. We no longer have the fiscal capability to meet both domestic and international needs solely from our limited national resources.

We cannot afford to give as freely and generously as we have in the past and the countries into which we have poured billions of dollars must face that fact now. We now find ourselves in the position of borrowing money to give it away, and it is unconscionable for the Government to expect American taxpayers to accept this type of fiscally irresponsible spending.

As long as there are serious domestic needs here in our country, I will not support the expenditure of our tax dollars on foreign needs. To begin moving toward a balanced budget we must make cuts in Government spending elsewhere. I would rather see decreases in our foreign assistance programs as opposed to cutting the budget in areas which will directly deprive American citizens of programs which are vitally important to them.

I deeply regret that by voting against this bill I am in the position of voting against assistance to Israel, a nation which has borne the brunt of its own defense. Israel is a nation determined to fight for its existence, a fight which, without the outside interference of the Soviet Union, it would easily win.

President Carter, Prime Minister Begin and President Sadat are at this time meeting in an effort to move ahead on the road to achieving peace in the Middle East. This type of personal interchange is extremely important in the resolution of this three-decade old Arab-Israeli conflict. I feel that it is critical that this summit meeting now indicates that the United States has moved to become a full partner in achieving this peace.

In light of these circumstances, I feel that continued U.S. assistance to Israel is fully justified and deserved, and I would support such a proposal if offered independently of this bill. Since this was not the case, I reluctantly voted against the International Security Assistance Act of 1978 conference report.●

Mr. BROOMFIELD. Mr. Speaker, I yield back the balance of my time.

Mr. ZABLOCKI. Mr. Speaker, I have no further requests for time.

Mr. Speaker, I move the previous question on the conference report.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the conference report.

There was no objection.

The SPEAKER pro tempore. The question is on the conference report.

Mr. BROOMFIELD. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 225, nays 126, not voting 81, as follows:

[Roll No. 761]

The Clerk announced the following pairs:

On this vote:

Mr. Addabbo for, with Mr. Mitchell of Maryland against.

Mr. Richmond for, with Mr. Conyers against.

Mr. Fary for, with Mr. Teague against.

Mr. Krueger for, with Mr. Miller of California against.

Mr. Ashley for, with Mr. Risenhoover against.

Mrs. Chisholm for, with Mr. St Germain against.

Mr. Fuqua for, with Mr. Beard of Rhode Island against.

Mr. Garcia for, with Mr. Whitten against.

Mr. Hawkins for, with Mr. Breaux against.

Ms. Holtzman for, with Mr. Roncalio against.

Mr. Weiss for, with Mr. Stump against.

Mr. Zeferetti for, with Mr. Hansen against.

Mr. Young of Missouri for, with Mr. Byron against.

Until further notice:

Mr. Ammerman with Mr. Frenzel.

Mrs. Burke of California with Mr. Goldwater.

Mr. Cornwell with Mr. Kasten.

Mr. Fraser with Mr. Fish.

Mr. Florio with Mr. Sarasin.

Mr. Murphy of New York with Mr. Rudd.

Mr. Tsongas with Mr. Quie.

Mr. Stratton with Mr. Symms.

Mrs. Spellman with Mr. Wiggins.

Mr. Rodino with Mr. Edwards of Alabama.

Mr. Barnard with Mr. Dickinson.

Mr. D'Amours with Mr. Del Clawson.

Mr. Delaney with Mr. Caputo.

Mr. Diggs with Mr. Brown of Ohio.

Mr. Ertel with Mr. Armstrong.

Mr. Rostenkowski with Mr. Frey.

Mr. Nolan with Mr. Hubbard.

Mr. Harrington with Mr. Long of Maryland.

Ms. Mikulski with Mr. Vander Jagt.

Mr. Meeds with Mr. Cochran of Mississippi.

Mr. Flowers with Mr. Burke of Florida.

Mr. Gibbons with Mr. Huckaby.

Mr. Ireland with Mr. Leggett.

Mr. Lehman with Mr. Mattox.

Mr. Moss with Mr. Scheuer.

Mr. Charles H. Wilson of California with Mr. Young of Alaska.

Messrs. BONIOR, EMERY, MARRIOTT, and JENKINS changed their vote from "yea" to "nay."

Mr. DORAN and Mrs. COLLINS of Illinois changed their vote from "nay" to "yea."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

## GENERAL LEAVE

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

## REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 11545, LIMITATIONS ON IMPORTATION OF MEAT PRODUCTS

Mr. MOAKLEY, from the Committee on Rules, submitted a privileged report (Report 95–1562) on the resolution (H. Res. 1343) providing for consideration of the bill (H.R. 11545) to modify the method of determining quantitative limitations on the importation of certain articles of meat and meat products, to apply quantitative limitations on the importation of certain additional articles of meat, meat products, and livestock, and for other purposes, which was referred to the House Calendar and ordered to be printed.

## FUELS TRANSPORTATION SAFETY AMENDMENTS OF 1978

Mr. MOAKLEY. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 1311 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 1311

*Resolved*, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 11622) to amend the Natural Gas Pipeline Safety Act of 1968 to provide for the safe operation of pipelines transporting natural gas, petroleum, petroleum products, and certain other materials, to provide standards with respect to the siting, construction, and operation of liquefied natural gas and liquid petroleum gas facilities, and for other purposes. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interstate and Foreign Commerce, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Interstate and Foreign Commerce now printed in the bill as an original bill for the purpose of amendment, and said substitute shall be read for amendment by titles instead of by sections. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions. After the passage of H.R. 11622, the Committee on Interstate and Foreign Commerce shall be discharged from the further consideration of the bill S. 1895, and it shall then be in order in the House to move to strike out all after the enacting clause of the said Senate bill and insert in lieu thereof the provisions contained in H.R. 11622 as passed by the House.

The SPEAKER pro tempore. (Mr. DUNCAN of Oregon). The gentleman from Massachusetts (Mr. MOAKLEY) is recognized for 1 hour.

Mr. MOAKLEY. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Illinois (Mr. ANDERSON) pending which I yield myself such time as I may consume.

Mr. Speaker, the resolution (H. Res. 1311) makes in order the consideration of the bill (H.R. 11622) to amend the Natural Gas Pipeline Safety Act of 1968 to provide for the safe operation of pipelines transporting natural gas, petroleum petroleum products, and certain other materials, to provide standards with respect to the siting, construction, and operation of liquefied natural gas and liquid petroleum gas facilities, and for other purposes.

It is a 1-hour open rule which contains several provisions customarily included in rules when a committee has reported an amendment in the nature of a substitute. These noncontroversial provisions are primarily designed to protect the rights of the minority and simply insure that Members will have all the rights available in the case of a clean bill.

The rule also provides that, after the passage of the bill (H.R. 11622) it will be in order to call up the companion bill referred from the other body (S. 1895) and insert the text of the House passed bill. This is a routine procedural motion, normally handled by unanimous consent, which enables the measure to go to conference.

This vital legislation would provide the fiscal year 1979 authorization for pipeline safety programs of the Department of Transportation, primarily the Office of Pipeline Safety Operations. The bill also makes several amendments to the laws applicable to pipeline operation designed to insure greater hazard protection to workers and to the general public.

Mr. Speaker, although there is some disagreement, the Committee on Rules believes that the rule provides a fair and orderly procedure for the consideration of this important legislation and I urge prompt and favorable House action.

Mr. ANDERSON of Illinois. Mr. Speaker, I yield 5 minutes to the gentleman from Louisiana (Mr. MOORE).

Mr. MOORE. Mr. Speaker, this rule should be entitled the "now you see it, now you don't" rule. This is the second rule that has been issued on this bill, the second version. Actually the first version, or the first rule should be the one before us instead of the one we have.

The Committee on Rules originally met on July 25, 1978 and passed a normal regular open rule. I have no objection to that rule. The first rule was, as I say, a simple rule. It was a fair rule. It was a rule that no one could object to. The rule we have before us today is a very unusual rule. The second part of the rule provides that after passage of the bill. H.R. 11622, it shall then be in order to substitute the text of H.R. 11622 for the text of the Senate bill S. 1895, which is a simple authorization bill passed by the other body on May 3, 1978. This essentially forces the Senate Commerce Committee into conference with the House Commerce Committee on a bill that the Senate has never considered.

The House bill that we are going to be considering, if this rule is in order, H.R. 11622, contains very profound legislation which the Senate never considered.

This rule circumvents the legislative process by denying adequate consideration by the other body of these profound changes in the law.

The Senate bill is nothing more than a simple authorization bill containing no substantive amendments to the Natural Gas Pipeline Safety Act. The House bill is a pervasive scheme of regulations over liqufied natural gas facilities and substantively amends the Pipeline Safety Act in numerous respects.

Mr. Speaker, the Senate Commerce Committee has held neither hearings on the provisions of this bill, nor any of the issues contained in the House bill. There is a promise that they will in the future, but those hearings have not yet been held; and they will not have an opportunity to do anything with this bill as it will go straight to conference.

As I said, the Committee on Rules originally refused to issue the rule which we are considering today on July 25, 1978. They gave a proper rule. Under that rule the chairman of the Subcommittee on Energy, of which I am a member, the gentleman from Michigan (Mr. DINGELL), returned to the House Committee on Interstate and Foreign Commerce and requested the markup of the Senate bill. On two occasions he was thwarted in the full Committee on Interstate and Foreign Commerce in taking up that bill. That caused him to go back before the Committee on Rules to ask them to reverse their action of July 25, 1978, and to issue the rule they had turned down. In fact, this took place on August 10, 1978. The first version of the rule was overturned, and we now have the second version of the rule which had been refused by the Committee on Rules in its first meeting.

Consequently, Mr. Speaker, this rule is really a travesty of the legislative process. We have a very simple authorization bill from the Senate, with the Senate having no hearings or no information on this bill. We have the very pervasive and new schemes of law and regulations with respect to natural gas distribution and liquefied petroleum gas now before us under this bill which the Senate will never get to see except in the committee of conference.

Mr. Speaker, that is no way to write law; that is no way to bring a bill to the House floor. This rule was changed because it is known that there are provisions of this bill which would not stand the light of day in the Senate committee or on the Senate floor. In order to circumvent the Senate's having that opportunity, a rule is forced upon us which circumvents one House of a two-House legislative process.

Mr. Speaker, I urge that this "Now you see it, now you don't" rule on this broad bill be defeated.

Mr. ANDERSON of Illinois. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 1311 is a 1-hour open rule making in order the consideration of H.R. 11622, the Fuel Transportation Safety Amendments Act of 1978. The rule provides for the consideration of the committee amendment in the nature of a substitute, now printed in the bill, as an original bill for the purpose of amendment, and the substitute shall be read by titles instead of by sections for amendment under the 5-minute rule.

The other distinct feature of this rule is that it provides for inserting the language of the House-passed bill under S. 1895 which would be discharged from the Committee on Interstate and Foreign Commerce immediately upon passage of the House bill. The purpose of this provision in the rule, of course, is to facilitate going to conference with the Senate.

I think it should be pointed out that while this is the kind of rule requested by the Interstate and Foreign Commerce Committee, when the Rules Committee originally met on this matter on July 25, 1978, it adopted a rule deleting the request to insert the House-passed language under the Senate bill. That rule was never filed, however, and the Rules Committee subsequently met on the matter again on August 10 at the request of the chairman of the Energy Subcommittee (Mr. DINGELL), and the chairman of the full Committee on Interstate and Foreign Commerce (Mr. STAGGERS). In a letter to the Rules Committee dated August 8, Chairman STAGGERS wrote, and I quote:

> Because of the recent propane gas pipeline explosion in southeastern Iowa last Friday morning and the propane tank car explosion in Collins, Illinois, on Sunday, it is more urgent than ever that the Congress move quickly on this proposed legislation. Accordingly, I request that the Committee on Rules after further hearing grant the rule originally requested for H.R. 11622.

The gentleman from Michigan (Mr. DINGELL) repeated this argument before the Rules Committee on August 10 and the committee subsequently adopted the requested rule by voice vote.

Appearing in opposition to the rule requested by the committee was the gentleman from Louisiana (Mr. MOORE) who argued that the procedure would force the Senate into conference before it had an opportunity to evaluate the provisions of the House bill. As Mr. Moore pointed out, the Senate bill, S. 1895, is a simple extension of the Natural Gas Pipeline Safety Act of 1968, only 13 lines in length. The House bill, on the other hand, H.R. 11622, "establishes a pervasive scheme of regulations over liquefied natural gas facilities and substantively amends the Pipeline Safety Act in numerous respects," according to Mr. MOORE's testimony Indeed, the House bill runs some 40 pages and 950 lines, compared to the 2-page, 13-line Senate bill. I do not think there is any question that the House bill is not germane to the Senate bill since it obviously goes far beyond the scope of the bill passed by the Senate. And yet we are in effect being asked to do to the other body that which we so often complain about it doing to us, and that is tacking nongermane amendments on to the originally passed bill.

Mr. Speaker, I think the complaint of the gentleman from Louisiana is well taken, especially at this late hour in the session when there is not adequate time to hold hearings and carefully examine new matter being sent over by another House. In this case we were treating the Senate unfairly. But in so doing, we were only inviting the same kind of treatment for ourselves in the future. For these reasons I opposed this rule in the Rules Committee, though I do not see any realistic prospect of turning this around on the floor. I nevertheless felt the Members should be apprised of the circumstances surrounding the adoption of this rule in the Rules Committee.

Mr. Speaker, I have no further requests for time, and reserve the remainder of my time.

Mr. MOAKLEY. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. DINGELL. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 11622) to amend the Natural Gas Pipeline Safety Act of 1968 to provide for the safe operation of pipelines transporting natural gas, petroleum, petroleum products, and certain other materials, to provide standards with respect to the siting, construction, and operation of liquefied natural gas and liquid petroleum gas facilities, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Michigan.

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 11622, with Mr. HUGHES in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Michigan (Mr. DINGELL) will be recognized for 30 minutes, and the gentleman from Lousiana (Mr. MOORE) will be recognized for 30 minutes.

The Chair now recognizes the gentleman from Michigan (Mr. DINGELL).

Mr. DINGELL. Mr. Chairman, I yield 5 minutes to my good friend and colleague, the gentleman from Massachusetts (Mr. MARKEY) to lead off debate, because of the outstanding job the gentleman did in working on this particular bill.

Mr. MARKEY. Mr. Chairman, it is with great pleasure that I rise in support of H.R. 11622, the Fuels Transportation Safety Amendments Act of 1978. At the outset, I want to express my thanks and commendations to my good friend and subcommittee chairman, JOHN DINGELL. It has been an honor and an education for me to work with him on this bill. I also want to thank our distinguished committee chairman HARLEY STAGGERS, and the committee staff: Michael Barrett, Michael Kitzmiller, Christopher Dunne, and Peter Hunt for their tireless and creative efforts.

The bill before us today is the product of many months of work by the Energy and Power Subcommittee and the Interstate and Foreign Commerce Committee. In May of last year, Chairman DINGELL and I introduced H.R. 6844, the Liquified Natural Gas Facility Safety Act. Subsequently, that bill was incorporated into H.R. 11622 which was the subject of over 40 hours of hearings.

In both subcommittee and full committee markups of this bill, a great many changes were made. H.R. 11622 is thus truly the result of careful consideration and compromise. I believe that it is a consensus bill with broad support.

This legislation is a very significant measure. First, the bill authorizes appropriations for the pipeline safety activities of the Department of Transportation and its Office of Pipeline Safety Operations (OPSO). Second, it seeks to coordinate the safety regulation activities of OPSO into a coherent package and to close existing gaps in these safety regulations. The importance of so doing can easily be seen from the following: in 1976 alone, 63 people were killed, 366 injured and millions of dollars of property damage occurred as a result of fires and explosions along the more than 1.4 million miles of natural gas, petroleum, and petroleum product pipelines in this Nation. H.R. 11622 establishes mechanisms which seek to prevent such accidents from occurring. I believe its passage will save lives.

In addition, this legislation mandates strict new national safety standards with respect to the location, design, construction, operation, and maintenance of liquefied natural gas facilities. LNG is a very useful source of energy, but its transportation and storage present extraordinary hazards to public safety.

In 1944, 130 persons were killed by a series of fires which followed the rupture of an LNG storage tank in Cleveland. Federal studies of that accident led to recommendations that future LNG facilities be located away from populated areas. Thirty-four years later, no such action has been taken. It is time for us to take that action.

LNG is created by supercooling natural gas to a temperature of minus 260° Farenheit. At that temperature, natural gas is compressed in volume over 600 times, thus making possible its storage as well as its marine and truck transportation.

If an LNG truck or storage tank were ruptured, however, a cloud of LNG vapor would be created. This vapor cloud would hug the ground, go down into sewers, subways, and basements through any available opening. Widespread explosions and fires could easily be ignited, since the vapor is so combustible that it could be set off even by the spark generated by an automobile horn.

Under the provisions of this legislation, the Department of Transportation will be required to establish standards regulating the siting and design of any new LNG facility or any construction at an existing facility. These standards would require remote siting to the maximum extent possible. In addition, all LNG facilities will be required to comply with strict new operating standards covering areas such as antiterrorist security and firefighting capabilities.

Mr. Chairman, the hazards associated with LNG, LPG (liquified petroleum gas) and natural gas pipeline transportation are clear. Recent LPG tragedies in Tennessee, Iowa, Spain, and Mexico have greatly heightened public awareness of the extraordinary hazards associated with these fuels. The public has a right to expect that Congress will require that the Federal Government develop a coordinated policy to assure the greatest possible safety in the transportation and storage of these fuels. The public has a right to expect that Congress will pass H.R. 11622, for its enactment will mean a significant enhancement of the public health and safety.

As the Christian Science Monitor has stated in an editorial:

> Congress ought not to wait for a disaster to drive them to enact these needed precautions.

Mr. Chairman, I urge passage of this vital legislation.

Mr. MOORE. Mr. Chairman. I yield myself such time as I may consume.

Mr. Chairman, the bill before us represents a vast and unnecessary intrusion of Federal bureaucracy over the pipeline transportation industry. This intrusion will cost American natural gas consumers millions of dollars without any assurances of increased safety. For this reason, I strongly oppose H.R. 11622 in its present form.

The most disturbing aspect of this bill is that it will require liquid petroleum gas and natural gas pipeline operators to gather and report to the Federal Government a massive amount of essentially useless information. No evidence exists that this information will contribute to pipeline safety.

As now drafted, section 102 of the bill would require the reporting of data on the location, type, age, manufacturer, and method of construction of each foot of pipeline; the nature, sequence, and pressure of materials transported; climatic and geological conditions of the area in which the facilities are located; the population density, and patterns of such areas, and such other information as the Secretary may consider appropriate.

Mr. Chairman, anyone who knows anything about the pipeline industry should know that on many older pipelines, records simply do not exist which would indicate the manufacturer of the pipe. In any event, witness after witness who testified on this bill before the Energy and Power Subcommittee indicated that much of the information required to be reported had little or no relevance to increased pipeline safety. In addition, the Secretary of DOT now has authority to gather much of this information if he thinks it is necessary.

The impact of these burdensome and useless information-gathering and reporting requirements will fall particularly hard on small municipally owned natural gas distribution systems. Letters I have received from several small municipal systems serving areas of my State indicate that their costs, and thus those of their consumers, will increase significantly as a result of these reporting requirements. One municipal system indicated that it could cost as much as 15 percent of their present gross sales to comply with the provisions of this bill. Another estimated it would have to double or triple its present staff to comply.

Because of my concern over the burdens imposed by these provisions on small municipal systems, I offered an amendment which was adopted by the committee, which would require the Secretary of the Department of Transportation to exempt any person or class of persons from any or all of the gathering and reporting requirements if he finds that the costs of being covered would significantly increase consumer rates or charges. In addition, the Secretary is required to provide an exemption if he finds that the financial or administrative burdens of being covered are not justified by the safety benefits.

Although these possible exemptions give the Secretary an opportunity to ease the reporting requirement on those unable to afford them, they are in the discretion of the Secretary and presume a rule of reasonableness. It has been my experience that this sort of discretion usually leads to burdensome and unreasonable regulations. Once again, we have a classic example of Congress creating yet another program to protect the American people from themselves. In the process, we have created another layer of Federal paperwork at great expense to the consumer. We are repeatedly told by our constituents that they oppose increased Government intervention in their lives and businesses. No proof exists that this additional layer of bureaucracy will improve pipeline safety; rather what is known is that it will increase consumers' utility bills. For these reasons, I urge defeat of this bill.

Mr. DINGELL. Mr. Chairman, I yield

5 minutes to the distinguished chairman of the Committee on Interstate and Foreign Commerce, the gentleman from West Virginia (Mr. STAGGERS).

Mr. STAGGERS. Mr. Chairman, I rise in support of H.R. 11622, the Fuels Transportation Safety Amendments Act. This is the first comprehensive revision and extension of the authorities vested in the Department of Transportation by the Natural Gas Pipeline Safety Act of 1968 since that legislation was enacted 10 years ago.

Under this authority the safety of more than 1.4 million miles of pipeline serving some 44 million U.S. consumers is regulated.

A very significant contribution of H.R. 11622 is to bring the safety regulation of facilities for liquefied petroleum gas, such as propane and butane and related products or mixtures or combinations thereof, under the civil procedures provided for natural gas facilities. Heretofore, the safety regulation of LPG has been carried out under the criminal procedures of title 18. As a practical matter, this has meant that there has been no regulation of these products which account for only 10 percent of the fuel accidents, but cause 66 percent of the deaths and 48 percent of the injuries. Only this month we had dramatic evidence of the urgent need for action on this provision. On July 11, a liquefied petroleum product exploded in Spain, burning 170 people to death and injuring 75 more. Just 5 days later, a similar explosion in Mexico burned 20 to death and seriously injured 150. There is no adequate regulatory mechanism for protecting U.S. citizens at this time, but H.R. 11622 would create one.

H.R. 11622 also sets criteria for citing of liquid natural gas storage facilities and directs the Secretary to study and assure the financial responsibility of the persons operating LNG facilities.

In light of the age and extent of our natural gas pipeline system and of the rapid increase in demand for LPG and LNG as alternative energy sources—and the even more dramatic increases projected for the near future—the Intertate Foreign Commerce Committee feels that the programs authorized in H.R. 11622 are particularly timely and appropriate.

Finally, H.R. 11622 authorizes the appropriation of $13.5 million for fiscal year 1979 for the Department of Transportation to assure effective safety regulation in the storage and transportation by pipeline of fuels and hazardous materials.

Mr. Chairman, this legislation is the culmination of more than 40 hours of hearings and 2 years of work by the Interstate and Foreign Commerce Committee. It is sound and reasonable legislation that will make an important contribution to assuring the safety and welfare of the American people. I urge its enactment.

Mr. MOORE. Mr. Chairman, I yield 5 minutes to the gentleman from California (Mr. MOORHEAD).

Mr. MOORHEAD of California. Mr. Chairman, there are many sections of this bill about which I have great concerns, because my State is so dependent upon natural gas, and we are going to be more dependent on LNG as time goes on.

I have a few questions I would like to ask the gentleman from Michigan (Mr. DINGELL).

In exercising the authority given the Department of Transportation by section 6 of this legislation to approve a new LNG facility, is it intended that the Department will be required to prepare an environmental impact statement?

Mr. DINGELL. Mr. Chairman, will the gentleman from California yield?

Mr. MOORHEAD of California. I am happy to yield to the gentleman from Michigan.

Mr. DINGELL. Mr. Chairman, the Department of Energy already has comprehensive permitting jurisdiction over proposed LNG facilities and, as part of its consideration of applications to construct and operate such facilities, prepares environmental impact statements as required by NEPA. It would continue to act as the lead agency. We do not intend that the Department of Transportation duplicate the efforts of the Department of Energy, such as supply, demand and economics, will remain with that Department.

Mr. MOORHEAD of California. This legislation appears to authorize the Secretary of DOT to approve the site of any proposed LNG facility. As you are aware, the DOE is required to consider siting as part of the comprehensive proceedings it conducts in connection with proposed LNG facilities under the Natural Gas Act. Would this legislation require the Department of Transportation to duplicate the Department of Energy's review of proposed LNG sites?

Mr. DINGELL. No. The Department of Energy will continue to be the lead agency in the LNG application and approval process. Siting, as used in this legislation, refers only to the safety aspects of siting. The Department of Transportation will be required by this legislation to promulgate minimum safety standards for siting, construction, and operation of LNG facilities. The intent of H.R. 11622 is that DOT will review the initial design plans of a proposed facility to determine if the plans comply with the safety standards promulgated by DOT pursuant to this legislation.

Mr. MOORHEAD of California. I thank the gentleman.

Mr. DINGELL. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, thank you for the opportunity to explain the contents and purposes of H.R. 11622, the Fuels Transportation Safety Amendments Act of 1978.

Since 1968, the Department of Transportation has been overseeing the safety of natural gas pipelines throughout the United States. This program enlists the assistance of the several States in the conduct of safety inspections of over 1 million miles of natural gas pipelines and the implementation of a number of safety-related programs. This is done through a grant-in-aid program in which the Federal Government may match State expenditures for qualified programs. Every State but Alaska is now actively participating in this joint Federal-State program.

The purposes of H.R. 11622 include:

First. Authorizing appropriations for pipeline safety programs;

Second. Expanding and strengthening the authority of the Secretary of Transportation to gather information about the safety—or lack thereof—of pipeline operations and related facilities; and

Third. Extending the grant-in-aid program to cover pipelines carrying LPG—that is, propane and butane.

As we know from the terrible tragedies which occurred earlier this year in Waverly, Tenn., and in Spain and Mexico, LPG is extremely dangerous. However, the regulations covering these very hazardous LPG pipelines are worse than inadequate, because they give the appearance, but not the reality of safety. States cannot have a consistent LPG safety program supported by matching Federal funds without this bill.

The bill H.R. 11622 also represents the first major Federal effort at addressing the problems and hazards associated with liquefied natural gas—LNG. One LNG accident alone caused more than 130 deaths and over $100 million in property damage in Cleveland in 1944. This one catastrophe slowed the further use of this fuel nearly another 20 years. However, the General Accounting Office and administration officials now have provided the committee with data showing that LNG will become an increasingly important factor in our Nation's future energy needs—estimates range from 8 to 20 percent of our national gas consumption by 1985.

As the Cleveland incident demonstrated and as other evidence before our committee has shown, LNG is an extremely dangerous fuel requiring special care and handling. H.R. 11622 would permit the establishment of safety regulations before any more of these hazardous facilities are constructed. It also provides a mechanism for insuring that all LNG facilities will be operated and maintained safely. Incorporating this within the pipeline inspection program of DOT allows the widest range of inspection, either through the existing grant-in-aid program or through direct Federal inspection. But it will be done. We are also requiring that the DOT actually approve—in advance—the safe construction and operation of all new facilities.

The bill—H.R. 11622—represents the first major review and legislative revision of the pipeline safety program since it was enacted in 1968. It is based upon extensive hearings by the Subcommittee on Energy and Power in 1976, 1977, and 1978. During this 3-year period, subcommittee members and staff investigators spent many hours with the DOT officials responsible for administering the program. They have interviewed numerous pipeline construction and operating personnel. They have met with State officials associated with the program. Finally, the subcommittee held hearings in all of those years on the pipeline safety program, and during Feb-

ruary, March, and April of this year we conducted extensive hearings on this legislation. We received testimony from more than 70 witnesses. These included gas company officials, both from interstate pipeline companies and local distribution companies, and gas producers and various industry trade associations. We heard testimony from the National Fire Prevention Association, and State and local fire chiefs and the National Association of Regulatory Commissioners. Environmental groups, such as the Environmental Policy Center and the Friends of the Earth, participated as well as various State and local officials. The General Accounting Office and the Office of Technology Assessment also appeared as experts during those hearings.

The General Accounting Office recently completed a thorough review of the Department of Transportation's pipeline safety program and made a number or recommendations, including more complete and effective pipeline safety regulations, strengthened State pipeline safety programs, improved compliance efforts, more effective data analyses, and increased attention to staffing requirements. H.R. 11622 covers all these points. In addition, the GAO issued a report on liquefied energy gases safety. H.R. 11622 provides a regulatory mechanism within the Department of Transportation for implementing the recommendations of that report.

I would also like to add that in approving H.R. 11622 Congress intends its provisions to be binding upon the Secretary in regard to the handling of LNG and LPG rather than the more general provisions of H.R. 13311 which was approved earlier today.

The result is a good bill that will improve the operation of our Nation's natural gas and LPG pipelines and insure the safety of LNG facilities as more and more of them are constructed. The bill is timely. It is not unduly burdensome. Further delay could mean that additional LNG plants will be constructed before we have adequate legislation and regulations to protect the public safety.

Mr. Chairman, my distinguished colleague from New York (Mr. WEISS) who is compelled to be absent on busing was asked two very important questions about H.R. 11622, which I would like to present to my colleagues and answer the gentleman from New York notes that recently the United States has begun to import substantial amount of liquefied natural gas (LNG). The Department of Energy (DOE) predictions indicate that imports will increase to the point that three giant LNG tankers carrying as much as 150,000 cubic meters of LNG each will be entering U.S. waters every day by 1985. Unfortunately, it is not always possible to transport LNG from the import terminals by pipeline so that increasing amounts of LNG are being transported—still liquified—in trucks. Even more unfortunately, by virtue of the location of import terminals in or near busy ports and the urban demand for the product, these trucks are being driven though streets in densely populated urban areas. So far we have been lucky. There have been no accidents, but continuing to rely on luck is reckless—shooting craps with destiny that will eventually lead to a major disaster. The awesome explosive power of LNG was amply demonstrated when a small LNG storage facility in Cleveland, Ohio, failed in 1944 and the resultant explosions killed 128, injured 300, and devastated many blocks of Cleveland doing $100 million in damage as measured in 1944 dollars. That storage facility only contained 6,200 cubic meters of LNG. I know that LNG trucks regularly travel the elevated highways and streets of Boston. My colleague from New York has been informed that trucks are carrying LNG through the streets of Manhattan. As the representative of the West Side of Manhattan and the Riverdale section of the Bronx, among the most densely populated neighborhoods in the Nation, he wants to assure that his constitutents are not exposed to the hazards of an LNG explosion. He would like to ask how H.R. 11622 would come to grips with this problem.

The gentleman from New York raises an extremely serious issue and one to which the committee gave much thought and concern. Under H.R. 11622, the Secretary of Transportation would have the authority to promulgate safety regulations regarding the shipment of LNG by truck. It is the express intent of the committee that the regulations should forbid the transportation of LNG by truck through or near urban areas wherever possible. It is a source of deep regret to me that due to the delay in effecting safety regulations regarding LNG there are several situations where the only way to get some of the product to the market that needs it is by truck. Since the interruption of this supply could cause hardship and additional expense to consumers, it was the intent of the committee that in such a situation the Secretary should promulgate regulations to minimize to the utmost degree the danger of an LNG accident and should work to see that alternative means of transporting the fuel are developed as quickly as possible. Let me stress that it was the intent of the committee to see that LNG is not transported by truck through or near populated areas and the committee intends to exercise vigorous oversight to see that its purpose is carried out.

Finally, my distinguished colleague has asked whether New York City is an area where continued transportation of LNG is necessary?

I am pleased to be able to respond that to the best of our knowledge there is no reason or justification for transporting LNG through the streets of New York City and H.R. 11622 may not be construed in any fashion as authorizing such transportation.

Mr. Chairman, our good friend, Mr. MURPHY of New York, has expressed to me his very strong concerns about how this bill might impact upon a facility in his district. About 4 years ago an LNG import terminal was built on Staten Island without the approval of the Department of Transportation or of the Federal Power Commission. Mr. MURPHY has questioned whether section 6(h) of the bill dealing with Federal preemption on State laws on interstate LNG terminals would allow this terminal in Staten Island to become operational. In response, I would like to emphasize that it is the understanding of the committee that no authority granted under this act shall be used by the Secretary to authorize the construction or use of any LNG facilities on Staten Island or in the New York City area that are presently forbidden to be built or used under New York law and the Congress in enacting this law will do so with that clear understanding. In other words, there will be no retroactive approval of an existing facility that has not yet received the necessary State, local, or Federal approvals.

It is also clear that in approving H.R. 11622 Congress intends its provisions to be binding upon the Secretary in regard to the handling of LNG and LPG rather than the more general provisions of H.R. 13311 which was approved earlier today.

Mr. MOORE. Mr. Chairman, I yield 5 minutes to the gentleman from Texas (Mr. COLLINS).

Mr. COLLINS of Texas. Mr. Chairman, many times in the course of this session I have felt that we were passing unneeded legislation, and I feel that tonight we are hitting a high point in what America needs least, and that is a pipeline safety bill.

We are interested in Americans' safety, and this evening when I had dinner down in the House restaurant I sat around, and everyone was talking about a reducing plan which has been very successful. It is known as the Scarsdale plan, and one after another had been losing 20 pounds or so. Maybe the gentleman from New York is familiar with this. It is gaining a national reputation. They have been losing 20 and 30 pounds by following that Scarsdale plan.

What is important about that? I do not know much about safety, but I do know something about the way to keep people living a long time, and that is to lose weight. What we have done in a practical way was to see Members of this body that have gone out and started reducing. We are talking here about 42 fatalities in the course of a year, most caused by human error.

This must be the safest industry in the country. I have never heard of an industry as safe as this one. Instead of worrying about 42, we should be worrying about things like heart trouble, because every year 1 million die from heart trouble—1 million. Most of them die because they are overweight. Overweight is a real problem. I have never seen us do anything on the floor about overweight, yet by getting the word going around about a reducing plan, they are going to do something about the million people who have a real problem.

In our committee, we spent considerable time recently worrying about blowouts on tires. We have found that in the past 6 years they located 34 automobiles where they had fatalities, and they had blowouts of tires, which very much con-

cerned the committee. The interesting thing is that during this same 5-year period, there have been 100,000 people killed in automobile accidents that involved DWI.

I am not worried about a blowout of tires because when we check these cases out we find over half the time the fellows were going over 80 miles an hour, but I am worried about the DWI because, although I do not drink, the chances are that in a DWI I will get killed while the DWI is getting himself killed.

Let me tell the Members about this national safety group that runs the studies all the time. They have been studying and studying and studying, but they have not been attempting a study of the DWI's, which is a major cause of automobile fatalities.

Going along as we overlook the problem of the heart trouble and the DWI's, we have found a place to concentrate on, and that is on pipeline safety. These pipelines we have go back and forth across the United States and cover miles and miles. It is easy to spot a leak. Where there is a leak in the gas line, all the grass above it is going to die. The lines are surrounded by dirt.

These continental gas lines are very simple to control. It has been proved really all the accidents were caused by human mistakes.

I would like to move into some of my general views, because it is plain that this plan which was started for safety has developed under H.R. 11622 into a bureaucratic complex. Of all the industry groups in America, the pipeline group probably has the best safety record of all. Last year, considering the millions and millions of pipelines that go from coast to coast, they had only 42 deaths. Most of these were due to human error. Just compare this to one recent accident in West Virginia where 51 people were killed on one construction site. When one construction site loses 51 people, why is Congress legislating a system on pipelines which are our safest industry? It will be most expensive and will lead to increased costs for all gas consumers because all these costs are going to be passed on the consumers.

Let me give an example of the regulations required under this bill. On page 5, it states that on pipeline location and characteristics, the Secretary is by regulation required to prepare and maintain a general description of the pipeline facility, including the location of the pipeline, the type, age, manufacturer, and method of construction of such pipeline.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. MOORE. Mr. Chairman, I yield the gentleman from Texas 5 additional minutes.

Mr. COLLINS of Texas. Mr. Chairman, it goes on to say they will include the climatic and geological conditions associated with the area and such other information as the Secretary may consider appropriate. These data will also be furnished to the State and local areas as well as to be available for public inspection. Just imagine the havoc that this section is going to wreak on small communities that have small staffs. This is confusing, costly, and unnecessary.

This bill has such requirements as the Secretary shall by regulation require a report of any pipeline leak of which such person knew or reasonably should have known. Now, if you are sitting there and have not yet reported on something you should have known, how do you know that you have not reported on what you should have known?

Basically, the pipeline leaks are not difficult to spot. Small leaks let gas seep out into the soil, and the gas kills the grass above the leaks and the grass turns yellow. We have planes flying overhead and checking the pipelines for these bad sections, and repair crews immediately check them out. On top of this, the gas pipeline pressure is constantly checked on the lines and if there is any drop in gasline pressure they immediately know that there must be a leak.

This bill calls for $6 million for the basic funding and then for special provisions adds $4.5 million more, and then adds $1 million for an electronic data processing program for identifying hazardous equipment. It has also added $2 million to sections 6 and 7 as an appropriation making a total of $13.5 million. What this total appropriation does not show is how much it is going to cost industry to furnish all these records. A few bureaucrats can issue one page edicts that will cause the pipeline facilities to dedicate entire divisions of people to prepare these statistics that are needed. These statistics do not operate the business and these statistics do not operate the pipelines. With the best safety record of any industry, why do we need all these statistics?

The enforcement standards are such that everyone in the pipeline business will have all of their best people keeping their records. It reminds us of the experience we have had in hospitals. The chief nurse keeps the records and the one that handles the pots and pans is doing most of the nurse duty today.

Supervisors are afraid of what happens to them if they do not have their records completely current.

We agree with the provision that states that any person who willfully destroys pipeline facilities shall be fined $15,000 or given 15 years in prison. But then it moves in strong on innocent people. It says here that there are three ways you can get an innocent person that is in the pipeline business in trouble. In the first place they have civil penalties that go up to $50,000, and that is in addition to the other penalties. They have criminal penalties for any person that can be $50,000, and they can get 5 years in prison to go with that. That is in addition to all these civil penalties. But they also have the Bananza Citizen Civil Action, whenever such action constitutes a case or controversy, it can be brought forward without regard to the amount in controversy. It is obviously essential that any pipeline company have all of the chief executives keeping the records, and the big question is: Who is going to run the pipeline?

There is no justification for this increased bureaucratic regimentation. In America today, most Americans think we have too much government, too much regulation, and too many bureaucrats. They also resent the fact that their taxes are going up, and this plan, what it will do, will guarantee higher taxes and higher utility rates. Statistics do nothing for safety.

For the people back home that have told you that they want to have less government, ask yourself: Is this plan necessary?

Let us vote to recommit it.

Mr. MOORE. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, in closing the debate, obviously, Mr. Chairman, we can say that this legislation is well-intentioned. If it were possible to legislate the end of all possible natural gas storage or transportation accidents certainly no one would object to such a bill. The question you have to ask yourselves is: Is a new, complex system of reporting going to do that?

We have seen no information in our committee that this is going to happen. We the simply in the process of increasing the cost to consumers of natural gas, and they are already complaining about the high cost of energy fuels. We are simply adding to that cost without being able to show that we can substantially or in any way reduce accidents.

The second item is the fact that to my knowledge this is the first time Congress has ever told an energy facility that it was in interstate commerce and where it can be located.

These LNG facilities that we have supplied provisions for in this bill are, in my opinion, interstate so that Congress has no constitutional authority to say where they might be located. We have always said that was the authority of the States. But if we say that then the Congress has the authority to say where a dynamite plant can be located, or to say where a chemical plant can be located, or any other dangerous facilities can exist in an industrial atmosphere all across this Nation, but we have left that up to the local police powers of the States, and it should be in this case.

So, Mr. Chairman, I commend the authors of the bill in trying to come up with something to prevent accidents. If they were successful, then we would support them. My conclusion is that they are not successful and that they are setting a dangerous constitutional precedent. They are increasing the cost to the consumers of natural gas, therefore, in my opinion, we must oppose the bill.

I yield back the balance of my time.

Mr. DINGELL. Mr. Chairman, I yield 4 minutes to my good friend and colleague, the gentleman from New York (Mr. OTTINGER).

Mr. OTTINGER. Mr. Chairman, I thank the gentleman from Michigan (Mr. DINGELL) for his excellent work on this legislation and for allowing me this time to speak.

I first became interested in pipeline safety legislation when a house in Hastings-on-Hudson in my district in New York blew up and killed all the residents.

It appeared that a leak had been reported, but nothing was ever done about it.

Consequently, Mr. Chairman, I became very actively involved in the formulation of the Natural Gas Pipeline Safety Act of 1968. At that time workers from the Oil, Chemical, and Atomic Workers Union came forward and testified at the hearings we had on that legislation. They brought with them sections of pipe which they had dug up in the course of their operations. The pipes were full of holes, and they pointed out that the pipeline systems, particularly in the older established communities of our country, in many cases were put in place 50 or more years ago and that they were generally unsafe. As a matter of fact, we have here some of the samples of actual pipe which was dug up. The Members can see that this pipe is just full of holes, making this a tremendous hazard to workers on a pipeline and to all people in the vicinity. Pipeline workers have a good number of their members killed or injured on jobs where such problems exist.

Mr. Chairman, at the time the 1968 legislation was passed, I filed separate views indicating that I thought there were inadequacies in that legislation in that it did not provide for the degree of safety to which I think the people of the United States are entitled. This bill fills in most of those inadequacies.

It provides, first of all, that the companies must file plans as to where their pipes are, and that is particularly important in the case of construction where a good percentage of the accidents occur. It also provides that they report leaks because we found, as in the case of the family I referred to in Hastings-on-Hudson, when a resident reports evidence of leaks to a company, frequently action is not taken to correct the leaking condition. The bill before us also provides for citizens suit enforcement, and it provides for liability coverage which will see to it that these kinds of problems are taken care of.

Mr. Chairman, I think the committee has done an excellent job in formulating this legislation. For the first time there are meaningful LNG and LPG siting and safety provisions. LNG and LPG create grave safety problems. In Staten Island in the New York metropolitan area there is a major LNG facility which has not yet been activated, but which, if proper safety regulations are not provided, could well blow up a substantial part of the area and do horrendous damage.

Unfortunately, Mr. Chairman, the gentleman who represents that area, the gentleman from New York (Mr. MURPHY), is involved in a primary this evening, and he cannot be here. He has been very active with respect to this legislation to assure that we have adequate safety provisions with respect to LNG facilities.

The Department of Transportation has just been deplorable with respect to enforcing the existing laws. This law provides that comprehensive safety standards have to be adopted, with a timetable for their adoption and criteria are set out for the standards; and it provides for the enforcement which I think will give us the safety we so badly need.

Mr. Chairman, in reply to the gentleman from Texas (Mr. COLLINS) and his observations with respect to the Scarsdale plan, I represent the community of Scarsdale in Congress. I assure the Members that the Scarsdale plan will do nobody any good if the people interested in it are in danger of being blown up in their homes. We want to make sure that the Scarsdale plan is effective and that people who want to do it will not be subjected to a safety hazard with respect to the pipeline which feeds their homes.

I strongly urge adoption of this legislation.

Mr. DINGELL. Mr. Chairman, I yield 3 minutes to the gentleman from Ohio (Mr. LUKEN).

Mr. LUKEN. Mr. Chairman, I rise in support of H.R. 11622, the Fuels Transportation Safety Amendments Act. We cannot delay any longer in passing legislation which will help insure the safety of our citizens from the threat of holocaust from an explosion of liquefied natural gas or liquefied petroleum gas.

The National Gas Pipeline Safety Act of 1968 was designed to protect citizens from dangers associated with natural gas transport, but did not protect the public from the hazards of LEG pipelines. LPG accounts for almost 10 percent of the pipeline transportation accidents, and I believe that it is important that this legislation now recognizes this, and includes the liquefied gasses in its coverage.

We are all aware of the grave danger liquefied energy gas presents: The threat of holocaust from an explosion of LEG now looms over every person in this country. Every community through which liquefied natural gas or liquefied petroleum gas is transported, whether that be by pipelinne, rail, or truck, faces the possibility of a major disaster similar to that which killed 12 people in Waverly, Tenn., earlier this year, or that which killed over 200 people in Spain in July. We do not want to wait for a domestic disaster of the magnitude of the Spanish tragedy to enact laws in hindsight which would cover this potentially catastrophic substance.

GAO released an alarming report last month detailing the dangers of LPG. It said that if the liquid gas spreads through a city through sewers, subways, of other underground conduits, or if a massive burning cloud is blown along by a strong wind, a city may be faced with a very large number of ignitions and explosions across a wide area. It said that gas escaping from a storage tank or from the accidental crash of a railroad car or tank truck could result in an explosion or fire far beyond the capability of existing firefighting agencies.

The Energy and Power Subcommittee should be commended for studying this problem and taking action in the form of this legislation. In the area of LNG and LPG, the committee has taken action to amend for the inaction in DOT's Office of Pipeline Safety, which has failed to forcefully and effectively carry out the responsibility for setting standards for safe design, construction, operation, and maintenance of liquid and natural gas pipelines, and related facilities. With these amendments, there will be stricter requirements on all of these aspects of liquefied energy transport safety. And, enforcement will be easier, since transportation of LPG will be subject to the same sections in the civil code as natural gas. This will improve the current situation, in which the law allows highly volatile LPG to be regulated as other, much less dangerous, petroleum products.

Mr. Chairman, I urge that the House pass this vitally important legislation. The safety of our citizens from the senseless dangers of LPG depends on what action we take today.

● Mr. DON H. CLAUSEN. Mr. Chairman, I want to lend my support to H.R. 11622 known as the Fuels Transportation Safety Amendments Act of 1978.

As ranking minority member of the Interior Subcommittee on Special Investigations, I am familiar with the safety features on the trans-Alaska pipeline system.

In June of 1977, our subcommittee issued a report finding that the safety features of the trans-Alaska pipeline had been properly installed, tested and put into operation.

The subcommittee felt the end result of TAPS was a safe and well-constructed line capable of withstanding all natural disturbances that could reasonably be expected.

However, the subcommittee pointed out and I am now quoting from the report:

> Although an extensive security system with accompanying procedures is now in place, it should be understood that this pipeline was not intended in its present configuration to withstand acts of sabotage or terrorist attacks. Should such actions become likely, the subcommittee strongly recommends that additional precautions be taken to insure that the Alaskan environment is adequately protected.

Mr. Chairman. all of us are well aware of several sabotage attempts to the TAPS since the publishing of our subcommittee report. Due to the quick action of Alyeska personnel, Alaska State police, Department of the Treasury Agents and the FBI, the effect of the sabotage was minimal and those responsible were arrested expeditiously.

H.R. 11622 adds a little muscle to our law enforcement agencies for it makes any person who willfully damages or destroys—or attempts such acts—an interstate pipeline facility subject to criminal penalties of up to $15,000 and/or 15 years imprisonment.

Mr. Chairman, I urge my colleagues to vote in favor of H.R. 11622.●

● Mr. GARY A. MYERS. Mr. Chairman, almost precisely 2 months ago a tank truck loaded with liquefied propylene gas exploded in a campsite near Tarragona, Spain. The resultant fireball and subsequent series of bottled cooking gas explosions killed more than 170 human beings and terribly burned scores more.

We all hope that the debate here today will produce legislation lessening the

chances of similar catastrophes here in our Nation. As the Commerce Committee has noted in the Fuels Transportation Safety Amendments Act of 1978, an important tool in preventing these diseases is a thorough understanding of transportation processes and hard data on hazardous materials, the characteristics of which are only partially known in many cases.

One action we should be taking to build up our data base and increase our ability to foresee possible hazards is the study of overseas catastrophes like that in Tarragona, Spain, last July. I was encouraged to see that the National Transportation Safety Board, at the invitation of the Spanish Government, participated actively in the investigation of the Tarragona accident. We should encourage all Federal agencies with responsibility for regulating hazardous materials transportation to thoroughly study incidents in foreign nations which might teach us important lessons at a cost of man-hours instead of lives.●

Mr. DINGELL. Mr. Chairman, I have no further requests for time, and I yield back the remainder of my time.

The CHAIRMAN. The gentleman from Louisiana (Mr. MOORE) having yielded back the remainder of his time, pursuant to the rule, the Clerk will read by titles the amendment in the nature of a substitute recommended by the Committee on Interstate and Foreign Commerce now printed in the bill as an original bill for the purpose of amendment.

The Clerk read as follows:

H.R. 11622

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SHORT TITLE; TABLE OF CONTENTS

SECTION 1. (a) This Act may be cited as the "Fuels Transportation Safety Amendments Act of 1978".

(b) The table of contents for this Act is as follows:

TABLE OF CONTENTS

Sec. 1. Short title; table of contents.
Sec. 2. References to Natural Gas Pipeline Safety Act of 1968.
TITLE I—FUELS TRANSPORTATION GENERALLY
Sec. 101. Hazardous pipeline facilities.
Sec. 102. Information on pipeline location and characteristics.
Sec. 103. Reporting of pipeline leaks.
Sec. 104. Coverage of pipeline transportation of liquefied petroleum gas.
Sec. 105. Coverage of gas distributed in connection with rental or lease of real property.
Sec. 106. Coverage of certain nonpipeline facilities.
Sec. 107. Pipeline safety inspectors.
Sec. 108. Technical Pipeline Standards Committee.
Sec. 109. Appropriations authorization.
TITLE II—SITING AND SAFETY OF LNG FACILITIES
Sec. 201. Definitions.
Sec. 202. Siting and safety standards.
Sec. 203. Financial responsibility.
Sec. 204. Enforcement of standards and financial responsibility requirements.
Sec. 205. Appropriations authorization.
TITLE III—MISCELLANEOUS PROVISIONS
Sec. 301. Willful destruction of interstate pipeline transmission or LNG facilities.
Sec. 302. Citizens' civil action.
Sec. 303. Appointments of Director of Pipeline Safety Operations and Director of Materials Transportation Bureau.
Sec. 304. Technical, clerical, and conforming amendments.

REFERENCES TO NATURAL GAS PIPELINE SAFETY ACT OF 1968

SEC. 2. Except as otherwise expressly provided, whenever in this Act, any reference, amendment, or repeal is expressed in terms of a reference or amendment to, or repeal of, a section or other provision, it shall be considered to be made to a section or other provision of the Natural Gas Pipeline Safety Act of 1968.

TITLE I—FUELS TRANSPORTATION GENERALLY

HAZARDOUS PIPELINE FACILITIES

SEC. 101. (a) Section 8 is amended by redesignating subsection (b) as subsection (c) and by inserting after subsection (a) the following new subsection:

"(b)(1) If the Secretary finds, after reasonable notice and an opportunity for hearing, that any pipeline facility is hazardous to life or property, he shall, by order, require the person operating the facility to take necessary corrective action. Such corrective action may include physical inspection, testing, repair, replacement, or other action, as appropriate.

"(2) The Secretary may find a pipeline facility to be hazardous under paragraph (1)—

"(A) if under the facts and circumstances he determines the particular facility is hazardous to life or property, or

"(B) if the pipeline facility or a component thereof has been or is proposed to be constructed or operated with any equipment, material, or technique which he determines is hazardous to life or property, unless the operator involved demonstrates to the satisfaction of the Secretary that under the particular facts and circumstances involved such equipment, material, or technique is not hazardous to life or property.

"(3) In making a determination under paragraph (2), the Secretary shall consider—

"(A) the characteristics of the pipe and other equipment used in the pipeline facility involved, including its age, manufacturer, physical properties (including its resistance to corrosion and deterioration), and the method of its manufacture, construction, or assembly;

"(B) the nature of the materials transported by such facilities (including their corrosive and deteriorative qualities), the sequence in which such materials are transported, and the pressure required for such transportation;

"(C) the aspects of the areas in which the pipeline facilities are located, in particular the climatic and geologic conditions (including soil characteristics) associated with such areas, and the population density and population and growth patterns of such areas; and

"(D) such other factors as the Secretary may consider appropriate.

"(4) The Secretary may waive any requirements for hearing and a period of reasonable notice and provide for expeditious issuance of an order under this subsection in any case in which he determines that the failure to do so would result in the likelihood of serious harm to life or property.".

(b) Section 3(b) is amended by striking out the fourth sentence.

(c) The first sentence of section 5(a) is amended by striking out "the fourth sentence of section 3(b)," and inserting in lieu thereof "section 10(b),".

INFORMATION ON PIPELINE LOCATION AND CHARACTERISTICS

SEC. 102. (a) Section 12 is amended by redesignating subsection (d) as subsection (f) and by inserting after subsection (c) the following new subsection:

"(d)(1) The Secretary shall, by regulation, require any person operating a pipeline facility to—

"(A) prepare and maintain a general description of the pipeline facility, including—

"(i) the location of the pipeline and the pipeline facilities;

"(ii) the type, age, manufacturer, and method of construction of such pipeline and facilities;

"(iii) the nature of the materials transported, the sequence in which they are transported, and the pressure at which they are transported;

"(iv) the climatic and geologic conditions (including soil characteristics) associated with the areas in which the pipeline facilities are located, and the population density and patterns of such areas; and

"(v) such other information as the Secretary may consider appropriate;

"(B) prepare, maintain, and submit to State and local entities authorized to approve demolition, excavation, tunneling, or construction activities in the areas in which the pipeline facilities are located a detailed description of the pipeline's location; and

"(C) submit to the Secretary a report containing the information prepared and maintained under subparagraph (A).

"(2) Information prepared and maintained under paragraph (1)(A)(i) of this subsection shall, on request and for good cause shown, be made available for public inspection.

"(3) The requirements of subparagraph (B) of paragraph (1) shall be deemed to be satisfied in the case of any pipeline facility operator participating in a public safety program established under State or local law or regulation—

"(A) under which—

"(i) notice is required to be provided to pipeline facility operators of proposed demolition, excavation, tunneling, or construction near or affecting such facility; and

"(ii) such operators are required to identify specific pipeline facilities which may be affected by the proposed demolition, excavation, tunneling, or construction, or to supervise such demolition, excavation, tunneling, or construction, for the purpose of preventing damage to such facilities; and

"(B) which the Secretary determines is being carried out in a manner adequate to assure protection against the hazards of demolition, excavation, tunneling, or construction near or affecting such facilities.

"(4) The Secretary shall—

"(A) not later than 180 days after the date of the enactment of this subsection, publish proposed regulations required to be prescribed under paragraph (1), and provide an opportunity (of not less than 60 days' duration) for oral and written public comment on such proposed regulations; and

"(B) as soon as possible after the public comment period under subparagraph (A) but not later than 270 days after the date of the enactment of this subsection, prescribe the final regulations.

"(5) The Secretary shall, by order or regulation, provide for an exemption for any person or category of persons from all or part of the requirements under this subsection if the Secretary finds—

"(A) that the financial and administrative burdens of being covered by such requirements are not justified by the benefits resulting from that coverage; or

"(B) the costs to such persons or persons by being covered by such requirements would significantly increase consumer rates or charges and such exemption would not endanger the public health or safety.

"(6) Information shall not be required to be prepared or reported under the regulations under this subsection before January 1, 1982.

"(7) Not later than 3 years after the date

of the enactment of this subsection, the Secretary shall establish and thereafter maintain a program, for use in an electronic data-processing system, which processes and maintains—

"(A) information obtained under this subsection;

"(B) information on pipeline leaks reported under subsection (e);

"(C) information on accidents and incidents reported under section 5; and

"(D) such other information as the Secretary determines appropriate;

for the purpose of identifying hazardous equipment, materials, and techniques involved in the construction or operation of pipeline facilities.".

(b)(1) Section 5(a) is amended—

(A) by inserting after "(3) is enforcing each such standard;" the following: "(4) has adopted and is administering a reporting and disclosure program substantially meeting the requirements of the reporting and disclosure program established by regulation under section 15(d)(1);";

(B) by redesignating paragraphs (4) and (5) thereof as paragraphs (5) and (6), respectively;

(C) by striking out "excavation" in paragraph (5), as redesignated, and inserting "demolition, excavation, tunneling, or construction" in lieu thereof;

(D) by striking out "and (iv)" and inserting in lieu thereof "(iv) information obtained by the State agency under a program described by paragraph (4) of this subsection; and (v)".

(2) Certification and information requirements established by regulation under the amendments made by paragraph (1) of this subsection shall not apply with respect to annual certifications under section 5 during the 3-year period which begins on the effective date of such regulation.

(c) Section 12(f), as redesignated by subsection (a) of this section, is amended by striking out "or (c)" and inserting in lieu thereof "(c), or (d)".

(d) Section 16 is amended by inserting "(a)" before "Each peron" and by adding at the end thereof the following new subsection:

"(b) In addition to the program under subsection (a) of this section, each person engaged in pipeline transportation shall establish a program for the education of the public of the hazards of demolition, excavation, tunneling, or construction activity conducted near pipeline facilities, and the methods by which information on the location of underground pipelines may be obtained by the public.".

REPORTING OF PIPELINE LEAKS

SEC. 103. (a) Section 12, as amended by section 102 of this Act, is further amended by inserting after new subsection (d) the following new subsection:

"(e)(1) The Secretary shall, by regulation, require that any person owning or operating pipeline facilities shall report, at such time and in such manner as the Secretary shall require, any pipeline leak of which such person knew or reasonably should have known. Any such report shall include—

"(A) the specific location of the pipeline leak;

"(B) a description of the pipeline facilities at which the pipeline leak occurred, including any information described in subsection (d)(1)(A) which the Secretary may require under such regulation;

"(C) a description of any personal injury or property damage resulting from such pipeline leak; and

"(D) a description of the steps taken to prevent the leak from continuing or recurring.

"(2) The Secretary shall, by order or regulation, provide for an exemption for any person or category of persons from all or part of the requirements under this subsection if the Secretary finds that the financial and administrative burdens of being covered by such requirements are not justified by the benefits resulting from that coverage.

"(3) For the purposes of this subsection, the term 'pipeline leak' means any condition resulting in the escape of material from pipeline facilities during pipeline transportation, or during treatment of such material during the course of pipeline transportation, which is not caused by operation, inspection, or adjustment procedures which were properly carried out. Such term does not include any condition which does not pose a threat to public health and safety, as determined in accordance with regulations prescribed by the Secretary.".

(b) Section 12(f) (as amended by section 102 of this Act) is amended by striking out ", or (d)" and inserting in lieu thereof "(d), or (e)".

(c) The amendments made by this section shall not apply with respect to any pipeline leak (within the meaning of section 12(e)(3), as amended by this section) occurring before the effective date of the regulation initially prescribed under such amendments.

COVERAGE OF PIPELINE TRANSPORTATION OF LIQUEFIED PETROLEUM GAS

SEC. 104. (a) Section 2(3) is amended—

(1) by striking out "Transportation of gas" and inserting in lieu thereof "Pipeline transportation"; and

(2) by inserting after "interstate or foreign commerce" the following: ", or the transmission or distribution (but excluding the gathering) of liquefied petroleum gas by pipeline, in interstate or foreign commerce".

"(b) Section 2 is amended by redesignating paragraphs (3) through (10) as paragraphs (4) through (11), respectively, and by inserting after paragraph (2) the following new paragraph:

"(3) 'Liquefied petroleum gas' means propane, butane, any related product, or any mixture or combination thereof;".

(c) Section 2(2) is amended by inserting ", but such term does not include liquefied petroleum gas" after "toxic or corrosive".

(d) Section 2(4), as amended and redesignated, is further amended by inserting after "distribution of gas" the following: "(whether in a gaseous or nongaseous state)".

(e) Section (2) is amended by inserting "(a)" after "SEC. 2." and by adding at the end thereof the following new subsection:

'(b) Any storage facility, or category of storage facilities, physically connected to any pipeline facility, or facilities, used for the transmission or distribution of liquefied petroleum gas shall be included by the Secretary, by regulation, within the meaning of subsection (a)(5) if—

"(1) the Secretary finds that such inclusion would further the purposes of this Act; and

"(2) such facility has a storage capacity of 30,000 gallons or more, or is used in connection with one or more other storage facilities at the same site which have, in the aggregate, a storage capacity of 30,000 gallons or more.".

(f) Section 3 is amended by adding at the end thereof the following new subsection:

"(f)(1) Standards, or amendments to standards, required under this section by reason of the enactment of the Fuels Transportation Safety Amendments Act of 1978 shall be prescribed not later than 36 months after the date of the enactment of such Act.

"(2) As soon as practicable but not later than 3 months after the enactment of such Act, the Secretary shall, by order, adopt interim minimum Federal safety standards for pipeline facilities and pipeline transportation to the extent not covered by this Act immediately before the date of the enactment of the Fuels Transportation Safety Amendments Act of 1978. Such standards shall, to the extent the Secretary determines appropriate, be the State standards regulating pipeline facilities and pipeline transportation within such State on such date on enactment. In any State in which no such standards are in effect, the Secretary shall, by order, establish interim Federal safety standards for such pipeline facilities and pipeline transportation in such State which shall, to the extent the Secretary determines appropriate, be such standards as are common to a majority of States having safety standards for pipeline facilities and pipeline transportation on such date. Interim standards shall remain in effect until amended or revoked pursuant to this section. Any State agency may adopt such additional or more stringent standards for pipeline facilities and pipeline transportation not subject to the jurisdiction of the Federal Energy Regulatory Commission under the Natural Gas Act, or the Interstate Commerce Act, as are not incompatible with the Federal minimum standards, but may not adopt or continue in force after the interim standards provided for above become effective any such standards applicable to interstate transmission facilities.".

(g)(1) The following provisions are amended by striking out "the transportation of gas" each place it appears and inserting in lieu thereof "pipeline transportation":

(A) section 2(a)(5) and (9), as redesignated by subsection (a);

(B) section 3(b) and (e);

(C) section 4(b);

(D) section 8(a);

(E) section 11;

(F) section 12(a);

(G) section 13(b); and

(H) section 14(a)(4).

(2) The following provisions are each amended by striking out "transportation of gas" each place it appears and inserting in lieu thereof "pipeline transportation";

(A) section 2(a)(10), as redesignated by subsection (a);

(B) section 5(b)(3); and

(C) section 10(a).

(3) The following provisions are each amended by striking out "gas pipeline" each place it appears and inserting in lieu thereof "pipeline";

(A) section 3(e);

(B) section 4(a); and

(C) section 14(b).

(4) Section 2(a)(4), as redesignated and amended, is further amended by striking out "or its storage" and inserting in lieu thereof ", or its storage in connection with such gathering, transmission, or distribution,".

(5) Section 5(c)(1) is amended—

(A) by striking out "gas safety programs" and inserting in lieu thereof "pipeline safety programs", and

(B) by striking out "date of enactment of this section." and inserting in lieu thereof the following: "date of enactment of the Fuels Transportation Safety Amendments Act of 1978.".

(6) The short title set forth in the first section is amended to read as follows: "Fuels Transportation Safety Act".

COVERAGE OF GAS DISTRIBUTED IN CONNECTION WITH RENTAL OR LEASE OF REAL PROPERTY

SEC. 105. Section 2, as amended by section 104(e), is further amended by adding at the end thereof the following new subsection:

"(c)(1) Unless paragraph (2) applies, there shall be included within the meaning of subsection (a)(4) any pipeline distribution of gas by any person in connection with the rental or lease of real property by that person to others, whether or not—

"(A) a separate charge is made for such gas;

"(B) the distribution to each rental or lease unit is separately metered; and

"(C) the person distributing such gas is otherwise treated as being engaged in local distribution of gas.

"(2) The Secretary shall, by regulation, provide that the provisions of paragraph (1) not apply in cases in which the public health and safety are adequately protected by reason of the existence and enforcement of appropriate building or housing codes or similar laws.".

COVERAGE OF CERTAIN NONPIPELINE FACILITIES

SEC. 106. (a) Section 2, as amended by this Act, is further amended by adding at the end thereof the following new subsection:

"(d)(1) If the Secretary finds that the purposes of this Act would be furthered, he may, by regulation, require that the provisions of this Act shall apply with respect to any specified type or class of facility or equipment used in the transportation on land of gas or liquefied petroleum gas, in interstate or foreign commerce, or storage in connection with such transportation, to the same extent and in the same manner as such provisions apply with respect to pipeline facilities.

"(2) This subsection (or any action hereunder) shall not be construed to relieve any person from having to meet standards or meeting other requirements under any other Federal law; except that, if any regulation under this subsection results in the imposition of a standard or other requirement relating to any matter that the Secretary finds is covered by any other standard or requirement pursuant to any provision of law under the jurisdiction of the Secretary, the Secretary shall so state in such regulation, and that standard or requirement shall supersede and preempt the standard or requirement pursuant to such other provision of law to the extent such matter is covered under the regulation under this subsection.".

(b) Section 5(a) is amended by inserting "section 2(c)," after "Except for".

PIPELINE SAFETY INSPECTORS

SEC. 107. (a)(1) Section 3(b) is amended by inserting after paragraph (4) the following new sentence: "Standards under this subsection which relate to inspection and other enforcement shall set forth minimum training and educational requirements for pipeline inspectors.".

(2) Section 5(c) is amended by adding at the end thereof the following new paragraph:

"(5) The Secretary may not make any payment under this subsection to a State agency for any calendar year beginning after December 31, 1981, unless such State agency has demonstrated that from the payments to such agency for such year funds will be applied for the training and education of pipeline safety inspectors of such State agency in order to enable them to better perform their responsibilities. The amounts to be applied for such purposes are to be adequate to assure that the pipeline safety inspectors maintained by such State agency comply with any standards established under section 3(a) for training and education of pipeline inspectors.".

(b) Section 5(f) is amended to read as follows:

"(f)(1) The Secretary shall determine, after reasonable notice and opportunity for hearing, the minimum number of pipeline safety inspectors which must be maintained by a State agency in order to assure adequate monitoring of compliance with applicable safety standards within such State.

"(2) No State agency shall be considered to meet the requirements for certification under subsection (a), nor may the Secretary enter into any agreement under subsection (b) or allow a State to act as his agent with respect to interstate transmission facilities, unless the State agency involved has demonstrated that such agency has and will continue to maintain no less than the minimum number of pipeline inspectors determined by the Secretary under paragraph (1) to be required for such State.".

TECHNICAL PIPELINE STANDARDS COMMITTEE

SEC. 108. Section 4(b) is amended—

(1) by striking out the first sentence and inserting in lieu thereof the following: "The Secretary shall submit to the Committee any proposed standard under this Act, or any proposed amendment to a standard under this Act, for their consideration. Within 90 days after receipt of any proposed standard or amendment, the Committee shall prepare a report on the technical feasibility, reasonableness, and practicality of such standard or amendment. The Secretary may prescribe a final standard or final amendment to a standard at any time after the 90th day after its submission to the Committee, whether or not the Committee has prepared a report on such standard or amendment.";

(2) by inserting after "published by the Secretary and" the following ", if timely made,"; and

(3) by inserting before the last sentence thereof the following new sentence: "The Committee shall meet with the Secretary (or his designee) not less frequently than once every 6 months.".

APPROPRIATIONS AUTHORIZATION

SEC. 109. Section 15 is amended to read as follows:

"APPROPRIATIONS AUTHORIZED

"SEC. 15. (a) There are authorized to be appropriated $6,000,000 for the fiscal year ending September 30, 1979, for the purpose of carrying out the provisions of this Act, other than provisions for which funds are authorized to be appropriated under subsection (b).

"(b)(1) For the purpose of carrying out the provisions of section 5(c) and (f) of this Act, there are authorized to be appropriated, $4,500,000 for the fiscal year ending September 30, 1979.

"(2) For the purpose of carrying out the electronic data-processing program under section 15(d)(7) for identifying hazardous equipment, materials, and techniques, there are authorized to be appropriated $1,000,000 for the fiscal year ending September 30, 1979.".

## TITLE II—SITING AND SAFETY OF LNG FACILITIES

DEFINITIONS

SEC. 201. Section 2(a), as redesignated, is amended by striking out "and" at the end of paragraph (10) (as redesignated), by striking out the period at the end of paragraph (11) (as redesignated) and inserting a semicolon in lieu thereof, and by adding at the end thereof the following new items:

"(12) 'LNG' means natural gas in a liquid, semisolid, or solid state;

"(13) 'LNG facility' means any storage tank, pipeline, or other structure or equipment used for the transportation, storage, or use of LNG, or for LNG conversion, in interstate or foreign commerce, but does not include any structure or equipment (or portion thereof) located in navigable waters (as defined in section 3(8) of the Federal Power Act (16 U.S.C. 796(8)));

"(14) 'LNG conversion' means conversion of natural gas into LNG (liquefaction or solidification) or the conversion of LNG into natural gas (vaporization);

"(15) 'Construction' means construction, reconstruction, or erection, and includes, with respect to any LNG facility, any act which the Secretary determines would result in the creation or substantial increase of capacity of such facility for transporting or storing LNG or for LNG conversion;

"(16) 'Existing LNG facility' means any LNG facility for which an application for the approval of the siting, construction, or operation of such facility was filed before March 1, 1978, with—

"(A) the Department of Energy or any predecessor organization of the Department, or

"(B) the appropriate State agency, in the case of any facility not subject to the jurisdiction of the Department of Energy under the Natural Gas Act,

except that such term does not include any facility the construction of which commences on or after the date of the enactment of this paragraph and such construction is not pursuant to such an approval;

"(17) 'New LNG facility' means any LNG facility other than an existing LNG facility;

"(18) 'LNG accident' means any release, burning, or explosion of LNG resulting from—

"(A) a rupture or other failure of a storage tank, pipeline, or other LNG facility;

"(B) natural hazards (including earthquakes, hurricanes, and high winds);

"(C) sabotage; or

"(D) any other cause; and

"(19) 'Interstate or foreign commerce' means any trade, traffic, transportation, exchange, or other commerce—

"(A) between any State and any place outside of such State, or

"(B) which affects any trade, transportation, exchange, or other commerce described in subparagraph (A).".

SITING AND SAFETY STANDARDS

SEC. 202. (a) The Act is amended by redesignating sections 6 through 17 as sections 8 through 19, respectively, and by inserting after section 5 the following new section:

"STANDARDS FOR LNG FACILITIES

"SEC. 6. (a)(1) After the date standards first take effect under this section, no new LNG facility may be constructed, unless the Secretary approves such construction, and then only to the extent that such construction is in accordance with the applicable standards prescribed under subsection (b) and such other terms and conditions as the Secretary determines are appropriate to assure that the facility will be constructed and operated in compliance with standards under subsection (b).

"(2) The Secretary shall not approve construction of any LNG facility under this subsection unless the person seeking such approval submits a contingency plan which sets forth those steps which are to be taken in the event of an LNG accident or supply interruption and which the Secretary determines to be adequate.

"(3) The standards under this subsection shall not apply in the case of siting or construction with respect to which an application for approval was filed before March 1, 1978, with—

"(A) the Department of Energy or any predecessor organization of the Department; or

"(B) the appropriate State agency, in the case of any facility not subject to the jurisdiction of the Department under the Natural Gas Act.

"(b) Not later than 180 days after the date of the enactment of this section, the Secretary shall establish—

"(1) minimum standards for determining the location of any new LNG facility which is to be stationary,

"(2) minimum standards for the construction of any new LNG facility, and

"(3) minimum standards for the operation of any new LNG facility.

Any standard under this section shall be in addition to, and not in lieu of, standards under section 3 which are not inconsistent with such standard.

"(c) Not later than 270 days after the date of the enactment of this title, the Secretary shall establish minimum stand-

ards to be maintained with respect to the operation of any existing LNG facility.

"(d) In prescribing standards under subsections (b) and (c), the Secretary shall take into consideration—

"(1) with respect to standards relating to the location of any stationary new LNG facility—

"(A) the nature of the use of the facility;

"(B) criteria to be used in determining the number and characteristics of other sites to be considered as alternative locations for such LNG facility;

"(C) the existing and projected population and demographic characteristics associated with each location considered;

"(D) the existing and proposed land uses near each such location;

"(E) the meteorological, geological, topographical, and other natural physical aspects of each such location;

"(F) the medical, law enforcement, and fire prevention capabilities existing near each such location to cope with risks created by such a facility;

"(G) the costs of constructing and operating such LNG facility at each such location, including the costs to the United States and to State and local governments which are associated with such construction and operation; and

"(H) the need to encourage remote siting;

"(2) with respect to standards applicable to the construction of any new LNG facility—

"(A) the thermal resistance and other characteristics of materials to be used in the construction of such facility as compared to alternative materials;

"(B) design factors (such as multiple diking, insulated concrete, and vapor containment barriers);

"(C) the characteristics of the LNG to be stored or converted at, or transported by, such facility (for example, whether it is to be in a liquid, semisolid, or solid state); and

"(D) the public safety factors of the design as compared to alternative designs (particularly the ability under such a design to prevent and contain an LNG spill); and

"(3) with respect to standards for the operation of any LNG facility—

"(A) the conditions, features, and type of equipment and structures which comprise, or which are used in connection with, such facility;

"(B) the fire prevention and containment equipment at such facility;

"(C) the security measures to be used with respect to the operation of such facility for the prevention of sabotage or other intentional acts which could cause an LNG accident;

"(D) maintenance procedures and equipment;

"(E) the training of personnel with respect to the equipment, structures, measures, and procedures described in subparagraphs (A), (B), (C), and (D); and

"(F) other factors and conditions relating to the safe handling of LNG.

"(e) At any time after the effective date of standards initially prescribed under subsections (b) and (c), the Secretary shall, on his own motion or on the motion of any person, amend such standards to the extent he considers necessary to reflect changes in technology or to otherwise carry out the purposes of this section.

"(f) Any standards prescribed under this section, and amendments thereto, shall become effective 30 days after the date of issuance of such standards unless the Secretary, for good cause recited, determines an earlier or later effective date is required as a result of the period reasonably necessary for compliance and such date is specified in the order establishing or amending such standard.

"(g) The provisions of subchapter II of chapter 5 of title 5, United States Code, shall apply to all orders establishing, amending, or revoking, any standard established under this section. The Secretary shall afford interested persons an opportunity to participate fully in the establishment of such safety standards through submission of written data, views, or arguments with opportunity to present oral testimony and argument.

"(h) Any State agency may adopt additional or more stringent standards for intrastate LNG facilities if such standards are compatible with the Federal minimum standards. No State agency may adopt or continue in force any such standards applicable to interstate LNG facilities after the Federal minimum standards become effective.".

(b)(1) Section 2(a)(4), as redesignated, is amended by striking out "or affecting".

(2) Section 2(a)(10), as redesignated, is amended by inserting ", LNG facilities," after "pipeline facilities" the first place it appears therein.

(3) Section 3(d), as redesignated, is amended—

(A) by inserting "or LNG facilities" after "pipeline facilities"; and

(B) by inserting after "in the same manner" the following: "and to the same extent".

(4) Section 4(b) (relating to Pipeline Transportation Safety Committee) is amended by inserting ", LNG facilities," after "pipeline facilities".

(5) Section 9 (relating to cooperation), as redesignated, is amended—

(A) by inserting "or LNG facility" after "affected pipeline facility" and after "gas pipeline"; and

(B) by inserting "or LNG facilities" after "pipeline facilities".

(6) Section 10 (relating to compliance), as redesignated, is amended by inserting "LNG facilities" after "pipeline facilities".

(7) Section 13 (relating to injunction and jurisdiction), as redesignated, is amended by inserting after "pipeline facility" the following: "or LNG facility".

(8) Section 14 (relating to inspection and maintenance plans), as redesignated, is amended—

(A) by inserting after "facilities" the following: "or LNG facilities" each place it appears;

(B) by striking out "pipeline safety" each place it appears and inserting in lieu thereof "pipeline and LNG facility safety"; and

(C) by inserting in paragraph (2) after "pipeline transportation" the following: "or LNG facility".

(9) Section 15 (relating to records, etc.), as redesignated, is amended by inserting after "pipeline facilities" each place it appears the following: "and LNG facilities".

(10) Section 17(a)(2) (relating to annual report), as redesignated, is amended by inserting after "pipeline" the following: "or LNG facilities".

(11) Section 17(a)(4) (relating to annual report), as redesignated, is amended by striking out "and pipeline facilities" and inserting in lieu thereof ", pipeline facilities, and LNG facilities,".

FINANCIAL RESPONSIBILITY

SEC. 203. The Act, as amended by section 202 of this Act, is further amended by inserting after the new section 6 the following new section:

"FINANCIAL RESPONSIBILITY FOR CERTAIN LNG ACTIVITIES

"SEC. 7. (a) Not later than 9 months after the date of the enactment of this section, the Secretary shall—

"(1) conduct a study of the risks associated with the production, transmission, and storage of LNG and the methods of assuring adequate financial responsibility for those engaged in such activities; and

"(2) prepare and transmit to each House of the Congress a report on the results of such study, together with the recommendations of the Secretary for such legislative or administrative action as he considers appropriate.

"(b)(1) Whenever the Secreatry has reason to believe that any operator of an LNG facility is not maintaining adequate insurance or otherwise does not have adequate financial responsibility with respect to such facilities, he shall issue and serve upon such operator notice thereof, together with a statement of the amount of the financial responsibility that the Secretary would consider adequate.

"(2) Any person issued notice under paragraph (1) shall have a right to hearing on the record in accordance with section 554 of title 5, United States Code, to be held not later than 30 days after notice under paragraph (1), at which such person has the right to show cause as to why an order should not be issued by the Secretary requiring such person to demonstrate and maintain financial responsibility at or above the amount indicated in the notice under paragraph (1).

"(3) After an opportunity for hearing under paragraph (2), the Secretary may, if he determines it is justified in the public interest, order the person issued notice of such hearing to demonstrate and maintain financial responsibility at or above an amount determined appropriate by the Secretary, taking into account any information, data, and views presented in such hearing.

"(4)(A) Any person aggrieved by an order issued under paragraph (3) may seek judicial review of such order only by filing a petition for review in the appropriate court of appeals of the United States within 60 days after such order is issued.

"(B) Upon receipt of notice of the filing of such petition, the Secretary shall file in the court the record in the proceeding, as provided in section 2112 of title 28, United States Code. Upon such filing, the court may affirm, modify, remand, or set aside the order of the Secretary, and may enforce the order to the extent that such order is affirmed and issue such writs as are ancillary to its jurisdiction or are necessary in its judgment to prevent injury to the public pendente lite. The findings of the Secretary as to the facts, if supported by substantial evidence, shall be conclusive.

"(C) The judgment and decree of the court shall be final, except that such judgment and decree shall be subject to review by the Supreme Court upon certiorari, as provided in section 1254 of title 28, United States Code.

"(c) For purposes of subsection (b) of this section, financial responsibility may be maintained by any one of, or a combination of, the following methods acceptable to the Secretary:

"(1) evidence of insurance,

"(2) surety bonds,

"(3) qualification as a self-insurer, or

"(4) other evidence of financial responsibility.".

ENFORCEMENT OF STANDARDS AND FINANCIAL RESPONSIBILITY REQUIREMENTS

SEC. 204. (a) Section 11(a) (relating to civil penalty), as redesignated by section 202 of this Act, is amended by inserting "(1)" before "Any person" and by adding at the end thereof the following new paragraph:

"(2) Any person who violates the provisions of section 6 or any order under section 7(b) shall be subject to a civil penalty of not to exceed $50,000, which penalty shall be in addition to any other penalties to which such person may be subject under this subsection.".

(b) The Act is further amended by redesignating sections 12 through 19 (as redesignated) as sections 13 through 20, respectively, and by inserting after section 11 the following new section:

"CRIMINAL PENALTY

"SEC. 12. Any person who willfully and knowingly violates the provisions of section 6 or any order issued under section 7(b) shall, on conviction thereof, be punished by a fine of not more than $50,000, or by imprisonment for not more than five years, or both.".

APPROPRIATIONS AUTHORIZATION

SEC. 205. Section 18(b) (relating to appropriations authorization), as redesignated, is amended by adding at the end thereof the following new paragraph:

"(3) There are authorized to be appropriated to carry out sections 6 and 7 of this Act for the fiscal year ending September 30, 1979, not to exceed $2,000,000.".

TITLE III—MISCELLANEOUS PROVISIONS

WILLFUL DESTRUCTION OF INTERSTATE PIPELINE TRANSMISSION OR LNG FACILITIES

SEC. 301. Section 12 (as added by section 204 of this Act), is amended by inserting "(a)" after "SEC. 12." and by adding at the end thereof the following new subsection:

"(b) Any person who willfully injures or destroys, or attempts to injure or destroy—

"(1) any pipeline facility for the interstate transmission of gas, liquefied petroleum gas, or petroleum, including any facility or equipment covered under this Act under section 2(b) or (d) used in the interstate transmission of gas or liquefied petroleum gas, or

"(2) any liquefied gas facility to which section 6 applies,

shall be fined not more than $15,000 or imprisoned not more than fifteen years, or both.".

CITIZEN'S CIVIL ACTION

SEC. 302. Section 20 (relating to citizen civil suits), as redesignated, is amended by striking out subsections (a) and (b) and inserting in lieu thereof the following:

"SEC. 20. (a) Except as provided in subsection (b), any aggrieved person may commence a civil action for equitable relief as a citizen whenever such action constitutes a case or controversy—

"(A) against any person (including (i) the United States, and (ii) any other governmental instrumentality or agency to the extent permitted by the 11th amendment to Constitution) alleged to be in violation of any provision of this Act, any order or regulation issued under this Act, or any condition of approval pursuant to section 6 of this Act; or

"(B) against the Secretary where there is alleged a failure of the Secretary to perform any act or duty under this Act, which is not discretionary with the Secretary.

"(2) Any action brought against the Secretary under paragraph (1)(B) shall be brought in the district court for the District of Columbia or for the judicial district in which the facility involved is located or proposed to be located.

"(3) In suits brought under this section, the district court shall have jurisdiction, without regard to the amount in controversy or the citizenship of the parties, to enforce any provision of this Act or any condition of approval pursuant to section 6 of this Act or to order the Secretary to perform such act or duty, as the case may be.

"(b) No civil action may be commenced under this section—

"(1) under subsection (a)(1)(A)—

"(A) prior to 60 days after the plaintiff has given notice of the violation (i) to the Secretary (or to the applicable State agency in the case of a State which has been certified under section 5(a) and in which the violation is alleged to have occurred) and (ii) to any alleged violator; or

"(B) if the Secretary (or such State agency) has commenced and is diligently pursuing administrative proceedings or the Attorney General (or the chief law enforcement officer of such State) has commenced and is diligently prosecuting a civil or criminal action with respect to such matters in a court of the United States but in any such action any person may intervene as a matter of right; or

"(2) under subsection (a)(2) prior to 60 days after the plaintiff has given notice of such action to the Secretary (or such State agency).

Notice under this subsection shall be given in such a manner as the Secretary shall prescribe by regulation.".

APPOINTMENTS OF DIRECTOR OF PIPELINE SAFETY OPERATIONS AND DIRECTOR OF MATERIALS TRANSPORTATION BUREAU

SEC. 303. (a) Notwithstanding any other provision of law—

(1) no individual may serve for more than 180 days (in the aggregate) in an acting capacity in a position the principal duties of which were identified as of March 1, 1978, as assigned to the Director of the Office of Pipeline Safety Operations, Department of Transportation, or may serve as the Acting Director of the Materials Transportation Bureau, Department of Transportation, and

(2) if a person is not appointed to such position within 180 days agter a vacancy occurs in that position, the Secretary shall personally carry out the functions of such position until an appointment is made to that position and all delegations of authority under the Fuels Transportation Safety Act shall be suspended until such appointment is made.

(b) In the case of any vacancy in such positions on the date of the enactment of this Act, periods of service before the date of enactment shall not be taken into account for purposes of subsection (a).

TECHNICAL, CLERICAL, AND CONFORMING AMENDMENTS

SEC. 304. (a) Section 3, as amended by this Act, is further amended by striking out subsection (a) and by redesignating subsections (b) through (f) as subsections (a) through (e), respectively.

(b) Section 3(b), as redesignated by subsection (a), is amended by inserting after "period reasonably necessary for compliance" the following: "and such date is specified in the order establishing or amending such standard".

(c) Clause (ii) of section 5(a) is amended by inserting after "property damage exceeding $1,000" the following: "(whether or not sustained by a person subject to the safety jurisdiction of the State)".

(d) Section 5(a) is amended by striking out "; except that a State agency may file a certification under this subsection without regard to the requirement of injunctive and monetary sanctions under State law for a period not to exceed five years after the date of enactment of this Act".

(e) Section 11(a)(1) (relating to civil penalties), as redesignated, is amended by striking out ": Provided, That for a reasonable period of time, not to exceed one year after the date of the enactment of this Act, such civil penalties shall not be applicable to pipeline facilities existing on such date of enactment".

(f) Section 17(a)(3) (relating to annual reports), as redesignated by sections 202 and 204 of this Act, is amended by striking out "section 3(e)" and inserting in lieu thereof "section 3(d)".

(g) The following provisions are each amended by striking out "Federal Power Commission" and inserting in lieu thereof "Federal Energy Regulatory Commission".

(1) section 2(a) (9) and (10), as redesignated;

(2) section 9 (relating to cooperation), as redesignated, including the section heating; and

(3) section 16(b) (relating to administration), as redesignated.

(h) Paragraphs (9) and (10) of section 2(a), as redesignated, are each amended by inserting "or the Interstate Commerce Act" after "the Natural Gas Act".

(i)(1) Section 5(a) is amended by striking out "section 12(b)", "section 12", "section 11", "sections 9 and 10" and inserting in lieu thereof "section 15 (b) and (e)", "section 15 (a), (b), (c), and (f)", "section 14", and "sections 11 (other than subsection (a)(2) thereof) and 13", respectively.

(2) Section 5(a) is further amended by inserting "section 20," before "and except as otherwise provided in this section".

(3) Section 5(b)(2) is amended by striking out "section 11" and inserting in lieu thereof "section 14".

(4) Section 5(c)(2) is amended by striking out "section 15(b)" and inserting in lieu thereof "section 18(b)(1)".

(5) Section 10 (relating to compliance), as redesignated, is amended by striking out "section 11" and "section 12" and inserting in lieu thereof "section 14" and "section 15", respectively.

(6) Section 13 (relating to injunction and jurisdiction), as redesignated, is amended by striking out "section 9" each place it appears and inserting in lieu thereof "section 11 or 12".

(7) Section 11(a)(1) (relating to civil penalty), as redesignated, is amended by striking out "section (8)(a)" and inserting "section 10" in lieu thereof.

(j) Section 17(a) (relating to annual report), as redesignated, is amended by striking out "March 17" and inserting in lieu thereof "June 1".

(k) Any reference in any other provision of law, rule, regulation, or order to the Natural Gas Pipeline Safety Act of 1968 shall be considered to refer to the Fuels Transportation Safety Act.

Mr. DINGELL (during the reading). Mr. Chairman, I ask unanimous consent that the committee amendment in the nature of a substitute be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The CHAIRMAN. Are there any amendments to the bill?

AMENDMENT OFFERED BY MR. COLLINS OF TEXAS

Mr. COLLINS of Texas. Mr. Chairman, I offered an amendment.

The Clerk read as follows:

Amendment offered by Mr. COLLINS of Texas: On page 56, after line 11, add the following new paragraph:

"(3) Nothing in this subsection shall be interpreted to provide the Secretary with authority over any specified type or class of facility or equipment used in the transportation on land of gas or liquefied petroleum gas, in interstate or foreign commerce, or storage in connection with such transportation, unless the Secretary has authority over such facilities, equipment, or storage under any other provision of law."

Mr. COLLINS of Texas. Mr. Chairman, my amendment is straightforward and technical in nature. Its purpose is to

clarify the intent of section 106 to assure that this provision is only meant to plug loopholes in existing and overlapping laws, and that it should not be interpreted as providing the Secretary with a separate grant of authority over any facility or equipment over which he does not now have authority.

As section 106 is now written, it arguably could allow the Secretary of Transportation to extend provisions of this act to require new standards for the design, installation, maintenance, operation of or reporting on, residential, farm, commercial, or industrial user LPG storage facilities of under 30,000 gallons capacity and not meeting the other requirements of section 104(b). This was not the committee's intention when it adopted this bill. In fact, the committee's intention was clearly stated to the contrary.

Language identical to that contained in my amendment was supposed to have been included in the committee report accompanying this bill. Unfortunately, due to an inadvertent drafting error, this language was misplaced in the committee report and now appears under the explanatory material accompanying master meters. For this reason my amendment is necessary to clarify the seemingly broad grant of authority contained in section 106. I urge all Members to support this amendment which brings the language of section 106 into conformity with the intentions of its supporters.

Mr. DINGELL. Mr. Chairman, would the gentleman from Texas yield?

Mr. COLLINS of Texas. I will be glad to yield to the gentleman from Michigan.

Mr. DINGELL. Mr. Chairman, we have had a copy of the amendment made available to us. I find no objection to the amendment.

Mr. MOORE. Mr. Chairman, will the gentleman yield?

Mr. COLLINS of Texas. I yield to the gentleman from Louisiana.

Mr. MOORE. Mr. Chairman, we on the minority side have looked at the amendment and find it very meritorious and have no objection to it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. COLLINS).

The amendment was agreed to.

Mr. MOORE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I take this time to enter into a colloquy with the distinguished chairman of the subcommittee, the gentleman from Michigan.

Mr. Chairman, I ask the gentleman, will section 102 of H.R. 11622 require natural gas distribution and pipeline companies to dig up their pipeline systems if that is the only way they can obtain the information required to be reported under section 102?

Mr. DINGELL. Mr. Chairman, would my good friend, the gentleman from Louisiana yield?

Mr. MOORE. I yield to the distinguished chairman of the committee.

Mr. DINGELL. Mr. Chairman, I would like to comment that my friend from Louisiana is a most valuable Member of the subcommittee and we have worked together harmoniously on this matter, despite our differences.

In response to the basic question, the answer is no. Our intention is to allow the reporting requirements of section 102 to be satisfied by reporting such information as is available from the records of the person operating the pipeline or through the gathering of information obtainable through normal maintenance procedures. Unless the Secretary finds that there is a clear and present hazard threatening public safety, there is no intent to require pipeline and distribution companies to undertake extraordinary excavation activity to obtain section 102 information.

Mr. Chairman, I would also point out that there are other methods whereby a large part of the information can be gotten and it is anticipated that those methods will be used first before any resort is undertaken as regards digging.

Mr. MOORE. Mr. Chairman, I thank the distinguished chairman of the subcommittee for these comments. Those are my understandings and observations of this section as well.

I think we now have the record complete to the point we are not placing an onerous and unreasonable burden of digging up these pipelines if there is no other way to obtain the information.

Mr. DINGELL. Mr. Chairman, if the gentleman will yield further, that is correct.

Mr. ROBERTS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, Shakespeare had the proper description of this: "Much Ado About Nothing."

Mr. Chairman, I am amazed to see that such legislation comes before the House and to my friend, the gentleman from Michigan (Mr. DINGELL), I offered to bet the gentleman a dollar that the gentleman did not know what propane and butane was, and I did not get a call.

Every house in the rural areas in my part of the country burns propane or butane. Probably in the 40 years they have been doing it, they had two homes explode because somebody forgot to shut the stove off; but butane and propane basically are produced accidentally in the refining process. They are the residual that drops down when you get through.

Twenty years ago we paid people to haul it off, burn it, do anything to get rid of it. It got up to 2 cents a gallon and poor people burned it at home.

Then when we got in an energy crunch, it got up to about 35 cents a gallon and now the poor folks that live out in the country, their fuel bill is far more than their grocery bill.

When we talk about all these safety provisions, now, very little of it is transported by pipeline. We ought to have pipeline safety and I commend the gentleman for trying to have pipeline safety; but what are we going to do about nitrate fertilizer? One bag of nitrate fertilizer has more explosive in it than 100 gallons of propane or butane. Are we going to stop them from fertilizing?

This is patently something we ought not to be fooling with. It is not going to do any good. It is going to cost a lot of money and instead of 30 cents a gallon, you are going to have poor folks on the farm that cannot get any other fuel paying 50 cents a gallon for their heating fuel.

It is safe if handled properly. We burn it in our automobiles. We burn it in our trucks.

We use it in our tractors, and I have heard of one of them blowing up. Of course, they can blow up. You can have explosions in anything, but the worst explosions we have had have been from nitrate fertilizers—for instance, the one in Texas City. I presume next we will have a bill that says a farmer cannot haul fertilizer out to his farm.

AMENDMENT OFFERED BY MR. EDGAR

Mr. EDGAR. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. EDGAR: Page 56, after line 11, delete "." and insert the following:

"(3) Not later than 1 year after the date of the enactment of this subsection, the Secretary shall conduct a study, and submit a report thereon to the Congress, on the effects which would result from including within the coverage of this Act various types and classes of facilities and equipment used in the transportation on land of gas or liquefied petroleum gas in interstate or foreign commerce, or storage in connection with such transportation.".

Mr. EDGAR. Mr. Chairman, I rise to offer an amendment to the Fuels Transportation Safety Act of 1978.

The purpose of my amendment is to remedy a dangerous situation which threatens the lives and property of thousands of our constituents who live near liquid petroleum gas storage and/or transportation facilities.

On January 28, 1978, 40 families in the borough of Marcus Hook, Pa., had to be evacuated when a fire swept through a residential area bordering an oil refinery. Five homes were severely damaged, and three others were made uninhabitable. Only luck and courageous action by local officials prevented what could have been a tragedy of major proportions.

Mr. Chairman, it took many hours before it could be determined that the fire resulted from a leak of butane vapor from a 250,000-barrel underground storage cavern owned and operated by the Sun Co.

I and my staff worked closely with local, State and Federal officials to cope with this disaster. After bickering and buck-passing among various State and Federal agencies, a task force was finally formed to advise the borough and aid the residents. Marcus Hook mayor, Wayne Curtis Weldon, has compiled a detailed account of this disaster. A review of this fascinating document leads one to at least this striking conclusion—there is virtually no regulation of these storage facilities at the State or Federal level. When a fire did occur, no State or Federal agency assumed responsibility for the area.

Incredibly, the borough of Marcus Hook, could not find Federal or State

aid in analyzing the leaking gas which was fueling the fire, and was forced to hire the services of an independent laboratory.

On April 13, Mayor Weldon testified before the House Subcommittee on Energy and Power on H.R. 11622. In his testimony, the mayor shared his experiences and frustrations in responding to a situation which threatened the safety of the 3,000 residents of the borough. During his testimony, Mayor Weldon offered specific recommendations which he felt were necessary to avoid a repetition of the January 28th disaster at any of the approximately 75 similar underground LPG storage facilities in this country.

I would like to share with my colleagues these recommendations:

RECOMMENDATIONS

(1) A thorough investigation should be implemented on the full geological conditions necessary for successful use of underground storage facilities. This study should include possible natural or man-made causes of breaking desirable natural conditions as well as what outcomes could be expected from materials stored within the cavern facility.

(2) The construction and operation of underground storage facilities used for petroleum products should be placed under the authority of the Office of Pipeline Safety Operations.

(3) All existing underground storage caverns should be thoroughly inspected with special emphasis upon the particular safety devices in operation on each. Standards for these devices should be developed and implemented.

(4) Underground storage caverns should not be used in any residential area. Minimally safe distances should be established in standards. Where such caverns must be located in the proximity of residential areas, extra safety precautions should be implemented for completely safe operation.

(5) A national energy hot-line number should be established for any incident involving such products as LPG, LNG and should be readily available to municipalities and their fire and safety officials.

(6) Proof of financial stability must be established by any company involved with LPG, LNG facilities for possible recourse in time of disaster.

Provisions of H.R. 11622 included by the Commerce Committee take the first step to assure the responsible regulation of LPG storage facilities. Section 104 of this legislation amends the Natural Gas Pipeline Safety Act of 1968 to permit the Secretary of Transportation to include liquid petroleum gas storage facilities among the facilities which can be regulated under the act.

There are two conditions under which such regulations can be promulgated. First, the Secretary must find that including LPG facilities would further the purposes of the act. Second, facilities which could be regulated must have a capacity of at least 30,000 gallons, or an aggregate of 30,000 gallons for more than one facility at the same site.

A second provision of this legislation, as reported, also relates to LPG facilities. Section 106 amends the 1968 act to provide that the Secretary may require that certain LPG storage facilities be regulated in the same manner as other facilities covered by the act, provided that he determines that the purposes of the act would be furthered.

I wish to compliment the committee and subcommittee for approving the above provisions. However, I fear that the language does not require affirmative action by the Secretary to look at the problem of LPG storage regulation. The Secretary may feel that this issue is not a priority, or that despite the need for regulation, there are inadequate staff and resources to take an initiative in this area.

My amendment would correct this possible flaw by requiring the Secretary to take a look at this problem. The amendment provides that the Secretary must study the effects of regulating LPG storage facilities. A report on the study would have to be submitted to the Congress not later than one year following the enactment of this bill.

Since the General Accounting Office has just completed (July 31, 1978) a massive study entitled "Liquid Energy Gases Safety," the Secretary's task should be a relatively simple one. If the study demonstrates the need for regulation, then the Secretary would be authorized by provisions already in this bill to issue regulations which would apply some or all of the provisions of the 1968 act to these facilities.

Regulation which could apply to LPG storage facilities would include setting standards for the design, installation, inspection, emergency plans and procedures, testing, construction, extension, operation, replacement, and maintenance of them. Standards affecting design, installation, construction, initial inspection and initial testing would not apply to facilities in existence when standards are adopted.

Minimum training and education requirements for inspectors would be specified. Nothing would prohibit States from adopting more stringent standards than the Federal minimum standards, provided that the State standards were compatible with the Federal standards.

Standards could be waived on a case-by-case basis if the Secretary of Transportation determined, after notice and opportunity for public hearing, that the standard would not be inconsistent with safety.

Standards relating to financial responsibility for certain LNG activities could also be applied to LPG storage activities if the Secretary determined in his study that such standards would further the purposes of the act.

Mr. Chairman, I find it unfortunate that we often become concerned about dangerous circumstances only when there is a disaster. As long as there are headlines about explosions of liquid natural gas trucks, oil spills at sea, or even long lines at the gas pumps, we are able to focus our attention on responsible measures to minimize the probability of a replay. While there are no headlines today about accidents involving LPG storage facilities, it is certainly not because State and Federal regulations have been protecting our citizens. My amendment could prevent a reoccurrence of what is known as the "Green Street Disaster," and I urge my colleagues to approve this amendment.

Mr. DINGELL. Mr. Chairman, will my good friend and colleague, the gentleman from Pennsylvania, yield?

Mr. EDGAR. I yield to the gentleman from Michigan.

Mr. DINGELL. Mr. Chairman, I want to pay tribute to the distinguished gentleman from Pennsylvania (Mr. EDGAR) for his offering of the amendment and for the careful way in which he has approached this problem here in the House.

I would observe that we have had an opportunity to review the amendment, and I am thoroughly sympathetic with it. The gentleman is to be congratulated for offering it, and I find no objection to it on this side.

Mr. EDGAR. Mr. Chairman, I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. EDGAR).

The amendment was agreed to.

The CHAIRMAN. Are there further amendments? If not, the question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore. (Mr. NATCHER) having assumed the chair, Mr. HUGHES, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 11622) to amend the Natural Gas Pipeline Safety Act of 1968 to provide for the safe operation of pipelines transporting natural gas, petroleum, petroleum products, and certain other materials, to provide standards with respect to the siting, construction, and operation of liquefied natural gas and liquid petroleum gas facilities, and for other purposes, pursuant to House Resolution 1311, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The bill was passed.

The title was amended so as to read: "A bill to amend the Natural Gas Pipeline Safety Act of 1968 to provide for the safe operation of pipelines transporting

natural gas and liquefied petroleum gas, to provide standards with respect to the siting, construction, and operation of liquefied natural gas facilities, and for other purposes.".

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. DINGELL. Mr. Chairman, I ask unanimous consent that all members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The SPEAKER pro tempore. Pursuant to the provisions of House Resolution 1311, the Committee on Interstate and Foreign Commerce is discharged from the further consideration of the Senate bill (S. 1895) to amend the Natural Gas Pipeline Safety Act of 1968 to authorize appropriations for fiscal year 1979.

The Clerk read the title of the Senate bill.

MOTION OFFERED BY MR. DINGELL

Mr. DINGELL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. DINGELL moves to strike out all after the enacting clause of the Senate Bill (S. 1895) and to insert in lieu thereof the text of H.R. 11622, as passed by the House, as follows:

SHORT TITLE; TABLE OF CONTENTS

SECTION 1. (a) This Act may be cited as the "Fuels Transportation Safety Amendments Act of 1978".

(b) The table of contents for this Act is as follows:

TABLE OF CONTENTS

Sec. 1. Short title; table of contents.
Sec. 2. References to Natural Gas Pipeline Safety Act of 1968.
TITLE I—FUELS TRANSPORTATION GENERALLY
Sec. 101. Hazardous pipeline facilities.
Sec. 102. Information on pipeline location and characteristics.
Sec. 103. Reporting of pipeline leaks.
Sec. 104. Coverage of pipeline transportation of liquefied petroleum gas.
Sec. 105. Coverage of gas distributed in connection with rental or lease of real property.
Sec. 106. Coverage of certain nonpipeline facilities.
Sec. 107. Pipeline safety inspectors.
Sec. 108. Technical Pipeline Standards Committee.
Sec. 109. Appropriations authorization.
TITLE II——SITING AND SAFETY OF LNG FACILITIES
Sec. 201. Definitions.
Sec. 202. Siting and safety standards.
Sec. 203. Financial responsibility.
Sec. 204. Enforcement of standards and financial responsibility requirements.
Sec. 205. Appropriations authorization.
TITLE III—MISCELLANEOUS PROVISIONS
Sec. 301. Willful destruction of interstate pipeline transmission or LNG facilities.
Sec. 302. Citizens' civil action.
Sec. 303. Appointments of Director of Pipeline Safety Operations and Director of Materials Transportation Bureau.
Sec. 304. Technical, clerical, and conforming amendments.

REFERENCES TO NATURAL GAS PIPELINE SAFETY ACT OF 1968

SEC. 2. Except as otherwise expressly provided, whenever in this Act, any reference, amendment, or repeal is expressed in terms of a reference or amendment to, or repeal of, a section or other provision, it shall be considered to be made to a section or other provision of the Natural Gas Pipeline Safety Act of 1968.

TITLE I—FUELS TRANSPORTATION GENERALLY

HAZARDOUS PIPELINE FACILITIES

SEC. 101. (a) Section 8 is amended by redesignating subsection (b) as subsection (c) and by inserting after subsection (a) the following new subsection:

"(b)(1) If the Secretary finds, after reasonable notice and an opportunity for hearing, that any pipeline facility is hazardous to life or property, he shall, by order, require the person operating the facility to take necessary corrective action. Such corrective action may include physical inspection, testing, repair, replacement, or other action, as appropriate.

"(2) The Secretary may find a pipeline facility to be hazardous under paragraph (1)—

"(A) if under the facts and circumstances he determines the particular facility is hazardous to life or property, or

"(B) if the pipeline facility or a component thereof has been or is proposed to be constructed or operated with any equipment, material, or technique which he determines is hazardous to life or property, unless the operator involved demonstrates to the satisfaction of the Secretary that under the particular facts and circumstances involved such equipment, material, or technique is not hazardous to life or property.

"(3) In making a determination under paragraph (2), the Secretary shall consider—

"(A) the characteristics of the pipe and other equipment used in the pipeline facility involved, including its age, manufacturer, physical properties (including its resistance to corrosion and deterioration), and the method of its manufacture, construction, or assembly;

"(B) the nature of the materials transported by such facilities (including their corrosive and deteriorative qualities), the sequence in which such materials are transported, and the pressure required for such transportation;

"(C) the aspects of the areas in which the pipeline facilities are located, in particular the climatic and geologic conditions (including soil characteristics) associated with such areas, and the population density and population and growth patterns of such areas; and

"(D) such other factors as the Secretary may consider appropriate.

"(4) The Secretary may waive any requirements for hearing and a period of reasonable notice and provide for expeditious issuance of an order under this subsection in any case in which he determines that the failure to do so would result in the likelihood of serious harm to life or property.".

(b) Section 3(b) is amended by striking out the fourth sentence.

(c) The first sentence of section 5(a) is amended by striking out "the fourth sentence of section 3(b)," and inserting in lieu thereof "section 10(b),".

INFORMATION ON PIPELINE LOCATION AND CHARACTERISTICS

SEC. 102. (a) Section 12 is amended by redesignating subsection (d) as subsection (f) and by inserting after subsection (c) the following new subsection:

"(d)(1) The Secretary shall, by regulation, require any person operating a pipeline facility to—

"(A) prepare and maintain a general description of the pipeline facility, including—

"(i) the location of the pipeline and the pipeline facilities;

"(ii) the type, age, manufacturer, and method of construction of such pipeline and facilities;

"(iii) the nature of the materials transported, the sequence in which they are transported, and the pressure at which they are transported;

"(iv) the climatic and geologic conditions including soil characteristics) associated with the areas in which the pipeline facilities are located, and the population density and patterns of such areas; and

"(v) such other information as the Secretary may consider appropriate;

"(B) prepare, maintain, and submit to State and local entities authorized to approve demolition, excavation, tunneling, or construction activities in the areas in which the pipeline facilities are located a detailed description of the pipeline's location; and

"(C) submit to the Secretary a report containing the information prepared and maintained under subparagraph (A).

"(2) Information prepared and maintained under paragraph (1)(A)(i) of this subsection shall, on request and for good cause shown, be made available for public inspection.

"(3) The requirements of subparagraph (B) of paragraph (1) shall be deemed to be satisfied in the case of any pipeline facility operator participating in a public safety program established under State or local law or regulation—

"(A) under which—

"(i) notice is required to be provided to pipeline facility operators of proposed demolition, excavation, tunneling, or construction near or affecting such facility; and

"(ii) such operators are required to identify specific pipeline facilities which may be affected by the proposed demolition, excavation, tunneling, or construction, or to supervise such demolition, excavation, tunneling, or construction, for the purpose of preventing damage to such facilities; and

"(B) which the Secretary determines is being carried out in a manner adequate to assure protection against the hazards of demolition, excavation, tunneling, or construction near or affecting such facilities.

"(4) The Secretary shall—

"(A) not later than 180 days after the date of the enactment of this subsection, publish proposed regulations required to be prescribed under paragraph (1), and provide an opportunity (of not less than 60 days' duration) for oral and written public comment on such proposed regulations; and

"(B) as soon as possible after the public comment period under subparagraph (A) but not later than 270 days after the date of the enactment of this subsection, prescribe the final regulations.

(5) The Secretary shall, by order or regulation, provide for an exemption for any person or category of persons from all or part of the requirements under this subsection if the Secretary finds—

"(A) that the financial and administrative burdens of being covered by such requirements are not justified by the benefits resulting from that coverage; or

"(B) the costs to such person or persons by being covered by such requirements would significantly increase consumer rates or charges and such exemption would not endanger the public health or safety.

"(6) Information shall not be required to be prepared or reported under the regulations under this subsection before January 1, 1982.

"(7) Not later than 3 years after the date

of the enactment of this subsection, the Secretary shall establish and thereafter maintain a program, for use in an electronic data-processing system, which processes and maintains—

"(A) information obtained under this subsection;

"(B) information on pipeline leaks reported under subsection (e);

"(C) information on accidents and incidents reported under section 5; and

"(D) such other information as the Secretary determines appropriate;

for the purpose of identifying hazardous equipment, materials, and techniques involved in the construction or operation of pipeline facilities.".

(b)(1) Section 5(a) is amended—

(A) by inserting after "(3) is enforcing each such standard;" the following: "(4) has adopted and is administering a reporting and disclosure program substantially meeting the requirements of the reporting and disclosure program established by regulation under section 15(d)(1);";

(B) by redesignating paragraphs (4) and (5) thereof as paragraphs (5) and (6), respectively;

(C) by striking out "excavation" in paragraph (5), as redesignated, and inserting "demolition, excavation, tunneling, or construction" in lieu thereof;

(D) by striking out "and (iv)" and inserting in lieu thereof "(iv) information obtained by the State agency under a program described by paragraph (4) of this subsection; and (v)".

(2) Certification and information requirements established by regulation under the amendments made by paragraph (1) of this subsection shall not apply with respect to annual certifications under section 5 during the 3-year period which begins on the effective date of such regulation.

(c) Section 12(f), as redesignated by subsection (a) of this section, is amended by striking out "or (c)" and inserting in lieu thereof "(c), or (d)".

(d) Section 16 is amended by inserting "(a)" before "Each person" and by adding at the end thereof the following new subsection:

"(b) In addition to the program under subsection (a) of this section, each person engaged in pipeline transportation shall establish a program for the education of the public of the hazards of demolition, excavation, tunneling, or construction activity conducted near pipeline facilities, and the methods by which information on the location of underground pipelines may be obtained by the public.".

REPORTING OF PIPELINE LEAKS

SEC. 103. (a) Section 12, as amended by section 102 of this Act, is further amended by inserting after new subsection (d) the following new subsection:

"(e)(1) The Secretary shall, by regulation, require that any person owning or operating pipeline facilities shall report, at such time and in such manner as the Secretary shall require, any pipeline leak of which such person knew or reasonably should have known. Any such report shall include—

"(A) the specific location of the pipeline leak;

"(B) a description of the pipeline facilities at which the pipeline leak occurred, including any information described in subsection (d)(1)(A) which the Secretary may require under such regulation;

"(C) a description of any personal injury or property damage resulting from such pipeline leak; and

"(D) a description of the steps taken to prevent the leak from continuing or recurring.

"(2) The Secretary shall, by order or regulation, provide for an exemption for any person or category of persons from all or part of the requirements under this subsection if the Secretary finds that the financial and administrative burdens of being covered by such requirements are not justified by the benefits resulting from that coverage.

"(3) For the purposes of this subsection, the term 'pipeline leak' means any condition resulting in the escape of material from pipeline facilities during pipeline transportation, or during treatment of such material during the course of pipeline transportation, which is not caused by operation, inspection, or adjustment procedures which were properly carried out. Such term does not include any condition which does not pose a threat to public health and safety, as determined in accordance with regulations prescribed by the Secretary.".

(b) Section 12(f) (as amended by section 102 of this Act) is amended by striking out ", or (d)" and inserting in lieu thereof "(d), or (e)".

(c) The amendments made by this section shall not apply with respect to any pipeline leak (within the meaning of section 12(e)(3), as amended by this section) occurring before the effective date of the regulation initially prescribed under such amendments.

COVERAGE OF PIPELINE TRANSPORTATION OF LIQUEFIED PETROLEUM GAS

SEC. 104. (a) Section 2(3) is amended—

(1) by striking out "Transportation of gas" and inserting in lieu thereof "Pipeline transportation"; and

(2) by inserting after "interstate or foreign commerce" the following: ", or the transmission or distribution (but excluding the gathering) of liquefied petroleum gas by pipeline, in interstate or foreign commerce".

"(b) Section 2 is amended by redesignating paragraphs (3) through (10) as paragraphs (4) through (11), respectively, and by inserting after paragraph (2) the following new paragraph:

"(3) 'Liquefied petroleum gas' means propane, butane, any related product, or any mixture or combination thereof;".

(c) Section 2(2) is amended by inserting ", but such term does not include liquefied petroleum gas" after "toxic or corrosive".

(d) Section 2(4), as amended and redesignated, is further amended by inserting after "distribution of gas" the following: "(whether in a gaseous or nongaseous state)".

(e) Section (2) is amended by inserting "(a)" after "SEC. 2." and by adding at the end thereof the following new subsection:

"(b) Any storage facility, or category of storage facilities, physically connected to any pipeline facility, or facilities, used for the transmission or distribution of liquefied petroleum gas shall be included by the Secretary, by regulation, within the meaning of subsection (a)(5) if—

"(1) the Secretary finds that such inclusion would further the purposes of this Act; and

"(2) such facility has a storage capacity of 30,000 gallons or more, or is used in connection with one or more other storage facilities at the same site which have, in the aggregate, a storage capacity of 30,000 gallons or more.".

(f) Section 3 is amended by adding at the end thereof the following new subsection:

"(f)(1) Standards, or amendments to standards, required under this section by reason of the enactment of the Fuels Transportation Safety Amendments Act of 1978 shall be prescribed not later than 36 months after the date of the enactment of such Act.

"(2) As soon as practicable but not later than 3 months after the enactment of such Act, the Secretary shall, by order, adopt interim minimum Federal safety standards for pipeline facilities and pipeline transportation to the extent not covered by this Act immediately before the date of the enactment of the Fuels Transportation Safety Amendments Act of 1978. Such standards shall, to the extent the Secretary determines appropriate, be the State standards regulating pipeline facilities and pipeline transportation within such State on such date on enactment. In any State in which no such standards are in effect, the Secretary shall, by order, establish interim Federal safety standards for such pipeline facilities and pipeline transportation in such State which shall, to the extent the Secretary determines appropriate, be such standards as are common to a majority of States having safety standards for pipeline facilities and pipeline transportation on such date. Interim standards shall remain in effect until amended or revoked pursuant to this section. Any State agency may adopt such additional or more stringent standards for pipeline facilities and pipeline transportation not subject to the jurisdiction of the Federal Energy Regulatory Commission under the Natural Gas Act, or the Interstate Commerce Act, as are not incompatible with the Federal minimum standards, but may not adopt or continue in force after the interim standards provided for above become effective any such standards applicable to interstate transmission facilities.".

(g)(1) The following provisions are amended by striking out "the transportation of gas" each place it appears and inserting in lieu thereof "pipeline transportation":

(A) section 2(a) (5) and (9), as redesignated by subsection (a);

(B) section 3 (b) and (e);

(C) section 4(b);

(D) section 8(a);

(E) section 11;

(F) section 12(a);

(G) section 13(b); and

(H) section 14(a)(4).

(2) The following provisions are each amended by striking out "transportation of gas" each place it appears and inserting in lieu thereof "pipeline transportation";

(A) section 2(a)(10), as redesignated by subsection (a);

(B) section 5(b)(3); and

(C) section 10(a).

(3) The following provisions are each amended by striking out "gas pipeline" each place it appears and inserting in lieu thereof "pipeline";

(A) section 3(e);

(B) section 4(a); and

(C) section 14(b).

(4) Section 2(a)(4), as redesignated and amended, is further amended by striking out "or its storage" and inserting in lieu thereof ", or its storage in connection with such gathering, transmission, or distribution,".

(5) Section 5(c)(1) is amended—

(A) by striking out "gas safety programs" and inserting in lieu thereof "pipeline safety programs", and

(B) by striking out "date of enactment of this section." and inserting in lieu thereof the following: "date of enactment of the Fuels Transportation Safety Amendments Act of 1978.".

(6) The short title set forth in the first section is amended to read as follows: "Fuels Transportation Safety Act".

COVERAGE OF GAS DISTRIBUTED IN CONNECTION WITH RENTAL OR LEASE OF REAL PROPERTY

SEC. 105. Section 2, as amended by section 104(e), is further amended by adding at the end thereof the following new subsection:

"(c)(1) Unless paragraph (2) applies, there shall be included within the meaning of subsection (a)(4) any pipeline distribution of gas by any person in connection

with the rental or lease of real property by that person to others, whether or not—

"(A) a separate charge is made for such gas;

"(B) the distribution to each rental or lease unit is separately metered; and

"(C) the person distributing such gas is otherwise treated as being engaged in local distribution of gas.

"(2) The Secretary shall, by regulation, provide that the provisions of paragraph (1) not apply in cases in which the public health and safety are adequately protected by reason of the existence and enforcement of appropriate building or housing codes or similar laws.".

COVERAGE OF CERTAIN NONPIPELINE FACILITIES

SEC. 106. (a) Section 2, as amended by this Act, is further amended by adding at the end thereof the following new subsection:

"(d)(1) If the Secretary finds that the purposes of this Act would be furthered, he may, by regulation, require that the provisions of this Act shall apply with respect to any specified type or class of facility or equipment used in the transportation on land of gas or liquefied petroleum gas, in interstate or foreign commerce, or storage in connection with such transportation, to the same extent and in the same manner as such provisions apply with respect to pipeline facilities.

"(2) This subsection (or any action hereunder) shall not be construed to relieve any person from having to meet standards or meeting other requirements under any other Federal law; except that, if any regulation under this subsection results in the imposition of a standard or other requirement relating to any matter that the Secretary finds is covered by any other standard or requirement pursuant to any provision of law under the jurisdiction of the Secretary, the Secretary shall so state in such regulation, and that standard or requirement shall supersede and preempt the standard or requirement pursuant to such other provision of law to the extent such matter is covered under the regulation under this subsection.

"(3) Nothing in this subsection shall be interpreted to provide the Secretary with authority over any specified type or class of facility or equipment used in the transportation on land of gas or liquified petroleum gas, in interstate or foreign commerce, or storage in connection with such transportation, unless the Secretary has authority over such facilities, equipment, or storage under any other provision of law.

"(4) Not later than 1 year after the date of the enactment of this subsection, the Secretary shall conduct a study, and submit a report thereon to the Congress, on the effects which would result from including within the coverage of this Act various types and classes of facilities and equipment used in the transportation on land of gas or liquified petroleum gas in interstate or foreign commerce, or storage in connection with such transportation.".

(b) Section 5(a) is amended by inserting "section 2(c)," after "Except for".

PIPELINE SAFETY INSPECTORS

SEC. 107. (a)(1) Section 3(b) is amended by inserting after paragraph (4) the following new sentence: "Standards under this subsection which relate to inspection and other enforcement shall set forth minimum training and educational requirements for pipeline inspectors.".

(2) Section 5(c) is amended by adding at the end thereof the following new paragraph:

"(5) The Secretary may not make any payment under this subsection to a State agency for any calendar year beginning after December 31, 1981, unless such State agency has demonstrated that from the payments to such agency for such year funds will be applied for the training and education of pipeline safety inspectors of each State agency in order to enable them to better perform their responsibilities. The amounts to be applied for such purposes are to be adequate to assure that the pipeline safety inspectors maintained by such State agency comply with any standards established under section 3(a) for training and education of pipeline inspectors.".

(b) Section 5(f) is amended to read as follows:

"(f)(1) The Secretary shall determine, after reasonable notice and opportunity for hearing, the minimum number of pipeline safety inspectors which must be maintained by a State agency in order to assure adequate monitoring of compliance with applicable safety standards within such State.

"(2) No State agency shall be considered to meet the requirements for certification under subsection (a), nor may the Secretary enter into any agreement under subsection (b) or allow a State to act as his agent with respect to interstate transmission facilities, unless the State agency involved has demonstrated that such agency has and will continue to maintain no less than the minimum number of pipeline inspectors determined by the Secretary under paragraph (1) to be required for such State.".

TECHNICAL PIPELINE STANDARDS COMMITTEE

SEC. 108. Section 4(b) is amended—

(1) by striking out the first sentence and inserting in lieu thereof the following: "The Secretary shall submit to the Committee any proposed standard under this Act, or any proposed amendment to a standard under this Act, for their consideration. Within 90 days after receipt of any proposed standard or amendment, the Committee shall prepare a report on the technical feasibility, reasonableness, and practicability of such standard or amendment. The Secretary may prescribe a final standard or final amendment to a standard at any time after the 90th day after its submission to the Committee, whether or not the Committee has prepared a report on such standard or amendment.";

(2) by inserting after "published by the Secretary and" the following ", if timely made,"; and

(3) by inserting before the last sentence thereof the following new sentence: "The Committee shall meet with the Secretary (or his designee) not less frequently than once every 6 months.".

APPROPRIATIONS AUTHORIZATION

SEC. 109. Section 15 is amended to read as follows:

"APPROPRIATIONS AUTHORIZED

"SEC. 15. (a) There are authorized to be appropriated $6,000,000 for the fiscal year ending September 30, 1979, for the purpose of carrying out the provisions of this Act, other than provisions for which funds are authorized to be appropriated under subsection (b).

"(b)(1) For the purpose of carrying out the provisions of section 5(c) and (f) of this Act, there are authorized to be appropriated, $4,500,000 for the fiscal year ending September 30, 1979.

"(2) For the purpose of carrying out the electronic data-processing program under section 15(d)(7) for identifying hazardous equipment, materials, and techniques, there are authorized to be appropriated $1,000,000 for the fiscal year ending September 30, 1979.".

## TITLE II—SITING AND SAFETY OF LNG FACILITIES

DEFINITIONS

SEC. 201. Section 2(a), as redesignated, is amended by striking out "and" at the end of paragraph (10) (as redesignated), by striking out the period at the end of paragraph (11) (as redesignated) and inserting a semicolon in lieu thereof, and by adding at the end thereof the following new items:

"(12) 'LNG' means natural gas in a liquid, semisolid, or solid state;

"(13) 'LNG facility' means any storage tank, pipeline, or other structure or equipment used for the transportation, storage, or use of LNG, or for LNG conversion, in interstate or foreign commerce, but does not include any structure or equipment (or portion thereof) located in navigable waters (as defined in section 3(8) of the Federal Power Act (16 U.S.C. 796(8)));

"(14) 'LNG conversion' means conversion of natural gas into LNG (liquefaction or solidification) or the conversion of LNG into natural gas (vaporization);

"(15) 'Construction' means construction, reconstruction, or erection, and includes, with respect to any LNG facility, any act which the Secretary determines would result in the creation or substantial increase of capacity of such facility for transporting or storing LNG or for LNG conversion;

"(16) 'Existing LNG facility' means any LNG facility for which an application for the approval of the siting, construction, or operation of such facility was filed before March 1, 1978, with—

"(A) the Department of Energy or any predecessor organization of the Department, or

"(B) the appropriate State agency, in the case of any facility not subject to the jurisdiction of the Department of Energy under the Natural Gas Act,

except that such term does not include any facility the construction of which commences on or after the date of the enactment of this paragraph and such construction is not pursuant to such an approval;

"(17) 'New LNG facility' means any LNG facility other than an existing LNG facility;

"(18) 'LNG accident' means any release, burning, or explosion of LNG resulting from—

"(A) a rupture or other failure of a storage tank, pipeline, or other LNG facility;

"(B) natural hazards (including earthquakes, hurricanes, and high winds);

"(C) sabotage; or

"(D) any other cause; and

"(19) 'Interstate or foreign commerce' means any trade, traffic, transportation, exchange, or other commerce—

"(A) between any State and any place outside of such State, or

"(B) which affects any trade, transportation, exchange, or other commerce described in subparagraph (A).".

SITING AND SAFETY STANDARDS

SEC. 202. (a) The Act is amended by redesignating sections 6 through 17 as sections 8 through 19, respectively, and by inserting after section 5 the following new section:

"STANDARDS FOR LNG FACILITIES

"SEC. 6. (a)(1) After the date standards first take effect under this section, no new LNG facility may be constructed, unless the Secretary approves such construction, and then only to the extent that such construction is in accordance with the applicable standards prescribed under subsection (b) and such other terms and conditions as the Secretary determines are appropriate to assure that the facility will be constructed and operated in compliance with standards under subsection (b).

"(2) The Secretary shall not approve construction of any LNG facility under this subsection unless the person seeking such approval submits a contingency plan which sets forth those steps which are to be taken in the event of an LNG accident or supply interruption and which the Secretary determines to be adequate.

"(3) The standards under this subsection shall not apply in the case of siting or construction with respect to which an applica-

tion for approval was filed before March 1, 1978, with—

"(A) the Department of Energy or any predecessor organization of the Department; or

"(B) the appropriate State agency, in the case of any facility not subject to the jurisdiction of the Department under the Natural Gas Act.

"(b) Not later than 180 days after the date of the enactment of this section, the Secretary shall establish—

"(1) minimum standards for determining the location of any new LNG facility which is to be stationary,

"(2) minimum standards for the construction of any new LNG facility, and

"(3) minimum standards for the operation of any new LNG facility.

Any standard under this section shall be in addition to, and not in lieu of, standards under section 3 which are not inconsistent with such standard.

"(c) Not later than 270 days after the date of the enactment of this title, the Secretary shall establish minimum standards to be maintained with respect to the operation of any existing LNG facility.

"(d) In prescribing standards under subsections (b) and (c), the Secretary shall take into consideration—

"(1) with respect to standards relating to the location of any stationary new LNG facility—

"(A) the nature of the use of the facility;

"(B) criteria to be used in determining the number and characteristics of other sites to be considered as alternative locations for such LNG facility;

"(C) the existing and projected population and demographic characteristics associated with each location considered;

"(D) the existing and proposed land uses near each such location;

"(E) the meteorological, geological, topographical, and other natural physical aspects of each such locations;

"(F) the medical, law enforcement, and fire prevention capabilities existing near each such location to cope with risks created by such a facility;

"(G) the costs of constructing and operating such LNG facility at each such location, including the costs to the United States and to State and local governments which are associated with such construction and operation; and

"(H) the need to encourage remote siting;

"(2) with respect to standards applicable to the construction of any new LNG facility—

"(A) the thermal resistance and other characteristics of materials to be used in the construction of such facility as compared to alternative materials;

"(B) design factors (such as multiple diking, insulated concrete, and vapor containment barriers);

"(C) the characteristics of the LNG to be stored or converted at, or transported by, such facility (for example, whether it is to be in a liquid, semisolid, or solid state); and

"(D) the public safety factors of the design as compared to alternative designs (particularly the ability under such a design to prevent and contain an LNG spill); and

"(3) with respect to standards for the operation of any LNG facility—

"(A) the conditions, features, and type of equipment and structures which comprise, or which are used in connection with, such facility;

"(B) the fire prevention and containment equipment at such facility;

"(C) the security measures to be used with respect to the operation of such facility for the prevention of sabotage or other intentional acts which could cause an LNG accident;

"(D) maintenance procedures and equipment;

"(E) the training of personnel with respect to the equipment, structures, measures, and procedures described in subparagraphs (A), (B), (C), and (D); and

"(F) other factors and conditions relating to the safe handling of LNG.

"(e) At any time after the effective date of standards initially prescribed under subsections (b) and (c), the Secretary shall, on his own motion or on the motion of any person, amend such standards to the extent he considers necessary to reflect changes in technology or to otherwise carry out the purposes of this section.

"(f) Any standards prescribed under this section, and amendments thereto, shall become effective 30 days after the date of issuance of such standards unless the Secretary, for good cause recited, determines an earlier or later effective date is required as a result of the period reasonably necessary for compliance and such date is specified in the order establishing or amending such standard.

"(g) The provisions of subchapter II of chapter 5 of title 5, United States Code, shall apply to all orders establishing, amending, or revoking, any standard established under this section. The Secretary shall afford interested persons an opportunity to participate fully in the establishment of such safety standards through submission of written data, views, or arguments with opportunity to present oral testimony and argument.

"(h) Any State agency may adopt additional or more stringent standards for intrastate LNG facilities if such standards are compatible with the Federal minimum standards. No State agency may adopt or continue in force any such standards applicable to interstate LNG facilities after the Federal minimum standards become effective.".

(b)(1) Section 2(a)(4), as redesignated, is amended by striking out "or affecting".

(2) Section 2(a)(10), as redesignated, is amended by inserting ", LNG facilities," after "pipeline facilities" the first place it appears therein.

(3) Section 3(d), as redesignated, is amended—

(A) by inserting "or LNG facilities" after "pipeline facilities"; and

(B) by inserting after "in the same manner" the following: "and to the same extent".

(4) Section 4(b) (relating to Pipeline Transportation Safety Committee) is amended by inserting ", LNG facilities," after "pipeline facilities".

(5) Section 9 (relating to cooperation), as redesignated, is amended—

(A) by inserting "or LNG facility" after "affected pipeline facility" and after "gas pipeline"; and

(B) by inserting "or LNG facilities" after "pipeline facilities".

(6) Section 10 (relating to compliance), as redesignated, is amended by inserting "LNG facilities" after "pipeline facilities".

(7) Section 13 (relating to injunction and jurisdiction), as redesignated, is amended by inserting after "pipeline facility" the following: "or LNG facility".

(8) Section 14 (relating to inspection and maintenance plans), as redesignated, is amended—

(A) by inserting after "facilities" the following: "or LNG facilities" each place it appears;

(B) by striking out "pipeline safety" each place it appears and inserting in lieu thereof "pipeline and LNG facility safety"; and

(C) by inserting in paragraph (2) after "pipeline transportation" the following: "or LNG facility".

(9) Section 15 (relating to records, etc.), as redesignated, is amended by inserting after "pipeline facilities" each place it appears the following: "and LNG facilities".

(10) Section 17(a)(2) (relating to annual report), as redesignated, is amended by inserting after "pipeline" the following: "or LNG facilities".

(11) Section 17(a)(4) (relating to annual report), as redesignated, is amended by striking out "and pipeline facilities" and inserting in lieu thereof ", pipeline facilities, and LNG facilities,"

FINANCIAL RESPONSIBILITY

SEC. 203. The Act, as amended by section 202 of this Act, is further amended by inserting after the new section 6 the following new section:

"FINANCIAL RESPONSIBILITY FOR CERTAIN LNG ACTIVITIES

"SEC. 7. (a) Not later than 9 months after the date of the enactment of this section, the Secretary shall—

"(1) conduct a study of the risks associated with the production, transmission, and storage of LNG and the methods of assuring adequate financial responsibility for those engaged in such activities; and

"(2) prepare and transmit to each House of the Congress a report on the results of such study, together with the recommendations of the Secretary for such legislative or administrative action as he considers appropriate.

"(b)(1) Whenever the Secretary has reason to believe that any operator of an LNG facility is not maintaining adequate insurance or otherwise does not have adequate financial responsibility with respect to such facilities, he shall issue and serve upon such operator notice thereof, together with a statement of the amount of the financial responsibility that the Secretary would consider adequate.

"(2) Any person issued notice under paragraph (1) shall have a right to hearing on the record in accordance with section 554 of title 5, United States Code, to be held not later than 30 days after notice under paragraph (1), at which such person has the right to show cause as to why an order should not be issued by the Secretary requiring such person to demonstrate and maintain financial responsibility at or above the amount indicated in the notice under paragraph (1).

"(3) After an opportunity for hearing under paragraph (2), the Secretary may, if he determines it is justified in the public interest, order the person issued notice of such hearing to demonstrate and maintain financial responsibility at or above an amount determined appropriate by the Secretary, taking into account any information, data, and views presented in such hearing.

"(4)(A) Any person aggrieved by an order issued under paragraph (3) may seek judicial review of such order only by filing a petition for review in the appropriate court of appeals of the United States within 60 days after such order is issued.

"(B) Upon receipt of notice of the filing of such petition, the Secretary shall file in the court the record in the proceeding, as provided in section 2112 of title 28, United States Code. Upon such filing, the court may affirm, modify, remand, or set aside the order of the Secretary, and may enforce the order to the extent that such order is affirmed and issue such writs as are ancillary to its jurisdiction or are necessary in its judgment to prevent injury to the public pendente lite. The findings of the Secretary as to the facts, if supported by substantial evidence, shall be conclusive.

"(C) The judgment and decree of the court shall be final, except that such judgment and decree shall be subject to review by the Supreme Court upon certiorari, as provided in section 1254 of title 28, United States Code.

"(c) For purposes of subsection (b) of this section, financial responsibility may be maintained by any one of, or a combination of, the following methods acceptable to the Secretary:

"(1) evidence of insurance,

"(2) surety bonds,

"(3) qualification as a self-insurer, or

"(4) other evidence of financial responsibility.".

ENFORCEMENT OF STANDARDS AND FINANCIAL RESPONSIBILITY REQUIREMENTS

SEC. 204. (a) Section 11(a) (relating to civil penalty), as redesignated by section 202 of this Act, is amended by inserting "(1)" before "Any person" and by adding at the end thereof the following new paragraph:

"(2) Any person who violates the provisions of section 6 or any order under section 7(b) shall be subject to a civil penalty of not to exceed $50,000, which penalty shall be in addition to any other penalties to which such person may be subject under this subsection.".

(b) The Act is further amended by redesignating sections 12 through 19 (as redesignated) as sections 13 through 20, respectively, and by inserting after section 11 the following new section:

"CRIMINAL PENALTY

"SEC. 12. Any person who willfully and knowingly violates the provisions of section 6 or any order issued under section 7(b) shall, on conviction thereof, be punished by a fine of not more than $50,000, or by imprisonment for not more than five years, or both.".

APPROPRIATIONS AUTHORIZATIONS

SEC. 205. Section 18(b) (relating to appropriations authorization), as redesignated, is amended by adding at the end thereof the following new paragraph:

"(3) There are authorized to be appropriated to carry out section 6 and 7 of this Act for the fiscal year ending September 30, 1979, not to exceed $2,000,000.".

TITLE III—MISCELLANEOUS PROVISIONS

WILLFUL DESTRUCTION OF INTERSTATE PIPELINE TRANSMISSION OR LNG FACILITIES

SEC. 301. Section 12 (as added by section 204 of this Act) is amended by inserting "(a)" after "SEC. 12." and by adding at the end thereof the following new subsection:

"(b) Any person who willfully injures or destroys, or attempts to injure or destroy—

"(1) any pipeline facility for the interstate transmission of gas, liquefied petroleum gas, or petroleum, including any facility or equipment covered under this Act under section 2 (b) or (d) used in the interstate transmission of gas or liquefied petroleum gas, or

"(2) any liquefied gas facility to which section 6 applies,

shall be fined not more than $15,000 or imprisoned not more than fifteen years, or both.".

CITIZENS' CIVIL ACTION

SEC. 302. Section 20 (relating to citizen civil suits), as redesignated, is amended by striking out subsections (a) and (b) and inserting in lieu thereof the following:

"SEC. 20. (a)(1) Except as provided in subsection (b), any aggrieved person may commence a civil action for equitable relief as a citizen whenever such action constitutes a case or controversy—

"(A) against any person (including (i) the United States, and (ii) any other governmental instrumentality or agency to the extent permitted by the 11th amendment to the Constitution) alleged to be in violation of any provision of this Act, any order or regulation issued under this Act, or any condition of approval pursuant to section 6 of this Act; or

"(B) against the Secretary where there is alleged a failure of the Secretary to perform any act or duty under this Act, which is not discretionary with the Secretary.

"(2) Any action brought against the Secretary under paragraph (1)(B) shall be brought in the district court for the District of Columbia or for the judicial district in which the facility involved is located or proposed to be located.

"(3) In suits brought under this section, the district court shall have jurisdiction, without regard to the amount in controversy or the citizenship of the parties, to enforce any provision of this Act or any condition of approval pursuant to section 6 of this Act or to order the Secretary to perform such act or duty, as the case may be.

"(b) No civil action may be commenced under this section—

"(1) under subsection (a)(1)(A)—

"(A) prior to 60 days after the plaintiff has given notice of the violation (i) to the Secretary (or to the applicable State agency in the case of a State which has been certified under section 5(a) and in which the violation is alleged to have occurred) and (ii) to any alleged violator; or

"(B) if the Secretary (or such State agency) has commenced and is diligently pursuing administrative proceedings or the Attorney General (or the chief law enforcement officer of such State) has commenced and is diligently prosecuting a civil or criminal action with respect to such matters in a court of the United States but in any such action any person may intervene as a matter of right; or

"(2) under subsection (a)(2) prior to 60 days after the plaintiff has given notice of such action to the Secretary (or such State agency).

Notice under this subsection shall be given in such a manner as the Secretary shall prescribe by regulation.".

APPOINTMENTS OF DIRECTOR OF PIPELINE SAFETY OPERATIONS AND DIRECTOR OF MATERIALS TRANSPORTATION BUREAU

SEC. 303. (a) Notwithstanding any other provision of law—

(1) no individual may serve for more than 180 days (in the aggregate) in an acting capacity in a position the principal duties of which were identified as of March 1, 1978, as assigned to the Director of the Office of Pipeline Safety Operations, Department of Transportation, or may serve as the Acting Director of the Materials Transportation Bureau, Department of Transportation, and

(2) if a person is not appointed to such position within 180 days after a vacancy occurs in that position, the Secretary shall personally carry out the functions of such position until an appointment is made to that position and all delegations of authority under the Fuels Transportation Safety Act shall be suspended until such appointment is made.

(b) In the case of any vacancy in such positions on the date of the enactment of this Act, periods of service before the date of enactment shall not be taken into account for purposes of subsection (a).

TECHNICAL, CLERICAL, AND CONFORMING AMENDMENTS

SEC. 304. (a) Section 3, as amended by this Act, is further amended by striking out subsection (a) and by redesignating subsections (b) through (f) as subsections (a) through (e), respectively.

(b) Section 3(b), as redesignated by subsection (a), is amended by inserting after "period reasonably necessary for compliance" the following: "and such date is specified in the order establishing or amending such standard".

(c) Clause (ii) of section 5(a) is amended by inserting after "property damage exceeding $1,000" the following: "(whether or not sustained by a person subject to the safety jurisdiction of the State)".

(d) Section 5(a) is amended by striking out "; except that a State agency may file a certification under this subsection without regard to the requirement of injunctive and monetary sanctions under State law for a period not to exceed five years after the date of enactment of this Act".

(e) Section 11(a)(1) (relating to civil penalties), as redesignated, is amended by striking out ": *Provided*, That for a reasonable period of time, not to exceed one year after the date of the enactment of this Act, such civil penalties shall not be applicable to pipeline facilities existing on such date of enactment."

(f) Section 17(a)(3) (relating to annual reports), as redesignated by sections 202 and 204 of this Act, is amended by striking out "section 3(e)" and inserting in lieu thereof "section 3(d)".

(g) The following provisions are each amended by striking out "Federal Power Commission" and inserting in lieu thereof "Federal Energy Regulatory Commission":

(1) section 2(a) (9) and (10) as redesignated;

(2) section 9 (relating to cooperation), as redesignated, including the section heading; and

(3) section 16(b) (relating to administration), as redesignated.

(h) Paragraphs (9) and (10) of section 2(a), as redesignated, are each amended by inserting "or the Interstate Commerce Act" after "the Natural Gas Act".

(i)(1) Section 5(a) is amended by striking out "section 12(b)", "section 12", "section 11", "sections 9 and 10" and inserting in lieu thereof "section 15 (b) and (e)", "section 15 (a), (b), (c), and (f)", "section 14", and "sections 11 (other than subsection (a)(2) thereof) and 13", respectively.

(2) Section 5(a) is further amended by inserting "section 20," before "and except as otherwise provided in this section".

(3) Section 5(b)(2) is amended by striking out "section 11" and inserting in lieu thereof "section 14".

(4) Section 5(c)(2) is amended by striking out "section 15(b)" and inserting in lieu thereof "section 18(b)(1)".

(5) Section 10 (relating to compliance), as redesignated, is amended by striking out "section 11" and "section 12" and inserting in lieu thereof "section 14" and "section 15", respectively.

(6) Section 13 (relating to injunction and jurisdiction), as redesignated, is amended by striking out "section 9" each place it appears and inserting in lieu thereof "section 11 or 12".

(7) Section 11(a)(1) (relating to civil penalty), as redesignated, is amended by striking out "section (8)(a)" and inserting "section 10" in lieu thereof.

(j) Section 17(a) (relating to annual report), as redesignated, is amended by striking out "March 17" and inserting in lieu thereof "June 1"

(k) Any reference in any other provision of law, rule, regulation, or order to the Natural Gas Pipeline Safety Act of 1968 shall be considered to refer to the Fuels Transportation Safety Act.

Amend the title so as to read: "A bill to amend the Natural Gas Pipeline Safety Act of 1968 to provide for the safe operation of pipelines transporting natural gas and liquefied petroleum gas, to provide standards with respect to the siting, construction, and operation of liquefied natural gas facilities, and for other purposes.".

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill to amend the Natural Gas Pipeline Safety Act of 1968 to provide for the safe operation of pipelines transporting natural gas and liquefied petroleum gas, to provide standards with respect to the siting, construction, and operation

of liquefied natural gas facilities, and for other purposes.".

A motion to reconsider was laid on the table.

A similar House bill (H.R. 11622) was laid on the table.

## CORRECTION OF SECTION NUMBERS, PUNCTUATION, AND CROSS-REFERENCES IN ENGROSSMENT OF H.R. 11622

Mr. DINGELL. Mr. Speaker, I ask unanimous consent that in the engrossment of the bill H.R. 11622, the Clerk be authorized to correct section numbers, punctuation, and cross-references to reflect the action of the House just taken in amending the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

## NATURAL GAS POLICY ACT

(Mr. ANDERSON of Illinois asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ANDERSON of Illinois. Mr. Speaker, I have received a copy of a letter under date of September 8, 1978, addressed to the distinguished chairman of the Energy Committee, the gentleman from Ohio (Mr. ASHLEY), from the chairman of the Federal Energy Regulatory Commission, Mr. Charles B. Curtis. In the letter Mr. Curtis says that "the task of administration and enforcement of the statutory scheme" for regulation under the so-called natural gas bill "will be most difficult."

Continuing to quote from his letter, he says, "The legislation will necessitate an augmentation of Commission personnel and financial resources" at a time when regulatory reform is one of the crying needs of this Congress.

This administration is pushing a piece of legislation in the other body and, ultimately, perhaps, before this body, as well, which admittedly is going to require more regulation, more regulatory personnel, at the very time when they are claiming that it would bring about deregulation. What a strange inconsistency is involved in this particular act.

Mr. Speaker, the text of the letter of Mr. Curtis is as follows:

FEDERAL ENERGY REGULATORY COMMISSION,
*Washington, D.C., September 8, 1978.*

Hon. THOMAS L. ASHLEY,
*Chairman, Ad Hoc Committee on Energy, U.S. House of Representatives, Washington, D.C.*

DEAR MR. CHAIRMAN: In the last few weeks, a number of members have questioned whether the proposed Natural Gas Policy Act (NGPA) can be effectively administered and enforced by the Federal Energy Regulatory Commission. These concerns, in large measure, arise from an August 14, 1978 memorandum from the Director of the Commission's Office of Enforcement which concluded that the July 31 draft of the conference report would be impossible to enforce or administer in a conscientious and equitable manner.

The Congress, indeed each agency of government, has the responsibility to assure that the laws of the United States are workable and capable of effective administration. As you may know, I have received requests from several of your colleagues to state my views on this matter and to prepare an analysis of the final conference report (S. Rep. No. 95-1126). That task has been recently completed and I am pleased to provide you with a copy of the analysis. You may also be interested in reviewing a copy of a memorandum prepared by the Director of the Commission's Office of Enforcement concerning this subject, which is also enclosed.

The enclosed analysis is not intended, nor should it be viewed, as a comment on the policy considerations which are involved in the proposed resolution of the natural gas pricing controversy. Instead the attempt has been made to focus solely on administrative and enforcement considerations.

As the section-by-section analysis indicates, a detailed review of this character tends to focus on the problems encountered in statutory interpretation. For the most part, however, it should be acknowledged that the legislative draftsmen have done a truly outstanding job in giving statutory expression to the conference agreement.

From an administrative and enforcement standpoint, the final conference report is substantially improved when compared to the July 31 draft. Under the NGPA, the Commission is to be vested with an array of administrative and enforcement devices traditionally given to regulatory agenices. Principal among these are the enforcement mechanisms which will allow the Commission to compel compliance with the Act through injunctive actions in the courts and to impose civil and criminal penalties for violations of the requirements of the Act or regulations of the Commission. In a number of respects, these mechanisms are more substantial than those available to the Commission at present under the Natural Gas Act. Moreover, the Commission has been given certain administrative powers, which exceed those currently available to the Commission under existing laws. Most importantly, the authority to gather information and to conduct necessary on-site inspections is more flexible and significantly broader in scope. I would also call your attention to the opportunity to delegate certain functions to a State agency, with its concurrence, under Section 501(c); and provisions of Section 506(b) which limits a reviewing court's ability to stay or otherwise postpone the effectiveness of Commission rules and orders pending conclusion of the review proceedings.

As you will note, the conference report is set out in elaborate detail. If one accepts the policy conclusions of the conferees as given, the question still remains whether the Act can be effectively administered and enforced. It is my basic conclusion that it can be. I could not have made the same judgment with respect to the July 31 draft.

I must responsibly point out, however, that the task of administration and enforcement of the statutory scheme will be most difficult. The legislation will necessitate an augmentation of Commision personnel and financial resources, a sustained and dedicated effort by members of the Commission and its staff and a high degree of cooperation of the various State and Federal agencies who are assigned responsibilities under it.

The NGPA will undoubtedly engender a significant number of court actions before the full expression of the statutory requirements are defined and understood. One must recall that this is a highly litigius subject and many millions of dollars and substantial volumes of one of this Nation's most precious resources are at stake. Extensive court litigation is most likely to attend any legislative effort to resolve the natural gas pricing controversy, however detailed or carefully written it may be. For example, the Natural Gas Act has been a part of the laws of the United States for 40 years, yet it still accounts for a large part of the work of the Supreme Court and the United States Court of Appeals. You may be interested to know that as of September 1, 1978 the Commission is currently involved as a litigant in four cases before the Supreme Court involving Natural Gas Act issues; 84 cases in the Courts of Appeals; and nine cases before the District Courts.

As the section-by-section analysis indicates, the legislation is not problem free. But on balance, assuming that the Congress will appropriate adequate resources to the Commission and that I am correct in my interpretation of the breadth and flexibility of the administrative mechanisms which have been woven into the proposed legislation, it is my view that the Commission will be able to effectively administer the NPGA and give effect to the policy conclusions which it embodies.

Sincerely,

CHARLES B. CURTIS,
*Chairman.*

## LOOK WHO ANDY YOUNG SUPPORTS

(Mr. ASHBROOK asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ASHBROOK. Mr. Speaker, under the leadership of Andrew Young, this country has gone beyond condoning terrorism. We are now rewarding it. The Carter administration will not accept the present Rhodesian Constitution, despite the fact that it provides for a transition to majority rule. The reason we will not accept it is because it leaves out the Communist terrorists. I have inserted Jeffrey Hart's national column for July 24, 1978, which describes one of the hundreds of murderous attacks which, according to Young and Carter, give these Communists the right to power in Rhodesia. When reading it, it is important to remember that Marxist terrorism did not begin in Rhodesia, and it will not end there.

The Cuban and Soviet regimes, which are training and equipping these so-called guerrillas to attack defenseless people, do not actually believe the U.S. Government to be any more legitimate than that of Rhodesia. The Cuban troops whom Mr. Young sees as "a stabilizing influence" in Africa will, once Rhodesia is out of the way, be available for training and arming terrorists in the United States and Western Europe.

These are not "Rhodesian revolutionaries" that Mr. Young and Mr. Carter are insisting on imposing on the people of Rhodesia. These are world revolutionaries, with ambitions for antigovernment terror worldwide. Commenting on our support of them, Mr. Hart says "Never has U.S. policy been so morally and politically bankrupt." I could not agree more.

The article follows:

LOOK WHO ANDY YOUNG SUPPORTS

(By Jeffrey Hart)

Guerrilla murderers under the leadership of the Marxist Robert Mugabe entered Rhodesia and perpetrated one of the most brutal

atrocities ever recorded. These guerrillas—so goes U.S. policy—must be brought into a Rhodesian government, even though they have scant support inside the country, and even though the government emerging under the "internal settlement" is probably the freest regime on the entire African continent.

We have been instructed several times by our man at the U.N., Ambassador Andrew Young, that these guerrilla groups are just fine. To coin a phrase, by their fruits you shall know them. Take a moment to meditate on these details, taken from the front page account of this massacre of the innocent. To coin another phrase, it shall live in infamy. The report comes from Vumba "Rhodesia" a few miles from the Mozambique border. Mozambique provides sanctuary for Mugabe and his murderers, who, of course, are backed by the Soviets and their Cuban chums.

"Twelve people, including teachers at a mission school here and their young children, were killed last night in a terrorist attack.

"The 12, all whites, were battered and bayonetted to death. . . .

"By late morning, as reporters arrived here from Salisbury, Rhodesia's capital, aboard flights arranged by the Rhodesian Air Force, the victims still lay on the ground, evidently in the same positions where they had been slain the night before. They were in three groups, about 150 yards apart in a glen near an acacia grove. The victims were three men, their wives, another woman and five children.

"One of the dead men had his hands tied behind his back with clothesline. A woman, dressed in a bathrobe with her hair in curlers, had an axe embedded in her neck. Four children—a boy 4 years of age, two sisters aged 4 and 8, and another girl of 5—lay huddled close together. All were dressed in pajamas, and like the other victims they had all been struck on the head with clubs. Some also had stab wounds. One of the girls had the imprint of a boot on the side of her face.

"Nearby lay the body of a woman, her arm encircling her dead 3-week-old daughter. Near them was a heavy wooden limb with blood on it. The woman's engagement ring was turned with the jewel to her palm, perhaps in an attempt to keep it from being taken by men she thought were looters."

According to first reports, the women apparently had been sexually assaulted.

Okay, Young, these are the people who are trying to shoot their way into power in Rhodesia. They have had your support and the political support of Carter administration foreign policy. They are armed and supplied by our delightful partners in detente, the masters of the Gulag archipelago. They lack the guts to attack tough Rhodesian farmers. They prefer to rape and murder women and children at a defenseless mission school.

Never has U.S. policy been so morally and politically bankrupt.

## MAKING DECISIONS ON HEALTH POLICY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. GOLDWATER) is recognized for 5 minutes.

● Mr. GOLDWATER. Mr. Speaker, over the past several weeks one matter which has occupied a great amount of my time is the planning and delivery of health services in Los Angeles County, where I reside. The health systems agency which was set up to serve the area which I represent here in Congress has been the focus of considerable attention because of its failure to comply with organizational guidelines established by HEW.

Several weeks ago I held a meeting in my Woodland Hills, Calif., office to discuss the complacency of officials in the county HSA. A GAO audit had pointed up many irregularities in the management of the agency, and many professionals from the medical community in my district had contacted me with complaints about HSA activities.

Over the past weekend, while visting constituents, I learned that the regional office of HEW had terminated the existence of the Los Angeles County Health Systems Agency, because of its inability to initiate the federally mandated reforms necessary to carry out its successful operation.

On the one hand, I am disappointed that the agency did not meet the standards called for. There was potential to address the regional concerns for health care in an effective way. On the other hand, I am satisfied that tax dollars will not be spent with such a lack of qualified management.

Still, it is of the highest priority that proper decisions be reached on the implementation of a responsible health care plan for Los Angeles County. At a time when the Congress is considering several proposals for a nationwide health care policy, I think it would be wise for those of us in a position to act on these proposals, to present to the American public a health care policy which will reverse the trend in rising health care costs, and provide the highest possible quality of services.

Health care in our country is much improved than it was, say, 20 or 30 years ago. Technological advancements have been the major reason for this situation, but the increased cost to consumers of health care has placed a heavy financial burden on them. Although 90 percent of Americans are covered by some type of health insurance, there are still 22 million people without any insurance coverage for health, and an equal number with only minimal participation in a health insurance plan. Taking advantage of health services, for them, would wipe them out financially, and put them in debt for a long time.

It is for this sizable slice of the population that national health insurance programs have been advocated. From my evaluation of the problem, I have some most serious reservations about taking this approach on such a broad scale. All indications are that health care costs would only increase. Medicare, when originally conceived, was to cost us $1.5 billion in its first year. It ended up costing $3.5 billion. This year we will top the $19 billion mark. I will urge this House to proceed with extreme caution in considering proposals which have come to us from Senator KENNEDY, Congressman CORMAN, Secretary Califano, and President Carter. There is little doubt in my mind that Government involvement on such a grand level will only take a bigger bite out of our gross national product.

Already, the purchase of all consumer goods and services indirectly takes into account the cost of providing health insurance to the working class. An estimate by Ford and General Motors projects that $120 and $160 respectively, in every vehicle purchase, goes to pay for the health benefits of its company employees.

The outlook for continued growth in the health care industry is almost frightening. There are alternatives to the liberal democratic solution to the health care issue. Keeping tighter controls over costs is one way. Encouraging competitiveness is another. Taking measures to prevent health risks is another. No one of these alternatives is the perfect answer, but neither is the costly approach of a comprehensive national health insurance plan.

With the Health Systems Agency in Los Angeles County about to close its shop, I think it would be a good idea to take this opportunity to organize the health care community there, to entertain their views on how we can best meet the needs of our health services consumers. It is my intention to convene a meeting of these individuals, and anyone else who may be able to make a worthwhile contribution in this effort, to see if we can formulate an effective, cost efficient method of keeping health care costs down, and making these services accessible to the many residents of the Los Angeles County area.●

## ANOTHER TRAGEDY IN SOUTH AFRICA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. HOLLENBECK) is recognized for 5 minutes.

● Mr. HOLLENBECK. Mr. Speaker, it was 1 year ago today that South African civil rights activist Steve Biko died in his jail cell. There is no need for me to repeat to you and to my colleagues the mysterious circumstances that surround that death, or the hollow claims advanced by the Government of South Africa to disguise those circumstances.

Instead, I would like to point out to my colleagues that the death of Steve Biko is not an isolated event. Since then we have heard reports of other activists dying under similar mysterious circumstances. We have heard of others forced into house arrest or banning, and we have heard of newspapers being closed down for the "crime" of disagreeing with the government.

The Washington Post today carried an article outlining further cases of torture and abuse:

S. AFRICA PROSECUTES DETECTIVES IN DEATH, BEATING OF PRISONERS

BLOEMFONTEIN, SOUTH AFRICA.—Eight men, six of them police detectives, went on trial here yesterday in the death of one black prisoner and the alleged beating of five others last March.

Mistreatment of blacks held by South African authorities has drawn world attention since the death last year of black leader Steve

Biko, who was severely beaten while in detention. At least 26 blacks have died while in police custody in South Africa in the last two years.

Two white and four black detectives and two white civilians pleaded innocent to murder and assault charges here yesterday.

Prosecutor A. R. Erasmus said that those charged had suspended six naked black prisoners by chains from a ceiling and subjected them to beatings and electric shock treatment after arresting them on suspicion of burglary.

Eight days after the alleged beatings, one of the prisoners, Jankie Mahlomola Matobako, died in a hospital.

After the six had been arrested, Erasmus' statement said, "they were hanged naked by their wrists. As they hung, they were hit with a leather whip and hose pipe."

Erasmus said wires then were applied to their bodies for electric shocks.

A surgeon who examined Matobako in the hospital testified that "he was in a state of shock and pain. He had 18 long bruises on his back and eight on his chest.

"There was swelling on his arms, forearms and head, and bruises on his left shoulder and at the top of both legs. There was swelling and bruising of his whole face and one eye."

It is especially ironic that today, on the anniversary of Steve Biko's death, we are on the brink of another tragedy in this troubled land. The South African Government is preparing to destroy the squatters' town of Crossroads.

This crude and dirty collection of makeshift shelters, as dismal as it may seem to outsiders, is, nevertheless, the home of some 20,000 people. They have built this town because the South African Government's policies force men to leave their families in order to find employment. It is to avoid this separation that thousands of South Africans have moved to Crossroads. Here, in spite of the poverty, the hardships, and the squalor, they are affirming the basic need of people everywhere—the need to share in a family life. It is also a striking example of the ability of people to triumph over their environments. For in Crossroads, 73 percent of the men are formally employed, in addition to 25 percent of the women. Another 11 percent of the men and 20 percent of the women are employed informally. The residents have made plans for the introduction of sanitary facilities and other improvements to make their lives a bit less dismal.

In the face of this outpouring of human spirit and energy, the South African Government has decided to rid itself of Crossroads. They have arrested over 400 residents and continue attempts to force the residents out. The Government says there is nothing they can do about Crossroads—that the settlement is on land reserved for white settlers, and that the conditions in the town make it a danger to the public's health, safety, and welfare. Unfortunately, there may be nothing that can be done this time. But what about next time? Will the South African Government learn anything from this, or will they continue to bury their heads in the sand, ignoring the changing world until it is too late?

Mr. Speaker, I want to warn the South African Government that it is in danger. It is in danger not only from building tensions from within their country, but is in danger of losing what little respect it still has in the eyes of the world. No nation can survive alone. South Africa is no exception. Her people must realize that the patience of the world is not unlimited. We will not continue to countenance her repression, or to support it through commerce and foreign assistance unless she begins to make the changes that must be made. Avoiding another Crossroads would be a good place to start.

I urge my Republican colleagues to take heed of the situation and add their voices and support to those whose plight we discuss today.●

## THE NATURAL GAS COMPROMISE: A CLASSIC CASE OF ORWELLIAN DOUBLE-THINK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KEMP) is recognized for 15 minutes.

● Mr. KEMP. Mr. Speaker, in the English novelist, George Orwell's "1984" the Ministry of Truth devised three slogans under which all society functioned:

War is peace. Freedom is slavery. Ignorance is strength.

The process from which those slogans were devised was known as double-think. It was the art of saying one thing, meaning exactly the opposite, and getting the citizenry to believe it.

That is the context in which the so-called natural gas companies has been brought before the House and the Senate. Those who have devised it and support it would have the American people believe that:

Regulation is deregulation. Disincentive is incentive. Status quo is change. Intrastate is interstate. And much more.

The truth is, Mr. Speaker, that this so-called compromise: Will increase consumer prices without additional supplies. Is hopelessly complex and confusing, layering on massive additional regulation.

So unfairly penalizes industrial users in the Northeast and Midwest which are dependent on interstate supplies that a significant relocation of factories and jobs out of the regions could occur.

Does not provide for deregulation. May wipe out half the independent producers. Is anti-competitive, leading to further economic concentration in the industry. Is opposed by the AFL–CIO. Is opposed by most all of the consumer action groups.

In short, widens the energy wedge, that portion of total effort applied by energy producers which never reaches the consumers, being devoted instead to compliance with regulations and paying the cost of same. It is what the consumers do not get for what they do get.

Let me deal with these points.

INCREASE IN CONSUMER PRICES WITHOUT ADDITIONAL SUPPLIES

The only acceptable justification for higher prices to the consumers is that the retained earnings from higher prices will be applied to increasing production and supply. It is supply that the American people feel they need, especially to assure an uninterruption in jobs in areas heavily dependent on interstate supply during winter months, and they are willing to pay a higher price for such supply. The compromise gives them the worst of both worlds: Higher prices and no assurance of greater supply.

If our Nation s dependence on foreign energy is to be limited, the oil and gas industry will need to spend almost $230 billion between now and 1985 to drill a total of more than half a million new oil and gas wells. With capital outlays and drilling at those levels, more than 165 trillion cubic feet of additional natural gas could be produced.

But under the pricing provisions of the compromise, the capital available to the industry would amount to roughly $134 billion. That is 41-percent less than needed. The result of that would be 32-percent fewer wells drilled. That shortfall would mean 18 trillion cubic feet of natural gas lost to the American consumer. It also would mean having to continue reliance on insecure imports of high-priced oil and liquefied natural gas.

There is another facet to this area of higher consumer prices which must be brought out. The compromise provides for a mandatory incremental pricing scheme. That means that instead of spreading out the costs of higher priced gas among all the users, the increment, that is the price over the basic price, is paid by one type of user. Under the compromise, the industrial-commercial users will pay this higher price.

That means the residential users will pay less, right? Wrong. As the price of natural gas paid by these industrial-commercial users increases, they will be encouraged to convert from natural gas to another source. This compromise envisages a conversion to coal, a domestic resource. But that is not what is happening or will happen. The conversion will be to oil, another imported fuel.

This will have multiple effects.

First, as they leave the use of natural gas, fewer and fewer industrial-commercial users will remain using it. That means those remaining will pay higher and higher and higher prices, passing them along to consumers as higher prices for the goods they manufacture and the services they provide.

Second, as fewer industries and businesses remain with natural gas, the allocable charges for transmission costs for residential users will increase, then soar. Wellhead prices for natural gas are only about one-tenth the cost at the burner tip. The total cost is derived from wellhead cost, transmission cost—which is major, and so forth. Those total transmission cost are more or less fixed, so as the industrial-commercial users decline, the residential users are stuck with greater percentages of those transmission, pipeline-related costs.

Third, in that the shift is to oil, mostly imported, and not coal, we will continue with the foreign energy source dependence and balance of trade problems this bill was supposedly designed to help solve.

The only way to bring enough supply on line, with higher prices in the short range, but then driving back down those prices as supply reaches then surpasses an adequate level, is to deregulate.

Does the compromise do that? No.

NATURAL GAS WILL BE EVEN MORE REGULATED

Though widely publicized as a "deregulation" proposal, the compromise in fact would increase regulation. It would extend Federal regulation to the intrastate market—gas sold within the State where it is produced—for the first time. It would establish a complex web of controls on at least 17—and some think 23—different categories of gas that have been defined arbitrarily and on irrational criteria.

How would these new layers of regulation affect supply? Independent explorer-producers find nearly two-thirds of the natural gas reserves in the United States and drill over 85-percent of the producing gas wells. They account for 77 percent of the new gas fields found and 62 percent of the natural gas reserves discovered. These 10,000 independents are the dominant force in providing 42 million residential gas consumers and industrial users with adequate future supplies.

But this sector of the natural gas industry is in bad shape if this compromise passes.

These people do not have the resources to handle the vast legal complexities which will arise if the compromise becomes law. Many will leave the business, because they cannot afford to hire the lawyers, accountants, and lobbyists that the majors can. I have seen estimations that as many as 5,000—that is 50 percent—may leave this type of business and turn to other enterprises. Perhaps this is why Exxon, Mobil, Shell, Arco, and Chevron are for this compromise bill.

This is no way to assure additional supply. And it is certainly no way to assure greater competition in this industry.

The truth of the matter is that without a new bill, by 1985 some 45 percent of the gas would be regulated, whereas under the bill. 56 percent will be regulated. Since 60 percent of gas is regulated today, the bill really provides no deregulation.

Of the minimum of 17 different pricing categories that would be established, only 6 involving a very small volume of gas would ever be relieved of price controls, and those for only 6 months after 1985. Controls over virtually all gas are to remain in effect until at least January 1, 1985, and possibly until 1989. How? At any time between June 30, 1985, and July 1, 1987, either Congress or the President, subject to congressional veto, could reimpose controls for 18 months, thus potentially extending controls until January 1, 1989.

HOPELESSLY COMPLEX AND CONFUSING

The compromise puts forth a regulatory maze that is unprecedented in its complexity. It would impose on the Federal Energy Regulatory Commission—FERC, the State regulatory commissions, and the producers the responsibility of determining whether production from existing and future wells falls into production categories that are based on geographic distances, geologic depths, commencement dates of drilling, underground reservoir determinations, arbitrary selling prices, and contract provisions, costs, marginality of production, contract expiration provisions, leaving provisions, and so forth.

The compromise would, in fact, establish between 17 and 23 different tiers of gas prices. The number depends on how different people read the legislation. FERC would have to approve the price at each well.

Think about that. There are now 165,000 marker wells, with 11,000 added annually. If that does not panic you, consider this: FERC now has 20,000 cases backlogged in disputes over prices under the present regulatory scheme.

Will the proposed regulatory scheme resolve this matter? Make it easier? Not at all. In order to get the compromise, one insider has said, the bill's drafters had to purposefully be contradictory from one section to another, appealing thereby to all groups, but leaving it to the bureaucrats and to the courts to sort things out after it becomes law. Thus, we will see an even greater backlog, even more lawsuits, and that means more delay in bringing gas onto line.

Even FERC realizes how bad this compromise bill may be. I quote from an August 14, 1978, memo from Sheila Hollis, director of the Office of Enforcement:

> The office has concluded that the proposal is so complex, ambiguous and contradictory that it would be virtually impossible for this commission to enforce it in a conscientious and equitable manner.

This bill will be a bureaucratic nightmare, causing untold delay at a time when that is the last thing we want to happen in developing adequate energy supplies for our industries, offices, schools, and homes.

WHAT OUGHT TO BE DONE?

Mr. Speaker, if the content of the compromise is disturbing, take a look at how that content came about.

Here, we have a classic example of big business getting in bed with big government, the effect of which is to push the little guys out of the industry and frustrate the wishes of the people. The majors in the natural gas industry, acting separately and through their trade association, are giving aid and comfort to a broadening of the energy wedge to which I referred, supporting the most onerous and burensome set of regulations ever written for an industry by government.

And that aid and comfort is being justified, rationalized, by the most distorted—and clearly in error—reasoning I have seen in my service in this House. With the lure of a little more money for the gas they already have in reserves, plus the promise of distant deregulation a decade from now, the majors have decided that they can put up with the old and new regs by adding more lawyers, accountants, and lobbyists. The majors make a small adjustment here or there, ignoring or caring little that the independents are capsized by their wake. It smacks of mercantilism or worse, for the big companies will benefit at the expense of the little ones. Instead of working together to help everyone—and to meet the Nation's needs—they have chosen a policy that will be ultimately destructive to everyone.

The argument is heard that this is the best the industry and the majors' trade association can hope to get from this administration and this Congress. But there will be another Congress next year and another administration in 1981. If the so-called compromise passes this year, those of us who truly believe in deregulation—along with 74 percent of the people—will still be fighting for deregulation next year and in 1981, but much of the enthusiasm and pressure will have receded and nothing further will be done. We will all be stuck with this terrible legislation for a decade and probably beyond.

Once a bad law is put in place, and a segment of the industry is wiped out, the rest adjust and get it in their heads that because they lived through it they now deserve to be protected by it. They do not want things opened up, because it will mean new, more agressive competition. What they do not see is how the whole people is impoverished by destructive wedges—tax wedges, energy wedges—imposed by government. The people of Buffalo certainly know there is no way they can benefit by a law that wipes out half the independent producers, those who do more than half the exploration for new supplies.

I may not understand "conventional economics," the kind practiced in the Carter administration, but I do understand incentives. Do not the major producers understand incentives? Do not their trade association? How can they do this—throw in the towel with the opposition after such a long struggle? Do they, does it, have a secret hope that if it plays ball with the Government, with the Department of Energy, and the administration, that the regulators will be nice to them, to it? If they do, they are hopelessly naive.

I do not think this fight should be ended with the acceptance of this compromise. I think the compromise should be defeated, and I think we should proceed at once toward a new approach, a new bill. I think the producers, all of them, should come back into the political arena of the active fight and work to get a bill which will give the consumers the supplies they demand. It is not too late.●

## GEN. VON STEUBEN—REVOLUTIONARY WAR HERO

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, the anniversary of the birth of General Friedrich Wilhelm von Steuben is on September 17, and on Saturday, September 16, the United German-American Societies of Greater Chicago will sponsor the General Von Steuben parade. The parade will step off at 12:30 p.m., and I look forward to joining with Chicago Americans of

German descent on the reviewing stand in celebrating the contributions of this outstanding man in winning America's War of Independence, as well as the contributions of German-Americans throughout the entire history of our country to our liberty, well-being, and greatness. A banquet will take place in the evening at Chicago's Palmer House Hotel. Karl C. Laschet is serving as the general chairman and grand marshal of the parade, and Hon. Michael A. Bilandic, mayor of Chicago, is serving as the honorary grand marshal.

In his early career, General von Steuben served in the Prussian Army with distinction, and in high tribute to his professional standing, King Frederick the Great appointed him to general staff duty at royal headquarters. At the age of 47, he arrived in America in late 1777, having volunteered for service in General Washington's Revolutionary Army, and reported for duty on February 23, 1778. Then at Valley Forge, Washington appointed von Steuben acting inspector general with responsibility for the professional training of the Army.

Von Steuben's personal popularity and dedication enabled him to make rapid and astounding progress in molding an effective American fighting force, and his success has been called "perhaps the most remarkable achievement in rapid military training in the history of the world." As a result, on April 30, 1778, General Washington appointed him Inspector General of the Army with the rank of major general.

Throughout the long war, the practicality and skill of von Steuben's reforms proved themselves over and over again. as the men of the Continental Army showed themselves equal in discipline and organization to the best British regular troops. During the winter of 1778–79, von Steuben wrote his "Regulations for the Order and Discipline of the Troops of the United States," an important manual on the basics of drill and field service regulations, which outlined the essentials of military procedure especially adapted for the American citizen-soldier. This "blue book," as it became known, served as the official Army manual until 1812. Also during this period, von Steuben developed a system of property accounting that went a long way toward stopping the waste of precious Army provisions and material.

In appreciation for his services, the State of New York awarded General von Steuben a 16,000 acre estate, and Congress granted him a pension of $2,500 for the rest of his life. Just before he retired from his leadership in the Army, General George Washington wrote to von Steuben congratulating him as follows:

TO BARON STEUBEN

ANNAPOLIS, 23 DECEMBER, 1783.

MY DEAR BARON,

Although I have taken frequent opportunities, both in public and private, of acknowledging your great zeal, attention, and abilities, in performing the duties of your office; yet I wish to make use of this last moment of my public life to signify, in the strongest terms, my entire approbation of your conduct, and to express my sense of the obligations the public is under to you, for your faithful and meritorious services.

I beg you will be convinced, my dear Sir, that I should rejoice if it could ever be in my power to serve you more essentially, than by expressions of regard and affection; but, in the meantime, I am persuaded you will not be displeased with this farewell token of my sincere friendship and esteem for you.

This is the last letter I shall write, while I continue in the service of my country. The hour of my resignation is fixed at twelve to day; after, which, I shall become a private citizen on the banks of the Potomac, where I shall be glad to embrace you, and testify the great esteem and consideration with which I am, my dear Baron, &c.

Mr. Speaker, the members and officers of the United German-American Societies of Greater Chicago are outstanding leaders and dedicated participants in the betterment of their individual communities, and I congratulate them for their resourceful service in our city of Chicago. I also congratulate Grand Marshal Karl C. Laschet, and all the members of the General von Steuben parade committee who are working so hard to make this grand event a success. Their names follow:

Joseph Gies, Honorary Gen. Chairman, Horst Seyferth, Karl Heumann, Co-Chairmen.

Committee: Felix Bachmeier, Melvin Brandt, Stefan Dama, Ludwig Erdbeer, Willi Follmer, Fred Marunde, Josef Matzer, Siegfried Reinke, Willi Scharpenberg, Nick Schneider, Alfred Schmitke, Frank Workman, Willi Kraemer.

Paula Zottmann, Treasurer; Helen Meiszner, Parade Treasurer.

Trustees: Joseph Zottman, Betty Center, Louise Jochem.

Paula Zottman, Cornflower Chairlady; Clara Winkler, Recording Secretary; Marianne Gies, Coresp. Secretary; Virginia Vazzano, Coordinator; Katie Piechota, Assistant Coordinator.

Directoren: Joseph Anetsberger, Betty Center, Peter Foehnrich, Josef Frieberger, Helmut Koch, Alfons Schneeman, Karl Kurz, Josef Zottmann, John Sebastian.

Finanzcommittee: Sarah Brantsch, Josef Matzer, Elisabeth Kraus, Gustav Pohl, Friedrich Zeeck.●

I extend my greetings and best wishes to German-Americans in the 11th District of Illinois, which I am honored to represent, in the city of Chicago and all over the Nation who are commemorating the birth of that Revolutionary War hero, General von Steuben, and the German contribution to American greatness.

## PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. FOUNTAIN) is recognized for 5 minutes.

● Mr. FOUNTAIN. Mr. Speaker, because of a death in the family, my brother, I was absent from the House for a portion of the session of Wednesday, August 16, after 6:30 p.m., and for the session of Thursday, August 17. Had I been present I would have voted as follows on the roll call votes which I missed:

WEDNESDAY, AUGUST 16

Rollcall No. 711. House Concurrent Resolution 683, second budget resolution, Levitas amendment to reduce budget authority and outlays by $753 million by eliminating funds for proposed countercyclical programs, "aye."

Rollcall No. 712. House Concurrent Resolution 683, Rousselot amendment to provide a balanced budget, "aye."

Rollcall No. 713. House Concurrent Resolution 683, final passage, "nay."

THURSDAY, AUGUST 17

Rollcall No. 715. H.R. 13467, second supplemental appropriations, conference report, "nay."

Rollcall No. 716. H.R. 13467, Mahon motion to concur in a Senate amendment regarding funds for the extension to the New Senate Office Building, "nay."

Rollcall No. 717. H.R. 12935, legislative branch appropriations, conference report, "yea."

Rollcall No. 718. H.R. 12927, military construction appropriations, conference report, "yea."

Rollcall No. 719. H.R. 13468, District of Columbia appropriations, conference report, "yea."

Rollcall No. 720. S. 9, Outer Continental Shelf, conference report, "yea."

Rollcall No. 721. H.R. 12240, intelligence authorization, conference report, "yea."

Rollcall No. 722. H. R. 1321, rule providing for the consideration of H.R. 10898, USRA authorization, "yea."

Rollcall No. 723. H.R. 10898, final passage, "yea."●

## FIRST ANNIVERSARY OF THE DEATH OF STEVE BIKO

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. DIGGS) is recognized for 5 minutes.

● Mr. DIGGS. Mr. Speaker, it is with both sadness and hope that we commemorate the first anniversary of Steve Biko's death: Sadness, because South Africa, Africa, and the world lost one of its young leaders, a man of considerable courage, fortitude, and magnanimity; hope, because the goals for which he stood and fought are goals which his death alone will not destroy. His dreams for his nation's future live on in the hearts and minds of those people all over the world who stand for justice, human equality before the law, and man's quest for freedom.

Those who believe that by killing Steve Biko they could kill his dream are ignorant of the lessons of history. They forget Martin Luther King, Nat Turner, and John Brown. They forget Samori Toure, Patrice Lumumba, and Amilcar Cabral. Steve Biko joins the growing list of men and women who have fought colonialism and racism on the African Continent and whose voices have been stilled by the forces of oppression. But the strength of the message of men like Steve Biko is such that the message itself could not be destroyed.

We in the United States, both within and outside the Congress, who believe that Steve Biko's goals were worthy of every man, will not falter in our efforts to see his goals realized. For his goals are ours. As long as over 20 million blacks, coloureds. and Asians in South Africa are not free, we are not free. Until the last vestiges of white minority rule in Southern Africa are removed. we shall not rest. Within the Congress, we shall

continue our efforts to disassociate the American Government and the American people from the obnoxious practices of apartheid which are the very essence of the racist regime in Pretoria. And we shall continue our efforts to inform the American public of the true nature of that regime and to show our people the distortions of the propaganda being distributed in this country by the South African Government and its agencies.

Steve Biko's death only momentarily interrupted the momentum of those who fight for the liberation of South Africa. We paused a year ago as we pause today to pay him tribute. But to honor him in a fitting manner, we must not hesitate to pick up the cause of freedom where he was forced to lay down his burden. If anything, we must—and we shall—redouble our efforts to make Steve Biko's dream a reality. For if we do not, his dream, like that of so many other martyrs of African freedom, will be shattered by those who, ironically enough, fail to realize that his dream was a means to their own salvation.●

## PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. DRINAN) is recognized for 5 minutes.

● Mr. DRINAN. Mr. Speaker, during a series of recorded votes earlier today on legislation being considered under suspension of the rules, I inadvertently failed to cast my vote on rollcall No. 756, passage of H.R. 12026, the Indian Peaks Wilderness Area, the Arapaho National Recreation Area, and the Oregon Islands Wilderness Area Act. I had intended to vote "aye."●

## SUSPENSION SCHFDULE FOR MONDAY, SEPTEMBER 18, 1978

(Mr. WRIGHT asekd and was given permission to address the House for 1 minute and to include extraneous matter.)

Mr. WRIGHT. Mr. Speaker, I take this time simply that I might list here in the CONGRESSIONAL RECORD those bills which are scheduled for suspension of the rules on next Monday. It seems appropriate that Members should have this advance notice of the 25 bills which are scheduled to be brought up for motions to suspend the rules and pass on Monday next.

Under leave to extend my remarks, I list herewith those bills:

1. H.R. 7108—Tariff Amendments for Yankee Dryer Cylinder Rolls.
2. H.R. 8755—Tariffs for Ball or Roller Bearings, Flanges, Cartridges, etc.
3. H.R. 9628—Duty Suspensions on Certain Nitrocellulose.
4. H.R. 9911—Continue Duty Suspensions on Certain Forms of Zinc.
5. H.R. 10265—Suspend Duty on Natural Graphite.
6. H.R. 11409—Duty Free Importation of Dyeing and Training Materials.
7. H.R. 12739—Duty Suspension on Live Worms.
8. H.R. 13097—Medicare Amendments of 1978.
9. H.R. 13817—Health Programs Amendments (SSI).
10. H.R. 10792—Authorize Smithsonian to Acquire Museum of African Art.
11. H.R. 13675—Agriculture Act Amendments for Interest on Cotton Loans.
12. H.R. 9486—International Tin Buffer Stock Authorizations.
13. H.R. 11488—Health Planning and Resources Development Amendments.
14. H.R. 12460—Health Centers Amendments of 1978.
15. H.R. 13611—Child Health Assurance Act.
16. H.R. 12008—Psychotropic Substances Act of 1978.
17. H.R. 12348—Drug Abuse Prevention Authorizations.
18. H.R. 12326—Developmental Disabilities Act Authorizations, FY '78.
19. H.R. 12303—Nurse Training Amendments of 1978.
20. H.R. 11871—Hazardous Materials Transportation Authorizations.
21. H.R. 10965—Revise U.S. Code, Title 49, Transportation Laws.
22. H.R. 13349—Expatriation Provisions of Immigration and Nationality Act.
23. H.R. 11887—Increase Compensation for Needy Parents of Veterans.
24. H.R. 12258—Increase Veterans Burial Allowance.
25. S. 274—Prohibit Union Organizations in Armed Forces.

## ONE-YEAR ANNIVERSARY OF DEATH OF STEVEN BIKO

Mr. MAGUIRE. Mr. Speaker, I was not in the Chamber a moment ago when my special order called. I ask unanimous consent that I may be recognized for the purpose of that special order at this time.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

GENERAL LEAVE

Mr. MAGUIRE. Mr. Speaker, I ask unanimous consent also that all Members may have 5 days in which to extend their remarks on the subject of my special order and to include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. MAGUIRE) is recognized for 45 minutes.

Mr. MAGUIRE. Mr. Speaker, 1 year ago today a black South African leader by the name of Steven Biko died. He died in prison at the hands of the security police. He was one of South Africa's greatest intellectual and political leaders. I have taken this special order tonight and my colleague, the gentleman from New York (Mr. DOWNEY) has also taken a special order tonight in order to provide Members of the House an opportunity to recall Mr. Biko's contributions and to express their own feelings about the circumstances under which Mr. Biko died and the implications of those facts and the current situation in South Africa not only for the people of South Africa, but also for Americans as well.

Before proceeding with my own remarks, Mr. Speaker, I would like at this time to yield to the distinguished gentleman from California (Mr. DELLUMS).

Mr. DELLUMS. Mr. Speaker, I thank my distinguished colleague, the gentleman from New Jersey (Mr. MAGUIRE) for yielding to me and I applaud the gentleman for taking this very important special order. I would like to indicate further, Mr. Speaker, and Members of the House, and to my distinguished colleague, the gentleman in the well, Mr. MAGUIRE, that while today, September 12, 1978, is the first anniversary of the tragic death of Steve Biko, and as this tragic event focused international attention on the oppressive activities of the South African Government, so today I bring before you yet another potential tragedy.

It has come to my attention that the existence of the squatters' community, Crossroads, located near Capetown, South Africa, is being threatened with imminent destruction.

Because of the South African Government's intolerable apartheid policies, certain areas of the country are reserved for white occupation exclusively. This forces African workers to leave their families and travel long distances in order to work. Crossroads was established in 1975 for squatters in the Capetown region in order that these men could reside with there families. Crossroads is unique in that unlike other such communities there has been a courageous effort by the members of the community to continually improve the conditions of their lives.

The tragedy of Crossroads is that the government will not allow it to survive. The 20,000 African residents of this community are continually being harassed by the police and government in their efforts to force the families of these men to return to the "Homelands." The South African Government is crushing Crossroads.

It is especially intolerable on a day commemorating the death of Steve Biko, a day to honor this man's contribution to the human movement of South Africa, that we must face yet another flagrant disregard of human dignity. The people of the United States, the Congress, the executive branch, and the world must unite in an effort to end this atrocious oppression.

Again, Mr. Speaker, I wish to thank my distinguished colleague, the gentleman from New Jersey (Mr. MAGUIRE) for taking this important and sensitive special order, and to thank the gentleman for yielding me this time.

Mr. MAGUIRE. I now yield to the gentleman from Texas (Mr. ECKHARDT).

Mr. ECKHARDT. Mr. Speaker, I too want to applaud the gentleman for having asked for this special order which I believe is most appropriate and to compliment him for recognizing the life and activities of a brave and courageous man who died for a cause which I think we all stand for, that is humanity and justice.

Mr. MAGUIRE. I thank the distinguished gentleman.

Mr. Speaker, I wish to state that the remarks of the distinguished gentleman from Illinois (Mr. ANDERSON) who is not able to be present with us tonight, will be included at the conclusion of my special order.

Mr. Speaker, I was glad that my friend the gentleman from California (Mr. DELLUMS) called the attention of this body to the situation at Crossroads, a town of some 20,000 black South Africans and what South Africans refer to as colored South Africans, a town which the Government of South Africa says exists illegally and, despite the fact that 90 percent of the people there have their families with them, in spite of the fact that the great majority of them have legal positions of employment in the Capetown area, despite the fact that this town of some 20,000 people has a spirit of progress and cooperation and has provided all sorts of facilities and services for the families in the community, despite all of that, the Government of South Africa has indicated in the next few weeks its intention of destroying that town.

Mr. Speaker, we will be holding a press conference tomorrow with the key participation of the gentleman from Indiana (Mr. BRADEMAS), the gentleman from Illinois (Mr. ANDERSON), and the gentleman from Maryland (Mr. MITCHELL), and the gentleman from New Jersey (Mr. RODINO) to talk at greater length about the Crossroads situation. The destruction of Crossroads is an example of oppression which Steve Biko would have worked to prevent, the kind of community which Steve Biko would have sought to preserve—the town and its people—and it is a time when, in commemorating his memory, we ought to look at what is happening in South Africa today, and we ought certainly to try to exert our influence in advance of another disaster occurring rather than simply wringing our hands in anguish afterward. That is the intention of the press conference tomorrow.

Mr. Speaker, Steve Biko, as I said earlier—and I think the whole world understands that this is the case—was killed by the security police while in detention, without charges, without trial, incommunicado, in South Africa. This notwithstanding the fact that an inquest was held and that a finding was made which did not assign responsibility for Mr. Biko's death to any individual person or persons.

Mr. DOWNEY. Mr. Speaker, will the gentleman yield?

Mr. MAGUIRE. I yield to the gentleman from New York.

Mr. DOWNEY. Mr. Speaker, I would like the gentleman to respond to a claim I often hear by South African authorities that the inquest into the death of Steven Biko was in the finest traditions of South African democracy, and that all issues were explored and developed in detail, and that the inquest stands as an example, if you will, of the South African Government's rule of law in particular on this matter, and that our claims on occasion, to the contrary notwithstanding, we should understand that there still is a society of laws there, and this inquest is a shining example of that society.

Could the gentleman respond to that particular claim?

Mr. MAGUIRE. Surely. In this connection, there are some very interesting reports and conclusions made by some outside observers of the inquest. I would cite first the opinion rendered by Sir David Napley, the past president of the Law Society in the United Kingdom, who observed the inquest. His conclusion was as follows:

> In short, I was left in no doubt that Mr. Biko died as a result of brain injury inflicted on him by one or more unidentified members of the Security Police at some time prior to and reasonably proximate to 0715 hours on the morning of 7 September 1977.

I should add that in addition to the findings by Sir David Napley of the circumstances he concluded surrounded Mr. Biko's death, that the Lawyers Committee for Civil Rights Under Law also had an observer at the inquest in South Africa, Louis H. Pollack, dean of the University of Pennsylvania School of Law. He went to South Africa representing the Lawyers Committee, as well as the Lawyers Association of New York and the American Bar Association. Mr. Pollack agreed with Mr. David Napley about the circumstances surrounding Mr. Biko's death.

Mr. MAGUIRE. Mr. Speaker, I would also point to a book called "Biko," written by Donald Woods, which indicts the South African Government and all supporters of apartheid for the death of Mr. Biko and for the other systematic violations of every principle of law which we are familiar with in the West.

Among the things which Mr. Woods says is the following:

> It is true that any South African citizen can still win a civil or criminal case, provided one has a great deal of money, one has the right judge or magistrate, and one is free to institute special proceedings.

He goes on to say the following:

> Today there are few independent judges or magistrates in South Africa where political cases are concerned. Police, magistrates, judges, prosecutors, few, indeed, are completely free to pursue objective standards of justice. Most judges in South Africa adhere to the belief that their function in regard to statute law is solely to interpret it and apply it, which means, in effect, in many cases, to implement apartheid regardless of the principles of justice.

Beyond that, I think it is correct to say that in a system in which a majority of 4 million people make the laws, administer those laws, and in which there is no bill of rights and on recourse to the courts with respect to any acts taken by the Parliament, and where there are 22 million nonwhite persons, we have not a rule of law, but a system of oppression.

In fact, I have found in my own visits to South Africa and in discussions with knowledgeable people both inside and outside South Africa that what we have in South Africa is a police state with respect to that majority of 22 million persons who are not permitted to participate in making the decisions in the society. Of course, there is a whole range of oppressive and repressive laws, as the gentleman so well knows, because he has studied these matters in great depth as well, which results in the government being able to deprive citizens of life, liberty, and the pursuit of happiness, to deprive them all of rights, of all recourse to lawyers, to the courts, to hold them without charges for incredible periods of time, up to 513 days in some instances without contact with their families, without anyone knowing where they are or what their circumstances are. Of course, under those circumstances, as the record so clearly shows, many political prisoners, more than 20 since 1976 and more than 45 or so since 1963, have in fact died under suspicious circumstances while in the hands of the security police.

It is my view that the government at the present time and for 30 years past has in fact followed a policy of intimidating, harassing, driving into exile, if necessary detaining, and sometimes killing at the hands of the security police, persons whom they regard as political threats.

Mr. DOWNEY. Mr. Speaker, will the gentleman yield?

Mr. MAGUIRE. I yield to the gentleman from New York.

Mr. DOWNEY. I thank the gentleman for yielding.

It has been my experience that since we formed the monitoring group to engage in thoughtful discussion a number of leaders from South Africa, that we were able to discuss the details of the racial policy with the South African Minister, Mr. Connie Mulder, who was, I think, next in line to Vorster in power in his own party and highly touted as the potential ruler for South Africa, and who today is their Minister for Race Relations. In my discussions with this minister, he told me that the oppressive accounts that I have read of or that I have read in books and articles about South Africa were incorrect and that it really would serve me to be educated by coming to South Africa to learn firsthand what the problems were, to determine that the people, black and colored and white alike, enjoy the regime. I found this almost amazing, that this system that deprives unilaterally blacks an opportunity to earn the same wages as whites, to live where they choose, was anything that the black people could accept.

It is my understanding that the gentleman from New Jersey has recently gone to South Africa and has spent 2 weeks there. Would the gentleman agree with Mr. Mulder that the blacks and coloreds enjoy their relationship with the majority government and that they have no particular reason to change?

Mr. MAGUIRE. I certainly would not. I might say that I also had the opportunity to meet with the Minister of Telecommunications, Mr. de Klerk, when I was there, along with a number of other Americans and Europeans who were participating in a conference on "Options for the Future of South Africa and Implications for the West," a conference sponsored in South Africa by the South African Institute of International Affairs and in this country by the World Peace Foundation. It was saddening to me that at the end of a long discussion with Mr. de Klerk, and under some pressure from the questions of those present, including our former Attorney Gen-

eral of the United States Nicholas Katzenbach, who were part of our delegation, Mr. de Klerk reverted to the device of appealing to our observation of black people walking around in the streets with smiling faces as his last resort in defending the apartheid system and making essentially the same point that the gentleman has pointed out that Minister Mulder also made. Of course, the facts are that we have a situation in which there is no formal process of consultation for all South Africans about the future of their country and about how their country is to be governed now.

As I indicated, a small minority of 4 million freezes out the 22 million others that live in the country—not only freezes them out of any participation, but oppresses them in every conceivable fashion.

In addition to that, one has to conclude after studying the record with respect to arrests and imprisonment that there is no rule of law as we understand it in the West. It is a police state with respect to nonwhites and the government systematically suppresses and oppresses and attempts to eliminate black leadership.

Beyond that, there is, of course, the fact we are not going to have needed political change in this situation. We are not going to have an end to apartheid until we get beyond the fraudulent formulations of separate development and so on, which are just new terms for apartheid and until all South Africans are included in the political process, constitutionally, legislatively, politically, socially, and economically.

I came back very, very depressed and very discouraged and very pessimistic about the future of South Africa and about the prospects for peaceful change there; so I would certainly want to say to the gentleman that my experience while I was there in talking to people whom I met and the South Africans I met outside the country is that South Africans are increasingly angry and upset and discouraged about the situation in which they find themselves. They are sick and tired of having a government tell them that they cannot participate.

We have since 1976, I think, a new mood where even students are taking leadership and saying they want full participation and they are not going to settle for the status quo.

May I emphasize that we also have in all racial groups—whites, coloreds, Asians, blacks—people of good will, of enormous desire for change and improvement; but they do not hold power. The power is held by the Nationalist Party. The power of the Nationalist Party is held by the caucus. A very small group of people making decisions there have all the powers that go with the state, the security police, the military power, and any effort to question government decisions is quickly suppressed.

We have had cases just recently of Nthato Motlana, the chief spokesman of the Committee of Ten in Soweto who was banned before he could make a speech at the University of the Witswatersrand. Even members of the family and associates of Steve Biko were detained on the eve of this first anniversary of Steve Biko's death.

The fact is that the government is unwilling to embark on a policy of accommodation or even of discussion and so, therefore, the descriptions that we have heard from Mr. Mulder and Mr. DeKlerk are in my judgment and the judgment of most observers absolutely dead wrong and are themselves illustrations of the problem.

Mr. BONKER. Mr. Chairman, will the gentleman yield?

Mr. MAGUIRE. I yield to the gentleman from Washington.

Mr. BONKER. Mr. Speaker, I would like to ask the gentleman, in light of the actions in South Africa in recent weeks to arrest approximately 500 men, women, and children, in Crossroads, which is outside Capetown, whether the gentleman had any experience on any occasion to visit the so-called Crossroads while the gentleman was in South Africa?

Mr. MAGUIRE. Yes. I thank the gentleman for his question. I did have an opportunity to spend some time in Crossroads on the last Sunday in July. At the same time, it was a time when a prayer meeting was being held which brought people of all races together for the afternoon and the leadership from every denomination of the church, Protestant, Catholic, and Jewish.

All were there—blacks and whites—to commit themselves to the survival of Crossroads and the lives and well-being of the 20,000 individuals and the many thousands of families who live in Crossroads.

I had an opportunity on that occasion to talk with many people of all races who are themselves involved in this effort, and I know the gentleman shares with me the hope that this community will be permitted to survive, and that the people there will not be sent back with one-way railroad tickets to places all over the country that they may not have seen for 20 years—places where they would have no possibility of earning a livelihood, where they have no homes, and where their families would be split up and their community destroyed.

Mr. BONKER. Mr. Speaker, will the gentleman yield?

Mr. MAGUIRE. I would be happy to yield to the gentleman from Washington.

Mr. BONKER. Mr. Speaker, just for the record, Crossroads is one example in South Africa where rural blacks come into the city to find employment, but the price of that is separation from their families.

In recent years the family members have attempted to come into these communities that are called squatter communities, because the families want to integrate and want to come together, and under the present situation in South Africa it is very difficult, if not impossible, for families to have that union.

I had understood that the South African Government had plans to bulldoze this community and others like it to try to break up this attempt to integrate the families. I think it is appalling that a 20th century country such as South Africa is incapable of developing an environment where families, whether they are white or black, can come together and enjoy a natural family existence.

So I would hope that on this special occasion we would focus special attention on the so-called squatter villages and call upon the South African Government to allow these people to live a life of dignity so that their families can come together and enjoy the one basic human right of all—and that is the right to be together.

Mr. MAGUIRE. Mr. Speaker, I thank the gentleman for his comments.

Mr. Mulder, who was referred to earlier, has stated that there is no possible way that Crossroads can survive, and other ministers and officials have indicated that it must be destroyed, because it is illegal and all squatters will have to be dealt with, et cetera.

I might point out to the gentleman that there are some 400,000 black men working in the urban areas in South Africa who do not have the ability to have their families with them. The gentleman may also know that more than 250,000 persons in the Capetown area alone are individuals who are in the category the gentleman has mentioned. They are people who have no legal residence there. Many of them have legal jobs, but they cannot live there.

This is one of the most inhumane and utterly unacceptable aspects of apartheid.

Mr. Speaker, I thank the gentleman from Washington (Mr. BONKER) for making his point.

Mr. HARKIN. Mr. Speaker, will the gentleman yield?

Mr. MAGUIRE. I yield to the gentleman from Iowa.

Mr. HARKIN. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I wish to compliment the gentleman from New Jersey (Mr. MAGUIRE) for taking this special order to commemorate the anniversary of the death of Steve Biko.

It has been my observation in the past and also today that if there is one thing that the entrenched regime of South Africa would like to see happen, it is to have the rest of the world forget about what happened in South Africa, especially regarding the death of Steve Biko. But that is not surprising. That is the attitude that all regimes of that nature who are suppressing the legitimate human rights of their people have. They hope the rest of the world will watch silently, and that the incidents of terrorism against the people will be forgotten, and in that way they can go on about their own business.

I would like to take this occasion, the commemoration of the death of Steve Biko, to focus attention on a subject that is perhaps a little broader than just South Africa. It seems that many of us—and perhaps it is true of even the Members of this House of Representatives—get a certain picture many times when we talk about terrorism and terrorists. What that conjures up, I believe, in most Americans' minds is a picture of someone with a plastic bomb or with a submachine gun or with a hand grenade going into a place that is crowded with

women and children and shooting it up or blowing it up and killing innocent people. Or perhaps it conjures up the blowing up of an airplane and that kind of thing. Certainly that is terrorism, and those people who engage in those acts are terrorists.

But by focusing on that kind of terrorism, perhaps we too often gloss over and forget the other larger terrorism that is taking place in the world—and that is the terrorism that is inflicted on people by entrenched regimes, autocratic governments, both on the left and on the right, who see no duty to enforce human rights or uplift the human rights of their people. And one of the things, of course, is torture. I think too often we forget that torture is in fact a means of terrorizing people. Steve Biko was not tortured, because he had some secret information that the government wanted to extract. He was not put to death, because he did not divulge that secret information. There was only one reason he was tortured, and that was to inflict terror on the rest of the black people of South Africa, to terrorize them so that they would not speak out for their legitimate rights.

And we see the same thing happen in country after country after country in the world, the same kind of process—torture and death, death usually through some kind of disappearance—being used to terrorize people. That is every bit as much terrorism as the lone individual with the plastic bomb. In fact, in many cases it is worse, because that kind of terrorism is cloaked with the dignity, if you can use that word, of the law of the entrenched powers of the government which happens to be inflicting the torture upon the people, such as the South African regime.

So I think we in this country have to broaden our focus on terrorism, look at it for what it is, and look at torture for what it is. Torture is a means of terrorism—the kind of torture that was inflicted upon Steve Biko.

I have one further observation I would like to make, if the gentleman will yield to me for 1 minute.

Mr. MAGUIRE. The gentleman has all of the time the gentleman needs.

Mr. HARKIN. I thank the gentleman.

That observation has something to do with how we in this country view our relations with these governments, not only on a government-to-government basis, but on the basis of international commerce.

Mr. Speaker, I happened to catch a glimpse of the replay of "Roots" that played over the networks here in the last couple of weeks, and I was struck by one sequence where Kunta Kinte gets off of the boat in America. He is put on the block. There is an Englishman—I forget his name, but he was all dressed up in his finest garments and he had a nice white handkerchief, that sort of thing—and someone made a comment about the kind of trade he was involved in—the slave trade. And he sniffed haughtily and said it was the Crown's commerce. And he was excused for that. "It is the Crown's commerce, it is my business, and don't mess with my business."

I think many times in this country we tend to gloss over the business dealings that go on between commerce in this country, businesses in this country, and businesses that support the countries like the South African regime. By the very fact of engaging in that kind of commerce they not only add credibility to the regime and support it, but they give it the economic means by which it can maintain itself in power and inflict this kind of terrorism upon its people.

So I am hoping that we in this country will begin to look at our business dealings abroad, both on a government-to-government basis and on a business-to-business or a business-to-government basis, always keeping in mind that the end result of all of our dealings abroad, just as the end result of all of our dealings in this country, ought to have as a final goal the promotion and the enhancement of the basic human rights. And if businesses are not doing that, if they are not taking that into account, then we in the Congress, I believe, have an obligation under our powers to mandate that private businesses in this country that deal with these autocratic regimes, such as the Government of South Africa, have to take into account the human rights situation in that country in which they are doing business, so that, rather than upholding the government that is in power that is violating the human rights of its citizens, that business can join with our Government in trying to change its government to one that is more democratic and one that certainly respects the basic human rights of its people.

Mr. Speaker, again I compliment the gentleman in the well for taking this special order. I am always reminded and I am mindful of the cry of the Jewish race after the Second World War—"never again." And I believe that ought to be our watchword as we look upon the world scene today and we see government after government violating the basic human rights of its people, torturing and putting people to death, and we too ought to look at our own philosophical heritage in this country, our Bill of Rights, our Declaration of Independence, our Constitution, and say that never again are we in this country going to stand idly by while people like Steven Biko are put to death by their government.

Mr. Speaker, I thank the gentleman.

Mr. MAGUIRE. I thank the gentleman for his comments. He mentioned the analogy to the situation in Hitler's Germany. I am prompted at this point to quote briefly from Donald Woods' book "Biko" on that point. Mr. Woods says:

> Just as Hitler's "Final Solution to the Jewish problem" was the ultimate consequence of earlier Nazi policy, so deaths such as those of Steve Biko are inevitably the appropriate result of the apartheid policy since its inception. Having to wear a yellow armband and having to die in a gas chamber at Auschwitz were but two links in the same chain of racism. These two links might have been at opposite ends of the chain—but the chain was the same. Having to carry a "pass" and having to die of assault in detention are similarly two links of the same chain.
>
> If you feel impelled to enforce at all costs the wearing of armbands, you have to end up herding people into gas chambers. And if you feel impelled to enforce at all costs a separation of races, you have to end up killing people.

Mr. BUCHANAN. Mr. Speaker, will the gentleman yield?

Mr. McGUIRE. I yield to the gentleman from Alabama.

Mr. BUCHANAN. Mr. Speaker, I would like to thank the gentleman in the well for taking this special order. It is fitting and proper that the Congress of the United States should pause to remember Steve Biko, because there is a kinship stronger than blood ties between all those who have given their lives that others might be free.

This country has as its raison d'etre, its reason for being, the inalienable rights of man. Thomas Jefferson and his fellows spoke of the inalienable rights of man to life, liberty, and the pursuit of happiness, rights by which they were endowed by their Creator, and that governments were instituted among men to preserve and protect those rights.

In our own country it has taken us more than 200 years to fulfill our own great dream. It was only in this century, with the civil rights movement in the United States, that we began to fulfill our own high destiny in becoming what, as I believe we were always intended to be, a nation of equality, of justice, a nation where all men were free and equal. As we were emancipated in this century from the shackles of yesterday, and as we continue to strive for the fulfillment of our own dream of freedom, nothing to me is more important than that we shall pit our enormous strength on the side of individual rights, human rights, human freedom, self-determination among the peoples of other lands.

In Africa we have not only our own long-term political and economic best interests involved in alineing ourselves with those forces in Africa which shall say no forever to all the vestiges of racism, of apartheid, of colonialism, but we have, in my own judgment, what we most basically are as a nation on the line, and where we aline ourselves in Africa; because the United States must be a place in every generation that is so identified with the cause of human rights and human freedom that forever more. where on this Earth one human heart beats free, America shall live and never die.

Mr. Speaker, I thank the gentleman for yielding to me.

Mr. MAGUIRE. Mr. Speaker, I thank the gentleman from Alabama for his most eloquent statement, one which I am sure is concurred in by many, if not all, Members of the House.

The gentleman from Alabama has referred to the great ideals of human rights and democracy and freedom. The gentleman from Iowa referred to terrorism sanctioned by the power of the state.

In remembering Steve Biko, we should recall his 4½ days of testimony at a trial in May 1976 in which he was called as a witness. This was a trial of a number of defendants who had been active in the South African Students Organization (SASO) and the Black People's Convention, known as the BPC. Mr. Biko was the

founder of SASO and was the honorary president of the Black People's Convention. He was subpenaed to testify at this trial.

The testimony has been collected with a most moving and cogent introduction by Millard Arnold, in a book entitled "Steve Biko—Black Consciousness," which will soon be published by Random House. Mr. Arnold is the director of the Southern Africa project for the prestigious U.S. Lawyers' Committee for Civil Rights Under Law.

A reading of the testimony by Mr. Biko over that 4½-day period reveals a brilliant—a brilliant—performance under tough cross-examination and it lays out as in perhaps no other single place Mr. Biko's philosophy, and it demonstrates his greatness as a thinker and as a human being.

He talks about white violence in South Africa, the real terrorism which is asserted by the power of the state inside South Africa. He talks about the fear that whites have of blacks and of the fear felt by black people in the face of the system. He talks about the need for overcoming the psychological oppressions of those fears and of course at great length he explains what black conciousness is all about in the South African context, how it differs from black consciousness in America, what its implications are for the future of South Africa. He diagnoses the evil of the system and its effects on both whites and blacks and he talks compellingly about the hope that he has for bargaining and negotiations leading to a future for the country of South Africa and for all South Africans.

This amazing and eloquent testimony by Mr. Biko is juxtaposed in these trials to the prosecution's attempt to prove that writings and political activities, which are familiar and customary to all Americans and which are fully protected by our Bill of Rights are crimes in the State of South Africa punishable by death.

There is also in this account the surprisingly, if I may say, dense, ill-informed, at times childish questions and comments by the magistrate for the court in his attempt to justify apartheid and to justify his opposition to any alternatives to it.

When we talk about the trial of persons for writing and for the kind of community and political activity which is fully protected in this country, we have to look at the kind of law under which people are prosecuted, and I refer in particular at this point to the Terrorism Act of 1967, surely the worst of all.

It was under the Terrorism Act of 1967 that Mr. Biko was held, and many others have been held without justice, without trial, without any recourse to family, to any court of law. It is under section 6 of the Terrorism Act of 1967 that so many black leaders have died at the hands of the security police.

It is important that we remember when we talk about these laws that there is no bill of rights in South Africa. And in a famous court case, Sachs against Minister of Justice, 1934, the court found that Parliament "may make any encroachment it pleases upon the life, liberty, or property of any individual subject to its sway, and it is the function of courts of law to enforce its will."

In the South African Constitution we find the following sentence:

> No court of law shall be competent to inquire into or pronounce upon the validity of any act passed by Parliament.

So Parliament passed the Terrorism Act. It is not subject to any judicial review or judicial process and certainly not its implementation because it specifically provides that the only persons who shall have anything to say about who is or is not detained under the Terrorism Act, or under what conditions or circumstances that person will be held, or for how long, is the Prime Minister and the Minister of Justice. I am talking about Mr. Vorster and Mr. Kruger.

The Terrorism Act says not that the state shall prove that certain acts were committed, acts of terrorism, but rather the defendant is put in the position of proving that any act that he may be alleged to have committed, did not have any 1 of 12 possible effects, or results, including "embarrassing" the Government.

The SPEAKER pro tempore. The time of the gentleman has expired.

## FIRST ANNIVERSARY OF THE TRAGIC DEATH OF STEVE BIKO

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. DOWNEY), is recognized for 40 minutes.

Mr. DOWNEY. Mr. Speaker, at this time I yield to the distinguished gentleman from New Jersey (Mr. MAGUIRE), for the purpose of continuing his remarks made during his special order.

Mr. MAGUIRE. Mr. Speaker, I thank the gentleman from New York (Mr. DOWNEY), for yielding to me.

Mr. Speaker, to continue with what I was saying, under the Terrorism Act you may be prosecuted, you may be convicted, you may be given the ultimate penalty of death for not being able to prove that some act that you are alleged to have committed did not, in fact, embarrass the administration of government or did not contribute in some way to racial hostility, or what have you.

This is a situation which any student of legal tradition in the West would find utterly appalling. And there is another example:

When I was in South Africa, I attended the opening of a trial very similar to the one that I referred to earlier where Mr. Biko testified in May of 1976. It was the opening of a trial of 11 young men and women, students from Soweto, active in the Student Representative Council of Soweto, who are now on trial for their lives for what the Government calls terrorism and for sedition, for having organized students to express their views, for peacefully demonstrating against the imposition in their schools of a system of instruction in which they would be required to learn their subjects in the Afrikaans language, for arguing that the Government should change its policies.

Of course, the state points out that some property was destroyed; and the state points out that the cost to the administrative unit in the Transvaal was such and such. The government fails to point out, of course, that some 600 or 700 young students were killed in the streets by the police, and that as a result there were problems in Soweto and across the country for a series of months.

These young men and women are now on trial for their lives in the Supreme Court of South Africa. I attended the opening of that trial in July in Randburg. The trial will continue later this month and will probably go on for 6 or 8 or 10 or 12 months.

Mr. Speaker, I find in looking at the indictment, of which I have a complete copy, that the students frequently are being charged not with acts which they may themselves necessarily have committed, but with consequences which are alleged to have resulted from those acts. Of course, the acts in most cases are either writing something about the situation in which they were involved relating to the languages in the schools, to the plight of black people, et cetera, to having meetings and electing officers to the Student Representative Council.

The language of the indictment says, "Reckless as to the said consequences thereof," et cetera. There is a lot about prohibited gatherings and so on.

However, this indictment is, as far as I am concerned, an indictment of the state and of the whole system of justice. I had a great deal of difficulty in understanding in that courtroom where there was a judge, where the prosecutor was sitting, where the defense attorney was, and where the dock was in which prisoners were being held; I had a great deal of difficulty in understanding that this was not, in fact, a court of law in the sense that we understand a court of law in this country, but that it was something very different. It was, in fact, an instrument of oppression being wielded by the power of the state against students who did the sort of thing which would have been protected in this country.

Mr. Speaker, I say to the South African Government, if you have an example of arson, if you have an example of somebody throwing a rock, if you have an example of somebody committing a violent act, then prosecute the person on that act and do not have this trumped-up set of charges about terrorism and sedition and overthrowing the government by force and so on, when you are talking about children who were ages 16 to 20 at the time the acts occurred, in 1976.

Mr. Speaker, I thank the gentleman from New York (Mr. DOWNEY) for the time.

Mr. MARKEY. Mr. Speaker, will the gentleman yield?

Mr. DOWNEY. I yield to the gentleman from Massachusetts.

Mr. MARKEY. Mr. Speaker, I thank the gentleman for yielding.

I wanted to make a brief statement to reiterate the thoughts of the gentleman from Iowa, New York, and New Jersey. I compliment them on their summation of what is, in a sense, a moral question.

The ironical thing is that we do not even know upon which day we should be commemorating this tragedy because of the unfortunate circumstances which surrounded the death of Steven Biko at that time a year ago.

However, I think that the repression of human rights is a tragedy which is encountered worldwide, but massive denial of human rights based solely on race is a situation unique to South Africa. By taking actions against blacks, against civil libertarians, and against the press, the force of government has demonstrated its contempt for those who value human life. These oppressive policies are abhorrent to the instinct of every American. It is our duty as a nation, a nation whose purpose and resolve depend on freedom and equality, to voice our strong disapproval.

After the massive crackdown on what is being called Black Wednesday, the blacks and nonwhites in South Africa are now more separate and less equal than ever before. We see in the newspaper only last Wednesday that the South African Government placed a 1-month banning order on the generally recognized leader, popular leader of the sprawling black township of Soweto, and the banning order, which prohibits Motlana from attending any gathering and specifically any meeting at which principles of government are discussed or criticized, was handed to the 52-year-old physician Wednesday, hours before he was to address an audience at a university.

I hope that forceful actions will be taken by the United States to insure that we remain credible as a nation concerned with human rights.

I personally experienced outrage at the senseless, violent murder of Steve Biko, Steve Biko, who was considered by many as a moderate voice, a leader of his people and until his death a potential leader of his country. I noted the news of his arrest last August 8 with alarm, but I was totally shocked at the notice of his death and the circumstances by which he died. The information at the time that Biko was but one of 20 political detainees who had died while in police detention that year further heightened my desire to participate with the gentleman from New Jersey (Mr. MAGUIRE) and the gentleman from New York (Mr. DOWNEY) in some kind of demonstration of disgust with their government.

In the wake of a series of predawn dragnet raids, highly reminiscent of Gestapo tactics, the South African Government swept into its jails and publicly silenced its most dedicated and creative leadership. Clearly, the Vorster regime decided, and has continued to decide, that it can no longer afford freedom of political expression because it can no longer afford the truth to be told. But if we condone our country through our silence the inhuman wrongs of the Vorster Government, then the United States and this House merit no stature in the world community as champions of human rights and human dignity.

The continuing repressive measures by the South African Government will, in the short run, have its desired effect. A powerful but frightened authority has always found it easier to cope with opposition by silencing its leaders rather than listening to their grievances. But in the long run these grievances appear to be so fundamental that any solution short of a transformation of the entire political system will be no solution at all.

The inescapable restrictions of the apartheid system control every aspect of life for the nonwhite community in South Africa. It is the only country that determines where you will work, what you will do, and what you will be paid, solely on the basis of the color of your skin. This must change. There is a minimal standard of human rights which cuts across national boundaries. South Africa's conduct has so deteriorated that their actions defy an international set of values which transcend their own internal political system. On this, the first anniversary of Steve Bilko's death, the United States, as the moral leader of the free world, must not and cannot stand idly by while the rights of millions are systematically destroyed. I urge that we use Steve Biko's death and the escalation of repression in South Africa to demonstrate to the world at large that our dedication to the principle of human rights is sincere, total, and unequivocal.

I yield back the remainder of my time.

Mr. DOWNEY. I thank the gentleman.

It is a strange position, indeed, to be able to control the time the gentleman from New Jersey speaks—and delightful—and I yield to him at this time.

Mr. MAGUIRE. I thank the gentleman. I want to commend the gentleman from Massachusetts for a most eloquent statement.

I might say at this point that I think we should include in the RECORD the names of all of those who have died since 1963 while in the hands of the security police of the Government of South Africa. The list is reproduced below:

L. Ngudle died in Pretoria on September 5, 1963 (suicide by hanging).

B. Merhope died in Worcester on September 19, 1963 (causes undisclosed).

J. Tyitya died in Port Elizabeth on January 24, 1964 (suicide by hanging).

S. Saloojie died in Johannesburg on September 9, 1964 (fell seven floors during interrogation).

N. Gaga died in Transkei on May 7, 1965 (natural causes).

P. Hoye died in Transkei on May 8, 1965 (natural causes).

J. Hamakwayo died in Pretoria in 1966 (suicide by hanging).

H. Shonyeka died in Pretoria on October 9, 1966 (suicide).

L. Leong Pin died in Pretoria on November 19, 1966 (suicide by hanging).

A. Ah Yan died in Pretoria on January 5, 1967 (suicide by hanging).

A. Madiba died in an undisclosed prison on September 9, 1967 (suicide by hanging).

J. Tubakwe died in Pretoria on September 11, 1967 (suicide by hanging).

An unnamed person died on an unknown day in 1968 (death disclosed under questioning in Parliament on January 28, 1969).

N. Kgoathe died in Pretoria on February 4, 1969 (slipped in shower).

S Modipane died in prison on February 28, 1969 (slipped in shower).

J. Lenkoe died in Pretoria on March 10, 1969 (suicide by hanging).

C. Mayekiso died in Port Elizabeth on June 17, 1969 (suicide).

J. Monakgotla died in Pretoria on September 10, 1969 (thrombosis).

Imam A. Haron died in Cape Town on September 27, 1969 (fell down stairs).

M. Cuthsela died in undisclosed prison on January 21, 1971 (natural causes).

A. Timol died in Johannesburg on October 27, 1971 (leapt from tenth-floor window during interrogation).

J. Mdlull died in Durban on March 19, 1976 (fell against chair during scuffle).

M. Mohapi died in Kei Road on August 5, 1976 (suicide by hanging).

L. Mazwembe died in Cape Town on September 2, 1976 (suicide by hanging).

D. Mbatha died in undisclosed prison on September 25, 1976 (suicide by hanging).

E. Mzolo died in Johannesburg on October 1, 1976 (no details given).

W. Tshwane died on October 14, 1976 (no details given).

E. Mamasila died on November 18, 1976 (no details given).

T. Mosala died in Butterworth on November 26, 1976 (no details given).

W. Tshazibane died on December 11, 1976 (no details given).

G. Botha died in Port Elizabeth on December 14, 1976 (fell down stairwell).

Dr. N. Ntshuntsha died on January 9, 1977 (no details given).

L. Ndzaga died on January 9, 1977 (no details given).

E. Malel died on January 20, 1977 (no details given).

M. Mabelane died on February 15, 1977 (no details given).

T. Joyi died on February 15, 1977 (no details given).

S. Malinga died in Maritzburg on February 22, 1977 (natural causes).

R. Khoza died in Maritzburg on March 26, 1977 (suicide by hanging).

J. Mashabane died on June 5, 1977 (suicide).

P. Mabija died in Kimberley on July 7, 1977 (fell six floors during interrogation).

E. Loza died in Cape Town on August 1, 1977 (no details given).

Dr. H. Haffejee died in Durban on August 3, 1977 (no details given).

B. Emzizi died on August 5, 1977 (no details given).

F. Mogatusi died on August 28, 1977 (suffocation in epileptic fit).

S. Biko died in Pretoria on September 12, 1977 (injured in scuffle).

Mr. Biko is the last person on that list so far, but there are three names which must be added because three more have died since Mr. Biko died—all three people in the hands of the security police. Those names are: Sipho Bonaventura Malaza, November 1977, a student by the way; Mzukisi Nobhadula, December 20, 1977; and Lungile Tabalaza, July 10, 1978. Mr. Tabalaza "jumped" from the fifth floor of the security building in Port Elizabeth, which, by the way, is the same facility at which Mr. Biko sustained his fatal injuries.

Mr. MAGUIRE. Mr. Speaker, would the gentleman yield further and permit me to continue?

Mr. DOWNEY. Absolutely.

Mr. MAGUIRE. Mr. Speaker, a moving poem was written by Millard Arnold on the death of Steve Biko. The poem was read by Mr. Arnold at the annual meeting of the NAACP, at which it was decided that the humanitarian award, the Stevie Wonder Humanitarian Award would be given to Mr. Biko posthumously. I would also like to insert, togther with the poem, Mr. Wonder's statement on the granting of the award.

POEM

(Written and read by the Southern Africa Project Director, Millard W. Arnold, in acceptance of the Stevie Wonder Humanitarian of the Year Award on behalf of the Stephen Bantu Biko family, June 9, 1978.)

They tell me Steve Biko is dead—
To persuade me perhaps that his strong but sensitive voice can be stilled by hatred and fear.
They tell me Steve Biko is dead—
To show me perhaps that humanity and dignity can be bludgeoned into submission.
They tell me Steve Biko is dead—
To convince me perhaps that courage and compassion can be somehow compromised.
But what they are afraid to tell me is that Steve Biko lives.
That the spirit, the ideals, the dreams, the glory of Steve Biko lives.
That it lives in Soweto, that it lives in watts,
That it lives in Harlem, that it lives in the minds of all those oppressed.
Steve Biko lives because the aspirations of a people cannot be denied.
Steve Biko lives because violence and repression will not quench the thirst for freedom and decency.
Steve Biko lives because his special sense of humanity and integrity cannot be forgotten.
But they, they would have me, they would have you believe that Steve Biko is dead.
You and I—we—we know better.

STATEMENT OF STEVIE WONDER

For many years, now, I have been a silent observer of the plight of Black people and their political situation in South Africa. In giving the NAACP/Stevie Wonder Humanitarian of the Year Award to Steve Biko, I have given an award to a man who symbolizes the courageous struggle waged by Black people in South Africa. Steve Biko, however, was just one of the twenty million oppressed Blacks in South Africa. But, he is important, and I have chosen him as the Humanitarian of the Year because he more than any single individual has raised the consciousness of Black people both in South Africa and here in America. It is rare that a person receives an award solely because of who they are or for what they have accomplished.

In recognizing Steve Biko with the Humanitarian of the Year Award, I recognize all Black people in South Africa who have given their lives for freedom or who daily continue to fight against oppression. In recognizing Steve Biko, I have recognized more than a man, I have recognized a struggle. And despite the death of the man, the struggle will continue.

I would like to express my sincerest appreciation to Congressman Andrew Maguire for his efforts in delivering the award to the Biko family on my behalf, and for his recognition of the struggle of Black people in South Africa.

I had the honor of carrying with me to South Africa in July the NAACP award which I presented on behalf of the NAACP and I think, frankly, on behalf of all Americans, to the family and associates of Mr. Biko.

I met with Mrs. Nobandile Mvovo, the sister of Mr. Biko, who was detained last night without charges and without trial, and with Mr. Malusi Mpumlwana, one of Mr. Biko's associates in the black consciousness movement.

While the award was physically received by Mrs. Mvovo and Mr. Mpumlwana, the award was kept for presentation, on his release from detention, to Mr. Kenneth Rachidi, the most recent president until his banning on October 19 of last year, of the Black Peoples Convention, one of the organizations that Steve Biko inspired by his life and his work.

The Ad Hoc Committee on South Africa, which the gentleman and I have the honor to cochair is a group of more than 30 Congressmen who joined together in the wake of Steve Biko's death to form a group which would focus attention on and monitor developments in South Africa.

I think this would be an appropriate point to include the correspondence in the RECORD that we initiated with, first, the South African Ambassador to the United States, Ambassador, Sole, and subsequently with the Prime Minister himself.

I think many of us felt that if we had had such a group operating prior to Mr. Biko's confinement, his torture, the assault upon him bv the police, and his death, that he might, in fact, be alive today.

HOUSE OF REPRESENTATIVES,
*Washington, D.C., October 12, 1977.*

His Excellency DONALD B. SOLE,
*Ambassador, Embassy of South Africa, 3051 Massachusetts Ave., Washington, D.C.*

DEAR AMBASSADOR:

We, the undersigned Members of the House of Representatives, wish to thank you for meeting with a delegation of 11 of our colleagues on September 23 to express our concern over the death of Steve Biko. We greatly appreciate the opportunity to make our concerns known in a direct meeting between elected representatives of the American people and representatives of your government.

We share the delegation's disappointment that you did not agree with the suggestion that an independent international organization such as the International Red Cross, which has in the past been granted some access to your prisons, be allowed to conduct an autopsy on Mr. Biko's body to determine the cause of death. We were encouraged, however, by Counsellor Beukes statement that legal proceedings would establish beyond any doubt what happened in the Biko case.

We urge that the South African government reconsider its position against outside participation in an investigation of the circumstances of Mr. Biko's death. We also urge your government to seek a prompt and full judicial inquiry into all facts pertaining to the death of Mr. Biko, including fixing responsibility for his death.

We are equally concerned about the well-being of Mr. Peter Jones, the publicity secretary of the Black People's Convention, who was arrested with Mr. Biko in Grahamstown. There is no word as to the whereabouts of Mr. Jones—neither where he is being detained nor on what charges he is being held. In fact, one month after his arrest, Mr. Jones' mother is unable to obtain any information about the health or well-being of her son.

The press has reported that at least 20 other political detainees have died in detention in the past 18 months beginning with the death of Joseph Mdluli in March, 1976. We would appreciate a reply from your government detailing with regard to each of these previous cases: 1) The stated cause of death; 2) Whether an autopsy was conducted; 3) Whether an inquest was held; 4) Was the matter referred to a prompt judicial inquiry or verification by an impartial international body; 5) What information as to the cause of death, and responsibility for the death, was made public by your government; 6) Whether any administrative or criminal action was taken against any person who may have been responsible for or contributed to each death.

We share the Congressional delegation's concern that the Terrorism Act, and other laws, deny due process to thousands, indeed millions, of South Africans, white as well as black. The Biko case has clearly focused the world's attention on human rights in South Africa. We are concerned that in creating a separate class of political offenders, and by depriving them of due process of law, South Africa has created conditions which will lead to further deterioration inside South Africa and increasing isolation from other nations.

We therefore further urge the South African government to invite an appropriate public or private international body such as the Red Cross, the International Commission of Jurists, Amnesty International, or an appropriate body of the United Nations, to examine South Africa's laws and practices relating to detention and to make recommendations.

We, the undersigned, are firmly committed to our government's policy of furthering the cause of human rights internationally. We hope the South African government will display increased sensitivity to this issue.

We look forward to your early reply.

Thomas Downey, Edward Markey, Richard L. Ottinger, Morris Udall, Andrew Maguire, Helen Meyner, Bob Edgar, William Lehman.

EMBASSY OF SOUTH AFRICA,
*Washington, D.C., October 17, 1978.*

Hon. ANDREW MAGUIRE,
*Longworth House Office Building,*
*Washington, D.C.*

DEAR MR. MAGUIRE: I acknowledge receipt of your letter of October 12, signed by members of the House of Representatives, which you have addressed to me as a follow-up to our meeting on September 23. The contents of your letter have been brought to the attention of the appropriate authorities.

As regards your inquiry about Mr. Peter Jones, the only official information I have is that he has been detained in terms of the relevant provisions of South Africa's anti-terrorism legislation. However, while you state in your letter of October 12, ". . . one month after his arrest, Mr. Jones' mother is unable to obtain any information about the health or well-being of her son," it is noted in an earlier letter which you signed, dated October 7, that "Press reports indicate that Mr. Jones has been allowed to see his family recently."

With reference to your appeal to the South African Government ". . . to seek a prompt and full judicial inquiry into all facts pertaining to the death of Mr. Biko, including fixing responsibility for his death," the first step in terms of South African practice is the holding of the official inquest which will take place once the report of the team of pathologists who conducted the autopsy has been completed.

While anxious to be of assistance in responding to your enquiries, I do not believe that a constructive dialogue can take place as a follow-up to the meeting which I already had with you and several of your colleagues until the results of the autopsy are known and the Government's decisions thereanent have been announced—if the autopsy results indicate the need for additional action on the part of the Government.

Yours sincerely,

D. B. SOLE.

---

HOUSE OF REPRESENTATIVES,
*Washington, D.C., October 25, 1977.*

Hon. JOHN VORSTER,
*Prime Minister,*
*Government of South Africa,*
*Pretoria, South Africa*

MR. PRIME MINISTER: Enclosed you will find copies of a letter to Ambassador D. B. Sole dated October 12 and signed by 128 Members of the United States Congress—including important committee chairmen of the Armed Services, Banking, Judiciary and International organization such as the International from both the Democratic and Republican parties—together with the Ambassador's reply of October 17.

You will note that the Ambassador's reply is not responsive to most of the content of our letter, which prompts us now to write to you directly.

Specifically, the Ambassador's letter does not respond to our request for information on the 20 or more political detainees who have died in detention in the past 18 months. It does not tell us where Mr. Peter Jones is being held now and on what charges if any. It does not comment on our renewed suggestion that an independent international orgaization such as the International Red Cross be permitted to participate in ascertaining the facts with respect to the cause and the circumstances of Mr. Steve Biko's death. It does not comment on our suggestion that your government invite an appropriate public or private international body to examine and make recommendations on South Africa's laws and practices relating to detention.

Since our October 12 letter was written, your government has closed down newspapers and religious, social and cultural organizations and arrested or banned scores of additional people, including editors, writers, religious, and community leaders. We cannot but agree with the statement of the South African Institute of Race Relations that:

"This is an act of ruthless tyranny, it is an act insensate in its stupidity, tragic in its dimensions, and incalculable in the harm it does the people of this country, and the republic's international relationships."

We believe that even by South African standards the actions your government has taken do not represent an incremental change, but rather a major turning point in South African history. The pretense is gone; all that remains is the mailed first of repression based on the racist principle that blacks shall forever be ruled by whites, through whatever forms of tyranny are necessary. It is our judgment, therefore, that this must also be a major turning point in our bilateral relations and in South Africa's relations with the rest of the international community.

Mr. Prime Minister, a group of 29 Congressmen have formed an ad hoc group to monitor, using all possible sources of information, the identity, whereabouts and condition of all those people whom your government has detained without charges, without access to family or legal counsel, without due process of law, without any semblance of the rule of law. Should you choose to assure us and the world as to their numbers and identity, their whereabouts, safety, and condition, your intentions with respect to them, and any charges which have since been entered against them, we would appreciate receiving a listing of same.

ANDREW MAGUIRE.
TOM DOWNEY.

---

OCTOBER 27, 1977.

Hon. TOM DOWNEY, ANDREW MAGUIRE,
*Longworth House Office Building,*
*Washington, D.C.*

DEAR MR. DOWNEY AND MR. MAGUIRE: Please refer to your letter of October 25 to the South African Prime Minister, a copy of which you sent to me. I thank you for this courtesy and write to let you know that I am available for discussions at any mutually convenient time, should you so wish, under the understanding that, since you have now written directly to the Prime Minister, I cannot of course, prejudge how he will reply to your communication.

I would simply coment at this stage that your contention that it is South African government policy that "Blacks shall forever be ruled by whites, through whatever forms of tyranny are necessary" is completely contrary to my understanding of that policy.

Yours sincerely,

D. B. SOLE.

---

LONGWORTH HOUSE OFFICE BUILDING,
*Washington, D.C., July 25, 1978.*

The Honorable, MINISTER OF JUSTICE,
*Union Buildings, Pretoria,*

DEAR SIR: On behalf of the ad hoc Congressional Monitoring Group on South Africa and of the Lawyers Committee for Civil Rights under Law, I request the following information from you relative to the persons listed below:

1. Daniel Sechaba Montsisi
2. Jan Tugwane
3. Nana Ethel Sibeko
4. Joseph Thloloe
5. Sibongela Khubheka
6. Deborah (Debs) Matshoba
7. Sipho Pityana

I would be pleased if you would let me have the following information with regard to each of the persons abovementioned.

(i) The date on which each person was arrested and the place thereof;

(ii) The section and law under which the person is presently being detained;

(iii) When it is anticipated that the person will be brought to court and the nature of the charges that will be proferred against him/her;

(iv) What is the state of health of the persons concerned;

(v) Where each person is presently being detained.

As I will be in the Republic of South Africa until the 1st August, 1978 and if this information requested can be given to me before I leave the Republic you may communicate with me care of the United States Embassy in Pretoria, telephone 48–4266.

As the organizations abovementioned are particularly concerned about the fate of the persons named your urgent responses to this matter and answers to each of the questions requested will be appreciated.

I look forward to your responses.

Yours faithfully,

ANDREW MAGUIRE.

At this point in the RECORD, Mr. Speaker, if the gentleman from New York (Mr. DOWNEY) will permit, I would also like to insert some additional items, including an article summarizing my findings upon my return from my South African trip, an article that appeared in the Record, a New Jersey newspaper.

I would also like to summarize at some greater length in the RECORD the material included in the final chapter called "Indictment" in Donald Woods' book, "Biko."

The article follows:

[From the RECORD, Aug. 4, 1978]

MAGUIRE: PRESSURE SOUTH AFRICANS MORE

(By Bob Cunningham)

WASHINGTON.—Returning from a two-week tour of South Africa, Rep. Andrew Maguire said yesterday that the United States and American corporations with interests there should increase their pressure on that country's white minority government.

The Bergen Democrat said the students, black leaders, lawyers, and religious leaders he met confirmed tales of torture, mass killings, and unjust imprisonment of black South Africans.

"I am accusing the government of South Africa of suppressing and attempting to eliminate black leaders," Maguire said. "Whether we succeed in influencing that government or not, we ought to dissociate ourselves from it.

"I would like to level off our investments and pull back our involvements in a phased way so the government can see the consequences," he said. "In the past, our economic and political relationships have given them the feeling that they could continue what they are doing."

A spokesman for General Motors, which with Ford Motor Co. ranks behind three European and Japanese auto manufacturers in South African trade, said he doubted that companies would pull out of the country voluntarily. One reason is that other foreign manufacturers would take up the slack.

Maguire acknowledged that some South African leaders would rather do without United States trade than change their apartheid policies. He said other governments could also impose trade sanctions. Britain, for example, has more money invested in black African countries than in South Africa, and Maguire said it must protect those investments.

Maguire relayed one story told by a young man who said he had been in Soweto two years ago when hundreds of students were killed by police when they demonstrated against laws requiring that they be taught in Africaans, the language of the minority government.

The man said he had been standing beside a young girl who was shot by police. He did not know what to do with her body, Maguire said, so he asked the police.

"He was immediately himself locked up and kept for days," Maguire said. "Each day when the police vehicles would bring in young bodies, he was taken out to the spot where they were unloaded and stood there to watch. A policeman told him, 'That is what White Power does to Black Power.'

"This government is not a democracy," Maguire said. "It is in fact a police state with respect to nonwhite people. I left South Africa enormously discouraged about the future of the country. It is on a suicidal course."

The congressman has been following South African problems since his days as a student at London University's School of Oriental and African Studies. He also worked on African affairs at the United States Mission to the United Nations.

He was invited on the African tour by the World Peace Foundation because he is the coordinator of Ad Hoc Committee on South Africa in Congress.

Maguire presented a humanitarian award on behalf of the NAACP in memory of Steven Biko, the black South African leader who died in police custody last fall.

Biko's family did not accept the award but asked that it be given to another black leader, Kenny Rachidi, now in prison. An associate of Rachidi accepted the award.

Maguire was refused permission to visit jails, including the one in which Biko died.

Mr. Speaker, the material to which I referred is as follows:

6: THE INDICTMENT

Since the State has not seen fit to indict anyone for the death of Steve Biko, it becomes necessary to indict the State. By the State is meant, in this instance, the minority regime that has ruled South Africa for thirty years, with ever-increasing contempt for democratic values and with evergrowing arrogance toward all who hold such values to be paramount. And since the Nationalist Party government has consistently identified itself with the State, has claimed that it represents the State, and has accused its most zealous critics of being enemies of the State, let it now therefore be regarded as the personification of the State for purposes of indictment.

This means that the Vorster government and all its supporters bear the responsibility for what happened to Steve Biko.

But precisely who struck the fatal blows is relatively unimportant. All these men mentioned so far are petty offenders in the scale of outrage. The real killer was the System—and all its representatives involved in this tragedy. Two members of the Nationalist cabinet are most responsible for the circumstances under which Steve Biko died—Police Minister J. T. Kruger and Premier B. J. Vorster.

More than anyone else, these two men created the conditions, the climate of opinion, the statutes and the state of mind of the Security Police which led to this particular killing.

Just as Hitler's "Final Solution to the Jewish problem" was the ultimate consequence of earlier Nazi policy, so deaths such as those of Steve Biko are inevitably the appropriate result of the apartheid policy since its inception.

Having to wear a yellow armband and having to die in a gas-chamber at Auschwitz were but two links in the same chain of racism. These two links might have been at opposite ends of the chain—but the chain was the same. Having to carry a "pass" and having to die of assault in detention are similarly two links of the same chain.

If you feel impelled to enforce at all costs the wearing of armbands, you have to end up herding people into gas chambers. And if you feel impelled to enforce at all costs a separation of races, you have to end up killing people.

The death of Steve Biko requires a reaction of outrage to be shouted to the four corners of the earth. It has finally and incontrovertibly been established that the policy of apartheid is the most outrageous affront to all humanity that has ever been devised by collective decision since the dawn of procedural government.

The obscene laws which constitute apartheid are not crazed edicts issued by a dictator, nor the whims of a megalomanic monster, nor the one-man decisions of a fanatical ideologue. They are the result of polite caucus discussions by hundreds of delegates in sober suits, after full debate in party congresses. They are passed after three solemn readings in a parliament which opens every day's proceedings with a prayer to Jesus Christ.

There is a special horror in that fact.

It is the most contentious moral crisis in the world today, and those who refuse to interest or involve themselves in it are giving tacit approval to it. No human being of conscience can remain neutral in a moral crisis of conscience. Apartheid exists in definance of this and this is why, today, it has now become a real threat to world peace.

Apartheid is a carefully calculated, meticulously planned network of racist laws whose viciousness is equalled only by the deliberation of the process which gave birth to each one of them. The Vorster government should not boast of South Africa's long tradition of parliamentary lawmaking. The fact of that trading does not mitigate apartheid; it condemns it all the more.

One of the final claims made in its favor by the Nationalist government is that South Africa has a fair system of administration and justice and an independent judiciary. This claim, also, is no longer true. The Nationalists have finally destroyed the entire basis of the system of law inherited in 1948 from the Roman-Dutch legal tradition. All that is left is a tiny vestige of that once-proud legal tradition.

It is true that any South African citizen can still win a civil or criminal case—provided one has a great deal of money; one has the right judge and magistrate; and one is free to institute such proceedings. Today there are few independent judges or magistrates in South Africa where political cases are concerned.

Police, magistrates, judges, prosecutors, few indeed are completely free to pursue objective standards of justice. Most judges in South Africa adhere to the belief that their function in regard to statute law is so'ely to interpret and apply it—which means in effect, in many cases, to implement apartheid regardless of the principles of justice.

Apartheid is not simply a regrettable localized aberration of importance only to South Africa. It is a universal moral crisis and no nation can in conscience stand back and adopt a neutral or passive attitude to it. Apartheid is an affront to every single member of the family of mankind.

Apartheid is therefore a challenge to every citizen of every country on earth. It is a challenge that should be met with all the ingenuity and idealism of which all people of principle are capable.

If I could speak to every person on this globe, I would speak of my friend Steve Biko, who died naked on the floor of a prison cell after suffering torture and torment at the hands of men who represent an especially horrible form of evil—the evil of racism, which inflicts hatred and rejection upon its victims for being born with a dark skin. I would tell of how the society that bred such a system then exonerated his killers, condoned the laughter with which their superiors greeted the news of his death, and voted the man chiefly responsible for it back into office with an increased majority.

I would tell of how Steve Biko's death, although especially tragic for me, was by no means the first of its kind in South Africa, nor the last, and that it was but the most publicized, most heightened dramatization of the ultimate effect of unbridled apartheid.

Steve Biko's death could be regarded as a symbolic representation of the sufferings of all black South Africans under the apartheid system. His death was physical. Most of the deaths caused by apartheid are spiritual. There are countless deaths of morale and hope and self-esteem.

For many of his fellow-citizens, Steve Biko ended such deaths of morale. He shattered many of the psychological bonds that used to shackle young blacks in South Africa. In terms of the spiritual self-esteem of young blacks in South Africa, particularly, he was a breaker of chains.

Perhaps that, far more than any other, was the reason why the System killed him.

Mr. Speaker, the gentleman from New York (Mr. DOWNEY) and I have shared a concern about U.S. policy toward South Africa in the light of these events and all we know about what is going on there, and we have shared a concern about the expression of U.S. interests.

Mr. Speaker, I do not know whether this is the time really to pursue a lengthy discussion of that matter, but I know the gentleman shares my concern that the U.S. Government has not done nearly enough to match its words with action.

Mr. DOWNEY. Mr. Speaker, I think the gentleman from New Jersey (Mr. MAGUIRE) is absolutely correct.

As was pointed out in a detailed study done by the Foreign Relations Committee of the other body on American involvement, there is, for instance, the loan exposure. The loan exposure of American banks and other interest amounts to more than $2.2 billion, and that has in fact since 1970 helped fuel the arms buildup in South Africa and has helped the South African Government to acquire numerous weapons from abroad.

I do not think there is any question, from conversations I have had with South African black leaders, as well as from conversations that the gentleman from New Jersey (Mr. MAGUIRE) has had, that they would like to see an end to this American involvement, and that they full well recognize that the 70,000 or more blacks who are employed and who receive better wages than the average black in South Africa will be the first to suffer in the event that the United States should remove its presence, both privately and publicly, in South Africa.

But they see that as one of the prices that they must pay to achieve the sort of regime in which they would be able to participate fully.

Mr. Speaker, I want to make one other point with the gentleman. We have often heard it stated on this floor that we single out South Africa while on that continent there is a host of other countries in which human rights are systematically trampled under foot, and that it is unfair and unreasonable to select South Africa as a whipping boy. People will cite the Central African Republic

and the preposterous regime of Mr. Amin in Uganda.

I would like to know how the gentleman from New Jersey (Mr. MAGUIRE) responds to these arguments. I simply respond by saying that this is a society in which there is a Dutch and English tradition, a tradition of freedom and a tradition of law, and when a society has those traditions, one expects a great deal from it. But they have not lived up to those traditions, and it is preposterous to hold one's self out as a 20th century democracy and yet continue a policy of apartheid.

I would be curious to know how the gentleman from New Jersey responds to people who ask: "Why single out South Africa when there are so many other countries on that continent that deprive individual citizens of their basic human rights?" Could the gentleman offer us his feelings on that subject?

Mr. MAGUIRE. Mr. Speaker, if the gentleman will yield further, I would certainly be glad to do that.

I think the answer is that South Africa is the only country on the face of the Earth in which institutionalized racism, enshrined in law and backed by force, is the determining factor in every aspect of the life of the country. South Africa is utterly unique in that respect.

I might again refer to Donald Woods and quote him as follows:

> The death of Steve Biko requires a reaction of outrage to be shouted to the four corners of the earth. It has finally and uncontrovertibly been established that the policy of apartheid is the most outrageous affront to all humanity that has ever been devised by collective decision since the dawn of procedural government.

Mr. DOWNEY. Mr. Speaker, I think that rather summarizes it well.

Is the gentleman from New Jersey (Mr. MAGUIRE) desirous of using more time?

Mr. MAGUIRE. Mr. Speaker, I would like to add just one or two more things, if the gentleman will permit.

Mr. DOWNEY. I yield to the gentleman from New Jersey.

I think it would be appropriate to include at this point in the RECORD a copy of a letter which was sent by the gentleman and myself, and a number of other Members of Congress, just a few days ago, to the President of the United States, Mr. Jimmy Carter, with respect to the proposed destruction of Crossroads. In addition to the signatures of the gentleman from New York (Mr. DOWNEY) and myself, the following letter contains the signatures of the gentleman from Iowa (Mr. HARKIN), the gentleman from Michigan (Mr. CONYERS), the gentleman from Massachusetts (Mr. TSONGAS), the gentleman from Michigan (Mr. BRODHEAD), the gentleman from Minnesota (Mr. FRASER), the gentlewoman from New Jersey (Mrs. MEYNER), the gentleman from New York (Mr. OTTINGER), the gentleman from California (Mr. EDWARDS), the gentleman from Pennsylvania (Mr. EILBERG), the gentleman from Ohio (Mr. STOKES), the gentleman from Iowa (Mr. BEDELL), the gentleman from New Jersey (Mr. HOLLENBECK), and the gentleman from Massachusetts (Mr. MARKEY):

AUGUST 21, 1978.

President JIMMY CARTER,
*The White House,*
*Washington, D.C.*

DEAR PRESIDENT CARTER: The South African government is once again about to demonstrate its lack of concern for basic human rights of the black residents of its country. We are informed that soon bulldozers will demolish the peaceful squatters' community of Crossroads, in Capetown.

Crossroads is the home of over 20,000 blacks who have developed the area into their own community, with their own schools and facilities. These families live quietly. Some people work in Capetown's industries, but because of government policy few jobs are available to blacks, and those that are are in unskilled menial positions.

The government plans to relocate these people either in homelands many miles away or to let them live in the surrounding sand flats. Their 3,000 "pondokkies" (shanties) will be obliterated by bulldozers.

One leader of the Congressional Ad Hoc Monitoring Group, Congressman Maguire, recently visited Crossroads and returned convinced of the importance of its existence. We believe that although it may be too late for the United States to intervene in the situation, it is important for the United States to respond to this atrocity through high level expressions of concern. Many times your administration has voiced its disapproval of the repressive policies of the South African government. But the United States must act on this disapproval. This is only one in a chain of oppressive events which we cannot allow to continue.

On Friday, August 18, you were sent a copy of a telegram Congress Maguire sent to Prime Minister Vorster expressing his concern for the Crossroads situation. We hope that you will also convey your concern for this most recent atrocity, and that you will keep it in mind as you continue to refine our policy towards South Africa.

Sincerely,

ANRDEW MAQUIRE.
THOMAS DOWNEY.

In addition, I sent a telegram to Prime Minister John Vorster, as follows:

Mr. Prime Minister: During my recent visit to South Africa I visited residents of the community called Crossroads in Capetown. They told me of the plans to destroy the community and send the people to live in Homelands. I now learn that you intend to go ahead with the plans to bulldoze the community next week. I am appalled at the idea of the destruction of this peaceful community where over 20,000 blacks have lived during the past 20 years. This action will destroy thousands of families and ruin thousands of lives. It should not be allowed to occur. The destruction of Crossroads is an outrage to humanity. I want to inform you that many members of Congress have joined me and Representative Thomas Downey and the ad hoc monitoring group on South Africa, which we co-chair, in alerting President Carter to this action. This is another in the series of repressive actions committed against blacks in South Africa. Be assured that we will continue to monitor the acts of your government closely, and that we will do all that w- can to inform the American people of the continuing deprivation of human rights which continues to occur. Congressman Andrew Maguire.

We are on the verge of yet another South African tragedy. We have written you previously about the squatters community of Crossroads, outside of Capetown. This village, which is the home of over 20,000 Africans, may soon be destroyed.

It is the policy of the South African Government that certain areas of the country be reserved for white occupation only. African workers are forced to migrate great distances and to leave their families for long periods of time, in order to work. They are paid substandard wages and are refused Government assistance in finding housing. Often, their only housing choice is a dormitory with up to 30 other men in one room. They are able to see their families only 3 weeks during the year.

Crossroads was established in 1975 for squatters who have lived, on the average, in the western cape region for over a decade. Some Crossroads residents have lived around Capetown for over 25 years. Most of the residents moved to the community after being evicted from squatters' camps in the area.

They moved to Crossroads to be able to live with their wives and children. In June 1976, Crossroads was recognized as an "emergency camp." Water lines leading to a communal tap were installed, a health clinic was set up, and basic refuse removal began. The settlement now has two schools, with classes, arts groups, sports clubs and cooperative self-help programs. Over 73 percent of the men at Crossroads and 25 percent of the women are formally employed. Informal employment adds another 11 percent of the men and 20 percent of the women. The residents of Crossroads are gainfully involved in the prosperity of the Capetown region.

Yet the residents are also under constant torment and harassment. Just last week, the South African police moved in and arrested over 400 residents. The government tries constantly to force them to leave their homes to return the women to the "Homelands." But the residents have vowed to remain until they are physically removed from their homes.

More often than not, a squatters' camp is a sordid and dismal place for a human being to be forced to live. In Crossroads, as in all other squatters' camps, the community exists to serve the basic human needs of a family—the basic need of sharing human life with those one loves. But Crossroads is also something different. The residents have made a courageous attempt to convert something of baseness into something of beauty. Plans for the introduction of sanitary facilities and for urban development were begun to make the intolerable slightly more adequate.

Crossroads' flourishing existence speaks with great clarity of the resolve of human dignity and the decency of these people. Its imminent destruction speaks with the same clarity of the stupidity and cruelty of human folly and of the fear of the government leaders.

The South African Government says that there is nothing that can be done to save Crossroads. Perhaps they are right. But we must meet this forthcoming action of the South African Government with an even stronger resolve toward an American policy calling for full political participation of all groups and an end to oppression and racial discrimination in South Africa.

So, on this, the anniversary of the death—while in detention—of Steve Biko, we honor the contribution he made to the black consciousness movement in South Africa, and add our voices to the

growing clamor against the apartheid policies of the South African Government.

Mr. Speaker, I thank the gentleman very much for his forebearance, and I appreciate the opportunity to participate in his special order.

Mr. DOWNEY. Mr. Speaker, let me just say to the gentleman that it is my privilege to be associated with him. He is a constant and vigilant reminder of what it is we have come here to serve in this House of Representatives, and I think that the 1 hour and 15 minutes that we pay homage to one of the great world leaders is very little time to spend indeed.

Mr. Speaker, I thank the gentleman for his thoughtful presentation. It is a fitting tribute.

I want to take a few moments and join my colleagues in some personal reflections about the death of Steve Biko who died 1 year ago at the hands of South African security police.

Steve Biko's death was both a personal and political tragedy for South Africa. As Ambassador Young stated at the time "no nation can afford to lose its most dedicated and creative leadership and yet prosper."

Steve Biko was a moderate South African leader whose crime in the eyes of the Nationalist Government was that he believed that blacks and whites are equal. For preaching those beliefs, he died.

Based on my limited experience with South Africa I believe that time is running out for a peaceful racial settlement in that country.

The Nationalists are reaping what they sow. A systematic attempt to wipe-out the emerging black leadership, regardless of political persuasion, will only guarantee guerrilla warfare in South Africa. For example: the 1963 Sharpsville massacre helped force the African National Congress, for 50 years a nonviolent expression of black rights, into taking up arms. The 1976 Soweto uprising saw thousands of young blacks flee the country for guerrilla training. The 1977 death of Steve Biko and the October 19 mass arrests sent more blacks across South Africa's borders into guerrilla camps.

As we reflect on the death of Steve Biko today, I think it is also important for us to reexamine the U.S. role in South Africa. Sadly, we are not a force for change. Within a few weeks a black squatter community of some 20,000 people outside of Cape Town will probably be razed. When it is, U.S.-made bulldozers guarded by Army jeeps manufactured by Ford Motor Co. will probably be in evidence. What inference is the black South African supposed to draw from this? U.S. economic and political ties only serve to prop-up the racism South African Government against 18 million blacks and 3 million nonwhites.

Steve Biko's death a year ago was certainly a watershed for South Africa. His tragic death signaled that the security police would stop at nothing to suppress black political leadership. I hope that Steve Biko's death represents a benchmark here in the United States too. I think that it is past time that we stop U.S. export-import loan guarantees to South Africa. It is past time that we started limiting U.S. investment in South Africa. The Carter administration must exert strong pressure on South Africa to save the Cape Town Crossroads community.

The lesson of Steve Biko's death is that the future foreign policy of the United States must learn from its past mistakes. Benevolent cries of protest will not stop South African police from killing future Steve Bikos. The United States must begin to exert real political and economic pressure on South Africa or Steve Biko will have died in vain.

● Mr. ANDERSON of Illinois. Mr. Speaker, I am pleased to join in this special order of the gentleman from New Jersey (Mr. MAGUIRE) to commemorate the first anniversary of the mysterious death of Steve Biko in a South African prison. We take this occasion not only to mark the anniversary of the death of the black, South African youth leader, but to help refocus American and world attention on the intolerable conditions in South Africa's apartheid society which surrounded the detention and death of Steve Biko.

Steve Biko and other youth leaders were rounded up and detained following the South African Government's brutal reaction to the peaceful demonstration by Soweto school students on June 16, 1976, against instruction conducted in Afrikaans. The Soweto massacre and immediate aftermath left 600 Africans and coloureds dead. The death of Steve Biko last year only accelerated popular protests against the South African Government's policies. On October 19, 1977, the Government took sweeping measures to repress all dissent by closing down newspapers, outlawing various peaceful, religious and social groups, and detaining and banning South African white and black citizens opposed to apartheid.

The reported arrest yesterday of Steve Biko's sister and her friends, and the imminent destruction of the squatters community of Crossroads, are but further evidence that the South African Government is stepping up its suppression of basic human rights in that country.

Mr. Speaker, I would remind my colleagues that last October 31 this body voted overwhelmingly, 347 to 54, for a resolution denouncing these repressive acts committed by the Republic of South Africa. That resolution went on to urge the President "to take effective measures against the Republic of South Africa in order to register the deep concern of the American people about the continued violation of human rights in that country."

Let us take the occasion of this first anniversary of Steve Biko's death to rededicate ourselves to the eradication of such human rights violations wherever they may occur, and especially to the cause of racial peace and justice within South Africa. Hopefully, our continued vigilance and voice will encourage the forces of reason and moderation within South Africa to reverse this trend of repression and being the march toward full equality for all that country's citizens.●

## GENERAL LEAVE

Mr. DOWNEY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include therein extraneous matter, on the subject of the special order today of the gentleman from New Jersey (Mr. MAGUIRE).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

## THE NOISY AIRCRAFT BILL DECIBELS OF JOY TO THE AIRLINES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. VANIK) is recognized for 5 minutes.

Mr. VANIK. Mr. Speaker, when the rule on the Noisy Aircraft Revenue and Credit Act is considered tomorrow, it should be voted down so that an open rule could be adopted to provide for a full and proper analysis of the proposal. The modified closed rule "protects" the $3 to $4 billion trust fund giveway from any meaningful review.

First of all, the revenue loss from the trust fund estimated at $3 billion—will probably exceed $4 billion. Increased airline passenger use and higher revenues will boost the give-away to the airlines to well over $4 billion.

The FAA has estimated that the cost of compliance with noise regulations by 1984 will cost under a billion dollars—about 950 million. Why give the airlines 400 percent more than will be needed for noise retrofit?

The airlines will buy new planes for expansion of their fleets but not for compliance. The credit for new plane purchases is not contingent upon the retirement of noisy aircraft which will fly the friendly skies until 1985 or until they disintegrate with decibel shock.

According to the Air Traffic Association, $2½ billion Federal dollars will be spent to replace 414 DC–8's and 707's with new planes. The old planes have an average age of 18 years by 1985. For tax purposes these planes were written off 8 to 10 years ago. The CAB predicts that all of these planes will be retired by 1985 simply because they are no longer economic. These planes would have to be phased out by obsolescence—even if the noise regulations were dropped. The noisy aircraft revenue and credit bill simply pays the airlines to do what they must do in any circumstance.

Economic reasons mandate the purchase of new aircraft. Escalating costs of energy demand greater fuel efficiency. Without this $4 billion bonanza, America's airlines would move forward on their plane purchase orders.

The commercial airline industry in America has never been in better health. Planes are filled in all directions, profits are soaring: capital for investment is increasing. This is not a failing industry which requires an infusion of $4 billion Federal taxpayer dollars. This legislation constitutes an aid program to one of America's healthiest industries. If we do

this for the arilines—who will be next in line for Federal largess.

The case has not been made for a $4 billion gift to the commercial airline industry.●

## PERSONAL EXPLANATION

(Mr. MIKVA asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. MIKVA. Mr. Speaker, I was unable to be present on the House floor for rollcall votes 715 through 743, because of prior commitments in the 10th Congressional District. Had I been present I would have voted as follows.

On Thursday, August 17: "Yes," on rollcall 715, the conference report on H.R. 13467, the Supplemental Appropriations Act; "No," on rollcall 716, a motion to recede and concur in Senate amendments to the supplemental appropriations bill to provide funding for the new Senate office building; "Yes," on rollcall 717, conference report on H.R. 12935, Legislative Branch Appropriations; "Yes," on rollcall 718, conference report on H.R. 12927, DOD military construction appropriations; "Yes," on rollcall 719, the conference report on H.R. 13468, District of Columbia Government Appropriations; "Yes," on rollcall 720, the conference report on S. 9, Outer Continental Shelf Lands Act Amendments of 1978; "No," on rollcall 721, the conference report on H.R. 12240, Intelligence Authorization; "Yes," on rollcall 722, rule providing for consideration of the U.S. Railway Association appropriations; and "Yes," on rollcall 723, H.R. 10898, the U.S. Railway Association appropriations.

On Wednesday, September 6: "No," on rollcall 725, the Treen amendment to the Civil Rights Commission Authorization Act, prohibiting the Commission from investigating abortion issues; "Yes," on rollcall 726, the New York City aid appropriations, House Joint Resolution 1088; "No," on rollcall 727, McClory amendment to the Foreign Surveillance Act, allowing electronic surveillance of non-U.S. persons with the certification of the Attorney General; and "No," on rollcall 728, the Ertel amendment to the Foreign Surveillance Act, eliminating language providing for a special court to have jurisdiction over orders of surveillance.

On Thursday, September 7: "No," on rollcall 731, the motion to agree to the Senate amendment to the Treasury-Postal Service appropriations bill, prohibiting the imposition of oil import fees; "No," on rollcall 733, the Kemp amendment to the Foreign Surveillance Act that sought to require the President to inform both House and Senate Intelligence Committees when he has reason to believe that an individual with diplomatic immunity is engaging in electronic surveillance in the United States; "No," on rollcall 734, the amendment to the Foreign Surveillance Act in the nature of a substitute that sought to strike the requirement for obtaining a warrant for electronic surveillance; "No," on rollcall 735, on reconsideration of the amendment by Representative MCCLORY to the Foreign Surveillance Act. That was passed the previous day by a 178 to 176 margin (the amendment dealt with electronic surveillance of non-U.S. persons); "No," on rollcall 736, the motion to recommit H.R. 7308, the Foreign Surveillance Act, to the Select Committee on Intelligence; "Yes," on rollcall 737, final passage of H.R. 7308, the Foreign Surveillance Act; "Yes," on rollcall 738, to resolve into the Committee of the Whole for further consideration of Civil Service Reform Act, H.R. 11280; and "Yes," on rollcall 739, to table the motion to reconsider the previous vote, rollcall 738.

On Friday, September 8: "Yes," on rollcall 740, the rule under which the bill H.R. 11711, Adjustment Assistance Act; "No," on rollcall 741, the motion to recommit the Hawaiian Natives Claims Act; "Yes," on rollcall 742, the committee amendment providing for an alternative eligibilty requirement which permits workers to qualify on the basis of 40 weeks of employment in one or more trade-impacted firms in the preceding 2 years; and "Yes," on rollcall 743, final passage of H.R. 11711, Adjustment Assistance Act.

On Monday, September 11: "Yes," on rollcall 749, the Leach amendment to the civil service reform bill, that set a statutory ceiling on the total number of Federal employees in the executive branch; "No," on rollcall 750, the Collins amendment that sought to permit the FBI to place 140 positions in GS 16–18, without regard to the provisions placing limitations on executive level positions; "No," on rollcall 751, the Erlenborn amendment to the civil service reform bill, that sought to strike the labor-management and employee relations language from the bill: and "No," on rollcall 752, the motion that the Committee of the Whole House rise and report the bill H.R. 11280 back to the House, with the reconsideration that the enacting clause be stricken.●

## POLITICAL STATUS OF PUERTO RICO

Mr. CORRADA asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. CORRADA. Mr. Speaker, the Decolonization Committee of the United Nations is currently considering the case of the political status of Puerto Rico. At the insistence of Cuba this debate has become a yearly affair since 1972.

In an excellent and comprehensive testimony, the Governor of Puerto Rico, the Honorable Carlos Romero-Barceló, enunciates our position that the Decolonization Committee has absolutely no right or power to intervene in what is, in reality, an internal matter between the people of Puerto Rico and the United States. Governor Romero-Barceló has already announced that a plebiscite on the political status issue will be held after the 1980 general election. The true actors in this matter will be our people, Congress, and the President and not the United Nations.

Mr. Speaker, I include Governor Romero-Barceló's testimony before the Decolonization Committee of the United Nations in the RECORD and reprinted in full:

TESTIMONY BY THE HONORABLE CARLOS ROMERO-BARCELÓ, GOVERNOR OF PUERTO RICO

Mr. Chairman, members of the Committee: My name is Carlos Romero-Barceló. I am the Governor of Puerto Rico, elected to a four-year term by the people of Puerto Rico on November 2, 1976.

In 1946, during the United Nations' first full year in existence, the United States of America offered voluntarily to submit annual reports on the status of its non-self-governing territories, in keeping with the spirit of Article 73 of the United Nations Charter. Those territories then included Alaska, Guam, Hawaii, Puerto Rico, American Samoa, and the United States Virgin Islands. Annual reports on Alaska and Hawaii were discontinued upon their admission in 1959 as the forty-ninth and fiftieth of the United States of America.

A quarter of a century ago, the United Nations Committee on Information from Non-Self-Governing Territories—also known as the Fourth Committee—determined that the people of Puerto Rico enjoyed a full measure of self-government. In response to that determination, the United Nations General Assembly, at its Eighth Session, adopted on November 27, 1953 its Resolution 748, wherein it relieved the United States of America from any responsibility for filing annual reports concerning Puerto Rico's political status, and wherein the General Assembly declared that, and I quote, "in the framework of their Constitution and of the compact agreed upon with the United States of America, the people of the Commonwealth of Puerto Rico have been invested with attributes of political sovereignty which clearly identify the status of self-government attained by the Puerto Rican people as that of an autonomous political entity." End of quote.

That was twenty-five years ago.

Since then, the people of Puerto Rico have elected a total of five different men from among two different political parties to lead them as Governor. During that interval, the people of Puerto Rico have also held a plebiscite on their political status.

During that period of time, not one of the island's five governors has come before any instrumentality of the United Nations to register a complaint against the United States, nor to request any review or reconsideration of Resolution 748 of the Eighth General Assembly Session. Indeed, until today, no Governor of Puerto Rico had ever formally approached the United Nations on *any* matter related to our island's relationship with the United States.

Nevertheless, despite the absence of any initiative on the part of any duly elected Government of Puerto Rico, your Committee has since 1972 been discussing "the Puerto Rico question" on a regular basis.

These discussions have been held at the behest of an adversary of the United States, in support of a political faction in Puerto Rico whose electoral strength has remained at less than seven percent of the voting public for two decades.

During our twenty-five years as a community enjoying "a full measure of self-government," Puerto Rico's democratic institutions have received the enthusiastic support of the island's inhabitants. From three to six political parties have appeared on the ballot in each general election. An average of four-fifths of Puerto Rico's eligible voters have participated in each election. Both men and women possess the right to vote, and in 1970 the minimum voting age was lowered from twenty-one to eighteen years.

But perhaps the most eloquent demonstration of the strength and integrity of Puerto Rico's democratic system of government has been the fate of incumbent Administrations: in each of the last three quadrennial elections held in Puerto Rico, the political party in power has gone down to defeat; moreover, the last five elections in Puerto Rico have elevated no less than five different men to the governorship, even though the Puerto Rican Constitution permits an incumbent Governor to seek re-election to an indefinite number of terms. And I might add that each change of Administration was effected lawfully and peacefully.

As we survey the Puerto Rican people's aggressive and responsible exercise of their electoral prerogative over the past quarter-century, one highly significant fact stands out clearly: each and every time the Puerto Rican people have removed from office an incumbent Governor and/or political party, they have chosen a new Governor and/or political party which, like their predecessors, firmly espoused the principle of permanent union between Puerto Rico and the United States of America.

In each of these elections, candidates advocating Puerto Rico's independence participated freely, energetically, and without constraint. And in each election they were resoundingly defeated. In 1976, even the local Communist faction took its case to the electorate. Calling itself the Puerto Rico Socialist Party, it campaigned throughout the island, yet won only seven-tenths of one percent of the total vote, and elected no candidates. The non-Communist Puerto Rico Independence Party elected two Representatives and one Senator in 1972, but lost all three seats in 1976.

Just as is the case in Puerto Rico, I am confident that virtually all of the twenty-four nations here represented contain within their borders political factions which are firmly opposed to the policies of the government in power. As is not the case in Puerto Rico, however, opposition political factions in some of these twenty-four nations are severely inhibited—and in some instances officially prohibited—from working openly and freely to enlist broad public support for their causes, and from seeking peacefully to have the ruling party removed from power.

Should an opposition faction within any of the twenty-four nations here represented solicit the assistance of a foreign power in bringing its case before the United Nations, I strongly suspect that the government of the nation in question—regardless of its political system, regardless of its economic system, regardless of its alignment or non-alignment vis-a-vis the major world powers—would firmly oppose United Nations involvement, on the grounds that the matter at issue constituted a strictly internal affair, over which no international body whatsoever had any claim to jurisdiction.

Nevertheless, this Committee has repeatedly agreed to entertain discussion of the political status of Puerto Rico under precisely the above circumstances: the separatist political faction in Puerto Rico has solicited the assistance of a foreign power—in this case Cuba—to urge United Nations intervention in the internal affairs of the people of Puerto Rico.

All five elected Governors of Puerto Rico have until now abstained from involvement in these discussions. We have done so because we too recognize the issue to be strictly an internal matter, to be debated and resolved within Puerto Rico itself, in consultation with the Government of the United States, the nation of which we are all citizens.

Among the five elected Governors of Puerto Rico, there is no unanimity of opinion as to what our island's ultimate political destiny should be; we differ considerably among ourselves on both large and small aspects of the question. We are, however, fully in agreement regarding the capacity of the Puerto Rican people to reach a final decision independently. Moreover, we recognize that a decision of such magnitude not only can be reached independently, but must be reached in such a manner, if it is to be valid and permanently binding upon the people of our island.

If, as is true, we have not yet reached a final decision, then the responsibility for our inaction lies with us and with us alone. We have the means to change our political status. Whether and how we shall use those means is for us and us alone to decide. All three political status alternatives—statehood, independence, and commonwealth—appeared on the ballot in our 1967 plebiscite, and Puerto Rico's voters elected to retain commonwealth status. I have publicly stated on numerous occasions that I believe a new plebiscite should be held after the 1980 general election, to allow our people to express themselves once again. And if I am re-elected to the governorship, the holding of such a plebiscite will be a firm commitment of my Administration's second term.

So long as we continue to possess the means to determine our own destiny, however, we shall neither welcome nor tolerate outside interference in this ongoing process.

So it is that I come before you today not to request that you intervene, but rather to explain why I believe you should not even consider attempting to intervene.

I come before you in the knowledge that most of you are devoting your time and energy to the Puerto Rican question with the best of good intentions. I am sure you are all aware of the ulterior motives that have prompted one member of your Committee to bring this issue before you. Nevertheless, I have no doubt that most of you are acting in the best of faith in giving it your consideration. I thank you for that, despite my firm conviction that intervention by this Committee is neither necessary nor appropriate, and is totally unacceptable to the people of Puerto Rico.

In the past, this Committee has reaffirmed Puerto Rico's right to self-determination. No one in Puerto Rico—myself included—disputes that principle, so long as it is clearly understood that the concept of self-determination includes the right to move from commonwealth to statehood as well as the right to move from commonwealth to independence.

Were I to conclude that Puerto Rico were in any way being impeded from exercising its rights to self-determination, then I would not hesitate for a moment to seek the support of this Committee, or any other responsible international institution, in helping our people to re-establish beyond doubt our right to self-determination.

I have the highest admiration for the United Nations. It is a pioneer confronting enormous obstacles in a slow and painful quest toward a goal upon which hinges the survival of our species: peaceful cooperation and coexistence among the enormously diverse peoples and philosophies which exist in ever-increasing interdependence upon this planet. As must be expected in a pioneering venture, tangible progress has been achieved neither easily nor quickly. In its finest hours, the universal human emotions which fuel this noble institution are hope, purposefulness, and good will. All three are indispensable if it is to succeed in its mission. Both now and in the future, I shall always be available to contribute whatever I can to further the goals so eloquently set forth in the United Nations Charter.

Indeed, it is in part for that very reason that I appear before you now: in the hope that I may perhaps be of assistance to you in your important work.

Setting aside for a moment the hemispheric rivalries and/or international ideological struggles which, in reality, we all know are responsible for the presence of the Puerto Rico issue on the agenda of this Committee, allow me to examine with you now the seemingly legitimate concerns that might prompt those who are truly impartial members of this Committee to regard the Puerto Rico question as a matter worthy of study on its own merits.

Basically, I submit that these concerns are three.

Foremost among them, without doubt, must be the undeniably ambiguous nature of the island's present political status. Neither a sovereign nation nor a fully integrated unit of the United States of America, Puerto Rico occupies an ill-defined middle ground, which might understandably arouse the curiosity—if not the suspicion—of an impartial international observer.

Coupled with this is the apparent imbalance in political leverage between a medium-sized Caribbean island and a continental super-power. Here again, the disinterested outsider might understandably have occasion to wonder whether the smaller partner in this relationship could truly be at liberty to chart its own course toward a final political destiny.

And finally, there are obvious cultural and linguistic disparities, which might prompt the observer to wonder whether there can really be an authentic social, psychological, or spiritual basis for the existence of a harmonious political union between Puerto Rico and the fifty existing United States.

To the above points I should add a fourth consideration: that there is evident dissatisfaction with the status quo among the people of Puerto Rico themselves. At these hearings will appear Puerto Ricans of widely differing viewpoints: yet most, if not all, of them will agree that Puerto Rico's current political status does not in its present form adequately fulfill the legitimate aspirations of the Puerto Rican people.

Given the above facts, I can readily appreciate that a fair-minded member of this Committee could reasonably conclude that the case of Puerto Rico might well merit investigation.

Indeed, I myself am on record to the effect that Puerto Rico's relationship with the United States retains vestiges of colonialism.

Yet I do not come before you to solicit your intervention.

Why?

Because I believe such intervention can never be either appropriate, relevant, or in the least degree effective until and unless it can be demonstrated that Puerto Rico lacks the wherewithal to freely determine its own destiny.

For most of this decade, this Committee has annually given consideration to the political status of Puerto Rico. Yet at no time has this Committee undertaken to investigate firsthand the extent to which the Puerto Rican people have the capacity to exercise for themselves their inalienable right to self-determination.

I cordially invite this Committee to conduct just such an investigation. I cordially invite the delegates of each nation here represented to visit Puerto Rico. Come whenever you wish; stay as long as you like; talk to whomever you please; study our institutions for yourselves.

The Government of Puerto Rico does not fear the consequences of such an inspection. On the contrary, we would welcome it.

If you come, you will hear a variety of opinion, just as you will hear a variety of opinion during these hearings. That is because Puerto Rico is an open society, in which every citizen is entitled to express himself, and in which any citizen or group of citizens is entitled to work peacefully to effect change.

We have no illusions, however. We are all aware that Puerto Rico is an imperfect so-

ciety, as is every society of human beings in every community on earth. Nevertheless, we are a people who take great pride in the progress we have made—economically, politically, and socially—during the twentieth century.

It is no accident that Puerto Rico's per capita income and standard of living are markedly higher than those to be found anywhere else in the Caribbean, or in Central or South America. Despite our island's very high population density of more than nine hundred persons per square mile, despite our severe shortage of mineral resources, and despite the massive poverty which existed in Puerto Rico only a few decades ago, we have in recent years emerged as a people blessed not only with free institutions of government, but also with the extraordinary increase in prosperity that only hard work and a private enterprise economy can make possible.

Today, each child born in Puerto Rico has a statistical life expectancy that actually exceeds that of the average American citizen born elsewhere in the Nation. Moreover, the per capita enrollment of our young people in colleges and universities exceeds the United States national average.

Puerto Rico's spectacular advances in health care, in education, in economic opportunity, and in democratic self-government have been accomplished by the Puerto Rican people themselves, through our determination to leave to our children and grandchildren a better way of life than we ourselves knew as children and young adults.

Because of Puerto Rico's small size, dense population, and limited resources, much of our recent progress would have been extremely difficult, if not impossible, to achieve without the friendship and cooperation of fellow American citizens from other parts of the Nation, and without the comprehension and financial support of the United States Government.

The Puerto Rico of today is still not especially wealthy; we are not mighty; our people do not live in total internal harmony. Nevertheless, ladies and gentlemen, we do enjoy, individually and collectively, the basic human rights which define a free society. And believe me, the people of Puerto Rico appreciate with every fiber of their being how rare and how precious a blessing freedom is.

Moreover, we know why we are free.

We know that we are free precisely because we are natural-born citizens of the freest and most open and most culturally diverse nation in the history of mankind: the United States of America.

We are free, if we so desire, to continue enduring the vestiges of colonialism that characterize our so-called commonwealth relationship with the United States. We are free to declare ourselves an independent nation, and to have that decision respected by the United States. And we are free to incorporate our island fully into the Republic as the fifty-first of those United States.

Should the United States Government at some future date choose to do so, I recognize that it has the military might to act illegally and immorally to abrogate those freedoms. We have no illusions in that regard, either. Although the overwhelming majority of our people have demonstrated at every opportunity that we treasure our United States citizenship and our permanent political union with the United States, we all recognize that, like our own and like every other community on earth, the United States too is an imperfect society.

Should the day come when the people of Puerto Rico were to find themselves oppressed by the United States, it would not be necessary for a totalitarian adversary of the United States to bring the matter to the attention of this Committee: I can assure you that the freedom-loving people of Puerto Rico would virtually lay siege to this building in their clamor for redress of grievances. And I should emphatically add that I myself would not hesitate to stand at the forefront of such a movement.

Yet I remain fully confident that no such action will ever be necessary. Because, for all its occasional faults, the Government of the United States has by and large conducted itself with grace and with fairness in its relationship with the American citizens of Puerto Rico. And I have every reason to believe that it will continue to do so.

Individuals and groups of individuals within every state of the United States have, at one time or another, expressed indignation at, and intense opposition to, actions or inactions for which they perceived the Federal Government to be responsible. In nearly every instance, these conflicts have gradually been resolved through compromise and consensus, and a resumption of cordial relations between the parties involved has followed. And thus it has been also with Puerto Rico.

Although the people of Puerto Rico cherish our identity as a unique community within the American nation, we likewise cherish our right to participate in the process by which our nation as a whole arrives at decisions in the common interests of all.

It is no accident that I address you today in the Spanish language. For more than four centuries Spanish has been the first language of the people of Puerto Rico. It will continue to be our first language, regardless of the changes we may make in our political status. Our cultural heritage as a people has not been, and shall not be, an obstacle to the exercise of our rights as United States citizens. So long as we remain true to the principles of governance that bind our Nation together, we shall always remain free to exercise our inalienable human right to life, liberty, and the pursuit of happiness in accordance with the specific personal traits which define us as Puerto Ricans.

On December 31, 1976, when President Gerald Ford announced his support for the admission of Puerto Rico to the Union of States, he did not attack any cultural or linguistic provisos. His call was unconditional. He was prepared to accept us as Puerto Ricans.

On July 25, 1978, President Jimmy Carter issued a proclamation in observance of the 26th anniversary of the adoption of Puerto Rico's local Constitution. In that proclamation he said to the Puerto Rican people, and I quote, "Since 1898, and as American citizens since 1917, you have made a rich contribution to the life of the United States, while preserving your own unique culture and traditions within the broader community . . . My Administration will respect the wishes of the people of Puerto Rico and your right to self-determination. Whatever decision the people of Puerto Rico may wish to take—statehood, independence, commonwealth status or mutually-agreed modifications in that status—it will be yours, reached in accordance with your own traditions, democratically and peacefully. . . The people of the United States are proud of our cultural and political associations with Puerto Rico over the last eighty years. We know that we can best honor our friendship, and our own democratic principles, by respecting your free choice about your own future."

Not only did President Carter not attach cultural conditions, he underscored clearly the United States Government's acceptance of and commitment to the defense of the inherent right of the Puerto Rican people to retain and enhance our individual qualities as a people.

How can this be possible?

Simply because that is the tradition of the American nation. Tolerance of individual differences is a cornerstone of American freedom. Instances of individual intolerance exist everywhere on earth. So do instances of institutional intolerance—even in the United States.

But the overwhelming majority of all United States citizens understand fully that the acceptance of diversity—racial, cultural, religious, regional, ethnic, linguistic—is fundamental to the existence of liberty in a nation whose population is the product of immigration from every corner of the globe.

And because the people of Puerto Rico have the self-confidence and the determination to demand that our rights as United States citizens be recognized and respected we look to the future with optimism, certain of our ability to resolve our political destiny in an environment characterized by civil debate, unconditional self-determination, and respect for the rights of the individual.

Before I continue, I should like to invite your attention to one especially blatant example of the hypocrisy of the separatists' position.

In regard to the question of language and culture, they firmly oppose the teaching of English in Puerto Rico. They oppose having our people become fully bilingual. They say it would undermine our identity as a people.

What is ironic, however, is that these same separatists are without exception bilingual themselves. They know English, and yet their sense of identity as Puerto Ricans seems not to have been impaired in the slightest. Indeed, they regard themselves as the purest of Puerto Rican patriots. Can it be, therefore, that their true motivation is not the preservation of our identity as a people, but rather the preservation of their own elite status as self-appointed bilingual spokesmen for our people? Why else would they propose to deny to the rest of the Puerto Rican people an advantage they themselves enjoy? It is something to think about.

It is these individuals—the separatist elements within Puerto Rican society—who year after year have sought United Nations intervention in our internal affairs. This too reflects their hypocrisy.

Let me explain.

We must keep in mind not only that, within Puerto Rico itself, the separatist forces have been massively and repeatedly repudiated at the polls, but that these same elements have never at any time seriously challenged our elections as fraudulent. They know they have been defeated fair and square.

That they have responded to their internal rejection by seeking support for their cause outside of Puerto Rico demonstrates eloquently their own cynical disregard for the principle of self-determination for our people.

Instead of respecting the clearly and repeatedly expressed will and wisdom of the Puerto Rican electorate, they resort to maneuvers in the international arena, hoping to have their political status preference imposed upon Puerto Rico from outside. Why? Obviously it is because they realize that within Puerto Rico itself they have been making no headway whatsoever.

In 1952, the year our commonwealth constitution took effect, political parties favoring independence for Puerto Rico polled a total of 19 percent of the vote in the island-wide general election. Political parties favoring statehood polled only 12.9 percent of the vote that year.

In our most recent election—in November 1976—independence parties polled only 6.4 percent of the vote—just one-third of their electoral strength twenty-four years earlier. In dramatic contrast, the pro-statehood political party which I lead won that 1976 election with 48.3 percent of the vote, nearly four times the pro-statehood total of 1952.

It has been this indisputable trend within the Puerto Rican electorate which has

prompted the pro-independence forces to seek refuge in international forums, and to mount a calculated betrayal of the principle of self-determination by turning their backs on their own people as the sole legitimate judges of the course Puerto Rico should set for itself.

Where are Puerto Rico's political exiles?

There are none.

Separatist Puerto Ricans operate openly from within Puerto Rico itself. They travel the world preaching their gospel, carrying United States passports. They run for elective office in Puerto Rico, and their political parties—despite their lack of significant voter support—receive regular allotments of public funds, equal in amount to those received by non-separatist political parties. Separatists speak out virtually every day on television and radio news and panel discussion programs, and their pronouncements are given ample coverage in every daily newspaper. In addition, some of them publish their own newspapers.

Separatist Puerto Ricans take full advantage of Federal law, Federally-funded programs, and the protection of the Federal courts. Like many other American citizens in other parts of the Nation, Puerto Rican separatists have invoked the recently-enacted Federal Freedom of Information Law to search for evidence of abuses they allege have been perpetrated against them in the past by the Federal Bureau of Investigation.

Wherever they may have occurred, within Puerto Rico or elsewhere in the United States, such abuses are contemptible and I repudiate them unequivocally. But it must never be overlooked that the same government which may have been guilty of abuses also provides the mechanisms for bringing them to light, and for correcting them. And of course it is precisely this extraordinary capacity for self-criticism and self-improvement which makes the United States of America a source of wonder and inspiration for the many peoples residing in nations which are less free and less blessed with effective democratic institutions of government.

During four centuries of Spanish rule, dissident Puerto Ricans were often summarily jailed or exiled. Indeed, my own great-grandfather was jailed and exiled by Spain for advocating the abolition of slavery. The American citizens of Puerto Rico are not ignorant of the liberating changes that have occurred on our island during the eight decades since the United States flag was first raised over Puerto Rico's shores.

Where are Puerto Rico's politicial prisoners?

There are none. Those Puerto Ricans dubbed political prisoners by our separatist elements are individuals tried and convicted in open court for the commission of such violent crimes as murder, attempted murder, kidnapping, arson, or assault. No Puerto Rican has ever been defined as a "prisoner of conscience" by the Nobel Prize-winning human rights organization Amnesty International.

Ladies and gentlemen, not only do Puerto Ricans not flee the island because of alleged political persecution, but, on the contrary, the exact opposite occurs: tens of thousands of persons from foreign countries—including over thirty thousand from Cuba alone—have in recent years fled *to* Puerto Rico precisely to *escape* political persecution in their homelands.

This then is a small part of the panorama that is Puerto Rico's contemporary political reality. As I mentioned earlier, you are cordially invited to examine it for yourselves. Not on a carefully sanitized government tour, but as individual men and women, free to go where you wish and to talk to whomever you please: not just to politicians and ideologues, but to housewives, students, laborers, shopkeepers and farmers.

In the meantime, we the people of Puerto Rico shall continue to advance toward a final decision on our political destiny, free of outside pressure and secure in the knowledge that our decision will be respected by the Executive, Legislative, and Judicial branches of the Federal Government, as well as by our fellow American citizens in the fifty existing United States of America.

Thank you.●

## TRIBUTE TO THE LATE LUCILLE H. BLAKE

(Mr. PERKINS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. PERKINS. Mr. Speaker, it is with great sadness that I take this occasion to record the passing of Miss Lucille H. Blake, who served as my executive secretary here in Washington for nearly a quarter of a century.

Miss Blake died August 27 in her hometown of Fargo, N.D., to which she had returned just a few weeks ago. Although she had retired in 1973, she had continued to live in Washington until she was incapacitated by a stroke this past spring.

She was born in Green Isle, Minn., on April 7, 1916, but grew up in Fargo and attended schools there, including the Sacred Heart Academy and the Interstate Business College.

Lucille, as she was affectionately known by hundreds of people who visited my office and who knew her voice on the telephone, came to Washington during World War II and worked on the staff of the late Senator William Langer for 2 years. She also was on the staff of the late Congressman Charles Raymond Robertson of North Dakota.

After my own election in 1948, Miss Blake became the first employee in my office and was my faithful and tireless assistant for the next 24 years.

A jolly, outgoing, genuinely warm person, Lucille took a personal interest in the case work she handled—particularly the service and veterans' cases. And she was a model of efficiency as well.

I pay tribute to her today as typical of that hardworking, dedicated breed of congressional staff assistants without whom we could not function in our duties. They are unsung, but they are indispensable. And they are appreciated.

It was a great blow to me when failing health finally forced Lucille to retire 5 years ago, and even after that long period of time, we still miss her.

Services were held on August 29 in Fargo, with interment following in Holy Cross Cemetery there. May she rest in peace.●

## THE WORLD ACCORDING TO ANDREW YOUNG

(Mr. ASHBROOK asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. ASHBROOK. Mr. Speaker, I would like to take this time to read into the RECORD an excellent article which appeared in the August 1978 Commentary. Written by Carl Gershman, it gives a fine overview of this foreign policy disaster named Andrew Young who continues as an embarrassment to President Carter and the United States.

The article follows:

THE WORLD ACCORDING TO ANDREW YOUNG

(By Carl Gershman)

Andrew Young is unquestionably a prominent figure in American politics today, and one of growing international importance as well. Before his remarkably rapid rise—owing largely to the role he played in Jimmy Carter's presidential campaign—Young served as Congressman from Atlanta's 5th District, and before that as Executive Director of Martin Luther King's Southern Christian Leadership Conference. In both these capacities he was known as a skilled negotiator—tough, but also conciliatory when necessary—and a racial moderate; he was the only black Congressman who voted to confirm Gerald Ford as Vice President, for example. It is only since his appointment as United States Ambassador to the United Nations that Young has seemingly gone out of his way to court political controversy and to adopt the provocative, outspoken manner that has become his trademark in office.

From the beginning, Young has seen that appointment as something more than just a diplomatic assignment. He has referred time and again to its symbolic significance, calling it a sign of America's racial progress and the harbinger of a new relationship between the U.S. and the countries of the Third World. He seems to see himself as a kind of diplomatic avenging angel, called upon to right the wrongs of past American foreign policy, to put the United States on the "right side of the moral issues in this world," and to "repair the damage" which was done during the years when America supported the "worst leadership groups" and became party to a "vast network of oppression" instead of siding with "oppressed people everywhere."

The torrent of controversy provoked by Young during his first months in office seemed designed to call attention to his new, stance which it presumably symbolized, crusading role and to the new American Conor Cruise O'Brien has observed that Young "knows how to be indiscreet and makes his indiscretions work in his favor," and this assessment is probably right. Though Young outraged many people by calling Cuban troops in Angola "a force for stability," or advising Americans not to be "paranoid" about "a few thousand" Communist soldiers in Africa, or by hurling indiscriminate charges of racism at U.S. allies, adversaries, past Presidents, and even the borough of Queens, he also strengthened his credibility at the UN by saying such things and enlarged his popularity among many American blacks. Not long after Young took office, the Nigerian foreign minister called him the "symbol of a new and constructive United States policy toward Africa," and three leaders of the NAACP, including Roy Wilkins, praised him for speaking the "brutal, unvarnished truth" about racism in America and urged President Carter not to let the "enemies of racial progress" sway him from supporting Young.

President Carter has needed no such urging. He has been almost reverential toward Young, calling him the "finest elected official" and the "best man" he has ever known, as well as a "national treasure" and "Third World hero." Repeatedly, the President has made a point of affirming his "complete faith" in the way Young has gone about

fulfilling his diplomatic responsibilities.* In token of all this, Young is the first U.S. Ambassador to have his own full-time staff on the seventh floor of the State Department—down the hall from Secretary of State Vance; he is the only U.S. diplomat permitted to engage in fund-raising activities on behalf of Democratic candidates; and his advice is solicited on many vital policy questions having nothing to do with Africa or the Third World. Carter's initial decision to stop development of the neutron bomb, for example, was reportedly influenced by Young, who feared that production of the bomb would make the U.S. position difficult to defend at the special UN session on disarmament.

Is it then the case that the views which Young has been articulating so freely during his tenure at the UN reflect the policies of the United States government? Young himself suggests as much. Whenever he creates a furor, he defends himself by claiming first that his remarks have been taken out of context and, second, that they represent a fairly accurate reflection of policy—a policy that is in process of changing to become "much more in tune with the thinking of the rest of the world."

Lately, of course, the President has been expressing views about the activities of the Russians and the Cubans in Africa that diverge sharply from those of Young. Nevertheless, it remains unclear whether or to what extent Young speaks for himself or on behalf of the administration. Whatever the answer to that question may turn out to be, Young's political attitudes, as represented by his public utterances during the year-and-a-half since he took office, do indeed, as he himself says, point toward a fundamental revision of American foreign policy—though a revision with very different moral implications from those he ascribes to it. Young's views may or may not be consonant with those of President Carter. But if they are, then the conception of human rights articulated by the Carter administration is a sham, put forward to disguise a rather cynical accommodation to a world in which Communist totalitarianism is the dominant reality.

To understand Young's thinking, one must understand that all his political judgments are made from the vantage point of the American civil-rights movement of the 1960's. When an interviewer commented on "how often you interpret world events through your own civil-rights experience," Young answered: "It's true. I mean, it's all I got. Everybody is determined by his own experience." That experience, in Young's view, is relevant not only to America but to all sorts of countries and situations no matter how far removed they may be from the specific conditions that existed in the American South under segregation. Whether he is speaking in Lagos to a World Conference on Action Against Apartheid, or in Maputo at a conference in support of black nationalist movements in Namibia (South West Africa) and Zimbabwe (Rhodesia), Young continually draws a parallel between the struggles fought in the 50's and 60's against Jim Crow in the South and the struggle currently being fought against white minority rule in Africa.

And it is not only Africa that elicits this parallel. Young is no less hesitant in drawing comparisons between the American civil-rights movement and the current dissident movement in the Soviet Union. He has said for example, that the Shcharansky and Ginzburg trials "remind me very much of my own days in the civil-rights movement." Repression in Mississippi, he has also said, "just made more people more determined," and "[t]he same things will happen in Russia." Furthermore, "as the Soviet Union becomes more prosperous, as more and more people are exposed to any kind of art and culture," especially through the medium of television, there will be a "human-rights explosion that will not be unlike our civil rights movement." Young's experience in the civil-rights movement even provides a model for his approach to the politics of the United Nations. Just as the black movement in the U.S. built a broad coalition for change, so too, he says, is it necessary at the world body "to build coalitions that cross racial and geographic and ideological lines."

So central is the civil-rights movement in Young's scheme of things that he credits it with having started a "political revolution" that brought about a "radical reformation of American foreign policy." In his speech to the Maputo conference in May 1977, Young explained to his African audience how the civil-rights movement evolved into the anti-war protest movement, which in turn created a "new approach to the problems we face everywhere in the world." Thanks to this "new approach," which grew "out of a concern for the end to racism, and an end to militarism and imperialism," American foreign policy is now profoundly different from what it was during "the tragedy of the past twenty years," when American tax dollars were used "not to develop, not to feed the hungry, but essentially as part of an apparatus of repression in many places on the face of the earth." At long last, the cold war is behind us, and what used to be "an adversary relationship between East and West . . . is giving way to much more cooperation. . . ."

Of course, Young is aware that the transformation is not yet total. The U.S. still spends "close to $100 billion a year [sic] on so-called military preparedness," and many Americans still persist in seeing a "so-called 'clear and present danger'" in Communism as a result of a "massive education campaign run by the government and private agencies." But the outlook is improving. Americans are gradually coming to acknowledge the past racism of our government, and to recognize the truth of W.E.B. Du Bois's dictum that "the problem of the 20th century is the problem of the color line." At a conference in Lagos against apartheid, Young noted approvingly that though much of the "imperialism, neocolonialism, capitalism, or what have you" of the United States is still present, the situation is in the process of being transformed by the Carter administration.

Given this general view of the world, it is not surprising to discover that Young sees no reason for the U.S. to oppose Communism militarily, or even to confront it ideologically. He simply does not believe that the Soviet Union and its allies pose a military or strategic threat to the United States. The whole question of the Horn of Africa, for example, is in Young's opinion vastly exaggerated, and he pronounces it "ridiculous" to find "this enormous strategic significance in a thousand miles of sand." Indeed, if there are strategic interests at stake at all in the Horn of Africa, the United States has only benefited from the Soviet action, for it will prove to be "the Soviet Union's Vietnam"—"the Russians have done more to hurt themselves than we could have ever done to hurt them."

Nor, according to Young, does the fact that Cuba is a Communist regime allied with the Soviet Union have any bearing on the situation. "Cubans are people," he said after Cuban advisers arrived in Ethiopia. "They might do good things. They might do bad things. Let's wait and see before we jump to conclusions." When asked on Meet the Press whether he was for, against, or neutral toward the Cuban presence in Africa, Young replied: "I think I would treat the Cuban presence just like I would treat the Israeli presence or the French presence or the American presence. I would ask the question: What are they doing?"

What, then, are the Cubans doing in Africa in Young's opinion? The answer has varied on different occasions, but always the motives imputed have been honorable ones. When the Cubans first arrived in Angola, Young thought that "they were essentially opposing racism, and driving the South Africans out"; later, when the civil war was over and the Neto regime installed in power, Young explained that the Cubans were "basically doing technical assistance," and in fact representing our own interests by protecting Gulf Oil's installations in Cabinda. Whatever their motives, crass political expediency was not among them: "I don't believe that Cuba is in Africa because it was ordered there by the Russians. I believe that Cuba is in Africa because it really has shared a sense of colonial oppression and domination."

It was only when the Cubans (for reasons not quite covered by Young's analysis) "used military means to try to resolve a conflict of Angolans themselves" that he was ready to condemn "that military role." But even while he expressed concern about "the continuation of death and destruction almost everywhere there is a Cuban military presence," he did not feel that any kind of U.S. military response was called for, and he continues to oppose any such response whether in Angola, in the Horn of Africa, in Zaire, or in Rhodesia. To reply with force would, in the first place, only compound the violence ("I don't think it's right for us to become a destructive force because they are a destructive force") and in the second place would never work "because the Soviets are willing to put so much more in weaponry into a situation in Africa," while "[t]he American people have sort of determined that our foreign policy for the near future, anyway, ought to avoid any military involvement in which the shores of the United States are not threatened." And this is all for the best, according to Young, since in any case the U.S. "fares better in the world through peaceful economic competition wherever possible." "The sooner the fighting stops and the trading starts," he has declared, "the quicker we win."

If Young sees no strategic grounds for opposing Communist advances, neither does he see any moral ones, for he does not feel qualified to pass judgment on the Communist system of government. Concerning Angola, for example, he has said that "There's nothing wrong with their deciding to live under a socialist [sic] system," though he did not quite explain what "deciding" meant in this connection. He himself, as he once explained it, would not want to live in a place like Mozambique, for example, yet in the course of a visit there he "found that in the midst of that liberation movement there was in addition to the Communist social structure a movement of humanism . . . I say they are Communist but they are also humanist."

The question of human rights, too, according to Young, is relative rather than absolute, in the sense that it is "understandable that people in different circumstances should have different perceptions of what

*Young has been equally lavish in his praise of Carter. According to Young, the President is "free of racism" and "has the capacity as President of the United States to do more to put an end to racism than anybody since Martin Luther King." This is remarkable praise from Young, all the more so since Carter admittedly took no part in the civil-rights movement and used racially questionable tactics in his 1970 gubernatorial race in Georgia. But Carter is an avowedly repentant sinner and this may account for what *Newsweek* has called the "almost mystical friendship" between the President and Young.

human rights are." In a speech delivered at the Riverside Church in New York on Human Rights Sunday, Young urged Americans to broaden their definition of human rights to take account of these "different perceptions," and to understand that for the poor people of the world, the most pressing concern is overcoming poverty, not political freedom. In effect, therefore, "For most of the world, civil and political rights . . . come as luxuries that are far away in the future." Applying this "different-perceptions" theory to the Soviet Union, Young explained rather ingeniously how under that particular style of government, human rights—redefined, of course—have been preserved. In part, this appears to have been due to differences in climate:

. . . we must recognize that they are growing up in circumstances different from ours. They have, therefore, developed a completely different concept of human rights. For them, human rights are essentially not civil and political, but economic. . . . One lives in a land where, in most of that land, the sun sets as early as three o'clock in the afternoon, and where the planting season is minimal. Under those circumstances the struggle for human rights inevitably becomes far more economic in its expression than it would in a country such as ours, where we almost take it for granted that anything can grow almost anywhere year 'round.

But even the acknowledged defects of Communism do not grant us the right to judge it, in Young's opinion, because our own record on human rights is far from clean. While it is true that there is no political liberty in the Soviet Union, "we unfortunately have been very reluctant to accept the concept of economic responsibility for all of our citizens." And while it is true that the Soviet Union represses its dissidents, "many of our own students were shot down on their own campuses" as a result of their political activities against the war in Vietnam. And even if we do not go in for literal torture, as some other countries do, the United States "still has subtle but very strong systems of intimidation at work that inhibit the possibilities of our poor, our discriminated against, and our dissidents, from speaking fully to address themselves." To illustrate this point, he has observed that a young black in America "is much more likely to go to jail and find himself abused there" than is a young white; and that the poor find it more difficult than the rich to gain adequate legal representation. No wonder, then, that at a meeting of the UN Commission on Human Rights, a body which includes some of the harshest despotisms on the planet, Young said, "I see my country as vulnerable as anybody else's around the table." He made a similar point during the Shcharansky trial when he said that there are "hundreds, perhaps even thousands of people whom I would call political prisoners" in the United States.

Young's willingness to give certain countries the benefit of the doubt extends even to Uganda. He acknowledges that there have been "massive violations of human rights and destruction of people" in that country, but is not sure how much violence is "done as a matter of government policy and how much is done as a result of an imminent kind of chaos." Then, too, Western nations have no right to be sanctimonious about Idi Amin, since they "contributed to overthrowing" the government of Milton Obote (a "left-leaning intellectual") and thereby paved the way for Amin's tyranny. Uganda, therefore, "is not just an African problem, [but] a Western one . . . as a result of the excesses of both colonialism and neocolonialism."

There is, of course, a limit to Young's moral relativism. It does not extend to South Korea, Iran, Chile, the Philippines, or any of the other countries belonging presumably to that "vast network of oppression" to which we became a party in past years. Nor does it extend to South Africa, which Young has singled out from among all the countries of the world for unique moral condemnation. Here, for once, the question of human rights is paramount and there is not a trace of that hesitation to pass judgment which Young so frequently displays toward other governments that deny their citizens democratic rights. Here, and only here, "the whole conscience of the world is . . . on trial."

Appearing on Face the Nation on May 21, 1978, only a few days after Communist-backed forces invaded Zaire's Shaba province and had reportedly launched a major offensive in Eritrea, Young assessed the African situation: "I think our policy is doing very well," he said, "and frankly, I think we are much better off in Africa now . . . than we have been for the last decade." Considered in light of the preceding week's events—and indeed, in light of events that have taken place over the entire period since Young and Carter took charge of our African policy—Young's reply was well-nigh staggering.

There are now Cuban military personnel and civilian "advisers" stationed in some fifteen African countries, most of them concentrated in southern Africa and the Horn, the two zones where military conflict on the continent is most intense. The 25,000-man Cuban force in Angola, which is financed by the Soviet Union at a rate of $2½ million a day, is greater by one-quarter than it was when Carter took office, and serves the double purpose of securing the Communist hold on Angola and aiding pro-Soviet insurgents in neighboring countries. The Cubans guard the Cabinda oilfields (the soruce of yearly revenues of close to $1 billion which keep the MPLA regime afloat); fight a continuing war in the countryside against the guerrilla forces of UNITA and FNLA (the two nationalist movements defeated in the civil war); and maintain order in the capital city of Luanda, where they put down an attempted coup in May of last year. From their Angolan base, the Cubans train SWAPO and ZAPU guerrillas in the use of Soviet weapons for an eventual takeover in Namibia and Zimbabwe. Here, too, they have trained and armed the Congolese National Liberation Front, the rebel group that invaded Shaba province this past May (the second such invasion in fourteen months) in an effort to topple the Mobutu government. In addition to the Angola operation, Moscow has also stepped up arms shipments to the Patriotic Front in Zambia and Mozambique, and flown groups of Malawian recruits to Cuba for military training. Reviewing these efforts in a joint communiqué issued on April 24, 1978, the Soviet Union and Cuba pledged to increase "assistance and support" to all the pro-Moscow insurgencies in the region.

In the Horn, 12,000 Cuban troops, 1,000 Soviet "advisers," and $1 billion of Soviet weapons enabled Ethiopia to drive Somali forces out of the Ogaden desert in March of this year. Not content with this victory, and despite implicit assurances to Washington that the Somali withdrawal would be followed by "substantial reductions" in Cuban and Soviet forces in Ethiopia, Moscow soon sought to establish its control over the entire Horn. On April 9, just three days after Ethiopian President Mengistu returned from a hasty visit to Moscow, there was an abortive coup against the government of Somali President Mohammed Siad Barre, which Somalia charged had been instigated by the Soviet Union and Cuba. Not long after, Ethiopian troops backed by an enlarged Cuban force of 17,000 (and, according to Mengistu, backed also by forces from the Soviet Union, East Germany, and South Yeman) stepped up their offensive against the Eritrean secessionist movement.

In short, during the first year and a half of the Carter Presidency, two areas of considerable strategic importance—southern Africa, with its vase mineral deposits, and the Horn of Africa, with its proximity both to the vital sea routes through the Red Sea and the Indian Ocean and to the world's largest oil reserves in Saudi Arabia—have fallen under increasing assault from the Soviet Union and its allied forces. While all this has been going on, Young has retained his equanimity and urged Americans not to overreact, in accordance with his well-earned reputation in the Carter administration as a "cool-it person." There have, however, been occasions when even Young has lost his equanimity. This happened, for example, when it was announced that an internal settlement had been reached in Rhodesia between the Smith government and three black leaders, Bishop Abel Muzorewa, the Reverend Ndabaningi Sithole, and Senator Jeremiah Chirau. Young was obviously taken by surprise and refused to believe it at first ("Our intelligence reports [said] that this would not happen, certainly not soon"). Then he went on to say that the settlement—which would guarantee the white 4 percent of the population 28 percent of the seats for ten years in a parliament elected by universal suffrage—would not work because it did not "address the issues that have some 40,000 people fighting" (the actual number is closed to 10,000). Comparing it to the "three or four internal settlements in Vietnam" which failed to stop the fighting there, Young predicted that the settlement would lead to a "black-on-black civil war," followed by a "massive commitment of Soviet weapons." He added that even if the U.S. and other Western countries recognized the new Salisbury government (which "would be very difficult"), such recognition would not mean much unless they were willing to send troops in to back it up, if necesary. "I don't think we are ready to do that," Young concluded, thereby announcing in advance that the United States would abstain from any action in the situation, and virtually inviting the Soviet Union and Cuba to intervene.

Young is against the internal settlement, which envisions independence before the end of the year, free and fair elections open to all parties (including the guerrillas who would be encouraged to return and to participate on an equal basis in the new order), on the ground that it is insufficiently representative (though in fact it would be one of the most democratic states in Africa). Instead, he supports the Anglo-American plan which requires all parties to agree to a settlement—the white majority, the Internally-based black groups, and the two wings of the Patriotic Front led by Joshua Nkomo and Robert Mugabe—after which a free election will take place to determine the composition of a new government. But this assumes, first of all, that both Nkomo and Mugabe really want a free election—in which, most observers feel, they would not do very well—and secondly, that a consensus could be reached by all the parties involved not only about the terms for a settlement, but about a future democratic state as well. Hard as it was to reach a compromise between the white minority and the moderate black internal leaders, it is impossible to imagine a compromise between Ian Smith and Mugabe (who has said that there should be no amnesty for "war criminals"). It is also exceedingly difficult to imagine that a consensus could ever be reached between Mugabe, who has opposed multiparty democracy as a "luxury" and has called for a "one-party state," and Muzorewa, the most popular of the internal leaders, who has called for a multiparty, multiracial, constitutional democracy with a bill of rights, an independent judiciary, and a "mixed type of economy."

Indeed, the irreconcilability of these two positions, held by two black leaders, is an ironic commentary on Young's belief, which he has expressed so often at the United Nations and which is such an integral part of

his total outlook, that the East-West conflict between totalitarianism and democracy has come to an end, and that race is the main dividing line in the world today. In fact, however, the decisive issue in Rhodesia is not the imperfections of the democracy envisioned by the internal settlement, or even the resistance to white minority rule, which the settlement would end. Rather, it is whether or not the future Zimbabwe will be democratic or totalitarian.

One need not accept Muzorewa's contention that Young has been "terribly brainwashed by the Patriotic Front and the so-called front-line states" to notice his clear bias in their favor. Indeed he has asserted, in a recent BBC interview, that "We are on the side of the front-line presidents in the Rhodesian situation." In consonance with this, he has spoken of the guerrillas with extreme deference. "People who are engaged in negotiated settlements," he told the Maputo conference in support of the Front, "hardly have the moral right to tell the people who are engaged in armed struggle how to run their paths and determine their freedom." And in further token of his admiration, Young publicly implored "my brother Robert Mugabe . . . not to think of us in the same context as our involvement in Vietnam now in 1977."

In adopting this ingratiating stance toward the Patriotic Front, and by opposing a course that would seek to strengthen its democratic opponents, Young is no doubt motivated in part by the wish to maintain his "credibility" with such Front supporters in Africa as Samora Machel of Mozambique, Agostinho Neto of Angola, and Julius Nyerere of Tanzania. At the same time, there is little to suggest, in light of his overall political point of view, that he would regard the installation of a Mugabe-type regime in Zimbabwe as cause for concern. Certainly it would be no more harmful to U.S. interests, from his point of view, than a Neto regime in Angola, and it might even be helpful. After all, Rhodesia under Mugabe would be "stable," the U.S. could trade with it (importing its chrome, for example, without political embarrassment), and, like Mozambique, it might even be "humanistic" as well as Communist.

In the end, it is Young's apparent lack of commitment to political freedom, and his ability to turn a blind eye to oppression if it is carried out by African and other Third World regimes in the name of a progressive ideology, that is the most troubling aspect of his thought and of his performance at the United Nations. More is at issue than a mere disagreement over policy when Young finds it possible to assert, for example, that the "success" of Mozambique "makes East and West alike look to this nation with new hope and with new courage." Leaving aside the FRELIMO regime's disastrous economic performance, it would be an understatement to say that it has not respected the principle of majority rule, given the fact that Machel has pledged to "liquidate abrasive forces in the service of imperialism" and is currently holding some 100,000 people in forced-labor camps on suspicion of opposing the regime's policies.

And Mozambique is only one example of Young's indifference to the issue of political freedom in Africa except insofar as it pertains to the question of white minority rule. He has also spoken of the "impressive leadership" of SWAPO, the Namibian "liberation" movement, and conferred upon it the "Freedom Now" slogan, without, however, mentioning the arrest and detention in Zambia and Tanzania (under conditions marked by what the New Republic has called "unspeakable cruelties") over 1,000 SWAPO dissidents, whose only crime was calling for a democratic party congress.

Young seems equally unconcerned about the fate of freedom elsewhere in the Third World, so long as the regime in question calls itself "progressive." On the very day that Young was welcoming Vietnam into the United Nations in the most lyrical terms, for example, the New York Times published an article by Henry Kamm containing extensively detailed accounts by refugees of the harsh political persecution which had led them to flee Vietnam by boat, at great risk to their lives. Young has expressed his admiration for "Vietnam's struggle for independence," and in a statement delivered by an aide in Bangkok this March, he observed, in an obvious reference to America's role in the Vietnam war, that "no part of the world has borne more tragic witness than Asia to the devastation of modern man's technology and intolerance of other socioeconomic systems." But nowhere in this speech about "basic human needs" did he mention the plight of refugees from Communist Indochina or, for that matter, the holocaust taking place across the border in Cambodia.

To understand how Young can have evolved into an advocate of U.S. acquiescence in a new system of tyranny, one must again turn to the formative political experience of his life, the civil-rights movement of the 50's and 60's. In a sense, that movement was innocent about international affairs. Though influenced by, and in turn influencing, the anti-colonialist movements of Africa, the civil-rights movement never really had much interest in international questions. Justifiably preoccupied with solving problems in this country, it did not feel called upon to develop a perspective on American foreign policy, which during this period was concerned above all with the containment of Communism. To the degree that the issue of Communism impinged on the civil-rights movement, it did so in one of two ways: the opponents of integration sought to discredit the movement by calling it Communist, and the American Communist party, posing as a dedicated opponent of racial injustice, sought to use the movement to further its own political objectives. Neither attempt was new, and neither was particularly successful.* But perhaps inevitably, a tendency developed to view "the enemy of my enemy as my friend," and some in the civil-rights movement began to identify anti-Communism with opposition to racial progress and to view Communism as a sincere ally of the black freedom struggle. Young in his civil-rights days may have been influenced by this misperception of the role of Communism. Only recently he referred to Paul Robeson—an inveterate apologist for Stalinism—as "the hero of my youth," and he continues to see no contradiction between Robeson's defense of black freedom and his support for Stalinist totalitarianism.

Apart from all this, Young's insistence that the civil-rights movement in America can serve as a paradigm for such differing phenomena as the racial conflict in South Africa and the dissident movement in the Soviet Union reveals a parochialism that accounts in some measure for his failure to understand the nature of totalitarianism. It also accounts for his nonchalant attitude toward political democracy, whose virtues are difficult to appreciate fully without understanding what their absence would entail. In his Reflections on Gandhi, George Orwell wrote: "It is difficult to see how Gandhi's methods could be applied in a country where the opponents of the regime disappear in the middle of the night and are never heard of again. Without a free press and the right of assembly, it is impossible not merely to appeal to outside opinion, but to bring a mass movement into being, or even to make your intentions known to your adversary." Ironically, by looking at the world strictly in terms of his own experience in the civil-rights movement, Young not only misperceives different political situations, but also fails to understand why his own movement was able to appeal so successfully to the conscience of America.

The same parochialism which explains Young's failure to distinguish sufficiently between democracy and totalitarianism also accounts for his inability to see any distinction between authoritarian and totalitarian societies. Referring recently to the restoration of democracy in Portugal, Spain, and Greece, Young said that "totalitarian states and oppressive regimes fall suddenly and without much warning." He did not seem to understand that the right-wing regimes in these countries could be replaced as quickly and as smoothly as they were precisely because they were not totalitarian in the sense of controlling every aspect of human existence. For this same reason, the prospects for a democratic political evolution in South Africa—despite its perilous racial situation and its despicable policy of apartheid—are more hopeful than they are in the Soviet Union or Vietnam. To condemn this society more strongly than any other, as Young has done, bespeaks something less than a consistent moral standard on human rights.

But to attribute Young's political views simply to a naiveté born of a parochial view of the world is insufficient. His objection to anti-Communism, his denunciation of U.S. "militarism" and "imperialism," his opposition to the use of American military power under any circumstances, his readiness to justify Soviet despotism as a product of Russian economic backwardness or to blame Amin's tyranny on Western colonialism, his benignly relativistic attitude toward Third World dictatorships of the Left, in contrast to his absolutistic assurance about rightwing dictatorships—all these bespeak a political perspective that has much more in common with the New Politics movement of the past decade than with the civil-rights movement of the decade before that. This more recent movement has had an impact on American political culture no less far-reaching (though infinitely less constructive) than the civil-rights movement had on the nation's racial attitudes; and it now finds itself well represented in the Carter administration's foreign-policy establishment, especially among the younger members. In virtually every one of his political attitudes Young reflects the conventional wisdom of the New Politics and its two key ideas: that the East-West conflict has now given way to the North-South "dialogue," and that Communism does not constitute a threat to the West.

Obviously this point of view, with its downgrading of political freedom, is well calculated to make Young popular in a forum dominated, as the UN is, by member states which are not democratic. Just as obviously it is indispensable to the role Young wishes to play of chief intermediary between black Africa and the United States. Yet in his eagerness to demonstrate his solidarity with the new Marxist-Leninist elite of black Africa, Young finds himself today for the most part on the side not of the oppressed but of the oppressors. In Angola, for example, thousands of young people from rebel villages in the northern and central part of the country are being rounded up and shipped to Cuba's Oriente province where they are forced to cut sugar cane and undergo political indoctrination. At the same time, and in a far more comfortable setting, the sons and daughters of Angola's new ruling

* A full account of the long history of the relationship between the American Communist party and the racial protest movement in this country appears in Wilson Record's execellent volume, "Race and Radicalism: The NAACP and the Communist Party in Conflict" (Cornell University Press, 1964).

class are receiving technical and political training in Cuba's Isle of Pines at schools named after President Agostinho Neto. Here, in the division between slaves and slave masters, between the victims of the new order and those who rule over it, we have a true paradigm of revolutionary Africa.

President Carter has said that Andrew Young "has a great sensitivity about the yearnings" of Third World peoples, as well as an understanding of the reasons for their "animosities and hatred" toward the United States. "I think," said the President, "he's made great strides in repairing [the] damage that [has] been done." While it is no doubt true that Young has established friendly relations with some leaders who are otherwise hostile to America, he has done so at the expense of a retreat from the principles of liberty and democracy. Worse still, this retreat has involved a solidarity with totalitarian rulers in the Third World whose victims might well pray to be delivered from such "sensitivity" to their "yearnings." For their sake, as well as for our own, one can only hope that President Carter's recent warnings about Soviet-Cuban adventurism in Africa mean that Young is not the "point man" of this administration, as he has claimed to be, but rather the rearguard legacy of a political movement spawned by Vietnam and now on its way to being left behind.●

## CONFERENCE REPORT ON H.R. 12934

Mr. SLACK submitted the following conference report and statement on the bill (H.R. 12934) making appropriations for the Departments of State, Justice, and Commerce, the judiciary, and related agencies for the fiscal year ending September 30, 1979, and for other purposes.

CONFERENCE REPORT (H. REPT. NO. 95-1565)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 12934) making appropriations for the Departments of State, Justice, and Commerce, the Judiciary, and related agencies for the fiscal year ending September 30, 1979, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows: That the Senate recede from its amendments numbered 32, 42, 43, 53, 55, 59, 61, 62, 63, 64, 65, 74, 75, 95, 98, 108, 112, 119, and 122.

That the House recede from its disagreement to the amendments of the Senate numbered 20, 21, 46, 47, 49, 57, 58, 69, 70, 71, 72, 77, 79, 80, 81, 82, 83, 84, 85, 86, 87, 89, 93, 94, 97, 99, and 121, and agree to the same.

Amendment numbered 39: That the House recede from its disagreement to the amendment of the Senate numbered 39, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$646,488,000"; and the Senate agree to the same.

Amendment numbered 44: That the House recede from its disagreement to the amendment of the Senate numbered 44, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$24,900,000"; and the Senate agree to the same.

Amendment numbered 45: That the House recede from its disagreement to the amendment of the Senate numbered 45, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$49,286,000"; and the Senate agree to the same.

Amendment numbered 48: That the House recede from its disagreement to the amendment of the Senate numbered 48, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$16,430,000"; and the Senate agree to the same.

Amendment numbered 50: That the House recede from its disagreement to the amendment of the Senate numbered 50, and agree to the same with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment insert: "$507,525,000: *Provided*, That any unobligated balance remaining in the account entitled "Financial and Technical Assistance" as of September 30, 1978, shall be merged with this appropriation: *Provided further*, That total obligations for new loans and guarantees under the "Economic Development Revolving Fund" shall not exceed $75,000,000"; and the Senate agree to the same.

Amendment numbered 52: That the House recede from its disagreement to the amendment of the Senate numbered 52, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$29,300,000"; and the Senate agree to the same.

Amendment numbered 54: That the House recede from its disagreement to the amendment of the Senate numbered 54, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$71,775,000"; and the Senate agree to the same.

Amendment numbered 60: That the House recede from its disagreement to the amendment of the Senate numbered 60, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$660,650,000"; and the Senate agree to the same.

Amendment numbered 68: That the House recede from its disagreement to the amendment of the Senate numbered 68, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$11,500,000"; and the Senate agree to the same.

Amendment numbered 76: That the House recede from its disagreement to the amendment of the Senate numbered 76, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$9,690,000"; and the Senate agree to the same.

Amendment numbered 107: That the House recede from its disagreement to the amendment of the Senate numbered 107, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$270,000,000"; and the Senate agree to the same.

Amendment numbered 118: That the House recede from its disagreement to the amendment of the Senate numbered 118, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$520,500,000"; and the Senate agree to the same .

Amendment numbered 120: That the House recede from its disagreement to the amendment of the Senate numbered 120, and agree to the same with an amendment, as follows: In lieu of the sum named by said amendment insert "$1,575,000"; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 33, 34, 35, 36, 37, 38, 40, 41, 51, 56, 66, 67, 73, 78, 88, 90, 91, 92, 96, 100, 101, 102, 103, 104, 105, 106, 109, 110, 111, 113, 114, 115, 116, 117, 123, and 124.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 12934) making appropriations for the Departments of State, Justice, and Commerce, the Judiciary, and related agencies for the fiscal year ending September 30, 1979, and for other purposes, submit the following joint statement to the House and Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

### TITLE I—DEPARTMENT OF STATE

ADMINISTRATION OF FOREIGN AFFAIRS

Amendment No. 1: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which inserts a heading.

Amendment No. 2: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert:

*Salaries and expenses*

For necessary expenses of the Department of State and the Foreign Service, not otherwise provided for, including allowances as authorized by 5 U.S.C. 5921-5925; expenses of binational arbitrations arising under international air transport agreements; expenses necessary to meet the responsibilities and obligations of the United States in Germany (including those arising under the supreme authority assumed by the United States on June 5, 1945, and under contractual arrangements with the Federal Republic of Germany); expenses of the National Commission on Educational, Scientific, and Cultural Cooperation, as authorized by sections 3, 5, and 6 of the Act of July 30, 1946 (22 U.S.C. 287o, 287q, 287r); hire of passenger motor vehicles; services as authorized by 5 U.S.C. 3109; dues for library membership in organizations which issue publications to members only, or to members at a price lower than to others; expenses authorized by section 2 of the Act of August 1, 1956 (22 U.S.C. 2669), as amended; refund of fees erroneously charged and paid for passports; radio communications; payment in advance for subscriptions to commercial information, telephone and similar services abroad; expenses necessary to provide maximum physical security in Government-owned and leased properties abroad; and procurement by contract or otherwise, of services, supplies, and facilities, as follows: (1) translating, (2) analysis and tabulation of technical information, and (3) preparation of special maps, globes, and geographic aids; $660,945,000: *Provided*, That passenger motor vehicles in possession of the Foreign Service abroad may be replaced in accordance with section 7 of the Act of August 1, 1956 (22 U.S.C. 2674), and the cost, including exchange allowance, of each such replacement shall not exceed $6,500 in the case of the chief of mission automobile at each diplomatic mission (except that four such vehicles may be purchased at not to exceed $9,000 each)

and such amounts as may be otherwise provided by law for all other such vehicles, except that right-hand drive vehicles may be purchased without regard to any maximum price limitation otherwise established by law: *Provided further*, That in addition, this appropriation shall be available for the purchase (not to exceed thirty-three), replacement, rehabilitation, and modification of passenger motor vehicles for protective purposes without regard to any maximum price limitations otherwise established by law.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The amount provided in the amendment reflects a reduction of $55,000 from the amount proposed by the Senate. The reduction is to be applied to the Office of Human Rights including reduction of one position allocated to that office.

*Representation allowances*

Amendment No. 3: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $2,900,000.

*Acquisition, operation, and maintenance of buildings abroad*

Amendment No. 4: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $125,000,000 to remain available until expended and provides that not to exceed $2,544,000 may be used for administrative expenses during the current fiscal year.

*Acquisition, operation, and maintenance of buildings abroad (Special Foreign Currency Program)*

Amendment No. 5: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $6,025,000 to remain available until expended.

*Emergencies in the Diplomatic and Consular Service*

Amendment No. 6: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriated $2,350,000.

*Payment to the Foreign Service Retirement and Disability Fund*

Amendment No. 7: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $38,107,000.

*International organizations and conferences*

Amendment No. 8: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which inserts a heading.

*Contributions to international organizations*

Amendment No. 9: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which appropriates $355,392,000 instead of $327,676,000 as proposed by the Senate. The text of the amendment is as follows:

In lieu of the matter proposed by said amendment, insert:

*Contributions to international organizations*

For expenses, not otherwise provided for, necessary to meet annual obligations of membership in international multilateral organizations, pursuant to treaties, conventions, or specific Acts of Congress, $355,392,000.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The managers note that the assessment scale for the United States contribution to the Organization of American States reflects a decrease in 1979 from 66% to 62%. The managers are particularly concerned that this decrease in assessment continue in view of the rapid growth in the OAS budget over the years. Accordingly, the Department of State is expected, in consultation with the appropriate Committees of Congress, to seek to continue this reduction in the U.S. assessment annually, so that within the next few years the United States assessment will be no more than 50% of the budget of the OAS and other Latin American organizations.

*Contributions for international peacekeeping activities*

Amendment No. 10: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $27,000,000.

*Missions to international organizations*

Amendment No. 11: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $12,000,000. The $12,000,000 is to be allocated as follows:

| | |
|---|---|
| U.S. Missions to: | |
| United Nations | $4,037,000 |
| International Organizations, Geneva | 4,710,000 |
| International Organizations, Vienna | 1,036,000 |
| International Civil Aviation Organization | 290,000 |
| Organization of American States | 914,000 |
| United Nations Educational, Scientific and Cultural Organization | 420,000 |
| The Food and Agriculture Organization | 210,000 |
| United Nations Environment Program | 143,000 |
| U.S. Congressional groups to: | |
| Interparliamentary Union | 90,000 |
| North Atlantic Assembly | 50,000 |
| Canada-U.S. Interparliamentary Group | 50,000 |
| Mexico-U.S. Interparliamentary Group | 50,000 |
| Total | 12,000,000 |

*International conferences and contingencies*

Amendment No. 12: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $8,000,000, to remain available until expended, of which not to exceed $175,000 may be expended for representation allowances and official entertainment.

*International trade negotiations*

Amendment No. 13: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $4,717,000.

*International commissions*

Amendment No. 14: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which inserts a heading.

*International Boundary and Water Commission, United States and Mexico*

Amendments Nos. 15, 16, and 17: Reported in technical disagreement. The managers on the part of the House will offer motions to recede and concur in the amendments of the Senate which insert language regarding the use of funds provided to the Commission and appropriate $6,800,000 for "Salaries and Expenses" and $3,900,000 for "construction".

*American sections, international commissions*

Amendment No. 18: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriate $2,500,000 for expenses of the International Joint Commission and the International Boundary Commission.

*International fisheries commissions*

Amendment No. 19: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $6,600,000.

*General provisions—Department of State*

Amendment No. 20: Inserts section number.

Amendment No. 21: Changes section number.

TITLE II—DEPARTMENT OF JUSTICE

GENERAL ADMINISTRATION

*Salaries and Expenses*

Amendment No. 22: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which appropriates $28,474,000 instead of $28,396,000 as proposed by the Senate. The text of the amendment is as follows:

In lieu of the matter proposed by said amendment, insert:

GENERAL ADMINISTRATION

*Salaries and Expenses*

For expenses necessary for the administration of the Department of Justice, including hire of passenger motor vehicles; and miscellaneous and emergency expenses authorized or approved by the Attorney General or the Assistant Attorney General for Administration; $28,474,000, of which $5,111,000 is for the United States Parole Commission and $1,700,000 is for the Federal justice research program, the latter amount to remain available until expended.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The amount provided in the amendment includes funds for nondiscretionary increases as well as funds for five additional positions in the Office of Management and Finance, twelve additional positions for the U.S. Parole Commission, funds for increased travel expenses connected with Judicial Nominating Committees, and funds for additional staff years in the Offices of Public Information and Improvements in the Administration of Justice.

*Legal activities*

Amendment No. 23: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which inserts a heading.

*Salaries and expenses, general legal activities*

Amendment No. 24: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which appropriates $90,550,000 instead of $90,826,000 as proposed by the Senate. The text of the amendment is as follows:

In lieu of the matter proposed by said amendment, insert:

*Salaries and expenses, general legal activities (including transfer of funds)*

For expenses necessary for the legal activities of the Department of Justice, not otherwise provided for, including miscellaneous and emergency expenses authorized

or approved by the Attorney General or the Assistant Attorney General for Administration; not to exceed $20,000 for expenses of collecting of evidence, to be expended under the direction of the Attorney General and accounted for solely on his certificate; and advances of public moneys pursuant to law (31 U.S.C. 529); $90,550,000: *Provided*, That not to exceed $105,000 may be transferred to this appropriation from the "Alien Property Fund, World War II", for the general administrative expenses of alien property activities, including rent of private or Government-owned space in the District of Columbia.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The amount provided in the amendment includes the full amount of the budget request plus funds for 25 additional positions for the Land and Natural Resources Division.

The conferees have provided no funding for private counsel fees. In the event that any such funds are required, the conferees direct the Department to submit a reprogramming request before any funds may be obligated.

*Salaries and expenses, antitrust division*

Amendment No. 25: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which appropriates $46,377,000 instead of $47,080,000 as proposed by the Senate. The text of the amendment is as follows:

In lieu of the matter proposed by said amendment, insert:

*Salaries and expenses, antitrust division*

For expenses necessary for the enforcement of antitrust, consumer protection and kindred laws, including $10,000,000 for antitrust enforcement grants to the States authorized by section 309 of the Omnibus Crime Control and Safe Streets Act of 1968, as amended, $46,377,000: *Provided*, That none of this appropriation shall be expended for the establishment and maintenance of permanent regional offices of the Antitrust Division.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

*Salaries and expenses, United States attorneys and marshals*

Amendment No. 26: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $196,700,000, authorizes the lease of not more than 800 passenger motor vehicles from the General Services Administration of which not more than 570 shall be for police-type use, and provides that GSA may purchase not more than 100 replacement vehicles without regard to the purchase price limitation for the current fiscal year.

*Support of United States prisoners*

Amendment No. 27: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $25,100,000.

*Fees and expenses of witnesses*

Amendment No. 28: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $20,000,000 and provides that funds shall not be used to pay any witness more than one attendance fee for any one calendar day.

*Salaries and expenses, Community Relations Service*

Amendment No. 29: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $5,353,000.

FEDERAL BUREAU OF INVESTIGATION

*Salaries and expenses*

Amendment No. 30: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert:

*Salaries and expenses*

For expenses necessary for the detection and prosecution of crimes against the United States; protection of the person of the President of the United States and the person of the Attorney General; acquisition, collection, classification and preservation of identification and other records and their exchange with, and for the official use of, the duly authorized officials of the Federal Government, of States, cities, and other institutions, such exchange to be subject to cancellation if dissemination is made outside the receiving departments or related agencies; and such other investigations regarding official matters under the control of the Department of Justice and the Department of State as may be directed by the Attorney General; including purchase for police-type use without regard to the general purchase price limitation for the current fiscal year (not to exceed one thousand three hundred and seventy-four for replacement only) and hire of passenger motor vehicles; acquisition, lease, maintenance and operation of aircraft; firearms and ammunition; payment of rewards; benefits in accordance with those provided under 22 U.S.C. 1136(9)-(11) and 22 U.S.C. 1157, under regulations prescribed by the Secretary of State; and not to exceed $70,000 to meet unforeseen emergencies of a confidential character, to be expended under the direction of the Attorney General, and to be accounted for solely on his certificate; $561,341,000

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The amount provided in the amendment includes the full amount of the budget request plus the following additional amounts: (1) $1,000,000 for domestic security and terrorism investigations, (2) $1,000,000 for coordination of domestic security and terrorism investigations, and (3) $2,591,000 for bank robbery investigations.

It is the intention of the managers that the Federal Bureau of Investigation will not remove or further reduce the agent presence in those rural and heavily Indian populated areas that have been traditionally served and that those areas continue to receive the benefit of agents at the same levels of the past few years.

IMMIGRATION AND NATURALIZATION SERVICE

Amendment No. 31: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which appropriates $299,350,000 instead of $299,800,000 as proposed by the Senate. The text of the amendment is as follows:

In lieu of the matter proposed by said amendment, insert:

IMMIGRATION AND NATURALIZATION SERVICE

*Salaries and expenses*

For expenses, not otherwise provided for, necessary for the administration and enforcement of the laws relating to immigration, naturalization, and alien registration, including advance of cash to aliens for meals and lodging while en route; payment of allowances (at a rate not in excess of $1 per day) to aliens, while held in custody under the immigration laws, for work performed; payment of expenses and allowances incurred in tracking lost persons as required by public exigencies; payment of rewards; not to exceed $50,000 to meet unforseen emergencies of a confidential character, to be expended under the direction of the Attorney General and accounted for solely on his certificate; purchase for police-type use without regard to the general purchase price limitation for the current fiscal year (not to exceed four hundred seven, of which two hundred ninety-eight shall be for replacement only) and hire of passenger motor vehicles; acquisition, lease, maintenance and operation of aircraft; firearms and ammunition, attendance at firearms matches; refunds of head tax, maintenance bills, immigration fines, and other items properly returnable, except deposits of aliens who become public charges and deposits to secure payment of fines and passage money; operation, maintenance, remodeling, and repair of buildings and the purchase of equipment incident thereto; acquisition of land as sites for enforcement fence and construction incident to such fence; reimbursement to the General Services Administration for security guard services for protection of confidential files; benefits in accordance with those provided under 22 U.S.C. 1136(9)-(11) and 22 U.S.C. 1157 under regulations prescribed by the Secretary of State; research related to immigration enforcement; $299,350,000, of which not to exceed $400,000 shall remain available for such research until expended: *Provided*, That of the amount herein appropriated, not to exceed $50,000 may be used for the emergency replacement of aircraft upon certificate of the Attorney General.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The amount provided in the amendment reflects approval of all items proposed in the budget, but will provide funds for the 903 additional positions at a 50% lapse rate. In addition, funds are included for a reduction of lapse on existing positions, a new district office for the Carolinas, and fencing in the Yuma, Arizona sector ($1,500,000).

DRUG ENFORCEMENT ADMINISTRATION

*Salaries and expenses*

Amendment No. 32: Deletes proposal of the Senate which would prohibit establishment of a ceiling on full-time permanent positions for DEA at less than 4,075.

*Federal Prison System*

Amendment No. 33: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which inserts a heading.

*Salaries and expenses, Bureau of Prisons*

Amendment No. 34: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert:

*Salaries and expenses, Bureau of Prisons*

For expenses necessary for the administration, operation, and maintenance of Federal penal and correctional institutions, including supervision and support of United States prisoners in non-Federal institutions; purchase of (not to exceed thirty-two of which twenty-four are for replacement only) and hire of law enforcement and passenger motor vehicles; compilation of statistics relating to prisoners in Federal penal and correctional institutions; assistance to State and local governments to improve their correctional systems; firearms and ammunition; medals and other awards; payment of rewards; purchase and exchange of farm products and livestock; construction of buildings at prison camps; and acquisition of land as authorized by section 4010 of title 18, United States Code; $315,200,000: *Provided*, That there

may be transferred to the Health Services Administration such amounts as may be necessary, in the discretion of the Attorney General, for direct expenditures by that Administration for medical relief for inmates of Federal penal and correctional institutions.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

*National Institute of Corrections*

Amendment No. 35: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $9,920,000.

*Buildings and facilities*

Amendment No. 36: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $35,280,000.

*Federal Prison Industries, Incorporated*

Amendment No. 37: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which authorizes the Federal Prison Industries, Inc. to make such expenditures as may be necessary in carrying out the program set forth in the budget.

*Limitation on administrative and vocational training expenses, Federal Prison Industries, Incorporated*

Amendment No. 38: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which sets a limit of $2,041,000 on funds for administrative expenses and $3,040,000 on expenses of vocational training of prisoners.

LAW ENFORCEMENT ASSISTANCE ADMINISTRATION

*Salaries and expenses*

Amendment No. 39: Appropriates $646,488,000 instead of $641,488,000 as proposed by the House and $656,488,000 as proposed by the Senate. The amount agreed to by the conferees includes $50,000,000 for planning grants, $7,000,000 for community anticrime programs, $25,000,000 (plus $15,000,000 from carryover funds) for law enforcement education (LEEP), and $100,000,000 for juvenile justice and delinquency prevention.

Funds requested for an urban crime prevention program are not included within the amount recommended by the conferees. The conferees feel this item needs further review and would suggest consideration of the request in conjunction with other programs in the President's urban proposal.

*General provisions—Department of Justice*

Amendment No. 40: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which sets a ceiling of $18,500 on funds available for official reception and representation expenses.

Amendment No. 41: Reported in technical dsagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which states that appropriations and authorizations made in this title which are available for attendance at meetings shall be expended in accordance with regulations prescribed by the Attorney General.

Amendment No. 42: Deletes proposal of the Senate to prohibit establishment of a ceiling on full-time permanent positions for the Department of Justice at less than 53,410.

Amendment No. 43: Deletes proposal of the Senate to prohibit us of funds to purchase, lease, or otherwise acquire message-switching equipment until approval is given by the Judiciary Committees of the House and Senate.

TITLE III—DEPARTMENT OF COMMERCE

GENERAL ADMINISTRATION

*Salaries and expenses*

Amendment No. 44: Appropriates $24,900,000 instead of $24,335,000 as proposed by the House and $25,025,000 as proposed by the Senate.

The amount provided includes $202,000 and 6 positions for an expanded congressional liaison staff. The amount also includes $370,000 and 10 positions which were not allowed by the House for the Office of Policy Development. The conferees are concerned about the number of staff for the Office. The conferees recommend that the Secretary review the functions and staff resources of the Office and transfer those positions which are not needed to other parts of the Department where they might be better utilized. The conferees expect the Secretary to report to the House and Senate Appropriations Committees on the progress of this effort.

BUREAU OF THE CENSUS

*Salaries and expenses*

Amendment No. 45: Appropriates $49,286,000 instead of $48,594,000 as proposed by the House and $49,835,000 as proposed by the Senate.

The amount provided includes $878,000 and 24 positions to develop a survey of income, assets and social program participation, and $125,000 to reimburse the Internal Revenue Service for collection of wage data in order to avoid duplicate requests for data on small firms.

*Periodic censuses and programs*

Amendment No. 46: Appropriates $196,800,000 as proposed by the Senate instead of $175,000,000 as proposed by the House.

Amendment No. 47: Inserts language proposed by the Senate which specifies that the exemption from the provisions of 29 U.S.C. 206 and 207 contained in the House bill for certain enumerators applies to the 1980 Decennial Census.

ECONOMIC AND STATISTICAL ANALYSIS

*Salaries and expenses*

Amendment No. 48: Appropriates $16,430,000 instead of $16,080,000 as proposed by the House and $16,875,000 as proposed by the Senate. The amount provided includes $350,000 and 10 positions for the Office of Federal Statistical Policy and Standards.

The conferees are agreed that the project to develop quarterly estimates of national defense purchases in constant dollars should continue to be financed on a reimbursable basis from the Department of Defense.

ECONOMIC DEVELOPMENT ADMINISTRATION

*Economic development assistance programs*

Amendment No. 49: Inserts language proposed by the Senate which makes the appropriation available for programs authorized by title II of the Public Werks and Economic Development Act of 1965, as amended.

Amendment No. 50: Appropriates $507,525,000 instead of $484,325,000 as proposed by the House and $547,775,000 as proposed by the Senate and inserts language providing for a limitation of $75,000,000 on obligations for new loans and guarantees under the Economic Development Revolving Fund instead of a limitation of $58,000,000 on total obligations from such fund as proposed by the House and a limitation of $75,000,000 on obligations for business loans and guarantees from such fund as proposed by the Senate.

The following table summarizes the conference agreement:

| Title and program: | *Amount* |
|---|---|
| Title I—Public Works Grants | $196,000,000 |
| Title II—Business Loans and Guarantees | 21,500,000 |
| Economic Development Revolving Fund | (75,000,000) |
| Title III—Planning, Technical Assistance, Research and Information | 81,425,000 |
| Title IV—District Programs and Indians | 30,000,000 |
| Title IX—Special Economic Adjustment Assistance | 88,500,000 |
| Total, Public Works and Economic Development Act | 417,425,000 |
| Title II—Trade Act of 1974 | 90,100,000 |
| Grand total | 507,525,000 |

The conferees are agreed that the Economic Development Administration should allocate program funds to each regional office in fiscal year 1979 in amounts that are not less than what that region could expect to receive based on the fiscal year 1975–77 percent share of funds obligated in those regions under all regular EDA programs, excluding Sec. 304 allocations, drought, Title X and Local Public Works programs.

*Local public works program*

Amendment No. 51: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert:

*Local public works program*

For administrative expenses, including expenses for program evaluation by the Secretary of Commerce, necessary to carry out title I of the Public Works Employment Act of 1976 (Public Law 94–369), $10,600,000.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

*Administration of economic development assistance programs*

Amendment No. 52: Appropriates $29,300,000 instead of $28,690,000 as proposed by the House and $29,950,000 as proposed by the Senate.

The amount provided includes funds for 25 staff years above the number requested in full-time permanent positions funded by rate to approximately 7%.

Amendment No. 53: Deletes language proposed by Senate that no ceiling shall be established at less than 878 on employment in full-time permanent positions funded by this appropriation.

INDUSTRY AND TRADE ADMINISTRATION

*Operations and administration*

Amendment No. 54: Appropriates $71,775,000 instead of $68,175,000 as proposed by the House and $71,900,000 as proposed by the Senate. The amount provided includes $1,200,000 and 52 positions to implement the 1977 amendments to the Export Administration Act and $2,400,000 for a computerized data system for matching textile imports against existing quotas and consultation levels.

The conferees have not agreed to the proposed reduction of $425,000 and 15 positions for field operations and expect this program to be maintained at the same level as provided for fiscal year 1978.

Amendment No. 55: Deletes language proposed by the Senate that no ceiling shall be established at less than 1,700 on employment in full-time permanent positions funded by this appropriation.

MINORITY BUSINESS ENTERPRISE

*Minority business development*

Amendment No. 56: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $57,965,000 and inserts language making the appropriation available for expenses of grants, contracts, or other agreements with public or private organizations.

Amendment No. 57: Provides for a limitation of $44,950,000 on funds which remain available until expended as proposed by the Senate instead of a limitation of $44,800,000 on such funds as proposed by the House.

Amendment No. 58: Provides for a limitation of $13,015,000 for program development and management as proposed by the Senate instead of $13,200,000 for this purpose as proposed by the House.

UNITED STATES TRAVEL SERVICE

*Salaries and expenses*

Amendment No. 59: Appropriates $13,500,000 as proposed by the House instead of $13,800,000 as proposed by the Senate.

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

*Operations, research, and facilities*

Amendment No. 60: Appropriates $660,650,000 instead of $651,770,000 as proposed by the House and $674,000,000 as proposed by the Senate.

The amount appropriated includes a total of $1,473,000 for expanded stock assessment surveys and analysis of data from menhaden fisheries surveys; $2,330,000 for construction of pollution abatement facilities at fish hatcheries on the Columbia River; $657,000 for operation of an enforcement information system and additional collection of data on marine recreational fisheries; $785,000 for expansion of the Puget Sound Marine Ecosystem Analysis Project; $510,000 for improving water quality sensors and diver effectiveness and safety; and $1,500,000 for purchasing a computer at the Geophysical Fluid Dynamics Laboratory. The amount provided also includes $200,000 for architectural and engineering design studies for a new fisheries laboratory at Manchester, Washington; $175,000 for additional recreational fisheries surveys: $600,000 for additional microconstituent research; $400,000 for an improved Geodetic Network program in South Carolina; $250,000 for initiating the Ocean Pulse project; $300,000 for additional support for aquaculture programs; and a total of $108,000 for restoration of the fiscal year 1978 levels for menhaden utilization research and the Northeast sea herring study.

The conferees are agreed that a total of $2,500,000 is to be allocated for support of the tuna fishing development programs of the Pacific Tuna Development Foundation from the permanent appropriation "Promote and develop fishery products and research pertaining to American fisheries."

Amendment No. 61: Provides that $5,000,000 shall be transferred to this appropriation from the fund entitled "Promote and develop fishery products and research pertaining to American fisheries" as proposed by the House.

Amendment No. 62: Deletes language proposed by the Senate which provides that no ceiling shall be established at less than 11,700 on employment in full-time permanent positions funded by this appropriation.

*Coastal zone management*

Amendment No. 63: Appropriates $57,200,000 as proposed by the House instead of $57,600,000 as proposed by the Senate.

Amendment No. 64: Deletes language proposed by the Senate which provides that no ceiling shall be established at less than 94 on employment in full-time permanent positions funded by this appropriation.

*Coastal energy impact fund*

Amendment No. 65: Deletes proposal of the Senate to appropriate $4,000,000, but provides language which establishes a limitation of $200,000,000 on obligations for payments pursuant to subsections 308 (c), (d), and (f) of the Coastal Zone Management Act of 1972, as amended, as proposed by the House instead of a limitation of $204,000,000 on such obligations as proposed by the Senate.

NATIONAL FIRE PREVENTION AND CONTROL ADMINISTRATION

*Operations, research, and administration*

Amendment No. 66: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which appropriates $17,395,000 instead of $18,300,000 as proposed by the Senate. The text of the amendment is as follows:

In lieu of the matter proposed by said amendment, insert:

NATIONAL FIRE PREVENTION AND CONTROL ADMINISTRATION

*Operations, research, and administration*

For expenses necessary to carry out the provisions of the Federal Fire Prevention and Control Act of 1974, as amended, $17,395,000, to remain available until expended.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The amount provided includes $500,000 for development of a residential sprinkler standard and $415,000 for a demonstration project on an arson early warning system. The conferees strongly support the efforts of the National Fire Prevention and Control Administration to develop anti-arson programs and encourage the allocation of additional resources to this area to the extent possible.

*Science and technical research*

Scientific and Technical Research and Services

Amendment No. 67: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment of the Senate $87,700,000 instead of $88,150,000 as proposed by the Senate. The text of the amendment is as follows:

In lieu of the matter inserted by said amendment, insert:

SCIENCE AND TECHNICAL RESEARCH

*Scientific and technical research and services*

For necessary expenses of the National Bureau of Standards, including the acquisition of buildings, grounds, and other facilities; and the National Technical Information Service; $87,700,000, to remain available until expended, of which not to exceed $3,300,000 may be transferred to the "Working Capital Fund", National Bureau of Standards, for additional capital.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The amount provided includes a total of $11,416,000 to begin full implementation of the Federal computer standards program.

NATIONAL TELECOMMUNICATIONS AND INFORMATION ADMINISTRATION

*Salaries and expenses*

Amendment No. 68: Appropriates $11,500,000 instead of $10,965,000 as proposed by the House and $12,000,000 as proposed by the Senate.

MARITIME ADMINISTRATION

Amendment No. 69: Inserts heading.

*Ship construction*

Amendment No. 70: Appropriates $157,000,000, for construction-differential subsidies as proposed by the Senate.

*Operating-differential subsidies*

(Liquidation of Contract Authority)

Amendment No. 71: Provides $250,000,000 for payment of obligations incurred for operating-differential subsidies as proposed by the Senate.

*Research and development*

Amendment No. 72: Appropriates $17,500,000 for expenses of the research and development program of the Maritime Administration as proposed by the Senate.

*Operations and training*

Amendment No. 73: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides $57,150,000 for administrative expenses of the Maritime Administration, maintenance of the national defense reserve fleet, the cost of training at the U.S. Merchant Marine Academy, and Federal financial support to the State marine schools.

GENERAL PROVISIONS—DEPARTMENT OF COMMERCE

Amendment No. 74: Deletes Sec. 306 proposed by the Senate which provides that no ceiling on employment in full-time permanent positions funded by this title shall be established at less than 30,100.

TITLE IV—THE JUDICIARY

SUPREME COURT OF THE UNITED STATES

*Salaries and expenses*

Amendment No. 75: Deletes proposal of the Senate to insert language authorizing the use of funds for the hire of automobiles for the Associate Justices.

Amendment No. 76: Appropriates $9,690,000 instead of $8,960,000 as proposed by the House and $9,718,000 as proposed by the Senate. This amount provides the full amount of the amended budget request, plus $260,000 to provide each justice with two additional stenographers.

*Care of the building and grounds*

Amendment No. 77: Appropriates $1,450,000 as proposed by the Senate instead of $999,600 as proposed by the House.

Amendment No. 78: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which amends the statutes by adding a subsection to permit funds to be used for expenses of heating and air-conditioning supplied by the Capitol Power Plant.

*Courts of Appeals, District Courts and Other Judicial Services*

Salaries of Supporting Personnel

Amendment No. 79: Appropriates $166,195,000 as proposed by the Senate instead of $164,300,000 as proposed by the House.

Amendment No. 80: Provides that the salary of secretaries to circuit and district judges shall not exceed the compensation for GS–11, as proposed by the Senate, instead of the compensation of GS–10, as proposed by the House.

Amendments No. 81 through 84: Increase limitations on the aggregate salaries which may be paid to secretaries and law clerks appointed by each judge, as proposed by the Senate.

*Travel and miscellaneous expenses*

Amendment No. 85: Appropriates $31,914,000 as proposed by the Senate instead of $31,700,000 as proposed by the House.

*Salaries and expenses of magistrates*

Amendment No. 86: Appropriates $19,411,000 as proposed by the Senate instead of $18,400,000 as proposed by the House.

*Space and facilities*

Amendment No. 87: Appropriates $98,400,000 as proposed by the Senate instead of $99,400,000 as proposed by the House.

*Pretrial services agencies*

Amendment No. 88: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $5,000,000, to remain available until expended.

TITLE V—RELATED AGENCIES

ARMS CONTROL AND DISARMAMENT AGENCY

*Arms control and disarmament activities*

Amendment No. 89: Appropriates $16,395,000, including not to exceed $15,000 for official reception and representation expenses, as proposed by the Senate.

BOARD FOR INTERNATIONAL BROADCASTING

*Grants and expenses*

Amendment No. 90: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which includes a limitation of $52,000 for official and representation expenses of a limitation of $65,000 as proposed by the Senate. The text of the amendment is as follows:

In lieu of the matter proposed by said amendment insert:

BOARD FOR INTERNATIONAL BROADCASTING

*Grants and expenses*

For expenses of the Board for International Broadcasting, including grants to RFE/RL, Inc., $85,000,000, of which $2,000,000, to remain available until expended, shall be available only for fluctuations in foreign currency exchange rates in accordance with the provisions of section 8 of the Board for International Broadcasting Act of 1973, as amended: *Provided*, That not to exceed $52,000 shall be available for official reception and representation expenses.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

COMMISSION ON CIVIL RIGHTS

*Salaries and expenses*

Amendment No. 91: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $10,752,000.

COMMISSION ON SECURITY AND COOPERATION IN EUROPE

*Salaries and expenses*

Amendment No. 92: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $521,000 instead of $350,000 as proposed by the House.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

*Salaries and expenses*

Amendment No. 93: Inserts the word "enforcement", as proposed by the Senate, so that the language reads "payments to State and local enforcement agencies".

Amendment No. 94: Appropriates $107,000,000 as proposed by the Senate instead of $110,000,000 as proposed by the House.

FEDERAL COMMUNICATIONS COMMISSION

*Salaries and expenses*

Amendment No. 95: Provides for a limitation of $3,000 for official reception and representation expenses as proposed by the House instead of a limitation of $5,000 for such expenses as proposed by the Senate.

Amendment No. 96: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which inserts language making not to exceed $35,000 available to provide commemorative stamp albums to delegates to the 1979 World Administrative Radio Conference.

Amendment No. 97: Appropriates $70,446,000 as proposed by the Senate instead of $68,535,000 as proposed by the House.

Amendment No. 98: Deletes language proposed by the Senate which provides that no ceiling shall be established at less than 2,283 on employment in full-time permanent positions funded by this appropriation.

FEDERAL MARITIME COMMISSION

*Salaries and expenses*

Amendment No. 99: Appropriates $10,550,000 as proposed by the Senate instead of $10,500,00 as proposed by the House.

FEDERAL TRADE COMMISSION

*Salaries and expenses*

Amendment No. 100: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which appropriates $64,750,000 instead of $65,900,000 as proposed by the Senate. The text of the amendment is as follows:

In lieu of the matter proposed by said amendment: insert:

FEDERAL TRADE COMMISSION

*Salaries and expenses*

For necessary expenses of the Federal Trade Commission, including uniforms or allowances therefor, as authorized by 5 U.S.C. 5901–5902; services as authorized by 5 U.S.C. 3109; hire of passenger motor vehicles; and not to exceed $1,500 for official reception and representation expenses; $64.750,000.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The amount provided includes funds for 1,719 staff years. It is the intention of the managers that none of the funds appropriated by this Act may be used to promulgate a trade regulation rule concerning television advertising to children.

The Commission has stated that it does not intend to issue any rule on children's advertising in fiscal year 1979, and the conference report on H.R. 3816 provides that all trade regulation rules of the Commission must be submitted for review by Congress and possible legislative veto, thus assuring that the proper authorizing committees will review any rule on children's advertising prior to its effective date.

None of the foregoing is intended to restrict the authority of the Federal Trade Commission to proceed under section 5 of the Federal Trade Commission Act on a case-by-case basis.

The conferees reaffirm their recognition that potential constitutional problems are raised by this proceeding. The conferees wish to reemphasize to the Commission that such questions are of overriding importance, and both the House and Senate Committees will review the Commission's performance in this area over the coming year.

The conferees wish to emphasize that public participation funds authorized by 15 U.S.C. 57a should be used in a fair and balanced manner to develop fully an accurate and factual record on such matters.

The conferees direct that any F.T.C. study of the structure, conduct and performance of the auto industry should fully include foreign producers. The conferees note that less than one-third of all automotive vehicles produced in 1977 were produced in the United States and that the import penetration of foreign manufacturers in the United States automobile market is substantial. The conferees believe that a study of the industry which fails to take account of competitive factors in the world market for automotive products would lack balance and objectivity. It is the intention of the conferees that, if such a study is to be continued, it must include major foreign producers to the same extent as domestic producers and be conducted in a manner that minimizes the problems pointed out by the reports of the House and Senate Appropriations Committees. The conferees realize that the requests for information may vary among producers.

INTERNATIONAL COMMUNICATION AGENCY

Amendment No. 101: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which inserts a heading.

*Salaries and expenses*

Amendment No. 102: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $368,000,000 of which $7,941,000 shall remain available until expended and $410,000 may be used for representation abroad.

*Salaries and expenses (special foreign currency program)*

Amendment No. 103: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $9,824,000, to remain available until expended.

CENTER FOR CULTURAL AND TECHNICAL INTERCHANGE BETWEEN EAST AND WEST

Amendment No. 104: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $13,500,000.

ACQUISITION AND CONSTRUCTION OF RADIO FACILITIES

Amendment No. 105: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $19,685,000 to remain available until expended.

INTERNATIONAL TRADE COMMISSION

*Salaries and expenses*

Amendment No. 106: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which appropriates $12,950,000 instead of $13,100,000 as proposed by the Senate.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

LEGAL SERVICES CORPORATION

*Payment to the Legal Services Corporation*

Amendment No. 107: Appropriates $270,000,000 instead of $285,000,000 as proposed by the House and $255,000,000 as proposed by the Senate.

MARINE MAMMAL COMMISSION

*Salaries and expenses*

Amendment No. 108: Appropriates $702,000 as proposed by the House instead of $840,000 as proposed by the Senate.

COMMISSION ON GLOBAL HUNGER AND MALNUTRITION

*Salaries and expenses*

Amendment No. 109: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which appropriates $1,300,000 instead of $1,500,000 as proposed by the Senate. The text of the amendment is as follows:

In lieu of the matter proposed by said amendment, insert:

COMMISSION ON GLOBAL HUNGER AND MALNUTRITION

*Salaries and expenses*

For necessary expenses of the Commission on Global Hunger and Malnutrition, includ-

ing services as authorized by 5 U.S.C. 3109, $1,300,000.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

RENEGOTIATION BOARD

*Salaries and expenses*

Amendment No. 110: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which authorizes the use of funds for termination and cessation of the activities of the Renegotiation Board.

Amendment No. 111: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which appropriates $5,260,000 instead of $6,260,000 as proposed by the Senate, and $3,000,000 as proposed by the House.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The amount provided in the amendment includes $2,260,000 for termination costs.

Amendment No. 112: Makes funds available until March 31, 1979, as proposed by the House instead of May 31, 1979 as proposed by the Senate.

Amendment No. 113: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert: ": Provided, That all property (including records) of the Board shall be transferred to the Administrator, General Services Administration, upon cessation of the Board's activities, or on March 31, 1979, whichever first occurs.".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

SECURITIES AND EXCHANGE COMMISSION

*Salaries and expenses*

Amendment No. 114: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $64,650,000 for salaries and expenses of the Commission.

SMALL BUSINESS ADMINISTRATION

*Salaries and expenses*

Amendment No. 115; Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: "$187,000,000, and in addition $13,000,000 for disaster loanmaking activities shall be transferred to this appropriation from the "Disaster Loan Fund".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate. The conference agreement is in lieu of $180,000,000 as proposed by the House, and $193,000,000 as proposed by the Senate.

The amount recommended by the conferees will provide for the additional 321 positions for finance and investment as well as all other increases to the budget provided in the House bill. In addition, the increase over the budget estimate reflects the conferee's belief that SBA should place a greater emphasis on the advocacy, economic research procurement assistance, technical assistance, and management assistance programs. The conferees direct SBA to allocate greater portion of its resources and personnel to these non-lending activities.

Specifically, the conferees direct SBA to fund these programs at the following levels for Fiscal Year 1979:

| | |
|---|---|
| 1. Procurement Assistance | $16,700,000 |
| 2. Technology Assistance | 2,172,000 |
| 3. Management Assistance | 21,965,000 |
| 4. Small Business Development Centers | 8,650,000 |
| 5. 7(j) Management Assistance for Minority business | 12,000,000 |
| 6. Economic Research | 4,000,000 |
| 7. Advocacy | 2,064,000 |
| 8. Public Communications | 657,000 |
| 9. Data Management | 4,500,000 |

The amount recommended includes $1,000,000 to further develop the small business data base as well as 16 additional positions to carry out a pilot decentralized 8(a) program in Region IV.

Amendment No. 116: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed to be stricken and inserted by said amendment, insert: ": Provided, That no part of this appropriation shall be used to fund any small business development center or university business development center pilot program, or any combination thereof, in any state in excess of $300,000 per state until enactment into law of H.R. 11445, or similar legislation.".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

White House Conference on Small Business Amendment No. 117: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which appropriates $4,000,000 instead of $4,500,000 as proposed by the Senate. The text of the amendment is as follows:

In lieu of the matter proposed by said amendment, insert:

WHITE HOUSE CONFERENCE ON SMALL BUSINESS

For necessary expenses of the White House Conference on Small Business. $4,000,000, to remain available until expended.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

BUSINESS LOAN AND INVESTMENT FUND

Amendment No. 118: Appropriates $520,500,000 instead of $641,500,000 as proposed by the House and $368,780,000 as proposed by the Senate.

The amount agreed to by the conferees is to carry out loan programs under the Business Loan and Investment Fund at the following levels:

[Amounts in millions]

| | |
|---|---|
| 7(a) Business Loans: | |
| Direct & Imm. Part | $220,000 |
| Guaranteed | 3,300,000 |
| 7(h) Handicapped Loans: | |
| Direct & Imm. Part | 16,000 |
| Guaranteed | 6,000 |
| 7(i) Economic Opportunity Loans: | |
| Direct & Imm. Part | 64,000 |
| Guaranteed | 64,000 |
| Development Company Loans: | |
| Direct & Imm. Part | 45,000 |
| Guaranteed | 50,000 |
| Investment Company Assistance: | |
| Direct & Imm. Part | 22,000 |
| Guaranteed | 125,000 |
| 7(l) Energy Loans: | |
| Direct & Imm. Part | 5,000 |
| Guaranteed | 1,000 |

SURETY BOND GUARANTEES RESOLVING FUND

Amendment No. 119: Appropriates $35,000,000 as proposed by the House instead of $40,000,000 as proposed by the Senate.

UNITED STATES METRIC BOARD

*Salaries and expenses*

Amendment No. 120: Appropriates $1,575,000 for salaries and expenses of the Metric Board instead of $1,800,000 proposed by the Senate.

The amount provided includes funds for 25 staff positions for the Board.

TITLE VI—GENERAL PROVISIONS

Amendment No. 121: Deletes proposal of the House which would withhold from obligation or expenditure two percentum of the total budget authority in the Act on payments not required by law.

Amendment No. 122: Deletes proposal of the Senate which would prohibit the use of funds to purchase transportation on foreign flag carriers if similar service is available on United States carriers.

Amendment No. 123. Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert:

SEC. 605. It is the sense of the Congress that—

(1) the Government of the United States should give special consideration to the plight of refugees from Democratic Kampuchea (Cambodia) in view of the magnitude and severity of the violations of human rights committed by the Government of Democratic Kampuchea (Cambodia); and

(2) the Attorney General should exercise his authority under section 212(d)(5) of the Immigration and Nationality Act to parole into the United States—

(A) for the fiscal year 1979, 7,500 aliens who are nationals or citizens of Democratic Kampuchea (Cambodia) and who are applying for admission to the United States; and

(B) for the fiscal year 1980, 7,500 such aliens.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 124: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which changes the section number from 607 to 606. The provision prohibits the availability of funds appropriated or otherwise made available by this Act for the Advisory Committee on the Bureau of the Census or any other advisory committee to the Department of Commerce with similar duties unless such committee has filed a charter before July 1, 1978, in accordance with section 9 of the Federal Advisory Committee Act.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

*Position ceilings*

The conferees have deleted the minimum position ceilings inserted by the Senate in 14 different instances in the bill. It is not the intention to indicate a lack of concern about the imposition of arbitrary ceilings, but instead return to the traditional policy that the number of personnel to be employed should be governed by the amount appropriated. Over the last several years the Office of Management and Budget has broken this long-standing policy by establishing personnel ceilings at levels lower than the number that could be funded by the appropriation. There is no problem when the ceilings are established on the basis of good, prudent, and efficient management. However, there is substantial evidence that the ceilings, for example in the case of the National Atmospheric and Oceanic Administration, have been employed in order to minimize Federal employment by contracting out functions at a higher cost to the government. The conferees expect the ceilings to be established in conformance with the amount appropriated and not in an arbitrary fashion.

*Format of budget estimates*

The conferees agree with the comments in the Senate report concerning the format of budget estimates.

The revised budget presentations of the Law Enforcement Assistance Administration and the Economic Development Administration for fiscal year 1979 were not satisfactory. Both of these agencies are of significant congressional and public interest. It was difficult to respond to this interest in the absence of the traditional budget structure that was based on the authorization acts of these agencies. The conferees are agreed that until the authorizations are revised to reflect the new operating structures, the budget estimates for these two agencies must conform to the current structure of the authorizing legislation.

CONFERENCE TOTAL—WITH COMPARISONS

The total new budget (obligational) authority for the fiscal year 1979 recommended by the Committee of Conference, with comparisons to the fiscal year 1978 amount, the 1979 budget estimates, and the House and Senate bills for 1979 follow:

| | |
|---|---|
| New budget (obligational) authority for the fiscal year 1978 | $10,681,876,400 |
| Budget estimates of new (obligational) authority fiscal year, 1979 | [1] 8,660,076,000 |
| House bill, fiscal year 1979 | 4,681,543,600 |
| Senate bill, fiscal year 1979 | 8,436,480,000 |
| Conference agreement | 8,543,070,000 |
| Conference agreement compared with: | |
| New budget (obligational) authority, fiscal year 1978 | −2,138,806,400 |
| Budget estimates of new (obligational) authority, fiscal year 1979 | −117,006,000 |
| House bill, fiscal year 1979 | +3,861,526,400 |
| Senate bill, fiscal year 1979 | +106,590,000 |

[1] Includes $21,562,400 of budget estimates not considered by the House.

Mr. MINETA.
Mr. CAVANAUGH in two instances.
Mr. KASTENMEIER.
Mr. ROSE.
Mrs. LLOYD of Tennessee in two instances.
Mr. DOWNEY.

## ENROLLED BILLS SIGNED

Mr. THOMPSON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 8112. An act to repeal chapter 27 of title 44, United States Code;

H.R. 9471. An act to amend title 5, United States Code, to provide that Japanese-Americans shall be allowed civil service retirement credit for time spent in World War II interment camps; and

H.R. 12915. An act to amend section 2301 of title 44, relating to the National Archives Trust Fund Board.

## BILLS PRESENTED TO THE PRESIDENT

Mr. THOMPSON, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, bills of the House of the following title:

H.R. 8112. To repeal chapter 27 of title 44, United States Code;

H.R. 9471. To amend title 5, United States Code, to provide that Japanese-Americans shall be allowed civil service retirement credit for time spent in World War II interment camps; and

H.R. 12915. To amend section 2301 of title 44, relating to the National Archives Trust Fund Board.

## ADJOURNMENT

Mr. DOWNEY. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 9 o'clock and 2 minutes p.m.) under its previous order, the House adjourned until Wednesday, September 13, 1978, at 10 o'clock a.m.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

4965. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Air Force's proposed sale of certain defense articles and services to Canada (transmittal No. 78–97), pursuant to section 813 of Public Law 94–106; to the Committee on Armed Services.

4966. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Air Force's intention to offer to sell certain defense articles and services to Canada (transmittal No. 78–97), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. JOHNSON of California: Committee on Public Works and Transportation. S. 1029. An act to authorize the Smithsonian Institution to construct museum support facilities; with amendment (Rept. No. 95–1559). Referred to the Committee of the Whole House on the State of the Union.

Mr. FOLEY: Committee of Conference. Conference report on S. 1678 (Rept. No. 95–1560). Ordered to be printed.

Mr. ULLMAN: Committee on Ways and Means. H.R. 12352. A bill to amend the Internal Revenue Code of 1954 to provide that income from certain railroad rolling stock shall be treated as income from sources within the United States; with amendment (Rept. No. 95–1561). Referred to the Committee of the Whole House on the State of the Union.

Mr. PEPPER: Committee on Rules. House Resolution 1343. Resolution providing for the consideration of H.R. 11545. A bill to modify the method of determination quantitative limitations on the importation of certain articles of meat and meat products, to apply quantitative limitations on the importation of certain additional articles of meat, meat products, and livestock, and for other purposes (Rept. No. 95–1562). Referred to the House Calendar.

Mr. FOLEY: Committee on Agriculture. H.R. 13835. A bill to authorize the establishment of an international emergency wheat reserves, and for other related purposes (Rept. No. 95–1564, Pt. I.) Ordered to be printed.

Mr. SLACK: Committee of conference. Conference report on H.R. 12934 (Rept. No. 95–1565). Ordered to be printed.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. FOLEY: Committee on Agriculture. H.R. 12556. A bill for the relief of Batavia Turf Farms, Inc.; with amendment (Rept. No. 95–1563). Referred to the Committee of the Whole House.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BLANCHARD (for himself, Mr. ENGLISH, Mr. HILLIS, Mr. KOSTMAYER, Mr. BENJAMIN, Mr. BLOUIN, Mr. CORNELL, Mr. CORRADA, Mr. DAVIS, Mr. DOWNEY, Mr. DUNCAN of Tennessee, Mr. EDWARDS of California, Mr. ERTEL, Mr. EVANS of Georgia, Mr. EVANS of Indiana, Mr. FRENZEL, Mr. GRASSLEY, Mr. HANNAFORD, Mr. HARKIN, Mr. HEFTEL, Mr. ICHORD, Mr. JONES of Tennessee, Ms. KEYS, Mr. KINDNESS, and Mr. LAFALCE):

H.R. 14056. A bill to require authorization of new budget authority for Government programs at least every 10 years, and for other purposes; jointly, to the Committees on Rules, and Government Operations.

By Mr. LEACH (for himself, Mr. CORCORAN of Illinois, Mr. QUIE, Mr. LAGOMARSINO, Mr. PRICE, Mr. LLOYD of California, and Mr. SIMON):

H.R. 14057. A bill to provide for the striking and public sale of a series of gold medallions commemorating outstanding individuals in the American arts; to the Committee on Banking, Finance and Urban Affairs.

By Mr. MICHEL (for himself, Mr. MINETA, Mr. BALDUS, Mr. BIAGGI, Mr. COCHRAN of Mississippi, Mr. CORMAN, Mr. DIGGS, Mr. EDWARDS of California, Mr. GLICKMAN, Mr. GREEN, Mr. HEFTEL, Mr. OTTINGER, Mr. PATTISON of New York, Mr. PRICE, Mr. SPENCE, Mr. WHITEHURST, Mr. WHITTEN, and Mr. YOUNG of Missouri):

H.R. 14058. A bill to promote and coordinate amateur athletic activity in the United States, to recognize certain rights for U.S. amateur athletes, to provide for the resolution of disputes involving national governing bodies, and for other purposes; to the Committee on the Judiciary.

By Mr. MOTTL (for himself, Mr. AUCOIN, Mr. BOWEN, Mr. FARY, Mr. HYDE, Mr. LAGOMARSINO, Mrs. LLOYD of Tennessee, Mr. MARRIOTT, Mr. MURPHY of Pennsylvania, Mr. RAHALL, Mr. RINALDO, Mrs. SPELLMAN, and Mr. WHITEHURST):

H.R. 14059. A bill to authorize the appropriation of the funds necessary to enable the Inspector General, as the supervisory authority in the investigative operations of the Department of Health, Education, and Welfare, to perform his congressionally mandated functions in combating fraud and abuse in programs administered by that Department; to the Committee on Government Operations.

By Mr. MOTTL (for himself, Mr. ROGERS, and Mr. MURPHY of Illinois):

H.R. 14060. A bill to provide for the issuance of a commemorative postage stamp in honor of Gen. Casimir Pulaski and Americans of Polish descent; to the Committee on Post Office and Civil Service.

By Mr. MOTTL (for himself, Mr. AUCOIN, Mr. BOWEN, Mr. D'AMOURS, Mr. FARY, Mr. HYDE, Mr. LAGOMARSINO, Mrs. LLOYD of Tennessee, Mr. MARRIOTT, Mr. MURPHY of Pennsylvania, Mr. RAHALL, Mr. RINALDO, Mrs. SPELLMAN, and Mr. WHITEHURST):

H.R. 14061. A bill to amend the Internal Revenue Code of 1954 and the Social Security Act to allow the disclosure of the mailing address of an individual for use in collecting certain unpaid student loans and for use in verifying information given by an applicant for such a student loan, and for other purposes; to the Committee on Ways and Means.

By Mr. MOTTL (for himself, Mr. AUCOIN, Mr. BOWEN, Mr. FARY, Mr. HYDE, Mr. LAGOMARSINO, Mrs. LLOYD of Tennessee, Mr. MARRIOTT, Mr. MURPHY of Pennsylvania, Mr. RAHALL, Mr. RINALDO, Mrs. SPELLMAN, and Mr. WHITEHURST):

H.R. 14062. A bill to amend part A of title IV of the Social Security Act to provide increased Federal matching of State expenditures for management information systems and fraud control units under the aid to families with dependent children program; to the Committee on Ways and Means.

H.R. 14063. A bill to amend the Social Security Act to broaden and regularize State and Federal matching of records for purposes of the various welfare programs and certain related programs; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. MOTTL (for himself, Mr. AUCOIN, Mr. BOWEN, Mr. D'AMOURS, Mr. FARY, Mr. HYDE, Mr. LAGOMARSINO, Mrs. LLOYD of Tennessee, Mr. MARRIOTT, Mr. MURPHY of Pennsylvania, Mr. RAHALL, Mr. RINALDO, Mrs. SPELLMAN, and Mr. WHITEHURST):

H.R. 14064. A bill to direct the Secretary of Health, Education, and Welfare to more effectively obtain records of deaths for the purpose of preventing fraud and waste in payments under the Social Security Act; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. ROSE:

H.J. Res. 1136. Joint resolution proposing an amendment to the Constitution of the United States to provide that the level of total expenditures of the United States for any fiscal year shall not exceed the level of total revenues of the United States for such fiscal year and for the disposition of subsequent deficits, and that the gross Federal debt be reduced by open-market operations; to the Committee on the Judiciary.

## PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. PHILLIP BURTON:

H.R. 14065. A bill for the relief of Barry David Tombs; to the Committee on the Judiciary.

By Mr. DERWINSKI:

H.R. 14066. A bill for the relief of Richard B. Port; to the Committee on the Judiciary.

By Mr. EDWARDS of Oklahoma:

H. Res. 1344. Resolution refering the bill for the relief of Amis Construction Co., to the Court of Claims; to the Committee on the Judiciary.

## AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 1

By Mr. ERTEL:

(To the amendment offered by Mr. DANIELSON.)

—Page 8, immediately after line 2, insert the following:

(7) In the case of a Member, each instance in which the Member knowingly allows the use of a designation or insignia which appears, or purports to appear, to indicate that it is an official communication, document, or other material of the Congress; except that the Member is not required to list instances in which the Member uses such designation or insignia in fund-raising activities for his own campaign.

H.R. 1

By Mrs. SCHROEDER:

(Amendments to the amendment in the nature of a substitute.)

—Page 29, after line 10, insert the following:

(h) The Director of the Office of Government Ethics shall determine by regulation under what conditions income, property, liabilities, or other items attributable to any partnership, corporation, association, or trust (other than a blind trust) shall be required to be reported as if directly attributable to the reporting individual or his spouse or dependent child.

—Page 33, after line 23, insert the following: "Such remedy shall be in addition to any other remedy available under statutory or common law.".

—Page 34, strike out line 14 and all that follows down through line 23 and insert in lieu thereof the following:

REVIEW OF REPORTS

SEC. 206. (a) Each designated agency official or Secretary concerned shall make provisions to ensure that each report filed with him under this part shall be reviewed within 60 days after the date of such filing, except that the Director of the Office of Government Ethics only shall review those reports transmitted to him under this part within 60 days after the date of transmittal.

(b)(1) If after reviewing any report under subsection (a), the Director of the Office of Government Ethics, Secretary concerned, or designated agency official, as the case may be, is of the opinion that on the basis of information contained in such report the individual submitting such report is in compliance with applicable laws and regulations, he shall state such opinion on the report, and shall sign such report.

(2) If the Director of the Office of Government Ethics, Secretary concerned, or designated agency official, after reviewing any report under subsection (a)—

(A) believes additional information is required to be submitted, he shall notify the individual submitting such report what additional information is required and the time by which it must be submitted, or

(B) is of the opinion, on the basis of information submitted, that the individual is not in compliance with applicable laws and regulations, he shall notify the individual, afford him a reasonable opportunity for a written or oral response, and after consideration of such response, reach an opinion as to whether or not, on the basis of information submitted, the individual is in compliance.

(3) If the Director of the Office of Government Ethics, Secretary concerned, or designated agency official reaches an opinion under paragraph (2)(B) that an individual is not in compliance with applicable laws and regulations, he shall notify the individual of that opinion and, after an opportunity for personal consultation (if practicable), determine and notify the individual of which steps, if any, would in his opinion be appropriate for assuring compliance with such laws and regulations and the date by which such steps should be taken. Such steps may include, as appropriate—

(A) divestiture,

(B) restitution,

(C) the establishment of a blind trust,

(D) request for an exemption under section 208(b) of title 18, United States Code, or

(E) voluntary request for transfer, reassignment, limitation of duties, or resignation.

The use of any such steps shall be in accordance with such regulations as the Director of the Office of Government Ethics or a Secretary concerned, as the case may be, may prescribe.

(4) If steps for assuring compliance with applicable laws and regulations are not taken by the date set under paragraph (3) by an individual in a position (other than in the uniformed services), appointment to which requires the advice and consent of the Senate, the matter shall be referred to the President for appropriate future action.

(5) If steps for assuring compliance with applicable laws and regulations are not taken by the date set under paragraph (3) by a member of the uniformed services, the Secretary concerned shall take appropriate future action.

(6) If steps for assuring compliance with applicable laws and regulations are not taken by the date set under paragraph (3) by any other officer or employee the matter shall be referred to the head of the appropriate agency for further appropriate action; except that in the case of the Postmaster General or Deputy Postmaster General, the Director of the Office of Government Ethics shall recommend to the Governors of the Board of Governors of the United States Postal Service the further action to be taken.

(7) For purposes of assisting employees in avoiding situations in which they would not be in compliance with applicable laws and regulations, each Secretary concerned and designated agency official (including the President in the case of the individuals employed in the Executive Office of the President) shall maintain a list of those circumstances or situations which have or may result in noncompliance with such laws or regulations. Such list shall be periodically published, and shall be furnished to those individuals employed within the agency who are required to file reports under this part. The absence of any situation or circumstance from such a list shall not be construed as an indication that an individual in such circumstance or situation would be in compliance with such laws or regulations.

(8) The preceding provisions of this subsection shall not apply in the case of the President or Vice President, or a candidate or nominee for such office.

—Page 35, line 6, after "part." insert "Section 205 (a), (b), and (d) shall not apply with respect to any such report.".

—Page 35, after line 18, insert the following:

AUTHORITY OF COMPTROLLER GENERAL

SEC. 208. The Comptroller General shall have access to financial disclosure reports filed under this part for the purposes of carrying out his statutory responsibilities.

Page 35, line 20, strike out "208." and insert in lieu thereof "209.".

Page 36, line 2, strike out "209." and insert in lieu thereof "210."

Page 66, line 10, strike out "209" and insert in lieu thereof "210".

—Strike out part B of title II (beginning on page 39, line 21, and ending on page 44, line 9) and insert in lieu thereof the following new part:

PART B—OFFICE OF GOVERNMENT ETHICS

OFFICE OF GOVERNMENT ETHICS

SEC. 221. (a) Chapter 11 of title 5, United States Code, is amended by adding at the end thereof the following:

"Subchapter II—Office of Government Ethics

"1111. Establishment of Office of Government Ethics

"(a) There is established in the Office of Personnel Management an office to be known as the Office of Government Ethics.

"(b) There shall be at the head of the Office of Government Ethics a director (hereinafter in this chapter referred to as the 'Director'), who shall be appointed by the President, by and with the advice and consent of the Senate.

"1112. Functions of Office

"(a) The Director shall provide overall direction of executive branch policies relating to preventing conflicts of interest on the part of employees within the executive branch.

"(b) The responsibilities of the Director shall include—

"(1) monitoring and investigating compliance with the provisions of part A of title II of the Ethics in Government Act of 1978 by individuals appointed or employed (other than in the uniformed services) in the executive branch;

"(2) auditing on a random basis financial reports submitted by such individuals under part A of title II of such Act for the purpose of determining whether such reports are complete and accurate;

"(3) establishing a program under which advisory opinions relating to conflicts of interests may be provided, on request, to any person by the Director or designated agency official;

"(4) supervising and defining the duties and responsibilities of ethics counselors;

"(5) evaluating the effectiveness of the provisions of laws and regulations relating to conflicts of interest and reporting to the Office of Personnel Management for transmittal to the Congress any recommendations for legislative or administrative action he considers appropriate;

"(6) establishing, after consultation with the Attorney General, an effective system for reporting allegations of violations of conflict-of-interest laws to the Attorney General, as required by section 535 of title 28; and

"(7) providing information on and promoting understanding of ethical standards in the executive branch.

"1113. Administrative provisions

"At the request of the Director, each agency in the executive branch is directed to—

"(1) make its services, personnel, and facilities available to the Director and ethics counselors to the greatest practicable extent for the performance of his functions; and

"(2) except when prohibited by law, furnish to the Director or any ethics counselors all information and records in its possession which the Director may determine to be necessary for the performance of his duties.

"1114. Ethics counselors

"(a) Such ethics counselors as the Director may determine necessary (not to exceed 75 positions) shall be appointed by and subject to the control of the Director. Such counselors shall be assigned between and among the various agencies in the executive branch on a rotating basis. One such counselor may be assigned to two or more of such agencies in circumstances in which the Director determines it appropriate to do so. One ethics counselor assigned to an agency shall serve as that agency's designated agency official.

"(b) Ethics counselors shall—

"(1) be appointed without regard to section 3503(a) of this title, and

"(2) be subject to removal only under the procedures under section 7521 of this title, relating to administrative law judges.

"1115. Regulations relating to disclosure of financial interest and conflicts of interest

"(a)(1) Subject to paragraph (3) of this subsection—

"(A) any regulation under part A of title II of the Ethics in Government Act of 1978, and

"(B) any regulation relating to conflicts of interest applicable to employees or classes of employees within the executive branch,

shall, except as provided in paragraph (2), be prescribed only by the Director and shall be prescribed in accordance with section 553 of this title, notwithstanding any exception therein for matters relating to agency management or personnel.

"(2) Paragraph (1) of this subsection shall not apply with respect to—

"(A) any exercise of authority vested in and performed by the President; or

"(B) any exercise of authority vested in a Secretary concerned.

"(3)(A) Regulations to which paragraph (1) of this subsection applies shall not take effect unless approved by the Director of the Office of Personnel Management. Unless disapproved by the Director of the Office of Personnel Management within 30 days after transmittal of the proposed regulations to them, such regulations shall be deemed approved.

"(B) In addition to the approval required under subparagraph (A) of this paragraph, any regulation to which paragraph (1) of this subsection applies shall not take effect unless the Director transmits to the Congress a copy of such regulation, as approved under subparagraph (A) of this paragraph, and before the close of the 60-day period of continuous session beginning on the date of such transmittal neither House of the Congress has adopted a resolution the matter after the resolving clause of which states: 'That the hereby disapproves the regulation transmitted to the Congress by

the Director of the Office of Government Ethics on .', the blank spaces therein being filled in appropriately.

"(C) For the purpose of subparagraph (B) of this paragraph—

"(i) continuity of session is broken only by an adjournment of Congress sine die; and

"(ii) the days on which either House is not in session because of an adjournment of more than 3 days to a day certain are excluded in the computation of the 60-day period.

"(b) Any interested person may seek judicial review under chapter 7 of this title of any regulation to which subsection (a)(1) of this section applies."

(b)(1) Chapter 11 of title 5, United States Code, is further amended by inserting after section 1101 the following:

"Subchapter II—Office of Personnel Management".

(2) The analysis for chapter 11 of title 5, United States Code, is amended—

(A) by inserting before the item relating to section 1101 the following:

"Subchapter I—Office of Personnel Management"; and

(b) The analysis for chapter 11 of title 5, United States Code, is amended by inserting at the end thereof the following:

"Subchapter II—Office of Government Ethics

"Sec.
"1111. Establishment of Office of Government Ethics.
"1112. Functions of Office.
"1113. Administrative provisions.
"1114. Ethics counselors.
"1115. Regulations relating to disclosure of financial interests and conflicts of interest.".

(2) Section 5316 of title 5, United States Code, is amended by adding at the end thereof the following new paragraph:

"(144) Director of the Office of Government Ethics, Office of Personnel Management.".

(c) No individual employed by the Government on the date of the enactment of this Act shall be separated or reduced in grade, rank, or compensation by reason of the transfer of any duties resulting from the amendments made by this title.

(d)(1) There are authorized to be appropriated, for each of the fiscal years 1979, 1980, and 1981, such sums as are necessary for the compensation of ethics counselors appointed under section 1114 of title 5, United States Code (as added by this Act).

(2) There is authorized to be appropriated, for each of the fiscal years 1979, 1980, and 1981, the sum of $1,000,000 to carry out the purposes of the amendments made by this section and section 201 of this Act, other than purposes for which appropriations are authorized in paragraph (1) of this subsection.

(e) Not later than one year after the date of the enactment of this Act, the Director of the Office of Government Ethics shall—

(1) conduct a comprehensive review of existing laws and regulations relating to conflicts of interest; and

(2) submit to the Congress a report on such review, together with such recommendations for legislative or administrative action as the Director considers appropriate.

(f) Section 1308(a) of title 5, United States Code, is amended—

(1) by striking out "and" at the end of paragraph (3).

(2) by striking out the period at the end of paragraph (4) and inserting "; and" in lieu thereof; and

(3) by adding at the end thereof the following new paragraph:

"(5) a report to be prepared by the Director of the Office of Government Ethics which shall include—

"(A) a summary of the activities of the Director and ethics counselors appointed under section 1114 of this title in carrying out the functions of the Office of Government Ethics; and

"(B) any recommendations of the Director for legislative or administrative action considered to be appropriate by the Director.".

---

H.R. 11280

By Mr. SNYDER:

(Amendment in the nature of a substitute to the Leach amendment.)

—Page 337, after line 2, insert the following:

"7124. Air traffic controllers

"An air traffic controller shall not—

"(1) willfully hinder or impede his own work performance, productivity, or discharge of duties or that of any other employee; or

"(2) engage in a strike, work stoppage, or slowdown."

H.R. 12005

By Mr. SEIBERLING:

—On page 14, immediately after line 18, insert the following new section:

SEC. . Using sums authorized to be appropriated by this Act, the Federal Bureau of Investigation shall in its Uniform Crime Reports classify arson as a Part 1 offense.

---

H.R. 12161

By Mr. MOFFETT:

—On the first page, beginning on line 5, strike out "$2,300,000,000" and insert in lieu thereof "$1,800,000,000".

On the first page, line 9, strike out "$2,300,000,000" and insert in lieu thereof "$1,800,000,000".

Page 2, line 3, strike out "$3,300,000,000" and insert in lieu thereof "$2,800,000,000".

—Page 2, immediately after line 3, insert the following new section:

SEC. 2. (a) Section 305(a) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 745(a)) is amended by inserting immediately after the first sentence thereof the following new sentence: "In addition, any State in the region may submit a proposal for a supplemental transaction to the Secretary, and in any such case the Secretary shall, within 60 days after the date of such submission, forward such proposal, with a recommendation whether such proposal is consistent with the goals of the Final System Plan, to the Association."; and

(b)(1) The third sentence of section 305(a) of such Act is amended by striking out "(other than a proposal developed by the Association) shall be submitted in writing to the Association and";

(2) The last sentence of section 305(a) of such Act is amended by striking out "developed by the Secretary" and inserting in lieu thereof "submitted by the Secretary";

(3) Section 305(d) of such Act is amended—

(A) in the second sentence of paragraph (1), by striking out "made by the Secretary" and inserting in lieu thereof "developed by the Secretary"; and

(B) in the fourth sentence of paragraph (2), by striking out "developed by the Secretary" and inserting in lieu thereof "submitted by the Secretary".

—Page 2, immediately after line 3, insert the following new section:

SEC. 3. Section 216(b) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 726 (b)) is amended by adding at the end thereof the following new paragraph:

"(3)(A) After the date of enactment of this paragraph, the Association shall not make any additional purchases of debentures or series A preferred stock of the Corporation in any fiscal year unless the Corporation demonstrates to the Association that—

"(i) no officer, director, or employee of the Corporation who is compensated at a rate in excess of $40,000 per year received, during the preceding fiscal year, but not including amounts paid prior to April 1, 1978, any form of compensation as an incentive or bonus (including stock option programs, allowances for life insurance, membership in country clubs or other private clubs, or use of automobiles) in addition to such individual's regular salary; and

"(ii) no such officer, director, or employee received, during the preceding fiscal year, but not including increases granted prior to enactment of this section, an increase in salary greater in percentage than the overall percentage of the adjustment in the rates of pay for Federal employees under the General Schedule, as established for such fiscal year under chapter 53 of title 5, United States Code, unless such officer, director, or employee was promoted to a higher position within the corporation.

"(B) The provisions of this section shall cease to apply when the Corporation has, for two consecutive quarters, net positive funds.

—Page 2, immediately after line 3, insert the following new section:

SEC. 4. Section 307 of the Regional Rail Reorganization Act is amended by inserting after subsection (b) a new subsection (c) as follows:

"(c) Monitoring of the Corporation. (1) The Association shall also report to the Congress, in accordance with this subsection, the policies of the Corporation and the results of such policies with respect to operations, cost containment, and marketing.

"(2) Within 90 days after the date of enactment of this subsection, the Association shall (A) subdivide each such policy area into constitutent parts or groups of parts which are specific and significant, (B) identify the most appropriate indicia to reflect accurately such parts or groups of parts, and (C)(i) determine any and all deficiencies in data used to compute the values of such indicia including consistency and clarity of definitions, timeliness of data entry, editing and validation of input data, and processing, and (ii) outline the efforts of the Association and and Corporation to correct the deficiencies and the results of such efforts. On or before the end of such 90 day period, the Association shall submit to the Congress such methodological information and additional information which the Association deems necessary or appropriate to further the purposes of this title.

"(3) Using such indicia, the Association shall report on (A) the relationship of each constituent part or groups of parts to the Corporation's revenue and capital and operating expenses, (B) the extent to which such parts or groups of parts contributes to profits or losses, (C) the efforts of management to contain or reduce the contribution of such part or group of parts to losses, (D) the results of such efforts, and (E) such other information as the Association deems necessary or appropriate.

"(4) The Association shall (A) transmit to the Congress the first such monitoring report pursuant to paragraph (3) at the end of the first calendar quarter which begins after the end of the 90 day period for preparation and submission of the methodological information pursuant to paragraph (2), (B) report such monitoring information to the Congress at the end of the first quarter of each calendar year thereafter, (C) update methodological and monitoring information periodically as the Association deems necessary or appropriate, but in no case less frequently than once a year, and (D) where the results of such updating are statistically significant or relevant to Congressional policy-making, report them and the reasons for their significance at the end of the calendar quarter in which the updating occurred."

---

H.R. 12611

By Mr. JOHN L. BURTON:

—Page 71, lines 21 and 22, strike out "Sec-

retary of Transportation" and insert in lieu thereof "Administrator".

Page 71, line 23, before the period insert the following: "and full evaluation of any report or recommendation submitted under section 107 of this Act".

—Page 78, line 2, insert "and of the Effects of Implementing the Air Service Improvement Act of 1978 on the Level of Air Safety" after "Transportation".

Page 78, line 5, strike out "section" and insert in lieu thereof "sections".

Page 79, line 2, strike out the quotation marks and the second period, and after such line insert the following new section:

"STUDY OF THE EFFECTS OF IMPLEMENTING THE AIR SERVICE IMPROVEMENT ACT OF 1978 ON THE LEVEL OF AIR SAFETY

"Report

"SEC. 107. (a) Not later than January 31, 1980, and by each January 31 thereafter, the Administrator shall prepare and submit to the Congress and the Board a comprehensive annual report on the extent to which the implementation of the Air Service Improvement Act of 1978 has, during the preceding calendar year, affected the level of air safety. Each such report shall, at a minimum, contain an analysis of each of the following:

"(1) All relevant data on accidents and incidents occurring during the calendar year covered by such report in air transportation and on violations of safety regulations issued by the Administrator occurring during such calendar year.

"(2) Current and anticipated personnel requirements of the Administrator with respect to enforcement of air safety regulations.

"(3) Effects on current levels of air safety of changes or proposals for changes in air carrier operating practices and procedures which occurred during the calendar year covered by such report.

"(4) The adequacy of air safety regulations taking into consideration changes in air carrier operating practices and procedures which occurred during the calendar year covered by such report.

"Recommendations

"(b) Not later than January 31, 1980, and by each January 31 thereafter, the Administrator shall submit to the Congress and the Board recommendations with respect to the level of surveillance necessary to enforce air safety regulations and the level of staffing necessary to carry out such surveillance. The Administrator's recommendations shall include proposals for any legislation needed to implement such recommendations."

Page 79, strike out the quotation marks and the period at the end of the matter below line 6, and after such matter insert the following:

"Sec. 107. Study of the effects of implementation of the Air Service Improvement Act of 1978 on the level of air safety.

"(a) Report.

"(b) Recommendations."

—Page 116, line 6, strike out "In promulgating such" and all that follows through the period at the end of line 9 and insert in lieu thereof the following: "Such safety standards shall become effective not later than the last day of the eighteenth month which begins after such date of enactment and shall impose requirements upon such commuter air carriers to assure that the level of safety provided to persons traveling on such commuter air carriers is, to the maximum feasible extent, equivalent to the level of safety provided to persons traveling on air carriers which provide service pursuant to certificates issued under section 401 of this title."

H.R. 13750

By Mr. JEFFORDS:

—At the end thereof, add the following:

TITLE V—TAX INCENTIVES FOR THE PRODUCTION AND CONSERVATION OF ENERGY AND FOR CONVERSION TO ALTERNATIVE ENERGY SOURCES

SEC. 501. RESIDENTIAL ENERGY CREDIT.

(a) GENERAL RULE.—Subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits allowable) is amended by inserting after section 44B the following new section:

"SEC. 44C. RESIDENTIAL ENERGY CREDIT.

"(a) GENERAL RULE.—In the case of an individual, there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to the sum of—

"(1) the qualified energy conservation expenditures, plus

"(2) the qualified renewable energy source expenditures, plus

"(3) the qualified hydrogen energy expenditures.

"(b) QUALIFIED EXPENDITURES.—For purposes of subsection (a)—

"(1) ENERGY CONSERVATION.—In the case of any dwelling unit, the qualified energy conservation expenditures are 20 percent of so much of the energy conservation expenditures made by the taxpayer during the taxable year with respect to such unit as does not exceed $2,000.

"(2) RENEWABLE ENERGY SOURCES.—In the case of any dwelling unit, the qualified renewable energy source expenditures are the following percentages of the renewable energy source expenditures made by the taxpayer during the taxable year with respect to such unit:

"(A) 30 percent of so much of such expenditures as does not exceed $2,000, plus

"(B) 20 percent of so much of such expenditures as exceeds $2,000 but does not exceed $10,000.

"(3) HYDROGEN ENERGY.—In the case of any dwelling unit, the qualified hydrogen energy expenditures are 20 percent of so much of the hydrogen energy expenditures made by the taxpayer during the taxable year with respect to such unit as does not exceed $2,000.

"(4) PRIOR EXPENDITURES BY TAXPAYER ON SAME RESIDENCE TAKEN INTO ACCOUNT.—If for any prior taxable year a credit was allowed to the taxpayer under this section with respect to any dwelling unit by reason of energy conservation expenditures or renewable energy source expenditures, paragraph (1), (2), or (3) (whichever is appropriate) shall be applied for the taxable year with respect to such dwelling unit by reducing each dollar amount contained in such paragraph by the prior year expenditures taken into account under such paragraph.

"(5) MINIMUM DOLLAR AMOUNT.—No credit shall be allowed under this section with respect to any return for any taxable year if the amount which would (but for this paragraph) be allowable with respect to such return is less than $10.

"(c) DEFINITIONS AND SPECIAL RULES.—For purposes of this section—

"(1) ENERGY CONSERVATION EXPENDITURE.—The term 'energy conservation expenditure' means an expenditure made on or after 20, 1977, by the taxpayer for insulation or any other energy-conserving component (or for the original installation of such insulation or other component) installed in or on a dwelling unit—

"(A) which is located in the United States, the Virgin Islands, or Guam,

"(B) which is used by the taxpayer as his principal residence, and

"(C) the construction of which was substantially completed before April 20, 1977.

"(2) RENEWABLE ENERGY SOURCE EXPENDITURE.—

"(A) IN GENERAL.—The term 'renewable energy source expenditure' means an expenditure made on or after April 20, 1977, by the taxpayer for renewable energy source properly installed in connection with a dwelling unit—

"(i) which is located in the United States, the Virgin Islands, or Guam, and

"(ii) which is used by the taxpayer as his principal residence.

(B) ITEMS INCLUDED.—The term 'renewable energy source expenditure' includes only expenditures for—

"(i) renewable energy source property, or

"(ii) labor costs properly allocable to the onsite preparation, assembly, or installation of renewable energy source property.

"(C) SWIMMING POOL, ETC., USED AS STORAGE MEDIUM.—The term 'renewable energy source expenditure' does not include any expenditure properly allocable to a swimming pool used as an energy storage medium.

"(3) HYDROGEN ENERGY EXPENDITURES.—

"(A) IN GENERAL.—The term 'hydrogen expenditures' means an expenditure made on or after April 20, 1977, by the taxpayer for hydrogen energy property and installation installed in connection with a dwelling unit—

"(i) which is located in the United States, the Virgin Islands, or Guam, and

"(ii) which is used by the taxpayer as his principal residence.

"(B) ITEMS INCLUDED.—The term 'hydrogen energy expenditures' includes only expenditures for—

"(i) hydrogen energy property, and

"(ii) labor costs properly allocable to the onsite preparation, assembly, or installation of hydrogen energy property, or to the modification of conventional property for the use of hydrogen as a fuel.

"(4) INSULATION.—The term 'insulation' means any item—

"(A) which is specifically and primarily designed to reduce when installed in or on a dwelling (or water heater) the heat loss or gain of such dwelling (or water heater),

"(B) the original use of which begins with the taxpayer,

"(C) which can reasonably be expected to remain in operation for at least 3 years, and

"(D) which meets the performance and quality standards, if any, which—

"(i) have been prescribed by the Secretary by regulations, and

"(ii) are in effect at the time of the acquisition of the item.

"(5) OTHER ENERGY-CONSERVING COMPONENT.—The term 'other energy-conserving component' means any item (other than insulation)—

"(A) which is—

"(i) a replacement furnace or boiler designed to provide more efficient energy utilization by improving heat generation or lowering heat losses,

"(ii) a furnace replacement burner designed to achieve a reduction in the amount of fuel consumed as a result of increased combustion efficiency,

"(iii) a device for modifying flue openings designed to increase the efficiency of operation of the heating system,

"(iv) an electrical or mechanical furnace ignition system which replaces a gas pilot light,

"(v) a storm or thermal window or door for the exterior of the dwelling,

"(vi) an automatic energy-saving setback thermostat,

"(vii) caulking or weather stripping of an exterior door or window,

"(viii) a heat pump which replaces an electric resistance heating system,

"(ix) meters which display the cost of energy usage,

"(x) a replacement fluorescent lighting system,

"(xi) an evaporative cooling device,

"(xii) an item (other than a fireplace) which is designed to use wood and peat as a fuel for space heating, the heating of water or cooking of food, or any combination thereof, including any controls, ducts, stovepipes, footing or other item (other than a chimney) necessary for the safe and efficient operation of any such item, or

"(xiii) an item of the kind which the Secretary specifies by regulations as increasing (by conversion or otherwise) the energy efficiency of the dwelling,

"(B) the original use of which begins with the taxpayer,

"(C) which can reasonably be expected to remain in operation for at least 3 years, and

"(D) which meets the performance and quality standards, if any, which—

"(i) have been prescribed by the Secretary by regulations, and

"(ii) are in effect at the time of the acquisition of the item.

In establishing regulations under this paragraph, the Secretary shall prescribe (i) guidelines setting forth the criteria which are used in the determination of whether an item is an energy-conserving component, and (ii) a procedure under which a manufacturer of an item may request the Secretary to specify or certify that item as an energy-conserving component.

"(6) RENEWABLE ENERGY SOURCE PROPERTY.—The term 'renewable energy source property' means property—

"(A) which, when installed in connection with a dwelling—

"(i) uses solar energy, by means of an active solar system or a passive solar system, or a combination thereof, to heat or cool such dwelling or to provide hot water for use within such dwelling, or to provide electricity,

"(ii) uses wind energy for nonbusiness residential purposes,

"(iii) is necessary to distribute or use geothermal deposits (as defined in section 613(e)) which provide geothermal energy to heat or cool such building or provide hot water for use within such building, or

"(iv) uses any other form of renewable energy which the Secretary specifies by regulations,

"(B) the original use of which begins with the taxpayer,

"(C) which can reasonably be expected to remain in operation for at least 5 years, and

"(D) which meets the performance and quality standards, if any, which—

"(i) have been prescribed by the Secretary by regulations, and

"(ii) are in effect at the time of the acquisition of the property.

"(7) HYDROGEN ENERGY PROPERTY.—The term 'hydrogen energy property' means property—

"(A) which, when installed in connection with a dwelling—

"(i) uses hydrogen as a fuel for the purposes of heating or cooling such dwelling or providing hot water for use within such dwelling, or

"(ii) is used in the electrolysis of water for the production of hydrogen,

"(B) the original use of which begins with the taxpayer,

"(C) which can reasonably be expected to remain in operation for at least 5 years, and

"(D) which meets the performance and quality standards, if any, which—

"(i) have been prescribed by the Secretary by regulations, and

"(ii) are in effect at the time of the acquisition of the property.

"(8) CONSULTATION IN PRESCRIBING STANDARDS.—Performance and quality standards shall be prescribed by the Secretary under paragraphs (4), (5), (6), and (7) only after consultation with the Secretary of Energy, the Secretary of Housing, and Urban Development, and other appropriate Federal agencies.

"(9) WHEN EXPENDITURES MADE; AMOUNT OF EXPENDITURES.—

"(A) Except as provided in subparagraph (B), an expenditure with respect to an item shall be treated as made when original installation of the item is completed.

"(B) In the case of renewable energy source expenditures in connection with the construction or reconstruction of a dwelling, such expenditures shall be treated as made when the original use of the constructed or reconstructed dwelling by the taxpayer begins.

"(C) The amount of any expenditure shall be the cost thereof.

"(D) If less than 80 percent of the use of an item is for nonbusiness residential purposes, only that portion of the expenditures for such item which is properly allocable to use for nonbusiness residential purposes shall be taken into account. For purposes of the preceding sentence, use for a swimming pool shall be treated as use which is not for residential purposes.

"(10) PRINCIPAL RESIDENCE.—The determination of whether or not a dwelling unit is a taxpayer's principal residence shall be made under principles similar to those applicable to section 1034, except that—

"(A) no ownership requirement shall be imposed, and

"(B) the period for which a dwelling is treated as the principal residence of the taxpayer shall include the 30-day period ending on the first day on which it would (but for this subparagraph) be treated as his principal residence.

"(11) ENVIRONMENTAL RESTRICTIONS ON CERTAIN WOOD AND PEAT BURNING ITEMS.—No credit shall be allowed under subsection (a) for expenditures with respect to any item described in paragraph (5)(A)(xii) which are to be installed in any metropolitan or other area after the date on which—

"(A) the Administrator of the Environmental Protection Agency certifies to the Secretary that the emissions from such items would cause air quality in such area to be in violation of any Federal law, or

"(B) the Secretary of Agriculture certifies to the Secretary that additional consumption of wood in connection with such items would endanger forests in that area.

"(d) SPECIAL RULES.—For purposes of this section—

"(1) DOLLAR AMOUNTS IN CASE OF JOINT OCCUPANCY.—In the case of any dwelling unit which is jointly occupied and used during any calendar year as a principal residence by 2 or more individuals—

"(A) the amount of the credit allowable under subsection (a) by reason of energy conservation expenditures or by reason of renewable energy source expenditures (as the case may be) made during such calendar year by any of such individuals with respect to such dwelling unit shall be determined by treating all of such individuals as one taxpayer whose taxable year is such calendar year; and

"(B) each of such individuals shall be allowed a credit under subsection (a) for the taxable year in which such calendar year ends (subject to the limitation of paragraph (5) of subsection (b)) in an amount which bears the same ratio to the amount determined under subparagraph (A) as the amount of such expenditures made by such individual during such calendar year bears to the aggregate of such expenditures made by all of such individuals during such calendar year.

"(2) TENANT-STOCKHOLDER IN COOPERATIVE HOUSING CORPORATION.—In the case of an individual who holds stock as a tenant-stockholder (as defined in section 216) in a cooperative housing corporation (as defined in such section), such individual shall be treated as having made his tenant-stockholder's proportionate share (as defined in section 216(b)(3)) of any expenditures of such corporation.

"(3) CONDOMINIUMS.—

"(A) IN GENERAL.—In the case of an individual who is a member of a condominium management association with respect to a condominium which he owns, such individual shall be treated as having made his proportionate share of any expenditures of such association.

"(B) CONDOMINIUM MANAGEMENT ASSOCIATION.—For purposes of this paragraph, the term 'condominium management association' means an organization which meets the requirements of paragraph 1 of section 528(c) other than subparagraph (E) thereof) with respect to a condominium project substantially all of the units of which are used as residences.

"(e) BASIS ADJUSTMENTS.—For purposes of this subtitle, if a credit is allowed under this section for any expenditure with respect to any property, the increase in the basis of such property which would (but for this subsection) result from such expenditure shall be reduced by the amount of the credit so allowed.

"(f) CARRYOVER OF UNUSED CREDIT.—If the amount of the credit determined under this section for the taxable year exceeds the liability for the taxpayer for the tax under this chapter for the taxable year, the excess shall be carried over to each of the 2 taxable years succeeding that taxable year. The entire amount of the unused credit for an unused credit year shall be carried to the earliest of the 2 taxable years to which it may be carried, and then to the succeeding taxable year to the extent that it may not be added for a prior taxable year to which it might be carried.

"(g) TERMINATION.—This section shall not apply to expenditures made after December 31, 1985.".

(b) INSPECTION.—To the extent not presently authorized and utilized by any agency of the United States in the assessment and collection of income taxes, no procedure or practice which utilizes onsite inspection of the residence of an individual shall be employed to determine if that individual is entitled to a credit under section 44C of the Internal Revenue Code of 1954, as added by subsection (a), unless such procedure or practice provides that such inspection shall take place only with the written consent of such individual.

(c) TECHNICAL AND CLERICAL AMENDMENTS.—

(1) The table of sections for subpart A of part IV of subchapter A of chapter 1 of such Code is amended by inserting after the item relating to section 44B the following new item:

"Sec. 44C. Residential energy credit.".

(2) Subsection (c) of section 56 of such Code (defining regular tax deduction) is amended by striking out "credits allowable under—" and all that follows and inserting in lieu thereof "credits allowable under subpart A of part IV other than under sections 31, 39, 43, and 44C.".

(3) Subsection (a) of section 1016 of such Code (relating to adjustments to basis) is amended by inserting after paragraph (20) the following new paragraph:

"(21) to the extent provided in section 44C(e), in the case of property with respect to which a credit has been allowed under section 44C;".

(4) Subsection (b) of section 6096 of such Code (relating to designation of income tax payment to Presidential Election Campaign Fund) is amended by striking out "and 44B" and inserting in lieu thereof "44B, and 44C".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years ending on or after April 20, 1977.

# EXTENSIONS OF REMARKS

## BALANCE(S) OF POWER SERIES BOOK IV(E)—SOVIET APPROACH TO NEGOTIATIONS

**HON. JOHN B. BRECKINRIDGE**

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. BRECKINRIDGE. Mr. Speaker, today's article in Book IV of the Balance(s) of Power Series, which sets forth Soviet Intentions and Doctrine, is concerned with the Soviet approach to negotiation. Entitled, "The Technique for Dealing With Russia," and written in 1946 by one of America's foremost diplomats, George F. Kennan, this issue sets forth a set of rules for dealing with the Stalin regime. While Kennan argues that these principles can only partly apply in the post-Stalin era, he does insist that Russian historical experience has provided the Russian mind with no concept of permanent friendly relations between states, and that it is within this milieu that present negotiations must be viewed. Nothing in the post-Stalin experience significantly alters this historic view, as noted by the author in 1967.

The article follows:

THE SOVIET APPROACH TO NEGOTIATION—SELECTED WRITINGS

(Compiled by the Subcommittee on National Security and International Operations (Pursuant to S. Res. 24, 91st Cong.) of the Committee on Government Operations U.S. Senate)

[From *Memoirs 1925–1950*. Copyright 1967 by George F. Kennan. Little, Brown and Company in association with Atlantic Monthly Press. Reprinted by permission.]

THE TECHNIQUE FOR DEALING WITH RUSSIA (1946)

(By George F. Kennan, Member American Embassy Staff in Moscow, 1944–46; Later U.S. Ambassador to the USSR and to Yugoslavia; Now Member, Institute for Advanced Studies, Princeton)

It is axiomatic in the world of diplomacy that methodology and tactics assume an importance by no means inferior to concept and strategy. Over the eighteen months I had now spent on this assignment in Moscow, I had experienced unhappiness not only about the naïvéte of our underlying ideas as to what it was we were hoping to achieve in our relations with the Soviet government but also about the methods and devices with which we went about achieving it. The two aspects of our diplomacy were, of course, closely related. Methodology was itself in large measure a reflection of the image we had formed of the Soviet leadership and of the manner in which it could be expected to react to various stimuli. But methodology was nevertheless a subject that deserved attention in its own right. Perhaps it was the visit of Secretary Byrnes to Moscow that caused the pot of my patience to boil over with relation to this area of our diplomacy, as it had boiled over with respect to so many others. My reaction to this boiling over was, in any case, the usual one of reaching for my pen; and at some time in the winter of 1946 I produced the first three sections of what was intended as another *magnum opus*, directed this time to the specific problem of Soviet-American relations. It was never finished. Being unfinished, my recollection is that it was never used in any way. I include . . . an excerpt from it, on the subject of the technique of dealing with Russia, which represents a crude attempt, but one of the first of its kind (the first in my recollection, at any rate), to draw up a useful set of rules for dealing with the Stalin regime. . . . (I reiterate) the *Stalin* regime. (This was, after all, the only Russian regime with which I had then had personal experience.)

The student of Soviet-American relations who reads these rules today will have, no doubt, two questions in his mind as he completes the reading of them. One is whether they have been observed in the subsequent years and continue to be observed today. The other is whether they are still applicable now that Stalin is dead and the world situation has changed in important ways. My answer to both these questions would be: only partly. . . .

*The Soviet approach to negotiation*

[Excerpt from the United States and Russia (Winter 1946)]

Historically, the foreign affairs of Russia have developed along lines entirely different from those of the United States. Our most important foreign relations, historically speaking, have been along the lines of peaceable overseas trade. These have set the pattern of our thinking on foreign affairs. The Russians, throughout their history, have dealt principally with fierce hostile neighbors. Lacking natural geographical barriers, they have had to develop, in order to deal with these neighbors, a peculiar technique (now become traditional and almost automatic) of elastic advance and retreat, of defense in depth, of secretiveness, of wariness, of deceit. Their history has known many armistices between hostile forces; but it has never known an example of the permanent peaceful coexistence of two neighboring states with established borders accepted without question by both peoples. The Russians therefore have no conception of permanent friendly relations between states. For them, all foreigners are potential enemies. The technique of Russian diplomacy, like that of the Orient in general, is concentrated on impressing an adversary with the terrifying strength of Russian power, while keeping him uncertain and confused as to the exact channels and means of its application and thus inducing him to treat all Russian wishes and views with particular respect and consideration. It has nothing to do with the cultivation of friendly relations as we conceive them.

We would find it much easier to deal with Russia if we would recognize frankly in our own minds the fact that its leaders are, by their own choice, the enemies of all that part of the world they do not control, and that this is a recognized principle of thought and action for the entire Soviet machine. Let us also remember that in the Soviet Union decisions are rarely taken by individuals. They are taken by collective bodies. These collective bodies are required to proceed on the theory that the outside world is hostile to Russia and would be incapable of a generous or unselfish act toward the Russian state or people. It follows from this that no act of a foreign government could be officially recognized as an act of good will. Any Soviet official who would dispute this principle and try to demonstrate in a Soviet body that a foreign state had gone out of its way to be nice to the Soviet Union and deserved credit for it would risk—at the least—his job. Everyone in the Soviet government must assume that foreign governments act only in their own interests, and that gratitude and appreciation are unknown qualities in foreign affairs.

In this way, the machinery by which Soviet foreign affairs are conducted is capable of recognizing, and reacting to, only considerations of concrete Soviet interest. No one can argue any proposition in the councils of the Soviet government unless he can show concretely how the interests of the Soviet Union stand to gain if it is accepted or to suffer if it is rejected. This principle is applied with the most serene objectivity. In examining a position taken by a foreign state, the Russians make no effort to look at it from the standpoint of the foreign state in question or from any fancied community of aims on the part of themselves and the state involved. They assume it is dictated by purposes which are not theirs, and they examine it only from the standpoint of its effect on them. If the effect is favorable, they accept it without gratitude; if it is unfavorable, they reject it without resentment. We could make it much easier for them and for ourselves if we would face these facts.

In the light of the above, I would like to suggest the following rules to govern our dealings with the Russians:

A. Don't act chummy with them.

This only embarrasses them individually, and deepens their suspicions. Russian officials abhor the thought of appearing before their own people as one who has become buddies with a foreigner. This is not their idea of good relations.

B. Don't assume a community of aims with them which does not really exist.

There is no use trying to swing Russians into line by referring to common purposes to which we may both have done lip service at one time or another, such as the strengthening of world peace, or democracy, or what you will. They had their own purposes when they did lip service to these purposes. They think we had ours. For them it's all a game. And when we try to come at them with arguments based on such common professions, they become doubly wary.

C. Don't make fatuous gestures of good will.

Few of us have any idea how much perplexity and suspicion has been caused in the Soviet mind by gestures and concessions granted by well-meaning Americans with a view to convincing the Russians of their friendly sentiments. Such acts upset all their calculations and throw them way off balance. They immediately begin to expect that they have overestimated our strength, that they have been remiss in their obligations to the Soviet state, that they should have been demanding more from us all along. Frequently, this has exactly the opposite effect from that which we are seeking.

D. Make no requests of the Russians unless we are prepared to make them feel our displeasure in a practical way in case the request is not granted.

We should be prepared as a matter of principle to accompany every expression of our wishes by some action on our part proving that Russian interests suffer if our wishes are not observed. This requires imagination, firmness, and coordination of policy. If we cannot find these qualities in our foreign affairs, then we should begin to prepare for serious trouble.

Statements or insertions which are not spoken by the Member on the floor will be identified by the use of a "bullet" symbol, i.e., ●

E. Take up matters on a normal level and insist that Russians take full responsibility for their actions on that level.

Requests should not, as a rule, be taken to higher levels just because we have failed to get satisfaction on a lower level. This merely encourages the Russian bureaucracy to be uncooperative and causes our relations with high-level Soviet authorities to be encumbered with matters of second-rate importance. Instead of this, we should take our retaliatory or corrective action promptly and unhesitatingly when we do not obtain satisfaction on the lower level. It is only in this way that we can teach the Russians to respect the whole range of our officials who must deal with them. By failing to back up our subordinate officials in their dealings with the Russians, we make it difficult for ourselves to accomplish anything in the intervals between high-level meetings. This works in the interests of the Russians and prejudices our interests. This is a very important point and goes to the heart of many of our failures of the last two or three years. The top level is physically incapable of encompassing the whole range of our dealings with the Soviet government and of assuring the collaboration which we are seeking. Agreements reached there can be—and frequently are—sabotaged successfully and with impunity on the lower levels. We must train the Russians to make their whole machine, not just Stalin, respond sensibly to our approaches.

F. Do not encourage high-level exchanges of views with the Russians unless the initiative comes at least 50 percent from their side.

Russians can be dealt with satisfactorily only when they themselves want something and feel themselves in a dependent position. It should be a matter of technique with us to see that they are not dealt with on a high level except when these conditions prevail.

G. Do not be afraid to use heavy weapons for what seem to us to be minor matters.

This is likewise a very important point, and one which many Americans will receive with skepticism. In general, it may be bad practice to take a sledgehammer to swat a fly. With the Russians it is sometimes necessary. Russians will pursue a flexible policy of piecemeal presumption and encroachment on other people's interests, hoping that no single action will appear important enough to produce a strong reaction on the part of their opponents, and that in this way they may gradually bring about a major improvement in their position before the other fellow knows what's up.

In this way, they have a stubborn tendency to push every question right up to what they believe to be the breaking point of the patience of those with whom they deal. If they know that their opponent means business, that the line of his patience is firmly established and that he will not hesitate to take serious measures if this line is violated even in small ways and at isolated points, they will be careful and considerate.

They do not like a showdown unless they have a great preponderance of strength. But they are quick to sense and take advantage of indecision or good-natured tolerance. Whoever deals with them must therefore be sure to maintain at all times an attitude of decisiveness and alertness in the defense of his own interests.

H. Do not be afraid of unpleasantness and public airing of differences.

The Russians don't mind scenes and scandals. If they discover that someone else does mind them and will go out of his way to avoid them, they will use this as a form of blackmail in the belief that they can profit from the other fellow's squeamishness. If we are to reestablish our prestige with the Soviet government and gain respect in Russia we must be prepared to undertake a "taming of the shrew" which is bound to involve a good deal of unpleasantness. On the other hand, we need not fear that occasional hard words will have permanent bad effect on our relations.

The Russian is never more agreeable than after his knuckles have been sharply rapped. He takes well to rough play and rarely holds grudges over it. Let us not forget Stalin's first reaction when he met Ribbentrop. It was to joke good-naturedly and cynically about the bitter propaganda war which had been waged for so many years between the two countries. The Russian governing class respects only the strong. To them, shyness in dispute is a form of weakness.

I. Coordinate, in accordance with our established policies, all activities of our government relating to Russia and all private American activities of this sort which the government can influence.

The Russians are quick to take advantage of conflicts, inconsistencies, and the seeking of private aims on the part of our nationals or agencies of our government. Their own system is designed to produce the maximum concentration of national energies. We cannot face them effectively unless we do all in our power to concentrate our own effort.

*J. Strengthen and support our representation in Russia.*

The American embassy in Moscow is the symbol of our country to the Russians. It is watched intently by many people. It must be not only the representation of our society but also a guiding brain center of our policy toward Russia. In the face of frequent neglect and discouragement, always the object of attacks by jealous self-seekers and discontented liberals, never enjoying the full backing or understanding of people in Washington, never properly staffed or properly housed, it has nevertheless managed to become a pioneering establishment in the American Foreign Service and the most respected diplomatic mission in Moscow.

It could do far more and play a far greater role in the Soviet Union if it received proper support. This means that failure of the Soviet government to grant quarters and other facilities for the performance of diplomatic work in Moscow must sooner or later be made an open issue between the governments and pressure must be brought to bear to improve these conditions. It means that the mission must be adequately staffed with American personnel.

Finally it means that the mission must at all times be led by someone capable of and prepared for hard and tedious work over a long period of time, someone who has in high degree the qualities of modesty and patience, who is animated solely by devotion to the interests of our country, and is generally fitted by personality and background to earn the respect of a nation unexcelled in the psychological analysis of the human individual. In the case of Ambassador Harriman, I can sincerely say that I consider these prerequisites fulfilled.

But I make this observation with an eye to the future. The post of ambassador to Moscow is not a sinecure which can be lightly disposed of; and the department must be prepared to use its influence to see that it is effectively filled. The Moscow mission works, and has always worked, under strain, in the face of multitudinous obstacles. A vain, fussy, and ignorant ambassador is capable of breaking its back, and of doing lasting (if not readily apparent) damage to the fabric of Russian-American relations.●

## TAX CUT BILL

### HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. LAGOMARSINO. Mr. Speaker, I would like to bring to the attention of my colleagues a well-expressed editorial which appeared in the Press-Courier on Wednesday, August 23, 1978, concerning the House-passed tax cut bill and President Carter's concerns about it.

The editorial follows:

[From the Press-Courier, Aug. 23, 1978]

HOUSE POINTS WAY

The $16.3 billion tax cut approved recently by the House clearly offers more for the taxpayer than the larger and conceptually defective package proposed by President Carter in January.

The President dislikes the House-passed bill for several reasons. He is unhappy that 72 percent of the benefits of the cut would go to those earning $20,000 a year or more. He also prefers a smaller capital gains tax reduction, and he favors inclusion of a laundry list of revenue-generating "reforms," including lowered deductions for the "three-martini" business lunches and smaller write-offs for real estate depreciation.

However, there is ample evidence that reductions in personal income taxes for upper-income earners—including the millionaires Carter finds such convenient targets—actually lead to increases in collected taxes plus a dampening of inflation. That is precisely the record of the 1964 and 1965 tax cuts. And because upper middle income earners will be hardest hit in January by higher Social Security taxes, an income tax cut this year is abundantly fair.

Reductions in capital gains tax rates will help pump needed investment dollars into an economy nearly everyone agrees faces an acute shortage of investment capital.

When the Senate considers the House's tax cut, it should think carefully about avoiding the risks of high inflation. Additional investment credits would be one way to fatten the tax cut without ballooning inflation.

Not everything is perfect about the House-approved bill. Lawmakers declined to adopt indexing for personal income tax rates, a true reform that would adjust income tax brackets to protect taxpayers from purely inflationary tax hikes.

Fortunately, however, the House did widen the tax brackets by 6 percent, thus decreasing the amount of income subject to higher taxes. That, and an indexing provision for capital gains taxes—including the $100,000 exemption for homeowners—ought certainly to remain in the bill.

The House has pointed the way to an acceptable tax cut package. All it needs is a little fine tuning in the Senate to make it even better.●

## ECONOMIC EFFECTS OF PLANNED NITRITE PHASEOUT

### HON. WILLIAM C. WAMPLER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. WAMPLER. Mr. Speaker, the proposed action by the Secretary of Agriculture and HEW (Food and Drug Administration) to phase out the use of nitrites as a food preservative in processed meats, poultry and fish needs to be examined long and hard by Congress.

Not only is the risk of cancer from nitrites greatly overstated by USDA and HEW, there is a much greater risk that humans will die from botulism or get seriously ill from food poisoning if ni-

trites are not used to preserve processed meats.

Apart from establishing the risk of using or not using nitrites, and deciding whether to ban or phase out nitrites, is the economic impact of either action on the agricultural sector. An immediate ban would bring rapid economic chaos to American meat and poultry farmers and processors. A phaseout would amount to a slicing-away—which I call salami tactics—stretching chaos over a longer period of time.

This slicing-away process may have already begun, as pointed out on August 21 by Ed Clark, staff editor in Feedstuffs.

Mr. Speaker, I request permission to include the Feedstuffs article in the RECORD at this point.

[From Feedstuffs, Aug. 21, 1978]

ATTACKS ON NITRITE MAY BE HURTING HOG EXPANSION, GARNER SAYS

(By Ed Clark)

The hog market responded to news reports Thursday of a gradual government ban on nitrites, with a limit up move in pork bellies. Although no ban has been proposed, traders normally use them and any other market rumor to drop the bottom out of the pork belly market.

It's not that traders like to make jokes about losing bacon or sausage, however. "We've been through this before," said Don Schwartz, an analyst with Cargill Investor Services, Inc., in Chicago. "It's just like hearing shouts of 'freeze, freeze' in the grain business. We hear reports of nitrite bans," he said.

Traders are watching with keen interest what the government does about the Massachusetts Institute of Technology study, however, which found a link between nitrites and cancer in rats. And justifiably so, since 60–65% of pork has nitrite in it.

Few have yet examined the entire study, but another MIT scientist was somewhat critical of the experiments, done by Dr. Paul Newberne. Dr. Steven Tannenbaum, professor of food chemistry at MIT, said the strain of rats used in the study have a very high incidence of lymphomas, tumors of the lymph glands.

"It's traditional in testing of this type not to use an animal that has a natural high rate of the tumors, because it is difficult to interpret what a small increase means," he said.

The 8.4 percent rate of tumors in the control group is "extremely high," Tannenbaum noted, and is "almost unheard of in a rat that is specifically susceptible to this sort of tumor. This tends to color the nature of the results. It's an experiment which bears repeating."

Tannenbaum said one reason so much attention was put on the study by the media was the way the FDA news release was worded in the first paragraph.

"If you would have read the article and read past the the headlines to the second and third paragraphs it came out reading quite a bit differently. The government statements show a clear bias against nitrite from the very start," he said.

A USDA scientist said he is annoyed that the MIT study was not published and kept "so close to the chest that scientists could not look at it." Although unable yet to examine the study, he is suspicious of it since 10 or more years of using nitrite in research has found no carcinogens in it.

Marvin Garner, executive vice president of the National Pork Producers Council, said there were no real surprises in the FDA statement. The basic results of the MIT study were public and known since early May, he said.

"When Assistant Secretary of Agriculture Carol Tucker Foreman advised us of the news release and its contents, it was apparent that government officials are now equally concerned with the threat to human health of totally withdrawing the use of nitrite before proven protection against botulism is assured," he said.

When 80 percent of the nitric intake comes from sources other than processed meat, "we wonder if the emphasis on use of nitrite in meat is not out of proportion," Garner said.

The talk of a proposed ban on nitrites is not very supportive of normal growth in the pork industry, Garner said. During the last three years, the industry has had a profit level which pointed toward more expansion, he said, but governmental regulation in part has caused that not to happen.

Banks are less likely to go out on a limb and give loans out on a 10-year basis to pork producers if they think nitrite will be banned, Garner said. Energy needs also would be much greater if all meat must be kept at 40°, he said, which will require increased refrigeration at all levels.

Curt Daniels, a Mingo, Iowa, hog farmer and lawyer, said he hardly would put the MIT study on nitrites on the same plane as the surgeon general's warning on cigarettes. The connection between smoking and cancer was studied years and years before the surgeon general's report, he said, compared with only a minimum amount of research on nitrites and cancer.●

## HOPES OF WHALING BAN SPIKED BY PANAMA

### HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. McDONALD. Mr. Speaker, one of the really endangered species in this world of ours has been the whale. Today, only two nations really conduct whaling on a large scale: The U.S.S.R. and Japan. Judging by the bumper stickers one sees on the streets, many persons are aware that Japan is a major whaler, but unaware of the heavy Soviet activity in this regard. Recently yet another attempt was made to effect a moratorium on whaling and it failed. The main reason for this failure, according to the London Daily Telegraph of June 27, 1978, was that Panama withdrew its support from the effort at the behest of Japan, over a threat to withdraw a lucrative sugar agreement. This should tell us about the present Government of Panama. The story follows:

HOPES OF WHALING BAN SPIKED BY PANAMA

(By Godfrey Brown)

A demand for a 10-year "ceasefire" to save the world's whales from the threat of extinction was withdrawn yesterday when the International Whaling Commission meeting opened in London.

It will probably be another year before the proposal can resurface.

The conservationists' hopes are now pinned on reductions in the catch quotas being agreed by the Commission during its meetings which continue until Friday.

The ten-year moratorium on commercial whaling was to have been tabled by Panama, but was withdrawn among allegations of commercial pressure by Japan, one of the big two whaling nations.

*Eco*, a newspaper run by Friends of the Earth, claimed that Japan had threatened to cancel a £5 million sugar deal with Panama if it tabled its proposal.

The withdrawal followed the apparent "sacking" of Panama's original commissioner to the meeting, Mr. Portom-Gouin, who had been instrumental in the proposal. He has been demoted to simply an adviser to his delegation, and replaced by Panama's ambassador, Mr. Roger Decerega.

Mr. Decerega strongly denied that Panama had responded to Japanese pressure. The proposal had been withdrawn "because we believe a moratorium would be counterproductive."

Last year eight countries outside the 17-nation commission killed more than 7,000 whales, compared with the Commission countries' tally of about 23,000.

After Panama's proposal was formally withdrawn, the Argentine delegation asked whether another country could adopt it. But Mr. Arthur Bollen, Commission chairman, from Australia, said that under Commission rules once an item had been removed from the agenda, it could not be replaced for 60 days.●

## CLAYTON FRITCHEY POINTS TO INFLATION FACTOR

### HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. SIMON. Mr. Speaker, Clayton Fritchey recently had an excellent column in the Washington Post about the relevance of the military budget to inflation.

He would be the first to suggest that simply to assign inflation totally to the military budget would be a distortion, just as others who assign it to a variety of things distort the reality.

But it is an important factor that generally is overlooked.

Clayton Fritchey is an experienced, seasoned newsman who combines years with wisdom, and I hope my colleagues who did not read the original column will take the time to read it now:

INFLATION'S ROOTS ARE IN THE MILITARY BUDGET

(By Clayton Fritchey)

Everybody agrees that inflation is now Public Enemy No. 1, but unfortunately there is little agreement on what causes it.

It's blamed on countless things. The White House has one list, Congress another, and the Federal Reserve Board still another. The business community also has a list of its own. Yet, in a negative way, they are all alike in that they uniformly shrink from putting the finger on the single most inflationary factor in our society: the huge, wasteful, non-productive, U.S. military colossus, along with the staggering deficits that have accompanied it.

It is a pipe dream to keep on talking about licking inflation and balancing the budget as long as military spending continues unbridled. Wage and price controls might help, but it's doubtful that even they could keep inflation effectively in check if defense expenditures go on as projected.

When Carter was campaigning for the presidency, he rightly said, "When you spend money for defense you don't spend it on education, on health, or other services or goods. And I think the shift away from weapons toward peaceful goods and services in the long run is favorable for world peace, and also you get more jobs per dollar spent."

He promised to cut the defense budget (then running around $100 billion a year) by 5 percent, but now it is 1978 and the budget calls for $126 billion. Carter has turned thumbs down on the B1 bomber and a new nuclear carrier, but he has added new weapons of his own. In the next fiscal year the Pentagon budget is expected to be in the $133 billion to $139 billion range. By 1983 it will probably be $173 billion or more. The authoritative Center for Defense Information (CDI) foresees a figure of $180 billion by then.

Instead of raising additional revenuess to pay for those soaring expenditures, Congress and the president have cut taxes, ensuring further deficits exceeding the peak ones of World War II. Nobody understood better than then-President Eisenhower the inflationary costs of such a policy. "The military establishment," he said, "not productive of itself, necessarily must feed on the energy, productivity and brain power of the country, and if it takes too much, our total strength declines."

The Center for Defense Information notes that, over the years, the United States has been spending a smaller portion of the military budget on the defense of America. About 70 percent of that budget, the CDI reports, "now goes to defend our allies and project our power overseas." Actually, there are currently 27,000 more U.S. servicemen and women abroad than a year ago.

One reason the inflation rate in Japan and West Germany is so well in hand is that they spend so much less on defense than the United States. In relation to gross national product, the Japanese military expenditure is about one-fifth of America's.

The ever-rising U.S. defense budget today reflects not so much congressional fear of Russia as fear of unemployment and the closing of costly but needless military installations in their states and districts. Most economists, however, see military spending as a poor job-creator, compared with equal expenditures on civilian needs.

The growth of U.S. inflation is easy to trace. It began with the Vietnam War. Prior to that, in the earlier Kennedy-Johnson years, the range of inflation was merely 1 to 3 percent. It started climbing when Lyndon Johnson, fearing public hostility to higher taxes to pay for his unpopular war, quietly turned to deficit financing on a large scale.

President Nixon did the same, only on a more grandiose scale. Even after U.S. withdrawal from Vietnam, the military budget kept rising, generating an unprecedented deficit of $175 billion in the last years of the Nixon-Ford era. Meanwhile, the inflation rate went steadily up, finally reaching double-digit proportions and a record rate of 12 percent. The ensuing recession reduced it some, but today it is still hovering near the dangerous double-digit level.

Can the fat in the military budget be cut without impairing the muscle? Only a few days ago the Brookings Institution found that the Pentagon could save over $900 million a year by eliminating overpayment of its blue-collar workers. A presidential commission recently called for an overhaul of the military pension system, saying $10 billion per year could be saved that way.

Pentagon officials themselves admit that Navy finances are in a shambles, with cost overruns on new ships totaling more than $6 billion. Another recent study by two former high Pentagon officials found that $40 billion could be saved over the next few years by selective reduction of forces and cancellation of certain new weapons systems.

The really significant savings, however, will not be realized until the "momentum of the arms race" has been arrested. That means, first, the restoration of détente, then new agreements with Russia that substantially cut back strategic arms and finally, serious attention to general disarmament, which some experienced statesmen believe is not as impractical as it may sound.●

## LIQUID NATURAL GAS STORAGE—A NEVADA PROBLEM

### HON. JIM SANTINI

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. SANTINI. Mr. Speaker, the Fuels Transportation Safety Act is of particular concern to 6,000 of my constituents who live in and around Dayton, Nev.

These people are descended from the generations of Nevadans who helped settle the State and as such, are not easily given to acting out of alarm over any situation. Nor are they reactionary to progress or new ideas. Dayton, in fact, exemplifies many other communities around this Nation that may soon face construction of multimillion gallon liquid natural gas storage facilities literally in their backyards.

These people are concerned citizens expressing their reservations over a system of storage of potentially dangerous gas. To them, the questions of safety have not been adequately answered. As a result, front page news stories are appearing in newspapers, such as the Mason Valley News, around the area. Even the Reno Evening Gazette, 50 miles away, has published an editorial expressing support for the residents of Dayton, and citing regional concerns about LNG storage. These amendments offer us the opportunity to increase safety precautions and calm the fears of our constituents.

I would, therefore, urge my colleagues to read the following newspaper excerpts and support the amendments mandating safer standards for storage of this volatile gas:

DAYTON RESIDENT PROTEST: LNG PLANT "A WORLD OF HURT" FOR DAYTON VALLEY

Approval of a proposed liquefied natural gas storage tank facility would mean "nothing but a world of hurt for Dayton Valley".

That seemed to be the popular consensus among the estimated 125-150 Dayton area residents who attended a public hearing with the Board of Lyon County Commissioners held at the Dayton Elementary School Wednesday evening.

Eight rows of 15 people each plus many more who wound around and even out the doorways voiced the opinion that Dayton just does not want a valley site for the LNG facility proposed by Southwest Gas Corp.

Moderated by Commissioner John Poli, the lengthy hearing began with a long, detailed presentation by Southwest Gas. Dr. Hal Wesson offered slides, photographs, and described fire restrictions. David Rayney and Vic Lafave of El Paso Gas demonstrated the properties of natural gas and LNG.

A very detailed talk given to show the safety involving LNG on ships brought humor to the audience and many whispered asides.

Ivan LaFave of Chicago Bridge and Iron, the company scheduled to construct the facility, explained the safety factors of the proposed tank.

After a 5 minute break, a host of speakers—all against placing the tank at the present suggested site—spoke up.

Bonnie Brown, chairman of the residents protest committee, spoke first and was followed by John Giomi, attorney for the Dayton Valley Residents Defense Committee. Cliff Frederick, Ken Yuhaulgh and Gary Peterson spoke next and were followed by June Trese who said. "We have the right to elect a president. Don't we have anything to say about a gas company?"

Bob Ray, whose remark that he was glad to hear how safe the ships were as they would go up the Carson River brought laughter from the audience, said, "We were here first. I think we have a priority. You are going to ruin us in Dayton, Mark Twain, and Stagecoach."

Mark Tuffo of Yerington questioned who had done the research on the safety aspects of the plant. The Japan and the United Kingdom—not the U.S. government—was the reply. It was brought out that Japan is putting such tanks underground.

Joan Williams of Moundhouse was given a figure of 2,000 Lyon County customers now using natural gas. That figure was disputed by residents in the vicinity of the proposed site, none of whom are getting this gas or have any prospect of getting the gas because of the large lot sizes and the resultant cost of piping.

Resistance continues to stiffen as Southwest Gas Corp. pushes harder for the completion of a liquid natural gas shortage facility near the town of Dayton.

There appear to be two major differences of opinion at this point in time where late-blossoming opposition has succeeded in getting a two-month continuance in the Public Service Commission's consideration of the project.

First item of contention is Southwest Gas' definition of Dayton as an "undeveloped" area. There are in fact some 6,000 people living in the area between Dayton and Silver Springs, 20 miles to the east. The Dayton townsite, itself, is one of several outlying communities programmed for "sudden city" status. Ten miles to the east of Carson City, Dayton is a likely candidate to catch most of the capital city's future population growth as aggressive controls continue to hold down expansion there. Some 7,000 units of residential construction have already been approved for the Dayton area. A new high school is proposed on a site three miles away from where the tank would be located.

The second arena of combat is the discussion over just how safe (or dangerous) the facility will be. Described as a gigantic thermos bottle, the $19.2 million facility will stand 116 feet high and will hold 12 million gallons of liquid natural gas (LNG). Southwest Gas has proposed installation about 10 miles east of Dayton along U.S. Highway 50. Daytonites, who are unanimously opposed to the project, wow one another with gruesome tales of creeping banks of escaped gas and fiery holocausts.

Southwest Gas spokesmen pooh-pooh the fears but the astonishing fact is: accepted fire controls and emergency procedures involving LNG are pretty much untried or simply beyond current technology.

U.S. Sen. Howard Cannon, D-Nev., has called for a five-year, $50 million study of the hazards involved in the storage and transportation of LNG. The study would be made by the Department of Energy and would get underway as early as Oct. 1. The testing would take place on Frenchman Flat, an area of the Nevada Test Site that has been unused since above-ground atomic bomb tests were halted back in the 1950s.

Although Cannon has declined to suggest that the Dayton LNG storage project should wait until tests are completed, he has noted that "there is much we don't know about

the hazards involved with handling LNG." He adds the observation that storage facilities such as the one planned for Dayton are numerous in densely populated eastern cities and he doesn't perceive the hazards to be "unacceptable" ones.

Once adequately assessed, it is likely that all the possible hazards and shortcomings can be anticipated and adequately accommodated. Hazards are relative. If you drop it from a point high enough, crash into it with enough mass and speed or pack enough dynamite underneath it, you can achieve a tank rupture no matter how massively it's constructed. But if catastrophe strikes, there should be adequate planning and equipment present in the area to cope with it. Southwest Gas people are disturbingly short on information in those areas.

Finally, it is not clear why they should necessarily pick the Dayton area for a project that literally begs for insolation. For reasons that escape logic, the desert foothills along Highway 50 are booming with growth and expansion at a rate second only to the Reno-Sparks-Carson City areas.

A simpler solution would be to pick an isolated area (Nevada still abounds in this commodity) to build. And those who would move in around the facility later would understandably be doing so at their own risk.

LNG storage facilities are a reasonable answer to the energy crisis. The fact may be they are relatively harmless and would be innocuous neighbors which would guarantee plentiful fuel supplies in the dead of winter. But as far as we can see, Southwest Gas does not have sufficient safety data to insist it be allowed to install the Dayton facility without further delay.

If the Frenchman Flat research project unearths any bad news, Daytonites would probably rather hear about it BEFORE their LNG tank is constructed—and not after.●

## PERSONAL EXPLANATION

### HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. CORCORAN of Illinois. Mr. Speaker, due to a previous commitment in my district, I was absent during part of yesterday's proceedings on H.R. 11280, the civil service reform bill. I would like to include in the RECORD at this time my voting record for those votes which I missed.

Rollcall No. 746: Bonior amendment which sought to extend veterans preference for Vietnam-era veterans for 15 years from the date of separation or until December 31, 1985, for Vietnam-era veterans who served in the Vietnam war (paired for).

Rollcall No. 747: Hanley amendment which retains existing veterans preference standards (paired against).

Rollcall No. 749: Leach amendment which sets a statutory ceiling on the total number of Federal employees in the executive branch, "yes."

Rollcall No. 750: Collins amendment which sought to permit the FBI to place 140 positions in GS 16–18 without regard to the provisions placing limitations on executive-level positions, "yes."

Rollcall No. 751: Erlenborn amendment which sought to strike title VII (labor-management and employee relations language) from the bill in its entirety, "yes."

Rollcall No. 752: Wilson of California motion that the Committee of the Whole rise and report the bill back to the House with the recommendation that the enacting clause be stricken, "no." ●

## NEED FOR A STRONG MERCHANT MARINE

### HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. BOB WILSON. Mr. Speaker, we have discussed at length in this chamber the need for a strong Navy in the face of the ever-increasing Soviet threat. But a part of that naval strength, and of our future strategy should an emergency arise, is a strong merchant marine. However, as our dependence on seaborne commerce from other countries rises, the number of U.S.-flag vessels has dwindled alarmingly.

In an article for the Naval Academy Alumni Association magazine Shipmate, Rear Adm. George H. Miller, USN (ret.), who has long been a student of naval warfare and is an expert in merchant marine affairs, details the importance of a strong merchant marine, and warns of the perilous seas we may be sailing without one.

The article follows:

NEEDED—A U.S. MARITIME STRATEGY

(Rear Admiral George H. Miller, U.S. Navy (Ret.)

In the history of the more successful—more lasting—civilizations of the past—Greece, Carthage, Rome, Spain, England, to cite a few examples, one notes a common threat. Their early years, the growth years, were characterized by the development of an expanding foreign trade, a trade carried to distant lands by merchant ships. Rival peoples built navies to protect—and disrupt—this trade. Thus the growth phase of these civilizations might be characterized as the maritime phase.

Eventually, as these civilizations stabilized, they began to send armies overseas to maintain stability and protect distant trading markets from intrusion. Getting mired down in overseas land wars bled nations of their wealth and manpower, and decline accelerated.

Navies take on the characteristics of the nations they serve. Growing nations, the traders, had what might be called maritime navies, whose primary concern was protection of shipping and control of the sea-lanes. Civilizations in the affluent, declining stage had what might be called land-war navies, whose primary occupation was to supply and support overseas land wars.

The rapid growth of Soviet foreign trade, along with their merchant marine and navy, is clear evidence that the Soviets understand how trade and maritime strength built many of the most successful and lasting civilizations of the past. The Soviets have carefully avoided committing Soviet forces to overseas land wars. Instead, they use foreign trade and their merchant marine to spearhead expansion, which is proceeding on a scale and at a rate unprecedented in history.

Meanwhile, the United States has thus far proved unable to cope with the maritime strategy of the Soviet Union. Instead, U.S. decision makers seem to occupy themselves with preparing for Soviet armies to storm the ramparts of NATO. But the land attack does not come. The Soviets are busy conquering the world without war. They find it cheaper and safer to conquer foreign trade with merchant ships than to conquer territory with troops.

The fact is that the United States, since World War II, has adopted a land-war strategy, very similar to that adopted by notable civilizations of the past in their declining years.

The U.S. Defense establishment, since passage of the National Security Act of 1947, has been structured primarily for land war. It is based principally on the theory that each of the Armed Services—Army, Air Force and Navy-Marine Corps—must have its share of the budget, its share of the action. So structured, the United States can employ its armed forces only when land war is involved. The United States at present has no maritime alternative to land war.

For those nations which think primarily in terms of land wars, it is easier for budget purposes to plan for short wars than for long ones. The usual procedure is to create a scenario for a land war, select an area where the war could logically occur, assume certain weaponry, together with quantities and capabilities on both sides, and run it through the war-gaming procedure, computerized or otherwise. One comfortable aspect of war-gaming a short land war, or sea war for that matter, is that our side usually wins. People who participate in these exercises usually don't address the uglier possibilities.

Short war planning also creates the rationale for buying missiles, tanks, aircraft and other land-war equipment and for avoiding the purchase of ships, which require longer construction lead-time and more money than land-war weaponry.

The campaigns of World Wars I and II were delayed again and again primarily because of a shortage of merchant ships. The United States embarked on massive emergency shipbuilding programs upon entry into both World War I and World War II. Many of those ships, however, were not completed before the wars ended. Fortunately, in those days, strong allies held off the opponents while we organized and prepared. Today, the rapid growth of the Soviet Navy and Merchant Marine is clear evidence that the Soviets give high priority to the construction of both navy and merchant ships. Their shipbuilding program also suggests that they are preparing for a long war and do not intend to accommodate to the short war thinking of U.S. planners.

The record of the short war planners is not very good. Something goes wrong; people miscalculate; the opponent does not realize that the war is supposed to be short and fails to surrender according to the wargame scenario. One common characteristic of short war planners is that they almost invariably make a case for more land war forces and weaponry; they rarely make a case for more ships of any kind. A common conclusion among U.S. short war planners has been that we always have enough ships.

The German short war planners were proved wrong in World War I. They were wrong again in World War II. U.S. short war planners were wrong in the Korean war. They were wrong again in the Vietnam war. Those who think in terms of future short wars are probably just as wrong now, unless the U.S. itself plans to surrender according to the scenario.

A protracted war turns primarily into a sea war of attrition, a struggle for world resources, human and material. A sea war turns on who has the ships, on who can load those ships and shepherd them to the strategically and geographically important areas of the world. A sea war means persuading the populations of the world and the

resources they control to join the struggle. It is the side with the ships, the side with the ability to keep those ships afloat and moving, the side with the persistence to carry on, that usually wins the protracted struggle, a principle which land war strategists historically have seemed unable to comprehend. The nuclear war, hypothesized by today's land war scenarists, looks suspiciously like a warmed-over version of the blitzkreigs of World Wars I and II.

The fact is that since the late 1940s, the U.S. has had a tendency to become involved in land wars, wars which have bled America of her treasure and her potential young leaders and competitors, wars which have undermined public confidence in our government's ability to provide for the common defense.

The U.S. Constitution and the U.S. Merchant Marine Act of 1936 do contain language which, if supported by the responsible government officials, provides the means to develop a U.S. maritime strategy alternative to land war.

The Constitution states that the Congress shall provide and maintain a Navy. It goes on to state that Congress shall raise and support armies but no appropriation for this purpose shall be for longer than two years. This raises a question concerning present Defense Department policy of giving higher priority to procurement of land war weaponry than to the procurement of ships.

The Merchnat Marine Act of 1936–1970 states that a U.S. Merchant Marine is necessary for national defense and development of U.S. foreign and domestic commerce. The Merchant Marine Act specifies that the United States shall have a Merchant Marine sufficient to carry its domestic water-borne commerce and a substantial portion (interpreted as at least 50 percent) of the foreign waterborne export and import commerce of the United States, and to provide shipping service essential for maintaining the flow of such domestic and foreign waterborne commerce at all times. The Merchant Marine Act goes on to state that the U.S. Merchant Marine shall be capable of serving as a naval and military auxiliary in time of war and national emergency; that it is the policy of the United States to foster development and encourage the maintenance of such a merchant marine.

Under the Merchant Marine Act the Secretary of Commerce is responsible for carrying out the foregoing national policy and for adopting a long-range program for replacements and additions to the American merchant marine. The Act further directs the Secretary of Commerce to cooperate closely with the Secretary of Defense and the Secretary of the Navy on a number of matters concerning the U.S. Merchant Marine.

On the other hand, the National Security Act makes no mention of the Merchant Marine, or of need for cooperation between the Navy and Merchant Marine. The National Security Act makes no provision for development of a national maritime strategy to serve the Nation's interests without resort to land war. But the National Security Act does make the Navy responsible for "prompt and sustained combat incident to operations at sea." The National Security Act also makes the Navy generally responsible for protection of shipping.

Today, the U.S. has only 470 Navy ships and 577 merchant ships, capable of carrying only 6 percent of U.S. export and import trade, only 3 percent of U.S. petroleum imports. By comparison, the Soviet Union has 1919 Navy ships and 2420 merchant ships capable of carrying over 50 percent of Soviet export and import trade. This gives the Soviet Union an overall total of 4339 Navy and merchant ships, as compared to the U.S. total of a little over a thousand, a Soviet superiority of 4 to 1. As an example of how desperately short we are of ships, over 1700 merchant ships served as part of the U.S. Navy in World War II, over 100 of them as auxiliary aircraft carriers.

In World War II, the United States served as the arsenal of democracy. Today, however, the United States must import unprecedented quantities of petroleum and other critical raw materials. Interruption of the inflow of U.S. critical materials in time of war could force our war industries to shut down and could prevent U.S. armed forces from operating overseas. The Soviet Union, on the other hand, is virtually self-sufficient in critical raw materials.

America's post-World War II policy of neglecting shipbuilding and favoring large nuclear retaliation and land war forces has raised the possibility of defeat of the United States. The Soviet nuclear buildup assures destruction of the U.S. in event of a nuclear exchange. At the same time, the Soviet Union avoids a direct attack on areas occupied by U.S. land forces. With U.S. armed forces thus stalemated, the Soviet Union has been free to use its foreign trade and merchant marine assets in an organized campaign to achieve world domination.

Meanwhile, the U.S. has a paralyzing shortage of shipping, with neither plans nor organization capable of rebuilding and marshalling its maritime and foreign trade assets in the national interest.

It is a fact that foreign trade is now and always has been a major factor in a nation's world influence, economic strength and national security. Why is it then that almost any foreign flag ship can participate in U.S. seaborne trade, while foreign air transports can participate in U.S. airborne trade only on a *quid pro quo* basis under agreements negotiated by the U.S. Government? The current practice of squandering America's enormous seaborne foreign trade assets, with scant consideration for the national interest, offers little organized competition to the Soviet campaign of world conquest.

U.S. international efforts over the past three decades have been characterized by rationalized accommodation and retreat. Shall we go on frightening ourselves with the raised-in-America specter of instant nuclear retaliation? Shall we continue to accommodate to Soviet-inspired "wars of national liberation," in Southeast Asia, in the Middle East and Africa, in Central America? Or shall we forge an integrated, no-nonsense political-economic-maritime strategy to compete with Soviet imperialism now?

Land war strategy is contributing to the decline of U.S. world influence, economic strength and public confidence. The most important national security issue confronting the U.S. Government today is how to organize, develop and put into motion a U.S. maritime strategy. If Americans still prefer liberty to bondage, there may yet be time to turn the tide.●

## NO COMPROMISE

### HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. McDONALD. Mr. Speaker, while the bankrupt African policy of President Carter and Andy Young grinds on, spreading chaos and blood everywhere, we are treated to the spectacle of the so-called Patriotic Front shooting down a Rhodesian airline plane, looting it, and butchering the survivors. These then are the people your friendly State Department feels ought to be the architects of yet another Marxist dictatorship of Africa. The Richmond Times-Dispatch ran an excellent editorial on September 6, relative to this incident and the decay of the West. I commend this to the attention of my colleagues. The editorial follows:

NO COMPROMISE

Joshua Nkomo, one of the leaders of the Patriotic Front guerrillas in Rhodesia, has admitted that his forces shot down an Air Rhodesian airliner with 56 persons aboard but he has denied that his men murdered 10 of the 18 survivors.

But someone gathered the survivors on the pretext of giving them water and medical aid and then gunned them down in cold blood. Someone bayoneted one of the women after first shooting her. Someone looted the airplane and the bodies.

The plane crashed in an area near Zambia that is thick with Mr. Nkomo's guerrillas. We recall that when several white missionaries were butchered near the Mozambique border recently, Robert Mugabe, Mr. Nkomo's partner in the Patriotic Front, denied that his men had committed that atrocity even though it occurred near their headquarters and there were eyewitnesses who identified the guerrillas.

Little doubt can reasonably be entertained that those who savagely killed the survivors of the plane crash were the same people who knocked the plane out of the sky in callous disregard of human life.

The Patriotic Front is the same outfit that the World Council of Churches has just given $85,000 on the clear-headed theory that aiding these black guerrillas in murdering whites, including church missionaries, will "combat racism." It is the same organization that President Carter and Ambassador Andrew Young have tilted toward, as opposed to the internal settlement among moderate blacks and whites in Rhodesia. This kind of Western pressure led Prime Minister Ian Smith, a party to the internal agreement, to meet secretly with Mr. Nkomo last month to explore any possibilities of compromise.

But in the aftermath of the massacre of plane crash survivors, Chief Jeremiah Chirau, one of the black leaders of Rhodesia's interim government, expressed the outlook most realistically and eloquently. Said Mr. Chirau:

"If the Western world continues to support such people, who can only be described as rabid animals, then I can only believe that Western democracy as we know it is a thing of the past."

The only kind of "compromise" the Patriotic Front has shown any interest in is one that would turn over Rhodesia to these Marxist-oriented murderers lock, stock and barrel. And once in power this outfit could be expected to be every bit as bloodthirsty as it has been in opposition.●

## POLITICAL PARTIES NEED STRENGTHENING

### HON. JOHN B. ANDERSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. ANDERSON of Illinois. Mr. Speaker, I have just read in this morning's Chicago Sun-Times a perceptive article by our colleague DAVE OBEY drawing the connection between weak political parties and legislative stalemate. The argument, to me, is a compelling one: A myriad of interest groups have stepped

into the vacuum left by the parties and pulled Congressmen in every which way but the political center. As a consequence, it becomes increasingly difficult to fashion programs that attract majority support, without just pasting together a tenuous coalition of narrow interest groups. In the process, it is all too easy to lose sight of broader considerations—such as what, in fact, is best for the country.

The parties need strengthening, to countervail the disproportionate influence of single-issue groups that may represent only the smallest fraction of the population. But this begs the question of how the parties are to be improved. The answer seems clear enough: They should be made to stand for things that have broad appeal, so that they will again be listened to, and so that they will again make themselves heard.

Mr. Speaker, I place the Obey article at this point in the RECORD.

[From the Chicago Sun-Times, Sept. 11, 1978]

WHY GOVERNMENT GETS SO LITTLE DONE NOWADAYS

(By DAVID R. OBEY)

Why is government getting so little done today? Why has it become so difficult for any President to effectively lead the country? One reason is that our political system has changed over the last two decades.

When I entered politics 15 years ago, it was fairly easy on almost any issue to find a consensus around which the majority could rally. Even if that weren't possible, public opinion generally coalesced around a few major approaches to our most difficult problems. But today there is almost no way of addressing any issue that generates majority support.

This fragmentation stems in part from two developments: the growing influence of one-issue groups and the declining strength of the major political parties. Both have serious consequences.

In the last 10 years, there has been a geometric explosion in the number of interest groups organized around a single issue with a single goal: groups to kill the B–1 bomber and others to save it; groups to stop nuclear power development and others to promote it; groups that decide if they like government solely on the basis of what it does about tuition tax credits, labor law reform, abortion, endangered species or capital gains taxes. Politicians have little protection against the unbending demands of these groups because what used to be their first line of defense—their party—is no longer capable of protecting the political center.

One of the most critical functions parties used to perform was to pull together floating coalitions of interest groups. They took into account competing proposals, separate good from bad and, most important, fashioned majorities—majorities that determined what the key issues were and what was to be done about them.

Today the centers of both parties have narrowed to the point of ineffectiveness. With no real center of gravity left in the system, each group pulls its own way. The result: Many of our social and political institutions—including the government itself—are frozen in the ice of internal division.

When they have been strong enough, parties have been able to overcome that kind of inertia and get things moving again. If the public didn't like the direction in which it was moving, it could bring in the other party and try a new one.

But today government has nearly been brought to a standstill because both parties have been so weakened that neither is functioning as an effective instrument of power. Therein lies one key to the current disaffection with government; it's not that government is doing things people don't like, but that it is perceived as being weak, ineffectual and incapable of dealing with problems people face.

It has been fashionable over the last decade to say the parties have become "unresponsive."" The fact is they have become too responsive to the single-minded demands of narrow interest groups.

Strong parties used to be able to strike compromises on major political issues by balancing the demands of constituent groups with the needs of the country and party. Today, with the gravitational pull of the center weakened, each group is able to demand a higher price for its support. There is less pressure on each to compromise for "the good of the order" or to get on the bandwagon before it leaves without them.

Because the parties are so weak, many politicians have begun going outside them. In building-block fashion they add up lists of 2-per-cent-of-the-population interest groups to whom they will not say no, until they have put together their own personal majorities.

Because each politician has a different constituent base, members of the same party are locked in on both sides of almost every issue. That means there is very little "give" in the system of the sort the major parties once provided—the kind of give or flexibility necessary to build majority support for solutions to our problems. The result—whether on energy, tax policy or the conduct of foreign affairs—is chaos.●

## PERSONAL EXPLANATION

### HON. EDWIN B. FORSYTHE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. FORSYTHE. Mr. Speaker, due to illness, I missed several votes on September 6 and September 7. I would like to take this opportunity to advise my colleagues and friends how I would have voted if I had been present:

Rollcall No. 724: Quorum, September 6, 1978.

Rollcall No. 725: H.R. 12432, Civil Rights Commission, September 6, 1978. Treen amendment to prohibit the Commission on Civil Rights from appraising or studying and collecting information about laws and policies of the Federal Government, or any other governmental authority, with respect to the issue of abortion. I would have voted "no."

Rollcall No. 726: House Joint Resolution 1088, New York City loan guarantees, September 6, 1978. Adoption of joint resolution to permit the secretary of the Treasury to guarantee up to $1.65 billion in New York City bonds, as authorized under the New York City Loan Guarantee Act of 1978 and to appropriate funds necessary to pay guaranteed loans if the city defaulted on them. I would have voted "yea."

Rollcall No. 727: H.R. 7308, foreign intelligence surveillance, September 6, 1978. McClory amendment to allow wiretapping of non-U.S. persons without a warrant, provided that a certificate was issued by the Attorney General and a designated executive branch official in the area of national security who had been confirmed by the Senate. I would have voted "yea."

Rollcall No. 728: H.R. 7308, foreign intelligence surveillance, September 6, 1978. Ertel amendment to eliminate a provision in the bill to establish a special court to hear Government applications for warrants to conduct electronic surveillance in the foreign intelligence area. I would have voted "no."

Rollcall No. 729: Quorum, September 7, 1978.

Rollcall No. 732: Quorum, September 7, 1978.

Rollcall No. 738: Motion to resolve into the Committee of the Whole House September 7, 1978. I would have voted "yea."

Rollcall No. 739: Quorum, September 7, 1978.●

## EIGHT RECOMMENDATIONS SUBMITTED TO AID HANDICAPPED

### HON. LAWRENCE COUGHLIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. COUGHLIN. Mr. Speaker, I am pleased to submit for the RECORD a summary of eight recommendations for Government action to assist handicapped American citizens.

The summary is in the form of a letter published in the spring 1978 Harvard Law School Bulletin and written by Rudolph V. Lutter, Jr., a constituent who has been active for years on behalf of handicapped individuals.

Mr. Lutter, Harvard Law School class of 1960, is a native of Philadelphia who earned his bachelor of arts degree in sociology, with a minor in government, from Pennsylvania State University. He has worked in Washington since 1962.

An attorney adviser to the Federal Communications Commission, Mr. Lutter served as an official observer for me at the 1977 White House Conference on Handicapped Individuals. He is visually handicapped, suffering from an ailment that reduces his central vision but does not affect his peripheral vision.

Mr. Lutter has been working to assist the handicapped for the past 13 years. He is president of the Volunteers for the Visually Handicapped, and serves as board member for the National Capital Area, Coalition of Citizens with Disabilities, D.C., and the Overbrook School for the Blind and its alumni association, Philadelphia.

I believe Mr. Lutter succinctly yet forcefully states the case for his eight recommendations to aid the handicapped.

Mr. Lutter's letter:

PROPOSALS FOR THE HANDICAPPED

In December of 1977, a three-volume report was issued by the staff of the first White House Conference on Handicapped Individuals. It contained 797 pages, 287 issues and 3,522 proposed solutions to those issues. In view of this and the fact that the Conference dealt with matters affecting 36 million Americans, I am submitting the following eight recommendations for necessary government action with respect to the handicapped which I made to several members of

Congress whom I represented at the Conference as an official observer. They are based on material gathered at the White House Conference, and my personal experience as a handicapped individual and with government.

(1) Research in preventive and rehabilitative medicine must be amply funded.

(2) A national medical insurance program must be established to cover the costs of physical and mental illness for all citizens. Mental illness is specifically mentioned in this recommendation because of the emotional strains that come to handicapped citizens as a result of their economic and social exclusion from our society.

(3) The state rehabilitation offices, who receive a major part of their funding from the U.S. Department of HEW, must be forced to revise their personnel practices so as to employ rehabilitation officers and other staff who will be more able to wisely guide and assist handicapped citizens at a crucial time in their lives.

(4) The Education for All Handicapped Children Act of 1975 should be amended in order to guarantee parents the option of sending their children to schools designed solely for the education of the handicapped. The law presently looks toward educating handicapped children along with unhandicapped children in public schools (mainstreaming). While such a method may be comparable in academic and vocational training to the traditional education of handicapped students in specialized schools and may have some advantages, it is suggested that the vital learning of self-confidence, available in a specialized school through full participation in all extra-curricular, social and athletic activities of the school, irrespective of a handicap, is most important. Too, the alumni associations of specialized schools can provide an additional and desirable source of lifelong friends with similar experiences.*

(5) The exercising of the right to vote must be facilitated for handicapped citizens. Pending Senate Bill 1345 and House Bills 4119 and 6295 look toward the making of polling places physically accessible and the simplifying of the method of casting an absentee ballot.

(6) The Civil Rights Act of 1964 should be amended to include the handicapped as a protected minority. Pending Senate Bill 3504 proposes such an amendment.

(7) Since unemployment is the key to economic independence and since economic strength provides a path to social integration, it is recommended that Section 501 of the Rehabilitation Act of 1973, which requires the federal government to take affirmative action with respect to the employment and promotion of handicapped citizens, be amended to provide for (a) the provision of a private, civil cause of action for its enforcement in the federal courts; (b) the payment of attorney's fees in cases where a violation of the Act is found; (c) back pay and retroactive promotion where a violation of the Act is found; and (d) the establishment of a mechanism of censoring government officials who are held to have violated the Act. The development of a model program of employment of handicapped citizens in the federal government will advance the implementation of Section 503 of the Act which mandates affirmative action in employment of the handicapped by private enterprise receiving federal contracts.

(8) Since existing law or new law is useless unless enforced, it is recommended that a legal ombudsman be established as a part of the federal government, to encourage the forthright enforcement of federal laws concerning the handicapped by the appropriate federal agencies.

Rudolph V. Lutter, Jr. '60
Washington, D.C.●

*I do not believe my judgment to be tainted in this recommendation; however, in evaluating it, it should be known that I am on the boards of the Overbrook School for the Blind and its Alumni Association.

## THE EXIMBANK AND SOUTH AFRICA

### HON. JAMES J. BLANCHARD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. BLANCHARD. Mr. Speaker, it has become apparent that the continent of Africa will be the focus of close scrutiny and important policy decisions for our country in the immediate future. Indeed, we have debated several bills this year which concern our policies toward the nations of Africa.

One bill which I was involved with as a member of the Committee on Banking, Finance and Urban Affairs was the Export-Import Bank bill. The question of whether the United States should impose economic sanctions through the Eximbank on South Africa because of their apartheid policies was raised when the bill was considered both in committee and on the floor of the House.

Mr. Mitchel Kehetian, who is the managing editor of the Macomb Daily newspaper in my district, spent 3 weeks in South Africa earlier this summer. He wrote a five-part series on the situation there, encompassing interviews that he had with people in various walks of life in South Africa, as well as some of his own reactions. I found the series very informative and interesting. Mr. Kehetian's point of view is different from so much of what is written these days about South Africa.

Therefore, in view of the very difficult questions that are involved in our policy decisions regarding South Africa, I want to give all of my colleagues an opportunity to read Mr. Kehetian's series of articles. Because of space limitations, I am inserting only the first article in his series. However, I would be happy to provide copies of the remaining articles in the series to any interested party.

The article follows:

[From the Macomb Daily, May 22, 1978]

COMMUNISM, NOT APARTHEID IS GREATEST FEAR

(By Mike Kehetian)

PRETORIA.—While white South Africans grope in search of a compromising solution to rid their land of cancerous racial policies, they stand determined to protect "the fatherland" from the growing Red Tide sweeping through the Dark Continent.

The white South African pleads for "more time" to resolve the country's apartheid dilemma, for his greatest fear is being engulfed by communism.

He points to Moscow's proxy army—more than 40,000 armed Cuban troops; and the Marxist takeovers in Angola, Mozambique and threatened intrusion into the internal affairs of Zaire and South West Africa.

As the South African glances across the border into Rhodesia, a once white-ruled nation soon to transfer the power base to black majority rule, he predicts the outcome: "A Marxist takeover with the blessing of President Jimmy Carter and Ambassador Andrew Young."

But he expresses a faint glimmer of hope that neighboring Rhodesia may still escape a Marxist takeover, a hope rekindled by Gerald Ford when the former president assailed the Carter Administration for supporting the "wrong side" in Rhodesia.

Carter contends the transfer of power by Ian Smith's white minority government to a multi-racial government must include representation from the Patriotic Front—a devout Marxist backed terrorist group fueled and supplied with Cuban and Soviet weaponry.

How real is the communist threat?

Maj. Gen. Douglas Ralston, the No. 2 man in South Africa's defense ministry, says it is real.

The huge wall chart of Africa in his tight-security ministry office in Pretoria is dotted with "red pins," with a question mark tacked to the future safety of the Cape of Good Hope oil route—which he labels as the "lifeline" for the "naive western powers."

When pressed if South African troops are offering aid to anti-Marxist guerillas in southern Angola, the military leader insists "we're not in Angola."

Yet, two days after granting an interview, South African ground and air force units struck with lightning precision at a Swapo terrorist base in southern Angola. The raid inflicted heavy losses on the Swapo camp, appropriately given the code name "Moscow."

Defense Minister P. W. Botha said the limited military strike was directed against Swampo terrorists, and to put an end to Swapo's extensive campaign of terror in South West Africa.

The country of South West Africa (Namibia), a former German colony, was awarded to South Africa as a protectorate after World War I by the then League of Nations. Its independence is expected later this year, through a western power—South African compromise.

Swapo insists it should decide the eventual fate of the emerging African state.

As to the defense of the Cape Sea oil route, Ralston insists South Africa no longer will assume the role of defending the "Panama Canal of the Indian and Atlantic Oceans."

"Henceforth, we will take a neutral stand on defending the Cape Sea route for western Europe and America. We will think of our own safety, first and foremost." he repeated.

Each day, no less than 60 oceanplying ships slip past the Cape. At least 17 are oil tankers heading for Europe and America.

When the Suez Canal was blocked during the 1967 Israeli-Egyptian war, the flow of oil tankers using the Cape, route tripled in number.

South African aerial photos taken of ships plowing the Cape waters also spotlight Soviet vessels, mostly in attack training exercises.

"If that day ever comes, the Soviets will be experts at hitting any oil tanker bound for the west—and without oil, western Europe collapses," Ralston warns, grimly.

On the subject of his nation's ability to wage combat against Cuban troops, Ralston firmly states: "We took care of Cuba in Angola, even with a small force of 2,000 against their 19,000. But we had to withdraw when your Henry Kissinger and the CIA broke their promise of help if we went in to stop the Marxist takeover of Angola in 1976."

Then there is Douglas H. McClure, an expert on Soviet strategy at South Africa's Institute of International Affairs, who boasts of his academic days at the University of Michigan and that his mother is an American.

"You (America) are the ultimate target. If all of Africa succumbs to Moscow, then

the western world will be at the mercy of Soviet expansion. You need our resources, and you will need the Cape Sea oil route," McClure stresses.

To lend credence to his concern, McClure unfolded exhibits and stats to confirm that more than 2,000 Cuban troops were air-lifted to Mozambique during the Marxist takeover of that former Portuguese colony.

When quizzed about South Africa's capability to ward off a full-scale communist attack, without western support and weaponry, McClure smiled: "We launched the development of nuclear war-heads in 1970, and by now we should have that ability. And we've got the French Mirage to deliver it—if necessary to survive."

As to the country's search for sophisticated weaponry to counter the Soviet build-up in southern Africa, McClure said: "We trade heavily with Israel. Israel also fears that America will let her down to satisfy selfish interests. I guess the one common trait we have with the Israeli is the will to survive against large numerical odds."

During Israel's 30th anniversary of statehood, South African Jews held rallies in this country's large cities—and with the blessing and participation of government officials and conservative newspapers.

With the demise of the Ford-Kissinger administration, McClure said "most South Africans placed great faith when Mr. Carter pledged to stand fast against communist expansion. Instead he and Andy Young refer to the presence of Soviet-backed Cuban troops in Angola as a stabilizing force. How can you call oppression a stabilizing force."

In the opinion of Harvey Tyson, editor of the influential Johannesburg Star, a frequent critic of government policies, the "communist threat is real," though he places equal concern over the country's apartheid policies.

The communist threat is one shared by a majority of white and black South Africans interviewed—from Pretoria to the southern tip of the country at Cape Town.

Solomon Ngobese, the mayor of Umlazi in the KhaZulu Homeland, while citing the black South African struggle for economic independence and self-government, adamantly states: "We don't need any help from Russia."

"I've seen what the communists have done to Angola, Mozambique and how they now threaten Ethiopia, Zaire and Rhodesia. As long as the communists are kept out of South Africa, we will achieve our ultimate goal. If the communists win, we all perish—whites and blacks."

The leader of South Africa's nearly one million Hindu and Muslim Indian community in the Natal Province was more to the point. "South Africa needs the west, and don't be misled that by sacrificing this country you will stop the communists. It will not work."

Equally rough on American policies in Africa was Lennox Sebe, the chief minister of the Ciskie Homeland. "Get rid of your Vietnam fear. Be bold against communism. Help our emerging black homelands to be strong economically and you defeat the seeds of communism."

Meanwhile, the man on the street continues to scoff at Carter's warnings to Cuba and the Soviets. "The Cuban and the Russian knows you still bleed from the Vietnam era, and they will not stop until they capture the minds of all Africans," is their story to visiting Americans.

Is the communist threat a real threat?

Ask any South African, be he white, black, Asian or colored and he'll respond with a concerned note.

As Ralston said: "If communism wins—then all our people face certain destruction."

But he counters, confidently: "We won't run away. We've been here for 300 years. We will fight to the end. This is our homeland."

(In tomorrow's report, Kehetian writes about South Africa's racial dilemma as seen by the ruling white political structure, urban blacks holding quasi-government posts and those who weathered the 1976 riots that swept through Soweto.) ●

## "REASONABLE CAUSE" RULING AGAINST OSHA

### HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. HANSEN. Mr. Speaker, in May I informed you of the Supreme Court decision regarding the case of Bill Barlow, a small contractor from Pocatello, Idaho, and his victory over the Occupational Safety and Health Administration's warrantless inspection regulations. At the time there was a great deal of pessimism among the members of the press that the Court did not provide a strong "reasonable cause" ruling. This, however, is not the case as I have continually maintained. My hopes and contentions have been significantly reinforced and the Barlow decision has been strengthened substantially in a recent Federal court decision in the U.S. District Court for the Eastern District of Wisconsin. OSHA once again was dealt a devastating blow.

The hapless safety agency had forced an inspection of a Weyerhaeuser facility with only an administrative warrant which came under legal challenge. The case was the first to be considered in the wake of the Barlow decision that a businessman does not have to settle for anything less than a warrant based on probable or reasonable cause.

Thus the Barlow decision continues to assume an increasing importance in American history, because it sets a constructive precedent for necessary protective guidelines for citizen rights in the face of Government activities. Heretofore, the businessman and farmer have been the victims of a recent trend in reverse justice where the citizen is assumed guilty until he can prove his innocence.

The Barlow court ruling places the burden of proof back on the Government where it belongs. OSHA can now come to inspect as before but the businessman can demand that they have a search warrant properly obtained from a magistrate, and the warrant itself can be challenged by the citizen if he wishes to question the grounds upon which the warrant was issued and the scope of the proposed search—thus resting the burden of proof on the Government where it should have been all along.

The Weyerhaeuser decision has upheld my hopes and contentions and significantly reinforced the Barlow ruling. I would like to call my colleague's attention to my remarks in the CONGRESSIONAL RECORD of July 25, 1978.

Additionally, Senate and House conferees are now considering H.R. 11445, amendments to the Small Business Act. One of the amendments to this bill offered by Senator DEWEY BARTLETT of Oklahoma will exempt most small businesses, those with 10 or fewer employees, from coverage under the controversial Occupational Safety and Health Act. Certain small businesses considered hazardous, because of high injury-illness rates, would remain subject to the provisions of the act.

Over the past few years Congress and more recently the administration have become increasingly aware of the burdensome impact that OSHA has had on small businesses. As a result, some effort has been made to reduce the harsh effects that OSHA has had on them. Most notably were recent announcements by the Labor Department of its intentions to delete 1,100 admittedly nitpicking regulations and later to eliminate unnecessary paperwork and reporting requirements affecting some 40,000 nonhazardous small businesses. The Department originally announced its intentions to delete the 1,100 regulations last December. Unfortunately, however, after many months no action has been taken to implement even the earliest decision to eliminate unnecessary regulations. Additionally, by legislative action we are already exempting farms with 10 or fewer employees from OSHA coverage and eliminating penalties in inspections of small businesses with 10 or fewer employees.

The benefit to the Nation's small businesses from the Bartlett amendment could be tremendous. Primarily affected are those small businesses already exempted from fines when there are 10 or fewer nonserious citations, such as the wholesale and retail trade, finance, insurance. real estate. and service industries. The injury-illness rate for this group is less than 3 per 100 fulltime workers. A statistic far better than that used by OSHA as indicating high-risk industries.

Mr. Speaker, I strongly urge House conferees and all House Members to accept the Senate amendment and "do something for the little guy who is finding the overlapping and burdensome requirements of Government from a multitude of agencies almost more than he can bear."

I include at this point in the RECORD material involving OSHA's lack of followthrough on announced intentions to relieve small businesses of excessive and unnecessary regulations and requirements. The articles follow:

[From the National Journal Aug. 12, 1978]

THE "FACTS" ABOUT OSHA'S 1,100 REVOKED REGULATIONS

Erroneous "facts" sometimes take on a life of their own in Washington. Once sanctified by official pronouncement and dignified in print, they have a way of becoming ingrained in the official lore of the town. The government's assertion last year that there was an impending swine flu crisis comes to mind.

So it is now with the case of the vanishing safety and health regulations.

Somehow it's believed, by President Carter and Newsweek, among others, that the Labor Department's Occupational Safety and Health Administration (OSHA) excised with a single blow some 1,100 regulations—unnecessary, nit-picking rules that irritated industry and did not protect the health and safety of workers.

No such luck. Not a single OSHA regulation has been repealed.

The fictional excision got a push on its way to becoming a "fact" when President Carter, speaking in Beaumont, Texas, on June 24, launched into the cut-down-on-government-regulation part of his standard inflation-fighting spiel. "We have got too much government regulation," he said. "It has got to be cut down." The White House transcript records that the crowd applauded.

"We are beginning to eliminate the worst nit-picking regulations in agencies like . . . OSHA," Carter continued. "In one day last year, 1,100 different regulations were wiped off the books. And the ones that we do have are being written in clear English so a peanut farmer can understand them." More applause.

Arguably, the OSHA excisions took on the character of a half-truth when Carter thus cited them. And if that's so, then the other half was added, and the excisions became a Washington "fact," when Newsweek reported in June that OSHA, "perhaps the most reviled of all watchdogs, has repealed 1,100 of its more than 10,000 rules."

But the fact about the "fact" is that it is not a fact.

What OSHA now calls its "standards deletion project" was launched with much fanfare on Dec. 5, 1977. Labor Secretary Ray Marshall held a press conference to announce the plan to cancel 1,100 regulations, citing such well-known absurdities as OSHA's standard requiring open-front toilet seats and another specifying how many inches above the floor fire extinguishers had to be hung.

"This project has taught me an important and sobering lesson," Marshall said then. "In working with [OSHA administrator] Eula Bingham and her staff on removing these 1,100 nit-picking provisions, I discovered that the system makes it much easier for the government to promulgate new regulations than to get rid of outmoded or ineffective ones." Little knowing how true that last statement was, Marshall continued: "Things are not impossible, however. Our efforts today indicate that with enough determination and creativity it is possible to beat the system."

But to date, the score is: The System, 1,100: Marshall, 0.

OSHA spokesmen explain that the process used to delete a rule is the same as that used to promulgate a rule. Proposals must be published in the Federal Register, and time allowed for public comment. Then, if a hearing is demanded, it usually must be held.

The rules OSHA targeted for delegation were in five categories: those that were obsolete, were meant only to promote comfort and convenience (as with the toilet seats), were designed to protect personal property, agency, or duplicated existing industry standards.

OSHA was surprised to find that many of the regulations had public constituencies. "A lot of people seem to have a stake in them," said a spokesman. "The unions want to make sure their members won't have to give up something they like."

So comments have been flowing in, and some requests for hearings have been filed, though OSHA is resisting holding any.

Christopher B. Graybill, an OSHA spokesman, said that the people working on the standards deletion project "aren't giving a target date" on when the first standard might bite the dust or when the whole project might be completed. "We couldn't even give you a guess for the record; it wouldn't be accurate enough," he said. "But our new director of safety standards has the project near the top of his priority list."

So the Washington "fact" is not a fact at all, and the 1,100 standards remain on the books.

There is one last fact, heartening to businesses, to end the story. OSHA says it has directed its inspectors not to vigorously enforce most of the standards targeted for excision. Verbal warnings will be delivered, but no written notices and no penalties will follow. Perhaps that returns the Washington "fact" to the status of a half-truth.—Timothy B. Clark.

OSHA Backpedals on Its Plan To Banish "Nitpicking" Rules

(By Loretta Tofani)

The Occupational Safety and Health Administration has found it's easier to ignore regulations than get rid of them, and even President Carter is confused.

Last December, OSHA announced an ambitious plan to take 1,100 "nitpicking and obsolete" regulations off the books, such as one specifying how high off the floor fire extinguishers had to be hung.

During a political swing in Texas in June, Carter, attacking excessive federal regulation, pointed to the OSHA action with pride. "In one day last year, 1,100 different regulations were wiped off the books," he told a crowd in Beaumont.

But National Journal, the weekly on politics and government, reports in its latest issue that the regulations are still on the books.

"Some unions told us these regulations were important protections," a safety spokesman said. "They felt their situations in factories might be worse without them."

A safety spokesman said the organization still intends to get rid of the regulations, but probably not all 1,100 originally intended for excision. He would not say when the regulations would be deleted, only that the project is a "top priority."

He said officials must examine comments from labor unions and industry before deciding which regulations can go. In the meantime, inspectors will not enforce most of the 1,100 regulations. "The employer won't be cited," the spokesman said. "He won't be fined or get a written notice. It'll just be pointed out to him that he violated the standard."

The rules that were to be banished were obsolete, designed to protect personal property, duplicated the regulations of other federal agencies, or were meant only to promote comfort and convenience.

Labor Secretary Ray Marshall announced the agency's intention to take the regulations off the books at a December press conference.

"In working with [OSHA administrator] Eula Bingham and her staff on removing these 1,100 nitpicking provisions," Marshall had said, "I discovered that the system makes it much easier for the government to promulgate new regulations than to get rid of outmoded or ineffective ones. Things are not impossible, however. Our efforts today indicate that with enough determination and creativity it is possible to beat the system."

## SCHOOL MEMORIAL DEDICATED TO THE LATE ADM. HOWARD YEAGER

### HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. McCLORY. Mr. Speaker, this Sunday, September 17, I shall participate in a memorial service to a man I called a friend, the late Rear Adm. Howard A. "Red" Yeager. Admiral Yeager was commandant of the 9th Naval District at Great Lakes, Ill., in my 13th Congressional District.

He was much honored. His courage, his intelligence, his diplomatic skills, his decency brought him recognition from not only his own country, but from others. He loved the Navy. He was incredibly proud of serving his country as a part of the U.S. Navy.

But "Red" Yeager was not a one-dimensional man. He cared about the world in which he lived and part of that caring was his outreach to others. During his service at Great Lakes, he was actively involved in youth work in North Chicago, the community of which Great Lakes is a part.

So valued were his contributions and so well remembered his enthusiasms that after his tragic death in 1967 in a fire at the commandant's home at Great Lakes, North Chicago named a school for him.

Mr. Speaker, this Sunday there will be a memorial dedicated to Admiral Yeager at the North Chicago Yeager School. Adm. Thomas W. McNamara, present commandant of the 9th Naval District, will present the ship's bell from the U.S.S. *Cannon*, once under Admiral Yeager's command.

The Sea Cadets Honor Guard, sponsored by the Navy League of the United States, will present a Navy flag, and I am privileged to present an American flag that has flown over the U.S. Capitol.

Mr. Speaker, many public servants will be on hand Sunday, including my good friend, North Chicago Mayor Leo Kukla. But, perhaps even more important will be those other guests—many of the nearly 300 students at the Howard Yeager School and their parents.

I think I knew "Red" Yeager well enough to say that these are the ones he would care most about.

I have said little of Admiral Yeager's Navy career. Records speak eloquently of them. He was a great naval hero. A man of courage and dedication to the Navy and to our Nation. What I have tried to portray here is the spirit of a man who cared enough to give of himself.

And the two major speakers Sunday may tell us more about that. His son, Navy Comdr. Howard B. Yeager, and Navy Capt. Donald R. Yeager, his brother, will be the honored guests.

Mr. Speaker, to all those who helped arrange Sunday's ceremony—among them Michael Penich, Jr., Yeager School principal; Mrs. Patricia Stewart, Parent Teacher Organization president; Dr. Charles Thomas, school superintendent; and Mrs. Marjorie Hart, school board president—my thanks and the thanks of all of us who called Howard Yeager friend.●

## SMALL BUSINESS AND SCIENTIFIC AND TECHNOLOGICAL INNOVATION

### HON. JOHN B. BRECKINRIDGE

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. BRECKINRIDGE. Mr. Speaker, today's material concludes a series of memorandum and reports on the im-

portance of small business to the scientific and technological process, and the frustration of its efforts by governmental agencies. Included are recommendations and executive summary of the OMB Rabinow report:

SUMMARY OF REPORT OF WILLIAM K. SCHEIRER

IMPORTANCE OF SMALL R. & D. FIRMS

Many analysts believe that small firms have a better record for innovation than large firms. Richard Morse recently wrote that "a disproportionate number of innovative ideas emanate from our smaller technically based companies."* The reasons for this phenomenon are varied. Some believe that managers of small R&D firms have a greater incentive to innovate while conversely, in some cases, the marketing plans of large firms dictate that technical improvements to their products be held to a minimum. There also is a possibility that researchers in large firms tend to overspecialize to a greater extent than researchers in small firms. Mr. Rabinow has observed that, "when one narrows his specialization, he probably comes up with fewer ideas. If one loads the dice in favor of a certain art, one cuts off analogous arts, which I think are important. The more an inventor can pull out of related and unrelated arts, the more original his ideas are likely to be."

Empirical evidence indicates that in a comparison of firms with less than 1,000 employees and those with over 1,000 employees:

Firms with less than 1,000 employees accounted for almost one-half of major U.S. innovations during 1953–73.

The ratio of innovations to sales is about one-third greater in firms with less than 1,000 employees.

Firms of less than 1,000 employees have a ratio of innovations to R&D employment which is approximately four times greater.

The cost per R&D scientist or engineer is almost twice as great in firms of over 1,000 employees.

FEDERAL GOVERNMENT UTILIZATION OF SMALL FIRM CAPABILITIES

A striking disparity appears to exist between the capabilities of small technology based firms and their utilization by Federal agencies. Data collected by the National Science Foundation and supplemented by the Office of Federal Procurement Policy shows that only eight percent of Federal R&D contract awards to industry and only about three and one-half percent of obligations to all R&D performers ** were made to small firms in FY 1975; that Government R&D obligations to industrial firms vary from less than one-half of one percent for the Department of Agriculture to 62 percent for the Department of Defense; and that reliance on industry for Federal R&D has declined from 59.6% in 1966 to 50.7% in 1976 in current dollars.

The overwhelming percentage of the dollars in Federal R&D goes to development as opposed to research (basic and applied). Although the industry share of development is substantial, most of this goes to large businesses capable of performing very large development contracts. On the other hand, in the research area where its capability is high, small firms lose awards to colleges and universities, federally funded research and development centers (FFRDCs), as well as to large firms.

Summary conclusions reached are that (i) Federal agencies tend to use sources other than industrial firms for basic and applied research; (ii) a significant portion (64%) of Government R&D is for development normally involving large industrial firms; and (iii) the percentages of both total expenditures for R&D and R&D contract awards to small firms are very low.

SMALL FIRM IMPEDIMENTS

As indicated above, large firms are favored in the award of development contracts on the basis that they are essential for the production phase of the program. However, this is not the only restriction to a greater use of small firms. Mr. Scheirer found that policies and procedures followed by Federal buying activities also restrict the use of small technology based firms. Following are some of the more significant impediments encountered by small companies:

It is difficult to identify and respond to Government R&D requirements. On a competitive basis, large firms have a greater capability to determine what the Government is interested in researching and to unravel the complexities of "Requests for Proposals" for R&D work.

Preparation of proposals is expensive and time-consuming to a point frequently exceeding the capabilities of small firms.

A bias in favor of large firms can exist when awarding R&D contracts. The tendency is to consider awards to large well-established firms "safer" than to small firms.

Funding for Federal R&D work frequently lacks stability. This condition strains the financial capabilities of small firms.

Submittal of unsolicited proposals is frequently discouraged.

Burdensome administrative requirements for contract solicitation, evaluation, award, and performance impair the ability and desire of small firms to compete for R&D contracts.

CONCLUSIONS

Though the responsibility for retention of a high technology capability in the United States is shared by both the private and public sectors, the large annual Federal expenditures for R&D places a unique responsibility on Federal agencies. New techniques must be devised to encourage innovation by all sources, with particular emphasis on small R&D firms. In the placement of R&D work, Government managers should carefully consider the ultimate beneficial effect of using small firms and not give undue consideration the immediate security that may appear to exist by awarding R&D contracts to large firms.

RECOMMENDATIONS OF AD HOC INTERAGENCY PANEL

The interagency panel chaired by Mr. Rabinow developed the following recommendations based on its analysis of this problem:

1. Federal agencies should develop formal programs which encourage the increase of Federal R&D awards to small technology based firms.

2. Large research and technology programs should be divided where feasible into discrete parts to permit solicitation of proposals and award of contracts to small technology based firms in lieu of making a limited number of awards with consolidated requirements that only large firms can accomplish.

3. Subcontracting to small firms should be encouraged in contract solicitations, source selection criteria, and negotiations for R&D work. A prime contractor's record in subcontracting to small technology based firms should be a factor in fee awarded in award fee and incentive type contracts.

4. Intensive efforts should be made by Federal agencies to reduce or compensate for impediments experienced by small technology based firms. These efforts may include but not be limited to the following:

(a) Early identification and publication of agency R&D requirements.

(b) Coordination of R&D requirements with Small Business representatives early in the acquisition process.

(c) Use of the *Commerce Business Daily* to provide advance information on anticipated contractual requirements for R&D.

(d) Providing methods for small technology based firms to obtain an understanding of requirements which may not be possible through the written solicitation. For example, some buying activities currently provide research and technology libraries, catalogs for technical requirements, and special briefings to explain their research and technology needs.

(e) Providing sufficient time for firms to prepare and submit proposals.

(f) Reducing to the extent feasible the time and supplemental data required between receipt of proposals and award of contracts.

(g) Providing agency R&D points of contact for small firms.

5. Agency policies and procedures should encourage unsolicitated proposals. Contracts should be awarded for research and technology efforts based upon the merit of such proposals without converting the requirements to competitive solicitations.

6. The agencies, including the Small Business Administration, should use more technically trained personnel to serve as advocates for and advisors to small technology based firms. Special emphasis should be given by such persons to the advance procurement planning process for R&D requirements.

7. Profit-making firms should not be excluded from making proposals or receiving awards on R&D work that is not assigned to in-house laboratories.

8. Agencies should consider allowing greater amounts of independent research and development and bid and proposal costs than currently authorized when negotiating contracts with small technology based firms.

9. Methods should be developed for collecting and reporting data on small business share of R&D contract awards.

10. Establish small business set-asides similar to those for supplies.

EXECUTIVE SUMMARY

*Findings*

1. Small firms have compiled a striking record of innovation in the private sector:

Firms with less than 1,000 employees accounted for almost ½ of major U.S. innovations during 1953–73.

The ratio of innovations to sales is about ½ greater in firms with less than 1,000 employees than in firms of over 1,000 employees.

Firms of less than 1,000 employees have a ratio of innovations to R&D employment which is approximately four times greater compared to firms with more than 1,000 employees.

The cost per R&D scientist or engineer is almost twice as great in firms of over 1,000 employees than in firms with less than 1,000 employees.

2. Small firms receive 8% of Federal R&D awards to industry and about 3½% of obligations to all performers, including in-house performers of R&D. The share of companies with less than 1,000 employees in total company R&D funds, including subcontracts, is ⅓ greater than their share of Federal R&D funds.

3. Small firms face impediments in the Federal R&D procurement process, not found in the private sector, in the following areas:

Stability and efficiency of R&D funding.

Administrative requirements.

Nature and timing of RFPs.

Treatment of proposals.

Contact with technical personnel.●

## A NEW ROUND OF BARGAINING

### HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. MICHEL. Mr. Speaker, the Washington Post, September 10, 1978, carried an article which reminds us that we are entering a crucial period in the fight against inflation. Only 3 months are left before next year's major new round of union contract bargaining begins. The lines are clearly drawn: If this new round of bargaining produces a major rise in the rate of inflation, we may well not be able to save the American economy. It is as simple—and as dangerous—as that. Accompanying the article is a chart showing the dates of the major contracts to be negotiated. That chart should be labeled "storm warnings."

As the article points out, there is a growing sentiment for imposed wage and price controls. If the polls are reflecting public sentiment accurately it should come as no surprise. When presented with the simple question: "Do you favor wage and price controls to stop inflation?" many people will answer in the affirmative. But the question, asked that way, is only half the story. Wage and price controls lead inevitably to shortages, to "exceptions" to the controls, to loss of incentive, and to a drop in productivity. Is this the price we must pay to stop inflation? I hope not. But surely we are headed in that direction if the administration does not do something quickly.

I had hoped that the administration would take the lead by cutting Government spending, the prime cause of inflation. But the administration has failed. I now hope that responsible union leaders will modify their wage demands in line with the Government's efforts. But they say that they do not want to make sacrifices unless everyone else does. So we are back where we started.

Someone, somewhere, has to start the fight against inflation. I do not believe it is possible for that fight to truly begin unless the President announces a plan to cut Government spending dramatically over the next 2 years. He must do so before, not after, the new round of bargaining starts.

Union members should remember that the wage increases gained in 1 year will be eaten up in the next by inflation. Union members must also remember that of it comes to wage and price controls there will be drastic shortages of necessities and, eventually, damage to the productivity of the American economy.

Is this what union members want? I do not think so. But they have a right to expect the Government to show its seriousness over inflation. I can well understand that no worker wants to ask for less than he believes will be necessary to fight off inflation. But this becomes a vicious cycle in which each preventive wage-hike becomes a cause not a solution of continuing inflation.

What we need is leadership. We need it in the White House, in the board rooms, in the union halls. And we are not getting it. That is the tragedy of our time.

At this point I wish to insert in the RECORD, "Deadline Near for Voluntary Anti-Inflation Plan," including the accompanying chart of major contract expirations, from the September 10, 1978, Washington Post. It is my hope that the chart will be used by every Member as a kind of tracking device for the inflationary trends that will inevitably come unless restraint and patriotism combine to stop this seemingly unending inflation:

DEADLINE NEAR FOR VOLUNTARY ANTI-INFLATION PLAN

(By Frank Swoboda)

Time is running out on the Carter administration's efforts for voluntary control of inflation.

After nearly two years of false starts with a variety of voluntary anti-inflation programs, the White House has only three months left to come up with an effective plan for holding down wage and price increases before the start of next year's major new round of union contract bargaining.

The Carter administration has now reached the same point in the three-year cycle of contract bargaining that the Nixon administration waited for in 1971 before imposing wage and price controls. The current lull between the end of the bargaining round that began in 1976 and the start of next year's new negotiating cycle is the only opportunity the White House has of intervening in contract negotiations during the President's first term without creating explosive wage inequities among the major unions.

The biggest concern of both the White House and most major union leaders is next year's negotiations between the Teamsters and the trucking industry over a new national trucking agreement. The outcome of these negotiations will basically set the wage pattern for the next three years.

"We've already told the administration that our members care a whole lot more about what the Teamsters do (at the bargaining table) than they do about what the government has to say about controlling inflation," says one key union leader involved in next year's bargaining round.

In addition to the 528,000 Teamsters whose contracts expire in the trucking industry March 31, major contracts expire next year in the petroleum, construction, rubber, clothing, electrical manufacturing, meatpacking and auto industries.

The wage "patterns" set in next year's contract negotiations will then serve as the target for all other industries—including basic metals—during the next two years. And this is what clearly worries administration economists.

From almost the first day of the Carter administration two years ago, the major anti-inflation target has been the Teamsters. In his earliest public interviews, Charles L. Schultze, chairman of the President's Council of Economic Advisers, has talked of the need to break the "wage momentum" in the next round of contract bargaining.

Since then, however, the administration has been unable to have any meaningful discussions with organized labor about an effective anti-inflation policy. "We could never even agree on the basic causes of inflation," says an administration official.

In the meantime, the administration has basically sat back and watched while the United Mine Workers, after a long strike, reached agreement on a new contract calling for wage increases of nearly 40 percent over the life of the contract and settlements totaling 35 percent for the major railroad unions.

The AFL–CIO has steadfastly insisted that the administration would first have to demonstrate its willingness to deal with rising prices before it would consider cooperating with the government on a wage control policy. Noting the fast rise in prices earlier this year, the labor federation warned in its policy statement on the economy last Spring that: "Price increases . . . are the principal economic fact of life which govern the wage levels unions must seek."

The policy resolution went on to note that "we candidly told the President and his economic advisers that the administration's success in encouraging American business and the banking community to hold the line on prices and interest rates will be naturally reflected in collective bargaining settlements."

The Teamsters, the nation's largest independent union, has also warned that it will be watching the administration's efforts to control prices as a measure of its demands at the bargaining table. But the Teamsters present the administration with another major problem that is bound to have a spill-over effect on the upcoming negotiations.

For the past two years, the Labor Department has been trying to clean up the union's scandal-ridden pension funds. The clean up effort has resulted in a variety of legal actions and could eventually produce indictments against some union leaders involved in the pension fund. That investigation has resulted in an almost total breakdown in the relationship between the government and the Teamsters.

As a result of the government's pension investigations, the union has had little to do with Labor Secretary Ray Marshall and the White House has publicly shunned Teamster President Frank E. Fitzsimmons. The consequence has been an almost total absence of any coherent labor relations policy toward the upcoming trucking negotiations, according to administration officials.

"How the hell are you going to get a settlement with the Teamsters when Fitz wants an invitation to the White House and Marshall wants to send him to jail," says a veteran government labor relations expert.

Adding to the White House problems are the deteriorating relationship between the administration and organized labor in general over the President's failure, in the eyes of many union leaders, to deliver on his campaign promises for social legislative changes as well as labor's own special interest goals.

That deterioration has already forced the administration to abandon earlier hopes of creating an anti-inflation program patterned after the Korean War controls experience. Under such a program, the White House hoped to set up a series of tri-partite committees in major industries that would be used to help labor and management work out their problems with the government in exchange for wage and price moderation.

The White House was also counting on the help of the United Auto Workers union and its president, Douglas Fraser, in the push for wage moderation. But Fraser has since become disenchanted with the administration for its failure to push for the social programs outlined in the Democratic Party platform and is in no mood to help.

With the industry committee avenue now closed, the administration is talking about a program of wage and price guidelines patterned after the program used by the Kennedy and Johnson administrations in the 1960s. For wages the administration is considering a guideline tied to the rise in the cost of living.

So far, however, labor is having no part of the guidelines. After a briefing by administration economists this week, union leaders

remained privately adamant in their opposition to any attempt at setting a national wage standard.

And a negotiator for a major corporation coming up for contract renewal next year warned: "The administration is crazy if it thinks any company will even consider offering increases less than the cost of living plus something for productivity."

Without commenting on this week's meeting at the White House, a top union economist repeated the warning that the administration would have to do something about recently rising prices before it could expect any help from labor. "Most of the price increases this year have little relationship to wages," he said, citing the sharp rise in interest rates and the cost of food and energy.

Another key union official called the latest anti-inflation proposals the act of "desperate men." He said his union has already told the White House it would be willing to make wage sacrifices only if there was evidence that other areas of the economy were also being forced to make sacrifices.

The administration has scheduled a series of meetings with key labor leaders in the next few weeks in an effort to convince the union officials of the need for cooperation to curb inflation. So far, however, the outlook for cooperation is bleak.

That bleakness was reflected by the administration in its meetings last week with labor. After making a plea for cooperation on a voluntary basis, one top White House adviser warned labor that unless the unions cooperated the administration might have to seek a "political solution." He then, according to others at the meeting, noted that recent public opinion polls showed a growing support for wage and price controls as a way to deal with inflation.

SUMMARY OF MAJOR CONTRACT EXPIRATIONS, CALENDAR YEAR 1979

| Industry | Companies | Unions | Workers covered | Expiration date |
|---|---|---|---|---|
| Petroleum refining. | Texaco, Standard Oil Co. (Amoco), Atlantic Richfield, Shell, Mobil, Exxon, and others. | Oil, Chemical and Atomic Workers (OCAW), and others. | 43,200 | Jan. 7. |
| Construction | General Contractors American (light and heavy construction) (multistate) (106 agreements). | Various construction unions. | 208,250 | Feb.–Dec. |
| Trucking | Over-the-Road and Local Cartage. | Teamsters | 528,150 | Mar. 31. |
| Rubber | Goodyear, Firestone, Uniroyal, Goodrich. | Rubber Workers | 82,650 | Apr. 19. |
| Clothing | Affiliated Dress Manufacturers, Greater Blouse, Skirt & Undergarment Association, National Skirt and Sportswear, and others. | Garment Workers. | 182,700 | May 30–31. |
| Electrical products. | General Electric, Westinghouse. | Electrical Workers (IUE, UE). | 153,300 | June 30–July 15. |
| Meatpacking | Armour, Swift, Wilson, Rath, Oscar Mayer, John Morrell, Dubuque. | Meatcutters | 31,750 | Aug. 31. |
| Automobile | General Motors, Ford, Chrysler. | Auto Workers | 661,400 | Sept. 14. |
| Farm implements. | International Harvester, Deere, Caterpillar, Allis Chalmers. | Auto Workers | 94,400 | Sept. 30. |

## AMERICANS STILL WORRY ABOUT JOBS

### HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. HAWKINS. Mr. Speaker, the Labor Department recently released the results of an important survey of the public's attitude toward unemployment and related issues—unemployment, Government, and the American people. As we move toward final House consideration of legislation to reform the CETA system, H.R. 12452, I appreciate the opportunity to share with the Members some of the findings of this survey. This study was conducted for the Department of Labor by the Roper organization and the data was analyzed by Public Research Inc.

The American public expresses serious concern with the Nation's economic situation, particularly inflation and taxes, and diminished confidence about the economic future. The public has a strong and continuing concern about the problem of unemployment and is aware of the serious adverse social and economic consequences of the continued high level of joblessness. Simultaneously, there is significant support for an active role by the Federal Government to provide jobs and thus reduce the welfare burden and provide needed community services, as the CETA program does.

Despite recent statistics that claim improvement in the official unemployment rate, in general, the public feels that Government unemployment statistics understate the actual level of unemployment and that the situation actually has worsened. Among the reasons selected for causing unemployment, was the lack of job skills.

Overall, the public supports the concept of the Federal Government taking the lead in providing jobs and training to the unemployed. The American public firmly holds the belief that people should be able to work if they want to and a clear plurality of 47 percent feels that it is the responsibility of Government to provide a job for everyone who wants to work. This result is significant when one considers that four other alternatives were presented: Creating jobs through business expansion; encouraging job creation through a personal income tax cut; providing tax breaks for corporations who hire the hard-to-employ; or letting things take their course. Of the five alternatives nearly half of those surveyed support a strong Federal role.

When asked about their concerns about the Nation's economic situation, those polled mentioned inflation most often but reducing unemployment is seen as a more important need than peace, lower taxes, and reducing crime. Importantly, concern with reducing unemployment is shared by one-third to one-half of all Americans and not just those who are currently seeking work.

Some specifics:

Sixty-four percent of those surveyed agree that it is the government's responsibility to help the unemployed by providing jobs that pay people enough to "make ends meet".

Fifty-four percent say the government should provide job training for the unemployed.

Only 20 percent of the public feels that the government should *not* provide jobs for the unemployed.

Sixty-six percent of the public feels that public service jobs are doing something useful.

I recommend further reading of the study to Members desiring further information.●

## PLACING THE COMPROMISE NATURAL GAS BILL IN PERSPECTIVE

### HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. VENTO. Mr. Speaker, I am submitting for the RECORD an article which appeared in the September 1, 1978, St. Paul (Minn.) Dispatch titled "The Natural Gas 'Ripoff'." I think it illustrates the problem the President's energy program and the compromise natural gas bill face today. More importantly, it points out the best alternative from the public's perspective. I commend this article to my colleagues' attention.

THE NATURAL GAS "RIPOFF"

About all that is left of President Carter's energy program is the compromise natural gas bill devised by a conference committee. That, too, may fall by the wayside, but if it does the nation won't lose a thing. The only damage would be to Mr. Carter's ego.

The nation already has a natural gas policy that provides better protection for the consumer while stimulating the production of natural gas. It is working so well, in fact, that more gas was added to the nations reserves last year than in any year in the last decade.

Sen. James Abourezk, D-S.D., says, "The Administration has turned to massive misrepresentation and heavy political coercion to portray a simple, public ripoff as a necessary 'energy policy.'" He points out that judicious enforcement of the existing Natural Gas Act by the Federal Energy Regulatory

Commission can accomplish more than the bill being pushed by the White House.

The current policy is to allow cost-based drilling. This has resulted in a gradual increase in prices, but the current regulated price of $1.45 is far below what is envisioned under the bill now before Congress. What's more, producers have stated a willingness to sell at that price, unless, of course, Congress provides them with a windfall by passing the bill.

Current law also provides that all newly discovered offshore gas must go to interstate users at regulated prices. Most future gas discoveries are expected to be offshore. And if higher prices are needed to spur production, the commission has the authority to raise them to the point where new gas supplies can be marketed profitably.

This puts a lot of pressure on the commission, but the bill in Congress would put a lot of pressure on the consumer. So far, the FERC has been functioning quite successfully and it can be expected to continue to do so unless Congress buries it.

The natural gas bill has little to recommend it. It would do nothing to reduce the nation's energy consumption; it merely would raise gas prices to the point where users would be encouraged to switch to imported oil, thus further exacerbating our balance of payments problem.

We have said before that the President's proposed energy program has been reduced to such shambles by Congress that it would be better to pass nothing at all this year and start over in 1979. There is nothing in the natural gas compromise to cause us to change that opinion.●

## TRIBUTE TO VOLUNTEER FIREFIGHTERS

### HON. MARC L. MARKS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. MARKS. Mr. Speaker, there have been historic happenings in the firefighting field in the 24th District of Pennsylvania that have recently been brought to my attention. I should like to share the information with my colleagues.

First, it has been well established that the Meadville fire police organization is perhaps the original and pioneer group of its type in the United States. Because of its early inception and continuing success, it has become a model for others to follow. Records show that it was in 1842 that the first appointment was made to the fire police, and it has been in continuous service to the community ever since.

Just recently, one of its members, Trace Braymer, who is 98 years young was honored as not only the oldest active fire policeman, but also as the oldest active fireman in the State of Pennsylvania. Trace is first on the list of volunteers and most recently, I met him in his uniform, handling his usual traffic-directing chores at a Crawford County event.

It has also been noted in a recent editorial in the Titusville Herald, that it was in the Crawford County community of Pleasantville that the first crew of forest firefighters in Pennsylvania was organized.

I point out these facts, because I think it important that persons like Trace Braymer and the many, many others who are volunteers in the fire police and in firefighting in general receive the recognition that is due them. They perform a vital function in their desire to help others, and I congratulate them.●

## THE VOTE TO SUSTAIN PRESIDENT CARTER'S DEFENSE AUTHORIZATION VETO

### HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. HUBBARD. Mr. Speaker, one of the most important votes of the current session of Congress occurred last Thursday, September 7, when the House of Representatives voted by a margin of 191 to 296 to sustain President Carter's veto of the 1979 defense authorization bill, which included a $2 billion nuclear carrier. This was a most difficult and complicated issue. I would like to share with my colleagues an editorial printed in the September 7 issue of the Courier-Journal of Louisville, which was perhaps a decisive influence in my decision to vote to sustain the President's veto. The editor and publisher of this highly respected Kentucky newspaper is Mr. Barry Bingham, Jr., and its opinion page editor is Robert T. Barnard. The editorial, written by Associate Editor John Hart, is as follows:

[From the Courier-Journal, Sept. 7, 1978]

CARTER VETO SHOULD BE SUSTAINED; ANOTHER CARRIER ISN'T NEEDED

(By John Hart)

Congressional critics, who have been divebombing President Carter for his veto of a defense spending bill that included $2 billion for a nuclear-powered carrier, have scored several hits. Still, it appears that the veto will be sustained when the House takes up the issue today.

The veto should be sustained. Mr. Carter admittedly has made himself vulnerable by exaggerating the adverse short-term impact of the nuclear carrier on other defense programs and by proposing that a conventionally powered carrier be built instead. But the case for another big-deck carrier, whatever its power plant, is much less compelling than the need for improved U.S. ground and air forces in Europe, for a larger number of less expensive ships for the Navy, and for accelerated weapons research and development.

Each of these needs would be slighted, to some extent, to pay for another big carrier, plus its planes and escort vessels. But just how much other programs would be affected by the carrier is still being debated.

Critics argue that the $37 billion procurement bill Mr. Carter vetoed doesn't differ substantially from spending the administration proposed. They observe, for instance, that half the money to be spent on the carrier would be made available by delaying purchase of a Trident missile-launching submarine, a delay the administration accepted because the Trident program already is far behind schedule.

But this misses an important point. The nation needs missile-launching submarines and will continue to buy them, whatever the current troubles with the Trident. The nation doesn't, in an age of precise and relatively inexpensive anti-ship missiles, need another carrier that can be disabled or destroyed by a salvo of such weapons.

This point is far more important than the charge by Mr. Carter's critics that he vetoed the procurement bill merely to appear tough and decisive. Perhaps the President's action was intended partly to improve his tarnished political image. What counts, however, is that the veto, if sustained, will free $2 billion that can be better spent on other defense needs.

Whether, in fact, the money will be spent more wisely remains to be seen. Even if the veto is sustained, Congress and Mr. Carter seem likely to continue butting heads over defense priorities. It's interesting, for instance, that one of Mr. Carter's allies on the carrier question is Barry Goldwater, perhaps the Senate's staunchest hawk. He agrees that another nuclear carrier isn't needed. But he'd prefer to see the money spent on the B-1 bomber, a project Mr. Carter halted last year.

Disagreements between Capitol Hill and the White House are inevitable, partly because Congress has gained considerable expertise on defense and some lawmakers are convinced their judgment is superior to that of the administration—of any administration. Then there always are the pork-barrel pressures that can be brought to bear by key lawmakers whose states or districts would benefit economically from Pentagon contracts.

These conflicts and pressures are part of the policy-making game any president has to play. Compromises sometimes are necessary, even when they distort the defense budget and are downright wasteful. But there comes a time when the stakes are simply too high and confrontation unavoidable.

This is such a time. Congress has committed the nation to a course that is appallingly expensive (the proposed carrier, including its planes and electronic protective gear, would cost more than $5 billion) but would contribute little to national security. Mr. Carter had no choice but to veto it.

Though there are sure to be hard feelings all round, Congress should sustain the veto. And next year, when the carrier issue again steams into view, Mr. Carter should avoid the mistake of offering to build an oil-burning carrier as a compromise.●

## TRIBUTE TO MR. AND MRS. WILLIAM KAHN

### HON. ROBERT A. YOUNG

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. YOUNG of Missouri. Mr. Speaker, tomorrow, September 13, has been proclaimed "William Kahn Day" by the city and county of St. Louis. William and Shirlee Kahn will be leaving the St. Louis area after 20 years of service. I would like to take this opportunity to recognize the great contributions they have made to the St. Louis community.

As executive vice president of the Jewish Community Centers Association, Mr. Kahn has played a leading role in the construction of major cultural and recreational facilities. His activities for the center have included creating day care facilities, providing housing for

senior adults, and establishing family life education programs. The physical plant and programing of the center has been used as a model by other communities throughout the country and around the world.

Mr. Kahn's wife Shirlee has worked as a psychiatric social worker for the county mental health facility. In this capacity, she too has made a significant contribution to the general welfare of the community.

The Kahns have shown that they are devoted to the enrichment of the quality of life, without discrimination toward any person for any reason. I commend them for their contributions to the St. Louis area, and I wish them the best of luck and continued success in their new home.●

## BASIC RESEARCH—AN ESSENTIAL FOR THE LONG TERM

### HON. EDWARD W. PATTISON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. PATTISON of New York. Mr. Speaker, we are frequently reminded by a variety of sources that basic research can often be difficult to explain to our constituents. It is difficult because many research projects seem, at first glance, to be ridiculous. Often there appears to be no connection between a specific subject of inquiry and any useful result.

The fact is that most scientific and technological advances begin with some inquiry in an obscure area of knowledge. Frequently, the scientist doing the research hasn't the vaguest idea at the outset what the ultimate ramifications of his research will be.

George Low, the former director of the NASA Space program, is now the President of Rensselaer Polytechnic Institute in Troy, N.Y., one of the foremost technological universities in the world. He has provided me with a copy of a paper written by him which explores the function of basic research and especially its relationship to productivity.

Mr. Low indicates that a decrease in our research and development (R. & D.) spending is followed, in about 5 years, by a decline in the domestic productivity growth rate. For example, an 11.3 percent increase in annual R. & D. spending from 1953 to 1961 was followed by a 3 percent productivity growth rate from 1958 to 1966, while a 3.7 percent increase in R. & D. spending from 1962 to 1970 was reflected in a 1967 to 1975 productivity growth rate of only 1.3 percent.

The paper is brief and well written. I commend its reading to my colleagues.

The article follows:

THE IMPERATIVE OF BASIC RESEARCH

(by George M. Low)

The United States is in a period of economic and industrial decline, both in an absolute sense, and relative to other industrial nations. Although it is difficult to pinpoint and to obtain complete agreement on all of the causes for this decline, it is a generally accepted fact that the slowdown in U.S. innovation and the resultant slowdown in the rate of productivity increase is a major factor—perhaps even the most important factor.

For nearly a century, from 1873 to 1971, we were a net exporting nation. Now, in the 1970's, we are incurring huge trade deficits. We are inclined to blame these on oil imports, and of course we are in dire need of an energy policy to do something about those. But we are also losing ground in our traditional area of strength—in our exports (and in concurrent foreign imports) of high technology manufactured goods—this in spite of a substantial devaluation of the dollar since 1971. Is this not proof enough of the effects of the lag in innovation?

When I speak of innovation, I mean the entire spectrum of a process which begins with scientific discovery, includes experimental or exploratory applications, and ends with commercialization to meet the needs of the marketplace. Each step in this process depends on research and development.

A few years ago, while I was with the National Aeronautics and Space Administration (NASA), I studied the realtionship between the rate of spending on research and development, and the rate of growth in productivity. The results showed a direct correlation between the two, with the decline in productivity lagging the decrease in R&D spending rate by about five years. There is no doubt that there exists a direct tie between innovation and productivity, and, hence, a direct relationship between innovation and economic growth.

The process of innovation is complex, and perhaps the last step—that of commercialization—is the most complex of all because it depends on so many factors, including economic incentives, government rules and regulations, societal pressures, and the combination of all of these as it affects the willingness to take risks and the probability of profit.

In this paper, however, I will address the first step in the innovative process, commonly called basic research, because it is this step which is most influenced by what happens in the university. Today 55 percent of basic research is carried out in universities; the remainder in industry and in national laboratories. Although U.S. basic research expenditures in current dollars have increased since 1960, in constant dollars these expenditures have declined in total since 1968, and just barely held their own in the university sector. Specifically, in constant dollars, university expenditures increased on the average 15.5 percent compounded annually from 1960 to 1968, but have been constant since 1968. The largest portion of the funds for these expenditures comes from the federal government.

Unfortunately, we are in a business where staying constant is not nearly good enough. It takes real growth to promote innovation; it takes an increase in the rate of R&D spending to promote an increase in the rate of productivity.

There are many reasons for this. Basic research is becoming more complex, requiring larger research teams, increasing sophistication in equipment and instrumentation, and special facilities. On top of these fundamental factors there is a plethora of new rules and regulations having to do with environmental standards, occupational health and safety, protection of animal and human test subjects, access for the handicapped, the hiring of minorities and females, privacy programs—mostly highly desirable programs which we support, but which do bring about much added paper work (which we do not support) and significant added costs.

A most serious concern is that there has been a cutback in the funds available for graduate fellowship programs. NASA had a farsighted program along these lines in the 1960's, at the height of its activities, but had to discontinue it at the end of the apollo program. To my knowledge, none of the newer agencies, those now working on the forefront of current problems, has followed suit. Yet if we are to stop the decline in innovation, as I think we must, the most important factor will be an increasing supply of trained scientists and engineers. Instead, we are now taking steps toward creating a shortage.

The education of engineers and scientists is expensive, and tuition charges alone cannot begin to cover all of the costs. We strive to educate young men and women to solve problems and find practical solutions, to make decisions, to be the innovators of the future. This requires a great deal of laboratory instruction. Modern teaching laboratories require up-to-date instrumentation and equipment, highly complex equipment which generally becomes obsolete in five to seven years. A recent study by thirteen independent (private) engineering colleges has shown that the cost of keeping our laboratories up-to-date is $1,350 per bachelor's degree granted. In addition to that expense, RPI is now in the process of installing a new, large computing system—a machine which we believe is essential in our educational process. The cost of this machine, amortized over its seven-year life, is an additional $1,000 per degree granted.

Sponsored research has become an essential ingredient of the educational process at technological universities. It helps attract faculty members, allows them to do scholarly work in the mainstream of current activity, provides research experience and essential financial support for graduate students, and adds an additional degree of realism to the undergraduate curriculum. In short, it is the lifeblood of modern scientific and engineering training.

The level of research funding is therefore doubly important. It directly affects the output of research in terms of scientific discoveries and their practical application. But of far greater importance, it also affects the output of people—scientists and engineers—people we must count on for the innovations of the future. The net result is that the pace at which some of our most pressing problems are addressed—problems having to do with energy and materials, health care and food, housing and transportation, communications and information handling—is much slower than it should be.

As I mentioned before, basic research is only the first step in the process of technological innovation—but a most important step in the process of economic growth, international competition, and in meeting the domestic needs of our society.●

## HUBERT H. HUMPHREY HIGHWAY

### HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. FRENZEL. Mr. Speaker, I am warmed and delighted that the Jewish National Fund, with the extensive help of the Minnesota Council, has chosen to honor our beloved former Senator Hubert H. Humphrey by naming a major highway of the American Bicentennial Park in Israel after him as a joint Israeli-American endeavor.

The fact that this highway will serve as a vital link between important areas in Israel will constantly remind its users what an important role Senator Humphrey played in bringing together many different elements and conflicting inter-

ests of our own country. I know that Hubert would be proud to know that this largest tribute to his memory was launched by all of his friends in Israel and in the Jewish National Fund here in the United States. We all know what a strong supporter he was of the people of Israel. And, we know how hard he worked to insure the survival and the prosperity of the State of Israel.

Hubert loved the Hubert H. Humphrey Forest in Israel, dedicated to the Humphreys in 1961, and visited it often. How wonderful it would have been if he could have traveled the Hubert H. Humphrey Parkway as well.

I am grateful to the Jewish National Fund for this remembrance, which will have international significance. I have been honored to have been a part of the national committee involved with establishing the parkway. I know the dedication ceremony in Jerusalem on January 5, 1979 will be a great success and a tribute to a man whose shoes cannot be filled.●

## MYTHS ABOUT OLDER WORKERS SHOULD BE RETIRED; NOT THE OLDER WORKERS

### HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. HAWKINS. Mr. Speaker, earlier this year the Congress passed and the President signed into law a bill which raises the mandatory retirement age from 65 to 70 years of age as of January 1, 1979. While there has been some concern expressed in the business community about the potential impact of this legislation, a number of companies have had long-established policies allowing employees to select their own retirement ages. Bankers Life and Casualty is one such company which has had a non-mandatory retirement policy for over 30 years. The company recently released a study entitled, "Bankers' Experience With Over-65 Workers" which recaps their long experience with employing workers who are in their 60's, 70's and 80's. Mr. Speaker, I would like to share this study with my colleagues:

BANKERS' EXPERIENCE WITH OVER-65 WORKERS

WHEN IT'S UP TO EMPLOYEES, HOW MANY STAY ON THE JOB?

Bankers Life and Casualty Company has had a non-mandatory retirement policy for over 30 years.

In that time we might have seen a take-over of the company by older employees. We might be burdened with more employees 65 and over doing less work. We might have younger employees leaving because there is no way for them to advance.

None of that has happened!

Instead, 1976 was the first year the percentage of employees 65 and over rose above 3%. In fact, it was 3.6%. By March, 1978, the percentage of employees age 65 and over was slightly less at 3.5%. At 65 more Bankers employees choose continuing to work over retiring. But our company doesn't become top-heavy because we have employees retiring at other ages.

Table I shows what Bankers people do when they reach 65.

In each of the past five years more than 70% of employees reaching 65 chose to stay on the job. In 1975, 95% stayed.

However, some of our employees do choose to retire. But, they also know they can return to work if they want and, of course, if they're qualified. Since Bankers didn't force their retirement, both company and employee have the option to change their minds—and some of our retirees have done just that. They've returned to work for us after a period of retirement.

TABLE I.—NUMBER OF BANKERS LIFE & CASUALTY CO. WORK FORCE REACHING 65 WHO CHOOSE TO RETIRE/WORK

| Year | Total number employed reaching age 65 | Number choosing to— | |
|---|---|---|---|
| | | Retire | Remain at BLC |
| 1977 | 38 | 8 | 30 |
| 1976 | 36 | 6 | 30 |
| 1975 | 43 | 2 | 41 |
| 1974 | 32 | 4 | 28 |
| 1973 | 30 | 8 | 22 |
| 1972 | 23 | 3 | 20 |

WHEN DO BANKERS' EMPLOYEES RETIRE?

Table II shows at what age Bankers employees *voluntarily* left the company.

TABLE II.—BANKERS EMPLOYEES AGE 65 AND OVER

[By age at retirement]

| Year | 64 and under | 65 | 66–70 | 71–75 | 76–80 | 81 and over | Total retired |
|---|---|---|---|---|---|---|---|
| 1977 | 17 | 8 | 18 | 2 | 1 | 1 | 47 |
| 1976 | 22 | 6 | 11 | 0 | 1 | 0 | 40 |
| 1975 | 18 | 2 | 9 | 4 | 2 | 2 | 37 |
| 1974 | 17 | 4 | 16 | 4 | 3 | 0 | 44 |
| 1973 | 20 | 8 | 17 | 2 | 3 | 1 | 51 |
| 1972 | 14 | 3 | 12 | 5 | 0 | 1 | 35 |

Some employees retire before 65 and they tend to balance out those who decide to stay. This table also shows that most people retire by age 75. It supports the opinion of Dr. K. Warner Schair, a gerontologist at the University of Southern California. He says that "if a chronologically meaningful retirement age were to be selected today, it would have to be made at least a decade later than would have made sense 20 years ago." [1]

BANKERS' OVER-65 EMPLOYEES, AGENTS: A MATTER OF CORPORATE RESPONSIBILITY

At the end of March, 1977, 137 employees over 65 were working at Bankers. This represents 3.5% of the company's home office work force of 3,909. And 6.8% of the 3,940 agents active in the field were 65 or older.

The majority of these people have been with us a long time, but Bankers policy also extends to hiring qualified people over 65.

Frances Stapleton, 71, is one of them. She was forcibly retired from another insurance company where she had been secretary to the president for 20 years. In the five years she has been with us, Mrs. Stapleton has received three promotions and is currently secretary to one of our divisional directors.

Arnold Rosenberg, 72, has worked for Bankers 4 years. He applied for a job in the mailroom after seeing an ad in the paper and was both pleased and surprised to be told to report for work.

Dr. Pedro Salazar was a Cuban refugee who had been in the United States 1½ years when he came to Bankers. That was in 1966 and, today, at the age of 77, Dr. Salazar is still with us.

"Bankers was the first place I applied," says Dr. Salazar. "If they had said, 'You're too old,' I don't know what I'd have done."

Many positions lend themselves to the interests, experience and abilities of older people. We believe every business has a responsibility to employ the best workers they can attract, and to match their employees with the jobs that their interests, experience and abilities best suit them for. When color, sex, or age influence this important management task, the result is costly inefficiency that consumers have to pay for.

ABSENTEEISM AND BANKERS' OVER-65 EMPLOYEES

Opponents of non-mandatory retirement often point to absenteeism rates as an important efficiency factor. They suggest that absenteeism among older workers is greater than it is among younger employees.

Time magazine reported that studies done by the National Council on Aging discovered it was not. Edmund W. Fitzpatrick, the council's director of pre-retirement planning, said: ". . . workers over 65 have less absenteeism and suffer fewer accidents than those, say, in the 30-to-40 age group." [2]

"My experience in working with these people," says Jim Gawne, Personnel Director at Bankers, "is that people who continue working are in good health and are absent only when it's absolutely necessary."

TABLE III.—NUMBER OF DAYS ABSENT [1] FOR FIRST 6 MONTHS OF 1977

| Number of days | Number of occurrences | |
|---|---|---|
| | Under 65 | Over 65 |
| 0.5 | 41 | 18 |
| 1.0 | 157 | 185 |
| 1.5 | 7 | 7 |
| 2.0 | 55 | 128 |
| 2.5 | 2 | 3 |
| 3.0 | 6 | 19 |
| 3.5 | 4 | 0 |
| 4.0 | 6 | 7 |
| 4.5 | 1 | 0 |
| 5.0 | 3 | 11 |
| 10.0 | 4 | 3 |
| 15.0 | 4 | 3 |
| 20.0 | 3 | 2 |
| 25.0 | 1 | 0 |
| 30.0 | 0 | 2 |
| 40.0 | 0 | 1 |
| 50.0 | 1 | 2 |
| 60.0 | 0 | 0 |
| 70.0 | 1 | 0 |

[1] Days absent include time off work due to illness, personal business, and leave of absence.

To compare absenteeism rates. Bankers did a study using 128 employees 65 or over and a group of 128 employees under 65.

In some instances, the figures seem to show that the older group is prone to higher absenteeism. However, several interesting facts appeared in our study.

Only 13 people in the under-65 group had perfect attendance, and there were more than twice as many half-day absences in this group as there were in the over-65 group. Thirty-four of the 128 employees 65 and over had perfect attendance. This represents ¼ of that group. Most people were absent two or less days regardless of age. And long term absences over 10 days occurred with the same frequency for both groups.

Bankers hopes these statistics will relieve some of the fears of rampant absenteeism among older employees. If all the occurrences of absenteeism are added together and divided by the number of employees in the sample, the arithmetic mean for the under-65 group is 5.3 days absent per employee as compared to 7.5 days for the over-65 group.

"To some degree," notes Jim Gawne, "the higher overall rate is due to a small number of people 65 and over who are absent longer or more often than most employees. Take those few people out of the sample and I believe the averages would be comparable."

Do agents and employees in the over-65 group believe their absenteeism is high enough to justify an "across-the-board" mandatory retirement age?

Footnotes at end of article.

Douglas Wyka, 69, has been an agent with Bankers for 25 years. "As long as a person has good health I don't see why he can't work," says Wyka. "As far as absenteeism goes, I think older people are more reliable because their work is their life. They don't want to loaf; they want something to do."

"I'm not ill more than two or three days a year," asserts Fran Stapleton, "and time off for personal business is nil."

HEALTH AND THE OVER-65 WORKER

As a group, the health of people in their sixties and seventies is better than most people assume. Declining health is the reason given by most men who leave their jobs prior to 65. But, the majority of men who stop work at 65 claim compulsory retirement as the main reason for leaving the work force. Most say they are free of any health problems affecting ability to work, and only two in five say they would have chosen retirement.[3]

Eighty-six per cent of people 65 and over have one or more chronic ailments. Heading the list are high blood pressure, arthritis, diabetes, heart disease and arteriosclerosis.[4]

On the other hand, many of these illnesses are controllable. Four out of every five people over 65 get along without physical assistance. And when you consider the fact that 72 per cent of those age 45–64 are afflicted with one or more of the chronic ailments listed above, it becomes evident that people don't suddenly deteriorate physically at 65.[5]

MEASURING PRODUCTIVITY AND MATCHING ABILITIES WITH JOBS

Who is to say if a 65-year-old employee is less productive than his younger counterpart? While a younger person may possess physical vitality, what about the expertise and patience an older worker has acquired through experience?

Bankers' policy is to hire full-time employees who meet job specifications. When employment is on that basis, then there are guidelines for determining a person's productivity. Age doesn't enter into it.

But age can be a consideration in matching a person to a job. For example, we wouldn't hire an 80-year-old accountant to lift heavy cartons on a loading dock. And we wouldn't make a recent high school graduate a vice president, either.

Much of the work done at Bankers is of an administrative nature. Tests have shown that physical abilities do decline with age, but mental abilities are not necessarily affected.

OVER-65: THE PRODUCTIVE YEARS?

An interesting phenomenon has been observed among those who remain healthy and able to work in their fields. Their important contributions are often made at ages that many of us are too ready to characterize as the "twilight" or "declining" years of life.

Goethe was over 80 when he completed Faust. Schweitzer received the Nobel Peace Prize at 68. Clara Barton founded the American Red Cross when she was 60 and served as its president for the next 23 years.

At Bankers we have older people making significant contributions. They may not be as dramatic as the contributions of Goethe, Schweitzer and Barton, but they're important contributions to Bankers Life and Casualty Company.

Ed Getting, 66, came to work for us 19 years ago. Today he is Vice-President in Charge of Accounting and Purchasing.

"I'm opposed to mandatory retirement," Getting told us. "I don't think that just because a person reaches a certain age he loses the ability to do something for the company for which he works. It depends entirely on the individual and not on a certain age.

"I continue working because I find my work interesting. Every day there are new challenges and I like that," he says.

Molly Greenberg, 71, echoes that sentiment: "For me it's wonderful to work. I get up in the morning and feel great that I'm important to something. I come here and some days they say to me 'I'm going to teach you something new today.' Imagine! At this stage of my life I'm being taught something new. It's a challenge."

"Mandatory retirement isn't good," asserts Ben Rubenzik, 82. I worked 51 years at a bank and was forced to retire. I couldn't get a position any place until Bankers put me on the payroll. I've been here 10 years and still have no plans to retire."

THE OLDER WORKER: PERFORMANCE AND EVALUATION

The older employee is very conscious of performance. He or she wants to measure up and our workers express their feelings about what they'll do when they can't.

"When the day comes that people expect less of me, I'll say 'God-bye' and walk out the door," commented Len Chrosniak, 65.

"It's hard to tell an older person when they're not doing their job," agreed Fran Stapleton. "But then it's hard to tell anyone that. As for me, I'll know when it's time."

At Bankers the decision of when to retire is not made solely on an employee's perceptions. Every six months, each employee—regardless of age—receives an employee performance evaluation with his or her supervisor. If performance has slipped, there may be person-to-person counseling with the supervisor or with someone in the personnel department.

No employee is ever reduced from full-time to part-time status. But efforts are made to transfer an employee to a department more suitable to his or her abilities.

Such situations require astute management skills. Advocates of mandatory retirement say it saves embarrassment because personnel managers don't have to tell older workers their performance has slipped.

We believe a compassionate and competent personnel team can handle this problem. It is done regularly with younger employees; why should it be a bigger problem with older ones?

HEALTH/PENSION PLANS AND THE OLDER WORKER

What does a non-mandatory retirement policy do to a company's health and pension plans?

Fraink Angerame, Insurance and Retirement Consultant at Bankers, explains: "Once a person reaches 65 he or she is eligible for Medicare whether working or not. This definitely reduces our plan's liability, although our 65 and over employees are kept in the health benefits program as a supplement to Medicare benefits. But, as a matter of fact, we find it more costly when a younger employee gets ill."

Angerame also commented on the pension plan picture. "If these people weren't working for us, Bankers would be paying both pension benefits and the salary of the replacement employee. Added to that are the costs involved in training the new employee. It just has to be more economical to have a non-mandatory retirement policy."

IT'S NOT AGE THAT COUNTS

As our population shifts, more and more people will be over 65. We believe we're ahead of the game by treating this age group like any other. If they want to work, we say "Work for us. Add your knowledge and experience to ours, and we all benefit. It's not your age that counts. It's you!"

## PERSONAL EXPLANATION

## HON. MARILYN LLOYD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mrs. LLOYD of Tennessee. I was absent from House proceedings from August 8 through August 17, during which time I was given an official leave of absence due to illness. Because of my absence on those days, I did not vote on rollcall votes No. 656–668, No. 670–676, No. 678–681, No. 683–700, No. 702–705, No. 707–713, No. 715–723. If I had been present, I would have voted as follows:

Rollcall No. 656—no.
Rollcall No. 657—yes.
Rollcall No. 658—no.
Rollcall No. 659—yes.
Rollcall No. 660—no.
Rollcall No. 661—no.
Rollcall No. 662—no.
Rollcall No. 663—yes.
Rollcall No. 664—yes.
Rollcall No. 665—yes.
Rollcall No. 666—no.
Rollcall No. 667—no.
Rollcall No. 668—yes.
Rollcall No. 670—yes.
Rollcall No. 671—yes.
Rollcall No. 672—yes.
Rollcall No. 673—yes.
Rollcall No. 674—no.
Rollcall No. 675—yes.
Rollcall No. 676—no.
Rollcall No. 678—yes.
Rollcall No. 679—yes.
Rollcall No. 680—yes.
Rollcall No. 681—no.
Rollcall No. 683—no.
Rollcall No. 684—yes.
Rollcall No. 685—yes.
Rollcall No. 686—yes.
Rollcall No. 687—yes.
Rollcall No. 688—yes.
Rollcall No. 689—yes.
Rollcall No. 690—yes.
Rollcall No. 691—yes.
Rollcall No. 692—yes.
Rollcall No. 693—yes.
Rollcall No. 694—yes.
Rollcall No. 695—yes.
Rollcall No. 696—yes.
Rollcall No. 697—yes.
Rollcall No. 698—yes.
Rollcall No. 699—yes.
Rollcall No. 700—no.
Rollcall No. 702—no.
Rollcall No. 703—no.
Rollcall No. 704—yes.
Rollcall No. 705—no.
Rollcall No. 707—yes.
Rollcall No. 708—yes.
Rollcall No. 709—yes.
Rollcall No. 710—yes.
Rollcall No. 711—yes.
Rollcall No. 712—yes.
Rollcall No. 713—no.
Rollcall No. 715—yes.

Rollcall No. 716—no.
Rollcall No. 717—yes.
Rollcall No. 718—yes.
Rollcall No. 719—yes.
Rollcall No. 720—yes.
Rollcall No. 721—yes.
Rollcall No. 722—yes.
Rollcall No. 723—yes.●

## SUPPORT FOR RETAINING LIMITATION ON OUTSIDE EARNED INCOME FOR MEMBERS OF CONGRESS

### HON. ROBERT W. KASTENMEIER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. KASTENMEIER. Mr. Speaker, on March 2, 1977, the House approved a new Code of Ethics. By a vote of 344 to 79, the House retained a key provision of the new Code which limits, beginning January 1, 1979, the outside earned income of Members of Congress of 15 percent of their annual salary. This is an essential ingredient to making that Code work to eliminate potential and real conflicts of interest in the Congress.

When the House considers H.R. 1, the Ethics in Government Act, an effort will be made to repeal the outside earned income limitation before it has even gone into effect. The new Code of Ethics was designed to overcome public mistrust of the Congress. Repealing the limit on outside earned income would further undermine the public's confidence in the Congress.

Mr. Speaker, I urge my colleagues to support the limitation on outside earned income. I further recommend to my colleagues that they read a number of editorials from around the country which call upon the House to hold firm in the action it took when we voted to limit the amount of outside earned income.

[From the Chicago Daily News, Dec. 20, 1977]

LEAVE ETHICS CODES ALONE, CONGRESSMEN

We knew that a torrent of opposition flowed beneath the overwhelming majorities wrung out of the House (402 to 22) and Senate (86 to 9) last spring in favor of congressional ethics codes. But we thought that having taken the plunge, congressmen would grin and bear the new standards they had imposed on themselves. It appears we were just dreaming.

Common Cause, the national citizens lobby that has been in the forefront of government reform, reports moves are afoot to delete the limit on outside earnings, which Congress swallowed to help the public digest the $12,900-a-year raise it had given itself. The limit is 15 percent of the congressional salary, or $8,625.

A House committee has recommended exempting from disclosure any gifts of travel, entertainment and the like that representatives receive in foreign countries. A Senate committee wants to exempt all travel and related entertainment expenses from the $100 limit on gifts from lobbyists. The Senate's ban on slush funds, which had provided a detour around campaign contributions laws, also is under attack.

Congress voted for these and other reforms largely because it had taken a nosedive in public opinion. But those would seem like days of wine and roses compared to the days of public outrage Congress would trigger if it dilutes its ethics codes. We hope the grumblers will reconsider.

[From the Raleigh (N.C.) News and Observer, Jan. 5, 1978]

DON'T BACKSLIDE ON CONDUCT CODES

When members of Congress accepted a $12,900 annual pay hike last spring, they also accepted another recommendation from a presidential commission and adopted new, stronger rules of conduct. The catch is that what lawmakers put together back then now appears in danger of coming unraveled.

Common Cause, the citizens' lobby group, reports that in various committees some lawmakers have been hacking away at the new rules, hoping to weaken them when Congress reconvenes later this month.

For example, certain members of the House Rules Committee are trying to eradicate the limit on outside, earned income of representatives (who, like senators, now draw annual legislative salaries of $57,500). Meanwhile, the Senate Ethics Committee has been considering a major weakening of that chamber's 1977 ban on large gifts from special interests. The change would make room once again for such extracurricular treats as foreign travel financed by lobbyists.

Maybe the demolition workers marching against the new codes of conduct believe that American citizens have short memories. Perhaps so—but not quite that short. With Mr. Tongsun Park still in the headlines, it is impossible to forget that a principal pressure behind the move for the codes was the unseemly lapping up of Korean favors by lawmakers. Nor has the public so swiftly forgotten those legislative hunting trips financed by big defense contractors, those fat honoraria paid to lawmaker-speechmakers by industry lobbying groups and similar items that led to enactment of the conduct rules.

When the codes were voted on last year, they passed by overwhelming margins: 402–22 in the House, 86–9 in the Senate. Some backsliding is to be expected. But surely from those big majorities there remains enough backbone to resist the undoing in 1978 of what was accomplished in 1977.

[From the New York Times, May 18, 1978]

POOR CONGRESSMEN

What does "poor" now mean in America? Washington's officially defined poverty level was raised recently; for an urban family of four it is now $6,200. Meanwhile, some members of the House of Representatives would have us believe that for them, the poverty level is $66,125 and, they are entitled to more. Can they be serious?

Members of Congress voted to increase their own pay last year, to $57,500. Correctly anticipating heated reaction and responding to widely held cynicism about Capitol Hill ethics, both Houses also voted a kind of advance penance. For the first time, they imposed a limit on how much outside income members would earn—15 percent of the new pay, or $8,625, bringing maximum allowable income to $66,125.

In creating the outside-income limit, Congress seemed to recognize that permitting unlimited earnings from, for example, law firms or speech sponsors, was to invite suspicion of sly contributions from special interests. Now, however, some members of the House Rules Committee—who have earned as much as $120,000 in outside income—seem intent on trying to rescind the limit.

It is not fair, the argument goes, to limit earned income when wealthy members can continue to receive unlimited unearned income from investments. There seems to us to be a clear distinction between the potential influence of regular returns from coupon-clipping and of receiving a fat check today from a group interested in a vote tomorrow. That does not wholly meet the point; there is something to the argument in terms of even-handedness. But even-handedness is not the issue. If the members believe their present salaries are inadequate, the answer is to raise them, not, in effect, to seek subsidies from this client or that audience. In any case, we thought Congress had settled the point last year. What has changed in 13 months? Do the Congressmen involved here think the public has lost interest in Congressional salaries or Congressional ethics? We doubt it. The only poverty in the House we're able to take seriously is that of shame.

[From the Christian Science Monitor] Dec. 22, 1977]

CONGRESS'S ETHICS OPPORTUNITY

That valuable watchdog, Common Cause, is barking again, and we hope it wakes everybody up. This time the citizens organization warns that some people in Congress are already trying to whittle down the codes of ethics accepted so resoundingly last spring when the legislators were justifying their $12,000 pay raise.

Here is a prime opportunity for representatives and senators to prove that their display of concern for ethics was more than a spring fashion. They can do so by resisting efforts to repeal the House code's requirement to disclose munificence from foreign countries, for example, and the Senate code's ceiling on travel and entertainment gifts from lobbyists.

The extent of the challenge may be indicated by Common Cause's information that only two members of the six-man Senate Ethics Committee now defend the Senate's code. Seven out of 16 members of the House Rules Committee were already against the House code's limit on outside earnings back in March. Such opponents may seek elimination of the earnings limit as the price of sending to the floor a bill that would give the House code's financial disclosure requirements the force of law.

Granted that most members of Congress do not or should not need organizational codes of ethics to keep them straight. There is no substitute for a personal code so firmly ingrained that evasion is no temptation.

What the passage of Congress's code did was to help legislators resist the kind of private and foreign influences that some succumbed to in the past and to assure the public that there were agreed standards on which Congress was ready to police itself. There could be wisdom in revising ethics codes, just as much as any other congressional product, but it would be hard to convince the public that weakening these still new codes would be a step forward. Our expectation, is that Congress, with a little help from its leaders—and from Common Cause—will see the right thing to do.

[From the Washington Star, Apr. 26, 1978]

BACKSLIDING ON ETHICS

Members of Congress took a $12,900 pay raise last year with the distinct understanding that a strict code of ethics and a limit on outside earnings would be imposed on themselves. There seems to be some doubt now about how well the understanding will be honored.

Pending legislation would write into law the House rules on disclosure of financial interests that were approved overwhelmingly in March 1977. In addition to covering members of Congress, the legislation would extend the disclosure provisions to the executive and judicial branches. Federal judges and employees of all three branches compensated at a GS–16 salary level and above would be covered.

The bill, which had been scheduled for debate this week but was pulled from the House calendar Monday, would require annual reports on amounts and sources of in-

come, gifts totaling $100 or more a year, free entertainment valued at $250 or more a year from a single source, real estate worth more than $1,000, personal property worth more than $1,000 that is held for investment or income production, debts that exceed $2,500 and transactions in securities or commodities futures that exceed $1,000.

Although the House last year passed its rules of financial conduct, which include a limit on outside earnings to take effect in 1979, by a vote of 402 to 22, there appears to be considerable backsliding. Their pay raise in hand and the volume of publicity from scandals (except for the Korean influence buying probe) abated, the enthusiasm for ethics reforms seems to have dropped off. The House last fall defeated a proposal to overhaul internal administrative procedures that would have tightened up accounting practices.

Although the House rules approved 13 months ago would remain in effect if the bill is defeated, the rules lack the civil and criminal penalties embodied in the bill making them a part of the federal law. In addition, the coverage would not be extended to the executive and judicial branches.

It appears that the bill was pulled off the House floor by Speaker O'Neill because so many amendments were threatened that the outcome was uncertain. Supporters hope that the four committees involved in handling various sections of the legislation can reach a better understanding before it is brought back for floor action.

Complicating the situation was a Rules Committee decision to allow debate on a "non-germane" proposal to strike the House rule that limits members' outside earned income to 15 percent of their annual congressional salary—or $8,625 based on their current salary of $57,500. The limit was designed to reduce conflicts of interest and to keep members from spending so much time away from their congressional duties. The earnings limit is not part of the disclosure bill but is part of the ethics package that the House voted last year to impose on itself (a similar restriction was voted in the Senate).

Opponents of the 15 percent limit argue that it is unfair to restrict members from "earning" outside income but not to restrict earnings from investments. Proponents contend investment income is less likely to involve members in conflict of interest situations and less likely to keep them off the job. After thorough debate in March 1977, the earnings limitation was approved by the House 344 to 79.

The danger in reopening the earnings issue during debate on the disclosure bill is that it might create such antagonism and confusion on the floor that it could affect the vote on the disclosure bill. One might wonder what the motive of the Rules Committee was in allowing the earnings issue to be taken up with the disclosure bill.

Ethics Committee Chairman Richardson Preyer, D–N.C., fears that if the House doesn't pass the disclosure bill "we will appear to be backing down on our commitment to pass a tough ethics bill after we accepted a pay raise . . . We'll look like we're taking the sugar without the pill."

Actually that pill had two parts—financial disclosure and the earnings limit. They were parts of the bargain struck more than a year ago when Congress wanted to get a fat pay raise and try to clean up its image at the same time.

The disclosure bill ought to be passed and the earnings limitation ought to remain in the House—and Senate—rules. A bargain is a bargain.

---

[From the La Grange (Ga.) News, May 10, 1978]

PERKS

About a year ago, members of the U.S. House of Representatives, in accepting an increase in their pay to $57,500, agreed to limit the outside income members of Congress can earn to 15 percent of their salaries, or $8,625.

It's now possible that the agreement may be voided before it becomes effective Jan. 1, 1979.

The House Rules Committee recently supported an amendment to the financial disclosure bill, H.R. 1, to repeal or weaken the earnings limit. That decision clears the way for a House vote on the amendment and indicates at least some representatives are ready to junk the restriction.

Common Cause President David Cohen has said such action by members of the House would be "a clear betrayal" of the pledge they took last year when they accepted their pay raise.

Common Cause lobbied hard for the restriction, contending it diminshes conflicts of interest and potential influence-buying.

Those arguments are still good. Members of Congress are adequately paid, with healthy expense allowances in addition. We see no reason congressmen should collect extensive outside income. That's just cashing in on their positions of influence.●

## CONGRESSIONAL SALUTE TO NEW JERSEY'S FAMILY DAY '78 COMMITTEE AND THE LEBRON FAMILY OF CLIFTON, FAMILY OF THE YEAR, EIGHTH CONGRESSIONAL DISTRICT, STATE OF NEW JERSEY

---

### HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. ROE. Mr. Speaker, on Sunday, September 17, residents of my congressional district and State of New Jersey will celebrate Family Day 1978 at Rutgers Stadium, Piscataway, N.J., where a gala program sponsored by the New Jersey Family Life Directors, Rutgers the State University, and the Family Life Board of Governors in Paterson has been planned to demonstrate faith in the family as the very basic foundation of our society in preserving our human values, nurturing our children, developing respect and understanding for others, caring for our elderly and perpetuating our cultural and spiritual heritage.

Mr. Speaker, at the outset may I commend to you and our colleagues the outstanding work being carried on in my congressional district in the Family Life Movement by the Reverend Finbarr M. Corr, Ed. D., director of the Diocese of Paterson, Family Life Bureau, Paterson, N.J., who is the coordinator of Family Day 1978 in New Jersey and the distinguished members of the New Jersey Family Day 1978 Committee, as follows:

The Honorable:

Chairman—William E. Simon.

Vice-Chairpersons: Rev. Carl J. Arico, Lavinia Bryan, John M. Cooney, Sue Corroon, Robert L. Marcalus, Betty Ann O'Brien, Raymond O'Brien, Claire Papp, Jack Papp, and David "Sonny" Werblin.

Members: Mr. and Mrs. John Cohley, Rev. Joseph V. DiMauro, Mr. and Mrs. Sam Fornaro, Mary Hammonds, Mr. and Mrs. Gus Hoffman, William Huber, Monsignor Leo A. Kelty, William T. Kenny, Rev. John M. Morley, John O'Hara, Owen M. O'Sullivan, Rabbi David Panitz, Mr. and Mrs. John Reid, Sister Catherine Reilly, Mr. and Mrs. John Schrift, and Rev. Paul Stagg.

Consultants: Sam Levenson and Bishop Frank J. Rodimer.

Coordinator: Rev. Finbarr M. Corr.

Mr. Speaker, we are especially proud and applaud my congressional district's "Family of the Year,"—the parents, Mary and Lee Lebron, and their three children, George Pierce, Mariana, and Gregory—who were selected to represent our district by distinguished citizens and community leaders of New Jersey whom I also wholeheartedly commend to you, as follows:

The Honorable: Leo Fichtelberg, Director of Paterson Public Library; Rabbi Dr. Eugene Markowitz, Director of Clifton Jewish Center; Karen Hutchcraft, Assistant to Director of Metropolitan Campus Life; Robert Corrado, Boro Attorney for Totowa; John Fiorello, Attorney—Wayne; Ansel Payne, Secretary of Board of Education Passaic County Vocational and Technical High School; and Robert Lauten, Principal of North Jersey Training School.

Mr. Speaker, it is the consensus that a Nation is only as strong as its family life. America has gained its strength and fiber through the tradition of a strong family life which has truly enriched the educational, cultural, social, and economic well being of our communities, State, and Nation. The Lebron family is representative of the family groups of our United States of America whose varied expressions of familial solidarity have contributed to the richness of the quality of our American way of life.

Mr. Speaker, with your permission I would like to insert at this point in our historical journal of Congress a news article that appeared in one of New Jersey's most prestigious newspapers, the News, headquartered in the city of Paterson, which most eloquently depicts the unique gifts of family tradition and family caring and sharing that the Lebron family extend naturally and lovingly in their day-by-day pursuits which have truly enriched our community, State and Nation. This byline authored by a highly talented and gifted News correspondent, Rosalie Longo, reads, as follows:

AN IDEAL CLIFTON FAMILY PROSPERS HELPING OTHERS

(By Rosalie Longo)

CLIFTON.—The self-centeredness that psychiatrist Robert Coles—winner of the 1973 Pulitzer Prize for volumes two and three of his book "Children in Crisis"—speaks of could apply to many Americans who overindulge themselves today. But not to Mary and Lee Lebron of Cilton.

Because of their unselfish giving to others, the devout Catholic parents and community workers have been chosen to represent the 8th Congressional District as Family of the Year. In September the couple will compete for state honors at a Family Day 1978 celebration to be sponsored by the New Jersey Family Life Directors and Family Life Board of Governors, in cooperation with Rutgers University, at Rutgers Stadium in Piscataway.

According to the Rev. Finbarr Corr of Paterson, coordinator of the event, Family Day is being planned to reaffirm the concept of social, cultural and spiritual family life, especially at a time when scientists predict that family life is about to die.

Says Father Corr: "We have chosen to demonstrate our faith in the family as the basic cell of democracy and a permanent divine institution. A nation is only as strong as its family life."

In the eyes of the Family Day selection committee members, Mary and Lee Lebron were chosen for their "naturalness" and unselfishness in reaching out to help others in the community while faced with obligations of their own at home.

"Lee and Mary," says Father Corr, "have found mutual growth in their commitment to others."

Despite what scientists predict, the Lebrons feel family life will definitely survive and continue to grow in the future.

"To be without (the) family, would be contrary to nature," says Mary Lebron. "It would be like a man without a country.

"But in family life today," she says, "there is too much emphasis on the acquisition of material things.

"When I was growing up, you were given things with limitation. Not everyone had a television set. It was considered a luxury.

"There also wasn't that much emphasis on what to do or where to go.

"Today it's much different. Many kids seem more interested in acquiring things for pleasure than personal accomplishment."

The mass media, she says, is partly responsible for putting pressure on people by telling them what's important in life. Most times, Mary Lebron says, the accent, isn't on things that should be meaningful.

"I don't think parents are intentionally permissive today; they're unknowingly permissive. Often they act without guidance. I'm not against giving a child the right to make a decision, but I am against giving it carte blanche."

Lee Lebron feels the biggest problem of being a parent today is not having enough time to prepare a child for adulthood at age 18. "Years ago," he says, "a parent was able to sit back comfortably knowing what his or her child was being exposed to. Now, he has to sit down and do a lot more research to learn."

What worries Lebron most about his future years as a parent is whether or not he'll be able to maintain a communication pattern with his children. In his opinion, a communication pattern has to be set early enough if it is to work.

Mary Lebron says she doubts very much if she will change her ideas on morals when her children, now 6, nearly 7 and almost 8, are teenagers.

"I may worry about adjusting to the times, but I'll still be staunch in my feelings about not wanting my children to drink at 18," she says. "I don't feel 18-year-olds should drink. They're not able to cope with the responsibility that goes with it. And full responsibility has to be accepted.

"Getting a driver's license," she notes, "doesn't entitle a person to go out and drive recklessly. Some may be able to handle drinking at 18, but by in far, many are making a big game of it."

Responsibility, she says, is also a necessary ingredient in marriage. Therefore, she sees no point in young people living together without being married.

"I can't see what can be gained from this type of arrangement," she says. "It may allow two people to get to know each other, but other than that, nothing is accomplished. At least in marriage, you continue to grow."

According to Father Corr, Mary and Lee Lebron have attained growth not only in their own marriage but in their commitment to people outside their home.

Even before their marriage, both were involved in helping others. When they met, both were Catholic Alumni Club volunteers helping tutor inner city children in New York. Mary was working as a teacher and Lee was serving with the Air Force at the time.

The greatest challenge of their own marriage was in surviving when Lee returned to school full time to get his master's degree in social work. It would be an advanced degree to help him serve others more effectively in his job as a paraprofessional at the Mount Carmel Guild in Newark.

"Those days were rough," says Mary, "because we used all of our savings. We also had three children to support and, because they were small, I couldn't go out and get a job. On top of that, Lee had to travel to school (Rutgers in Newark) 80 miles a day."

Now a psychiatric social worker with the Passaic Mental Health Clinic, Lee works in the Paterson Diocese's deaconate program for Spanish deacons and serves at the mental health clinic at St. Mary's Hospital. He also volunteers his time to help others in the Family Life Bureau's drug program and serves on the Social Action Committee of the Paterson Diocese.

"My role is to be supportive," says Mary. "Being a deacon's wife means that I must realize that my husband will not be available to paint the extra room. His time that possibly could have been used to make our life more comfortable by a second job goes to our commitment to other people."

Now that all of their children are in school Mary has gone back to work, teaching chemistry to 11th graders in Elmwood Park. Even though her duties at home and on the job keep her busy round the clock, she still finds time to serve as a class leader and Home-School Association member at St. Paul's School as well as assist in Little League affairs.

"I'm shocked that we were chosen Family of the Year," she says. "We never thought about doing things for honors or citations. This is simply the kind of life we have chosen to lead."

"We're just little drones doing our job day to day," says Lee. "When you help your neighbor, you help yourself. I think my feelings are the result of the legacy given me by my father some 20 years ago. It's somewhat dog-eared and faded now, but I still carry it with me in my wallet every day.

"It says:

*'Help me Lord to use my little skill as best as I can to do your Holy will.*

*'Give me patience, charity and most of all humility.*

*'Let me find the peace of mind that comes to those who serve mankind."*

The Lebrons seem to know that peace.

Mr. Speaker, Better Homes and Gardens conducted a random sampling of 10,000 respondents among their magazines subscribers with a questionnaire entitled "What's Happening to the American Family?". The questionnaire appeared in the September and October 1977 issues of Better Homes and Gardens, and a sample of 5,000 respondents was taken from each. I believe their summary and highlights of this survey afford considerable thought-provoking conclusions on family life which may be of interest to all of us, as follows:

SUMMARY AND HIGHLIGHTS

Looking at their own families, respondents to the questionnaire find them reassuringly sound. Their families are structured in a traditional, closely knit relationship in which parental discipline is firm, belief in a Higher Being is important, education is valued, and the work ethic is stressed. Thrift and avoidance of debt—although considered outmoded by some segments of society—are strongly endorsed by the respondents. They also believe in:

A life in which physical well-being, raising children, and intellectual and spiritual growth are far more important than recognition by others, influence over others, or social status.

A lifetime marriage commitment to one spouse with love the main reason for staying married.

A husband-wife relationship in which the partners are in agreement about their marriage goals, are having their expectations of happiness fulfilled, and are sharing their personal problems.

But despite the positive feeling respondents have about their own families, they see much in today's society that gives them concern:

A majority of respondents say American family life is in trouble, and they place much of the blame on inattentive parents and the absence of a religious and spiritual foundation.

The high rate of marriage failure disturbs respondents, who attribute the increase to the marriage partners' immaturity, selfishness, and lack of mutual interests and goals.

The elderly are generally forgotten by their families, say many respondents, and young children are growing up today without enough contact with older people.

Television programming and movies are sources of concern because of poor quality and overemphasis on sex and violence. Also, respondents feel there is to much emphasis on sex and youth in all aspects of society.

Although respondents view with alarm a number of problems in today's society, their attitudes and opinions in several areas clearly reflect the changes that have taken place in this country during the past five years, such as:

A rejection of the stereotyped roles of the husband as breadwinner and the wife as homemaker. In respondents' families, there is greater freedom for each spouse to participate as an equal partner within the marriage relationship.

Awareness of women's rights. Many respondents say that this awareness has significantly altered the husband-wife relationship.

Smaller families. The ideal number of children for the typical respondent family has decreased.

The Better Homes and Gardens family that emerges from this study represents a combination of tradition and change. In their responses to the questionnaire, readers indicate they are holding on to those values they feel to be important to their way of life and altering those they feel are no longer appropriate. Thus, the family is an ongoing, evolving units with a demonstrated ability to adjust to society's changes while still maintaining the strengths of the past.

Mr. Speaker, as we celebrate Family Day 1978 in New Jersey to help reaffirm our belief in family life and demonstrate our support for the concepts of family life, I would like to direct your attention to my resolution House Joint Resolution 1062 which I introduced to proclaim our strongest support of the Family Life Movement in New Jersey and throughout our Nation through the designation of Sunday, September 17, 1978, as "National Family Day," which reads as follows:

H.J. RES. 1062

Whereas America has gained its strength and fiber through the tradition of a strong family life which has truly enriched the educational, cultural, social, and economic well-being of our communities, States, and Nation; and

Whereas the very basic foundation of our society in preserving our human values, nuturing our children, developing respect and understanding for others, caring for our elderly and perpetuating our cultural and spiritual heritage stems from family life;

Whereas our United States of America is comprised of family groups from all over the world, bringing varied expressions of familial solidarity which have been adopted by our people, adding to the quality of our American way of life; and

Whereas the family life movement in many

areas throughout our Nation is celebrating Sunday, September 17, 1978, as "Family Day" to celebrate and honor the family, which has contributed in large measure to America's evolution as a nation that has achieved global preeminence as a shining example of a united and compassionate family which continues to extend a helping hand to families in need throughout the world; and

Whereas it is indeed appropriate to honor the contributions and special place in America of families and those who labor to create the wealth and destiny of our country: Now, therefore, be it

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That Sunday, September 17, 1978, be designated as "National Family Day" and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe that day to reflect upon and reaffirm our belief in family life, demonstrate our support for the concepts of family life, and provide a forum for the sharing of the cherished values of our heritage and the unique gifts of family tradition amongst all of our people.

Mr. Speaker, I appreciate the opportunity to call your attention to New Jersey's observance and celebration of Family Day 1978 and know that you and our colleagues will want to join with me in saluting New Jersey's Family Day 1978 Committee with special plaudits to my congressional district's "Family of the Year," the Lebron family of Clifton, N.J. We are indeed proud of America's families and the opportunity to honor and celebrate the richness of their outstanding contribution to the wealth and destiny of our country.●

## TWO CHINAS?

### HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. LAGOMARSINO. Mr. Speaker, I would like to bring to the attention of my colleagues the well-expressed article written by Ray S. Cline of the Georgetown Center for Strategic Studies. This editorial appeared in the Washington Post on Tuesday, September 12, 1978.

The article follows:

THE DILEMMA OF TWO CHINAS: WHY NOT BOTH?

(By Ray S. Cline)

Premier Hua Kuo-feng of the Communist People's Republic of China has been tripping through Central Europe and Iran, trying to whip up antagonism to the Soviet Union. Audiences in those areas clearly enjoy hearing somebody lambaste Soviet imperialism in terms seldom used by more discreet American and European officials. Hua's anti-superpower rhetoric certainly irritates the Russians. It is hard to tell, however, whether Hua is the celebrated "China card" being played by the Carter administration or whether he is playing his own "American card." Peking clearly hopes to build up its prestige, get access to European and American technology with financial credit, and to lock the United States in deeper confrontation with the Soviet Union.

President Carter and his national security adviser, Zbigniew Brzezinski, act as if they ought to pay off the People's Republic for doing what is very much in its own interest. They also seem to regard its feeble economy and the poorly equipped Chinese armies as assets that somehow can help the United States strategically against the infinitely more powerful U.S.S.R. The fact is that increased Soviet hostility can hurt us—and the People's Republic—more than Peking can help us. A Soviet-oriented military incident on the Chinese border, for example would quickly sober both Hua and Carter about the risks they are taking.

The real trouble with the Carter administration's China policy, nevertheless, is that we are already paying a high strategic cost in damage to our relations with valuable allies in East Asia. This damage will not be offset by envisaged benefits of the "China card" that at best will be limited and at worst may needlessly exacerbate American dealings with the Soviet Union across the board. It is one thing to flatter the leaders of the People's Republic to encourage them in their anti-Soviet stance. It is quite another to destabilize our western Pacific alliance system in the process.

The heart of the mistake the Carter administration is making is its inclination to commit itself to diplomatic recognition of the People's Republic as the rightful rulers of all China, including the populous and prosperous island of Taiwan, which Peking considers simply one of its provinces that must be "liberated" some day, by military force, if necessary. Limited conciliatory moves toward the People's Republic make some strategic sense for Washington; breaking off U.S. ties with the strong, tough Republic of China on the island of Taiwan makes no sense whatever for American interests in the western Pacific and Northeast Asia.

The administration party line is being voiced by Sen. Edward M. Kennedy, who unwisely is carrying the burden for Carter and the State Department in selling an unpopular China policy. He asserts that the United States can guarantee "the security of the people in Taiwan and the peaceful resolution of the relationship between the island and the mainland" after dropping the formal treaty ties, relying on the forbearance of Peking and some sort of pronouncement by the White House or Congress about maintaining trade and selling arms to Taiwan. Nobody in Asia would believe tacit assurances from Peking or flimsy "sense of the Senate" statements from Washington to be anything but temporary and unreliable expedients, if not downright deception. The State Department has been unable to come up with any formula providing the substance of a security guarantee that would be at all credible in the aftermath of breaking a formal defense treaty.

Only wishful thinkers doubt that this act of appeasement to Peking contemplated by the Carter administration will result in economic weakening and diplomatic isolation of Taiwan. After a "decent interval," political and economic instability is likely to lead to capture by Peking in one way or another. In this event, the Chinese society of 17 million people on Taiwan, which embodies the best mixture of Asian and American political philosophies and technologies achieved anywhere, will be submerged in the inert mass of one billion Chinese struggling to modernize under the totalitarian dictatorship on the mainland.

This prospect is already causing puzzlement and dismay, not only in the Republic of China, but also in Japan and the Republic of (South) Korea. Each of those nations is fearful of domination by either the People's Republic or the Soviet Union; and as a mutually reinforcing triangle in the northwestern Pacific, they constitute a major regional element of the American alliance system. Together they are much more powerful than all of mainland China in economic strength and modern military forces—in fact, in every respect except extent of territory and size of population.

The credibility of the United States as guarantor of the defense of its worldwide allies is the critical element in American foreign policy today. It is bound to be damaged badly if the Carter administration pulls the rug out from under Taiwan, the southern strong point in the chain of Northeast Asian allies built up with so much investment of American efforts, lives and money over the past 30 years.

The irony is that there is no assurance that Peking's smiles toward the outside world will not vanish abruptly as they have in the past when domestic political issues supervene. It does not even now pay the slightest lip service to human rights or, for that matter, endorse permanent friendship with the United States. The new Chinese Communist Party constitution makes it clear that both the Soviet Union and the United States must eventually be destroyed, with the United States enjoying a reprieve because it is less feared and may be used as a temporary ally against the more powerful enemy.

Carter has a track record of espousing unrealistic, self-destructive defense and foreign-policy positions and then postponing or backing off when the costs belatedly come home to him. In this case, the line of retreat is an easy and honorable one. The United States should adopt a policy of willingness to extend de facto recognition to both existing Chinese governments until history resolves their rival claims. Peking's demands concerning breaking diplomatic and security ties with Taiwan should be coolly rejected. If Peking refuses closer ties with the United States on these terms, it will be the loser, not Washington. We can live quite comfortably with the status quo in Asia. There is no reason we have to choose between the two Chinas. Why not both?●

## BRUCE CATTON—HIS LARGEST LEGACY IS THE MEMORY OF HIS GENEROSITY AS A MAN AND SCHOLAR, WHICH TOUCHED ALL WHO KNEW HIM OR HIS WORK

### HON. GUY VANDER JAGT

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. VANDER JAGT. Mr. Speaker, late last month, on August 28, our Nation lost one of its famous writers and historians, Bruce Catton, a long-time resident of Benzonia, a beautiful little town in our Ninth Congressional District in Michigan. I was honored to know that Mr. Catton was a constituent and to serve him in Congress.

A winner of the Pulitzer Prize and the National Book Award for his powerful book of the Civil War, "A Stillness at Appomattox," perhaps his highest award that he treasured was the Medal of Freedom Award, the Nation's highest civilian award, presented to him on January 10, 1977, by fellow Michigander, President Gerald Ford.

Much has been written on Mr. Catton since his passing. I think that Bill McCulloch, staff writer for the Record-Eagle, Traverse City, Mich., presented a marvelous story on this outstanding man. It was entitled "Night Train Comes For Historian Catton." The story is included along with a truly fine editorial

from the September 1, 1978, edition of the Washington Post.

Bruce Catton has left this world. But, his great works will live on and will serve millions of future citizens of the world.

The articles follow:

[From the Traverse City Record-Eagle, Sept. 6, 1978]

NIGHT TRAIN COMES FOR HISTORIAN CATTON

(By Bill McCulloch)

BENZONIA.—In terms of the national recognition he received during his lifetime, Bruce Catton was probably the most illustrious of Benzie County's native sons. He was a writer and historian of the first rank, a two-time Pulitzer-Prize winner, a National Book Award recipient.

As a historian, Catton possessed a rare ability to breathe life into the characters and events he chronicled. He did this naturally, convincingly, without resort to literary contrivance. In his later years, he suggested that this ability might have been a function of his upbringing. He said he always felt as though he had grown up in the era about which he did most of his writing.

His biographies say he was born in Petoskey in 1899. But that was only because his mother's family lived in Petoskey at the time. She traveled there in the fall of 1899 for the express purpose of giving birth to her second child.

The Catton home in those years was located in Benzie County. And Bruce Catton did most of his growing up in the small village of Benzonia, where his father served as acting president of struggling Benzonia College during the final two years of its existence. Catton's recollections of his days in Benzie County later served as the basis for a book, his next-to-last, "Waiting for the Morning Train," published in 1972 by Doubleday.

The Benzonia that he knew in his youth, Catton wrote, was an anomaly. Founded as a college town in 1858 by men of strong Christian belief, the town became an outpost of temperence and piety in the middle of northern Michigan's prodigal lumber boom. Catton likened his boyhood to "growing up with the Twelve Apostles for next-door neighbors."

"In a way this was uncomfortable," he conceded. "To meet the nagging problems of this world while you are thinking about the requirements of the next one does not always come easily. . . ."

But the world problems and general social upheaval of the early 1900s were not well understood in Benzonia. Years later, Catton would look back and see his home town as a place where time, for a little while at least, had stood still. "We were out of date without knowing it," he wrote. "The country was moving out from under us before we realized that anything in particular had changed. Just when a wholly materialistic culture was becoming dominant we were shaping our lives according to the requirements of the culture it was displacing."

In this sense, Catton said, he could almost claim that he had grown up in the days that preceded the Civil War. And this was probably one of the reasons that tumultuous period in American history always seemed so real to him, he said.

Catton's fascination with the Civil War was fueled by his contacts with men like Elihu Linkletter, Lyman Judson, John Van Deman, Cassius Judson and John Morrow—veterans who'd actually fought on the legendary battlefields at Gettysburg, Atlanta, the Wilderness, Shiloh. Most of these men were well into their 70s when young Catton got to know them; to a small boy, they seemed positively heroic.

From time to time, Catton and his young playmates used to re-enact the Civil War on the West Campus, a 12-acre expanse of green near the center of Benzonia. "We were invariably the Union army," he wrote, "and we never lost. Johnny Reb died by the platoon and the battalion before our unerring musketry."

In sum, Benzonia was a good place for a young boy to be in the early years of the 20th Century. "Life was unhurried and unworried . . ." Catton recalled. "There was nothing to do but grow up, and we could take our time about it."

Unlike many other pioneer college towns in Michigan, though, Benzonia never amounted to much. The village had drawn much of its early vitality from the lumber boom. And that prosperity came to an abrupt end when the trees were gone. As a result, Caton wrote: Benzonia seemed to pass from adolescence to senility in one uneasy step.

After Benzonia College folded in 1900, Caton's father began selling insurance for a living. And when Catton was 6 years old, his family moved to Boyne City, where his father worked briefly as the manager of a new insurance company office.

Boyne City at that time was one of the last strongholds of the logging industry. It was a boom town, not much like Benzonia at all, with several sawmills, a blast furnace, a major shipping harbor, a railroad and 13 saloons. Day after day, Catton watched trains hauling pine logs to the mills where huge gang saws were kept busy ripping out millions of board feet of lumber. Living near the Boyne River, he also witnessed the spring log drives—tens of thousands of logs drifting downstream from the winter logging camps to the sorting grounds at the river's mouth.

When he grew older, Catton came to understand that what he had seen in Boyne City was a reflection of modern man's unwillingness to restrain his dominance of the environment. The timber resource was once thought to be inexhaustible. But technology soon provided the machines that made it possible to strip the land bare. And once it became possible to do so, Catton said, there was no turning back, no way to stop short of the ultimate objective. In less than the span of a single lifetime, a priceless resource was consumed. And the big lumber companies went elsewhere in search of trees.

Catton's stay in Boyne City was short. In 1906, his family moved back to Benzonia, and his father became principal of Benzonia Academy, a prep school that had replaced the failed Benzonia College. Catton attended a regular village school through the seventh grade, then skipped the eighth grade and entered the academy as a freshman in the fall of 1912, just before his 13th birthday.

That year also saw Catton begin to form some definite notions about his life. It all started with his father reading news accounts of the 1912 Republican National Convention and observing that newspapermen certainly must lead interesting lives.

A year or two later, a local resident asked Catton what he planned to be when he grew up. "As far as I can remember I had not consciously made any choice," Catton wrote, "but now that the question was asked I replied unhesitatingly: "I am going to be a journalist."

Except for one brief period during which he aspired to become a concert violinist, it appears that Catton never wandered too far from his early resolve to go into newspaper work. The lesson to be learned from that, Catton later observed, is that fathers should always be careful what they say to their impressionable children.

Catton graduated from Benzonia Academy in the spring of 1916, just two years before it went under, and that fall joined the freshman class as Oberlin College. When the United States entered World War I, though, Catton interrupted his education and joined the Navy. He returned to Oberlin after the war, but left again after his junior year to take up the career he'd been thinking about since he was 12 years old.

From 1920 to 1926, Catton worked as a reporter, first for the Cleveland News, then the Boston American and the Cleveland Plain Dealer. In 1926 he became a Washington correspondent for the Newspaper Enterprise Association, a job he held until 1941.

While he was working for the association, Catton found time to turn out a couple of novels, both of which he later dismissed as totally worthless. Apparently, neither work was ever published.

In 1942 Catton became director of information for the War Production Board, then held similar posts after the war with the Department of Commerce and the Interior Department. His wartime experiences led to his first published book, "The War Lords of Washington."

After that, Catton turned his attention to the subject that had fascinated him ever since his boyhood: the Civil War. With only one exception—the largely autobiographical "Waiting for the Morning Train"—his writing over the next 25 years focused on the war between the states.

His first book on the Civil War, published in 1951, was "Mr. Lincoln's Army," followed in 1952 by "Glory Road." Neither book attracted much attention at first. But in 1953, Catton published "A Stillness at Appomattox," completing his now-famous trilogy on the Union Army of the Potomac. That book won the 1954 Pulitzer Prize for history and also earned Catton the National Book Award.

In 1960 he won his second Pulitzer for the narrative that accompanied "The American Heritage Picture History of the Civil War."

In all, Catton produced more than 15 volumes on the Civil War, including one for youngsters: "Banners at Shenandoah."

Starting in the 1930s, Catton spent most of his vacations in the county where he had grown up. And it was here in Benzie County that he died of an undisclosed respiratory illness on Aug. 28. He was 78.

Catton had been 73 when he finished his autobiography. In it, he observed that early youth is just like old age in one respect—"it is a time of waiting before a big trip to an unknown desfination. The chief difference is that youth waits for the morning limited and age waits for the night train."

Benzonia, he reflected, had been a good place to wait for the morning train.

---

[From the Washington Post, Sept. 1, 1978]

BRUCE CATTON

If Lee did not surrender to Grant the way Bruce Catton described it in "This Hallowed Ground," he should have. Like two other great historians of the Civil War, Douglas Freeman and Allen Nevins, Mr. Catton was first a journalist; and he lived by the journalist's imperative—which is the fiction writer's, too—to make the reader see. Because Mr. Catton made more people see "his" war than ever before, he was tainted with the name of "popularizer," which merely meant that he saw history as art as well as facts. Yet, as other first-rate historians such as David Donald of Harvard attest, Mr. Catton was a first-rate historian—the first to use regimental histories as a source. And he was a workhorse. Less than half a life of writing books (he began at age 49) produced 17 major works, the last being a state history of Michigan, where he was born in a small town that, temperamentally, he never left.

His small-town background must have helped shape his approach toward his subject. Mr. Catton grew up hearing the tales of Union vets, and he understood the war more as a clash of people than as a clash of forces and ideas. Once, in reply to a question from his friend and researcher, E. B. Long, he said: "I don't know; maybe I was there"—accounting for his descriptive sense. But there

was also the perpetual presence of the war in his mind. He belived, too, in the perpetual presence of the war in *our* minds, that "whatever the American people might hereafter do would in one way or another take form and color from this experience."

Part of Mr. Catton's legacy is the idea—which many historians have since adopted—that one can best grasp the momentous actions of men by learning the significant details of their lives—what they wore, how they sounded. Part, too, is the publication "American Heritage," to which Mr. Catton contributed so much, and with which he placed the study of history in the public domain. His largest legacy is the memory of his generosity as a man and scholar which touched all who knew him or his work.●

## APPLYING THE BRAKES TO THE 121 SAFETY STANDARD

### HON. DAN MARRIOTT

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. MARRIOTT. Mr. Speaker, years ago Charlie Chaplin made a movie called "Modern Times" that highlighted the perils and pleasures of mechanized society. Often in the recent past we have seen that modern technology can as often be a boondoggle as a boon. We have seen drugs like thalidomide which deformed newborn children, fire retardants which are found to cause cancer, and pollution control devices which produce more toxic poisons than the older model's exhaust. We have become more sophisticated in viewing all changes as progress. The bottom line results are what we must look to.

The people of the United States have been subjected to a constant danger on the highways for the last 3 years. This is a silent threat which lashes out arbitrarily and suddenly to take life, limb, and property. While this danger has persisted, the agency that brought us mandatory locking seat belts and air bags has thumbed its nose at the public interest. This agency which has made a habit of being a law unto itself is the National Highway Traffic Safety Administration.

It took an act of Congress to stop the seat belt interlock system. It took an act of Congress to stop mandatory air bags. And it will take an act of Congress to undo the mischief of the 121 regulation. Every other Government agency which has taken a look at the 121 brakes has raised fundamental problems with the regulation requiring these costly and unsafe brakes.

What then is the bottom line for the 121 air brakes?

In the case of the 121 air brakes, it is clear that these highly touted brakes have never lived up to the expectation of their advocates. Indeed, they have created many opponents who fear for their own lives and those of the public. The national PTA has come out firmly against use of the brakes on school buses as well as on any other vehicle.

John B. Schnell, manager of research for the American Public Transit Association, said on July 19, 1978:

The real problem is NHTSA's unwillingness to properly consider the test data supplied by APTA, bus and component manufacturers (prior to mandating the 121 system), which data conclusively proved that the 121 system was not ready for use.

That is not a reassuring evaluation of this agency's performance.

The Ninth Circuit U.S. Court of Appeals, after taking 2 years to evaluate the information submitted by the parties in Paccar against NHTSA, found:

In view of substantial evidence received by NHTSA that the "in use" performance of vehicles equipped with antilock was not consistent with the performance required by the Standard, and in some circumstances may have been more hazardous than the performance of pre-Standard vehicles, the agency's failure to conduct more intensive testing of trucks and tractor-trailers certified under the Standard was not only unreasonable, but also a legal abuse of discretion * * * the comprehensive data before us indicates that there is a strong probability that the performance of a substantial number of vehicles whose braking systems have been altered to include overpowered front axles and antilock devices has created a potentially more hazardous highway situation than existed before the standard became operative.

My very capable colleague, Representative SHUSTER of Pennsylvania, has referred to the history of 121 brakes as criminal behavior by NHTSA. Such irresponsibility is inexcusable. The arrogance of NHTSA on this issue seems to be boundless. All criticisms are banished by NHTSA with shallow characterizations like "rhetorical" and "anecdotal." Mr. Speaker, that will not wash. Such high-handedness with the public good can no longer be tolerated. The editor of a trucking magazine referred to NHTSA as having "arrogance not to be believed, an arrogance the likes of which have not been seen in the western world since kings stopped ruling by divine right."

I am pleased that the Public Works and Transportation Committee voted without objection to impose a 2-year moratorium on the enforcement of this irresponsible regulation. It is a credit to the House that it will fulfill its constitutional duty to supervise the executive branch's performance. In this area that performance has been greatly lacking. I am glad that H.R. 11733 will begin to do something about it.

I would like to submit for the RECORD the following letter and article:

APPLYING THE BRAKES TO THE 121 SAFETY STANDARD

(By S. Scott Rohrer)

The furor over brake standards for trucks and buses shows the frustrating paradox facing government officials who try to put out regulations in the "public interest.")

Federal Motor Vehicle Safety Standard 121. Relatively obscure, yet extremely controversial, this standard has placed the National Highway Traffic Safety Administration (NHTSA) in a lot of hot water.

While public furor over the standard has been dwarfed by the agency's ongoing bureaucratic battle over air bag systems, the controversy exemplifies a frustrating paradox facing government officials who try to put out regulations that are seemingly in the "public interest."

In addition, the case provides another example of Congress trying to work its will on the executive branch by putting restrictions on the use of federal funds.

In this case, the agency and participants in the debate agree on the need for a tougher standard for bus and truck braking capability. But they disagree sharply on how that should be achieved.

In response to the brewing controversy, bills have been introduced in the House and Senate that would suspend the standard for a year; legislation is pending that would prohibit the Transportation Department from enforcing the standard; and the independent National Transportation Safety Board is preparing to investigate the traffic safety addministration as legislation that would compel the probe moves through Congress.

Of even greater concern to agency officials is a ruling on the standard last April by the U.S. Court of Appeals for the 9th Circuit that they believe sets a dangerous precedent. In its decision, the court overturned the braking standard on technical, rather than procedural grounds—a judgment, agency officials feel, it is not qualified to make.

The agency is appealing the decision to the Supreme Court but until the Court decides whether to hear the case, the standard will remain in effect.

Regardless of the Court's decision, however, agency officials and opponents of the standard agree that the 121 affair has damaged the agency's effectiveness and hurt its credibility.

THE STANDARD

When the 121 standard became effective in early 1975, it required that all new buses and trucks be able to stop within 217 feet when traveling at 60 miles per hour; the previous standard required only that these vehicles be able to stop within 400 feet at that speed. By comparison, most cars can stop within 200 feet.

Since it was issued, the standard has been amended several times to its current level of 293 feet.

The standard also requires that new vehicles be able to stay within a 12-foot-wide lane while braking without the wheels locking.

Most buses have been able to meet the requirement without additional equipment. But trucks have required a computer-controlled, anti-skid braking system in order to comply with the standard. The system—which costs about $100 per axle—supplements conventional brakes and operates when sudden stops are necessary. A minicomputer attached to each axle senses when the wheels are beginning to lock and momentarily releases the brakes to gain traction. The total cost of additional brake equipment comes to about $1,500 per truck.

NHTSA officials think the computer system is the answer for improving brake standards and, at the same time, preventing vehicles from jackknifing. But opponents of the system believe that it is unreliable, difficult to maintain—and extremely dangerous. They contend that the brake system is responsible for 18 deaths since the new standard went into effect.

PROBLEMS

Most of the major trucking firms say they have had nothing but problems with the new system. They point out that computers, which are very delicate and sophisticated, are subject to a tremendous beating on the nation's roads.

MHTSA "is asking a system to do something in an environment that it can't live in," George D. Green, vice president of Breeze Corps. Inc., manufacturer of a cable that prevents jackknifing, said in an interview.

"Of great concern also are the deficiencies that were found in the anti-lock electronic components of the 121-equipped vehicles," E. E. Kynaston, assistant chief of the Cali-

fornia Highway Patrol, told the Senate Governmental Affairs Subcommittee on Governmental Efficiency and the District of Columbia last Dec. 7.

The newness and complexity of computer brakes have led to another problem—a shortage of trained mechanics to repair the systems. Indeed, this maintenance problem was one factor in convincing NHTSA to exempt school buses from the standard since it was first issued.

Donald K. Strout, vice president of maintenance for Wilson Freight Co., wrote in a statement to the Senate subcommittee: "The quantity of brake failures and complaints are too numerous to tabulate. Parts to repair and replace the computerized modulating systems are extremely difficult to obtain. Service on the road and even at major cities is virtually non-existent."

Kynaston added that the malfunctioning of the computer brakes adversely affects conventional brakes. Instead of improving braking distances, the standard, he said, "has resulted in more vehicles having their brakes out of adjustment, which will lead to longer stopping distances and control instability."

Critics of the new brake system also say it is dangerous because when it does fail, it takes two to ten seconds before the conventional brake system starts functioning again. Within that time, a truck could go as far as 810 feet if traveling at 55 mph.

NHTSA has investigated almost every major accident that critics say has been caused by the new brake system. "We have never found [the system] to be the cause of a serious accident," Howard J. Dugoff, deputy administrator of NHSTA, said in an interview. "We've tried to track it down but it's turned out to be nothing but smoke."

Joan T. Claybrook, administrator of the agency, told the Senate subcommittee that the agency's investigations have been a "frustrating experience because it's very easy to make an allegation and very hard to conduct these investigations."

It has been difficult to pinpoint whether the system is at fault in accidents because of its nature or the reactions of individual drivers.

Rep. Dan Marriott, R-Utah, sponsor of a bill (HR 10562) that would impose a one-year moratorium on enforcement of the standard, said: "That's the trouble with 121. The system is so inconsistent—it works, then it doesn't work." That's why, he added, it is hard to pin the blame for the accidents. Marriott became involved in the controversy when the brake system was blamed for a truck-car crash in his district that left four persons dead. Sen. Orrin G. Hatch, R–Utah, is sponsoring a similar bill (S 2850) in the Senate.

NHTSA admits there were problems with the new system when it went on the market, but it contends that the bugs have been worked out and the system is becoming more reliable.

As evidence, it cites a preliminary study completed by the University of Michigan's Highway Safety Research Institute that found that trucks with the system had 20 per cent fewer accidents than trucks without it.

But Strout of Wilson Freight remains unconvinced. Since they began using the system, he said, the firm's drivers have had twice as many accidents and four times as many jackknife accidents. In addition, four drivers were killed.

"There may be some area of doubt whether all four can be laid to the [standard] and maybe there was only two or three, but we had not even had the average of one driver per year getting killed until we accepted 121 vehicles. Now we have four drivers in one year, "Strout testified at the December hearings.

Because of the increase in accidents, Wilson Freight disconnected its computerized brake systems late last fall. Strout said in an interview that "absolutely," without question, accidents have decreased considerably since then. A number of other firms have also disconnected the brakes and the Transportation Department's Bureau of Motor Carrier Safety, a part of the Federal Highway Administration, has stopped checking trucks to see if the brakes are in compliance.

Critics of the standard are exasperated at NHTSA's refusal to rescind the regulation in light of what they consider to be overwhelming evidence on their side.

Rep. Bud Shuster, R-Pa., ranking minority member of the House Public Works and Transportation Subcommittee on Surface Transportation, said: "When an agency promulgates a regulation that possibly causes 18 deaths and when an agency promulgates with reckless disregard, then there is a question of criminal negligence."

The full committee has approved a Shuster amendment to the Surface Transportation Assistance Act (H.R. 11733) that would bar the Motor Carrier Safety Bureau from spending funds for enforcing the standard. The House Ways and Means Committee approved the financial aspects of the bill on Aug. 1 and sent it to the House floor.

Said Marriott of NHTSA: "Nobody over there, including Joan Claybrook, has the best interest of the public in mind. They're all just trying to save their hides. They don't have the courage to admit they're wrong."

NHTSA's Dugoff said such charges "are just not true." And Claybrook told the Senate subcommittee: "We do not want to remove a system which, from the best evidence that we have at this moment, seems to be improving. The warranty data show that it is getting more and more reliable. Yet if we were to remove the standard, there would be no incentive for the supplier industry to improve the capability of their systems."

Dugoff said agency officials are frustrated with the trucking industry's opposition. But he concedes the agency is partly to blame for the resistance because the first version of the standard turned out to be too strict.

The agency is not alone in its frustration—the manufacturers of the brakes feel their product is getting a bum rap.

"We feel we have a good product," said Roy Nagel, an engineer for the environmental activities staff of General Motors Corp.

Opponents dismiss that belief. "If this is a better brake," said Geoff Myers, a lawyer representing the Truck Equipment and Body Distributors Association, which is fighting the standard, "you wouldn't need a federal mandate" to force acceptance of it.

Surveying the whole controversy, Dugoff commented, "The nature of the debate has become very politicized. The facts are not really being debated anymore."

COURT DECISION

Even more is at stake for NHTSA because of the Court of Appeals ruling in April.

"The decision really shook us up," said Dugoff, "because its precedential implications are immense."

The court ruled that although the standard is necesary and the new system may be reliable one day, the standard should be rescinded until there is evidence that it can be met safely.

The decision also shook up NHTSA's sister agency, the Bureau of Motor Carrier Safety. "It's a bad precedent," said Kenneth L. Pierson, deputy director of the bureau, because the courts "will be substituting their own regulation for the agency's." Pierson and Dugoff said the courts lack the technical background to make such decisions.

If the Supreme Court does not overturn the decision, Dugoff said, "it will be a real blemish on the agency's reputation."

Some say that has happened already. "The real tragedy [of the 121 controversy]," said Shuster, "is that it just discredits the whole highway safety effort. Who will believe them when they come out with their next regulation?"

---

SEPTEMBER 12, 1978.

HON. DAN MARRIOTT,
*Longworth House Office Building,*
*Washington, D.C.*

DEAR MR. MARRIOTT: Since December of 1977 the National PTA has studied the serious problems caused by inadequate field testing of computer-operated brakes on school buses, commercial buses and highway trucks.

The PTA continues to believe that the Bureau of Motor Carrier Safety, as regulated by the Federal Aid to Highway Act, should declare a complete moratorium on all computer-operated air brakes until adequate field testing and subsequent product adjustment has declared such antilock braking regulation safe.

We join the Utah PTA and other concerned citizen groups in urging members of Congress to vote for the complete ban on computer-operated air brakes, the 121 antilock regulation, as specified in H.R. 11733, the Surface Transportation Bill.

Very truly yours,

GRACE BAISINGER,
*President.*●

## TV NEWS POLICIES

## HON. CHARLES ROSE

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. ROSE. Mr. Speaker, a valuable analysis of the role of television news in situations involving terrorism has been published in the August 26 to September 1 issue of TV Guide, America's television magazine.

In his article, "When Hostages' Lives Are at Stake," John Weisman, TV Guide's Washington bureau chief, examined the complex question of when TV reporters should rush in to pursue news or desist to protect the lives of hostages.

As chairman of the Evaluations Subcommittee of the House Committee on Intelligence, I have participated in hearings on the threat of terrorist activities in this country. Accordingly, I am concerned about the problems inherent in television news policies.

Mr. Weisman and TV Guide have rendered a timely public service by examining an aspect of the awesome challenge confronting television.

The article may assist the television industry and the public in the evolution of ethical values in the context of unprecedented news events in which terrorists seek to manipulate and exploit the media.

TV Guide's article follows:

WHEN HOSTAGES' LIVES ARE AT STAKE

(By John Weisman)

Hostages. That word makes law-enforcement officials very nervous these days. But there is another word, too. One that makes cops, FBI men and security people equally jittery. And that word is television. "Combine the two in the wrong way," says a U.S. Department of Justice official, "and you could have real trouble on your hands."

In the past three years, the United States has experienced scores of hostage-taking incidents. Most, fortunately, have been resolved without loss of life. But during the tense hours of waiting and negotiating, the greatest disagreement, antagonism and conflict

often have not been between hostage-takers and the police, but between the cops and the news media—especially TV.

So far as anyone can tell, no hostage has yet been killed because of something a broadcaster put on the air. Some TV newsmen call that skill. "But it is just damn luck," says a former Los Angeles police chief, Edward M. Davis. Others in law enforcement agree with him. So do dozens of former hostages, many of whom feel that broadcast coverage of their own situations had actually put their lives in jeopardy.

What some in law enforcement call a textbook example of the kinds of mistakes broadcasters can make took place in Washington, D.C., in March 1977. There, 12 Hanafi Muslims occupied three buildings for 39 hours. More than 140 hostages were captured in the siege. Eight in the District Building, two blocks from the White House, 11 in the city's Islamic Center, right in the heart of Embassy Row, and 123 at the national headquarters of B'nai B'rith.

It was, one reporter said at the time, a story made for television. But in the scramble for news, and the competition for scoops, the broadcast media made mistakes. Enough of them, in fact, to cause 70 percent of the listeners in a subsequent radio poll to say that media coverage might have threatened the lives of the hostages. Broadcast coverage was given an even more dismal rating by the Hanafis' hostages themselves. Virtually all thought that the media had had no regard for their lives at one time or another.

What mistakes were made by broadcast journalists during the Hanafi siege?

During an on-the-air interview, Hamaas Abdul Khaalis, leader of the Hanafis, was asked by one broadcast journalist whether or not he felt that he could trust the police negotiators.

A radio reporter mistakenly referred to the Hanafis as "Black Muslims." Word came back to the station that unless an on-air apology was made, several hostages would be decapitated. (The apology was made.)

Another broadcaster, during an interview with Khaalis, asked whether or not the Hanafi leader had "set any deadlines yet." Fortunately, Khaalis overlooked the question.

A minicam unit started setting up in a building just across from the eighth floor area Khaalis occupied. One of the terrorists spotted it. According to Hank Siegel, a hostage at the B'nai B'rith site, the Hanafi said, "Oh, great—television. We'll hang a couple of old men out the window by their ankles. Let 'em take pictures of that!"

Hostage Alan Grip recalls a broadcast reporting that a fire ladder was being erected outside the District Building and police were going up the ladder. "The reporter implied—although he didn't say it directly—that they were about to rush the room where we were being kept. One of the gunmen just went crazy. He screamed, 'You tell those police to take the ladder away or we're gonna start blowing people away.' "

Dr. Frank Ochberg, a psychiatrist at the National Institute of Mental Health, currently serves as a consultant to the FBI on terrorism and hostage taking. "The problem," he says, "is that you're pitting newsmen's First Amendment rights against the managing of life-and-death situations. What you've got is an almost impossible situation. And the hostages are caught right in the middle of it all."

Despite a history of mutual mistrust, there are some places in which the police and the news media have come to an understanding. New York City is one of them. NYPD formed a hostage-negotiating unit shortly after the 1972 Munich Olympics. It was headed by Dr. Harvey Schlossberg, a career police officer who until his recent retirement ran the NYPD's Department of Psychological Services; and Capt. Frank Bolz, a 22-year veteran working out of police headquarters. Both Schlossberg and Bolz characterize their relations with the media as good; a sentiment echoed by a number of New York's TV reporters. But they learned to deal with the media through mistakes.

"I remember our first hostage-negotiating job," says Schlossberg. "The John & Al Sporting Goods store in Brooklyn. Four terrorists holding 14 hostages. Our first mistake was we wanted a news blackout. So we told the press, 'You can't have nothing.' That made 'em good and mad.

"Then we shut off the electric power in the area, so cameramen couldn't use their lights. So the TV stations sent portable generators down to the site, and the next thing you know the criminals were in the dark and the cops were all lit up nice and bright."

Schlossberg's negotiating team managed to rescue the hostages and persuade the terrorists to surrender without a shot being fired. But during the after-siege critique that is part of the NYPD negotiating team's routine, most of the police officers' questions revolved around the media. "We had spent so much time arguing with the media," says Schlossberg. "We knew that neither party was malicious. I decided that it was just a question of misunderstanding."

The NYPD decided to remedy the situation. Bolz and Schlossberg started to include reporters in the same training sessions used by NYPD hostage negotiators (more than 75 reporters have gone through the program so far). "We try to take away the mystique," says Bolz. "If they understand what we do, we think they'll honor our requests."

Why are on-air interviews with hostage-takers such a sore point with law-enforcement officers? One reason, says Bolz, is that "reporters don't know if the question they're asking will set the terrorist off.

"Sometimes," adds Bolz, "reporters are just stupid. A Canadian reporter once called in to a hostage-taker. The perpetrator told him he wanted to trade the hostages for narcotics. So the reporter says, 'Don't be stupid—if you give up all your hostages, you won't have anything to deal with'."

Another reason law-enforcement people dislike detailed coverage is that it tends to harden the position on both sides. Dr. Robert Shellow, who was the principal social scientist for the National Advisory Commission on Social Disorders, puts it this way: "The more the situation becomes public, the more it loses fluidity. It's like labor negotiations or politics. The President and the Congress can argue in private and make progress—each side giving, each taking. But once the press reports where each stands, the positions are set in stone. The same dynamic holds for hostage situations."

"The telephone is a two-edged sword," says Bill Small, senior vice president of CBS News. "Sometimes, I think, it's therapeutic for the terrorist to talk, to tell his story. On the other hand, it's very possible for a reporter to infuriate the terrorist by asking the wrong question."

CBS, the first network to issue written guidelines to its news staff regarding hostage situations, does not rule out making phone calls to terrorists. But, the guidelines continue, "CBS News representatives should endeavor to contact experts dealing with the hostage situation to determine whether they have any guidance on such questions as phraseology to be avoided [or] what kind of questions or reports might tend to exacerbate the situation."

One hostage, who asked to go unidentified, suggests that the networks are not so much at fault in their reports as local TV stations, which tend to send less experienced reporters out to cover hostage situations. The point is echoed by Murray Schwartz, president of Merv Griffin Productions, who was a hostage of Palestinian terrorists at Entebbe. Schwartz adds: "There may also be too much concern on the press's part about the holders, and not enough about the hostages."

NBC has written guidelines for its staff, according to NBC News president Lester Crystal. ABC does not have any, however. Neither do most local stations—the first, usually, to send reporters onto the scene. Indeed, many local stations do not *want* guidelines. James Snyder, news director of WDIV–TV, Detroit, who directed coverage of the Hanafis when he worked in Washington, says, "I'll be happy to sit down and write a whole set on what to do the next time somebody named Khaalis takes over three buildings within two miles of the White House. But I'm not so sure that I can write them to cover every terrorist act that comes up."

Harvey Schlossberg disagrees. Sure, he says, there are several different forms of hostage-taking. "But all of these situations can be reduced to some pretty basic psychological dynamics," says Schlossberg. "What we're doing is talking about people who consider themselves losers. But instead of lying on the floor and kicking their feet or holding their breath, they do something powerful—they take hostages. It's a way for them to manipulate the world. You might say that hostage-taking is a problem-solving device for one with an inadequate personality.

"Now I'm *not* talking about censorship in any way," Schlossberg insists. "But reporters have got to know that they're part of the dynamics too. These hostage-takers go from obscurity to world power in two minutes just by holding a gun to somebody's head. So you've got to be careful about how much media coverage you give them. Not enough and they're liable to do something outrageous. Too much and they become insatiable."

It would make many law-enforcement officials happy to see the press formulate guidelines that would rule out such elements of hostage coverage as telephone calls to the criminals, broadcasts describing police tactics, live reports and interviews with the hostage-taker's family.

Many reporters, however, feel that the public's right to know is absolute. "No one is out to jeopardize a hostage's life if the police say that putting this or that on the air will do that," says WDVM–TV (Washington) reporter Susan King. "But we must let the community know what is going on. What I report may turn out for good, or it may turn out for evil. Either way, I have no choice: I have to report, and let the editors make the choice about whether to use it or not."

While most former hostages disagree with King, one who does not is Charles Fenyvesi. Fenyvesi, the editor of the National Jewish Monthly, was captured by Hamaas Khaalis at the B'nai B'rith building. And despite his harrowing experience, Fenyvesi insists that, as a reporter, he would feel obligated to call up a terrorist in the course of covering a hostage situation.

"Sure, there are dangers in calling in. But it's also a way to allow the hostage-taker to let off steam. I remember Khaalis coming in and telling us, 'The whole world is watching me; the whole world is calling me!' It was his moment of glory. Instead of killing us, that became his high point."

Is there any answer to the problem of covering hostage-takers? The most frequently heard one is training. But former hostage Fenyvesi adds some cautionary words: "Face it—as reporters, we all thrive on crisis. But somewhere along the line, reporters have got to be told that their primary assignment is to protect life. The media have got to take life over scoop.

"I can tell you, as a former hostage, that no one has really redefined the assignment of covering hostage situations in that way, yet. I just hope that they—that we do it, and soon."●

## TAXFLATION AND THE WORKING PEOPLE: WHY TAXES FOR BLUE COLLAR WORKERS ARE GOING UP

---

### HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. KEMP. Mr. Speaker, during the August 10 debate on the Revenue Act of 1978, the tax bill, and my attempt, through a motion to recommit with instructions to report back that bill to the House immediately with an amendment including individual income tax rate reductions of about 30 percent over the next 3 years, I stressed the critical importance of that motion and those lower rates to the working people of this country.

My pleas, and those of others equally committed to restoring income growth, went unheeded as the House rejected the motion and then passed the Revenue Act. But that Revenue Act will mean those working people will pay more taxes next year, not less. Under the guise of a tax reduction, that bill allows a major tax increase to go forward.

For example, the average family of four with an adjusted gross income of $12,900 next year will be $7 more, not less, in taxes. Maybe that is not much, but it is when you consider the Kemp amendment would have provided a $73 tax reduction for an $80 difference between the bill and the amendment. If that family makes $18.275 next year, the difference is even more dramatic. The bill provides an $18 reduction, but the Kemp amendment would have provided a $146 one, for $164 difference.

But it is when you stretch out the effects of the bill and the Kemp amendment to 3 years down the road that you see the biggest differences. That family making $12,900 next year will be paying $234 more in taxes in 1981, in contrast with $87 less in taxes if the Kemp amendment had been adopted. The $18,-275 family next year will be paying $208 more in taxes in 1981, instead of the $330 less if the Kemp amendment were law. I put tables, showing the difference between the bill and the Kemp amendment for all lower and middle income categories for 1979, 1980, and 1981 in the RECORD of August 17, pages 26816–26818.

During the August district work period an article appeared in the Boston Herald American, written by Warren T. Brookes, a specialist in economic affairs, making this point: The impact the Kemp-Roth legislation, the Kemp amendment, would have in offsetting the higher inflation-pushed and higher social security taxes over the next 3 years.

Mr. Brookes has taken the average American factory worker and the average American middle-income professional worker and has shown the impact of taxflation—the inflation-pushed higher taxes—and higher social security, as well as higher State and local taxes, on those workers.

This very important piece follows:

THE CASE FOR THE KEMP-ROTH TAX CUT—TAXFLATION AND THE WORKING MAN

(By Warren T. Brookes)

George J. is a factory worker in Brockton. On January 1, 1976, he was earning $200 a week—about the national average of $5 an hour. (See Table I)

After taking out for Federal, state and local taxes (including the property tax on his house) and for Social Security, he was taking home $161.69, to spend.

Thirty months later, in June of 1978, George's weekly gross pay had risen, through his union contract and cost of living increases, to $246—again, about the national average of $6.15 per hour.

It was a husky increase of 23 percent in gross pay in 2½ years—or about 9 percent a year—slightly above the national average of income growth.

Unfortunately, since January 1976, George's total tax bill (federal, state and local) has risen 43.2, nearly twice as fast as his income has grown.

As a result his net after-tax income increased only 18 percent—not 23 percent. During this same 30-month period, the nation's consumer price index (CPI) rose 17.2 percent.

This means that, in constant dollars, George's after tax income in June 1978, came to only $163.07, or a net real gain in that entire period of only $1.38 a week! (See Table I)

To put it another way, taxes and inflation ate up 97 percent of George's entire increase in a 2½-year period—which means that his marginal "taxflation" rate is 97 percent.

George, like all other middle American working people, is on a terrible treadmill—the more he earns, it seems, the less he seems to get. The harder he works, the further behind he falls. No wonder productivity in the U.S. is at lowest growth in history.

This is why George, and millions like him are suddenly climbing on the bandwagon for a massive federal tax cut, similar to the one now being proposed by Kemp-Roth bill. (Unfortunately, the House under Speaker O'Neill's urging, narrowly defeated the Kemp-Roth proposal last week.)

Workers understand Congressman Jack Kemp when he talks to them about "the loss of incentive," and the loss of the ability for people like George to save, and to put away for their future.

As Kemp points out, the whole process of inflation is driving folks like George into higher and higher tax brackets, even while inflation is taking away the real value of their praises.

Thus, as George's income rose 23 percent, his federal income tax on that income rose by 80 percent, and his Social Security tax, rose by 27 percent.

The Kemp-Roth tax cut act would cut George's total Federal income tax liability by 41 percent, or about $380 a year (See Table IV)—and would mean that George would have obtained a net increase after taxes and inflation of $8.68 per week, instead of the $1.38 he actually got.

While this doesn't seem like much comfort, its 529 percent more than he is now getting—and George is ready for any favors he can get.

Take the case of William R. who is a $15,-000 a year accounting clerk in a Boston insurance company. This year he is receiving a 10 percent increase in pay because of a promotion.

Of that $1,500 increase, 38 percent will go to Federal, state and local taxes, for an additional tax bill of $570 over what he is now paying.

And, another $1,050 of that will go down the drain as a result of the inflation rate of 7 percent, which affects his entire income base.

The result is that, after his $1,500 raise, William will be $120 worse off than he was before he got the raise.

This means his "marginal taxflation" rate is 108 percent! That's the kind of rates that Sweden charges its wealthiest class.

This same process is now at work up and down the income spectrum, with the greatest impact on the group from $15,000 to $30,000 in income, and particularly on white collar workers whose gross incomes have not even kept pace with inflation.

We know a man (Lawrence, K.) who is in his middle age, and holds down a middle management professional job paying about $27,700 a year, up 50 percent from the income he drew in a professional job in middle management back in 1967 (See Table II)

Unfortunately, in that 10-year period his total tax bill has risen from $4136 a year to $9554, a rise of 130 percent—or nearly 2½ times as much as his income!

Worse still, he has watched the CPI (inflation) rise by 95.3 percent. The result is that his after tax income has dropped, in real terms by nearly $5000—or—35 percent, even though his gross income has risen by 50 percent.

Unfortunately, there are many middle income Americans like Lawrence K., whose incomes have grown nowhere near as fast as taxes and inflation—and their living standard has steadily declined.

They are paying marginal "taxflation" rates of from 85 to 120 percent on their every raise—and in the process are falling steadily behind the nation. This is why so many of their spouses are being forced into the labor forces, just to keep up their family standard-of-living—and this is one of the main causes on our 6 percent unemployment rate, at a time when we are employing the highest share of our adult work force in history (58 percent).

Small wonder, when Jack Kemp debated his proposal on the Public Education program "The Advocates" recently, 3500 of its largely upper-middle-income liberal audience wrote in their ballots, 87.5 percent in favor of the Kemp-Roth cut—a vote of 7 to 1 in favor.

This, in spite of very strong charges that the Kemp-Roth proposal was "snake-oil" economics, with disastrous consequences in huge deficits and added inflation.

While we have some reservations about the Kemp-Roth advocates' claims that their 30 percent across the board tax cut will quickly "pay for itself," in increased economic growth, and real savings, we have no doubt either of the fairness, or the necessity of a major across the board tax cut approach, such as they suggest.

What few Americans realize is that, without a major tax cut proposal like Kemp-Roth, they face a total increase of $286 billion, in additional taxes between now and 1983—or the next five years. (See Table III). This is a 107 percent growth in individual and payroll taxes in five years!

Of this, some 114 billion will be in Social Security hikes, alone, while another $172 billion is just from "taxflation" effect on the Federal income tax. This means that without Kemp-Roth the Federal tax burden on individuals will grow 65 percent faster than our personal incomes over the next five years.

Unless something like the Kemp-Roth bill is enacted, this nation is faced with 10–20 years of stagflation—caused by declining productivity growth (now the lowest in the free world) weak capital formation—and a nation of working middle income folks dissillusioned by their inability to rise above the mounting tide of government taxflation.

TABLE I.—"TAXFLATION" AND THE AMERICAN FACTORY WORKER

| | January 1976 | June 1978 | Change (percent) |
|---|---|---|---|
| Gross weekly pay | $200.00 | $246.00 | 23 |
| Federal income tax | 10.42 | 18.85 | 80 |
| Social security tax | 11.69 | 14.88 | 27 |
| State and local taxes | 16.20 | 12.15 | 31 |
| Net after taxes | 161.69 | 191.12 | 18 |
| CPI (inflation) index | 166.7 | 195.3 | 17.2 |
| After inflation (1976 dollars) | 161.69 | 163.07 | .8 |

Note: Net change in income out of $46 gross pay increase = $1.38. Marginal "taxflation" rate; 97 percent.

TABLE II.—ACTUAL MIDDLE INCOME PROFESSIONAL WORKER (LAWRENCE K.)

| | 1967 | 1978 | Percent change |
|---|---|---|---|
| Gross annual income | $18,414 | 27,694 | 50 |
| Federal income tax | 2,835 | 4,865 | 72 |
| Social security tax | 277 | 1,071 | 286 |
| Property tax | 560 | 1,850 | 230 |
| Sales and excise taxes | 46 | 760* | 1,552 |
| State income tax | 418 | 1,008 | 141 |
| Net | 14,278 | 18,140 | 27 |
| Inflation index | 100 | 195.3 | 95.3 |
| Net constant income | 14,278 | 9,288 | −35.09 |
| Net loss | | (−4,990) | |

TABLE III.—TAX INCREASES PLANNED FOR 1979–83

[In billions of dollars]

| | 1979 | 1980 | 1981 | 1982 | 1983 | Total |
|---|---|---|---|---|---|---|
| Social security | 9.5 | 12.7 | 24.2 | 32.6 | 35.3 | 114.3 |
| "Taxflation" in income tax | 13.4 | 22.4 | 32.8 | 44.9 | 58.7 | 172.2 |
| Total | 22.9 | 35.1 | 57.0 | 77.5 | 94.0 | 286.5 |

Source: Congressiona Budget Office.

TABLE IV.—IMPACT OF KEMP-ROTH ON FAMILY OF 4

| Income | Present tax | Proposed tax | Tax cut | Percent cut |
|---|---|---|---|---|
| $ 8,000 | $120 | $12 | $108 | 90 |
| $10,000 | 446 | 218 | 228 | 51 |
| $12,500 | 917 | 539 | 378 | 41 |
| $15,000 | 1,330 | 811 | 519 | 39 |
| $17,500 | 1,745 | 1,092 | 653 | 37 |
| $20,000 | 2,180 | 1,388 | 792 | 36 |
| $25,000 | 3,150 | 2,047 | 1,103 | 35 |
| $30,000 | 4,232 | 2,781 | 1,451 | 34 |
| $35,000 | 5,464 | 3,589 | 1,875 | 33 |
| $40,000 | 6,848 | 4,512 | 2,336 | 33 |

Mr. Speaker, the opponents of Kemp-Roth, the Kemp amendment, upon reading and studying these figures, have said that we should not be concerned about 1980 and 1981, for Congress still has time to enact individual income tax rate reductions in future years.

I have several comments.

First, the importances of individual income tax rate reductions to the economy is not only the dollar impact but also the signal it sends.

Does it send the signal that it wants to lower taxes—a signal that will restore taxpayer confidence in their own economic futures, which cumulatively add to a restoration of confidence in the entire economy? Or does Congress want to raise or keep in place unnecessarily high rates—a signal that makes the future look bleak? Congress' signal on August 10 was that it was for higher taxes. It sent the second, and that is the wrong one.

Second, the likelihood of Congress passing another tax bill in 1979 is slight. There are a number of reasons for this.

Historically, Congress does not pass tax bills back-to-back, because it feels it needs more time to see the economic effects. Congress usually begins the consideration of tax measures in odd-numbered years—the offering of administration and alternative proposals, public hearings, and so forth—but usually does not consider them in final form until the following, even-numbered years, which happen to be election years too. Thus, we are talking about 1980.

Further, as reflected in this year's bill, when Congress does act in an even-numbered year—the next is 1980—the tax changes become effective the succeeding year—which would be 1981. Now, take a look at the tax increases we are going to have between now and 1981 and tell me this is what the Congress wants to saddle the taxpayers with. I cannot believe it, but this is what looks like will happen unless the Senate now incorporates the Kemp-Roth provisions, making them applicable in 1979.●

## OCCUPATIONAL CANCER STUDY

### HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. ANDERSON of California. Mr. Speaker, most of our colleagues know of my long concern for the problems created by occupational exposure to asbestos. I hope each Member of this body reads the article in this morning's Washington Post on the subject of work-related cancer.

According to a study recently conducted by the National Cancer Institute and the National Institute of Environmental Health Sciences, at least 20 percent of all cancer cases in the United States will come from exposure to carcinogens on the job.

The article cites the study as indicating that occupational exposure to asbestos alone may result in 2 million premature cancer deaths in the next 30 years. This would account for 17 percent of all cancer deaths in the Nation. The total figure also surpasses that of every man, woman, and child in any four of the districts which we represent.

About 67,000 people a year will get cancer caused by asbestos. Yet the study says, "There is no sound reason to assume that the future consequences of present-day exposure to carcinogens in the workplace will be less than those of exposure in the recent past." Clearly, we must not allow the present-day exposure level to continue.

On October 9, 1975, new Government standards on asbestos were proposed, reducing the standard on allowable levels of asbestos in the workplace from 2 fibers per cubic centimeter, to 0.5 fibers per the same measure. More recently, the National Institute for Occupational Safety and Health has recommended an asbestos standard based on 0.1 fibers per cubic centimeter. However, neither of these proposed standards have been adopted. Given everything we know, the present 2.0 standard is clearly unacceptable, and I have urged that the appropriate Federal agency propose a standard that will assure the health and safety of American workers and the families. With a stronger standard, the figure of 2 million people who will die from asbestos—and they are people, not just statistics—can be greatly reduced.

A particularly tragic aspect of this problem is the fact that a large number of these workers who will die are Federal employees. And a great many of these are defense employees working in our country's shipyards. I have contacted each member of the House Armed Services Committee, urging that the vetoed defense authorization bill be amended to include a requirement for a study evaluating present standards of permissible levels of asbestos in the shipyards and the need for asbestos in new ships, the feasibility and cost-effectiveness of removing asbestos in presently commissioned ships, and promulgating a possible timetable for implementing this removal.

Mr. Speaker, it is an important first step for this Nation to finally recognize the menacing proportions of occupational exposure to asbestos. It is a frightening problem that will not go away by itself. And the time to act is now.●

## BALANCE(S) OF POWER SERIES BOOKS II (H) (ii)—POLITICAL CULTURE

### HON. JOHN B. BRECKINRIDGE

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. BRECKINRIDGE. Mr. Speaker, in the past issue of the CONGRESSIONAL RECORD I inserted the first part of an article entitled "Generations and Politics in the U.S.S.R.," by Prof. Walter D. Connor, appearing in the September-October 1975 Problems of Communism. The conclusion of Professor Connor's article follows:

Many of the Soviet dissidents have a full participant orientation, but they are a miniscule part of the population. Their demands meet resistance and incomprehension from the persisting "subject" culture, shared by rulers and ruled alike. And the "authoritarion interlude," I would argue, extends over the whole of Soviet history.

What is most interesting—and potentially relevant—here is the connection of Soviet elites, including the "successors," to the mass political culture. As children, young adults, and persons commencing their careers, they imbibed that mass culture with its reflections of official dogma—*i.e.*, the "demonology" of the encircling capitalist world and the roseate picture of a remote Communist future—and with its clear indications of penalties awaiting those who might aspire to political participation on any but its own terms.

Their entrance into the "elite" political culture involves further socialization—into the uses and pleasures, the problems and risks, of power. The power they now possess makes them anything *but* impotent. Yet, their intermediate, pre-elite socialization—as wielders of derivative power on the lower levels of party and state bureaucracies—can scarcely have done other than impress upon them the endurance, the "immutability" of the Soviet polity and its game rules. From such material, one does not anticipate the emergence of personalities who will transform the political system in any fundamental way.

*Expectancy.*—This term admittedly lacks precision; if anything, it is distinguished mainly by its crudity. Yet it connotes an important fact, namely, that Soviet citizens, despite their apoliticality and convictions of impotence, are strongly oriented toward their polity's "outputs." Subjects and *not* parochials, they expect things of the state. And herein lies one of the main sources of the stability of the system—but also a source of potential danger, for the edge of expectancy can cut both ways.

Delivery of expected output, or delivery of the unexpected but welcome good or service, has been as critical a part of the Soviet mass experience of governmental performance as the deprivations the regime has imposed. The high evaluations placed by Soviet citizens on the provision of socialized medical care and universal basic education, as well as on the career and upward mobility opportunities afforded by the expansion of higher education, were major stimuli of social support for the

regime even in the Stalin years, as mass interviewing of the refugees of that era demonstrated.[16] Largesse is scarcely the rationale for governmental provision of such services and opportunities: an industrializing regime needs to provide them in order to develop, mobilize, and maintain a more "modern" population and labor force. But the Soviet population, with a historically low level of expectancy (or output-orientation), may experience them as "goods" freely allocated, to be balanced against the rigors and deprivations of a totalitarian regime. Chalidze spoke recently to this point, blaming "ideologues" for not informing the population that "the payment of pensions or the allocation of new apartments is not something for which the government should be thanked, but rather something that should be viewed as an obligation of the government under the Soviet economic system."[17] His criticism is no doubt well-warranted, but the critical point here is that the ideologues may and probably have suceeded quite well in convincing the population that the government is to be thanked for such benefits.

(The relative modernation of Soviet mass expectations despite lifelong exposure to utopian rhetoric also contributes to stability. Modest but steady improvements in housing, the availability of consumer durables, in the provision of food, have apparently been sufficient to keep the rank and file from Minsk and Omsk satisfied with their lot until that day when "communism achieved" will banish scarcity.[18] Although, by Western standards, Soviet life is still mean and shabby, one of the greatest accomplishments of the regime, as "manager" of its subjects' expectations, has been to insure that Western standards do not become a critical reference point.)

This, however, is only one side of the coin: expectancy may also prove a source of weakness. To the degree that I am correct in arguing here that public expectations are a stable and important part of Soviet mass political culture, they can be potentially dangerous in the event that they are abruptly violated.

Recent Soviet history provides us with examples of these dangers. The violent civil disturbances in Novocherkassk in 1962, evoked by sudden rises in the cost of foodstuffs the population *expected* to continue receiving at relatively stable prices, is a well-known one—and I doubt that any serious student would believe this to have been the *only* such disturbance that has occurred for such reasons. Andrei Amalrik underscored precisely these considerations in his "1984" essay.

He argued that working-class irritations and discontent, though real, were neutralized to a considerable degree by material progress, but speculated that a break in that progress, "an abrupt slowdown in the growth of prosperity, a halt or a move backwards, would evoke such strong outburst of dissatisfaction, combined with violence, as would previously have been impossible.[19]

Other evidence, of a different sort, points to the powerful effect of the socialization processes in developing a certain level of "expectancy" among Soviet citizens. Some Soviet émigré arrivals in Israel, it seems, find the adjustment to a life and economy with less structured and formalized allocative mechanisms difficult. Even professionals alienated from the Soviet system—artists, doctors, scientists, etc.—seem in retrospect to have been "well-adjusted" in the sense that their expectations with regard to a guaranteed market for their canvases and services, guaranteed facilities for their work, etc., had been met in the USSR, so that they found the absence of these advantages in Israel a source of difficulty.

Today, as Western nations face severe economic problems and domestic turmoil, the Soviet Union, as usual, seems quite stable—no doubt owing, in part, to an acceptable performance in meeting the mass expectations of the Soviet people. Yet, the USSR has no guarantee that it can manage to do so indefinitely. If circumstances should reduce its output capacity, the expectancies built into the political culture, which now *support* the regime, could well turn against it.

The risks inherent in building stability on capacity to "deliver" reflect the fact that virtually *all* the socialist regimes in the Soviet orbit—albeit in varying degrees—have moved "from utopia to pragmatism" as a central legitimating principle. Their claim on mass loyalties is rooted, now more than ever before, in their ability to "deliver the goods" within a demand structure that they can seek to moderate but cannot transform substantially or suppress.[20]

The Soviet political culture has been fashioned by history—by the history of the system (the blueprint of which is still so much the product of Stalin), by the life histories of Soviet citizens, and indeed by the history of pre-Soviet Tsarist Russia, as well. There is thus the force of *inertia* behind it, a tremendous inertia which must be taken into account in any attempt to anticipate political change in the USSR, and which should make us wary of speculations that rely too heavily on an inexorable "logic" of development of the Soviet system or on the "necessity" of change due to the difficulty of carrying out coordinating and integrative tasks in an increasingly complex USSR.

The impact of history, as we see it in the political culture it has formed, should not be slighted in answering the questions raised at the start about "generation gaps." Some of the answers that relate to the short-term prospects for change are implied in this section. Explicit answers may be deferred until after we have examined some forces which may militate for long-term change—in particular, the various currents of dissent that have emerged in the last ten years and seem to point toward a differentiation of the political culture.

### DISSENT: ALTERNATIVE SUBCULTURES

When the history of the Soviet Union of the 1960's and 1970's is written, dissent will figure as a major phenomenon. On the other hand, the system's phenomenal stability, its failure to crack or to change in character under the assaults of the politically alienated, will provide an equal amount of grist for the historian's mill.

Despite the stability of the system, dissent has nonetheless demonstrated the rise of differentiated political "subcultures" in the USSR, or at least shown that the seeds of such subcultures do exist. If the concrete manifestations of dissent might have been unpredictable, the emergence of the underlying attitudes could have been foreseen.

The manifold problems arising from a policy of coordinating the relations between the polity and the specialized functional sectors of an increasingly complex system—i.e., between apparat and "functional elites"—in accordance with predominantly command rather than exchange criteria[21] have worked to alienate some of those elites and even to cause them to deny the legitimacy of the system.

However, a complementary phenomenon, pinpointed by Rudolf Tökés in a recent essay,[22] complicates any projections one might make on the basis of this alienation: while the regime since the mid-1960's has lost legitimacy in the eyes of many members of functional elites, its legitimacy has probably grown for the masses as a whole. As suggested above, the main reason for this is very likely that the regime has "delivered the goods" in material terms, thereby responding to the "secularized" criteria of legitimacy by which the masses measure governmental performance.

Dissent, then, has been generally—though not totally—an enterprise of the elite. Occupational status, education, and the remnants of a critical tradition among the intelligentsia have made the elites—scientific, technical, and creative—the logical carriers of "pure" political dissent, that is, of dissent which challenges the system as a whole. This kind of dissent requires the ability to construct and manipulate abstract ideas, to conceptualize political alternatives, to ask basic questions about the goals of the policy as well as its methods, whether in a "moral absolutist" or an "instrumental-pragmatic" framework.[23]

The dissenters' prescriptions for change are diverse—ranging from Sakharov's advocacy of liberal democracy, through Solzhenitsyn's appeal for a benevolent and depoliticized authoritarianism (the furtherests he deems the current leadership capable of going), to Medvedev's return to "true" Leninism—but all represent alternative systems, not simply "adjustment" in the polity of today. This may even be the case with some of the neonationalist, "Russite" dissent, which supports new forms of authoritarian politics as desirable in themselves.

Two points are worth making with regard to the potential of this variety of dissent. First, it involves only a small minority of those who belong to functional elites. The majority are presumably willing to accept the micro-level "exchange" relationship which exists between themselves and their political superiors and which assures them of relative affluence and security in return for competent service and political quiescence, though it denies them a role in setting goals.

Second, the issues raised by the minority of dissenters seem to have little root in, and little resonance with, the concerns of the masses. Indeed, the absence of a link between the elite and the masses is one of the weaknesses of the "democratic movement" that have enabled the regime to contain it and to be flexible in coping with it.

The specter of dissident members of the elite helping to generate, and then articulating, active resentments among the masses is one which must at times haunt Soviet leaders, but at present the latter have little reason to worry about so improbable a development.[24]

Very different from "programmatic" political dissent, with its alternatives to the current system, are the national-ethnic and religious forms of dissent. The issues that these kinds of dissent raise do concern members of the Soviet masses. At the mass level, "rights" such as the right to worship, to speak a given language, to keep one's identification with a given group, to live in one's own "home" within Soviet borders, mean more than the right to choose between electoral candidates; they are more than "abstractions" that concern the intelligentsia alone.

Here, there is a commonality of concern that links dissident elites and the masses in a common enterprise—the protection and advancement of national and religious identity. But such demands differ from those of the primarily "political" dissenters in that they could for the most part be accommodated without major change in Soviet political structures, although they would imply changes in the substance of politics. In the ethnic and religious spheres, what the dissenters are demanding, essentially, are immunities, not from Soviet law as it is written, but from the systematic violation of legal guarantees that has been an operative principle of the system in action.

It is an interesting irony that the rise of dissident political subcultures around issues of ethnicity and religion is, to a significant degree, the product of Soviet mobilization successes over the past fifty years. Soviet modernization, as manifested particularly in economic development, in the extension of universal basic education and literacy, even in the development of the state administrative network itself, has moved the non-Russian nationalities far from their predominantly "parochial" political culture of

Footnotes at end of article.

Tsarist times. Among the ethnic masses, there has developed a subject culture in which they are concerned with government "outputs," and at the same time at least the germs of a participant culture have been planted among the ethnic elites. Could peasant illiterates "mobilize" in the way the Crimean Tatars have done? Similarly, could traditional agrarian populations, Russian or non-Russian, organize the networks of communication and action in defense of religious identity that groups ranging from the Evangelical-Baptists to the Lithuanian Catholics have? The answer is clearly negative. But the process of modernization has distributed to national and religious groups, elite and mass alike, a modicum of resources for initiating unconventional political action. These resources, diffused and limited as they are, can hardly be compared to the centralized coercive resources at the disposal of the regime, but they are more than nothing. They have enabled mixed populations of elite and masses to develop a shared political language and consciousness around certain issues of joint interest; to break, at leat partially, with the apoliticality and feeling of impotence of the dominant political culture; and to assert expectations not officially "legitimized." They, like the dissidents whose focus is on the broader issues of political structure, have contributed to the restoration of "politics" in the USSR.

PRESENT AND FUTURE

The past decade has witnessed change in the internal landscape of Soviet political life, change that has emerged, not because of, but despite the regime's preferences. Manifested in ways ranging from nonviolent demonstrations on Pushkin Square to the creation of the now rich literature of dissent, it amounts to an open assumption by a small but committed stratum of people of a "participant" orientation toward politics. In no sense, however, has this change been legitimized and incorporated into the system. The boundaries of the system have remained stable despite the change in the landscape dissent has been contained, though not rooted out.[25]

Various analyses during the same decade have offered differing diagnoses of the Soviet system's health. These have ranged from prescriptions that the system must change its ways or die[26] to conclusions that, afflicted though it undoubtedly is by various maladies to which any complex system may be subject, it still "works" effectively enough to rule out any diagnosis of terminal illness.[27] Certainly, there have been grounds for both kinds of diagnoses, but more, it seems for the latter.

On balance, the Soviet Union has weathered the past decade rather well. Economic reform has been very modest by East European standards, and economic problems persist; but the economy has survived, even with a much smaller influx of Western technology and investment than the regime has eagerly sought. The relationship between the polity and the specialized functional sectors of society has changed little, if at all, but no evidence of consequent instability has yet emerged. In the international arena, the USSR has been the beneficiary of a certain amount of luck, but it has also drawn on its own resources to maximize its advantages. Almost a decade has now passed since some Western analysts saw the alternatives the system faced as transformation or degeneration. It has faced them and has done neither—and it has survived.

Thus, it would appear that those who expect striking changes from the inevitable succession process will be disappointed. Yet it is often hard to temper rhetoric and expectations with recognition of current realities: one analyst suggests that changes to come in the Politburo will be "sweeping and important," but several lines later, in discussing differences in the "formative political experiences" of the current leaders and their presumptive successors, he finds "no strong grounds for believing that they are of major significance." [28] In my own view, any likely newcomers to the Politburo in the next few years have already been sufficiently exposed to the mass and elite variants of the political culture to guarantee that they will resemble their seniors. It is, after all, the only political culture they know, and given their ages, they began learning it in the Stalin era, have witnessed its durability in the Khrushchev years, and seen it support the regime since 1964.

The extreme centralization of power in the Soviet system—a fact inexplicably overlooked by many whose reading of "popular" moods leads them to expect change—provides an additional guarantee of continuity. Even if we had strong evidence of "generational" fissures in the mass political culture, there is no reason to assume that Politburo (and Central Committee) recruitment policies must reflect them. The regime does not engage in random sampling to seek its successors. Those successors are the survivors of a process spanning their prior party-state career, during which those noted by their seniors for incompetence, failures, or manifestations of heterodox ideas and "instability" have gradually been sifted out. The survivors are consequently all the more likely to lack such "negative" characteristics and to be more like their superiors than not. Moreover, until those superiors themsives move on, they can still demote and remove their presumptive successors. They retain the power to do so, and they will use that power.

There is still a further reason for being chary of placing undue importance on generational differences in the context of the political succession. "Leaders" are by definition atypical, unrepresentative of the age groups from which they are drawn. This is so in the Soviet Union as well as elsewhere, and there is no reason to assume that it will change. (Many Western scholars have by now spent substantial periods in the USSR, especially in universities.

Possibly one can read the Soviet future there, but it is not written on the faces of the "typical" students with whom one may have a good deal of contact, but rather on those of the Komsomol activists, with whom one has rather less contact overall.

On balance, then, the Politburo of 1980 or thereabouts should resemble in its dynamics—both in the "united" face it presents to the world and in the bureaucratic log-rolling, interest brokerage, and in-fighting it hides—the Politburo of 1975. This is not to say that a "1980-model" Politburo will not introduce important changes in various policies, but only to suggest that it will "operate" in much the same manner as its predecessor has, combining incrementalism and sudden changes in unequal proportions "Liberalization" or "tightening" in domestic life are alternative possibilities, as are movements "backward" or "forward" on a number of economic issues; yet, whatever turn decisions on policy issues may take, there seems little warrant to expect that they will be reached more openly, or be based on broader "consultative" practices, than has been the case in the last few years.

A new Politburo will inherit the advantage of a mass political culture which has found regime demands tolerable, and output satisfactory, in the post-1953 period. Whoever the main "personalities" may be (a matter of speculation, which I leave to others), they will likely maintain a firm grip on the monopoly of power in the face of potential domestic challengers. If events on the global scale do not disturb military security and economic performance, the successors should manage to continue "delivering" in accord with mass expectancies as in the recent past, and their legitimacy, secularized as it may be, will remain secure. If, on the other hand, a military conflict with China should develop and be prolonged to the point of excessive strain on economic and human resources (despite the popular support such a "defensive" war would initially engender), or if a change in the Middle East situation should lead to a large-scale involvement of troops and materiel abroad, "history" is likely to reassert itself, posing critical questions about the viability of the system under stress.

Then, aspects of the political culture which have been sources of stability could work instead to weaken the system. A regime which rests on the apolitically of the masses in "good" times cannot be sure of the continuing support of apolitical masses in bad times. A regime secure by virtue of convictions of political impotence on the part of the masses cannot be confident of security if its coercive resources, which in the final analysis insure that impotence, are overstretched to deal with foreign enemies. And a regime which has, for all its ideological rhetoric, gained support largely through a thoroughly "secular" satisfaction of the everyday expectations of most of its subjects, can lose such support should the expectations grow to the point where they could no longer be met.

## DISCREPANCIES IN NAVY STATEMENTS CONCERNING THE GENERAL DYNAMICS SETTLEMENT

## HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. DOWNEY. Mr. Speaker, I have obtained a copy of an internal Navy document which critically analyzes the Navy's official memorandum of decision issued in the General Dynamics shipbuilding dispute.

The memorandum of decision, transmitted to Congress on June 19, 1978, purported to set out the factual background of the General Dynamics settlement as well as the terms of that agreement. However, this document, dated July 19, 1978, discloses some serious inaccuracies and misrepresentations in the official memorandum. Among the discrepancies outlined are:

(1) While the Memorandum terms the $2.688 million estimate to complete the General Dynamics' contracts "realistic"—NAVSEA considers this projection to be "optimistic" and estimates that the cost of completing the contracts could be as much as $100 million more than the figure cited in the settlement agreement.

(2) Although the Memorandum stated that the first 23 SSN 688 submarines "were governed by contracts which provided inadequate flexibility to cope with abnormal inflation"—it was commented in the internal document that "Claims evaluation on all SSN 688 contracts has substantiated that delay and manhour overruns not 'double digit' inflation, are the overwhelming cause of escalation/inflation cost growth".

(3) While the Navy claimed that "shipbuilding uniqueness and complexity connected with the new SSN 688 attack submarine were intensified by the severely restrictive contractual structure"—a critique of this statement expressed that "The SSN 688 was (particularly from a shipbuilder standpoint) evolutionary and similar to the SSN 637 Class. Differences, where they existed, were obvious from study of the bid package . . ."

(4) Although the Memorandum stated "Choice of an alternative design source resulted in significant costs to EB despite efforts by the Navy to make this an effective process"—the internal document noted that "There are no indications that the alternate i.e. Newport News design source inherently caused increased costs to EB".

(5) In reaction to a Memorandum statement that "The initial issue of detailed design drawings was completed in March 1976"—the document commented "This is misleading if not inaccurate. By the end of 1973 more than 90 percent of the total first flight SSN 688 Class drawings had been issued".

I find these inaccuracies and misrepresentations to be deeply disturbing. This internal Navy commentary raises several factual issues regarding the responsibilities to be shared for the massive overruns experienced in the General Dynamics 688 contracts. In order to let others judge for themselves, I would like to include the whole Navy document in the RECORD at this time:

MEMORANDUM

Subject: *Memorandum of Decision*, Department of the Navy—General Dynamics Corporation of 19 June 1978.

Enclose: (1) Inaccurate Statements on Subject Paper; (2) Misrepresentations on Subject Paper.

1. PMS 393 was verbally tasked to identify any inaccuracies associated with subject paper.

2. Enclosure (1) contains two inaccurate statements associated with the 19 June 1978 decision. Enclosure (2) contains statements considered to be misrepresentations of the actual situation portrayed in the decision paper. Since, in many cases, there is human judgment involved, the label of misrepresentation vice inaccuracy has been attached.

Very respectfully,

C. E. MASALIN.

INACCURATE STATEMENTS ON SUBJECT PAPER

Statements and comments are "keyed" to the Memorandum of Decision by page and paragraph. Pages with an "A" designation refer to the attachment number 1.

STATEMENTS

"The Navy elected to develop an alternate design capability for submarines after exclusive use of EB design talent for almost 20 years." Page 1, paragraph 7.

"EB had been the submarine Design Agent for all nuclear submarines from the early 1950s until the SSN 688 program came along in 1970." Page 7A, paragraph 2.

"*Second*, Newport News was designated Design Agent for the SSN 688, whereas EB had served in this capacity for all previous nuclear submarines." Page 2A, paragraph 7.

"This changed with the SSN 688 because EB suddenly was just a builder rather than a designer/builder. It is true that the Navy instituted controls in an attempt to make the Newport News/EB interface work. However, there can be no question that there were serious problems associated with this new arrangement."

COMMENT

The Navy has not used EB exclusively for the design of nuclear submarines nor was the role of follow shipbuilder new to EB. Mare Island Naval Shipyard has performed as a nuclear submarine designer as has Portsmouth Naval Shipyard, which designed the SSN 593 Class in which specific case EB was a follow shipbuilder.

Regarding the Newport News Design Agent interface communications with EB, it is a matter of record that open and direct communications were established at the outset of the SSN 688 program. These communications which included NAVSEA, EB and Newport News (designer and builder) included bidder's questions, mock-up visits, Liaison Action Requests (LAR), Design Agent Shipbuilder Conferences and complete availability to EB of all Design Agent prepared data. In addition EB had their own on-site representatives at the Design Agent's plant on a full-time basis.

Further, EB as a submarine Design Agent and follow builder on SSN 593 Class, was completely familiar with design yard/follow yard relationship and how to work under it.

STATEMENT

"EB delivered SSN 637 ships an average of 2.4 months ahead of schedule while the other shipbuilders delivered on an average of 5.3 months late." Page 7A, paragraph 4.

COMMENT

EB delivered its SSN 637 Class ships an average of 5.7 months late from original contract delivery. It did deliver the last 8 of 14 ships of this Class on or ahead of schedule. Newport News, follow builder of the SSN 637 Class, delivered ships an average of 4½ months late to schedule. Further, Newport News delivered its first SSN 637 Class ships, USS *Queenfish* (SSN 651), prior to EB delivering the first ship of the Class, USS *Sturgeon* (SSN 637).

MISREPRESENTATIONS ON SUBJECT PAPER

(Comments on Memorandum of Decision Department of the Navy, General Dynamics Corporation dated 19 June 1978).

Statements and comments are "keyed" to the Memorandum of Decision by page and paragraph. Pages with an "A" designation refer to the attachment number 1. The statements have been arranged in five basic subject groups which are considered most significant and which are repeated throughout the memorandum. The comments are not necessarily meant to "go forward" but are intended to: (1) alert ourselves and management to possible factual disagreement and (2) create possible questions (and answers) that the Command may face in upcoming hearings.

FINANCIAL STATEMENTS

"Independent financial verification confirms magnitude of the anticipated unreimbursed costs." Page 1, paragraph 3."

"Coopers and Lybrand, a firm of independent public accountants retained by the Navy, has concluded, based on their comprehensive review, that General Dynamics employed reasonable procedures in arriving at this amount." Page 2, paragraph 6.

"The financial analysis confirmed that General Dynamics faced a loss of $843 million on the two SSN 688 contracts. This loss projection assumes what both parties believe to be realistic, an average labor inflation of 7 percent per annum and a material inflation of 6 percent per annum over the remaining six years necessary to complete the two contracts."

At the Navy's request, the independent accounting firm evaluated the impact of the probable loss, verified that the financial data provided by General Dynamics was accurate and reached the conclusion that it would remain a viable corporate entity if it absorbed a fixed loss in the order of magnitude ultimately agreed to—$359 million." Page 1A, paragraph 4.

"In February 1978 EB reported that the projected program loss for both SSN 688 contracts could be as high as $981 million. At the same time EB issued a revised delivery schedule which contained substantial slippages. Also included were schedule slippages on TRIDENT. In its April 1978 public financial statements for its fiscal year 1977, GD revised the projected loss to $843 million on the basis of a lower and what both parties believe to be a more realistic estimate of labor and material inflation." Page 5A, paragraph 3.

"The $2,668 million estimate to complete is considered realistic and has been reviewed by the previously mentioned accounting firm, Coopers and Lybrand, as well as by the independent auditors of General Dynamics (Arthur Andersen & Company). This included the estimate of the manhours required to finalize construction of the SSN 688 submarines." Page 12A, paragraph 2.

COMMENT

The above statements deal primarily with cost estimates at completion ($2,668 million) and the resulting loss ($843 million). Ship cost estimating (distinct from financial verification) is clearly outside the technical scope of any accounting/financial firm.

Another concept tied into these statements is that the revised projected loss of $843 million is on the basis of lower and more realistic estimates of labor and material inflation, which "both parties agree to." The Navy agreeing to lower rates may be in conflict with present NAVY/OSD projections of inflation.

Based on analysis of cost at completion, NAVSEA considers estimate at completion of $2,668 million optimistic. NAVSEA currently considers the cost at completion could be as much as $100 million more.

INFLATION/ESCALATION

STATEMENTS

"Given the above factors the protection against inflation afforded by the first two SSN 688 contracts proved inadequate under conditions of schedule slippages and during the double digit era of 1974–1975." Page 3, paragraph 6.

"Fifth, the first SSN 688 contract contained an escalation clause that had proved adequate for economic protection during the stable 1960s but would prove to be woefully inadequate during a period of double digit inflation and under conditions where schedules were radically altered through Navy and contractor related causes, as well as factors beyond the control of either party." Page 3A, paragraph 3.

"Contractually the SSN 688 was a transition phase in defense procurement policies. The first 23 ships (18 under 2 EB contracts and 5 under 2 Newport News contracts) were governed by contracts which provided inadequate flexibility to cope with abnormal inflation." Page 6A, paragraph 4.

"The risks of inflation, inadequately covered in the two SSN 688 contracts, are fully anticipated by the terms of the contract, reformation the settlement provides for (Attachment 2, para. 7)."

COMMENT

The "inadequacies" (if any) of the escalation provisions of the two SSN 688 Class EB contracts is apparent only in the event there is ship construction/delivery delay. Compensation is based on the Bureau of Labor Statistics (BLS) indices which also reflect "double digit" inflation. Claims evaluation on all SSN 688 contracts has substantiated that delay and manhour overruns not "double digit" inflation, on the overwhelming causes of escalation/inflation cost growth.

SSN 688 CLASS VICE SSN 637 CLASS

STATEMENTS

"The Navy entered the 1970s with an urgent demand for a new class of nuclear attack submarines that would embody significant advances in submarine technology." Page 1, paragraph 5.

"The SSN 637 Class nuclear attack submarine, dating back to the early 1960s, had been an extremely successful program due in large measure to excellent performance by Electric Boat, the designer and major producer of this Class. Page 1, paragraph 6.

On the basis of assumptions that history would later portray as overoptimistic, the SSN 688 program was considered to be merely an evolution from the SSN 637. In retrospect, significant misjudgments were made by both the Navy and industry."

"The following extract from the Navy preaward survey regarding construction of the first flight of SSN 688s reveals a basic fallacy: Page 2A, paragraph 3–5.

"The requirements are generally *sufficiently similar to previous SSN 637 Class* and 671 construction requirements to merit the conclusion that EBDIV, with proper management preplanning, etc., can meet the production requirements." (Emphasis added)

COMPETITIVE ENVIRONMENT FOR SSN 688 FIRST FLIGHT (1971)

Hindsight underscores five key aspects of the competition for the first SSN 688 construction contract:

"First, was the stated optimism which viewed the SSN 688 as an evolutionary development, just as the SSN 637 Class was an evolution from the USS PERMIT (SSN 594) Class."

STATEMENTS

"Shipbuilding uniqueness and complexity connected with the new SSN 688 attack submarine were intensified by the severely restrictive contractual structure, the inadequate productivity of a rapidly multiplying work force, and the extraneous forces of unforeseen inflation." Page 3, paragraph 7.

"It gradually became apparent that the SSN 688 was considerably more than just a larger SSN 637." Page 6A, paragraph 3.

COMMENT

These statements dispute and contradict the Navy's technical judgements regarding comparisons of SSN 688 Class with the previous SSN 637 Class submarines. The SSN 688 was (particularly from a shipbuilder standpoint) evolutionary and similar to the SSN 637 Class. Differences, where they existed, were obvious from study of the bid package data—drawings, specifications and lists of Government Furnished Equipments and full scale mock-ups, all of which were available to EB prior to building SSN 688 Class submarines.

EB was in a particularly good position to assess the "evolutionary" aspect of the differences between SSN 637 and SSN 688 designs. EB was directly involved in similar past evolutions in submarine design such as that from Nautilus to Skate and Skate to Skipjack.

With regard to statement from the preaward survey, NAVSEA notes the purpose of this survey was to determine if EB had the capacity and capability to build SSN 688 ships. This EB has done. NAVSEA questions conclusion that reference to similarity to SSN 637 Class reveals a "basic fallacy."

SECOND FLIGHT PRICING/NEGOTIATIONS

STATEMENTS

"Second flight negotiations were significantly influenced by SSN 637 experience and early first flight experience, primarily estimates rather than actuals." Page 2, paragraph 4.

"Government and contractor optimism still ran high. EB cost reports and the first flight manhour estimates were the primary basis for second flight pricing. First flight manhour estimates to complete showed little change from those proposed and accepted in January 1971 when that flight was awarded." Page 3A, paragraph 6.

"In effect, the Navy was in a sole source position with Electric Boat." Page 4A, paragraph 2.

"The second flight (11 ships) bidding posture by EB is a key to an understanding of the critical situation which later developed. A basic premise for the bid was the very favorable SSN 637 experience, together with more reliance on the then meager first flight experience than was warranted." Page 6A, paragraph 1.

COMMENT

The second flight negotiations were not influenced by SSN 637 experience. Although the shipbuilder utilized SSN 637 Class data in his proposal preparation, the negotiations were based exclusively on SSN 688 requirements with particular emphasis placed on the EBDIV direct manhour estimates (as contained in EB cost reports) to construct the first flight ships. SSN 637 experience performance was not discussed.

DESIGN AGENT

STATEMENT

"Choice of an alternative design source resulted in significant costs to EB despite efforts by the Navy to make this an effective process." Page 3, para. 4.

COMMENT

There are no indications that the alternate i.e. Newport News design source inherently caused increased costs to EB.

STATEMENT

"The initial issue of detailed design drawings was completed in March 1976." Page 12A, para. 4.

COMMENT

This is misleading if not inaccurate. By the end of 1973 more than 90 percent of the total first flight SSN 688 Class drawings had been issued. Those not issued were essentially minor drawings such as stowage lockers or were associated with HMR's which were authorized later in the construction period.

MISCELLANEOUS

STATEMENT

"By implementing the foregoing basic elements of the Agreement between the Navy and General Dynamics, the Navy will, by strict analysis, pay a competitive price for the 18 SSNs constructed by General Dynamics." Page 4, paragraph 7.

COMMENT

It is not clear what is meant by "strict analysis" or "competitive price." The only competitor is Newport News where a final price has not been established. However, based on current Navy estimates, it appears that EB ships (including the proposed settlement) are significantly more costly than those at Newport News.

STATEMENT

"Fourth, the primary award criteria were based on ceiling price. The result of this radical technique was inordinately to lower the spread between target and ceiling in a fixed-price-incentive contract and reduce virtually to the point of disappearance the flexibility for absorbing cost increases within the terms and conditions of the contract. This technique was used by the Naval Sea Systems Command only on the SSN 688 first flight contract and, as a matter of Naval policy, has not and will not be used again." Page 3A, paragraph 2.

COMMENT

Award of the SSN 688 Class follow ship contracts was based on the objective of obtaining the lowest total cost to the Navy. Contractually, ceiling price is the maximum Government cost exposure. Therefore, ceiling price was determined by the Navy to be the best method for evaluating the first SSN 688 Class bids. All three bidders were clearly on notice of this bid evaluation method prior to submitting their bids. The spread between target and ceiling was set by the shipbuilders in their proposals.

STATEMENT

"Newport News" turned out to be essentially noncompetitive in the second flight bidding. Proposed prices were high and many exceptions were taken to the terms and conditions of the request for proposal. This was a period of deteriorating relations between the Navy and Newport News." Page 4A. paragraph 2.

COMMENT

Agreement was reached with Newport News on terms and conditions. The award was based solely on price. It had nothing to do with deteriorating relations between the Navy and Newport News.

STATEMENT

"The delay and disruption caused by late GFI furnished by the Navy Design Agent warrant recognition beyond that obtained through strict claims analysis. The inherent difficulties of documenting and analyzing disruption are well understood in Government and in the shipbuilding industry. The lateness of GFI early in the program, particularly as it impacted EB as the follow-on shipbuilder, undoubtedly created a disruption problem that is real despite an inability to quantify this with desired precision." Page 10A, paragraph 5.

COMMENT

The Navy by claims and analysis and quantification paid for a major percentage of the claimed delay and disruption caused by late GFI.●

## MIA LIVE SIGHTINGS II

### HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. DORNAN. Mr. Speaker, in yesterday's CONGRESSIONAL RECORD (p. 28838), I asked the Members of this House to oppose any premature declarations of death for Americans listed as missing in action in Southeast Asia. When I consider the possibility, the awful possibility of living, imprisoned Americans I am reminded of the mental anguish of the dethroned King of France in Dumas' great fictional work, "The Man in the Iron Mask". In the depths of despair the forlorn prisoner cries: Does anyone know I am here? I imagine the horror. I am appalled by the realization that the fate of some of our missing men could be the same. It compels me to ask Members of this House, again and again, to favor the pursuit of every avenue, to unravel every shred of evidence, to bring this issue to a satisfactory conclusion.

I hope that some men are alive. I know that many honorable Members of this House, in all sincerity, do not hold out the possibility for that hope. I know that, with the deepest convictions, they believe that every American lost and unaccounted for in Southeast Asia is dead—and that we should put the issue to rest and close the final chapter of our anguished involvement in Vietnam. But that is just the point: It is a matter of belief. And, in any case, belief—no matter how strongly held—one way or the other, is simply not enough; belief does not substitute for sound, empirical evidence. It does not substitute for hard investigation, diplomatic pressure, or the most extensive analysis of testimony and the cross-examination of refugees who claim to have seen Americans living in Southeast Asia in the aftermath of the Vietnamese War.

Mr. Speaker, once again, I beg the indulgence of this House. I ask Members to be aware that the possibility exists that Americans may, indeed, be alive in Southeast Asia. I cannot vouch for the truth of the information given to me. As I mentioned in my remarks yesterday, we cannot accept mere claims as hard evidence, any more that we can simply accept Vietnamese Communist denials to the contrary. Each should be thoroughly investigated.

I have received and sent the relevant information and untranslated letters to the Defense Intelligence Agency for analysis. Yesterday. I inserted letters "one" and "two." Today, I am inserting letters "three," "four," and "five." They are again properly sanitized of names for the protection of Vietnamese family members from official Communist retaliation.

I ask my colleagues, once again, to give these documents their closest attention.

The letters follow:

LETTER NO. 3

(Transcript of a letter by (female), Japan, Mar. 25, 1978)

DEAR MRS. LE THI ANH: My name is (deleted). I'm presently in a refugee camp in Japan. I escaped from Vietnam and arrived in Japan on October 17, 1977. I'm waiting for my turn to be admitted to the U.S.A.

Today, I was surprised to read in the Trang Den magazine your ad re: information about the MIAs. The ad gave the address to contact as your name and address. So, I decided I should write to you immediately to let you know about the Americans who are still in Vietnam. Mrs. Anh, I believe there is quite a number of them in Vietnam and not just a few.

I know it because I have seen them on a TV show, which the Communists showed to an audience of cadremen, officials and government employees. The Communists accused the Americans of crimes and they denounced the men's crimes on the show. Mrs. Anh, the poor men, I felt so sorry for them, their faces were pale, thin and haggard, their eyes were hollow like the bottom of ricebowls. And while they showed the film, the commentator said "those imperialists must be severely punished, we shall do so until their government pays for the war damage and rebuilds in full for Vietnam, especially the areas they have bombed and destroyed."

Mrs. Anh, I also know more thanks to a friend of ours, a Vietnamese doctor who have been released from a prison camp in North-Vietnam. Because this doctor was interned in the same camp as my cousin who was an artillery officer captured during the year 1971. My cousin was still in the camp so he sent words to us through the doctor who came to see us right away after his return.

The Dr. said today there are still many American prisoners of war who are still being interned in North-Vietnam, as well as Vietnamese POWs. I asked him if they gave the same ration to the Vietnamese POWs and the Americans POWs and he said that the Vietnamese received less foods than the Americans, because they wanted to feed the Americans properly to keep them in good health in order to claim for reparation payments from their government.

Mrs. Anh, I was among those who were shown on the TV program because at the time I was a government employee in charge of controlling merchandises. After three months, I came under investigation because they found out that I belonged to a "family which collaborated with the imperialists," they fired me so I managed to escape. Now I arrived here, I'm all by myself, without any friends or relatives. I have to stop here because I have to go and teach a course for refugees. I swear that all what I write to you today is the truth.

Signed, (deleted).

LETTER NO. 4 MAY 6, 1978.

DEAR MRS. ANH: My name is (deleted), I was an officer of the former Republic of Vietnam. I did not report to the new authorities and my family and I left our home on (deleted) and went into hiding until we finally succeeded to escape from Vietnam on July 7, after several unsuccessful attempts.

I lived under Communist rule for over 15 months and have seen or hear about the following MIA cases:

(1) I have seen an American on Ky-Dong St. in Saigon about June 75, he was in dirty clothes, Japanese rubber sandals, thin emaciated and he look fearful. It was nightfall when I saw him.

(2) A nephew of my wife who came to see us on about Feb. or March 1977 and he told us that there was an American hiding in his wife's family home in the area of Truong Minh Giang St. and that the Communists didn't know about him yet.

(3) My wife's brother who came from North Vietnam and he came to visit us. He told us that his son was a doctor serving with the Hanoi government. The doctor has served a number of years in the highlands in the North, and he has seen a village in which most inhabitants were Americans, some of those have married Vietnamese women.

I'm sorry that I did not hear or do not remember the name of the place where those unfortunate men were being held.

Signed, (deleted).

LETTER NO. 5, MELBORNE, *December 23, 1977.*

DEAR UNCLE AND AUNT: I received your letter yesterday at about 2 p.m., but had to go to class so I can answer your letter only today.

Following, I shall recount the circumstances of my sighting of the two Americans about 2 years ago; that was I believe, 4 or 5 days after the Communists took Saigon. It was about 8 a.m. on 02–05–1975, I and a friend of mine by the name of (deleted) we were sitting in a cafe in the Xeo Ro marketplace (village of Dong Yen, district of Kien An, Rach-Gia, now Kien-Giang, province).

While my friend and I were sitting there sipping coffee and talking we suddenly saw people running in the direction of the (river) dockside. We were surprised and so we followed the crowd to see what was the matter. We found that people ran up to see two Americans. Both Americans were sitting in the middle of a motorized sampan, both had their hands tied behind their backs with a Vietnamese cotton striped scarf. There were 7 people on the sampan, including the two Americans; two Communist cadremen sat on the front of the sampan and three sat on the rear and the Americans sat in between. At that very moment, two communists ran up to the city hall of Dong Yen for something I do not know what.

One of the two Americans was a white man of about 30 years old, quite thin. The other was a Black man of about the same age, but not too black and the latter was a little bit fatter and more solidly built.

Because I stood not too near so I could not guess their height, by my estimates are that they were about 7 or 8 centimeters taller than you, uncle. I didn't pay any attention to the color of their eyes.

The two men apparently cried, and cried a lot, because traces of tears were still on their faces, their eyes were red, and their faces showed fear, sorrow and worry.

The Communists said something, but I'm sorry I do not remember. Most people in Xeo Ro felt sorry for the unlucky men. Most of the local people were families of the former Saigon Army and Administration personnel so they were rather sympathetic to the prisoners.

Afterward, the Communists took the two men on in the direction of Kien An which meant they were heading deeper into the U-Minh forest. The sampan stopped for about 20 minutes at the Xeo Ro dock.

I believe those two men were military men because of their military garbs.

Signed, (deleted).●

## PRESIDENT'S VETO OF DEFENSE AUTHORIZATION BILL REFLECTS GOOD BUDGETARY AND MILITARY JUDGMENT

### HON. CHRISTOPHER J. DODD

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. DODD. Mr. Speaker, last Thursday, I joined the 206 members of the House of Representatives who voted to sustain the President's veto of the defense authorization bill.

The President was right on target in insisting that $2.1 billion for a nuclear-powered aircraft carrier be deleted from the bill. The inclusion of the nuclear carrier, I believe, actually weakened our national defense because other more im-

portant programs were cut to pay for the carrier.

Funding for a fifth nuclear aircraft carrier would also continue what I believe to be a shortsighted and unwise policy of spending huge amounts of money to build just a few very expensive ships. I am concerned that for too long, our Navy has been evolving into a smaller and smaller force of larger, more expensive vessels. It makes more sense to build larger numbers of smaller ships which would be less vulnerable in the event of war. Modern surveillance techniques and new, more sophisticated missiles are rapidly making aircraft carriers—already high value targets—extremely vulnerable to successful enemy attack. Instead of investing the taxpayers' money in a few, large vulnerable ships, it would be preferable to make our fleet less vulnerable to attack by building a greater number of less expensive ships.

I might point out that the United States could build and operate three conventionally-powered aircraft carriers for the price of two nuclear-powered carriers. If we decide that our Navy does need more aircraft carriers, then smaller conventional carriers, which can operate with existing aircraft, should be built. In the not too distant future, I am certain that the versatile vertically launched, (V/STOL), planes will become the mainstay of our carrier aircraft. As these planes need very little deck space to take off and land, it seems foolish to spend exorbitant sums of money on a large carrier, the main advantage of which is its enormous deck area. The United States is already going to have four large nuclear carriers; we do not need yet another one.

I recognize that some people are worried that another oil embargo might hamper the operation of conventional, oil-powered carriers. However, I should point out that our armed services have the highest priority on fuel and could easily operate on the large quantities of domestic oil or on the vast amounts of oil already reserved for the Navy.

I should add that increasingly the mission of our Navy is sea control, or the ability to keep our vital lines of communication and supply open to Europe and the Pacific. This ability to control the seas depends on our success in insuring that our adversaries' naval forces, and especially their submarines, cannot interdict our maritime supply and communication lines. Nuclear-powered aircraft carriers add little to the sea control mission. Their primary mission is power projection. But in an era of intercontinental ballistic missiles and missile-firing submarines, it is highly doubtful that we would consider using our carriers to carry out nuclear strikes against another nation. And as we move away from an era of intervention in Third World countries, the need for yet another nuclear carrier for the power projection mission also diminishes.

In conclusion, Mr. Speaker, I believe that the President's veto of the defense authorization bill, because of its addition of a fifth nuclear aircraft carrier, reflects not only good budgetary sense, but a sound recognition of the changing requirements of the U.S. fleet as well. It was for these reasons that I supported the President's veto.●

## TRAGIC SITUATION IN LEBANON

### HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. DERWINSKI. Mr. Speaker, I wish to direct the attention of the Members to a report I received from Our Lady of Lebanon Roman Catholic Maronite Rite Church in Hillside, Ill. This report represents the deep concern of Lebanese-Americans over the tragic situation that exists in Lebanon.

Under my amendment to the foreign assistance appropriations bill, Syria will be denied $90 million in assistance. A similar bill in the Senate has gained much support.

The massacre and forced migration of Christians in Lebanon is approaching genocide and calls for condemnation and action by the United States and the world community.

The report follows:

DO YOU REALLY CARE ABOUT YOUR FELLOW CHRISTIAN?

Has it ever occured to you my friend that, in the twentieth Century, you could be massacred just because you are a Christian?

The Lebanese Christian Community is facing this threat today Their residential areas of Beirut are being pounded indiscriminately with bombs and rockets. Hundreds of thousands of Christians are without food, water and electricity, tucked in shelters awaiting for the christian world to help them. Do you care my friend?

In the years 745 A.C. the Christians of Lebanon have been massacred at the hands of the Khalif Marwan. . .

In the years 1860 A.C., once again hatred and fanaticism swept their death sword across the Lebanese Christian Community. . .

And since 1975 until this very minute, the Christians of Lebanon are enduring the most savage systematic annihilation plot since World War II. . . The Only Christian Community in the Middle-East, and the Oldest one in the world is facing the danger of extermination. Will you help?

Lebanon needs your help my friend, Lebanon needs more than ever your Prayers, your Moral Support, and a little share in the Human Rights you have been advocating proudly. and God Bless You.

"The righteous will grow like the cedars of Lebanon"—Psalm 92/13.

I. INTRODUCTION

(a) Lebanese society is: a free society, pluralistic society, and democratic society.

(b) Lebanon has always served as a land of refuge for the oppressed people in the Middle East.

(c) 7,000 years of history back the above.

II. FACTS

(a) Plot against the Christians:

1. Arab states are not willing to absorb the palestinians within their society. They had to impose them on the most open one.

2. The Syrians who took part in the 2-year war in Lebanon, are now "peace-keepers" (?) which is a highly abnormal situation.

3. The Syrians, who came in as peace-keepers according to the "Riyadh agreement", and, who supposedly are under the explicit command of the President of Lebanon, became the aggressors.

4. The Syrians were supposed to disarm the terrorists, as a first stage; the Christians agreed to surrender their arms to the Lebanese Army, as a second stage; return of power to the Central Government with the withdrawal of the Syrians, as a third stage. They failed in their first stage. In addition, they started their harrassment campaign against the Christians. They never took their orders from the President of Lebanon. All cease-fire requests had to go to the President of Syria. They fomented differences between Christian parties by subversive activities such as massacres, killings and plain genocidal actions (Bekaa recently).

5. There are enough indications that the Syrians are acting on a plan, entirely different from the one they agreed upon, openly.

(b) Present situation:

1. The Syrians are no longer operating legally in Lebanon.

2. The President of Lebanon is a mere puppet caught in his own net by the Syrians. The Christians are the lamb of sacrifice of the whole game.

3. The Syrians are shelling indiscriminately the Christian residential areas of Beirut (including all hospitals), for the sole purpose of forcing the Christian citizens to contained neighboring areas, and the plan calls for complete dismantling of the Christians' self-defense. The Christians are definitely fighting for their survival and the survival of the only democratic Christian community in the Orient, and more specifically, in the Arab world. The hate of the Syrians to the Christian minority, is only equal to their hate to the Jewish community, the only two minorities in the Middle East.

III. CONCLUSION

1. Request from President Carter to use all his influence and means to stop immediately those violations of human rights in Lebanon and put an end to the genocidal scheme perpetrated by the Syrians and Palestinians, and their immediate withdrawal from Lebanon.

2. Request that the Palestinian population problem not be resolved by sacrificing the only free country in the Middle East.

3. The Arab states must absorb the majority of the Palestinian burden, until a final settlement with Israel is reached.

4. The state of Lebanon has been created for the sole purpose of preserving the few Christian and other minorities in the Middle East, and must remain so.

5. Whatever decisions are taken by President Carter, bearing in mind the human rights and the virtues on which our Nation stands, will be irrevocably accepted by the Lebanese people.

6. The American-Lebanese community cannot accept that Lebanon be used for appeasing temporarily the emotional thirst of the Arabs, because Lebanon has always been the bar-in-the-wheel for any Russian influence in the Middle East. By dumping Lebanon, killing its resistance and forcing its people to migrate, the U.S. will be in the long-run playing the exact game the Russians want them to play. In such a short time, the security of Israel and the rest of the Arab states, as far as communism is concerned, will be in jeopardy.

7. The Lebanese community, in its way of life, is ideologically anti-communist. Thru the years, it has proven that communism could not find roots in Lebanon. And, this particular characteristic, is not available in other Arab states. Lebanon is considered as a key-stone factor for any communist expansion in the Middle East.●

## NEED FOR SCRUTINY OF D.C. CONSTITUTIONAL AMENDMENT

### HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. DERWINSKI. Mr. Speaker, while I appreciate the fact that the House and

Senate have worked their will on the issue of congressional representation for the District of Columbia, the amendment now must be objectively studied by the legislatures of the 50 States.

The distinguished columnist, George F. Will directs special attention to the responsibility of the States in ratifying this proposed constitutional amendment in an article in today's Chicago Sun-Times. The article follows:

[From the Chicago Sun-Times, Sept. 12, 1978]

D.C. AMENDMENT BADLY FLAWED

(By George F. Will)

WASHINGTON.—The nation owes a full measure of gratitude to the legislatures of California and Delaware for their dignified abstinence from haste. They have refused to ratify without scrutiny the recently proposed constitutional amendment to give congressional representation to the District of Columbia "as if it were a state."

The Constitution has been changed four times in the last 18 years, and today two more amendments are before the states. If this is not itself evidence of a too casual approach to the Republic's fundamental law, the tactics used by some who favor the amendments are such evidence.

When the Equal Rights Amendment was sent to the states, Hawaii rushed to ratify it the first day. Nebraska, scrambling to be second ratified it improperly and had to do it again six days later. Twenty states ratified it within three months, most wtihout hearings or other evidence of thought.

ERA supporters tried to generate a moral tidal wave by insisting that ERA is a "simple" matter of being "for women," a matter about which intelligent people could not honorably disagree. Today people trying to create a stampede toward ratification of the District of Columbia representation amendment argue that it is (in the words of a California stampeder) a "black issue."

Such assertions were sufficient to propel the amendment through California's Assembly, which evidently is not a deliberative body. California's Senate refused to rubberstamp the amendment, so Californians will have an opportunity to note that the issue is constitutional, not racial.

As he frequently does, Rep. M. Caldwell Butler (R-Va.) has defined a position to which moderate people of good will can rally. He notes that the Constitution provides for three kinds of entities: states, territories and the District of Columbia. Today the District has three electoral votes in presidential elections and a nonvoting delegate in the House of Representatives.

The proposed amendment would give the District voting representation in the House based on population; give Senate representation "as though it were a state"; grant participation in the electoral college substantially as a state, and grant participation in the process whereby the Constitution is amended. Of these four, says Butler, only the first is proper.

As regards the amending process, note that under the law granting the District "home rule," the city council remains an agent of Congress subject to Congress' veto. That is, the law is consistent with the Constitution's provision that Congress shall "exercise exclusive legislation, in all cases whatsoever" over the District. But what this means is that were the city council to function as the equivalent of a state legislature in the amendment process, Congress would submit amendments for the approval of its own agent.

As regards participation in the electoral college, the weight of the District vote should be registered by electors equal in number to the members of the House allocated according to population (perhaps two after the 1980 census). But the District should not have two additional electoral votes as states do, because the District should not have senators.

As Butler says, the Founders made a distinction that should not be blurred—a distinction between the House, in which people are represented, and the Senate, in which states are represented. States are the fundamental entities of this federal system. Senators represent geographical regions containing diverse interests.

But the District is only a city of moderate size, and because of restrictions on its growth, it will steadily descend the list of largest cities as other cities grow.

Were the District to elect senators, they would be the only two representing no rural interests whatever. So state legislatures with strong rural representation will be reluctant to ratify the proposed amendment, which would dilute their Senate power even more seriously than it would dilute the power of other states. That is not the most elevated reason for doing the right thing, but rejecting this proposed amendment's approach to District representation is the right thing to do.

Because the Constitution stipulates that Congress must have final responsibility for the District, residents of the District have a special interest in congressional representation. But that fact about final responsibility is one reason why it would violate the essence of American federalism to grant to the District representation in the Senate, a body that expresses the principle of a union of sovereign states.●

## CIVIL SERVICE REFORM

### HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 12, 1978*

● Mr. BOB WILSON, Mr. Speaker, I was very sorry to miss the vote yesterday on the Hanley amendment to the Civil Service reform bill. This bill had been rescheduled repeatedly and, unfortunately, several long-standing commitments in my district yesterday made it impossible for me to return to Washington in time. I would have voted for the amendment offered by Mr. HANLEY and am deeply gratified by the outcome.

Those who were peddling major revisions in veterans' preference told us that the principal beneficiaries would be Vietnam-era veterans. A quick review of the facts, however, showed this argument to be specious.

The committee bill provided that nondisabled veterans would have a one-time, five point veterans' preference usable only within the first 15 years after their date of discharge—and I want to emphasize those words: "date of discharge"—not the date of the enactment of this legislation. Thus, in 1980, a half million young men and women who served during the Vietnam era and were discharged in 1965 would lose their veterans' preference. That figure escalates rapidly over the next few years, so that by 1987 the cumulative total of Vietnam-era veterans who would have lost their employment preference status would be more than 6 million. Yet, this was a bill which purported to help the Vietnam-era veteran.

You also heard the argument that those who oppose changes in veterans' preference are only so-called "old-line" veterans' organizations which do not represent the Vietnam generation. Again, the facts belie this situation.

The Veterans of Foreign Wars, for example, are strongly opposed to revising veterans' preference; 30 percent of their membership served in Vietnam or contiguous waters. Another opponent is the Non-Commissioned Officers' Association, 190,000 strong; Vietnam-era participants compromise 90 percent of their membership. Other veterans' groups reflect a similar make-up and a similar stance in opposition.

With the passage of time, it is too easy to forget the incredible experience of Vietnam. For many of the veterans of that conflict, however, the memory is still all too vivid. When Johnny came home from Saigon, Da Nang, and the Mekong Delta, he was not greeted with cheers, confetti, and ticker-tape parades. He, more probably, was met with suspicion, mistrust, even hatred, by a public which tended to link the debacle of the war itself with the intrinsic worth of the young men who served there. While in recent years we have made some progress in healing the Nation's wounds and reassimilating these young veterans into the mainstream of American life, we are not yet home free. This is particularly the case for minority veterans who have experienced staggeringly high rates of unemployment. It is interesting to note that minority veterans comprise only 8.5 percent of the U.S. veterans population, but make up 19 percent of the veterans employed by the Federal Government.

Aside from the basic question of getting a job, there is also the problem of retaining it during periods of belt tightening. The changes proposed by this legislation would have put the Vietnam veteran at a disadvantage in this arena, too.

The committee bill eliminated all preference for retention purposes after 8 years from the date of initial appointment to a Federal position. This meant that, when a "RIF" came a decade after employment, the young man or woman who gave 2 or more years to the service of his or her country would now be at a susbtantial disadvantage in comparison to a contemporary who managed to avoid military service and went directly to work for the Federal Government. The ultimate irony on this situation is that the nonveteran may well have actively dodged the draft!

I certainly do not impugn the intentions of those who wish to restructure the veterans' preference system nor their goal of opening up greater employment opportunities within the Federal Government for women. I must take strong issue with their methodology. In years of peace, it is all too easy to forget the debt of gratitude which we owe to those who put aside their private pursuits and went into the service of their country. Veterans' preference is one small compensation for that service, which I feel strongly that we should retain.

I want to commend my House colleagues for their overwhelming vote yesterday in support of the Hanley amendment.●
